As used in this section, the terms *depreciation* and *depreciable real property* include amortization and amortizable leasehold of real property. As used in this section, the tenant-stockholder's proportionate share is that proportion which stock of the cooperative housing corporation owned by the tenant-stockholder is of the total outstanding stock of the corporation, including any stock held by the corporation. In order to determine whether a tenant-stockholder may use one of the methods of depreciation prescribed in section 167(b) (2), (3), or (4) for purposes of subdivision (i) of this subparagraph, the limitations provided in section 167(c) on the use of such methods of depreciation shall be applied with respect to the depreciable real property owned by the cooperative housing corporation in which the tenant-stockholder has a proprietary lease or right of tenancy, rather than with respect to the stock in the cooperative housing corporation owned by the tenant-stockholder or with respect to the proprietary lease or right of tenancy conferred on the tenant-stockholder by reason of his ownership of such stock. The allowance for depreciation determined under this subparagraph shall be properly adjusted where only a portion of the property occupied under a proprietary lease or right of tenancy is used in a trade or business or for the production of income.

(2) *Stock acquired subsequent to first offering.* Except as provided in subparagraph (3), in the case of a tenant-stockholder who purchases stock other than

as part of the first offering of stock by the corporation, the basis of the depreciable real property for purposes of the computation required by subparagraph (1)(i) of this paragraph shall be the amount obtained by:

(i) Multiplying the taxpayer's cost per share by the total number of outstanding shares of stock of the corporation, including any shares held by the corporation,

(ii) Adding thereto the mortgage indebtedness to which such depreciable real property is subject on the date of purchase of such stock, and

(iii) Subtracting from the sum so obtained the portion thereof not properly allocable as of the date such stock was purchased to the depreciable real property owned by the cooperative housing corporation in which such tenant-stockholder has a proprietary lease or right of tenancy.

In order to prevent an overstatement or understatement of the basis of the depreciable real property for purposes of the computation required by subparagraph (1)(i) of this paragraph, appropriate adjustment for purposes of the computations described in subdivisions (i) and (ii) of this subparagraph shall be made in respect of prepayments and delinquencies on account of the corporation's mortgage indebtedness. Thus, for purposes of subdivision (i) of this subparagraph, the taxpayer's cost per share shall be reduced by an amount determined by dividing the total mortgage indebtedness prepayments in respect of the shares purchased by the taxpayer by the number of such shares. For purposes of subdivision (ii) of this subparagraph, the mortgage indebtedness shall be increased by the sum of all prepayments applied in reduction of the mortgage indebtedness and shall be decreased by any amount due under the terms of the mortgage and unpaid.

(3) *Conversion subsequent to date of acquisition.* In the case of a tenant-stockholder whose proprietary lease or right of tenancy is converted, in whole or in part, to use in a trade or business or for the production of income on a date subsequent to the date on which he acquired the stock conferring on him such lease or right of tenancy, the basis of the depreciable real property for purposes of the computation required by subparagraph (1)(i) of this paragraph shall be the fair market value of such depreciable real property on the date of the conversion if the fair market value is less than the adjusted basis of such property in the hands of the cooperative housing corporation provided in section 1011 without taking into account any adjustment for depreciation required by section 1016(a)(2). Such fair market value shall be deemed to be equal to the adjusted basis of such property, taking into account adjustments required by section 1016(a)(2) computed as if the corporation had used the straight line method of depreciation, in the absence of evidence establishing that the fair market value so attributed to the property is unrealistic. In the case of a tenant-stockholder who purchases stock other than as part of the first offering of stock of the corporation, and at a later date converts his proprietary lease to use for business or production of income:

(i) The adjusted basis of the cooperative housing corporation's depreciable real property without taking into account any adjustment for depreciation shall be the amount determined in accordance with subdivisions (i), (ii), and (iii) of subparagraph (2) of this paragraph, and

(ii) The fair market value shall be deemed to be equal to such adjusted basis reduced by the amount of depreciation, computed under the straight line method, which would have been allowable in respect of depreciable real property having a cost or other basis equal to the amount representing such adjusted basis in the absence of evidence establishing that the fair market value so attributed to the property is unrealistic.

(c) *Limitation.* If the allowance for depreciation for the taxable year determined in accordance with the provisions of paragraph (b) of this section exceeds the adjusted basis (provided in section 1011) of the stock described in paragraph (a) of this section allocable to the tenant-stockholder's proprietary lease or right of tenancy used in a trade or business or for the production of income, such excess is not allowable as a deduction. For taxable years beginning after December 31, 1986, such excess, subject to the provisions of this paragraph (c), is allowable as a deduction for depreciation in the succeeding taxable year. To determine the portion of the adjusted basis of such stock which is allocable to such proprietary lease or right of tenancy, the adjusted basis is reduced by taking into account the same factors as are taken into account under paragraph (b)(1) of this section in determining the allowance for depreciation.

(d) *Examples.* The provisions of section 216(c) and this section may be illustrated by the following examples:

Example 1. The Y corporation, a cooperative housing corporation within the meaning of section 216, in 1961 purchased a site and constructed thereon a building with 10 apartments at a total cost of $250,000 ($200,000 being allocable to the building and $50,000 being allocable to the land). Such building was completed on January 1, 1962, and at that time had an estimated useful life of 50 years, with an estimated salvage value of $20,000. Each apartment is of equal value. Upon completion of the building, Y corporation mortgaged the land and building for $150,000 and sold its total authorized capital stock, consisting of 1000 shares of common stock, for $100,000. The stock was purchased by 10 individuals each of whom paid $10,000 for 100 shares. Each certificate for 100 shares provides that the holder thereof is entitled to a proprietary lease of a particular apartment in the building. Each lease provides that the lessee shall pay his proportionate share of the corporation's expenses including an amount on account of the curtailment of Y's mortgage indebtedness. B, a calendar year taxpayer, is the original owner of 100 shares of stock in Y corporation. On January 1, 1962, B subleases his apartment for a term of 5 years. B's stock in Y corporation is treated as property subject to the allowance for depreciation under section 167(a), and B, who uses the straight line method of depreciation for purposes of the computation prescribed by paragraph (b)(1)(i) of this section, computes the allowance for depreciation for the taxable year 1962 with respect to such stock as follows:

Y's basis in the building	$200,000
Less: Estimated salvage value	$20,000
Y's basis for depreciation	$180,000
Annual straight line depreciation on Y's building (1/50 of $180,000)	$3,600
Proportion of outstanding shares of stock of Y corporation (1,000) owned by B (100)	1/10
B's proportionate share of annual depreciation (1/10 of $3,600)	$360
Depreciation allowance for 1962 with respect to B's stock (if the limitation in paragraph (c) of this section is not applicable)	$360

Example 2. The facts are the same as in *Example 1* except that the building constructed by Y corporation contained, in addition to the 10 apartments, space on the ground floor for 2 stores which were rented to persons who do not have a proprietary lease of such space by reason of stock ownership. Y corporation's building has a total area of 16,000 square feet, the 10 apartments in such building have an area of 10,000 square feet, and the 2 stores on the ground floor have an area of 2,000 square feet. Thus, the total rentable space in Y corporation's building is 12,000 square feet. B, who uses the straight line method of depreciation for purposes of the computation prescribed by paragraph (b)(1)(i) of this section, computes the allowance for depreciation for the taxable year 1962 with respect to his stock in Y corporation as follows:

Y's basis in the building	$200,000
Less: Estimated salvage value	20,000
Y's basis for depreciation	180,000
Annual straight line depreciation on Y's building (1/50 of $180,000)	3,600
Less: Amount representing rentable space not subject to proprietary lease but held for rental purposes over total rentable space 2,000 ÷ 12,000 (of $3,600)	600
Annual depreciation, as reduced	3,000
B's proportionate share of annual depreciation (1/10 of $3,000)	300
Depreciation allowance for 1962 with respect to B's stock (if the limitation in paragraph (c) of this section is not applicable)	300

Example 3. The facts are the same as in *Example 1* except that B occupies his apartment from January 1, 1962, until December 31, 1966, and that on January 1, 1967, B sells his stock to C, an individual, for $15,000. C thereby obtains a proprietary lease from Y corporation with the same rights and obligations as B's lease provided. Y corporation's records disclose that its outstanding mortgage indebtedness is $135,000 on January 1, 1967. C, a physician, uses the entire apartment solely as an office. C's stock in Y corporation is treated as property subject to the allowance for depreciation under section 167(a), and C, who uses the straight line method of depreciation for purposes of the computation prescribed by paragraph (b)(1)(i) of this section, computes the allowance for depreciation for the taxable year 1967 with respect to such stock as follows:

Price paid for each share of stock in Y corporation purchased by C on 1–1–67 ($15,000 ÷ 100)	$150
Per share price paid by C multiplied by total shares of stock in Y corporation outstanding on 1–1–67 ($150 × 1,000)	150,000
Y's mortgage indebtedness outstanding on 1–1–67	135,000

	285,000
Less: Amount attributable to land (assumed to be 1/5 of $285,000)	57,000
	228,000
Less: Estimated salvage value	20,000
Basis of Y's building for purposes of computing C's depreciation	208,000
Annual straight line depreciation (1/45 of $208,000)	4,622.22
C's proportionate share of annual depreciation (1/10 of $4,622.22)	462.22
Depreciation allowance for 1967 with respect to C's stock (if the limitation in paragraph (c) of this section is not applicable)	462.22

[T.D. 6725, 29 FR 5665, Apr. 29, 1964, as amended by T.D. 8316, 55 FR 42006, Oct. 17, 1990]

§ 1.217–1 Deduction for moving expenses paid or incurred in taxable years beginning before January 1, 1970.

(a) *Allowance of deduction*—(1) *In general.* Section 217(a) allows a deduction from gross income for moving expenses paid or incurred by the taxpayer during the taxable year in connection with the commencement of work as an employee at a new principal place of work. Except as provided in section 217, no deduction is allowable for any expenses incurred by the taxpayer in connection with moving himself, the members of his family or household, or household goods and personal effects. The deduction allowable under this section is only for expenses incurred after December 31, 1963, in taxable years ending after such date and beginning before January 1, 1970, except in cases where a taxpayer makes an election under paragraph (g) of §1.217–2 with respect to moving expenses paid or incurred before January 1, 1971, in connection with the commencement of work by such taxpayer as an employee at a new principal place of work of which such taxpayer has been notified by his employer on or before December 19, 1969. To qualify for the deduction the expenses must meet the definition of the term ''moving expenses'' provided in section 217(b); the taxpayer must meet the conditions set forth in section 217(c); and, if the taxpayer receives a reimbursement or other expense allowance for an item of expense, the deduction for the portion of the expense reimbursed is allowable only to the extent that such reimbursement or other expense allowance is included in his gross income as provided in section 217(e). The deduction is allowable only to a taxpayer who pays or incurs moving expenses in connection with his commencement of work as an employee and is not allowable to a taxpayer who pays or incurs such expenses in connection with his commencement of work as a self-employed individual. The term *employee* as used in this section has the same meaning as in §31.3401(c)–1 of this chapter (Employment Tax Regulations). All references to section 217 in this section are to section 217 prior to the effective date of section 231 of the Tax Reform Act of 1969 (83 Stat. 577).

(2) *Commencement of work.* To be deductible, the moving expenses must be paid or incurred by the taxpayer in connection with the commencement of work by him at a new principal place of work (see paragraph (c)(3) of this section for a discussion of the term *principal place of work*). While it is not necessary that the taxpayer have a contract or commitment of employment prior to his moving to a new location, the deduction is not allowable unless employment actually does occur. The term *commencement* includes (i) the beginning of work by a taxpayer for the first time or after a substantial period of unemployment or part-time employment, (ii) the beginning of work by a taxpayer for a different employer, or (iii) the beginning of work by a taxpayer for the same employer at a new location. To qualify as being in connection with the commencement of work, the move for which moving expenses are incurred must bear a reasonable proximity both in time and place to such commencement. In general, moving expenses incurred within one year of the date of the commencement of work are considered to be reasonably proximate to such commencement. Moving expenses incurred in relocating the taxpayer's residence to a location which is farther from his new principal place of work than was his former residence are not generally to be considered as incurred in connection with such commencement of work. For example, if A is transferred by his employer from place X to place Y and A's old residence while he worked at place

X is 25 miles from Y, A will not generally be entitled to deduct moving expenses in moving to a new residence 40 miles from Y even though the minimum distance limitation contained in section 217(c)(1) is met. If, however, A is required, as a condition of his employment, to reside at a particular place, or if such residency will result in an actual decrease in his commuting time or expense, the expenses of the move may be considered as incurred in connection with his commencement of work at place Y.

(b) *Definition of moving expenses*—(1) *In general.* Section 217(b) defines the term *moving expenses* to mean only the reasonable expenses (i) of moving household goods and personal effects from the taxpayer's former residence to his new residence, and (ii) of traveling (including meals and lodging) from the taxpayer's former residence to his new place of residence. The test of deductibility thus is whether the expenses are reasonable and are incurred for the items set forth in (i) and (ii) above.

(2) *Reasonable expenses.* (i) The term *moving expenses* includes only those expenses which are reasonable under the circumstances of the particular move. Generally, expenses are reasonable only if they are paid or incurred for movement by the shortest and most direct route available from the taxpayer's former residence to his new residence by the conventional mode or modes of transportation actually used and in the shortest period of time commonly required to travel the distance involved by such mode. Expenses paid or incurred in excess of a reasonable amount are not deductible. Thus, if moving or travel arrangements are made to provide a circuitous route for scenic, stopover, or other similar reasons, the additional expenses resulting therefrom are not deductible since they do not meet the test of reasonableness.

(ii) The application of this subparagraph may be illustrated by the following example:

Example. A, an employee of the M Company works and maintains his principal residence in Boston, Massachusetts. Upon receiving orders from his employer that he is to be transferred to M's Los Angeles, California office, A motors to Los Angeles with his family with stopovers at various cities between Boston and Los Angeles to visit friends and relatives. In addition, A detours into Mexico for sight-seeing. Because of the stopovers and tour into Mexico, A's travel time and distance are increased over what they would have been had he proceeded directly to Los Angeles. To the extent that A's route of travel between Boston and Los Angeles is in a generally southwesterly direction it may be said that he is traveling by the shortest and most direct route available by motor vehicle. Since A's excursion into Mexico is away from the usual Boston-Los Angeles route, the portion of the expenses paid or incurred attributable to such excursion is not deductible. Likewise, that portion of the expenses attributable to A's delays en route not necessitated by reasons of rest or repair of his vehicle are not deductible.

(3) *Expenses of moving household goods and personal effects.* Expenses of moving household goods and personal effects include expenses of transporting such goods and effects owned by the taxpayer or a member of his household from the taxpayer's former residence to his new residence, and expenses of packing, crating and in-transit storage and insurance for such goods and effects. Expenses paid or incurred in moving household goods and personal effects to a taxpayer's new residence from a place other than his former residence are allowable, but only to the extent that such expenses do not exceed the amount which would be allowable had such goods and effects been moved from the taxpayer's former residence. Examples of items not deductible as moving expenses include, but are not limited to, storage charges (other than in-transit), costs incurred in the acquisition of property, costs incurred and losses sustained in the disposition of property, penalties for breaking leases, mortgage penalties, expenses of refitting rugs or draperies, expenses of connecting or disconnecting utilities, losses sustained on the disposal of memberships in clubs, tuition fees, and similar items.

(4) *Expenses of traveling.* Expenses of traveling include the cost of transportation and of meals and lodging en route (including the date of arrival) of both the taxpayer and members of his household, who have both the taxpayer's former residence and the taxpayer's new residence as their principal place of abode, from the taxpayer's

former residence to his new place of residence. Expenses of traveling do not include, for example: living or other expenses of the taxpayer and members of his household following their date of arrival at the new place of residence and while they are waiting to enter the new residence or waiting for their household goods to arrive; expenses in connection with house or apartment hunting; living expenses preceding the date of departure for the new place of residence; expenses of trips for purposes of selling property; expenses of trips to the former residence by the taxpayer pending the move by his family to the new place of residence; or any allowance for depreciation. The deduction for traveling expenses is allowable for only one trip made by the taxpayer and members of his household; however, it is not necessary that the taxpayer and all members of his household travel together or at the same time.

(5) *Residence.* The term *former residence* refers to the taxpayer's principal residence before his departure for his new principal place of work. The term *new residence* refers to the taxpayer's principal residence within the general location of his new principal place of work. Thus, neither term includes other residences owned or maintained by the taxpayer or members of his family or seasonal residences such as a summer beach cottage. Whether or not property is used by the taxpayer as his residence, and whether or not property is used by the taxpayer as his principal residence (in the case of a taxpayer using more than one property as a residence), depends upon all the facts and circumstances in each case. Property used by the taxpayer as his principal residence may include a houseboat, a house trailer, or similar dwelling. The term *new place of residence* generally includes the area within which the taxpayer might reasonably be expected to commute to his new principal place of work. The application of the terms *former residence*, *new residence* and *new place of residence* as defined in this paragraph and as used in section 217(b)(1) may be illustrated in the following manner: Expenses of moving household goods and personal effects are moving expenses when paid or incurred for transporting such items from the taxpayer's former residence to the taxpayer's new residence (such as from one street address to another). Expenses of traveling, on the other hand, are limited to those incurred between the taxpayer's former residence (a geographic point) and his new place of residence (a commuting area) up to and including the date of arrival. The date of arrival is the day the taxpayer secures lodging within that commuting area, even if on a temporary basis.

(6) *Individuals other than taxpayer.* In addition to the expenses set forth in section 217(b)(1) which are attributable to the taxpayer alone, the same type of expenses attributable to certain individuals other than the taxpayer, if paid or incurred by the taxpayer, are deductible. Those other individuals must (i) be members of the taxpayer's household, and (ii) have both the taxpayer's former residence and his new residence as their principal place of abode. A member of the taxpayer's household may not be, for example, a tenant residing in the taxpayer's residence, nor an individual such as a servant, governess, chauffeur, nurse, valet, or personal attendant.

(c) *Conditions for allowance*—(1) *In general.* Section 217(c) provides two conditions which must be satisfied in order for a deduction of moving expenses to be allowed under section 217(a). The first is a minimum distance requirement prescribed by section 217(c)(1), and the second is a minimum period of employment requirement prescribed by section 217(c)(2).

(2) *Minimum distance.* For purposes of applying the minimum distance requirement of section 217(c)(1) all taxpayers are divided into one or the other of the following categories: taxpayers having a former principal place of work, and taxpayers not having a former principal place of work. In this latter category are individuals who are seeking full-time employment for the first time (for example, recent high school or college graduates), or individuals who are re-entering the labor force after a substantial period of unemployment or part-time employment.

(i) In the case of a taxpayer having a former principal place of work, section 217(c)(1)(A) provides that no deduction is allowable unless the distance between his new principal place of work and his former residence exceeds by at least 20 miles the distance between his former principal place of work and such former residence.

(ii) In the case of a taxpayer not having a former principal place of work, section 217(c)(1)(B) provides that no deduction is allowable unless the distance between his new principal place of work and his former residence is at least 20 miles.

(iii) For purposes of measuring distances under section 217(c)(1) all computations are to be made on the basis of a straight-line measurement.

(3) *Principal place of work.* (i) A taxpayer's ''principal place of work'' usually is the place at which he spends most of his working time. Generally, where a taxpayer performs services as an employee, his principal place of work is his employer's plant, office, shop, store or other property. However, a taxpayer may have a principal place of work even if there is no one place at which he spends a substantial portion of his working time. In such case, the taxpayer's principal place of work is the place at which his business activities are centered—for example, because he reports there for work, or is otherwise required either by his employer or the nature of his employment to ''base'' his employment there. Thus, while a member of a railroad crew, for example, may spend most of his working time aboard a train, his principal place of work is his home terminal, station, or other such central point where he reports in, checks out, or receives instructions. In those cases where the taxpayer is employed by a number of employers on a relatively short-term basis, and secures employment by means of a union hall system (such as a construction or building trades worker), the taxpayer's principal place of work would be the union hall.

(ii) In cases where a taxpayer has more than one employment (i.e., more than one employer at any particular time) his principal place of work is usually determined with reference to his principal employment. The location of a taxpayer's principal place of work is necessarily a question of fact which must be determined on the basis of the particular circumstances in each case. The more important factors to be considered in making a factual determination regarding the location of a taxpayer's principal place of work are (*a*) the total time ordinarily spent by the taxpayer at each place, (*b*) the degree of the taxpayer's business activity at each place, and (*c*) the relative significance of the financial return to the taxpayer from each place.

(iii) In general, a place of work is not considered to be the taxpayer's principal place of work for purposes of this section if the taxpayer maintains an inconsistent position, for example, by claiming an allowable deduction under section 162 (relating to trade or business expenses) for traveling expenses ''while away from home'' with respect to expenses incurred while he is not away from such place of work and after he has incurred moving expenses for which a deduction is claimed under this section.

(4) *Minimum period of employment.* Under section 217(c)(2), no deduction is allowed unless, during the 12-month period immediately following the taxpayer's arrival in the general location of his new principal place of work, he is a full-time employee, in such general location, during at least 39 weeks.

(i) The 12-month period and the 39-week period set forth in section 217(c)(2) are measured from the date of the taxpayer's arrival in the general location of his new principal place of work. Generally, the taxpayer's date of arrival is the date of the termination of the last trip preceding the taxpayer's commencement of work on a regular basis, regardless of the date on which the taxpayer's family or household goods and effects arrive.

(ii) It is not necessary that the taxpayer remain in the employ of the same employer for 39 weeks, but only that he be employed in the same general location of his new principal place of work during such period. The *general location* of the new principal place of work refers to the area within which an individual might reasonably be expected to commute to such place of work, and will usually be the same area as is known as the *new place of residence*; see paragraph (b)(5) of this section.

(iii) Only a week during which the taxpayer is a full-time employee qualifies as a week of work for purposes of the 39-week requirement of section 217(c)(2). Whether an employee is a full-time employee during any particular week depends upon the customary practices of the occupation in the geographic area in which the taxpayer works. In the case of occupations where employment is on a seasonal basis, weeks occuring in the off-season when no work is required or available (as the case may be) may be counted as weeks of full-time employment only if the employee's contract or agreement of employment covers the off-season period and the off-season period is less than 6 months. Thus, a school teacher whose employment contract covers a 12-month period and who teaches on a full-time basis for more than 6 months in fulfillment of such contract is considered a full-time employee during the entire 12-month period. A taxpayer will not be deemed as other than a full-time employee during any week merely because of periods of involuntary temporary absence from work, such as those due to illness, strikes, shutouts, layoffs, natural disasters, etc.

(iv) In the case of taxpayers filing a joint return, either spouse may satisfy this 39-week requirement. However, weeks worked by one spouse may not be added to weeks worked by the other spouse in order to satisfy such requirement.

(v) The application of this subparagraph may be illustrated by the following examples:

Example 1. A is an electrician residing in New York City. Having heard of the possibility of better employment prospects in Denver, Colorado, he moves himself, his family and his household goods and personal effects, at his own expense, to Denver where he secures employment with the M Aircraft Corporation. After working full-time for 30 weeks his job is terminated, and he subsequently moves to and secures employment in Los Angeles, California, which employment lasts for more than 39 weeks. Since A was not employed in the general location of his new principal place of employment while in Denver for at least 39 weeks, no deduction is allowable for moving expenses paid or incurred between New York City and Denver. A will be allowed to deduct only those moving expenses attributable to his move from Denver to Los Angeles, assuming all other conditions of section 217 are met.

Example 2. Assume the same facts as in *Example 1*, except that B, A's wife, secures employment in Denver at the same time as A, and that she continues to work in Denver for at least 9 weeks after A's departure for Los Angeles. Since she has met the 39-week requirement in Denver, and assuming all other requirements of section 217 are met, the moving expenses paid by A attributable to the move from New York City to Denver will be allowed as a deduction, provided A and B filed a joint return.

Example 3. Assume the same facts as in *Example 1*, except that B, A's wife, secures employment in Denver on the same day that A departs for Los Angeles, and continues to work in Denver for 9 weeks thereafter. Since neither A (who has worked 30 weeks) nor B (who has worked 9 weeks) has independently satisfied the 39-week requirement, no deduction for moving expenses attributable to the move from New York City to Denver is allowable.

(d) *Rules for application of section 217(c)(2)*—(1) *Inapplicability of 39-week test to reimbursed expenses.* (i) Paragraph (1) of section 217(d) provides that the 39-week employment condition of section 217(c)(2) does not apply to any moving expense item to the extent that the taxpayer receives reimbursement or other allowance from his employer for such item. A reimbursement or other allowance to an employee for expenses of moving, in the absence of a specific allocation by the employer, is allocated first to items deductible under section 217(a) and then, if a balance remains, to items not so deductible.

(ii) The application of this subparagraph may be illustrated by the following examples:

Example 1. A, a recent college graduate, with his residence in Washington, DC, is hired by the M Corporation in San Francisco, California. Under the terms of the employment contract, M agrees to reimburse A for three-fifths of his moving expenses from Washington to San Francisco. A moves to San Francisco, and pays $1,000 for expenses incurred, for which he is reimbursed $600 by M. After working for M for a period of 3 months, A becomes dissatisfied with the job and returns to Washington to continue his education. Since he has failed to satisfy the 39-week requirement of section 217(c)(2) the expenses totaling $400 for which A has received no reimbursement are not deductible.

Under the special rule of section 217(d)(1), however, the deduction for the $600 reimbursed moving expenses is not disallowed by reason of section 217(c)(2).

Example 2. B, a self-employed accountant, who works and resides in Columbus, Ohio, is hired by the N Company in St. Petersburg, Florida. Pursuant to its policy with respect to newly hired employees, N agrees to reimburse B to the extent of $1,000 of the expenses incurred by him in connection with his move to St. Petersburg, allocating $700 for the items specified in section 217(b)(1), and $300 for "temporary living expenses." B moves to St. Petersburg, and incurs $800 of "moving expenses" and $300 of "temporary living expenses" in St. Petersburg. B receives reimbursement of $1,000 from N, which amount is included in his gross income. Assuming B fails to satisfy the 39-week test of section 217(c)(2), he will nevertheless be allowed to deduct $700 as a moving expense. On the other hand, had N made no allocation between deductible and non-deductible items, B would have been allowed to deduct $800 since, in the absence of a specific allocation of the reimbursement by N, it is presumed that the reimbursement was for items specified in section 217(b)(1) to the extent thereof.

(2) *Election of deduction before 39-week test is satisfied.* (i) Paragraph (2) of section 217(d) provides a special rule which applies in those cases where a taxpayer paid or incurred, in a particular taxable year, moving expenses which would be deductible in that taxable year except for the fact that the 39-week employment condition of section 217(c)(2) has not been satisfied before the time prescribed by law (including extensions thereof) for filing the return for such taxable year. The rule provides that where a taxpayer has paid or incurred moving expenses and as of the date prescribed by section 6072 for filing his return for such taxable year, including extensions thereof as may be allowed under section 6081, there remains unexpired a sufficient portion of the 12-month period so that it is still possible for the taxpayer to satisfy the 39-week requirement, then the taxpayer may elect to claim a deduction for such moving expenses on the return for such taxable year. The election shall be exercised by taking the deduction on the return filed within the time prescribed by section 6072 (including extensions as may be allowed under section 6081). It is not necessary that the taxpayer wait until the date prescribed by law for filing his return in order to make the election. He may make the election on an early return based upon the facts known on the date such return is filed. However, an election made on an early return will become invalid if, as of the date prescribed by law for filing the return, it is not possible for the taxpayer to satisfy the 39-week requirement.

(ii) In the event that a taxpayer does not elect to claim a deduction for moving expenses on the return for the taxable year in which such expenses were paid or incurred in accordance with (i) of this subparagraph, and the 39-week employment condition of section 217(c)(2) (as well as all other requirements of section 217) is subsequently satisfied, then the taxpayer may file an amended return for the taxable year in which such moving expenses were paid or incurred on which he may claim a deduction under section 217. The taxpayer may, in lieu of filing an amended return, file a claim for refund based upon the deduction allowable under section 217.

(iii) The application of this subparagraph may be illustrated by the following examples:

Example 1. A is transferred by his employer, M, from Boston, Massachusetts, to Cleveland, Ohio, and begins working there on November 1, 1964, followed by his family and household goods and personal effects on November 15, 1964. Moving expenses are paid or incurred by A in 1964 in connection with this move. On April 15, 1965, when A files his income tax return for the year 1964, A has been a full-time employee in Cleveland for approximately 24 weeks. Notwithstanding the fact that as of April 15, 1965, A has not satisfied the 39-week employment condition of section 217(c)(2) he may nevertheless elect to claim his 1964 moving expenses on his 1964 income tax return since there is still sufficient time remaining before November 1, 1965, within which to satisfy the 39-week requirement.

Example 2. Assume the facts are the same as in *Example 1*, except that as of April 15, 1965, A has left the employ of M, and is in the process of seeking further employment in Cleveland. Since, under these conditions, A may be unsure whether or not he will be able to satisfy the 39-week requirement by November 1, 1965, he may not wish to avail himself of the election provided by section 217(d)(2). In such event, A may wait until he has actually satisfied the 39-week requirement, at which time he may file an amended return claiming as a deduction the moving expenses paid or incurred in 1964. A may, in lieu of filing an amended return, file a claim for refund based upon a deduction for such expenses. Should A fail to satisfy the 39-week requirement on or before November 1, 1965, no deduction is allowable for moving expenses incurred in 1964.

(3) *Recapture of deduction where 39-week test is not met.* Paragraph (3) of section 217(d) provides a special rule which applies in cases where a taxpayer has deducted moving expenses under the election provided in section 217(d)(2) prior to his satisfying the 39-week employment condition of section 217(c)(2), and the 39-week test is not satisfied during the taxable year immediately following the taxable year in which the expenses were deducted. In such cases an amount equal to the expenses which were deducted must be included in the taxpayer's gross income for the taxable year immediately following the taxable year in which the expenses were deducted. In the event the taxpayer has deducted moving expenses under the election provided in section 217(d)(2) for the taxable year, and subsequently files an amended return for such year on which he eliminates such deduction, such expenses will not be deemed to have been deducted for purposes of the recapture rule of the preceding sentence.

(e) *Disallowance of deduction with respect to reimbursements not included in gross income.* Section 217(e) provides that no deduction shall be allowed under section 217 for any item to the extent that the taxpayer receives reimbursement or other expense allowance for such item unless the amount of such reimbursement or other expense allowance is included in his gross income. A reimbursement or other allowance to an employee for expenses of moving, in the absence of a specific allocation by the employer, is allocated first to items deductible under section 217(a) and then, if a balance remains, to items not so deductible. For purposes of this section, moving services furnished in-kind, directly or indirectly, by a taxpayer's employer to the taxpayer or members of his household are considered as being a reimbursement or other allowance received by the taxpayer for moving expenses. If a taxpayer pays or incurs moving expenses and either prior or subsequent thereto receives reimbursement or other expense allowance for such item, no deduction is allowed for such moving expenses unless the amount of the reimbursement or other expense allowance is included in his gross income in the year in which such reimbursement or other expense allowance is received. In those cases where the reimbursement or other expense allowance is received by a taxpayer for an item of moving expense subsequent to his having claimed a deduction for such item, and such reimbursement or other expense allowance is properly excluded from gross income in the year in which received, the taxpayer must file an amended return for the taxable year in which the moving expenses were deducted and decrease such deduction by the amount of the reimbursement or other expense allowance not included in gross income. This does not mean, however, that a taxpayer has an option to include or not include in his gross income an amount received as reimbursement or other expense allowance in connection with his move as an employee. This question remains one which must be resolved under section 61(a) (relating to the definition of gross income).

[T.D. 6796, 30 FR 1038, Feb. 2, 1965, as amended by T.D. 7195, 37 FR 13535, July 11, 1972]

§ 1.217–2 Deduction for moving expenses paid or incurred in taxable years beginning after December 31, 1969.

(a) *Allowance of deduction*—(1) *In general.* Section 217(a) allows a deduction from gross income for moving expenses paid or incurred by the taxpayer during the taxable year in connection with his commencement of work as an employee or as a self-employed individual at a new principal place of work. For purposes of this section, amounts are considered as being paid or incurred by an individual whether goods or services are furnished to the taxpayer directly (by an employer, a client, a customer, or similar person) or indirectly (paid to a third party on behalf of the taxpayer by an employer, a client, a customer, or similar person). A cash basis taxpayer will treat moving expenses as being paid for purposes of section 217 and this section in the year in which the taxpayer is considered to have received such payment under section 82 and § 1.82–1. No deduction is allowable under section 162 for any expenses incurred by the taxpayer in connection with moving from one residence to another residence unless such expenses are deductible under section 162 without regard to such change in residence. To qualify for the deduction under section 217 the expenses must meet the definition of the term *moving expenses* provided in section 217(b) and the taxpayer must meet the conditions set forth in section 217(c). The term *employee* as used in this section has the same meaning as in § 31.3401(c)–1 of this chapter (Employment Tax Regulations). The term *self-employed individual* as used in this section is defined in paragraph (f)(1) of this section.

(2) *Expenses paid in a taxable year other than the taxable year in which reimbursement representing such expenses is received.* In general, moving expenses are deductible in the year paid or incurred. If a taxpayer who uses the cash receipts and disbursements method of accounting receives reimbursement for a moving expense in a taxable year other than the taxable year the taxpayer pays such expense, he may elect to deduct such expense in the taxable year that he receives such reimbursement, rather than the taxable year when he paid such expense in any case where:

(i) The expense is paid in a taxable year prior to the taxable year in which the reimbursement is received, or

(ii) The expense is paid in the taxable year immediately following the taxable year in which the reimbursement is received, provided that such expense is paid on or before the due date prescribed for filing the return (determined with regard to any extension of time for such filing) for the taxable year in which the reimbursement is received.

An election to deduct moving expenses in the taxable year that the reimbursement is received shall be made by claiming the deduction on the return, amended return, or claim for refund for the taxable year in which the reimbursement is received.

(3) *Commencement of work.* (i) To be deductible the moving expenses must be paid or incurred by the taxpayer in connection with his commencement of work at a new principal place of work (see paragraph (c)(3) of this section for a discussion of the term *principal place of work*). Except for those expenses described in section 217(b)(1) (C) and (D) it is not necessary for the taxpayer to have made arrangements to work prior to his moving to a new location; however, a deduction is not allowable unless employment or self-employment actually does occur. The term *commencement* includes (*a*) the beginning of work by a taxpayer as an employee or as a self-employed individual for the first time or after a substantial period of unemployment or part-time employment, (*b*) the beginning of work by a taxpayer for a different employer or in the case of a self-employed individual in a new trade or business, or (*c*) the beginning of work by a taxpayer for the same employer or in the case of a self-employed individual in the same trade or business at a new location. To qualify as being in connection with the commencement of work, the move must bear a reasonable proximity both in time and place to such commencement at the new principal place of work. In general, moving expenses incurred within 1 year of the date of the commencement of work are considered to be reasonably proximate in time to such commencement. Moving expenses incurred after the 1-year period may be considered reasonably proximate in time if it can be shown that circumstances existed which prevented the taxpayer from incurring the expenses of moving within the 1-year period allowed. Whether circumstances existed which prevented the taxpayer from incurring the expenses of moving within the period allowed is dependent upon the facts and circumstances of each case. The length of the delay and the fact that the taxpayer may have incurred part of the expenses of the move within the 1-year period allowed shall be taken into account in determining whether expenses incurred after such period are allowable. In general, a move is not considered to be reasonably proximate in place to the commencement of work at the new

princpal place of work where the distance between the taxpayer's new residence and his new principal place of work exceeds the distance between his former residence and his new principal place of work. A move to a new residence which does not satisfy this test may, however, be considered reasonably proximate in place to the commencement of work if the taxpayer can demonstrate, for example, that he is required to live at such residence as a condition of employment or that living at such residence will result in an actual decrease in commuting time or expense. For example, assume that in 1977 A is transferred by his employer to a new principal place of work and the distance between his former residence and his new principal place of work is 35 miles greater than was the distance between his former residence and his former principal place of work. However, the distance between his new residence and his new principal place of work is 10 miles greater than was the distance between his former residence and his new principal place of work. Although the minimum distance requirement of section 217(c)(1) is met the expenses of moving to the new residence are not considered as incurred in connection with A's commencement of work at his new principal place of work since the new residence is not proximate in place to the new place of work. If, however, A can demonstrate, for example, that he is required to live at such new residence as a condition of employment or if living at such new residence will result in an actual decrease in commuting time or expense, the expenses of the move may be considered as incurred in connection with A's commencement of work at his new principal place of work.

(ii) The provisions of subdivision (i) of this subparagraph may be illustrated by the following examples:

Example 1. Assume that A is tranferred by his employer from Boston, MA, to Washington, DC. A moves to a new residence in Washington, DC, and commences work on February 1, 1971. A's wife and his two children remain in Boston until June 1972 in order to allow A's children to complete their grade school education in Boston. On June 1, 1972, A sells his home in Boston and his wife and children move to the new residence in Washington, DC. The expenses incurred on June 1, 1972, in selling the old residence and in moving A's family, their household goods, and personal effects to the new residence in Washington are allowable as a deduction although they were incurred 16 months after the date of the commencement of work by A since A has moved to and established a new residence in Washington, DC, and thus incurred part of the total expenses of the move prior to the expiration of the 1-year period.

Example 2. Assume that A is transferred by his employer from Washington, DC, to Baltimore, MD. A commences work on January 1, 1971, in Baltimore. A commutes from his residence in Washington to his new principal place of work in Baltimore for a period of 18 months. On July 1, 1972, A decides to move to and establish a new residence in Baltimore. None of the moving expenses otherwise allowable under section 217 may be deducted since A neither incurred the expenses within 1 year nor has shown circumstances under which he was prevented from moving within such period.

(b) *Definition of moving expenses*—(1) *In general.* Section 217(b) defines the term *moving expenses* to mean only the reasonable expenses (i) of moving household goods and personal effects from the taxpayer's former residence to his new residence, (ii) of traveling (including meals and lodging) from the taxpayer's former residence to his new place of residence, (iii) of traveling (including meals and lodging), after obtaining employment, from the taxpayer's former residence to the general location of his new principal place of work and return, for the principal purpose of searching for a new residence, (iv) of meals and lodging while occupying temporary quarters in the general location of the new principal place of work during any period of 30 consecutive days after obtaining employment, or (v) of a nature constituting qualified residence sale, purchase, or lease expenses. Thus, the test of deductibility is whether the expenses are reasonable and are incurred for the items set forth in subdivisions (i) through (v) of this subparagraph.

(2) *Reasonable expenses.* (i) The term *moving expenses* includes only those expenses which are reasonable under the circumstances of the particular move. Expenses paid or incurred in excess of a reasonable amount are not deductible. Generally, expenses paid or incurred for movement of household goods and personal effects or for travel (including

meals and lodging) are reasonable only to the extent that they are paid or incurred for such movement or travel by the shortest and most direct route available from the former residence to the new residence by the conventional mode or modes of transportation actually used and in the shortest period of time commonly required to travel the distance involved by such mode. Thus, if moving or travel arrangements are made to provide a circuitous route for scenic, stopover, or other similar reasons, additional expenses resulting therefrom are not deductible since they are not reasonable nor related to the commencement of work at the new principal place of work. In addition, expenses paid or incurred for meals and lodging while traveling from the former residence to the new place of residence or to the general location of the new principal place of work and return or occupying temporary quarters in the general location of the new principal place of work are reasonable only if under the facts and circumstances involved such expenses are not lavish or extravagant.

(ii) The application of this subparagraph may be illustrated by the following example:

Example. A, an employee of the M Company works and maintains his residence in Boston, MA. Upon receiving orders from his employer that he is to be transferred to M's Los Angeles, CA, office, A motors to Los Angeles with his family with stopovers at various cities between Boston and Los Angeles to visit friends and relatives. In addition, A detours into Mexico for sightseeing. Because of the stopovers and tour into Mexico, A's travel time and distance are increased over what they would have been had he proceeded directly to Los Angeles. To the extent that A's route of travel between Boston and Los Angeles is in a generally southwesterly direction it may be said that he is traveling by the shortest and most direct route available by motor vehicle. Since A's excursion into Mexico is away from the usual Boston-Los Angeles route, the portion of the expenses paid or incurred attributable to such excursion is not deductible. Likewise, that portion of the expenses attributable to A's delay en route in visiting personal friends and sightseeing are not deductible.

(3) *Expense of moving household goods and personal effects.* Expenses of moving household goods and personal effects include expenses of transporting such goods and effects from the taxpayer's former residence to his new residence, and expenses of packing, crating, and in-transit storage and insurance for such goods and effects. Such expenses also include any costs of connecting or disconnecting utilities required because of the moving of household goods, appliances, or personal effects. Expenses of storing and insuring household goods and personal effects constitute in-transit expenses if incurred within any consecutive 30-day period after the day such goods and effects are moved from the taxpayer's former residence and prior to delivery at the taxpayer's new residence. Expenses paid or incurred in moving household goods and personal effects to the taxpayer's new residence from a place other than his former residence are allowable, but only to the extent that such expenses do not exceed the amount which would be allowable had such goods and effects been moved from the taxpayer's former residence. Expenses of moving household goods and personal effects do not include, for example, storage charges (other than in-transit), costs incurred in the acquisition of property, costs incurred and losses sustained in the disposition of property, penalties for breaking leases, mortgage penalties, expenses of refitting rugs or draperies, losses sustained on the disposal of memberships in clubs, tuition fees, and similar items. The above expenses may, however, be described in other provisions of section 217(b) and if so a deduction may be allowed for them subject to the allowable dollar limitations.

(4) *Expenses of traveling from the former residence to the new place of residence.* Expenses of traveling from the former residence to the new place of residence include the cost of transportation and of meals and lodging en route (including the date of arrival) from the taxpayer's former residence to his new place of residence. Expenses of meals and lodging incurred in the general location of the former residence within 1 day after the former residence is no longer suitable for occupancy because of the removal of household goods and personal effects shall be considered as expenses of traveling for purposes of this subparagraph. The

date of arrival is the day the taxpayer secures lodging at the new place of residence, even if on a temporary basis. Expenses of traveling from the taxpayer's former residence to his new place of residence do not include, for example, living or other expenses following the date of arrival at the new place of residence and while waiting to enter the new residence or waiting for household goods to arrive, expenses in connection with house or apartment hunting, living expenses preceding date of departure for the new place of residence (other than expenses of meals and lodging incurred within 1 day after the former residence is no longer suitable for occupancy), expenses of trips for purposes of selling property, expenses of trips to the former residence by the taxpayer pending the move by his family to the new place of residence, or any allowance for depreciation. The above expenses may, however, be described in other provisions of section 217(b) and if so a deduction may be allowed for them subject to the allowable dollar limitations. The deduction for traveling expenses from the former residence to the new place of residence is allowable for only one trip made by the taxpayer and members of his household; however, it is not necessary that the taxpayer and all members of his household travel together or at the same time.

(5) *Expenses of traveling for the principal purpose of looking for a new residence.* Expenses of traveling, after obtaining employment, from the former residence to the general location of the new principal place of work and return, for the principal purpose of searching for a new residence include the cost of transportation and meals and lodging during such travel and while at the general location of the new place of work for the principal purpose of searching for a new residence. However, such expenses do not include, for example, expenses of meals and lodging of the taxpayer and members of his household before departing for the new principal place of work, expenses for trips for purposes of selling property, expenses of trips to the former residence by the taxpayer pending the move by his family to the place of residence, or any allowance for depreciation. The above expenses may, however, be described in other provisions of section 217(b) and if so a deduction may be allowed for them. The deduction for expenses of traveling for the principal purpose of looking for a new residence is not limited to any number of trips by the taxpayer and by members of his household. In addition, the taxpayer and all members of his household need not travel together or at the same time. Moreover, a trip need not result in acquisition of a lease of property or purchase of property. An employee is considered to have obtained employment in the general location of the new principal place of work after he has obtained a contract or agreement of employment. A self-employed individual is considered to have obtained employment when he has made substantial arrangements to commence work at the new principal place of work (see paragraph (f)(2) of this section for a discussion of the term *made substantial arrangements to commence to work*).

(6) *Expenses of occupying temporary quarters.* Expenses of occupying temporary quarters include only the cost of meals and lodging while occupying temporary quarters in the general location of the new principal place of work during any period of 30 consecutive days after the taxpayer has obtained employment in such general location. Thus, expenses of occupying temporary quarters do not include, for example, the cost of entertainment, laundry, transportation, or other personal, living family expenses, or expenses of occupying temporary quarters in the general location of the former place of work. The 30 consecutive day period is any one period of 30 consecutive days which can begin, at the option of the taxpayer, on any day after the day the taxpayer obtains employment in the general location of the new principal place of work.

(7) *Qualified residence sale, purchase, or lease expenses.* Qualified residence sale, purchase, or lease expenses (hereinafter "qualified real estate expenses") are only reasonable amounts paid or incurred for any of the following purposes:

(i) Expenses incident to the sale or exchange by the taxpayer or his spouse of the taxpayer's former residence which, but for section 217 (b) and (e), would be taken into account in determining the amount realized on the sale or exchange of the residence. These expenses include real estate commissions, attorneys' fees, title fees, escrow fees, so called ''points'' or loan placement charges which the seller is required to pay, State transfer taxes and similar expenses paid or incurred in connection with the sale or exchange. No deduction, however, is permitted under section 217 and this section for the cost of physical improvements intended to enhance salability by improving the condition or appearance of the residence.

(ii) Expenses incident to the purchase by the taxpayer or his spouse of a new residence in the general location of the new principal place of work which, but for section 217 (b) and (e), would be taken into account in determining either the adjusted basis of the new residence or the cost of a loan. These expenses include attorney's fees, escrow fees, appraisal fees, title costs, so-called ''points'' or loan placement charges not representing payments or prepayments of interest, and similar expenses paid or incurred in connection with the purchase of the new residence. No deduction, however, is permitted under section 217 and this section for any portion of real estate taxes or insurance, so-called ''points'' or loan placement charges which are, in essence, prepayments of interest, or the purchase price of the residence.

(iii) Expenses incident to the settlement of an unexpired lease held by the taxpayer or his spouse on property used by the taxpayer as his former residence. These expenses include consideration paid to a lessor to obtain a release from a lease, attorneys' fees, real estate commissions, or similar expenses incident to obtaining a release from a lease or to obtaining an assignee or a sublessee such as the difference between rent paid under a primary lease and rent received under a sublease. No deduction, however, is permitted under section 217 and this section for the cost of physical improvement intended to enhance marketability of the leasehold by improving the condition or appearance of the residence.

(iv) Expenses incident to the acquisition of a lease by the taxpayer or his spouse. These expenses include the cost of fees or commissions for obtaining a lease, a sublease, or an assignment of an interest in property used by the taxpayer as his new residence in the general location of the new principal place of work. No deduction, however, is permitted under section 217 and this section for payments or prepayments of rent or payments representing the cost of a security or other similar deposit.

Qualified real estate expenses do not include losses sustained on the disposition of property or mortgage penalties, to the extent that such penalties are otherwise deductible as interest.

(8) *Residence.* The term *former residence* refers to the taxpayer's principal residence before his departure for his new principal place of work. The term *new residence* refers to the taxpayer's principal residence within the general location of his new principal place of work. Thus, neither term includes other residences owned or maintained by the taxpayer or members of his family or seasonal residences such as a summer beach cottage. Whether or not property is used by the taxpayer as his principal residence depends upon all the facts and circumstances in each case. Property used by the taxpayer as his principal residence may include a houseboat, a housetrailer, or similar dwelling. The term *new place of residence* generally includes the area within which the taxpayer might reasonably be expected to commute to his new principal place of work.

(9) *Dollar limitations.* (i) Expenses described in subparagraphs (A) and (B) of section 217(b)(1) are not subject to an overall dollar limitation. Thus, assuming all other requirements of section 217 are satisfied, a taxpayer who, in connection with his commencement of work at a new principal place of work, pays or incurs reasonable expenses of moving household goods and personal effects from his former residence to his new place of residence and reasonable expenses of traveling, including meals and lodging, from his former residence to his new place of residence is permitted to deduct the entire amount of these expenses.

(ii) Expenses described in subparagraphs (C), (D), and (E) of section 217(b)(1) are subject to an overall dollar limitation for each commencement of work of 3,000 ($2,500 in the case of a commencement of work in a taxable year beginning before January 1, 1977), of which the expenses described in subparagraphs (C) and (D) of section 217(b)(1) cannot exceed $1,500 ($1,000 in the case of a commencement of work in a taxable year beginning before January 1, 1977). The dollar limitation applies to the amount of expenses paid or incurred in connection with each commencement of work and not to the amount of expenses paid or incurred in each taxable year. Thus, for example, a taxpayer who paid or incurred $2,000 of expenses described in subparagraphs (C), (D), and (E) of section 217(b)(1) in taxable year 1977 in connection with his commencement of work at a principal place of work and paid or incurred an additional $2,000 of such expenses in taxable year 1978 in connection with the same commencement of work is permitted to deduct the $2,000 of such expenses paid or incurred in taxable year 1977 and only $1,000 of such expenses paid or incurred in taxable year 1978.

(iii) A taxpayer who pays or incurs expenses described in subparagraphs (C), (D), and (E) of section 217(b)(1) in connection with the same commencement of work may choose to deduct any combination of such expenses within the dollar amounts specified in subdivision (ii) of this subparagraph. For example, a taxpayer who pays or incurs such expenses in connection with the same commencement of work may either choose to deduct: (*a*) Expenses described in subparagraphs (C) and (D) of section 217(b)(1) to the extent of $1,500 ($1,000 in the case of a commencement of work in a taxable year beginning before January 1, 1977) before deducting any of the expenses described in subparagraph (E) of such section, or (*b*) expenses described in subparagraph (E) of section 217(b)(1) to the extent of $3,000 ($2,500 in the case of a commencement of work in a taxable year beginning before January 1, 1977) before deducting any of the expenses described in subparagraphs (C) and (D) of such section.

(iv) For the purpose of computing the dollar limitation contained in subparagraph (A) of section 217(b)(3) a commencement of work by a taxpayer at a new principal place of work and a commencement of work by his spouse at a new principal place of work which are in the same general location constitute a single commencement of work. Two principal places of work are treated as being in the same general location where the taxpayer and his spouse reside together and commute to their principal places of work. Two principal places of work are not treated as being in the same general location where, as of the close of the taxable year, the taxpayer and his spouse have not shared the same new residence nor made specific plans to share the same new residence within a determinable time. Under such circumstances, the separate commencements of work by a taxpayer and his spouse will be considered separately in assigning the dollar limitations and expenses to the appropriate return in the manner described in subdivisions (v) and (vi) of this subparagraph.

(v) Moving expenses (described in subparagraphs (C), (D), and (E) of section 217(b)(1)), paid or incurred with respect to the commencement of work by both a husband and wife which is considered a single commencement of work under subdivision (iv) of this subparagraph are subject to an overall dollar limitation of $3,000 ($2,500 in the case of a commencement of work in a taxable year beginning before January 1, 1977), per move of which the expenses described in subparagraphs (C) and (D) of section 217(b)(1) cannot exceed $1,500 ($1,000 in the case of a commencement of work in a taxable year beginning before January 1, 1977). If separate returns are filed with respect to the commencement of work by both a husband and wife which is considered a single commencement of work under subdivision (iv) of this subparagraph, moving expenses (described in subparagraphs (C), (D), and (E) of section 217(b)(1)) are subject to an overall dollar limitation of $1,500 ($1,250 in the case of a commencement of work in a taxable year beginning before January 1, 1977), per move of which the expenses described in subparagraphs (C) and (D) of section

217(b)(1) cannot exceed $750 ($500 in the case of a commencement of work in a taxable year beginning before January 1, 1977) with respect to each return. Where moving expenses are paid or incurred in more than 1 taxable year with respect to a single commencement of work by a husband and wife they shall, for purposes of applying the dollar limitations to such move, be subject to a $3,000 and $1,500 limitation ($2,500 and $1,000, respectively, in the case of a commencement of work in a taxable year beginning before January 1, 1977) for all such years that they file a joint return and shall be subject to a separate $1,500 and $750 limitation ($1,250 and $500, respectively, in the case of a commencement of work in a taxable year beginning before January 1, 1977) for all such years that they file separate returns. If a joint return is filed for the first taxable year moving expenses are paid or incurred with respect to a move but separate returns are filed in a subsequent year, the unused portion of the amount which may be deducted shall be allocated equally between the husband and wife in the later year. If separate returns are filed for the first taxable year such moving expenses are paid or incurred but a joint return is filed in a subsequent year, the deductions claimed on their separate returns shall be aggregated for purposes of determining the unused portion of the amount which may be deducted in the later year.

(vi) The application of subdivisions (iv) and (v) of this subparagraph may be illustrated by the following examples:

Example 1. A, who was transferred by his employer, effective January 15, 1977, moved from Boston, MA, to Washington, DC. A's wife was transferred by her employer, effective January 15, 1977, from Boston, MA, to Baltimore, MD. A and his wife reside together at the same new residence. A and his wife are cash basis taxpayers and file a joint return for taxable year 1977. Because A and his wife reside together at the new residence, the commencement of work by both is considered a single commencement of work under subdivision (iv) of this subparagraph. They are permitted to deduct with respect to their commencement of work in Washington and Baltimore up to $3,000 of the expenses described in subparagraphs (C), (D), and (E) of section 217(b)(1) of which the expenses described in subparagraphs (C) and (D) of such section cannot exceed $1,500.

Example 2. Assume the same facts as in *Example 1* except that for taxable year 1977, A and his wife file separate returns. Because A and his wife reside together, the commencement of work by both is considered a single commencement of work under subdivision (iv) of this subparagraph. A is permitted to deduct with respect to his commencement of work in Washington up to $1,500 of the expenses described in subparagraphs (C), (D), and (E) of section 217(b)(1) of which the expenses described in subparagraphs (C) and (D) cannot exceed $750. A is not permitted to deduct any of the expenses described in subparagraphs (C), (D), and (E) of section 217(b)(1) paid by his wife in connection with her commencement of work at a new principal place of work. A's wife is permitted to deduct with respect to her commencement of work in Baltimore up to $1,500 of the expenses described in subparagraphs (C), (D), and (E) of section 217(b)(1) that are paid by her of which the expenses described in subparagraphs (C) and (D) cannot exceed $750. A's wife is not permitted to deduct any of the expenses described in subparagraphs (C), (D), and (E) of section 217(b)(1) paid by A in connection with his commencement of work in Washington, DC.

Example 3. Assume the same facts as in *Example 1* except that A and his wife take up separate residences in Washington and Baltimore, do not reside together during the entire taxable year, and have no specific plans to reside together. The commencement of work by A in Washington, DC, and by his wife in Baltimore are considered separate commencements of work since their principal places of work are not treated as being in the same general location. If A and his wife file a joint return for taxable year 1977, the moving expenses described in subparagraphs (C), (D), and (E) of section 217(b)(1) paid in connection with the commencement of work by A in Washington, DC, and his wife in Baltimore, MD, are subject to an overall limitation of $6,000 of which the expenses described in subparagrahs (C) and (D) cannot exceed $3,000. If A and his wife file separate returns for taxable year 1977, A may deduct up to $3,000 of the expenses described in subparagraphs (C), (D), and (E) of which the expenses described in subparagraphs (C) and (D) cannot exceed $1,500. A's wife may deduct up to $3,000 of the expenses described in subparagraphs (C), (D), and (E) of which the expenses described in subparagraphs (C) and (D) cannot exceed $1,500.

(10) *Individuals other than taxpayer.* (i) In addition to the expenses set forth in subparagraphs (A) through (D) of section 217(b)(1) attributable to the taxpayer alone, the same type of expenses

attributable to certain individuals other than the taxpayer, if paid or incurred by the taxpayer, are deductible. These other individuals must be members of the taxpayer's household, and have both the taxpayer's former residence and his new residence as their principal place of abode. A member of the taxpayer's household includes any individual residing at the taxpayer's residence who is neither a tenant nor an employee of the taxpayer. Thus, for example, a member of the taxpayer's household may not be an individual such as a servant, governess, chauffeur, nurse, valet, or personal attendant. However, for purposes of this paragraph, a tenant or employee will be considered a member of the taxpayer's household where the tenant or employee is a dependent of the taxpayer as defined in section 152.

(ii) In addition to the expenses set forth in section 217(b)(2) paid or incurred by the taxpayer attributable to property sold, purchased, or leased by the taxpayer alone, the same type of expenses paid or incurred by the taxpayer attributable to property sold, purchased, or leased by the taxpayer's spouse or by the taxpayer and his spouse are deductible providing such property is used by the taxpayer as his principal place of residence.

(c) *Conditions for allowance*—(1) *In general.* Section 217(c) provides two conditions which must be satisfied in order for a deduction of moving expenses to be allowed under section 217(a). The first is a minimum distance condition prescribed by section 217(c)(1), and the second is a minimum period of employment condition prescribed by section 217(c)(2).

(2) *Minimum distance.* For purposes of applying the minimum distance condition of section 217(c)(1) all taxpayers are divided into one or the other of the following categories: Taxpayers having a former principal place of work, and taxpayers not having a former principal place of work. Included in this latter category are individuals who are seeking fulltime employment for the first time either as an employee or on a self- employed basis (for example, recent high school or college graduates), or individuals who are reentering the labor force after a substantial period of unemployment or part-time employment.

(i) In the case of a taxpayer having a former principal place of work, section 217(c)(1)(A) provides that no deduction is allowable unless the distance between the former residence and the new principal place of work exceeds by at least 35 miles (50 miles in the case of expenses paid or incurred in taxable years beginning before January 1, 1977) the distance between the former residence and the former principal place of work.

(ii) In the case of a taxpayer not having a former principal place of work, section 217(c)(1)(B) provides that no deduction is allowable unless the distance between the former residence and the new principal place of work is at least 35 miles (50 miles in the case of expenses paid or incurred in taxable years beginning before January 1, 1977).

(iii) For purposes of measuring distances under section 217(c)(1) the distance between two geographic points is measured by the shortest of the more commonly traveled routes between such points. The shortest of the more commonly traveled routes refers to the line of travel and the mode or modes of transportation commonly used to go between two geographic points comprising the shortest distance between such points irrespective of the route used by the taxpayer.

(3) *Principal place of work.* (i) A taxpayer's *principal place of work* usually is the place where he spends most of his working time. The principal place of work of a taxpayer who performs services as an employee is his employer's plant, office, shop, store, or other property. The principal place of work of a taxpayer who is self-employed is the plant, office, shop, store, or other property which serves as the center of his business activities. However, a taxpayer may have a principal place of work even if there is no one place where he spends a substantial portion of his working time. In such case, the taxpayer's principal place of work is the place where his business activities are centered—for example, because he reports there for work, or is required either by his employer or the nature of his employment to ''base'' his employment there. Thus, while a member of a

railroad crew may spend most of his working time aboard a train, his principal place of work is his home terminal, station, or other such central point where he reports in, checks out, or receives instructions. The principal place of work of a taxpayer who is employed by a number of employers on a relatively short-term basis, and secures employment by means of a union hall system (such as a construction or building trades worker) would be the union hall.

(ii) Where a taxpayer has more than one employment (i.e., the taxpayer is employed by more than one employer, or is self-employed in more than one trade or business, or is an employee and is self-employed at any particular time) his principal place of work is determined with reference to his principal employment. The location of a taxpayer's principal place of work is a question of fact determined on the basis of the particular circumstances in each case. The more important factors to be considered in making this determination are (*a*) the total time ordinarily spent by the taxpayer at each place, (*b*) the degree of the taxpayer's business activity at each place, and (*c*) the relative significance of the financial return to the taxpayer from each place.

(iii) Where a taxpayer maintains inconsistent positions by claiming a deduction for expenses of meals and lodging while away from home (incurred in the general location of the new principal place of work) under section 162 (relating to trade or business expenses) and by claiming a deduction under this section for moving expenses incurred in connection with the commencement of work at such place of work, it will be a question of facts and circumstances as to whether such new place of work will be considered a principal place of work, and accordingly, which category of deductions he will be allowed.

(4) *Minimum period of employment.* (i) Under section 217(c)(2) no deduction is allowed unless:

(*a*) Where a taxpayer is an employee, during the 12-month period immediately following his arrival in the general location of the new principal place of work, he is a full-time employee, in such general location, during at least 39 weeks, or

(*b*) Where a taxpayer is a self-employed individual (including a taxpayer who is also an employee, but is unable to satisfy the requirements of the 39-week test of (a) of this subdivision (i)), during the 24-month period immediately following his arrival in the general location of the new principal place of work, he is a full-time employee or performs services as a self-employed individual on a full-time basis, in such general location, during at least 78 weeks, of which not less than 39 weeks are during the 12-month period referred to above.

Where a taxpayer works as an employee and at the same time performs services as a self-employed individual his principal employment (determined according to subdivision (i) of subparagraph (3) of this paragraph) governs whether the 39-week or 78-week test is applicable.

(ii) The 12-month period and the 39-week period set forth in subparagraph (A) of section 217(c)(2) and the 12- and 24-month periods as well as 39- and 78-week periods set forth in subparagraph (B) of such section are measured from the date of the taxpayer's arrival in the general location of the new principal place of work. Generally, date of arrival is the date of the termination of the last trip preceding the taxpayer's commencement of work on a regular basis and is not the date the taxpayer's family or household goods and effects arrive.

(iii) The taxpayer need not remain in the employ of the same employer or remain self-employed in the same trade or business for the required number of weeks. However, he must be employed in the same general location of the new principal place of work during such period. The *general location* of the new principal place of work refers to a general commutation area and is usually the same area as the "new place of residence"; see paragraph (b)(8) of this section.

(iv) Only those weeks during which the taxpayer is a full-time employee or during which he performs services as a self-employed individual on a full-time basis qualify as a week of work for purposes of the minimum period of employment condition of section 217(c)(2).

(*a*) Whether an employee is a full-time employee during any particular week depends upon the customary practices of the occupation in the geographic area in which the taxpayer works. Where employment is on a seasonal basis, weeks occurring in the off-season when no work is required or available may be counted as weeks of full-time employment only if the employee's contract or agreement of employment covers the off-season period and such period is less than 6 months. Thus, for example, a schoolteacher whose employment contract covers a 12-month period and who teaches on a full-time basis for more than 6 months is considered a full-time employee during the entire 12-month period. A taxpayer will be treated as a full-time employee during any week of involuntary temporary absence from work because of illness, strikes, shutouts, layoffs, natural disasters, etc. A taxpayer will, also, be treated as a full-time employee during any week in which he voluntarily absents himself from work for leave or vacation provided for in his contract or agreement of employment.

(*b*) Whether a taxpayer performs services as a self-employed individual on a full-time basis during any particular week depends on the practices of the trade or business in the geographic area in which the taxpayer works. For example, a self-employed dentist maintaining office hours 4 days a week is considered to perform services as a self-employed individual on a full-time basis providing it is not unusual for other self-employed dentists in the geographic area in which the taxpayer works to maintain office hours only 4 days a week. Where a trade or business is seasonal, weeks occurring during the off-season when no work is required or available may be counted as weeks of performance of services on a full-time basis only if the off-season is less than 6 months and the taxpayer performs services on a full-time basis both before and after the off-season. For example, a taxpayer who owns and operates a motel at a beach resort is considered to perform services as a self-employed individual on a full-time basis if the motel is closed for a period not exceeding 6 months during the off-season and if he performs services on a full-time basis as the operator of a motel both before and after the off-season. A taxpayer will be treated as performing services as a self-employed individual on a full-time basis during any week of involuntary temporary absence from work because of illness, strikes, natural disasters, etc.

(v) Where taxpayers file a joint return, either spouse may satisfy the minimum period of employment condition. However, weeks worked by one spouse may not be added to weeks worked by the other spouse in order to satisfy such condition. The taxpayer seeking to satisfy the minimum period of employment condition must satisfy the condition applicable to him. Thus, if a taxpayer is subject to the 39-week condition and his spouse is subject to the 78-week condition and the taxpayer satisfies the 39-week condition, his spouse need not satisfy the 78-week condition. On the other hand, if the taxpayer does not satisfy the 39-week condition, his spouse in such case must satisfy the 78-week condition.

(vi) The application of this subparagraph may be illustrated by the following examples:

Example 1. A is an electrician residing in New York City. He moves himself, his family, and his household goods and personal effects, at his own expense, to Denver where he commences employment with the M Aircraft Corporation. After working full-time for 30 weeks he voluntarily leaves his job, and he subsequently moves to and commences employment in Los Angeles, CA, which employment lasts for more than 39 weeks. Since A was not employed in the general location of his new principal place of employment in Denver for at least 39 weeks, no deduction is allowable for moving expenses paid or incurred between New York City and Denver. A will be allowed to deduct only those moving expenses attributable to his move from Denver to Los Angeles, assuming all other conditions of section 217 are met.

Example 2. Assume the same facts as in *Example 1*, except that A's wife commences employment in Denver at the same time as A, and that she continues to work in Denver for at least 9 weeks after A's departure for Los Angeles. Since she has met the 39-week requirement in Denver, and assuming all other requirements of section 217 are met, the moving expenses paid by A attributable to the move from New York City to Denver will be allowed as a deduction, provided A and his wife file a joint return. If A and his wife file separate returns moving expenses paid by A's wife attributable to the move from New York City to Denver will be allowed as a deduction on A's wife's return.

Example 3. Assume the same facts as in *Example 1,* except that A's wife commences employment in Denver on the same day that A departs for Los Angeles, and continues to work in Denver for 9 weeks thereafter. Since neither A (who has worked 30 weeks) nor his wife (who has worked 9 weeks) has independently satisfied the 39-week requirement, no deduction for moving expenses attributable to the move from New York City to Denver is allowable.

(d) *Rules for application of section 217(c)(2)*—(1) *Inapplicability of minimum period of employment condition in certain cases.* Section 217(d)(1) provides that the minimum period of employment condition of section 217(c)(2) does not apply in the case of a taxpayer who is unable to meet such condition by reason of:

(i) Death or disability, or

(ii) Involuntary separation (other than for willfull misconduct) from the service of an employer or separation by reason of transfer for the benefit of an employer after obtaining full-time employment in which the taxpayer could reasonably have been expected to satisfy such condition.

For purposes of subdivision (i) of this paragraph disability shall be determined according to the rules in section 72(m)(7) and §1.72–17(f). Subdivision (ii) of this subparagraph applies only where the taxpayer has obtained full-time employment in which he could reasonably have been expected to satisfy the minimum period of employment condition. A taxpayer could reasonably have been expected to satisfy the minimum period of employment condition if at the time he commences work at the new principal place of work he could have been expected, based upon the facts known to him at such time, to satisfy such condition. Thus, for example, if the taxpayer at the time of transfer was not advised by his employer that he planned to transfer him within 6 months to another principal place of work, the taxpayer could, in the absence of other factors, reasonably have been expected to satisfy the minimum employment period condition at the time of the first transfer. On the other hand, a taxpayer could not reasonably have been expected to satisfy the minimum employment condition if at the time of the commencement of the move he knew that his employer's retirement age policy would prevent his satisfying the minimum employment period condition.

(2) *Election of deduction before minimum period of employment condition is satisfied.* (i) Paragraph (2) of section 217(d) provides a rule which applies where a taxpayer paid or incurred, in a taxable year, moving expenses which would be deductible in that taxable year except that the minimum period of employment condition of section 217(c)(2) has not been satisfied before the time prescribed by law for filing the return for such taxable year. The rule provides that where a taxpayer has paid or incurred moving expenses and as of the date prescribed by section 6072 for filing his return for such taxable year (determined with regard to extensions of time for filing) there remains unexpired a sufficient portion of the 12-month or the 24-month period so that it is still possible for the taxpayer to satisfy the applicable period of employment condition, the taxpayer may elect to claim a deduction for such moving expenses on the return for such taxable year. The election is exercised by taking the deduction on the return.

(ii) Where a taxpayer does not elect to claim a deduction for moving expenses on the return for the taxable year in which such expenses were paid or incurred in accordance with subdivision (i) of this subparagraph and the applicable minimum period of employment condition of section 217(c)(2) (as well as all other requirements of section 217) is subsequently satisfied, the taxpayer may file an amended return or a claim for refund for the taxable year such moving expenses were paid or incurred on which he may claim a deduction under section 217.

(iii) The application of this subparagraph may be illustrated by the following examples:

Example 1. A is transferred by his employer from Boston, MA, to Cleveland, OH. He begins working there on November 1, 1970.

Moving expenses are paid by A in 1970 in connection with this move. On April 15, 1971, when he files his income tax return for the year 1970, A has been a full-time employee in Cleveland for approximately 24 weeks. Although he has not satisfied the 39-week employment condition at this time, A may elect to claim his 1970 moving expenses on his 1970 income tax return as there is still sufficient time remaining before November 1, 1971, to satisfy such condition.

Example 2. Assume the same facts as in *Example 1,* except that on April 15, 1971, A has voluntarily left his employer and is looking for other employment in Cleveland. A may not be sure he will be able to meet the 39-week employment condition by November 1, 1971. Thus, he may if he wishes wait until such condition is met and file an amended return claiming as a deduction the expenses paid in 1970. Instead of filing an amended return A may file a claim for refund based on a deduction for such expenses. If A fails to meet the 39-week employment condition on or before November 1, 1971, no deduction is allowable for such expenses.

Example 3. B is a self-employed accountant. He moves from Rochester, NY, to New York, NY, and begins to work there on December 1, 1970. Moving expenses are paid by B in 1970 and 1971 in connection with this move. On April 15, 1971, when he files his income tax return for the year 1970, B has been performing services as a self-employed individual on a full-time basis in New York City for approximately 20 weeks. Although he has not satisfied the 78-week employment condition at this time, A may elect to claim his 1970 moving expenses on his 1970 income tax return as there is still sufficient time remaining before December 1, 1972, to satisfy such condition. On April 15, 1972, when he files his income tax return for the year 1971, B has been performing services as a self-employed individual on a full-time basis in New York City for approximately 72 weeks. Although he has not met the 78-week employment condition at this time, B may elect to claim his 1971 moving expenses on his 1971 income tax return as there is still sufficient time remaining before December 1, 1972, to satisfy such requirement.

(3) *Recapture of deduction.* Paragraph (3) of section 217(d) provides a rule which applies where a taxpayer has deducted moving expenses under the election provided in section 217(d)(2) prior to satisfying the applicable minimum period of employment condition and such condition cannot be satisfied at the close of a subsequent taxable year. In such cases an amount equal to the expenses deducted must be included in the taxpayer's gross income for the taxable year in which the taxpayer is no longer able to satisfy such minimum period of employment condition. Where the taxpayer has deducted moving expenses under the election provided in section 217(d)(2) for the taxable year and subsequently files an amended return for such year on which he does not claim the deduction, such expenses are not treated as having been deducted for purposes of the recapture rule of the preceding sentence.

(e) *Denial of double benefit*—(1) *In general.* Section 217(e) provides a rule for computing the amount realized and the basis where qualified real estate expenses are allowed as a deduction under section 217(a).

(2) *Sale or exchange of residence.* Section 217(e) provides that the amount realized on the sale or exchange of a residence owned by the taxpayer, by the taxpayer's spouse, or by the taxpayer and his spouse and used by the taxpayer as his principal place of residence is not decreased by the amount of any expenses described in subparagraph (A) of section 217(b)(2) and deducted under section 217(a). For the purposes of section 217(e) and of this paragraph the term amount realized'' has the same meaning as under section 1001(b) and the regulations thereunder. Thus, for example, if the taxpayer sells a residence used as his principal place of residence and real estate commissions or similar expenses described in subparagraph (A) of section 217(b)(2) are deducted by him pursuant to section 217(a), the amount realized on the sale of the residence is not reduced by the amount of such real estate commissions or such similar expenses described in subparagraph (A) of section 217(b)(2).

(3) *Purchase of a residence.* Section 217(e) provides that the basis of a residence purchased or received in exchange for other property by the taxpayer, by the taxpayer's spouse, or by the taxpayer and his spouse and used by the taxpayer as his principal place of residence is not increased by the amount of any expenses described in subparagraph (B) of section 217(b)(2) and deducted under section 217(a). For the purposes of section 217(e) and of this paragraph the term *basis* has the same meaning as under section 1011 and the regulations thereunder. Thus,

for example, if a taxpayer purchases a residence to be used as his principal place of residence and attorneys' fees or similar expenses described in subparagraph (B) of section 217(b)(2) are deducted pursuant to section 217(a), the basis of such residence is not increased by the amount of such attorneys' fees or such similar expenses described in subparagraph (B) of section 217(b)(2).

(4) *Inapplicability of section 217(e).* (i) Section 217(e) and subparagraphs (1) through (3) of this paragraph do not apply to any expenses with respect to which an amount is included in gross income under section 217(d)(3). Thus, the amount of any expenses described in subparagraph (A) of section 217(b)(2) deducted in the year paid or incurred pursuant to the election under section 217(d)(2) and subsequently recaptured pursuant to section 217(d)(3) may be taken into account in computing the amount realized on the sale or exchange of the residence described in such subparagraph. Also, the amount of expenses described in subparagraph (B) of section 217(b)(2) deducted in the year paid or incurred pursuant to such election under section 217(d)(2) and subsequently recaptured pursuant to section 217(d)(3) may be taken into account as an adjustment to the basis of the residence described in such subparagraph.

(ii) The application of subdivision (i) of this subparagraph may be illustrated by the following examples:

Example 1. A was notified of his transfer effective December 15, 1972, from Seattle, WA, to Philadelphia, PA. In connection with the transfer A sold his house in Seattle on November 10, 1972. Expenses incident to the sale of the house of $2,500 were paid by A prior to or at the time of the closing of the contract of sale on December 10, 1972. The amount realized on the sale of the house was $47,500 and the adjusted basis of the house was $30,000. Pursuant to the election provided in section 217(d)(2), A deducted the expenses of moving from Seattle to Philadelphia including the expenses incident to the sale of his former residence in taxable year 1972. Dissatisfied with his position with his employer in Philadelphia, A took a position with an employer in Chicago, IL, on July 15, 1973. Since A was no longer able to satisfy the minimum period employment condition at the close of taxable year 1973 he included an amount equal to the amount deducted as moving expenses including the expenses incident to the sale of his former residence in gross income for taxable year 1973. A is permitted to decrease the amount realized on the sale of the house by the amount of the expenses incident to the sale of the house deducted from gross income and subsequently included in gross income. Thus, the amount realized on the sale of the house is decreased from $47,500 to $45,000 and thus, the gain on the sale of the house is reduced from $17,500 to $15,000. A is allowed to file an amended return or a claim for refund in order to reflect the recomputation of the amount realized.

Example 2. B, who is self-employed decided to move from Washington, DC, to Los Angeles, CA. In connection with the commencement of work in Los Angeles on March 1, 1973, B purchased a house in a suburb of Los Angeles for $65,000. Expenses incident to the purchase of the house in the amount of $1,500 were paid by B prior to or at the time of the closing of the contract of sale on September 15, 1973. Pursuant to the election provided in section 217(d)(2), B deducted the expenses of moving from Washington to Los Angeles including the expenses incident to the purchase of his new residence in taxable year 1973. Dissatisfied with his prospects in Los Angeles, B moved back to Washington on July 1, 1974. Since B was no longer able to satisfy the minimum period of employment condition at the close of taxable year 1974 he included an amount equal to the amount deducted as moving expenses incident to the purchase of the former residence in gross income for taxable year 1974. B is permitted to increase the basis of the house by the amount of the expenses incident to the purchase of the house deducted from gross income and subsequently included in gross income. Thus, the basis of the house is increased to $66,500.

(f) *Rules for self-employed individuals*—(1) *Definition.* Section 217(f)(1) defines the term *self-employed individual* for purposes of section 217 to mean an individual who performs personal services either as the owner of the entire interest in an unincorporated trade or business or as a partner in a partnership carrying on a trade or business. The term *self-employed individual* does not include the semiretired, part-time students, or other similarly situated taxpayers who work only a few hours each week. The application of this subparagraph may be illustrated by the following example:

Example. A is the owner of the entire interest in an unincorporated construction business. A hires a manager who performs all of the daily functions of the business including the negotiation of contracts with customers, the hiring and firing of employees, the purchasing of materials used on the projects, and other similar services. A and his manager discuss the operations of the business about once a week over the telephone. Otherwise A does not perform any managerial services for the business. For the purposes of section 217, A is not considered to be a self-employed individual.

(2) *Rule for application of subsection (b)(1) (C) and (D).* Section 217(f)(2) provides that for purposes of subparagraphs (C) and (D) of section 217(b)(1) an individual who commences work at a new principal place of work as a self-employed individual is treated as having obtained employment when he has made substantial arrangements to commence such work. Whether the taxpayer has made substantial arrangements to commence work at a new principal place of work is determined on the basis of all the facts and circumstances in each case. The factors to be considered in this determination depend upon the nature of the taxpayer's trade or business and include such considerations as whether the taxpayer has: (i) Leased or purchased a plant, office, shop, store, equipment, or other property to be used in the trade or business, (ii) made arrangements to purchase inventory or supplies to be used in connection with the operation of the trade or business, (iii) entered into commitments with individuals to be employed in the trade or business, and (iv) made arrangements to contact customers or clients in order to advertise the business in the general location of the new principal place of work. The application of this subparagraph may be illustrated by the following examples:

Example 1. A, a partner in a growing chain of drug stores decided to move from Houston, TX, to Dallas, TX, in order to open a drug store in Dallas. A made several trips to Dallas for the purpose of looking for a site for the drug store. After the signing of a lease on a building in a shopping plaza, suppliers were contacted, equipment was purchased, and employees were hired. Shortly before the opening of the store A and his wife moved from Houston to Dallas and took up temporary quarters in a motel until the time their apartment was available. By the time he and his wife took up temporary quarters in the motel A was considered to have made substantial arrangements to commence work at the new principal place of work.

Example 2. B, who is a partner in a securities brokerage firm in New York, NY, decided to move to Rochester, NY, to become the resident partner in the firm's new Rochester office. After a lease was signed on an office in downtown Rochester B moved to Rochester and took up temporary quarters in a motel until his apartment became available. Before the opening of the office B supervised the decoration of the office, the purchase of equipment and supplies necessary for the operation of the office, the hiring of personnel for the office, as well as other similar activities. By the time B took up temporary quarters in the motel he was considered to have made substantial arrangements to commence to work at the new principal place of work.

Example 3. C, who is about to complete his residency in ophthalmology at a hospital in Pittsburgh, PA, decided to fly to Philadelphia, PA, for the purpose of looking into opportunities for practicing in that city. Following his arrival in Philadelphia C decided to establish his practice in that city. He leased an office and an apartment. At the time he departed Pittsburgh for Philadelphia C was not considered to have made substantial arrangements to commence work at the new principal place of work, and, therefore, is not allowed to deduct expenses described in subparagraph (C) of section 217(b)(1) (relating to expenses of traveling (including meals and lodging), after obtaining employment, from the former residence to the general location of the new principal place of work and return, for the principal purpose of searching for a new residence).

(g) *Rules for members of the Armed Forces of the United States*—(1) *In general.* The rules in paragraphs (a)(1) and (2), (b), and (e) of this section apply to moving expenses paid or incurred by members of the Armed Forces of the United States on active duty who move pursuant to a military order and incident to a permament change of station, except as provided in this paragraph (g). However, if the moving expenses are not paid or incurred incident to a permanent change of station, this paragraph (g) does not apply, but all other paragraphs of this section do apply. The provisions of this paragraph apply to taxable years beginning December 31, 1975.

(2) *Treatment of services or reimbursement provided by Government*—(i) *Services in kind.* The value of any moving or storage services furnished by the United States Government to members of the Armed Forces, their spouses, or their dependents in connection with a

permanent change of station is not includible in gross income. The Secretary of Defense and (in cases involving members of the peacetime Coast Guard) the Secretary of Transportation are not required to report or withhold taxes with respect to those services. Services furnished by the Government include services rendered directly by the Government or rendered by a third party who is compensated directly by the Government for the services.

(ii) *Reimbursements.* The following rules apply to reimbursements or allowances by the Government to members of the Armed Forces, their spouses, or their dependents for moving or storage expenses paid or incurred by them in connection with a permanent change of station. If the reimbursement or allowance exceeds the actual expenses paid or incurred, the excess is includible in the gross income of the member, and the Secretary of Defense or Secretary of Transportation must report the excess as payment of wages and withhold income taxes under section 3402 and the employee taxes under section 3102 with respect to that excess. If the reimbursement or allowance does not exceed the actual expenses, the reimbursement or allowance in not includible in gross income, and no reporting or withholding by the Secretary of Defense or Secretary of Transportation is required. If the actual expenses, as limited by paragraph (b)(9) of this section, exceed the reimbursement of allowance, the member may deduct the excess if the other requirements of this section, as modified by this paragraph, are met. The determination of the limitation on actual expenses under paragraph (b)(9) of this section is made without regard to any services in kind furnished by the Government.

(3) *Permanent change of station.* For purposes of this section, the term *permanent change of station* includes the following situations.

(i) A move from home to the first post of duty when appointed, reappointed, reinstated, or inducted.

(ii) A move from the last post of duty to home or a nearer point in the United States in connection with retirement, discharge, resignation, separation under honorable conditions, transfer, relief from active duty, temporary disability retirement, or transfer to a Fleet Reserve, if such move occurs within 1 year of such termination of active duty or within the period prescribed by the Joint Travel Regulations promulgated under the authority contained in sections 404 through 411 of title 37 of the United States Code.

(iii) A move from one permanent post of duty to another permanent post of duty at a different duty station, even if the member separates from the Armed Forces immediately or shortly after the move.

The term *permanent, post of duty, duty station,* and *honorable* have the meanings given them in appropriate Department of Defense or Department of Transportation rules and regulations.

(4) *Storage expenses.* This paragraph applies to storage expenses as well as to moving expenses described in paragraph (b)(1) of this section. the term *storage expenses* means the cost of storing personal effects of members of the Armed Forces, their spouses, and their dependents.

(5) *Moves of spouses and dependents.* (i) The following special rule applies for purposes of paragraphs (b)(9) and (10) of this section, if the spouse or dependents of a member of the Armed Forces move to or from a different location than does the member. In this case, the spouse is considered to have commenced work as an employee at a new principal place of work that is within the same general location as the location to which the member moves.

(ii) The following special rule applies for purposes of this paragraph to moves by spouses or dependents of members of the Armed Forces who die, are imprisoned, or desert while on active duty. In these cases, a move to a member's place of enlistment or induction or the member's, spouse's, or dependent's home of record or nearer point in the United States is considered incident to a permanent change of station.

(6) *Disallowance of deduction.* No deduction is allowed under this section for any moving or storage expense reimbursed by an allowance that is excluded from gross income.

(h) *Special rules for foreign moves*—(1) *Increase in limitations.* In the case of a foreign move (as defined in paragraph (h)(3) of this section), paragraph (b)(6) of this section shall be applied by substituting ''90 consecutive'' for ''30 consecutive'' each time it appears. Paragraph (b)(9) (ii), (iii) and (v) of this section shall be applied by substituting ''$6,000'' for ''$3,000'' each time it appears and by substituting ''$4,500'' for ''$1,500'' each time it appears. Paragraph (b)(9)(ii) of this section shall be applied by substituting ''$5,000'' for ''$2,000'' each time it appears and by substituting ''1979'' for ''1977'' and ''1980'' for ''1978'' each time they appear in the last sentence. Paragraph (b)(9)(v) of this section shall be applied by substituting ''$2,250'' for ''$750'' each time it appears. Paragraph (b)(9)(vi) of this section does not apply.

(2) *Allowance of certain storage fees.* In the case of a foreign move, for purposes of this section, the moving expenses described in paragraph (b)(3) of this section shall include the reasonable expenses of moving household goods and personal effects to and from storage, and of storing such goods and effects for part or all of the period during which the new place of work continues to be the taxpayer's principal place of work.

(3) *Foreign move.* For purposes of this paragraph, the term *foreign move* means a move in connection with the commencement of work by the taxpayer at a new principal place of work located outside the United States. Thus, a move from the United States to a foreign country or from one foreign country to another foreign country qualifies as a foreign move. A move within a foreign country also qualifies as a foreign move. A move from a foreign country to the United States does not qualify as a foreign move.

(4) *United States.* For purposes of this paragraph, the term *United States* includes the possessions of the United States.

(5) *Effective date.* The provisions of this paragraph apply to expenses paid or incurred in taxable years beginning after December 31, 1978. The paragraph also applies to the expenses paid or incurred in the taxable year beginning during 1978 of taxpayers who do not make an election pursuant to section 209(c) of the Foreign Earned Income Act of 1978 (Pub. L. 95–615, 92 Stat. 3109) to have section 911 under prior law apply to that taxable year.

(i) *Allowance of deductions in case of retirees or decedents who were working abroad*—(1) *In general.* In the case of any qualified retiree moving expenses or qualified survivor moving expenses, this section (other than paragraph (h)) shall be applied to such expenses as if they were incurred in connection with the commencement of work by the taxpayer as an employee at a new principal place of work located within the United States and the limitations of paragraph (c)(4) of this section (relating to the minimum period of employment) shall not apply.

(2) *Qualified retiree moving expenses.* For purposes of this paragraph, the term *qualified retiree moving expenses* means any moving expenses which are incurred by an individual whose former principal place of work and former residence were outside the United States and which are incurred for a move to a new residence in the United States in connection with the bona fide retirement of the individual. *Bona fide retirement* means the permanent withdrawal from gainful full-time employment and self-employment. An individual who at the time of withdrawal from gainful full-time employment or self-employment, intends the withdrawal to be permanent shall be considered to be a *bona fide retiree* even though the individual ultimately resumes gainful full-time employment or self-employment. An individual's intention may be evidenced by relevant facts and circumstances which include the age and health of the individual, the customary retirement age of employees engaged in similar work, whether the individual is receiving a retirement allowance under a pension annuity, retirement or similar fund or system, and the length of time before resuming full-time employment or self-employment.

(3) *Qualified survivor moving expenses.* (i) For purposes of this paragraph, the term *qualified survivor moving expenses* means any moving expenses:

(A) Which are paid or incurred by the spouse or any dependent (as defined in section 152) of any decedent who (as of the time of his death) had a principal place of work outside the United States, and

(B) Which are incurred for a move which begins within 6 months after the death of the decedent and which is to a residence in the United States from a former residence outside the United States which (as of the time of the decedent's death) was the residence of such decedent and the individual paying or incurring the expense.

(ii) For purposes of paragraph (i)(3) (i) (B) of this section, a move begins when:

(A) The taxpayer contracts for the moving of his or her household goods and personal effects to a residence in the United States but only if the move is completed within a reasonable time thereafter;

(B) The taxpayer's household goods and personal effects are packed and in transit to a residence in the United States; or

(C) The taxpayer leaves the former residence to travel to a new place of residence in the United States.

(4) *United States*. For purposes of this paragraph, the term *United States* includes the possessions of the United States.

(5) *Effective date*. The provisions of this paragraph apply to expenses paid or incurred in taxable years beginning after December 31, 1978. The paragraph also applies to the expenses paid or incurred in the taxable year beginning during 1978 of taxpayers who do not make an election pursuant to section 209(c) of the Foreign Earned Income Act of 1978 (Pub. L. 95–615, 92 Stat. 3109) to have section 911 under prior law apply to that taxable year.

(j) *Effective date*—(1) *In general*. This section, except as provided in subparagraphs (2) and (3) of this paragraph, is applicable to items paid or incurred in taxable years beginning after December 31, 1969.

(2) *Reimbursement not included in gross income*. This section does not apply to items to the extent that the taxpayer received or accrued in a taxable year beginning before January 1, 1970, a reimbursement or other expense allowance for such items which was not included in his gross income.

(3) *Election in cases of expenses paid or incurred before January 1, 1971, in connection with certain moves*—(i) *In general*. A taxpayer who was notified by his employer on or before December 19, 1969, of a transfer to a new principal place of work and who pays or incurs moving expenses after December 31, 1969, but before January 1, 1971, in connection with such transfer may elect to have the rules governing moving expenses in effect prior to the effective date of section 231 of the Tax Reform Act of 1969 (83 Stat. 577) govern such expenses. If such election is made, this section and section 82 and the regulations thereunder do not apply to such expenses. A taxpayer is considered to have been notified on or before December 19, 1969, by his employer of a transfer, for example, if before such date the employer has sent a notice to all employees or a reasonably defined group of employees, which includes such taxpayer, of a relocation of the operations of such employer from one plant or facility to another plant or facility. An employee who is transferred to a new principal place of work for the benefit of his employer and who makes an election under this paragraph is permitted to exclude amounts received or accrued, directly or indirectly, as payment for or reimbursement of expenses of moving household goods and personal effects from the former residence to the new residence and of traveling (including meals and lodging) from the former residence to the new place of residence. Such exclusion is limited to amounts received or accrued, directly or indirectly, as a payment for or reimbursement of the expenses described above. Amounts in excess of actual expenses paid or incurred must be included in gross income. No deduction is allowable under section 217 for expenses representing amounts excluded from gross income. Also, an employee who is transferred to a new principal place of work which is less than 50 miles but at least 20 miles farther from his former residence than was his former principal place of work and who is not reimbursed, either directly or indirectly, for the expenses described above is permitted to deduct such expenses providing all of the requirements of section 217 and the regulations thereunder prior to the effective date of section 231 of the Tax Reform Act of 1969 (83 Stat. 577) are satisfied.

(ii) *Election made before the date of publication of this notice as a Treasury decision.* An election under this subparagraph made before the date of publication of this notice as a Treasury decision shall be made pursuant to the procedure prescribed in temporary income tax regulations relating to treatment of payments of expenses of moving from one residence to another residence (Part 13 of this chapter) T.D. 7032 (35 FR 4330), approved Mar. 11, 1970.

(iii) *Election made on or after the date of publication of this notice as a Treasury decision.* An election made under this subparagraph on or after the date of publication of this notice as a Treasury decision shall be made not later than the time, including extensions thereof, prescribed by law for filing the income tax return for the year in which the expenses were paid or 30 days after the date of publication of this notice as a Treasury decision, whichever occurs last. The election shall be made by a statement attached to the return (or the amended return) for the taxable year, setting forth the following information:

(*a*) The items to which the election relates;

(*b*) The amount of each item;

(*c*) The date each item was paid or incurred; and

(*d*) The date the taxpayer was informed by his employer of his transfer to the new principal place of work.

(iv) *Revocation of election.* An election made in accordance with this subparagraph is revocable upon the filing by the taxpayer of an amended return or a claim for refund with the district director, or the director of the Internal Revenue service center with whom the election was filed not later than the time prescribed by law, including extensions thereof, for the filing of a claim for refund with respect to the items to which the election relates.

[T.D. 7195, 37 FR 13535, July 11, 1972, 37 FR 14230, July 18, 1972, as amended by T.D. 7578 43 FR 59355, Dec. 20, 1978; T.D. 7605, 44 FR 18970, Mar. 30, 1979; T.D. 7689, 45 FR 20796, Mar. 31, 1980; T.D. 7810, 47 FR 6003, Feb. 10, 1982; T.D. 8607, 60 FR 40077, Aug. 7, 1995]

§ 1.219–1 Deduction for retirement savings.

(a) *In general.* Subject to the limitations and restrictions of paragraph (b) and the special rules of paragraph (c)(3) of this section, there shall be allowed a deduction under section 62 from gross income of amounts paid for the taxable year of an individual on behalf of such individual to an individual retirement account described in section 408(a), for an individual retirement annuity described in section 408(b), or for a retirement bond described in section 409. The deduction described in the preceding sentence shall be allowed only to the individual on whose behalf such individual retirement account, individual retirement annuity, or retirement bond is maintained. The first sentence of this paragraph shall apply only in the case of a contribution of cash. A contribution of property other than cash is not allowable as a deduction under this section. In the case of a retirement bond, a deduction will not be allowed if the bond is redeemed within 12 months of its issue date.

(b) *Limitations and restrictions*—(1) *Maximum deduction.* The amount allowable as a deduction under section 219(a) to an individual for any taxable year cannot exceed an amount equal to 15 percent of the compensation includible in the gross income of the individual for such taxable year, or $1,500, whichever is less.

(2) *Restrictions*—(i) *Individuals covered by certain other plans.* No deduction is allowable under section 219(a) to an individual for the taxable year if for any part of such year:

(A) He was an active participant in:

(*1*) A plan described in section 401(a) which includes a trust exempt from tax under section 501(a),

(*2*) An annuity plan described in section 403(a),

(*3*) A qualified bond purchase plan described in section 405(a), or

(*4*) A retirement plan established for its employees by the United States, by a State or political subdivision thereof, or by an agency or instrumentality of any of the foregoing, or

(B) Amounts were contributed by his employer for an annuity contract described in section 403(b) (whether or not the individual's rights in such contract are nonforfeitable).

(ii) *Contributions after age 70½.* No deduction is allowable under section 219 (a) to an individual for the taxable year of the individual, if he has attained the age of 70½ before the close of such taxable year.

(iii) *Rollover contributions.* No deduction is allowable under section 219 for any taxable year of an individual with respect to a rollover contribution described in section 402(a)(5), 402(a)(7), 403(a)(4), 403(b)(8), 408(d)(3), or 409(b)(3)(C).

(3) *Amounts contributed under endowment contracts.* (i) For any taxable year, no deduction is allowable under section 219(a) for amounts paid under an endowment contract described in §1.408–3(e) which is allocable under subdivision (ii) of this subparagraph to the cost of life insurance.

(ii) For any taxable year, the cost of current life insurance protection under an endowment contract described in paragraph (b)(3)(i) of this section is the product of the net premium cost, as determined by the Commissioner, and the excess, if any, of the death benefit payable under the contract during the policy year beginning in the taxable year over the cash value of the contract at the end of such policy year.

(iii) The provisions of this subparagraph may be illustrated by the following examples:

Example 1. A, an individual who is otherwise entitled to the maximum deduction allowed under section 219, purchases, at age 20, an endowment contract described in §1.408–3(e) which provides for the payment of an annuity of $100 per month, at age 65, with a minimum death benefit of $10,000, and an annual premium of $220. The cash value at the end of the first policy year is 0. The net premium cost, as determined by the Commissioner, for A's age is $1.61 per thousand dollars of life insurance protection. The cost of current life insurance protection is $16.10 ($1.61 × 10). A's maximum deduction under section 219 with respect to amounts paid under the endowment contract for the taxable year in which the first policy year begins is $203.90 ($220 − $16.10).

Example 2. Assume the same facts as in *Example 1,* except that the cash value at the end of the second policy year is $200 and the net premium cost is $1.67 per thousand for A's age. The cost of current life insurance protection is $16.37 ($1.67 × 9.8). A's maximum deduction under section 219 with respect to amounts paid under the endowment contract for the taxable year in which the second policy year begins is $203.63 ($220 − $16.37).

(c) *Definitions and special rules*—(1) *Compensation.* For purposes of this section, the term *compensation* means wages, salaries, professional fees, or other amounts derived from or received for personal service actually rendered (including, but not limited to, commissions paid salesmen, compensation for services on the basis of a percentage of profits, commissions on insurance premiums, tips, and bonuses) and includes earned income, as defined in section 401 (c) (2), but does not include amounts derived from or received as earnings or profits from property (including, but not limited to, interest and dividends) or amounts not includible in gross income.

(2) *Active participant.* For the definition of active participant, see §1.219–2.

(3) *Special rules.* (i) The maximum deduction allowable under section 219(b)(1) is computed separately for each individual. Thus, if a husband and wife each has compensation of $10,000 for the taxable year and they are each otherwise eligible to contribute to an individual retirement account and they file a joint return, then the maximum amount allowable as a deduction under section 219 is $3,000, the sum of the individual maximums of $1,500. However, if, for example, the husband has compensation of $20,000, the wife has no compensation, each is otherwise eligible to contribute to an individual retirement account for the taxable year, and they file a joint return, the maximum amount allowable as a deduction under section 219 is $1,500.

(ii) Section 219 is to be applied without regard to any community property laws. Thus, if, for example, a husband and wife, who are otherwise eligible to contribute to an individual retirement account, live in a community property jurisdiction and the husband alone has compensation of $20,000 for the taxable year, then the maximum amount allowable as a deduction under section 219 is $1,500.

(4) *Employer contributions.* For purposes of this chapter, any amount paid

by an employer to an individual retirement account or for an individual retirement annuity or retirement bond constitutes the payment of compensation to the employee (other than a self-employed individual who is an employee within the meaning of section 401(c)(1)) includible in his gross income, whether or not a deduction for such payment is allowable under section 219 to such employee after the application of section 219(b). Thus, an employer will be entitled to a deduction for compensation paid to an employee for amounts the employer contributes on the employee's behalf to an individual retirement account, for an individual retirement annuity, or for a retirement bond if such deduction is otherwise allowable under section 162.

[T.D. 7714, 45 FR 52788, Aug. 8, 1980]

§ 1.219–2 Definition of active participant.

(a) *In general.* This section defines the term *active participant* for individuals who participate in retirement plans described in section 219(b)(2). Any individual who is an active participant in such a plan is not allowed a deduction under section 219(a) for contributions to an individual retirement account.

(b) *Defined benefit plans*—(1) *In general.* Except as provided in subparagraphs (2), (3) and (4) of this paragraph, an individual is an active participant in a defined benefit plan if for any portion of the plan year ending with or within such individual's taxable year he is not excluded under the eligibility provisions of the plan. An individual is not an active participant in a particular taxable year merely because the individual meets the plan's eligibility requirements during a plan year beginning in that particular taxable year but ending in a later taxable year of the individual. However, for purposes of this section, an individual is deemed not to satisfy the eligibility provisions for a particular plan year if his compensation is less than the minimum amount of compensation needed under the plan to accrue a benefit. For example, assume a plan is integrated with Social Security and only those individuals whose compensation exceeds a certain amount accrue benefits under the plan. An individual whose compensation for the plan year ending with or within his taxable year is less than the amount necessary under the plan to accrue a benefit is not an active participant in such plan.

(2) *Rules for plans maintained by more than one employer.* In the case of a defined benefit plan described in section 413(a) and funded at least in part by service-related contributions, *e.g.*, so many cents-per-hour, an individual is an active participant if an employer is contributing or is required to contribute to the plan an amount based on that individual's service taken into account for the plan year ending with or within the individual's taxable year. The general rule in paragraph (b)(1) of this section applies in the case of plans described in section 413(a) and funded only on some non-service-related unit, *e.g.*, so many cents-per-ton of coal.

(3) *Plans in which accruals for all participants have ceased.* In the case of a defined benefit plan in which accruals for all participants have ceased, an individual in such a plan is not an active participant. However, any benefit that may vary with future compensation of an individual provides additional accruals. For example, a plan in which future benefit accruals have ceased, but the actual benefit depends upon final average compensation will not be considered as one in which accruals have ceased.

(4) *No accruals after specified age.* An individual in a defined benefit plan who accrues no additional benefits in a plan year ending with or within such individual's taxable year by reason of attaining a specified age is not an active participant by reason of his participation in that plan.

(c) *Money purchase plan.* An individual is an active participant in a money purchase plan if under the terms of the plan employer contributions must be allocated to the individual's account with respect to the plan year ending with or within the individual's taxable year. This rule applies even if an individual is not employed at any time during the individual's taxable year.

(d) *Profit-sharing and stock-bonus plans*—(1) *In general.* This paragraph applies to profit-sharing and stock bonus plans. An individual is an active participant in such plans in a taxable year if a forfeiture is allocated to his account as of a date in such taxable year. An individual is also an active participant in a taxable year in such plans if an employer contribution is added to the participant's account in such taxable year. A contribution is added to a participant's account as of the later of the following two dates: the date the contribution is made or the date as of which it is allocated. Thus, if a contribution is made in an individual's taxable year 2 and allocated as of a date in individual's taxable year 1, the later of the relevant dates is the date the contribution is made. Consequently, the individual is an active participant in year 2 but not in year 1 as a result of that contribution.

(2) *Special rule.* An individual is not an active participant for a particular taxable year by reason of a contribution made in such year allocated to a previous year if such individual was an active participant in such previous year by reason of a prior contribution that was allocated as of a date in such previous year.

(e) *Employee contributions.* If an employee makes a voluntary or mandatory contribution to a plan described in paragraphs (b), (c), or (d) of this section, such employee is an active participant in the plan for the taxable year in which such contribution is made.

(f) *Certain individuals not active participants.* For purposes of this section, an individual is not an active participant under a plan for any taxable year of such individual for which such individual elects, pursuant to the plan, not to participate in such plan.

(g) *Retirement savings for married individuals.* The provisions of this section apply in determining whether an individual or his spouse is an active participant in a plan for purposes of section 220 (relating to retirement savings for certain married individuals).

(h) *Examples.* The provisions of this section may be illustrated by the following examples:

Example 1. The X Corporation maintains a defined benefit plan which has the following rules on participation and accrual of benefits. Each employee who has attained the age of 25 or has completed one year of service is a participant in the plan. The plan further provides that each participant shall receive upon retirement $12 per month for each year of service in which the employee completes 1,000 hours of service. The plan year is the calendar year. B, a calendar-year taxpayer, enters the plan on January 2, 1980, when he is 27 years of age. Since B has attained the age of 25, he is a participant in the plan. However, B completes less than 1,000 hours of service in 1980 and 1981. Although B is not accruing any benefits under the plan in 1980 and 1981, he is an active participant under section 219(b)(2) because he is a participant in the plan. Thus, B cannot make deductible contributions to an individual retirement arrangement for his taxable years of 1980 and 1981.

Example 2. The Y Corporation maintains a profit-sharing plan for its employees. The plan year of the plan is the calendar year. C is a calendar-year taxpayer and a participant in the plan. On June 30, 1980, the employer makes a contribution for 1980 which as allocated on July 31, 1980. In 1981 the employer makes a second contribution for 1980, allocated as of December 31, 1980. Under the general rule stated in §1.219–2(d)(1), C is an active participant in 1980. Under the special rule stated in §1.219–2(d)(2), however, C is not an active participant in 1981 by reason of that contribution made in 1981.

(i) *Effective date.* The provisions set forth in this section are effective for taxable years beginning after December 31, 1978.

[T.D. 7714, 45 FR 52789, Aug. 8, 1980]

§ 1.221–1 Deduction for interest paid on qualified education loans after December 31, 2001.

(a) *In general*—(1) *Applicability.* Under section 221, an individual taxpayer may deduct from gross income certain interest paid by the taxpayer during the taxable year on a qualified education loan. See paragraph (b)(4) of this section for rules on payments of interest by third parties. The rules of this section are applicable to periods governed by section 221 as amended in 2001, which relates to deductions for interest paid on qualified education loans after December 31, 2001, in taxable years ending after December 31, 2001, and on or before December 31, 2010. For rules applicable to interest due and paid on qualified education loans after January 21, 1999, if paid before January 1, 2002, see §1.221–2. Taxpayers also may apply §1.221–2 to interest due and paid on qualified education loans after December 31, 1997, but before January 21, 1999. To the extent that the effective date limitation (sunset) of the 2001 amendment remains in force unchanged, section 221 before amendment in 2001, to which §1.221–2 relates, also applies to interest due and paid on qualified education loans in taxable years beginning after December 31, 2010.

(2) *Example*. The following example illustrates the rules of this paragraph (a). In the example, assume that the institution the student attends is an eligible educational institution, the loan is a qualified education loan, the student is legally obligated to make interest payments under the terms of the loan, and any other applicable requirements, if not otherwise specified, are fulfilled. The example is as follows:

Example. Effective dates. Student A begins to make monthly interest payments on her loan beginning January 1, 1997. Student A continues to make interest payments in a timely fashion. However, under the effective date provisions of section 221, no deduction is allowed for interest Student A pays prior to January 1, 1998. Student A may deduct interest due and paid on the loan after December 31, 1997. Student A may apply the rules of §1.221–2 to interest due and paid during the period beginning January 1, 1998, and ending January 20, 1999. Interest due and paid during the period January 21, 1999, and ending December 31, 2001, is deductible under the rules of §1.221–2, and interest paid after December 31, 2001, is deductible under the rules of this section.

(b) *Eligibility*—(1) *Taxpayer must have a legal obligation to make interest payments*. A taxpayer is entitled to a deduction under section 221 only if the taxpayer has a legal obligation to make interest payments under the terms of the qualified education loan.

(2) *Claimed dependents not eligible*—(i) *In general*. An individual is not entitled to a deduction under section 221 for a taxable year if the individual is a dependent (as defined in section 152) for whom another taxpayer is allowed a deduction under section 151 on a Federal income tax return for the same taxable year (or, in the case of a fiscal year taxpayer, the taxable year beginning in the same calendar year as the individual's taxable year).

(ii) *Examples*. The following examples illustrate the rules of this paragraph (b)(2):

Example 1. Student not claimed as dependent. Student B pays $750 of interest on qualified education loans during 2003. Student B's parents are not allowed a deduction for her as a dependent for 2003. Assuming fulfillment of all other relevant requirements, Student B may deduct under section 221 the $750 of interest paid in 2003.

Example 2. Student claimed as dependent. Student C pays $750 of interest on qualified education loans during 2003. Only Student C has the legal obligation to make the payments. Student C's parent claims him as a dependent and is allowed a deduction under section 151 with respect to Student C in computing the parent's 2003 Federal income tax. Student C is not entitled to a deduction under section 221 for the $750 of interest paid in 2003. Because Student C's parent was not legally obligated to make the payments, Student C's parent also is not entitled to a deduction for the interest.

(3) *Married taxpayers*. If a taxpayer is married as of the close of a taxable year, he or she is entitled to a deduction under this section only if the taxpayer and the taxpayer's spouse file a joint return for that taxable year.

(4) *Payments of interest by a third party*—(i) *In general*. If a third party who is not legally obligated to make a payment of interest on a qualified education loan makes a payment of interest on behalf of a taxpayer who is legally obligated to make the payment, then the taxpayer is treated as receiving the payment from the third party and, in turn, paying the interest.

(ii) *Examples*. The following examples illustrate the rules of this paragraph (b)(4):

Example 1. Payment by employer. Student D obtains a qualified education loan to attend college. Upon Student D's graduation from college, Student D works as an intern for a non-profit organization during which time Student D's loan is in deferment and Student D makes no interest payments. As part of the internship program, the non-profit organization makes an interest payment on behalf of Student D after the deferment period. This payment is not excluded from Student D's income under section 108(f) and is treated as additional compensation includible in Student D's gross income. Assuming fulfillment of all other requirements of section 221, Student D may deduct this payment of interest for Federal income tax purposes.

Example 2. Payment by parent. Student E obtains a qualified education loan to attend college. Upon graduation from college, Student E makes legally required monthly payments of principal and interest. Student E's mother makes a required monthly payment of interest as a gift to Student E. A deduction for Student E as a dependent is not allowed on another taxpayer's tax return for that taxable year. Assuming fulfillment of all other requirements of section 221, Student E may deduct this payment of interest for Federal income tax purposes.

(c) *Maximum deduction.* The amount allowed as a deduction under section 221 for any taxable year may not exceed $2,500.

(d) *Limitation based on modified adjusted gross income*—(1) *In general.* The deduction allowed under section 221 is phased out ratably for taxpayers with modified adjusted gross income between $50,000 and $65,000 ($100,000 and $130,000 for married individuals who file a joint return). Section 221 does not allow a deduction for taxpayers with modified adjusted gross income of $65,000 or above ($130,000 or above for married individuals who file a joint return). See paragraph (d)(3) of this section for inflation adjustment of amounts in this paragraph (d)(1).

(2) *Modified adjusted gross income defined.* The term *modified adjusted gross income* means the adjusted gross income (as defined in section 62) of the taxpayer for the taxable year increased by any amount excluded from gross income under section 911, 931, or 933 (relating to income earned abroad or from certain United States possessions or Puerto Rico). Modified adjusted gross income must be determined under this section after taking into account the inclusions, exclusions, deductions, and limitations provided by sections 86 (social security and tier 1 railroad retirement benefits), 135 (redemption of qualified United States savings bonds), 137 (adoption assistance programs), 219 (deductible qualified retirement contributions), and 469 (limitation on passive activity losses and credits), but before taking into account the deductions provided by sections 221 and 222 (qualified tuition and related expenses).

(3) *Inflation adjustment.* For taxable years beginning after 2002, the amounts in paragraph (d)(1) of this section will be increased for inflation occurring after 2001 in accordance with section 221(f)(1). If any amount adjusted under section 221(f)(1) is not a multiple of $5,000, the amount will be rounded to the next lowest multiple of $5,000.

(e) *Definitions*—(1) *Eligible educational institution.* In general, an *eligible educational institution* means any college, university, vocational school, or other postsecondary educational institution described in section 481 of the Higher Education Act of 1965 (20 U.S.C. 1088), as in effect on August 5, 1997, and certified by the U.S. Department of Education as eligible to participate in student aid programs administered by the Department, as described in section 25A(f)(2) and §1.25A–2(b). For purposes of this section, an eligible educational institution also includes an institution that conducts an internship or residency program leading to a degree or certificate awarded by an institution, a hospital, or a health care facility that offers postgraduate training.

(2) *Qualified higher education expenses*—(i) *In general. Qualified higher education expenses* means the cost of attendance (as defined in section 472 of the Higher Education Act of 1965, 20 U.S.C. 1087ll, as in effect on August 4, 1997), at an eligible educational institution, reduced by the amounts described in paragraph (e)(2)(ii) of this section. Consistent with section 472 of the Higher Education Act of 1965, a student's cost of attendance is determined by the eligible educational institution and includes tuition and fees normally assessed a student carrying the same academic workload as the student, an allowance for room and board, and an allowance for books, supplies, transportation, and miscellaneous expenses of the student.

(ii) *Reductions.* Qualified higher education expenses are reduced by any amount that is paid to or on behalf of a student with respect to such expenses and that is—

(A) A qualified scholarship that is excludable from income under section 117;

(B) An educational assistance allowance for a veteran or member of the armed forces under chapter 30, 31, 32, 34 or 35 of title 38, United States Code, or under chapter 1606 of title 10, United States Code;

(C) Employer-provided educational assistance that is excludable from income under section 127;

(D) Any other amount that is described in section 25A(g)(2)(C) (relating to amounts excludable from gross income as educational assistance);

(E) Any otherwise includible amount excluded from gross income under section 135 (relating to the redemption of United States savings bonds);

(F) Any otherwise includible amount distributed from a Coverdell education savings account and excluded from gross income under section 530(d)(2); or

(G) Any otherwise includible amount distributed from a qualified tuition program and excluded from gross income under section 529(c)(3)(B).

(3) *Qualified education loan*—(i) *In general.* A *qualified education loan* means indebtedness incurred by a taxpayer solely to pay qualified higher education expenses that are—

(A) Incurred on behalf of a student who is the taxpayer, the taxpayer's spouse, or a dependent (as defined in section 152) of the taxpayer at the time the taxpayer incurs the indebtedness;

(B) Attributable to education provided during an academic period, as described in section 25A and the regulations thereunder, when the student is an eligible student as defined in section 25A(b)(3) (requiring that the student be a degree candidate carrying at least half the normal full-time workload); and

(C) Paid or incurred within a reasonable period of time before or after the taxpayer incurs the indebtedness.

(ii) *Reasonable period.* Except as otherwise provided in this paragraph (e)(3)(ii), what constitutes a reasonable period of time for purposes of paragraph (e)(3)(i)(C) of this section generally is determined based on all the relevant facts and circumstances. However, qualified higher education expenses are treated as paid or incurred within a reasonable period of time before or after the taxpayer incurs the indebtedness if—

(A) The expenses are paid with the proceeds of education loans that are part of a Federal postsecondary education loan program; or

(B) The expenses relate to a particular academic period and the loan proceeds used to pay the expenses are disbursed within a period that begins 90 days prior to the start of that academic period and ends 90 days after the end of that academic period.

(iii) *Related party.* A qualified education loan does not include any indebtedness owed to a person who is related to the taxpayer, within the meaning of section 267(b) or 707(b)(1). For example, a parent or grandparent of the taxpayer is a related person. In addition, a qualified education loan does not include a loan made under any qualified employer plan as defined in section 72(p)(4) or under any contract referred to in section 72(p)(5).

(iv) *Federal issuance or guarantee not required.* A loan does not have to be issued or guaranteed under a Federal postsecondary education loan program to be a qualified education loan.

(v) *Refinanced and consolidated indebtedness*—(A) *In general.* A qualified education loan includes indebtedness incurred solely to refinance a qualified education loan. A qualified education loan includes a single, consolidated indebtedness incurred solely to refinance two or more qualified education loans of a borrower.

(B) *Treatment of refinanced and consolidated indebtedness.* [Reserved]

(4) *Examples.* The following examples illustrate the rules of this paragraph (e):

Example 1. Eligible educational institution. University F is a postsecondary educational institution described in section 481 of the Higher Education Act of 1965. The U.S. Department of Education has certified that University F is eligible to participate in federal financial aid programs administered by that Department, although University F chooses not to participate. University F is an eligible educational institution.

Example 2. Qualified higher education expenses. Student G receives a $3,000 qualified scholarship for the 2003 fall semester that is excludable from Student G's gross income under section 117. Student G receives no other forms of financial assistance with respect to the 2003 fall semester. Student G's cost of attendance for the 2003 fall semester, as determined by Student G's eligible educational institution for purposes of calculating a student's financial need in accordance with section 472 of the Higher Education Act, is $16,000. For the 2003 fall semester, Student G has qualified higher education expenses of $13,000 (the cost of attendance as determined by the institution ($16,000) reduced by the qualified scholarship proceeds excludable from gross income ($3,000)).

Example 3. Qualified education loan. Student H borrows money from a commercial bank to pay qualified higher education expenses related to his enrollment on a half-time basis in a graduate program at an eligible educational institution. Student H uses all the loan proceeds to pay qualified higher education expenses incurred within a reasonable period of time after incurring the indebtedness. The loan is not federally guaranteed. The commercial bank is not related to Student H within the meaning of section 267(b) or 707(b)(1). Student H's loan is a qualified education loan within the meaning of section 221.

Example 4. Qualified education loan. Student I signs a promissory note for a loan on August 15, 2003, to pay for qualified higher education expenses for the 2003 fall and 2004 spring semesters. On August 20, 2003, the lender disburses loan proceeds to Student I's college. The college credits them to Student I's account to pay qualified higher education expenses for the 2003 fall semester, which begins on August 25, 2003. On January 26, 2004, the lender disburses additional loan proceeds to Student I's college. The college credits them to Student I's account to pay qualified higher education expenses for the 2004 spring semester, which began on January 12, 2004. Student I's qualified higher education expenses for the two semesters are paid within a reasonable period of time, as the first loan disbursement occurred within the 90 days prior to the start of the fall 2003 semester and the second loan disbursement occurred during the spring 2004 semester.

Example 5. Qualified education loan. The facts are the same as in *Example 4* except that in 2005 the college is not an eligible educational institution because it loses its eligibility to participate in certain federal financial aid programs administered by the U.S. Department of Education. The qualification of Student I's loan, which was used to pay for qualified higher education expenses for the 2003 fall and 2004 spring semesters, as a qualified education loan is not affected by the college's subsequent loss of eligibility.

Example 6. Mixed-use loans. Student J signs a promissory note for a loan secured by Student J's personal residence. Student J will use part of the loan proceeds to pay for certain improvements to Student J's residence and part of the loan proceeds to pay qualified higher education expenses of Student J's spouse. Because Student J obtains the loan not solely to pay qualified higher education expenses, the loan is not a qualified education loan.

(f) *Interest*—(1) *In general.* Amounts paid on a qualified education loan are deductible under section 221 if the amounts are interest for Federal income tax purposes. For example, interest includes—

(i) Qualified stated interest (as defined in §1.1273–1(c)); and

(ii) Original issue discount, which generally includes capitalized interest. For purposes of section 221, capitalized interest means any accrued and unpaid interest on a qualified education loan that, in accordance with the terms of the loan, is added by the lender to the outstanding principal balance of the loan.

(2) *Operative rules for original issue discount*—(i) *In general.* The rules to determine the amount of original issue discount on a loan and the accruals of the discount are in sections 163(e), 1271 through 1275, and the regulations thereunder. In general, original issue discount is the excess of a loan's stated redemption price at maturity (all payments due under the loan other than qualified stated interest payments) over its issue price (the amount loaned). Although original issue discount generally is deductible as it accrues under section 163(e) and §1.163–7, original issue discount on a qualified education loan is not deductible until paid. See paragraph (f)(3) of this section to determine when original issue discount is paid.

(ii) *Treatment of loan origination fees by the borrower.* If a loan origination fee is paid by the borrower other than for property or services provided by the lender, the fee reduces the issue price of the loan, which creates original issue discount (or additional original issue discount) on the loan in an amount equal to the fee. See §1.1273–2(g). For an example of how a loan origination fee is taken into account, see *Example 2* of paragraph (f)(4) of this section.

(3) *Allocation of payments.* See §§1.446–2(e) and 1.1275–2(a) for rules on allocating payments between interest and principal. In general, these rules treat a payment first as a payment of interest to the extent of the interest that

has accrued and remains unpaid as of the date the payment is due, and second as a payment of principal. The characterization of a payment as either interest or principal under these rules applies regardless of how the parties label the payment (either as interest or principal). Accordingly, the taxpayer may deduct the portion of a payment labeled as principal that these rules treat as a payment of interest on the loan, including any portion attributable to capitalized interest or loan origination fees.

(4) *Examples.* The following examples illustrate the rules of this paragraph (f). In the examples, assume that the institution the student attends is an eligible educational institution, the loan is a qualified education loan, the student is legally obligated to make interest payments under the terms of the loan, and any other applicable requirements, if not otherwise specified, are fulfilled. The examples are as follows:

Example 1. Capitalized interest. Interest on Student K's loan accrues while Student K is in school, but Student K is not required to make any payments on the loan until six months after he graduates or otherwise leaves school. At that time, the lender capitalizes all accrued but unpaid interest and adds it to the outstanding principal amount of the loan. Thereafter, Student K is required to make monthly payments of interest and principal on the loan. The interest payable on the loan, including the capitalized interest, is original issue discount. See section 1273 and the regulations thereunder. Therefore, in determining the total amount of interest paid on the loan each taxable year, Student K may deduct any payments that §1.1275–2(a) treats as payments of interest, including any principal payments that are treated as payments of capitalized interest. See paragraph (f)(3) of this section.

Example 2. Allocation of payments. The facts are the same as in *Example 1*, except that, in addition, the lender charges Student K a loan origination fee, which is not for any property or services provided by the lender. Under §1.1273–2(g), the loan origination fee reduces the issue price of the loan, which reduction increases the amount of original issue discount on the loan by the amount of the fee. The amount of original issue discount (which includes the capitalized interest and loan origination fee) that accrues each year is determined under section 1272 and §1.1272–1. In effect, the loan origination fee accrues over the entire term of the loan. Because the loan has original issue discount, the payment ordering rules in §1.1275–2(a) must be used to determine how much of each payment is interest for federal tax purposes. See paragraph (f)(3) of this section. Under §1.1275–2(a), each payment (regardless of its designation by the parties as either interest or principal) generally is treated first as a payment of original issue discount, to the extent of the original issue discount that has accrued as of the date the payment is due and has not been allocated to prior payments, and second as a payment of principal. Therefore, in determining the total amount of interest paid on the qualified education loan for a taxable year, Student K may deduct any payments that the parties label as principal but that are treated as payments of original issue discount under §1.1275–2(a).

(g) *Additional Rules*—(1) *Payment of interest made during period when interest payment not required.* Payments of interest on a qualified education loan to which this section is applicable are deductible even if the payments are made during a period when interest payments are not required because, for example, the loan has not yet entered repayment status or is in a period of deferment or forbearance.

(2) *Denial of double benefit.* No deduction is allowed under this section for any amount for which a deduction is allowable under another provision of Chapter 1 of the Internal Revenue Code. No deduction is allowed under this section for any amount for which an exclusion is allowable under section 108(f) (relating to cancellation of indebtedness).

(3) *Examples.* The following examples illustrate the rules of this paragraph (g). In the examples, assume that the institution the student attends is an eligible educational institution, the loan is a qualified education loan, and the student is legally obligated to make interest payments under the terms of the loan:

Example 1. Voluntary payment of interest before loan has entered repayment status. Student L obtains a loan to attend college. The terms of the loan provide that interest accrues on the loan while Student L earns his undergraduate degree but that Student L is not required to begin making payments of interest until six full calendar months after he graduates or otherwise leaves school. Nevertheless, Student L voluntarily pays interest on the loan during 2003, while enrolled in college. Assuming all other relevant requirements are met, Student L is allowed a deduction for interest paid while attending college even though the payments were made before interest payments were required.

Example 2. Voluntary payment during period of deferment or forbearance. The facts are the same as in *Example 2,* except that Student L makes no payments on the loan while enrolled in college. Student L graduates in June 2003 and begins making monthly payments of principal and interest on the loan in January 2004, as required by the terms of the loan. In August 2004, Student L enrolls in graduate school on a full-time basis. Under the terms of the loan, Student L may apply for deferment of the loan payments while Student L is enrolled in graduate school. Student L applies for and receives a deferment on the outstanding loan. However, Student L continues to make some monthly payments of interest during graduate school. Student L may deduct interest paid on the loan during the period beginning in January 2004, including interest paid while Student L is enrolled in graduate school.

(h) *Effective date.* This section is applicable to periods governed by section 221 as amended in 2001, which relates to interest paid on a qualified education loan after December 31, 2001, in taxable years ending after December 31, 2001, and on or before December 31, 2010.

[T.D. 9125, 69 FR 25492, May 7, 2004]

§ 1.221–2 Deduction for interest due and paid on qualified education loans before January 1, 2002.

(a) *In general.* Under section 221, an individual taxpayer may deduct from gross income certain interest due and paid by the taxpayer during the taxable year on a qualified education loan. The deduction is allowed only with respect to interest due and paid on a qualified education loan during the first 60 months that interest payments are required under the terms of the loan. See paragraph (e) of this section for rules relating to the 60-month rule. See paragraph (b)(4) of this section for rules on payments of interest by third parties. The rules of this section are applicable to interest due and paid on qualified education loans after January 21, 1999, if paid before January 1, 2002. Taxpayers also may apply the rules of this section to interest due and paid on qualified education loans after December 31, 1997, but before January 21, 1999. To the extent that the effective date limitation (''sunset'') of the 2001 amendment remains in force unchanged, section 221 before amendment in 2001, to which this section relates, also applies to interest due and paid on qualified education loans in taxable years beginning after December 31, 2010. For rules applicable to periods governed by section 221 as amended in 2001, which relates to deductions for interest paid on qualified education loans after December 31, 2001, in taxable years ending after December 31, 2001, and before January 1, 2011, see § 1.221–1.

(b) *Eligibility*—(1) *Taxpayer must have a legal obligation to make interest payments.* A taxpayer is entitled to a deduction under section 221 only if the taxpayer has a legal obligation to make interest payments under the terms of the qualified education loan.

(2) *Claimed dependents not eligible*—(i) *In general.* An individual is not entitled to a deduction under section 221 for a taxable year if the individual is a dependent (as defined in section 152) for whom another taxpayer is allowed a deduction under section 151 on a Federal income tax return for the same taxable year (or, in the case of a fiscal year taxpayer, the taxable year beginning in the same calendar year as the individual's taxable year).

(ii) *Examples.* The following examples illustrate the rules of this paragraph (b)(2):

Example 1. Student not claimed as dependent. Student A pays $750 of interest on qualified education loans during 1998. Student A's parents are not allowed a deduction for her as a dependent for 1998. Assuming fulfillment of all other relevant requirements, Student A may deduct the $750 of interest paid in 1998 under section 221.

Example 2. Student claimed as dependent. Student B pays $750 of interest on qualified education loans during 1998. Only Student B has the legal obligation to make the payments. Student B's parent claims him as a dependent and is allowed a deduction under section 151 with respect to Student B in computing the parent's 1998 Federal income tax. Student B may not deduct the $750 of interest paid in 1998 under section 221. Because Student B's parent was not legally obligated to make the payments, Student B's parent also may not deduct the interest.

(3) *Married taxpayers.* If a taxpayer is married as of the close of a taxable year, he or she is entitled to a deduction under this section only if the taxpayer and the taxpayer's spouse file a joint return for that taxable year.

(4) *Payments of interest by a third party*—(i) *In general.* If a third party who is not legally obligated to make a payment of interest on a qualified education loan makes a payment of interest on behalf of a taxpayer who is legally obligated to make the payment, then the taxpayer is treated as receiving the payment from the third party and, in turn, paying the interest.

(ii) *Examples.* The following examples illustrate the rules of this paragraph (b)(4):

Example 1. Payment by employer. Student C obtains a qualified education loan to attend college. Upon Student C's graduation from college, Student C works as an intern for a non-profit organization during which time Student C's loan is in deferment and Student C makes no interest payments. As part of the internship program, the non-profit organization makes an interest payment on behalf of Student C after the deferment period. This payment is not excluded from Student C's income under section 108(f) and is treated as additional compensation includible in Student C's gross income. Assuming fulfillment of all other requirements of section 221, Student C may deduct this payment of interest for Federal income tax purposes.

Example 2. Payment by parent. Student D obtains a qualified education loan to attend college. Upon graduation from college, Student D makes legally required monthly payments of principal and interest. Student D's mother makes a required monthly payment of interest as a gift to Student D. A deduction for Student D as a dependent is not allowed on another taxpayer's tax return for that taxable year. Assuming fulfillment of all other requirements of section 221, Student D may deduct this payment of interest for Federal income tax purposes.

(c) *Maximum deduction.* In any taxable year beginning before January 1, 2002, the amount allowed as a deduction under section 221 may not exceed the amount determined in accordance with the following table:

Taxable year beginning in	Maximum deduction
1998	$1,000
1999	1,500
2000	2,000
2001	2,500

(d) *Limitation based on modified adjusted gross income*—(1) *In general.* The deduction allowed under section 221 is phased out ratably for taxpayers with modified adjusted gross income between $40,000 and $55,000 ($60,000 and $75,000 for married individuals who file a joint return). Section 221 does not allow a deduction for taxpayers with modified adjusted gross income of $55,000 or above ($75,000 or above for married individuals who file a joint return).

(2) *Modified adjusted gross income defined.* The term *modified adjusted gross income* means the adjusted gross income (as defined in section 62) of the taxpayer for the taxable year increased by any amount excluded from gross income under section 911, 931, or 933 (relating to income earned abroad or from certain United States possessions or Puerto Rico). Modified adjusted gross income must be determined under this section after taking into account the inclusions, exclusions, deductions, and limitations provided by sections 86 (social security and tier 1 railroad retirement benefits), 135 (redemption of qualified United States savings bonds), 137 (adoption assistance programs), 219 (deductible qualified retirement contributions), and 469 (limitation on passive activity losses and credits), but before taking into account the deduction provided by section 221.

(e) *60-month rule*—(1) *In general.* A deduction for interest paid on a qualified education loan is allowed only for payments made during the first 60 months that interest payments are required on the loan. The 60-month period begins on the first day of the month that includes the date on which interest payments are first required and ends 60 months later, unless the 60-month period is suspended for periods of deferment or forbearance within the meaning of paragraph (e)(3) of this section. The 60-month period continues to run regardless of whether the required interest payments are actually made. The date on which the first interest payment is required is determined under the terms of the loan agreement or, in the case of a loan issued or guaranteed under a federal postsecondary education loan program (such as loan programs under title IV of the Higher Education Act of 1965 (20 U.S.C. 1070) and titles VII and VIII of the Public Health Service Act (42 U.S.C. 292., and 42 U.S.C. 296)) under applicable Federal regulations. For a discussion of interest, see paragraph (h) of this section.

For special rules relating to loan refinancings, consolidated loans, and collapsed loans, see paragraph (i) of this section.

(2) *Loans that entered repayment status prior to January 1, 1998.* In the case of any qualified education loan that entered repayment status prior to January 1, 1998, section 221 allows no deduction for interest paid during the portion of the 60-month period described in paragraph (e)(1) of this section that occurred prior to January 1, 1998. Section 221 allows a deduction only for interest due and paid during that portion, if any, of the 60-month period remaining after December 31, 1997.

(3) *Periods of deferment or forbearance.* The 60-month period described in paragraph (e)(1) of this section generally is suspended for any period when interest payments are not required on a qualified education loan because the lender has granted the taxpayer a period of deferment or forbearance (including postponement in anticipation of cancellation). However, in the case of a qualified education loan that is not issued or guaranteed under a Federal postsecondary education loan program, the 60-month period will be suspended under this paragraph (e)(3) only if the promissory note contains conditions substantially similar to the conditions for deferment or forbearance established by the U.S. Department of Education for Federal student loan programs under title IV of the Higher Education Act of 1965, such as half-time study at a postsecondary educational institution, study in an approved graduate fellowship program or in an approved rehabilitation program for the disabled, inability to find full-time employment, economic hardship, or the performance of services in certain occupations or federal programs, and the borrower satisfies one of those conditions. For any qualified education loan, the 60-month period is not suspended if under the terms of the loan interest continues to accrue while the loan is in deferment or forbearance and either—

(i) In the case of deferment, the taxpayer agrees to pay interest currently during the deferment period; or

(ii) In the case of forbearance, the taxpayer agrees to make reduced payments, or payments of interest only, during the forbearance period.

(4) *Late payments.* A deduction is allowed for a payment of interest required in one month but actually made in a subsequent month prior to the expiration of the 60-month period. A deduction is not allowed for a payment of interest required in one month but actually made in a subsequent month after the expiration of the 60-month period. A late payment made during a period of deferment or forbearance is treated, solely for purposes of determining whether it is made during the 60-month period, as made on the date it is due.

(5) *Examples.* The following examples illustrate the rules of this paragraph (e). In the examples, assume that the institution the student attends is an eligible educational institution, the loan is a qualified education loan and is issued or guaranteed under a federal postsecondary education loan program, the student is legally obligated to make interest payments under the terms of the loan, the interest payments occur after December 31, 1997, but before January 1, 2002, and with respect to any period after December 31, 1997, but before January 21, 1999, the taxpayer elects to apply the rules of this section. The examples are as follows:

Example 1. Payment prior to 60-month period. Student E obtains a loan to attend college. The terms of the loan provide that interest accrues on the loan while Student E earns his undergraduate degree but that Student E is not required to begin making payments of interest until six full calendar months after he graduates. Nevertheless, Student E voluntarily pays interest on the loan while attending college. Student E is not allowed a deduction for interest paid during that period, because those payments were made prior to the start of the 60-month period. Similarly, Student E would not be allowed a deduction for any interest paid during the six month grace period after graduation when interest payments are not required.

Example 2. Deferment option not exercised. The facts are the same as in *Example* 1 except that Student E makes no payments on the loan while enrolled in college. Student E graduates in June 1999, and is required to begin making monthly payments of principal and interest on the loan in January 2000. The 60-month period described in paragraph (e)(1) of this section begins in January 2000. In August 2000, Student E enrolls in graduate school on a full-time basis. Under the terms of the loan, Student E may apply for deferment of the loan payments while enrolled in graduate school. However, Student E elects not to apply for deferment and continues to make required monthly payments on the loan during graduate school. Assuming fulfillment of all other relevant requirements, Student E may deduct interest paid on the loan during the 60-month period beginning in January 2000, including interest paid while enrolled in graduate school.

Example 3. Late payment, within 60-month period. The facts are the same as in *Example 2* except that, after the loan enters repayment status in January 2000, Student E makes no interest payments until March 2000. In March 2000, Student E pays interest required for the months of January, February, and March 2000. Assuming fulfillment of all other relevant requirements, Student E may deduct the interest paid in March for the months of January, February, and March because the interest payments are required under the terms of the loan and are paid within the 60-month period, even though the January and February interest payments may be late.

Example 4. Late payment during deferment but within 60-month period. The terms of Student F's loan require her to begin making monthly payments of interest on the loan in January 2000. The 60-month period described in paragraph (e)(1) of this section begins in January 2000. Student F fails to make the required interest payments for the months of November and December 2000. In January 2001, Student F enrolls in graduate school on a half-time basis. Under the terms of the loan, Student F obtains a deferment of the loan payments due while enrolled in graduate school. The deferment becomes effective January 1, 2001. In March 2001, while the loan is in deferment, Student F pays the interest due for the months of November and December 2000. Assuming fulfillment of all other relevant requirements, Student F may deduct interest paid in March 2001, for the months of November and December 2000, because the late interest payments are treated, solely for purposes of determining whether they were made during the 60-month period, as made in November and December 2000.

Example 5. 60-month period. The terms of Student G's loan require him to begin making monthly payments of interest on the loan in November 1999. The 60-month period described in paragraph (e)(1) of this section begins in November 1999. In January 2000, Student G enrolls in graduate school on a half-time basis. As permitted under the terms of the loan, Student G applies for deferment of the loan payments due while enrolled in graduate school. While awaiting formal approval from the lender of his request for deferment, Student G pays interest due for the month of January 2000. In February 2000, the lender approves Student G's request for deferment, effective as of January 1, 2000. Assuming fulfillment of all other relevant requirements, Student G may deduct interest paid in January 2000, prior to his receipt of the lender's approval, even though the deferment was retroactive to January 1, 2000. As of February 2000, there are 57 months remaining in the 60-month period for that loan. Because Student G is not required to make interest payments during the period of deferment, the 60-month period is suspended. After January 2000, Student G may not deduct any voluntary payments of interest made during the period of deferment.

Example 6. 60-month period. The terms of Student H's loan require her to begin making monthly payments of interest on the loan in November 1999. The 60-month period described in paragraph (e)(1) of this section begins in November 1999. In January 2000, Student H enrolls in graduate school on a half-time basis. As permitted under the terms of the loan, Student H applies to make reduced payments of principal and interest while enrolled in graduate school. After the lender approves her application, Student H pays principal and interest due for the month of January 2000 at the reduced rate. Assuming fulfillment of all other relevant requirements, Student H may deduct interest paid in January 2000. As of February 2000, there are 57 months remaining in the 60-month period for that loan.

Example 7. Reduction of 60-month period for months prior to January 1, 1998. The first payment of interest on a loan is due in January 1997. Thereafter, interest payments are required on a monthly basis. The 60-month period described in paragraph (e)(1) of this section for this loan begins on January 1, 1997, the first day of the month that includes the date on which the first interest payment is required. However, the borrower may not deduct interest paid prior to January 1, 1998, under the effective date provisions of section 221. Assuming fulfillment of all other relevant requirements, the borrower may deduct interest due and paid on the loan during the 48 months beginning on January 1, 1998 (unless such period is extended for periods of deferment or forbearance under paragraph (e)(3) of this section).

(f) *Definitions*—(1) *Eligible educational institution.* In general, an *eligible educational institution* means any college, university, vocational school, or other post-secondary educational institution described in section 481 of the Higher Education Act of 1965, 20 U.S.C. 1088, as in effect on August 5, 1997, and certified by the U.S. Department of Education as eligible to participate in student aid programs administered by the Department, as described in section 25A(f)(2) and §1.25A–2(b). For purposes of this section, an eligible educational institution also includes an institution that conducts an internship or residency program leading to a degree or certificate awarded by an institution, a hospital, or a health care facility that offers postgraduate training.

(2) *Qualified higher education expenses*—(i) *In general. Qualified higher education expenses* means the cost of attendance (as defined in section 472 of the Higher Education Act of 1965, 20 U.S.C. 1087ll, as in effect on August 4, 1997), at an eligible educational institution, reduced by the amounts described in paragraph (f)(2)(ii) of this section. Consistent with section 472 of the Higher Education Act of 1965, a student's cost of attendance is determined by the eligible educational institution and includes tuition and fees normally assessed a student carrying the same academic workload as the student, an allowance for room and board, and an allowance for books, supplies, transportation, and miscellaneous expenses of the student.

(ii) *Reductions*. Qualified higher education expenses are reduced by any amount that is paid to or on behalf of a student with respect to such expenses and that is—

(A) A qualified scholarship that is excludable from income under section 117;

(B) An educational assistance allowance for a veteran or member of the armed forces under chapter 30, 31, 32, 34 or 35 of title 38, United States Code, or under chapter 1606 of title 10, United States Code;

(C) Employer-provided educational assistance that is excludable from income under section 127;

(D) Any other amount that is described in section 25A(g)(2)(C) (relating to amounts excludable from gross income as educational assistance);

(E) Any otherwise includible amount excluded from gross income under section 135 (relating to the redemption of United States savings bonds); or

(F) Any otherwise includible amount distributed from a Coverdell education savings account and excluded from gross income under section 530(d)(2).

(3) *Qualified education loan*—(i) *In general*. A *qualified education loan* means indebtedness incurred by a taxpayer solely to pay qualified higher education expenses that are—

(A) Incurred on behalf of a student who is the taxpayer, the taxpayer's spouse, or a dependent (as defined in section 152) of the taxpayer at the time the taxpayer incurs the indebtedness;

(B) Attributable to education provided during an academic period, as described in section 25A and the regulations thereunder, when the student is an eligible student as defined in section 25A(b)(3) (requiring that the student be a degree candidate carrying at least half the normal full-time workload); and

(C) Paid or incurred within a reasonable period of time before or after the taxpayer incurs the indebtedness.

(ii) *Reasonable period*. Except as otherwise provided in this paragraph (f)(3)(ii), what constitutes a reasonable period of time for purposes of paragraph (f)(3)(i)(C) of this section generally is determined based on all the relevant facts and circumstances. However, qualified higher education expenses are treated as paid or incurred within a reasonable period of time before or after the taxpayer incurs the indebtedness if—

(A) The expenses are paid with the proceeds of education loans that are part of a federal postsecondary education loan program; or

(B) The expenses relate to a particular academic period and the loan proceeds used to pay the expenses are disbursed within a period that begins 90 days prior to the start of that academic period and ends 90 days after the end of that academic period.

(iii) *Related party*. A qualified education loan does not include any indebtedness owed to a person who is related to the taxpayer, within the meaning of section 267(b) or 707(b)(1). For example, a parent or grandparent of the taxpayer is a related person. In addition, a qualified education loan does not include a loan made under any qualified employer plan as defined in section 72(p)(4) or under any contract referred to in section 72(p)(5).

(iv) *Federal issuance or guarantee not required*. A loan does not have to be issued or guaranteed under a federal postsecondary education loan program to be a qualified education loan.

(v) *Refinanced and consolidated indebtedness*—(A) In *general.* A qualified education loan includes indebtedness incurred solely to refinance a qualified education loan. A qualified education loan includes a single, consolidated indebtedness incurred solely to refinance two or more qualified education loans of a borrower.

(B) *Treatment of refinanced and consolidated indebtedness.* [Reserved]

(4) *Examples.* The following examples illustrate the rules of this paragraph (f):

Example 1. Eligible educational institution. University J is a postsecondary educational institution described in section 481 of the Higher Education Act of 1965. The U.S. Department of Education has certified that University J is eligible to participate in federal financial aid programs administered by that Department, although University J chooses not to participate. University J is an eligible educational institution.

Example 2. Qualified higher education expenses. Student K receives a $3,000 qualified scholarship for the 1999 fall semester that is excludable from Student K's gross income under section 117. Student K receives no other forms of financial assistance with respect to the 1999 fall semester. Student K's cost of attendance for the 1999 fall semester, as determined by Student K's eligible educational institution for purposes of calculating a student's financial need in accordance with section 472 of the Higher Education Act, is $16,000. For the 1999 fall semester, Student K has qualified higher education expenses of $13,000 (the cost of attendance as determined by the institution ($16,000) reduced by the qualified scholarship proceeds excludable from gross income ($3,000)).

Example 3. Qualified education loan. Student L borrows money from a commercial bank to pay qualified higher education expenses related to his enrollment on a half-time basis in a graduate program at an eligible educational institution. Student L uses all the loan proceeds to pay qualified higher education expenses incurred within a reasonable period of time after incurring the indebtedness. The loan is not federally guaranteed. The commercial bank is not related to Student L within the meaning of section 267(b) or 707(b)(1). Student L's loan is a qualified education loan within the meaning of section 221.

Example 4. Qualified education loan. Student M signs a promissory note for a loan on August 15, 1999, to pay for qualified higher education expenses for the 1999 fall and 2000 spring semesters. On August 20, 1999, the lender disburses loan proceeds to Student M's college. The college credits them to Student M's account to pay qualified higher education expenses for the 1999 fall semester, which begins on August 23, 1999. On January 25, 2000, the lender disburses additional loan proceeds to Student M's college. The college credits them to Student M's account to pay qualified higher education expenses for the 2000 spring semester, which began on January 10, 2000. Student M's qualified higher education expenses for the two semesters are paid within a reasonable period of time, as the first loan disbursement occurred within the 90 days prior to the start of the fall 1999 semester, and the second loan disbursement occurred during the spring 2000 semester.

Example 5. Qualified education loan. The facts are the same as in *Example 4,* except that in 2001 the college is not an eligible educational institution because it loses its eligibility to participate in certain federal financial aid programs administered by the U.S. Department of Education. The qualification of Student M's loan, which was used to pay for qualified higher education expenses for the 1999 fall and 2000 spring semesters, as a qualified education loan is not affected by the college's subsequent loss of eligibility.

Example 6. Mixed-use loans. Student N signs a promissory note for a loan that is secured by Student N's personal residence. Student N will use part of the loan proceeds to pay for certain improvements to Student N's residence and part of the loan proceeds to pay qualified higher education expenses of Student N's spouse. Because Student N obtains the loan not solely to pay qualified higher education expenses, the loan is not a qualified education loan.

(g) *Denial of double benefit.* No deduction is allowed under this section for any amount for which a deduction is allowable under another provision of Chapter 1 of the Internal Revenue Code. No deduction is allowed under this section for any amount for which an exclusion is allowable under section 108(f) (relating to cancellation of indebtedness).

(h) *Interest*—(1) *In general.* Amounts paid on a qualified education loan are deductible under section 221 if the amounts are interest for Federal income tax purposes. For example, interest includes—

(i) Qualified stated interest (as defined in §1.1273–1(c)); and

(ii) Original issue discount, which generally includes capitalized interest. For purposes of section 221, capitalized interest means any accrued and unpaid interest on a qualified education loan that, in accordance with the terms of the loan, is added by the lender to the outstanding principal balance of the loan.

(2) *Operative rules for original issue discount*—(i) *In general.* The rules to determine the amount of original issue discount on a loan and the accruals of the discount are in sections 163(e), 1271 through 1275, and the regulations thereunder. In general, original issue discount is the excess of a loan's stated redemption price at maturity (all payments due under the loan other than qualified stated interest payments) over its issue price (the amount loaned). Although original issue discount generally is deductible as it accrues under section 163(e) and §1.163–7, original issue discount on a qualified education loan is not deductible until paid. See paragraph (h)(3) of this section to determine when original issue discount is paid.

(ii) *Treatment of loan origination fees by the borrower.* If a loan origination fee is paid by the borrower other than for property or services provided by the lender, the fee reduces the issue price of the loan, which creates original issue discount (or additional original issue discount) on the loan in an amount equal to the fee. See §1.1273–2(g). For an example of how a loan origination fee is taken into account, see *Example 2* of paragraph (h)(4) of this section.

(3) *Allocation of payments.* See §§1.446–2(e) and 1.1275–2(a) for rules on allocating payments between interest and principal. In general, these rules treat a payment first as a payment of interest to the extent of the interest that has accrued and remains unpaid as of the date the payment is due, and second as a payment of principal. The characterization of a payment as either interest or principal under these rules applies regardless of how the parties label the payment (either as interest or principal). Accordingly, the taxpayer may deduct the portion of a payment labeled as principal that these rules treat as a payment of interest on the loan, including any portion attributable to capitalized interest or loan origination fees.

(4) *Examples.* The following examples illustrate the rules of this paragraph (h). In the examples, assume that the institution the student attends is an eligible educational institution, the loan is a qualified education loan, the student is legally obligated to make interest payments under the terms of the loan, and any other applicable requirements, if not otherwise specified, are fulfilled. The examples are as follows:

Example 1. Capitalized interest. Interest on Student O's qualified education loan accrues while Student O is in school, but Student O is not required to make any payments on the loan until six months after he graduates or otherwise leaves school. At that time, the lender capitalizes all accrued but unpaid interest and adds it to the outstanding principal amount of the loan. Thereafter, Student O is required to make monthly payments of interest and principal on the loan. The interest payable on the loan, including the capitalized interest, is original issue discount. Therefore, in determining the total amount of interest paid on the qualified education loan during the 60-month period described in paragraph (e)(1) of this section, Student O may deduct any payments that §1.1275–2(a) treats as payments of interest, including any principal payments that are treated as payments of capitalized interest. See paragraph (h)(3) of this section.

Example 2. Allocation of payments. The facts are the same as in *Example 1* of this paragraph (h)(4), except that, in addition, the lender charges Student O a loan origination fee, which is not for any property or services provided by the lender. Under §1.1273–2(g), the loan origination fee reduces the issue price of the loan, which reduction increases the amount of original issue discount on the loan by the amount of the fee. The amount of original issue discount (which includes the capitalized interest and loan origination fee) that accrues each year is determined under section §1272 and §1.1272–1. In effect, the loan origination fee accrues over the entire term of the loan. Because the loan has original issue discount, the payment ordering rules in §1.1275–2(a) must be used to determine how much of each payment is interest for federal tax purposes. See paragraph (h)(3) of this section. Under §1.1275–2(a), each payment (regardless of its designation by the parties as either interest or principal) generally is treated first as a payment of original issue discount, to the extent of the original issue discount that has accrued as of the date the payment is due and has not been allocated to prior payments, and second as a payment of principal. Therefore, in determining the total amount of interest paid on the qualified education loan during the 60-month period described in paragraph (e)(1) of this section, Student O may deduct any payments that the parties label as principal but that are treated as payments of original issue discount under §1.1275–2(a). The 60-month period does not begin in the month in which the lender charges Student O the loan origination fee.

(i) *Special rules regarding 60-month limitation*—(1) *Refinancing.* A qualified education loan and all indebtedness incurred solely to refinance that loan constitute a single loan for purposes of calculating the 60-month period described in paragraph (e)(1) of this section.

(2) *Consolidated loans.* A consolidated loan is a single loan that refinances more than one qualified education loan of a borrower. For consolidated loans, the 60-month period described in paragraph (e)(1) of this section begins on the latest date on which any of the underlying loans entered repayment status and includes any subsequent month in which the consolidated loan is in repayment status.

(3) *Collapsed loans.* A collapsed loan is two or more qualified education loans of a single taxpayer that constitute a single qualified education loan for loan servicing purposes and for which the lender or servicer does not separately account. For a collapsed loan, the 60-month period described in paragraph (e)(1) of this section begins on the latest date on which any of the underlying loans entered repayment status and includes any subsequent month in which any of the underlying loans is in repayment status.

(4) *Examples.* The following examples illustrate the rules of this paragraph (i):

Example 1. Refinancing. Student P obtains a qualified education loan to pay for an undergraduate degree at an eligible educational institution. After graduation, Student P is required to make monthly interest payments on the loan beginning in January 2000. Student P makes the required interest payments for 15 months. In April 2001, Student P borrows money from another lender exclusively to repay the first qualified education loan. The new loan requires interest payments to start immediately. At the time Student P must begin interest payments on the new loan, which is a qualified education loan, there are 45 months remaining of the original 60-month period referred to in paragraph (e)(1) of this section.

Example 2. Collapsed loans. To finance his education, Student Q obtains four separate qualified education loans from Lender R. The loans enter repayment status, and their respective 60-month periods described in paragraph (e)(1) of this section begin, in July, August, September, and December of 1999. After all of Student Q's loans have entered repayment status, Lender R informs Student Q that Lender R will transfer all four loans to Lender S. Following the transfer, Lender S treats the loans as a single loan for loan servicing purposes. Lender S sends Student Q a single statement that shows the total principal and interest, and does not keep separate records with respect to each loan. With respect to the single collapsed loan, the 60-month period described in paragraph (e)(1) of this section begins in December 1999.

(j) *Effective date.* This section is applicable to interest due and paid on qualified education loans after January 21, 1999, if paid before January 1, 2002. Taxpayers also may apply this section to interest due and paid on qualified education loans after December 31, 1997, but before January 21, 1999. This section also applies to interest due and paid on qualified education loans in a taxable year beginning after December 31, 2010.

[T.D. 9125, 69 FR 25492, May 7, 2004]

SPECIAL DEDUCTIONS FOR CORPORATIONS

§1.241–1 Allowance of special deductions.

A corporation, in computing its taxable income, is allowed as deductions the items specified in Part VIII (section 242 and following), Subchapter B, Chapter 1 of the Code, in addition to the deductions provided in part VI (section 161 and following) Subchapter B, Chapter 1 of the Code.

§1.242–1 Deduction for partially tax-exempt interest.

A corporation is allowed a deduction under section 242(a) in an amount equal to certain interest received on obligations of the United States, or an obligation of corporations organized under Acts of Congress which are instrumentalities of the United States. The interest for which a deduction shall be allowed is interest which is included in gross income and which is exempt from normal tax under the act, as amended and supplemented, which authorized the issuance of the obligations. The deduction allowed by section 242(a) is allowed only for the purpose of computing normal tax, and therefore, no deduction is allowed for such interest in the computation of any surtax imposed by Subtitle A of the Internal Revenue Code of 1954.

[T.D. 7100, 36 FR 5333, Mar. 20, 1971]

§ 1.243–1 Deduction for dividends received by corporations.

(a)(1) A corporation is allowed a deduction under section 243 for dividends received from a domestic corporation which is subject to taxation under Chapter 1 of the Internal Revenue Code of 1954.

(2) Except as provided in section 243(c) and in section 246, the deduction is:

(i) For the taxable year, an amount equal to 85 percent of the dividends received from such domestic corporations during the taxable year (other than dividends to which subdivision (ii) or (iii) of this subparagraph applies).

(ii) For a taxable year beginning after September 2, 1958, an amount equal to 100 percent of the dividends received from such domestic corporations if at the time of receipt of such dividends the recipient corporation is a Federal licensee under the Small Business Investment Act of 1958 (15 U.S.C. ch. 14B). However, to claim the deduction provided by section 243(a)(2) the company must file with its return a statement that it was a Federal licensee under the Small Business Investment Act of 1958 at the time of the receipt of the dividends.

(iii) For a taxable year ending after December 31, 1963, an amount equal to 100 percent of the dividends received which are *qualifying dividends*, as defined in section 243(b) and § 1.243–4.

(3) To determine the amount of the distribution to a recipient corporation and the amount of the dividend, see §§ 1.301–1 and 1.316–1.

(b) For limitation on the dividends received deduction, see section 246 and the regulations thereunder.

[T.D. 6992, 34 FR 817, Jan. 18, 1969]

§ 1.243–2 Special rules for certain distributions.

(a) *Dividends paid by mutual savings banks, etc.* In determining the deduction provided in section 243(a), any amount allowed as a deduction under section 591 (relating to deduction for dividends paid by mutual savings banks, cooperative banks, and domestic building and loan associations) shall not be considered as a dividend.

(b) *Dividends received from regulated investment companies.* In determining the deduction provided in section 243(a), dividends received from a regulated investment company shall be subject to the limitations provided in section 854.

(c) *Dividends received from real estate investment trusts.* See section 857(c) and paragraph (d) of § 1.857–6 for special rules which deny a deduction under section 243 in the case of dividends received from a real estate investment trust with respect to a taxable year for which such trust is taxable under Part II, Subchapter M, Chapter 1 of the Code.

(d) *Dividends received on preferred stock of a public utility.* The deduction allowed by section 243(a) shall be determined without regard to any dividends described in section 244 (relating to dividends on the preferred stock of a public utility). That is, such deduction shall be determined without regard to any dividends received on the preferred stock of a public utility which is subject to taxation under Chapter 1 of the Code and with respect to which a deduction is allowed by section 247 (relating to dividends paid on certain preferred stock of public utilities). For a deduction with respect to such dividends received on the preferred stock of a public utility, see section 244. If a deduction for dividends paid is not allowable to the distributing corporation under section 247 with respect to the dividends on its preferred stock, such dividends received from a domestic public utility corporation subject to taxation under Chapter 1 of the Code are includible in determining the deduction allowed by section 243(a).

[T.D. 6598, 27 FR 4092, Apr. 28, 1962, as amended by T.D. 6992, 34 FR 817, Jan. 18, 1969; T.D. 7767, 46 FR 11264, Feb. 6, 1981]

§ 1.243–3 Certain dividends from foreign corporations.

(a) *In general.* (1) In determining the deduction provided in section 243(a), section 243(d) provides that a dividend received from a foreign corporation after December 31, 1959, shall be treated as a dividend from a domestic corporation which is subject to taxation under chapter 1 of the Code, but only to the extent that such dividend is out of earnings and profits accumulated by a domestic corporation during a period with respect to which such domestic corporation was subject to taxation under Chapter 1 of the Code (or corresponding provisions of prior law). Thus, for example, if a domestic corporation accumulates earnings and profits during a period or periods with respect to which it is subject to taxation under Chapter 1 of the Code (or corresponding provisions of prior law) and subsequently such domestic corporation reincorporates in a foreign country, any dividends paid out of such earnings and profits after such reincorporation are eligible for the deduction provided in section 243(a) (1) and (2).

(2) Section 243(d) and this section do not apply to dividends paid out of earnings and profits accumulated (i) by a corporation organized under the China Trade Act, 1922, (ii) by a domestic corporation during any period with respect to which such corporation was exempt from taxation under section 501 (relating to certain charitable, etc. organizations) or 521 (relating to farmers' cooperative associations), or (iii) by a domestic corporation during any period to which section 931 (relating to income from sources within possessions of the United States), as in effect for taxable years beginning before January 1, 1976, applied.

(b) *Establishing separate earnings and profits accounts.* A foreign corporation shall, for purposes of section 243(d), maintain a separate account for earnings and profits to which it succeeds which were accumulated by a domestic corporation, and such foreign corporation shall treat such earnings and profits as having been accumulated during the accounting periods in which earned by such domestic corporation. Such foreign corporation shall also maintain such a separate account for the earnings and profits, or deficit in earnings and profits, accumulated by it or accumulated by any other corporations to the earnings and profits of which it succeeds.

(c) *Effect of dividends on earnings and profits accounts.* Dividends paid out of the accumulated earnings and profits (see section 316(a)(1) of such foreign corporation shall be treated as having been paid out of the most recently accumulated earnings and profits of such corporation. A deficit in an earnings and profits account for any accounting period shall reduce the most recently accumulated earnings and profits for a prior accounting period in such account. If there are no accumulated earnings and profits in an earnings and profits account because of a deficit incurred in a prior accounting period, such deficit must be restored before earnings and profits can be accumulated in a subsequent accounting period. If a dividend is paid out of earnings and profits of a foreign corporation which maintains two or more accounts (established under the provisions of paragraph (b) of this section) with respect to two or more accounting periods ending on the same day, then the portion of such dividend considered as paid out of each account shall be the same proportion of the total dividend as the amount of earnings and profits in that account bears to the sum of the earnings and profits in all such accounts.

(d) *Illustration.* The application of the principles of this section in the determination of the amount of the dividends received deduction may be illustrated by the following example:

Example. On December 31, 1960, corporation X, a calendar-year corporation organized in the United States on January 1, 1958, consolidated with corporation Y, a foreign corporation organized on January 1, 1958, which used an annual accounting period based on the calendar year, to form corporation Z, a foreign corporation not engaged in trade or business within the United States. Corporation Z is a wholly-owned subsidiary of corporation M, a domestic corporation. On January 1, 1961, corporation Z's accumulated earnings and profits of $31,000 are, under the provisions of paragraph (b) of this section, maintained in separate earnings and profits accounts containing the following amounts:

Earnings and profits accumulated for—	Domestic corp. X	Foreign corp. Y
1958	($1,000)	$11,000
1959	10,000	9,000
1960	5,000	(3,000)

Corporation Z had earnings and profits of $10,000 in each of the years 1961, 1962, and 1963 and makes distributions with respect to its stock to corporation M for such years in the following amounts:

1961	$14,000
1962	23,000
1963	16,000

(1) For 1961, a deduction of $3,400 is allowable to M with respect to the $14,000 distribution from Z, computed as follows:

(i) Dividend from current year earnings and profits (1961)	$10,000
(ii) Dividend from earnings and profits of corporation X accumulated for 1960	4,000
(iii) Deduction: 85 percent of $4,000 (the amount distributed from the accumulated earnings and profits of corporation X)	3,400

(2) For 1962, a deduction of $6,970 is allowable to corporation M with respect to the $23,000 distribution from corporation Z, computed as follows:

(i) Dividend from current year earnings and profits (1962)		$10,000
(ii) Dividend from earnings and profits of corporation X accumulated for:		
1960	$1,000	
1959: $9,000 (i.e., $10,000 − $1,000) divided by $15,000 (i.e., $9,000 + $9,000 − $3,000) multiplied by $12,000 (i.e., $23,000 − $11,000)	7,200	
Total	8,200	
(iii) Dividend from earnings and profits of corporation Y accumulated for:		
1959: $6,000/$15,000 × $12,000		4,800
(iv) Deduction: 85 percent of $8,200 (the amount distributed from the accumulated earnings and profits of corporation X)		6,970

(3) For 1963, a deduction of $1,530 is allowable to M with respect to the $16,000 distribution from Z, computed as follows:

(i) Dividend from current year earnings and profits (1963)	$10,000
(ii) Dividend from earnings and profits of corporation X accumulated for 1959:	
Earnings and profits remaining after 1962 distribution (i.e., $9,000 − $7,200)	1,800
(iii) Dividend from earnings and profits of corporation Y accumulated for 1959:	
Earnings and profits remaining after 1962 distribution (i.e., $6,000 − $4,800)	1,200
1958	8,000
(iv) Deduction: 85 percent of $1,800 (the amount distributed from the accumulated earnings and profits of corporation X)	1,530

[T.D. 6830, 30 FR 8045, June 23, 1965, as amended by T.D. 9194, 70 FR 18928, Apr. 11, 2005]

§ 1.243–4 Qualifying dividends.

(a) *Definition of qualifying dividends*—(1) *General*. For purposes of section 243(a)(3), the term *qualifying dividends* means dividends received by a corporation if:

(i) At the close of the day the dividends are received, such corporation is a member of the same affiliated group of corporations (as defined in paragraph (b) of this section) as the corporation distributing the dividends,

(ii) An election by such affiilated group under section 243(b)(2) and paragraph (c) of this section is effective for the taxable years of its members which include such day, and

(iii) The dividends are distributed out of earnings and profits specified in subparagraph (2) of this paragraph.

(2) *Earnings and profits*. The earnings and profits specified in this subparagraph are earnings and profits of a taxable year of the distributing corporation (or a predecessor corporation) which satisfies each of the following conditions:

(i) Such year must end after December 31, 1963;

(ii) On each day of such year the distributing corporation (or the predecessor corporation) and the corporation receiving the dividends must have been members of the affiliated group of which the distributing corporation and the corporation receiving the dividends are members on the day the dividends are received; and

(iii) An election under section 1562 (relating to the election of multiple surtax exmptions) was never effective (or is no longer effective pursuant to section 1562(c)) for such year.

(3) *Special rule for insurance companies*. Notwithstanding the provisions of subparagraph (2) of this paragraph, if an insurance company subject to taxation under section 802 or 821 distributes a dividend out of earnings and profits of a taxable year with respect to which the company would have been a component member of a controlled group of corporations within the meaning of section 1563 were it not for the application of section 1563(b)(2)(D), such dividend shall not be treated as a qualifying dividend unless an election under section 243(b)(2) is effective for such taxable year.

(4) *Predecessor corporations.* For purposes of this paragraph, a corporation shall be considered to be a predecessor corporation with respect to a distributing corporation if the distributing corporation succeeds to the earnings and profits of such corporation, for example, as the result of a transaction to which section 381(a) applies. A distributing corporation shall, for purposes of this section, maintain, in respect of each predecessor corporation, a separate account for earnings and profits to which it succeeds, and such earnings and profits shall be considered to be earnings and profits of the predecessor's taxable year in which the earnings and profits were accumulated.

(5) *Mere change in form.* (i) For purposes of subparagraph (2)(ii) of this paragraph, the affiliated group in existence during the taxable year out of the earnings and profits of which the dividend is distributed shall not be considered as a different group from that in existence on the day on which the dividend is received merely because:

(*a*) The common parent corporation has undergone a mere change in identity, form, or place of organization (within the meaning of section 368(a)(1)(F)), or

(*b*) A newly organized corporation (the ''acquiring corporation'') has acquired substantially all of the outstanding stock of the common parent corporation (the ''acquired corporation'') solely in exchange for stock of such acquiring corporation, and the stockholders (immediately before the acquisition) of the acquired corporation, as a result of owning stock of the acquired corporation, own (immediately after the acquisition) all of the outstanding stock of the acquiring corporation.

If a transaction described in the preceding sentence has occurred, the acquiring corporation shall be treated as having been a member of the affiliated group for the entire period during which the acquired corporation was a member of such group.

(ii) For purposes of subdivision (i) (b) of this subparagraph, if immediately before the acquisition:

(*a*) The stockholders of the acquired corporation also owned all of the outstanding stock of another corporation (the ''second corporation''), and

(*b*) Stock of the acquired corporation and of the second corporation could be acquired or transferred only as a unit (hereinafter referred to as the ''limitation on transferability''), then the second corporation shall be treated as an acquired corporation and such second corporation shall be treated as having been a member of the affiliated group for the entire period (while such group was in existence) during which the limitation on transferability was in existence, and if the second corporation is itself the common parent corporation of an affiliated group (the ''second group'') any other member of the second group shall be treated as having been a member of the affiliated group for the entire period during which it was a member of the second group while the limitation on transferability existed. For purposes of (*a*) of this subdivision and subdivision (i)(*b*) of this subparagraph, if the limitation on transferability of stock of the acquired corporation and the second corporation is achieved by using a voting trust, then the stock owned by the trust shall be considered as owned by the holders of the beneficial interests in the trust.

(6) *Source of distributions.* In determining from what year's earnings and profits a dividend is treated as having been distributed for purposes of this section, the principles of paragraph (a) of § 1.316–2 shall apply. A dividend shall be considered to be distributed, first, out of the earnings and profits of the taxable year which includes the date the dividend is distributed, second, out of the earnings and profits accumulated for the immediately preceding taxable year, third, out of the earnings and profits accumulated for the second preceding taxable year, etc. A deficit in an earnings and profits account for any taxable year shall reduce the most recently accumulated earnings and profits for a prior year in such account. If there are no accumulated earnings and profits in an earnings and profits account because of a deficit incurred in a prior year, such deficit must be restored before earnings and profits can be accumulated in a subsequent year. If

a dividend is distributed out of separate earnings and profits accounts (established under the provisions of subparagraph (4) of this paragraph) for two or more taxable years ending on the same day, then the portion of such dividend considered as distributed out of each account shall be the same proportion of the total dividend as the amount of earnings and profits in that account bears to the sum of the earnings and profits in all such accounts.

(7) *Examples.* The provisions of this paragraph may be illustrated by the following examples:

Example 1. On March 1, 1965, corporation P, a publicly owned corporation, acquires all of the stock of corporation S and continues to hold the stock throughout the remainder of 1965 and all of 1966. P and S are domestic corporations which file separate returns on the basis of a calendar year. The affiliated group consisting of P and S makes an election under section 243(b)(2) which is effective for the 1966 taxable years of P and S. A multiple surtax exemption election under section 1562 is not effective for their 1965 taxable years. On February 1, 1966, S distributes $50,000 with respect to its stock which is received by P on the same date. S had earnings and profits of $40,000 for 1966 (computed without regard to distributions during 1966). S also had earnings and profits accumulated for 1965 of $70,000. Since $40,000 was distributed out of earnings and profits for 1966 and since each of the conditions prescribed in subparagraphs (1) and (2) of this paragraph is satisfied, P is entitled to a 100-percent dividends received deduction with respect to $40,000 of the $50,000 distribution. However, since $10,000 was distributed out of earnings and profits accumulated for 1965, and since on each day of 1965 S and P were not members of the affiliated group of which S and P were members on February 1, 1966, $10,000 of the $50,000 distribution does not satisfy the condition specified in subparagraph (2)(ii) of this paragraph and thus does not qualify for the 100-percent dividends received deduction.

Example 2. Assume the same facts as in *Example 1,* except that corporation P acquires all the stock of corporation S on January 1, 1965, and sells such stock on November 1, 1966. Since $10,000 is distributed out of earnings and profits for 1965, and since each of the conditions prescribed in subparagraphs (1) and (2) of this paragraph is satisfied, P is entitled to a 100-percent dividends received deduction with respect to $10,000 of the $50,000 distribution. However, since $40,000 of the $50,000 distribution was made out of earnings and profits of S for its 1966 taxable year, and on each day of such year S and P were not members of the affiliated group of which S and P were members on February 1, 1966, $40,000 of the distribution does not satisfy the condition specified in subparagraph (2)(ii) of this paragraph and thus does not qualify for the 100-percent dividends received deduction.

Example 3. Assume the same facts as in *Example 1,* except that corporation P acquires all the stock of corporation S on January 1, 1965, and that a multiple surtax exemption election under section 1562 is effective for P's and S's 1965 taxable years. Further assume that the section 1562 election is terminated effective with respect to their 1966 taxable years, and that an election under section 243(b) (2) is effective for such taxable years. Since $10,000 of the February 1, 1966, distribution was made out of earnings and profits of S for its 1965 taxable year and since a multiple surtax exemption election is effective for such year, $10,000 of the distribution does not satisfy the condition specified in subparagraph (2) (iii) of this paragraph and thus does not qualify for the 100-percent dividends received deduction. However, the portion of the distribution which was distributed out of earnings and profits of S's 1966 year ($40,000) qualifies for the 100-percent dividends received deduction.

Example 4. Assume the same facts as in *Example 1,* except that corporation P acquires all the stock of corporation S on January 1, 1965, and that S is a life insurance company subject to taxation under section 802. Accordingly, S would have been a member of a controlled group of corporations except for the application of section 1563(b)(2)(D). Since $10,000 of the distribution was made out of earnings and profits of S for its 1965 taxable year, and since with respect to such year an election under section 243(b)(2) was not effective, $10,000 of the distribution is not a qualifying dividend by reason of subparagraph (3) of this paragraph. On the other hand, the portion of the distribution which was distributed out of earnings and profits for S's 1966 year ($40,000) does qualify for the 100-percent dividends received deduction because the distribution was out of earnings and profits of a year for which an election under section 243(b) (2) is effective, and because the other conditions specified in subparagraphs (1) and (2) of this paragraph are satisfied. However, if P were also a life insurance company subject to taxation under section 802, then subparagraph (3) of this paragraph would not result in the disqualification of the portion of the distribution made out of S's 1965 earnings and profits because S would be a component member of an insurance group of corporations (as defined in section 1563(a)(4)), consisting of P and S, with respect to its 1965 year.

Example 5. Corporation X owns all the stock of corporation Y from January 1, 1965, through December 31, 1969. X and Y are domestic corporations which file separate returns on the basis of a calendar year. On June 30, 1965, Y acquired all the stock of domestic corporation Z, a calendar year taxpayer, and on December 31, 1967, Y acquired the assets of Z in a transaction to which section 381(a) applied. A multiple surtax exemption election under section 1562, was not effective for any taxable year of X, Y, or Z, and an election under section 243(b)(2) is effective for the 1968 and 1969 taxable years of X and Y. On January 1, 1968, Y's accumulated earnings and profits are, under the provisions of subparagraph (4) of this paragraph, maintained in separate earnings and profits accounts containing the following amounts:

Earnings and profits accumulated for	Corp Y	Corp Z
1964	$60,000	$40,000
1965	30,000	15,000
1966	(5,000)	2,000
1967	12,000	6,000

Corporation Y had earnings and profits of $10,000 in each of the years 1968 and 1969, and made distributions during such years in the following amounts:

1968	$29,000
1969	31,000

(i) The source of the 1968 distribution, determined in accordance with the rules of subparagraph (6) of this paragraph, is as follows:

(*a*) Dividend from Y's current year's earnings and profits (1968)	$10,000
(*b*) Dividend from earnings and profits of Y accumulated for 1967	12,000
(*c*) Dividend from earnings and profits of Z accumulated for:.	
1967	6,000
1966	1,000
	29,000

Since the 1968 dividend is considered paid out of earnings and profits of Y's 1968 and 1967 years, and Z's 1967 and 1966 years, and since each of these years satisfies each of the conditions specified in subparagraph (2) of this paragraph, X is entitled to a 100-percent dividends received deduction with respect to the entire 1968 distribution of $29,000 from Y.

(ii) The source of the 1969 distribution of $31,000, determined in accordance with the rules of subparagraph (6) of this paragraph, is as follows:

(*a*) Dividend from Y's current year's earnings and profits (1969)	$10,000
(*b*) Dividend from earnings and profits of Z accumulated for 1966 (1966 earnings and profits remaining after 1968 distribution, i.e., $2,000 − $1,000	1,000
(*c*) Dividend from earnings and profits of Y and Z accumulated for 1965:	
Corporation Y: $25,000 (i.e., $30,000 − $5,000 deficit) divided by $40,000 (i.e., the sum of the 1965 earnings and profits of Y and Z) multiplied by $20,000 (the portion of the distribution from the 1965 earnings and profits of Y and Z)	12,500
Corporation Z: $15,000 divided by $40,000 multiplied by $20,000	7,500
	31,000

The sum of the dividends from Y's 1969 year ($10,000), Z's 1966 year ($1,000), and Y's 1965 year ($12,500), or $23,500, qualifies for the 100-percent dividends received deduction. However, the dividends paid out of Z's 1965 year ($7,500) do not qualify because on each day of 1965 Z and X were not members of the affiliated group of which Y (the distributing corporation) and X (the corporation receiving the dividends) were members on the day in 1969 when the dividends were received by X.

(b) *Definition of affiliated group.* For purposes of this section and § 1.243–5, the term *affiliated group* shall have the meaning assigned to it by section 1504(a), except that insurance companies subject to taxation under section 802 or 821 shall be treated as includible corporations (notwithstanding section 1504(b)(2)), and the provisions of section 1504(c) shall not apply.

(c) *Election*—(1) *Manner and time of making election*—(i) *General.* The election provided by section 243(b)(2) shall be made for an affiliated group by the common parent corporation and shall be made for a particular taxable year of the common parent corporation. Such election may not be made for any taxable year of the common parent corporation for which a multiple surtax exemption election under section 1562 is effective. The election shall be made by means of a statement, signed by any person who is duly authorized to act on behalf of the common parent corporation, stating that the affiliated group elects under section 243(b)(2) for such taxable year. The statement shall be filed with the district director for the internal revenue district in which is located the principal place of business or principal office or agency of the common parent. The statement shall set forth the name, address, taxpayer account number, and taxable year of each corporation (including wholly-owned subsidiaries) that is a member of the affiliated group at the time the election is filed. The statement may be filed at any time, provided that, with respect to each corporation the tax liability of which for its matching taxable year of election (or for any subsequent taxable year) would be increased because of the election, at the time of filing there is at least 1 year remaining in the statutory period (including any extensions thereof) for the assessment of a deficiency against such corporation for such year. (If there is less than 1 year remaining with respect to any taxable year, the district director for the internal revenue district in which is located the principal place of business or principal office or agency of the corporation will ordinarily, upon request, enter into an agreement to extend such statutory period for assessment and collection of deficiencies.

(ii) *Information statement by common parent*. If a corporation becomes a member of the affiliated group after the date on which the election is filed and during its matching taxable year of election, then the common parent shall file, within 60 days after such corporation becomes a member of the affiliated group, an additional statement containing the name, address, taxpayer account number, and taxable year of such corporation. Such additional statement shall be filed with the internal revenue officer with whom the election was filed.

(iii) *Definition of matching taxable year of election*. For purposes of this paragraph and paragraphs (d) and (e) of this section, the term *matching taxable year of election* shall mean the taxable year of each member (including the common parent corporation) of the electing affiliated group which includes the last day of the taxable year of the common parent corporation for which an election by the affiiliated group is made under section 243(b)(2).

(2) *Consents by subsidiary corporations*—(i) *General*. Each corporation (other than the common parent corporation) which is a member of the electing affiliated group (including any member which joins in the filing of a consolidated return) at any time during its matching taxable year of election must consent to such election in the manner and time provided in subdivision (ii) or (iii) of this subparagraph, whichever is applicable.

(ii) *Wholly owned subsidiary*. If all of the stock of a corporation is owned by a member or members of the affiliated group on each day of such corporation's matching taxable year of election, then such corporation (referred to in this paragraph as a ''wholly owned subsidiary'') shall be deemed to consent to such election.

(iii) *Other members*. The consent of each member of the affiliated group (other than a wholly owned subsidiary) shall be made by means of a statement, signed by any person who is duly authorized to act on behalf of the consenting member, stating that such member consents to the election under section 243(b)(2). The statement shall set forth the name, address, taxpayer account number, and taxable year of the consenting member and of the common parent corporation, and in the case of a statement filed after December 31, 1968, the identity of the internal revenue district in which is located the principal place of business or principal office or agency of the common parent corporation. The consent of more than one such member may be incorporated in a single statement. The statement (or statements) shall be attached to the election filed by the common parent corporation. The consent of a corporation that, after the date the election was filed and during its matching taxable year of election, either (*a*) becomes a member, or (*b*) ceases to be a wholly owned subsidiary but continues to be a member, shall be filed with the internal revenue officer with whom the election was filed and shall be filed on or before the date prescribed by law (including extensions of time) for the filing of the consenting member's income tax return for such taxable year, or on or before June 10, 1964, whichever is later.

(iv) *Statement attached to return*. Each corporation that consents to an election by means of a statement described in subdivision (iii) of this subparagraph should attach a copy of the statement to its income tax return for its matching taxable year of election, or, if such return has already been filed, to its first income tax return filed on or after the date on which the statement is filed. However, if such return is filed on or before June 10, 1964, a copy of such statement should be filed on or before June 10, 1964, with the district director with whom such return is filed. Each wholly owned subsidiary should attach a statement to its income tax return for its matching taxable year of election, or, if such return has already been filed, to its first income tax return filed on or after the date on which the statement is filed stating that it is subject to an election under section 243(b)(2) and the taxable year to which the election applies, and setting forth the name, address, taxpayer account number, and taxable year of the common parent corporation, and in the case of a statement filed after December 31, 1968, the identity of the internal revenue district in which is located the principal place of business or principal office or agency of the common parent corporation. However, if the due date for such return (including extensions of time) is before June 10, 1964, such statement should be filed on or before June 10, 1964, with the district director with whom such return is filed.

(3) *Information statement by member.* If a corporation becomes a member of the affiliated group during a taxable year that begins after the last day of the common parent corporation's matching taxable year of election, then (unless such election has been terminated) such corporation should attach a statement to its income tax return for such taxable year stating that it is subject to an election under section 243(b)(2) for such taxable year and setting forth the name, address, taxpayer account number, and taxable year of the common parent corporation, and the identity of the internal revenue district in which is located the principal place of business or principal office or agency of the common parent corporation. In the case of an affiliated group that made an election under the rules provided in Treasury Decision 6721, approved April 8, 1964 (29 FR 4997, C.B. 1964–1 (Part 1), 625), such statement shall be filed, on or before March 15, 1969, with the district director for the internal revenue district in which is located such member's principal place of business or principal office or agency.

(4) *Years for which election effective*—(i) *General rule.* An election under section 243(b)(2) by an affiliated group shall be effective:

(*a*) In the case of each corporation which is a member of such group at any time during its matching taxable year of election, for such taxable year, and

(*b*) In the case of each corporation which is a member of such group at any time during a taxable year ending after the last day of the common parent's taxable year of election but which does not include such last day, for such taxable year, unless the election is terminated under section 243(b)(4) and paragraph (e) of this section. Thus, the election has a continuing effect and need not be renewed annually.

(ii) *Special rule for certain taxable years ending in 1964.* In the case of a taxable year of a member (other than the common parent corporation) of the affiliated group (*a*) which begins in 1963 and ends in 1964, and (*b*) for which an election is not effective under subdivision (i)(*a*) of this subparagraph, if an election under section 243(b)(2) is effective for the taxable year of the common parent corporation which includes the last day of such taxable year of such member, then such election shall be effective for such taxable year of such member if such member files a separate consent with respect to such taxable year. However, in order for a dividend distributed by such member during such taxable year to meet the requirements of section 243(b)(1), an election under section 243(b)(2) must be effective for the taxable year of each member of the affiliated group which includes the date such dividend is received. See section 243(b)(1)(A) and paragraph (a)(1) of this section. Accordingly, if the dividend is to qualify for the 100-percent dividends received deduction under section 243(a)(3), a consent must be filed under this subdivision by each member of the affiliated group with respect to its taxable year which includes the day the dividend is received (unless an election is effective for such taxable year under subdivision (i)(*a*) of this subparagraph). For purposes of this subdivision, a consent shall be made by means of a statement meeting the requirements of subparagraph (2)(iii) of this paragraph, and shall be attached to the election made by the common parent corporation for its taxable year which includes the last day of the taxable year of the member with respect to which the consent is made. A copy of the statement should be filed, within 60 days after such election is filed by the common parent corporation, with the district director with whom the consenting member filed its income tax return for such taxable year.

(iii) *Examples.* The provisions of subdivision (ii) of this subparagraph, relating to the special rule for certain taxable years ending in 1964, may be illustrated by the following examples:

Example 1. P Corporation owns all the stock of S–1 Corporation on each day of 1963, 1964, and 1965. P uses the calendar year as its taxable year and S–1 uses a fiscal year ending June 30 as its taxable year. P makes an election under section 243(b)(2) for 1964. Since S–1 is a wholly owned subsidiary for its taxable year ending June 30, 1965, it is deemed to consent to the election. However, in order for the election to be effective with respect to S–1's taxable year ending June 30, 1964, a statement specifying that S–1 consents to the election with respect to such taxable year and containing the information required in a statement of consent under subparagraph (2)(iii) of this paragraph must be attached to the election.

Example 2. Assume the same facts as in *Example 1,* except that P also owns all the stock of S–2 Corporation on each day of 1963, 1964, and 1965. S–2 uses a fiscal year ending May 31 as its taxable year. If S–1 distributes a dividend to P on January 15, 1964, the dividend may qualify under section 243(a)(3) only if S–1 and S–2 both consent to the election made by P for 1964 with respect to their taxable years ending in 1964.

Example 3. Assume the same facts as in *Example 1,* except that P uses a fiscal year ending on January 31 as its taxable year and makes an election under subparagraph (1) of this paragraph for its taxable year ending January 31, 1964. Since S–1's taxable year beginning in 1963 and ending in 1964 includes January 31, 1964, the last day of P's taxable year for which the election was made, the election is effective under subdivision (i)(*a*) of this subparagraph, for S–1's taxable year ending June 30, 1964. Accordingly, the special rule of subdivision (ii) of this subparagraph has no application.

(d) *Effect of election.* For restrictions and limitations applicable to corporations which are members of an electing affiliated group on each day of their taxable years, see §1.243–5.

(e) *Termination of election*—(1) *In general.* An election under section 243(b)(2) by an affiliated group may be terminated with respect to any taxable year of the common parent corporation after the matching taxable year of election of the common parent corporation. The election is terminated as a result of one of the occurrences described in subparagraph (2) or (3) of this paragraph. For years affected by termination, see subparagraph (4) of this paragraph.

(2) *Consent of members*—(i) *General.* An election may be terminated for an affiliated group by its common parent corporation with respect to a taxable year of the common parent corporation provided each corporation (other than the common parent) that was a member of the affiliated group at any time during its taxable year that includes the last day of such year of the common parent (the ''matching taxable year of termination'') consents to such termination. The statement of termination may be filed by the common parent corporation at any time, provided that, with respect to each corporation the tax liability of which for its matching taxable year of termination (or for any subsequent taxable year) would be increased because of the termination, at the time of filing there is at least 1 year remaining in the statutory period (including any extensions thereof) for the assessment of a deficiency against such corporation for such year. (If there is less than 1 year remaining with respect to any taxable year, the district director for the internal revenue district in which is located the principal place of business or principal office or agency of the corporation will ordinarily, upon request, enter into agreement to extend such statutory period for assessment and collection of deficiencies.)

(ii) *Statements filed after December 31, 1968.* With respect to statements of termination filed after December 31, 1968:

(*a*) The statement shall be filed with the district director for the internal revenue district in which is located the principal place of business or principal office or agency of the common parent corporation;

(*b*) The statement shall be signed by any person who is duly authorized to act on behalf of the common parent corporation and shall state that the affiliated group terminates the election under section 243(b)(2) for such taxable year;

(*c*) The statement shall set forth the name, address, taxpayer account number, and taxable year of each corporation (including wholly owned subsidiaries) which is a member of the affiliated group at the time the termination is filed; and

(*d*) The consents to the termination shall be given in accordance with the rules prescribed in paragraph (c)(2) of this section, relating to manner and time for giving consents to an election under section 243(b)(2).

(3) *Refusal by new member to consent*—(i) *Manner of giving refusal.* If any corporation which is a new member of an affiliated group with respect to a taxable year of the common parent corporation (other than the matching taxable year of election of the common parent corporation) files a statement that it does not consent to an election under section 243(b)(2) with respect to such taxable year, then such election shall terminate with respect to such taxable year. Such statement shall be signed by any person who is duly authorized to act on behalf of the new member, and shall be filed with the timely filed income tax return of such new member for its taxable year within which falls the last day of such taxable year of the common parent corporation. In the event of a termination under this subparagraph, each corporation (other than such new member) that is a member of the affiliated group at any time during its taxable year which includes such last day should, within 30 days after such new member files the statement of refusal to consent, notify the district director of such termination. Such notification should be filed with the district director for the internal revenue district in which is located the principal place of business or principal office or agency of the corporation.

(ii) *Corporation considered as new member.* For purposes of subdivision (i) of this subparagraph, a corporation shall be considered to be a new member of an affiliated group of corporations with respect to a taxable year of the common parent corporation if such corporation:

(*a*) Is a member of the affiliated group at any time during such taxable year of the common parent corporation, and

(*b*) Was not a member of the affiliated group at any time during the common parent corporation's immediately preceding taxable year.

(4) *Effect of termination.* A termination under subparagraph (2) or (3) of this paragraph is effective with respect to (i) the common parent corporation's taxable year referred to in the particular subparagraph under which the termination occurs, and (ii) the taxable years of the other members of the affiliated group which include the last day of such taxable year of the common parent. An election, once terminated, is no longer effective. Accordingly, the termination is also effective with respect to the succeeding taxable years of the members of the group. However, the affiliated group may make a new election in accordance with the provisions of section 243(b)(2) and paragraph (c) of this section.

[T.D. 6992, 34 FR 817, Jan. 18, 1969]

§ 1.243–5 Effect of election.

(a) *General*—(1) *Corporations subject to restrictions and limitations.* If an election by an affiliated group under section 243(b)(2) is effective with respect to a taxable year of the common parent corporation, then each corporation (including the common parent corporation) which is a member of such group on each day of its matching taxable year shall be subject to the restrictions and limitations prescribed by paragraphs (b), (c), and (d) of this section for such taxable year. For purposes of this section, the term *matching taxable year* shall mean the taxable year of each member (including the common parent corporation) of an affiliated group which includes the last day of a particular taxable year of the common parent corporation for which an election by the affiliated group under section 243(b)(2) is effective. If a corporation is a member of an affiliated group on each day of a short taxable year which does not include the last day of a taxable year of the common parent corporation, and if an election under section 243(b)(2) is effective for such short year, see paragraph (g) of this section. In the case of taxable years beginning in 1963 and ending in 1964 for which an election under section 243(b)(2) is effective under paragraph (c)(4)(ii) of §1.243–4, see paragraph (f)(9) of this section.

(2) *Members filing consolidated returns.* The restrictions and limitations prescribed by this section shall apply notwithstanding the fact that some of the corporations which are members of the electing affiliated group (within the meaning of section 243(b)(5)) join in the filing of a consolidated return. Thus, for example, if an electing affiliated group includes one or more corporations taxable under section 11 of the Code and two or more insurance companies taxable under section 802 of the Code, and if the insurance companies join in the filing of a consolidated return, the amount of such companies' exemptions from estimated tax (for purposes of sections 6016 and 6655) shall be the amounts determined under paragraph (d)(5) of this section and not the amounts determined pursuant to the regulations under section 1502.

(b) *Multiple surtax exemption election*—(1) *General rule.* If an election by an affiliated group under section 243(b)(2) is effective with respect to a taxable year of the common parent corporation, then no corporation which is a member of such affiliated group on each day of its matching taxable year may consent (or shall be deemed to consent) to an election under section 1562(a)(1), relating to election of multiple surtax exemptions, which would be effective for such matching taxable year. Thus, each corporation which is a component member of the controlled group of corporations with respect to its matching taxable year (determined by applying section 1563(b) without regard to paragraph (2)(D) thereof) shall determine its surtax exemption for such taxable year in accordance with section 1561 and the regulations thereunder.

(2) *Special rule for certain insurance companies.* Under section 243(b)(6)(A), if the provisions of subparagraph (1) of this paragraph apply with respect to the taxable year of an insurance company subject to taxation under section 802 or 821, then the surtax exemption of such insurance company for such taxable year shall be determined by applying part II (section 1561 and following), subchapter B, chapter 6 of the Code, with respect to such insurance company and the other corporations which are component members of the controlled group of corporations (as determined under section 1563 without regard to subsections (a)(4) and (b)(2)(D) thereof) of which such insurance company is a member, without regard to section 1563(a)(4) (relating to certain insurance companies treated as a separate controlled group) and section 1563(b)(2)(D) (relating to certain insurance companies treated as excluded members).

(3) *Example.* The provisions of this paragraph may be illustrated by the following example:

Example. Throughout 1965 corporation M owns all the stock of corporations L–1, L–2, S–1, and S–2. M is a domestic mutual insurance company subject to tax under section 821 of the Code, L–1 and L–2 are domestic life insurance companies subject to tax under section 802 of the Code, and S–1 and S–2 are domestic corporations subject to tax under section 11 of the Code. Each corporation uses the calendar year as its taxable year. M makes a valid election under section 243(b)(2) for the affiliated group consisting of M, L–1, L–2, S–1, and S–2. If part II, subchapter B, chapter 6 of the Code were applied with respect to the 1965 taxable years of the corporations without regard to section 243(b)(6)(A), the following would result: S–1 and S–2 would be treated as component members of a controlled group of corporations on such date; L–1 and L–2 would be treated as component members of a separate controlled group on such date; and M would be treated as an excluded member. However, since section 243(b)(6)(A) requires that part II of subchapter B be applied without regard to section 1563(a)(4) and (b)(2)(D), for purposes of determining the surtax exemptions of M, L–1, L–2, S–1, and S–2 for their 1965 taxable years, such corporations are treated for purposes of such part II as component members of a single controlled group of corporations on December 31, 1965. Moreover, by reason of having made the election under section 243(b)(2), M, L-1, L–2, S–1, and S–2 cannot consent to multiple surtax exemption elections under section 1562 which would be effective for their 1965 taxable years. Thus, such corporations are limited to a single $25,000 surtax exemption for such taxable years (to be apportioned among such corporations in accordance with section 1561 and the regulations thereunder).

(c) *Foreign tax credit*—(1) *General.* If an election by an affiliated group under section 243(b)(2) is effective with respect to a taxable year of the common parent corporation, then:

(i) The credit under section 901 for taxes paid or accrued to any foreign country or possession of the United States shall be allowed to a corporation which is a member of such affiliated group for each day of its matching taxable year only if each other corporation which pays or accrues such foreign taxes to any foreign country or possession, and which is a member of such group on each day of its matching taxable year, does not deduct such taxes in computing its tax liability for its matching taxable year, and

(ii) A corporation which is a member of such affiliated group on each day of its matching taxable year may use the overall limitation provided in section 904(a)(2) for such matching taxable year only if each other corporation which pays or accrues foreign taxes to any foreign country or possession, and which is a member of such group on each day of its matching taxable year, uses such limitation for its matching taxable year.

(2) *Consent of the Commissioner.* In the absence of unusual circumstances, a request by a corporation for the consent of the Commissioner to the revocation of an election of the overall limitation, or to a new election of the overall limitation, for the purpose of satisfying the requirements of subparagraph (1)(ii) of this paragraph will be given favorable consideration, notwithstanding the fact that there has been no change in the basic nature of the corporation's business or changes in conditions in a foreign country which substantially affect the corporation's business. See paragraph (d)(3) of §1.904–1.

(d) *Other restrictions and limitations*—(1) *General rule.* If an election by an affilated group under section 243(b)(2) is effective with respect to a taxable year of the common parent corporation, then, except to the extent that an apportionment plan adopted under paragraph (f) of this section for such taxable year provides otherwise with respect to a restriction or limitation described in this paragraph, the rules provided in subparagraphs (2), (3), (4), and (5) of this paragraph shall apply to each corporation which is a member of such affiliated group on each day of its matching taxable year for the purpose of computing the amount of such restriction or limitation for its matching taxable year. For purposes of this paragraph, each corporation which is a member of an electing affiliated group (including any member which joins in filing a consolidated return) shall be treated as a separate corporation for purposes of determining the amount of such restrictions and limitations.

(2) *Accumulated earnings credit*—(i) *General.* Except as provided in subdivision (ii) of this subparagraph, in determining the minimum accumulated earnings credit under section 535(c)(2) (or the accumulated earnings credit of a mere holding or investment company under section 535(c)(3) for each corporation which is a member of the affiliated group on each day of its matching taxable year, in lieu of the $150,000 amount ($100,000 amount in the case of taxable years beginning before January 1, 1975) mentioned in such sections there shall be substituted an amount equal to (*a*) $150,000 ($100,000 in the case of taxable years beginning before January 1, 1975), divided by (*b*) the number of such members.

(ii) *Allocation of excess.* If, with respect to one or more members, the amount determined under subdivision (i) of this subparagraph exceeds the sum of (*a*) such member's accumulated earnings and profits as of the close of the preceding taxable year, plus (*b*) such member's earnings and profits for the taxable year which are retained (within the meaning of section 535(c)(1), then any such excess shall be subtracted from the amount determined under subdivision (i) of this subparagraph and shall be divided equally among those remaining members of the affiliated group that do not have such an excess (until no such excess remains to be divided among those remaining members that have not had such an excess). The excess so divided among such remaining members shall be added to the amount determined under subdivision (i) with respect to such members.

(iii) *Apportionment plan not allowed.* An affiliated group may not adopt an apportionment plan, as provided in paragraph (f) of this section, with respect to the amounts computed under the provisions of this subparagraph.

(iv) *Example.* The provisions of this subparagraph may be illustrated by the following example;

Example. An affiliated group is composed of four member corporations, W, X, Y, and Z. The sum of the accumulated earnings and profits (as of the close of the preceding taxable year ending December 31, 1975) plus the earnings and profits for the taxable year ending December 31, 1976 which are retained is $15,000, $75,000, $37,500, and $300,000 in the case of W, X, Y, and Z, respectively. The amounts determined under this subparagraph for W, X, Y, and Z are $15,000, $48,750, $37,500 and $48,750, respectively, computed as follows:

	Component members			
	W	X	Y	Z
Earnings and profits	$15,000	$75,000	$37,500	$300,000
Amount computed under subpar. (1)	37,500	37,500	37,500	37,500
Excess	22,500	0	0	0
Allocation of excess	....	7,500	7,500	7,500
New excess	....	....	7,500	
Reallocation of new excess	....	3,750	....	3,750
Amount to be used for purposes of sec. 535(c) (2) and (3)	15,000	48,750	37,500	48,750

(3) *Mine exploration expenditures*—(i) *Limitation under section 615(a).* If the aggregate of the expenditures to which section 615(a) applies, which are paid or incurred by corporations which are members of the affiliated group on each day of their matching taxable years (during such taxable years) exceeds $100,000, then the deduction (or amount deferrable) under section 615 for any such member for its matching taxable year shall be limited to an amount equal to the amount which bears the same ratio to $100,000 as the amount deductible or deferrable by such member under section 615 (computed without regard to this subdivision) bears to the aggregate of the amounts deductible or deferrable under section 615 (as so computed) by all such members.

(ii) *Limitation under section 615(c).* If the aggregate of the expenditures to which section 615(a) applies which are paid or incurred by the corporations which are members of such affiliated group on each day of their matching taxable years (during such taxable years) would, when added to the aggregate of the amounts deducted or deferred in prior taxable years which are taken into account by such corporations in applying the limitation of section 615(c), exceed $400,000, then section 615 shall not apply to any such expenditure so paid or incurred by any such member to the extent such expenditure would exceed the amount which bears the same ratio to (*a*) the amount, if any, by which $400,000 exceeds the amounts so deducted or deferred in prior years, as (*b*) such member's deduction (or amount deferrable) under section 615 (computed without regard to this subdivision) for such expenditures paid or incurred by such member during its matching taxable year, bears to (*c*) the aggregate of the amounts deductible or deferrable under section 615 (as so computed) by all such members during their matching taxable years.

(iii) *Treatment of corporations filing consolidated returns.* For purposes of making the computations under subdivisions (i) and (ii) of this subparagraph, a corporation which joins in the filing of a consolidated return shall be treated as if it filed a separate return.

(iv) *Estimate of exploration expenditures.* If, on the date a corporation (which is a member of an affiliated group on each day of its matching taxable year) files its income tax return for such taxable year, it cannot be determined whether or not the $100,000 limitation prescribed by subdivision (i) of this subparagraph, or the $400,000 limitation prescribed by subdivision (ii) of this subparagraph, will apply with respect to such taxable year, then such member shall, for purposes of such return, apply the provisions of such subdivisions (i) and (ii) with respect to such taxable year on the basis of an estimate of the aggregate of the exploration expenditures by all such members of the affiliated group for their matching taxable years. Such estimate shall be made on the basis of the facts and circumstances known at the time of such estimate. If an estimate is used by any such member of the affiliated group pursuant to this subdivision, and if the actual expenditures by all such members differ from the estimate, then each such member shall file as soon as possible an original or amended return reflecting an amended apportionment (either pursuant to an apportionment plan adopted under paragraph (f) of this section or pursuant to the application of the rule provided by subdivision (i) or (ii) of this subparagraph) based upon such actual expenditures.

(v) *Amount apportioned under apportionment plan.* If an electing affiliated group adopts an apportionment plan as provided in paragraph (f) of this section with respect to the limitation under section 615(a) or 615(c), then the amount apportioned under such plan to any corporation which is a member of such group may not exceed the amount which such member could have deducted (or deferred) under section 615 had such affiliated group not filed an election under section 243(b)(2).

(4) *Small business deductions of life insurance companies.* In the case of a life insurance company taxable under section 802 which is a member of such affiliated group on each day of its matching taxable year, the small business deduction under sections 804(a)(4) and 809(d)(10) shall not exceed an amount equal to $25,000 divided by the number of life insurance companies taxable under section 802 which are members of such group on each day of their matching taxable years.

(5) *Estimated tax*—(i) *Exemption from estimated tax.* Except as otherwise provided in subdivision (ii) of this subparagraph, the exemption from estimated tax (for purposes of estimated tax filing requirements under section 6016 and the addition to tax under section 6655 for failure to pay estimated tax) of each corporation which is a member of such affiliated group on each day of its matching taxable year shall be (in lieu of the $100,000 amount specified in section 6016(a) and (b)(2)(A) and in section 6655(d)(1) and (e)(2)(A) an amount equal to $100,000 divided by the number of such members.

(ii) *Nonapplication to certain taxable years beginning in 1963 and ending in 1964.* For purposes of this section, if a corporation has a taxable year beginning in 1963 and ending in 1964 the last day of the eighth month of which falls on or before April 10, 1964, then (notwithstanding the fact that an election under section 243(b)(2) is effective for such taxable year) subdivision (i) of this subparagraph shall not apply to such corporation for such taxable year. Thus, such corporation shall be entitled to a $100,000 exemption from estimated tax for such taxable year. Also, with respect to a taxable year described in the first sentence of this subdivision, any such corporation shall not be considered to be a member of the affiliated group for purposes of determining the number of members referred to in subdivision (i) of this subparagraph.

(iii) *Examples.* The provisions of subdivision (i) of this subparagraph may be illustrated by the following examples:

Example 1. Corporation P owns all the stock of corporation S–1 on each day of 1965. On March 1, 1965, P acquires all the stock of corporation S–2. Corporations P, S–1, and S–2 file separate returns on a calendar year basis. On March 31, 1965, the affiliated group consisting of P, S–1, and S–2 anticipates making an election under section 243(b)(2) for P's 1965 taxable year. If the affiliated group does make a valid election under section 243(b)(2) for P's 1965 year, under subdivision (i) of this subparagraph the exemption from estimated tax of P for 1965, and the exemption from estimated tax of S–1 for 1965, will be (assuming an apportionment plan is not filed pursuant to paragraph (f) of this section) an amount equal to $50,000 ($100,000 ÷ 2). (Since S–2 is not a member of the affiliated group on each day of 1965, S–2's exemption from estimated tax will be determined for the year 1965 without regard to subdivision (i) of this subparagraph, whether or not the affiliated group makes the election under section 243(b)(2).) P and S–1 file declarations of estimated tax on April 15, 1965, on such basis and make payments with respect to such declarations on such basis.

Thus, if the affiliated group does make a valid election under section 243(b)(2) for P's 1965 year, P and S–1 will not incur (as a result of the application of subdivision (i) of this subparagraph to their 1965 years) additions to tax under section 6655 for failure to pay estimated tax.

Example 2. Assume the same facts as in *Example 1,* except that, on March 31, 1965, S–1 anticipates that it will incur a loss for its 1965 year. Accordingly, in anticipation of making an election under section 243(b)(2) for P's 1965 year and adopting an apportionment plan under paragraph (f) of this section, P computes its estimated tax liability for 1965 on the basis of a $100,000 exemption, and S–1 computes its estimated tax liability for 1965 on the basis of a zero exemption. Assume S–1 incurs a loss for 1965 as anticipated. Thus, if P does make the election for 1965, and an apportionment plan is adopted apportioning $100,000 to P and zero to S–1 (for their 1965 years), P and S–1 will not incur (as a result of the application of subdivision (i) of this subparagraph to their 1965 years) additions to tax under section 6655 for failure to pay estimated tax.

Example 3. Assume the same facts as in *Example 1,* except that P and S–1 file declarations of estimated tax on April 15, 1965, on the basis of separate $100,000 exemptions from estimated tax for their 1965 years, and make payments with respect to such declarations on such basis. Assume that the affiliated group makes an election under section 243(b)(2) for P's 1965 year. Under subdivision (i) of this subparagraph, P and S–1 are limited in the aggregate to a single $100,000 exemption from estimated tax for their 1965 years. The provisions of section 6655 will be applied to the 1965 year of P and the 1965 year of S–1 on the basis of a $50,000 exemption from estimated tax for each corporation, unless a different apportionment of the $100,000 amount is adopted under paragraph (f) of this section. Since the election was made under section 243(b)(2), regardless of whether or not the affiliated group anticipated making the election, P or S–1 (or both) may incur additions to tax under section 6655 for failure to pay estimated tax.

(e) *Effect of election for certain taxable years beginning in 1963 and ending in 1964.* If an election under section 243(b)(2) by an affiliated group is effective for a taxable year of a corporation under paragraph (c)(4)(ii) of §1.243–4 (relating to election for certain taxable years beginning in 1963 and ending in 1964), and if such corporation is a member of such group on each day of such taxable year, then the restrictions and limitations prescribed by paragraphs (b), (c), and (d) of this section shall apply to all such members having such taxable years (for such taxable years). For purposes of this paragraph, such paragraphs shall be applied with respect to such taxable years as if such taxable years included the last day of a taxable year of the common parent corporation for which an election was effective under section 243(b)(2), *i.e.,* as if such taxable years were matching taxable years. For apportionment plans with respect to such taxable years, see paragraph (f) (9) of this section.

(f) *Apportionment plans*—(1) *In general.* In the case of corporations which are members of an affiliated group of corporations on each day of their matching taxable years:

(i) The $100,000 amount referred to in paragraph (d)(3)(i) of this section (relating to limitation under section 615(a)),

(ii) The amount determined under paragraph (d)(3)(ii)(*a*) of this section (relating to limitation under section 615(c)),

(iii) The $25,000 amount referred to in paragraph (d)(4) of this section (relating to small business deduction of life insurance companies), and

(iv) The $100,000 amount referred to in paragraph (d)(5)(i) of this section (relating to exemption from estimated tax), may be apportioned among such members (for such taxable years) if the common parent corporation files an apportionment plan with respect to such taxable years in the manner provided in subparagraph (4) of this paragraph, and if all other members consent to the plan, in the manner provided in subparagraph (5) or (6) of this paragraph (whichever is applicable). The plan may provide for the apportionment to one or more of such members, in fixed dollar amounts, of one or more of the amounts referred to in subdivisions (i), (ii), (iii), and (iv) of this subparagraph, but in no event shall the sum of the amounts so apportioned in respect to any such subdivision exceed the amount referred to in such subdivision. See also paragraph (d)(3)(v) of this section, relating to the maximum amount that may be apportioned to a corporation under this subparagraph with respect to exploration expenditures to which section 615 applies.

(2) *Time for adopting plan.* An affiliated group may adopt an apportionment plan with respect to the matching taxable years of its members only if, at the time such plan is sought to be adopted, there is at least 1 year remaining in the statutory period (including any extensions thereof) for the assessment of a deficiency against any corporation the tax liability of which for any taxable year would be increased by the adoption of such plan. (If there is less than 1 year remaining with respect to any taxable year, the district director for the internal revenue district in which is located the principal place of business or principal office or agency of the corporation will ordinarily, upon request, enter into an agreement to extend such statutory period for assessment and collection of deficiencies.)

(3) *Years for which effective.* A valid apportionment plan with respect to matching taxable years of members of an affiliated group shall be effective for such matching taxable years, and for all succeeding matching taxable years of such members, unless the plan is amended in accordance with subparagraph (8) of this paragraph or is terminated. Thus, the apportionment plan (including any amendments thereof) has a continuing effect and need not be renewed annually. An apportionment plan with respect to a particular taxable year of the common parent shall terminate with respect to the taxable years of the members of the affiliated group which include the last day of a succeeding taxable year of the common parent if:

(i) Any corporation which was a member of the affiliated group on each day of its matching taxable year which included the last day of the particular taxable year of the common parent is not a member of such group on each day of its taxable year which includes the last day of such succeeding taxable year of the common parent, or

(ii) Any corporation which was not a member of such group on each day of its taxable year which included the last day of the particular taxable year of the common parent is a member of such group on each day of its taxable year which includes the last day of such succeeding taxable year of the common parent.

An apportionment plan, once terminated, is no longer effective. Accordingly, unless a new apportionment plan is filed and consented to (or the section 243(b)(2) election is terminated) the amounts referred to in subparagraph (1) of this paragraph will be apportioned among the corporations which are members of the affiliated group on each day of their matching taxable years in accordance with the rules provided in paragraphs (d)(3)(i), (d)(3)(ii), (d)(4), and (d)(5)(i) of this section.

(4) *Filing of plan.* The apportionment plan shall be in the form of a statement filed by the common parent corporation with the district director for the internal revenue district in which is located the principal place of business or principal office or agency of such common parent. The statement shall be signed by any person who is duly authorized to act on behalf of the common parent corporation and shall set forth the name, address, internal revenue district, taxpayer account number, and taxable year of each member to whom the common parent could apportion an amount under subparagraph (1) of this paragraph (or, in the case of an apportionment plan referred to in subparagraph (9) of this paragraph, each member to whom the common parent could apportion an amount under such subparagraph) and the amount (or amounts) apportioned to each such member under the plan.

(5) *Consent of wholly owned subsidiaries.* If all the stock of a corporation which is a member of the affiliated group on each day of its matching taxable year is owned on each such day by another corporation (or corporations) which is a member of such group on each day of its matching taxable year, such corporation (hereinafter in this paragraph referred to as a ''wholly owned subsidiary'') shall be deemed to consent to the apportionment plan. Each wholly owned subsidiary should attach a copy of the plan filed by the common parent corporation to an income tax return, amended return, or claim for refund for its matching taxable year.

(6) *Consent of other members.* The consent of each member (other than the

common parent corporation and wholly owned subsidiaries) to an apportionment plan shall be in the form of a statement, signed by any person who is duly authorized to act on behalf of the member consenting to the plan, stating that such member consents to the plan. The consent of more than one such member may be incorporated in a single statement. The statement (or statements) shall be attached to the apportionment plan filed by the common parent corporation. The consent of any such member which, after the date the apportionment plan was filed and during its matching taxable year referred to in subparagraph (1) of this paragraph, ceases to be a wholly owned subsidiary but continues to be a member, shall be filled with the district director with whom the apportionment plan is filed (as soon as possible after it ceases to be a wholly owned subsidiary). Each consenting member should attach a copy of the apportionment plan filed by the common parent to an income tax return, amended return, or claim for refund for its matching taxable year which includes the last day of the taxable year of the common parent corporation for which the apportionment plan was filed.

(7) *Members of group filing consolidated return*—(i) *General rule.* Except as provided in subdivision (ii) of this subparagraph, if the members of an affiliated group of corporations include one or more corporations taxable under section 11 of the Code and one or more insurance companies taxable under section 802 or 821 of the Code and if the affiliated group includes corporations which join in the filing of a consolidated return, then, for purposes of determining the amount to be apportioned to a corporation under an apportionment plan adopted under this paragraph, the corporations filing the consolidated return shall be treated as a single member.

(ii) *Consenting to an apportionment plan.* For purposes of consenting to an apportionment plan under subparagraphs (5) and (6) of this paragraph, if the members of an affiliated group of corporations include corporations which join in the filing of a consolidated return, each corporation which joins in filing the consolidated return shall be treated as a separate member.

(8) *Amendment of plan.* An apportionment plan, which is effective for the matching taxable years of members of an affiliated group, may be amended if an amended plan is filed (and consented to) within the time and in accordance with the rules prescribed in this paragraph for the adoption of an original plan with respect to such taxable years.

(9) *Certain taxable years beginning in 1963 and ending in 1964.* In the case of corporations which are members of an affiliated group of corporations on each day of their taxable years referred to in paragraph (e) of this section:

(i) The $100,000 amount referred to in paragraph (d)(3)(i) of this section (relating to limitation under section 615(a)),

(ii) The amount determined under paragraph (d)(3)(ii)(*a*) of this section (relating to limitation under section 615(c)),

(iii) The $25,000 amount referred to in paragraph (d)(4) of this section (relating to small business deduction of life insurance companies), and

(iv) The $100,000 amount referred to in paragraph (d)(5)(i) of this section (relating to exemption from estimated tax), may be apportioned among such members (for such taxable years) if an apportionment plan is filed (and consented to) with respect to such taxable years in accordance with the rules provided in subparagraphs (2), (4), (5), (6), (7), and (8) of this paragraph. For purposes of this subparagraph, such subparagraphs shall be applied as if such taxable years included the last day of a taxable year of the common parent corporation, i.e., as if such taxable years were matching taxable years. An apportionment plan adopted under this subparagraph shall be effective only with respect to taxable years referred to in paragraph (e) of this section. The plan may provide for the apportionment to one or more of such members, in fixed dollar amounts, of one or more of the amounts referred to in subdivisions (i), (ii), (iii), and (iv) of this subparagraph, but in no event shall the sum of the amounts so apportioned in respect of any such subdivision exceed the amount referred to in such subdivision. See also paragraph (d)(3)(v) of this section, relating to the maximum amount that may be apportioned to a corporation under an apportionment plan described in this subparagraph with respect to exploration expenditures to which section 615 applies.

(g) *Short taxable years*—(1) *General.* If:

(i) The return of a corporation is for a short period (ending after December 31, 1963) on each day of which such corporation is a member of an affiliated group,

(ii) The last day of the common parent's taxable year does not end with or within such short period, and

(iii) An election under section 243(b)(2) by such group is effective under paragraph (c) (4) (i) of §1.243–4 for the taxable year of the common parent within which falls such short period, then the restrictions and limitations prescribed by section 243(b)(3) shall be applied in the manner provided in subparagraph (2) of this paragraph.

(2) *Manner of applying restrictions.* In the case of a corporation described in subparagraph (1) of this paragraph having a short period described in such subparagraph:

(i) Such corporation may not consent to an election under section 1562, relating to election of multiple surtax exemptions, which would be effective for such short period;

(ii) The credit under section 901 shall be allowed to such corporation for such short period if, and only if, each corporation, which pays or accrues foreign taxes and which is a member of the affiliated group on each day of its taxable year which includes the last day of the common parent's taxable year within which falls such short period, does not deduct such taxes in computing its tax liability for its taxable year which includes such last day;

(iii) The overall limitation provided in section 904(a)(2) shall be allowed to such corporation for such short period if, and only if, each corporation, which pays or accrues foreign taxes and which is a member of the affiliated group on each day of its taxable year which includes the last day of the common parent's taxable year within which falls such short period, uses such limitation for its taxable year which includes such last day;

(iv) The minimum accumulated earnings credit provided by section 535(c)(2) (or in the case of a mere holding or investment company, the accumulated earnings credit provided by section 535(c)(3)) allowable for such short period shall be the amount computed by dividing (a) the amount (if any) by which $100,000 exceeds the aggregate of the accumulated earnings and profits of the corporations, which are members of the affiliated group on the last day of such short period, as of the close of their taxable years preceding the taxable year which includes the last day of such short period, by (b) the number of such members on the last day of such short period;

(v) The deduction allowable under section 615(a) for such short period shall be limited to an amount equal to $100,000 divided by the number of corporations which are members of the affiliated group on the last day of such short period;

(vi) If the expenditures to which section 615(a) applies which are paid or incurred by such corporation during such short period would, when added to the aggregate of the amounts deducted or deferred (in taxable years ending before the last day of such short period) which are taken into account in applying the limitation of section 615(c) by corporations which are members of the affiliated group on the last day of such short period exceed $400,000, then section 615 shall not apply to any such expenditure so paid or incurred by such corporation to the extent such expenditure would exceed an amount equal to (*a*) the amount (if any) by which $400,000 exceeds the aggregate of the amounts so deducted or deferred in such taxable years (computed as if each member filed a separate return), divided by (*b*) the number of corporations in the group which have taxable years ending on such last day;

(vii) If such corporation is a life insurance company taxable under section 802, the small business deduction under sections 804(a)(4) and 809(d)(10) shall not exceed an amount equal to (*a*) $25,000, divided by (*b*) the number of life insurance companies taxable under section 802 which are members of the affiliated group on the last day of such short period; and

(viii) The exemption from estimated tax (for purposes of estimated tax filing requirements under section 6016 and the addition to tax under section 6655 for failure to pay estimated tax) for such short period shall be an amount equal to $100,000 divided by the number of corporations which are members of the affiliated group on the last day of such short period.

[T.D. 6992, 34 FR 821, Jan. 18, 1969, as amended by T.D. 7376, 40 FR 42745, Sept. 16, 1975]

§ 1.245–1 Dividends received from certain foreign corporations.

(a) *General rule.* (1) A corporation is allowed a deduction under section 245(a) for dividends received from a foreign corporation (other than a foreign personal holding company as defined in section 552) which is subject to taxation under chapter 1 of the Code if, for an uninterrupted period of not less than 36 months ending with the close of the foreign corporation's taxable year in which the dividends are paid, (i) the foreign corporation is engaged in trade or business in the United States, and (ii) 50 percent or more of the foreign corporation's entire gross income is effectively connected with the conduct of a trade or business in the United States by that corporation. If the foreign corporation has been in existence less than 36 months as of the close of the taxable year in which the dividends are paid, then the applicable uninterrupted period to be taken into consideration in lieu of the uninterrupted period of 36 or more months is the entire period such corporation has been in existence as of the close of such taxable year. An uninterrupted period which satisfied the twofold requirement with respect to business activity and gross income may start at a date later than the date on which the foreign corporation first commenced an uninterrupted period of engaging in trade or business within the United States, but the applicable uninterrupted period is in any event the longest uninterrupted period which satisfies such twofold requirement. The deduction under section 245(a) is allowable to any corporation, whether foreign or domestic, receiving dividends from a distributing corporation which meets the requirements of that section.

(2) Any taxable year of a foreign corporation which falls within the uninterrupted period described in section 245(a)(2) shall not be taken into account in applying section 245(a)(2) and this paragraph if the 100 percent dividends received deduction would be allowable under paragraph (b) of this section, whether or not in fact allowed, with respect to any dividends payable, whether or not in fact paid, out of the earnings and profits of such foreign corporation for that taxable year. Thus, in such case the foreign corporation shall be treated as having no earnings and profits for that taxable year for purposes of determining the dividends received deduction allowable under section 245(a) and this paragraph. However, that taxable year may be taken into account for purposes of determining whether the foreign corporation meets the requirements of section 245(a) that, for the uninterrupted period specified therein, the foreign corporation is engaged in trade or business in the United States and meets the 50 percent gross income requirement.

(b) *Dividends from wholly owned foreign subsidiaries.* (1) A domestic corporation is allowed a deduction under section 245(b) for any taxable year beginning after December 31, 1966, for dividends received from a foreign corporation (other than a foreign personal holding company as defined in section 552) which is subject to taxation under Chapter 1 of the Code if:

(i) The domestic corporation owns either directly or indirectly all of the outstanding stock of the foreign corporation during the entire taxable year of the domestic corporation in which the dividends are received, and

(ii) The dividends are paid out of earnings and profits of a taxable year of the foreign corporation during which (*a*) the domestic corporation receiving the dividends owns directly or indirectly throughout such year all of the outstanding stock of the foreign corporation, and (*b*) all of the gross income of the foreign corporation from all sources is effectively connected for that year with the conduct of a trade or business in the United States by that corporation.

(2) The deduction allowed by section 245(b) does not apply if an election under section 1562, relating to the privilege of a controlled group of corporations to elect multiple surtax exemptions, is effective for either the taxable year of the domestic corporation in which the dividends are received or the taxable year of the foreign corporation out of the earnings and profits of which the dividends are paid.

(c) *Rules of application.* (1) Except as provided in section 246, the deduction provided by section 245 for any taxable year is the sum of the amounts computed under paragraphs (1) and (2) of section 245(a) plus, in the case of a domestic corporation for any taxable year beginning after December 31, 1966, the sum of the amounts computed under section 245(b)(2).

(2) To the extent that a dividend received from a foreign corporation is treated as a dividend from a domestic corporation in accordance with section 243(d) and §1.243–3, it shall not be treated as a dividend received from a foreign corporation for purposes of this section.

(3) For purposes of section 245 (a) and (b), the amount of a distribution shall be determined under subparagraph (B) (without reference to subparagraph (C)) of section 301(b)(1).

(4) In determining from what year's earnings and profits a dividend is treated as having been distributed for purposes of this section, the principles of paragraph (a) of §1.316–2 shall apply. A dividend shall be considered to be distributed, first, out of the earnings and profits of the taxable year which includes the date the dividend is distributed, second, out of the earnings and profits accumulated for the immediately preceding taxable year, third, out of the earnings and profits accumulated for the second preceding taxable year, etc. A deficit in an earnings and profits account for any taxable year shall reduce the most recently accumulated earnings and profits for a prior year in such account. If there are no accumulated earnings and profits in an earnings and profits account because of a deficit incurred in a prior year, such deficit must be restored before earnings and profits can be accumulated in a subsequent accounting year. See also paragraph (c) of §1.243–3 and paragraph (a)(6) of §1.243–4.

(5) For purposes of this section the gross income of a foreign corporation for any period before its first taxable year beginning after December 31, 1966, which is from sources within the United States shall be treated as gross income which is effectively connected for that period with the conduct of a trade or business in the United States by that corporation.

(6) For the determination of the source of income and the income which is effectively connected with the conduct of a trade or business in the United States, see sections 861 through 864, and the regulations thereunder.

(d) *Illustrations.* The application of this section may be illustrated by the following examples:

Example 1. Corporation A (a foreign corporation filing its income tax returns on a calendar year basis) whose stock is 100 percent owned by Corporation B (a domestic corporation filing its income tax returns on a calendar year basis) for the first time engaged in trade or business within the United States on January 1, 1943, and qualifies under section 245 for the entire period beginning on that date and ending on December 31, 1954. Corporation A had accumulated earnings and profits of $50,000 immediately prior to January 1, 1943, and had earnings and profits of $10,000 for each taxable year during the uninterrupted period from January 1, 1943, through December 31, 1954. It derived for the period from January 1, 1943, through December 31, 1953, 90 percent of its gross income from sources within the United States and in 1954 derived 95 percent of its gross income from sources within the United States. During the calendar years 1943, 1944, 1945, 1946, and 1947 Corporation A distributed in each year $15,000; during the calendar years 1948, 1949, 1950, 1951, 1952, and 1953 it distributed in each year $5,000; and during the year 1954, $50,000. An analysis of the accumulated earnings and profits under the above statement of facts discloses that at December 31, 1953, the accumulation amounted to $55,000, of which $25,000 was accumulated prior to the ''uninterrupted period'' and $30,000 was accumulated during the uninterrupted period. (See section 316(a) and paragraph (c) of this section.) For 1954 a deduction under section 245 of $31,025 ($8,075 on 1954 earnings of the foreign corporation, plus $22,950 from the $30,000 accumulation at December 31, 1953) for dividends received from a foreign corporation is allowable to Corporation B with respect to the $50,000 received from Corporation A, computed as follows:

(i) $8,075, which is $8,500 (85 percent—the percent specified in section 243 for the calendar year 1954—of the $10,000 of earnings and profits of the taxable year) multiplied by 95 percent (the portion of the gross income of Corporation A derived during the taxable year 1954 from sources within the United States), plus

(ii) $22,950, which is $25,500 (85 percent—the percent specified in section 243 for the calendar year 1954—of $30,000, the part of the earnings and profits accumulated after the beginning of the uninterrupted period) multiplied by 90 percent (the portion of the gross income of Corporation A derived from sources within the United States during that portion of the uninterrupted period ending at the beginning of the taxable year 1954).

Example 2. If in *Example 1,* Corporation A for the taxable year 1954 had incurred a deficit of $10,000 (shown to have been incurred before December 31) the amount of the earnings and profits accumulated after the beginning of the uninterrupted period would be $20,000. If Corporation A had distributed $50,000 on December 31, 1954, the deduction under section 245 for dividends received from a foreign corporation allowable to Corporation B for 1954 would be $15,300, computed by multiplying $17,000 (85 percent—the percent specified in section 243 for the calendar year 1954—of $20,000 earnings and profits accumulated after the beginning of the uninterrupted period) by 90 percent (the portion of the gross income of Corporation A derived from United States sources during that portion of the uninterrupted period ending at the beginning of the taxable year 1954).

Example 3. Corporation A (a foreign corporation filing its income tax returns on a calendar year basis) whose stock is 100 percent owned by corporation B (a domestic corporation filing its income tax returns on a calendar year basis) for the first time engaged in trade or business within the United States on January 1, 1960, and qualifies under section 245 for the entire period beginning on that date and ending on December 31, 1963. In 1963, A derived 75 percent of its gross income from sources within the United States. A's earnings and profits for 1963 (computed as of the close of the taxable year without diminution by reason of any distributions made during the taxable year) are $200,000. On December 31, 1963, corporation A distributes to corporation B 100 shares of corporation C stock which have an adjusted basis in A's hands of $40,000 and a fair market value of $100,000. For purposes of computing the deduction under section 245 for dividends received from a foreign corporation, the amount of the distribution is $40,000. B is allowed a deduction under section 245 of $25,500, i.e., $34,000 ($40,000 multiplied by 85 percent, the percent specified in section 243 for 1963), multiplied by 75 percent (the portion of the gross income of corporation A derived during 1963 from sources within the United States).

[T.D. 6500, 25 FR 11402, Nov. 26, 1960, as amended by T.D. 6752, 29 FR 12701, Sept. 9, 1964; T.D. 6830; 30 FR 8046, June 23, 1965; T.D. 7293, 38 FR 32793, Nov. 28, 1973]

§§ 1.245A–1—1.245A–4 [Reserved]

§ 1.245A–5 Limitation of section 245A deduction and section 954(c)(6) exception.

(a) *Overview.* This section provides rules that limit a deduction under section 245A(a) to the portion of a dividend that exceeds the ineligible amount of such dividend or the applicability of section 954(c)(6) when a portion of a dividend is paid out of an extraordinary disposition account or when an extraordinary reduction occurs. Paragraph (b) of this section provides rules regarding ineligible amounts. Paragraph (c) of this section provides rules for determining ineligible amounts attributable to an extraordinary disposition. Paragraph (d) of this section provides rules that limit the application of section 954(c)(6) when one or more section 245A shareholders of a lower-tier CFC have an extraordinary disposition account. Paragraph (e) of this section provides rules for determining ineligible amounts attributable to an extraordinary reduction. Paragraph (f) of this section provides rules that limit the application of section 954(c)(6) when a lower-tier CFC has an extraordinary reduction amount. Paragraph (g) of this section provides special rules for purposes of applying this section. Paragraph (h) of this section provides an anti-abuse rule. Paragraph (i) of this section provides definitions. Paragraph (j) of this section provides examples illustrating the application of this section. Paragraph (k) of this section provides the applicability date of this section.

(b) *Limitation of deduction under section 245A*—(1) *In general.* A section 245A shareholder is allowed a section 245A deduction for any dividend received from an SFC (provided all other applicable requirements are satisfied) only to the extent that the dividend exceeds the ineligible amount of the dividend. See paragraphs (j)(2), (4), and (5) of this section for examples illustrating the application of this paragraph (b)(1).

(2) *Definition of ineligible amount.* The term *ineligible amount* means, with respect to a dividend received by a section 245A shareholder from an SFC, an amount equal to the sum of—

(i) 50 percent of the extraordinary disposition amount (as determined under paragraph (c) of this section); and

(ii) The extraordinary reduction amount (as determined under paragraph (e) of this section).

(c) *Rules for determining extraordinary disposition amount*—(1) *Definition of extraordinary disposition amount.* The term *extraordinary disposition amount* means the portion of a dividend received by a section 245A shareholder from an SFC that is paid out of the extraordinary disposition account with respect to the section 245A shareholder. See paragraph (j)(2) of this section for an example illustrating the application of this paragraph (c).

(2) *Determination of portion of dividend paid out of extraordinary disposition account*—(i) *In general.* For purposes of determining the portion of a dividend received by a section 245A shareholder from an SFC that is paid out of the extraordinary disposition account with respect to the section 245A shareholder, the following rules apply—

(A) The dividend is first considered paid out of non-extraordinary disposition E&P with respect to the section 245A shareholder; and

(B) The dividend is next considered paid out of the extraordinary disposition account to the extent of the section 245A shareholder's extraordinary disposition account balance.

(ii) *Definition of non-extraordinary disposition E&P.* The term *non-extraordinary disposition E&P* means, with respect to a section 245A shareholder and an SFC, an amount of earnings and profits of the SFC equal to the excess, if any, of—

(A) The product of—

(*1*) The amount of the SFC's earnings and profits described in section 959(c)(3), determined as of the end of the SFC's taxable year (for purposes of paragraph (c)(2)(ii) of this section, without regard to distributions during the taxable year other than as provided in this paragraph (c)(2)(ii)(A)(*1*)), but, if during the taxable year the SFC pays more than one dividend, reduced (but not below zero) by the amounts of any dividends paid by the SFC earlier in the taxable year; and

(*2*) The percentage of the stock (by value) of the SFC that the section 245A shareholder owns directly or indirectly immediately before the distribution; over

(B) The balance of the section 245A shareholder's extraordinary disposition account with respect to the SFC, determined immediately before the distribution.

(3) *Definitions with respect to extraordinary disposition accounts*—(i) *Extraordinary disposition account*—(A) *In general.* The term *extraordinary disposition account* means, with respect to a section 245A shareholder of an SFC, an account, the balance of which is equal to the product of the extraordinary disposition ownership percentage and the extraordinary disposition E&P, reduced (but not below zero) by the prior extraordinary disposition amount and as provided in §1.245A–7 or §1.245A–8, and adjusted under paragraph (c)(4) of this section, as applicable. An extraordinary disposition account is maintained in the same functional currency as the extraordinary disposition E&P.

(B) *Extraordinary disposition ownership percentage.* The term *extraordinary disposition ownership percentage* means the percentage of stock (by value) of an SFC that a section 245A shareholder owns directly or indirectly at the beginning of the disqualified period or, if later, on the first day during the disqualified period on which the SFC is a CFC, regardless of whether the section 245A shareholder owns directly or indirectly such stock of the SFC on the date of an extraordinary disposition giving rise to extraordinary disposition E&P; if not, see paragraph (c)(4) of this section.

(C) *Extraordinary disposition E&P.* The term *extraordinary disposition E&P* means an amount of earnings and profits of an SFC equal to the sum of the net gain recognized by the SFC with respect to specified property in each extraordinary disposition. In the case of an extraordinary disposition with respect to the SFC arising as a result of a disposition of specified property by a specified entity (other than a foreign corporation), an interest of which is owned directly or indirectly (through one or more other specified entities that are not foreign corporations) by the SFC, the net gain taken into account for purposes of the preceding sentence is the SFC's distributive share of the net gain recognized by the specified entity with respect to the specified property.

(D) *Prior extraordinary disposition amount*—(*1*) *General rule*. The term *prior extraordinary disposition amount* means, with respect to an SFC and a section 245A shareholder, the sum of the extraordinary disposition amount of each prior dividend received by the section 245A shareholder from the SFC by reason of paragraph (c)(1) of this section and 200 percent of the sum of the amounts included in the section 245A shareholder's gross income under section 951(a) by reason of paragraph (d) of this section (in the case in which the SFC is, or has been, a lower-tier CFC). A section 245A shareholder's prior extraordinary disposition amount also includes—

(*i*) A prior dividend received by the section 245A shareholder from the SFC to the extent not an extraordinary reduction amount and to the extent the dividend would have been an extraordinary disposition amount but for the failure of the dividend to qualify for the section 245A deduction by reason of one or more of the following: Application of section 245A(e); the recipient domestic corporation does not satisfy the holding period requirement of section 246; or the recipient domestic corporation is not a United States shareholder with respect to the foreign corporation from whose earnings and profits the dividend is sourced;

(*ii*) The portion of a prior dividend (to the extent not a tiered extraordinary disposition amount by reason of paragraph (d) of this section) received by an upper-tier CFC from the SFC that by reason of section 245A(e) or being properly allocable to subpart F income of the SFC for the taxable year of the dividend pursuant to section 954(c)(6)(A) was included in the upper-tier CFC's foreign personal holding company income and was included in gross income by the section 245A shareholder under section 951(a) but would have been a tiered extraordinary disposition amount by reason of paragraph (d) of this section had paragraph (d) applied to the dividend;

(*iii*) If a prior dividend received by an upper-tier CFC from a lower-tier CFC gives rise to a tiered extraordinary disposition amount with respect to the section 245A shareholder by reason of paragraph (d) of this section, the qualified portion; and

(*iv*) 200 percent of an amount included in the gross income of a domestic corporation under section 951(a)(1)(B) with respect to a CFC for the taxable year of the domestic corporation in which or with which the CFC's taxable year ends, to the extent so included by reason of the application of this section to the hypothetical distribution described in §1.956–1(a)(2), or to the extent the amount would have been so included by reason of the application of this section to the hypothetical distribution but for the application of section 245A(e) or the holding period requirement in section 246 to the hypothetical distribution.

(*2*) *Definition of qualified portion*—(*i*) *In general*. The term *qualified portion* means, with respect to a tiered extraordinary disposition amount of a section 245A shareholder and a lower-tier CFC, 200 percent of the portion of the disqualified amount with respect to the tiered extraordinary disposition amount equal to the sum of the amounts included in gross income by each U.S. tax resident under section 951(a) in the taxable year in which the tiered extraordinary disposition amount arose with respect to the lower-tier CFC by reason of paragraph (d) of this section. For purposes of the preceding sentence, the reference to a U.S. tax resident does not include any section 245A shareholder with a tiered extraordinary disposition amount with respect to the lower-tier CFC.

(*ii*) *Determining a qualified portion if multiple section 245A shareholders have tiered extraordinary disposition amounts*. For the purposes of applying paragraph (c)(3)(i)(D)(*2*)(*i*) of this section, if more than one section 245A shareholder has a tiered extraordinary disposition amount with respect to a dividend received by an upper-tier CFC from a lower-tier CFC, then the qualified portion with respect to each section 245A shareholder is equal to the amount described in paragraph (c)(3)(i)(D)(*2*)(*i*) of this section, without regard to this paragraph (c)(3)(i)(D)(*2*)(*ii*), multiplied by a fraction, the numerator of which is the section 245A shareholder's tiered extraordinary disposition amount with respect to the lower-tier CFC and the denominator of which is the sum of the tiered extraordinary disposition amounts with respect to each section 245A shareholder and the lower-tier CFC.

(ii) *Extraordinary disposition*—(A) *In general*. Except as provided in paragraph (c)(3)(ii)(E) of this section, the term *extraordinary disposition* means, with respect to an SFC, any disposition of specified property by the SFC on a date on which it was a CFC and during the SFC's disqualified period to a related party if the disposition occurs outside of the ordinary course of the SFC's activities. An extraordinary disposition also includes a disposition during the disqualified period on a date on which the SFC is not a CFC if there is a plan, agreement, or understanding involving a section 245A shareholder to cause the SFC to recognize gain that would give rise to an extraordinary disposition if the SFC were a CFC.

(B) *Facts and circumstances*. A determination as to whether a disposition is undertaken outside of the ordinary course of an SFC's activities is made on the basis of facts and circumstances, taking into account whether the transaction is consistent with the SFC's past activities, including with respect to quantity and frequency. In addition, a disposition of specified property by an SFC to a related party may be considered outside of the ordinary course of the SFC's activities notwithstanding that the SFC regularly disposes of property of the same type of, or similar to, the specified property to persons that are not related parties.

(C) *Per se rules*—(*1*) *In general*. Even if a disposition would otherwise be considered to be undertaken in the ordinary course of an SFC's activities under the requirements of paragraph (c)(3)(ii)(B) of this section, that disposition is treated as occurring outside of the ordinary course of an SFC's activities if the disposition is undertaken with a principal purpose of generating earnings and profits during the disqualified period or, except as provided in paragraph (c)(3)(ii)(C)(*2*) of this section, if the disposition is of intangible property, as defined in section 367(d)(4).

(*2*) *Exception to the per se rule for certain property*—(*i*) *Exception*. Paragraph (c)(3)(ii)(C)(*1*) of this section does not apply to a disposition of intangible property that is not described in section 367(d)(4)(C) or (F), provided that the property is transferred to a related person during the disqualified period with a reasonable expectation that the related person will resell the property to an unrelated customer within one year. Subject to paragraph (c)(3)(ii)(C)(*2*)(*ii*) of this section, a disposition of intangible property that satisfies the requirements of this paragraph (c)(3)(ii)(C)(*2*)(*i*) is determined to be within or without the ordinary course of an SFC's activities based on the test described in paragraph (c)(3)(ii)(B) of this section.

(*ii*) *Facts and circumstances presumption for property described in section 367(d)(4)(A)*. Notwithstanding paragraph (c)(3)(ii)(B) of this section, any disposition described in paragraph (c)(3)(ii)(C)(*2*)(*i*) of this section of a copyright right within the meaning of §1.861–18 or of intangible property described in section 367(d)(4)(A) is presumed to take place outside of the ordinary course of an SFC's activities for purposes of paragraph (c)(3)(ii)(A) of this section. The presumption in the preceding sentence may be rebutted only if the taxpayer can show that the facts and circumstances clearly establish that the disposition took place in the ordinary course of the SFC's activities.

(D) *Treatment of dispositions by certain specified entities*. For purposes of paragraph (c)(3)(ii)(A) of this section, an extraordinary disposition with respect to an SFC includes a disposition by a specified entity other than a foreign corporation, provided that immediately before or immediately after the disposition the specified entity is a related party with respect to the SFC, the SFC directly or indirectly (through one or more other specified entities other than foreign corporations) owns an interest in the specified entity, and the disposition would have otherwise qualified as an extraordinary disposition had the specified entity been a foreign corporation.

(E) *De minimis exception to extraordinary disposition.* If the sum of the net gain recognized by an SFC with respect to specified property in all dispositions otherwise described in paragraph (c)(3)(ii)(A) of this section does not exceed the lesser of $50 million or 5 percent of the gross value of all of the SFC's property held immediately before the beginning of its disqualified period, then no disposition of specified property by the SFC is an extraordinary disposition.

(iii) *Disqualified period.* The term *disqualified period* means, with respect to an SFC that is a CFC on any day during the taxable year that includes January 1, 2018, the period beginning on January 1, 2018, and ending as of the close of the taxable year of the SFC, if any, that begins before January 1, 2018, and ends after December 31, 2017.

(iv) *Specified property.* The term *specified property* means any property if gain recognized with respect to such property during the disqualified period is not described in section 951A(c)(2)(A)(i)(I) through (V). If only a portion of the gain recognized with respect to property during the disqualified period is gain that is not described in section 951A(c)(2)(A)(i)(I) through (V), then a portion of the property is treated as specified property in an amount that bears the same ratio to the value of the property as the amount of gain not described in section 951A(c)(2)(A)(i)(I) through (V) bears to the total amount of gain recognized with respect to such property during the disqualified period. Specified property is also property with respect to which a loss was recognized during the disqualified period if the loss is properly allocable to income not described in section 951A(c)(2)(A)(i)(I) through (V) under the principles of section 954(b)(5) (specified loss). If only a portion of the loss recognized with respect to property during the disqualified period is specified loss, then a portion of the property is treated as specified property in an amount that bears the same ratio to the value of the property as the amount of specified loss bears to the total amount of loss recognized with respect to such property during the disqualified period.

(4) *Successor rules for extraordinary disposition accounts.* This paragraph (c)(4) applies with respect to an extraordinary disposition account upon certain direct or indirect transfers of stock of an SFC by a section 245A shareholder.

(i) *Another section 245A shareholder succeeds to all or portion of account.* Except as provided in paragraph (c)(4)(vi) of this section, paragraphs (c)(4)(i)(A) through (D) of this section apply when a section 245A shareholder of an SFC (the *transferor*) transfers directly or indirectly a share of stock (or a portion of a share of stock) of the SFC that it owns directly or indirectly (the share or portion thereof, a *transferred share*).

(A) If immediately after the transfer (taking into account all transactions related to the transfer) another person is a section 245A shareholder of the SFC, then such other person's extraordinary disposition account with respect to the SFC is increased by the person's proportionate share of the amount allocated to the transferred share.

(B) For purposes of paragraph (c)(4)(i)(A) of this section, the amount allocated to a transferred share is equal to the product of—

(*1*) The balance of the transferor's extraordinary disposition account with respect to the SFC, determined after any reduction pursuant to paragraph (c)(3) of this section by reason of dividends and before the application of this paragraph (c)(4)(i)(B); and

(*2*) A fraction, the numerator of which is the value of the transferred share and the denominator of which is the value of all of the stock of the SFC that the transferor owns directly or indirectly immediately before the transfer.

(C) For purposes of paragraph (c)(4)(i)(A) of this section, a person's proportionate share of the amount allocated to a transferred share under paragraph (c)(4)(i)(B) of this section is equal to the product of—

(*1*) The amount allocated to the share; and

(*2*) The percentage of the share (by value) that the person owns directly or indirectly immediately after the transfer (taking into account all transactions related to the transfer).

(D) The transferor's extraordinary disposition account with respect to the SFC is decreased by the amount by which another person's extraordinary disposition account with respect to the SFC is increased pursuant to paragraph (c)(4)(i)(A) of this section.

(ii) *Certain section 381 transactions*—(A) *In general.* If assets of an SFC (the *acquired corporation*) are acquired by another SFC (the *acquiring corporation*) pursuant to a transaction described in section 381(a) in which the acquired corporation is the transferor corporation for purposes of section 381, then a section 245A shareholder's extraordinary disposition account with respect to the acquiring corporation is increased by the balance of its extraordinary disposition account with respect to the acquired corporation, determined after any reduction pursuant to paragraph (c)(3) of this section by reason of dividends and before the application of this paragraph (c)(4)(ii)(A).

(B) *Certain triangular asset reorganizations.* If, in a transaction described in paragraph (c)(4)(ii)(A) of this section, the section 245A shareholder receives stock of a domestic corporation that controls (within the meaning of section 368(c)) the acquiring corporation, the domestic corporation's extraordinary disposition account with respect to the acquiring corporation is increased by the balance of the section 245A shareholder's extraordinary disposition account with respect to the acquired corporation, determined after any reduction pursuant to paragraph (c)(3) of this section by reason of dividends and before the application of this paragraph (c)(4)(ii)(B).

(iii) *Certain distributions involving section 355 or 356.* In the case of a transaction involving a distribution under section 355 (or so much of section 356 as it relates to section 355) by an SFC (the *distributing corporation*) of stock of another SFC (the *controlled corporation*), a section 245A shareholder's extraordinary disposition account with respect to the distributing corporation is attributed to (and treated as) an extraordinary disposition account with respect to the controlled corporation in a manner similar to how earnings and profits of the distributing corporation and the controlled corporation are adjusted under §1.312–10. To the extent that a section 245A shareholder's extraordinary disposition account with respect to the distributing CFC is not so attributed to (and treated as) an extraordinary disposition account with respect to the controlled corporation, the extraordinary disposition account remains as an extraordinary disposition account with respect to the distributing corporation.

(iv) *Transfer of all of the stock of the SFC owned by a section 245A shareholder*—(A) *In general.* If, in a transaction described in paragraph (c) of this section, a section 245A shareholder of an SFC transfers directly or indirectly all of the stock of the SFC that it owns directly or indirectly, then, except as provided in paragraph (c)(4)(iv)(B) of this section, any remaining balance of the section 245A shareholder's extraordinary disposition account that is not allocated or attributed under paragraph (c) of this section is eliminated and therefore not taken into account by any person.

(B) *Related party retains the extraordinary distribution account.* If any related party with respect to the section 245A shareholder described in paragraph (c)(4)(iv)(A) of this section is a section 245A shareholder with respect to the SFC immediately after the transfer (taking into account all transactions related to the transfer), then the remaining balance of the section 245A shareholder's extraordinary disposition account with respect to the SFC is added to the related party's extraordinary disposition account. If multiple related parties are section 245A shareholders of the SFC, then the remaining balance of the extraordinary disposition account is allocated between the related parties in proportion to the value of the stock of the SFC that they own directly or indirectly immediately after the transfer (taking into account all transactions related to the transfer).

(v) *Effect of section 338(g) election*—(A) *In general*. Except as provided in paragraph (c)(4)(v)(B) of this section, if an election under section 338(g) is made with respect to a qualified stock purchase (as defined in section 338(d)(3)) of stock of an SFC, then a section 245A shareholder's extraordinary disposition account with respect to the old target (as defined in §1.338–2(c)(17)) is not treated as (or attributed to) an extraordinary disposition account with respect to the new target (as defined in §1.338–2(c)(17)). Accordingly, the remaining balance of the old target's extraordinary disposition account is eliminated and is not thereafter taken into account by any person.

(B) *Special rules regarding carryover foreign target stock*. If an election under section 338(g) is made with respect to a qualified stock purchase (as described in section 338(d)(3)) of stock of an SFC and there are one or more shares of carryover foreign target stock (''FT stock'') (as described in §1.338–9(b)(3)(i)), then the following rules apply as to a section 245A shareholder of the new target that after the qualified stock purchase directly or indirectly owns carryover FT stock (such shareholder, the *carryover FT stock shareholder*):

(*1*) In a case in which before the qualified stock purchase the carryover FT stock shareholder directly or indirectly owned carryover FT stock, the carryover FT stock shareholder's extraordinary disposition account with respect to the old target, determined after any reduction pursuant to paragraph (c)(3) of this section by reason of dividends, is treated as its extraordinary disposition account with respect to the new target.

(*2*) In a case in which before the qualified stock purchase the carryover FT stock shareholder did not directly or indirectly own carryover FT stock, but the stock retains its character as carryover FT stock (taking into account §1.338–9(b)(3)(vi)), a ratable portion of each section 245A shareholder's extraordinary disposition account with respect to the old target, determined after any reduction pursuant to paragraph (c)(3) of this section by reason of dividends, is treated as the carryover FT stock shareholder's extraordinary disposition account with respect to the new target, based on the value of the carryover FT stock that the carryover FT stock shareholder owns directly or indirectly after the qualified stock purchase relative to the value of all of the stock of the new target.

(vi) *Certain transfers described in §1.1248–8(a)(1)*—(A) *In general*. If a person transfers stock of an SFC with respect to which a section 245A shareholder has an extraordinary disposition account to a foreign acquiring corporation in a transaction described §1.1248–8(a)(1) (other than a transfer that is also described in §1.1248(f)–1(b)(2) or (3)) in which stock of a foreign corporation is received by the transferor, then, except in the case in which the transfer is also described in paragraph (c)(4)(ii) or (iii) of this section, the section 245A shareholder's extraordinary disposition account is not adjusted under this paragraph (c)(4).

(B) *Certain transfers described in §1.1248(f)–1(b)*. In the case of a transfer directly or indirectly of stock of an SFC by a section 245A shareholder described in §1.1248(f)–1(b)(2) or (3), but which does not result in an income inclusion, in whole or in part, by reason of §1.1248–2, the section 245A shareholder's extraordinary disposition account with respect to the SFC, determined after any reduction pursuant to paragraph (c)(3) of this section by reason of dividends and before the application of this paragraph (c)(4)(vi)(B), is allocated and adjusted in the same manner as under paragraph (c)(4)(i) of this section, except that, for purposes of applying paragraphs (c)(4)(i)(B) and (C) of this section, stock of the SFC that is owned directly or indirectly by persons who are not section 1248 shareholders (as defined in §1.1248(f)–1(c)(12)) is disregarded.

(vii) *Anti-abuse rule*. Pursuant to paragraph (h) of this section, if a principal purpose of a transaction or series of transactions is to shift to another person, or to avoid, an amount of a section 245A shareholder's extraordinary disposition account with respect to an SFC or otherwise avoid the purposes of this section, then appropriate adjustments are made for purposes of this section, including disregarding the transaction or series of transactions. A principal purpose described in the preceding sentence is deemed to exist if stock of an SFC is directly or indirectly acquired by one of more section 245A shareholders within one year of a transaction or transactions to which paragraph (c)(4)(iv)(A) of this section would otherwise apply.

(d) *Limitation of amount eligible for section 954(c)(6) when there is an extraordinary disposition account with respect to a lower-tier CFC*—(1) *In general.* If an upper-tier CFC receives a dividend from a lower-tier CFC, then the dividend is eligible for the exception to foreign personal holding company income under section 954(c)(6) (provided all other applicable requirements are satisfied) with respect to the portion of the dividend that exceeds the disqualified amount. With respect to the portion of the dividend that does not exceed the disqualified amount, the exception to foreign personal holding company income under section 954(c)(6) is allowed (provided all other applicable requirements are satisfied) only for the amount equal to 50 percent of the portion of the dividend that does not exceed the disqualified amount. The disqualified amount is the quotient of the amounts described in paragraphs (d)(1)(i) and (ii) of this section.

(i) The sum of each section 245A shareholder's tiered extraordinary disposition amount with respect to the lower-tier CFC.

(ii) The percentage of stock of the upper-tier CFC (by value) owned, in the aggregate, by U.S. tax residents that include in gross income their pro rata share of the upper-tier CFC's subpart F income under section 951(a) on the last day of the upper-tier CFC's taxable year. If a U.S. tax resident is a direct or indirect partner in a domestic partnership that is a United States shareholder of the upper-tier CFC, the amount of stock owned by the U.S. tax resident for purposes of the preceding sentence is determined under the principles of paragraph (g)(3) of this section.

(2) *Definition of tiered extraordinary disposition amount*—(i) *In general.* The term *tiered extraordinary disposition amount* means, with respect to a dividend received by an upper-tier CFC from a lower-tier CFC and a section 245A shareholder, the portion of the dividend that would be an extraordinary disposition amount if the section 245A shareholder received as a dividend its pro rata share of the dividend from the lower-tier CFC. The preceding sentence does not apply to an amount treated as a dividend received by an upper-tier CFC from a lower-tier CFC by reason of section 964(e)(4) (in such case, see paragraphs (b)(1) and (g)(2) of this section).

(ii) *Section 245A shareholder's pro rata share of a dividend received by an upper-tier CFC.* For the purposes of paragraph (d)(2)(i) of this section, a section 245A shareholder's pro rata share of the amount of a dividend received by an upper-tier CFC from a lower-tier CFC equals the amount by which the dividend would increase the section 245A shareholder's pro rata share of the upper-tier CFC's subpart F income under section 951(a)(2) and §1.951–1(b) and (e) if the dividend were included in the upper-tier CFC's foreign personal holding company income under section 951(a)(1), determined without regard to section 952(c) and as if the upper-tier CFC had no deductions properly allocable to the dividend under section 954(b)(5).

(e) *Extraordinary reduction amount*—(1) *In general.* Except as provided in paragraph (e)(3) of this section, the term *extraordinary reduction amount* means, with respect to a dividend received by a controlling section 245A shareholder from a CFC during a taxable year of the CFC ending after December 31, 2017, in which an extraordinary reduction occurs with respect to the controlling section 245A shareholder's ownership of the CFC, the lesser of the amounts described in paragraph (e)(1)(i) or (ii) of this section. *See* paragraphs (j)(4) through (6) of this section for examples illustrating the application of this paragraph (e).

(i) The amount of the dividend.

(ii) The amount equal to the sum of the controlling section 245A shareholder's pre-reduction pro rata share of the CFC's subpart F income (as defined in section 952(a)) and tested income (as defined in section 951A(c)(2)(A)) for the taxable year, reduced, but not below zero, by the prior extraordinary reduction amount.

(2) *Rules regarding extraordinary reduction amounts*—(i) *Extraordinary reduction*—(A) *In general.* Except as provided in paragraph (e)(2)(i)(C) of this section, an *extraordinary reduction* occurs, with respect to a controlling section 245A shareholder's ownership of a CFC during a taxable year of the CFC, if either of the conditions described in paragraph (e)(2)(i)(A)(*1*) or (*2*) of this section is satisfied. See paragraphs (j)(4) and (5) of this section for examples illustrating an extraordinary reduction.

(*1*) The condition of this paragraph (e)(2)(i)(A)(*1*) requires that during the taxable year, the controlling section 245A shareholder transfers directly or indirectly (other than by reason of a transfer occurring pursuant to an exchange described in section 368(a)(1)(E) or (F)), in the aggregate, more than 10 percent (by value) of the stock of the CFC that the section 245A shareholder owns directly or indirectly as of the beginning of the taxable year of the CFC, provided the stock transferred, in the aggregate, represents at least 5 percent (by value) of the outstanding stock of the CFC as of the beginning of the taxable year of the CFC; or

(*2*) The condition of this paragraph (e)(2)(i)(A)(*2*) requires that, as a result of one or more transactions occurring during the taxable year, the percentage of stock (by value) of the CFC that the controlling section 245A shareholder owns directly or indirectly as of the close of the last day of the taxable year of the CFC is less than 90 percent of the percentage of stock (by value) that the controlling section 245A shareholder owns directly or indirectly on either of the dates described in paragraphs (e)(2)(i)(B)(*1*) and (*2*) of this section (such percentage, the *initial percentage*), provided the difference between the initial percentage and percentage at the end of the year is at least five percentage points.

(B) *Dates for purposes of the initial percentage.* For purposes of paragraph (e)(2)(i)(A)(*2*) of this section, the dates described in paragraphs (e)(2)(i)(B)(*1*) and (*2*) of this section are—

(*1*) The day of the taxable year on which the controlling section 245A shareholder owns directly or indirectly its highest percentage of stock (by value) of the CFC; and

(*2*) The day immediately before the first day on which stock was transferred directly or indirectly in the preceding taxable year in a transaction (or a series of transactions) occurring pursuant to a plan to reduce the percentage of stock (by value) of the CFC that the controlling section 245A shareholder owns directly or indirectly.

(C) *Transactions pursuant to which CFC's taxable year ends.* A controlling section 245A shareholder's direct or indirect transfer of stock of a CFC that but for this paragraph (e)(2)(i)(C) would give rise to an extraordinary reduction under paragraph (e)(2)(i)(A) of this section does not give rise to an extraordinary reduction if the taxable year of the CFC ends immediately after the transfer, provided that the controlling section 245A shareholder directly or indirectly owns the stock on the last day of such year. Thus, for example, if a controlling section 245A shareholder exchanges all the stock of a CFC pursuant to a complete liquidation of the CFC, the exchange does not give rise to an extraordinary reduction.

(ii) *Rules for determining pre-reduction pro rata share*—(A) *In general.* Except as provided in paragraph (e)(2)(ii)(B) of this section, the term *pre-reduction pro rata share* means, with respect to a controlling section 245A shareholder and the subpart F income or tested income of a CFC, the controlling section 245A shareholder's pro rata share of the CFC's subpart F income or tested income under section 951(a)(2) and §1.951–1(b) and (e) or section 951A(e)(1) and §1.951A–1(d)(1), respectively, determined based on the controlling section 245A shareholder's direct or indirect ownership of stock of the CFC immediately before the extraordinary reduction (or, if the extraordinary reduction occurs by reason of multiple transactions, immediately before the first transaction) and without regard to section 951(a)(2)(B) and §1.951–1(b)(1)(ii), but only to the extent that such subpart F income or tested income is not included in the controlling section 245A shareholder's pro rata share of the CFC's subpart F income or tested income under section 951(a)(2) and §1.951–

1(b) and (e) or section 951A(e)(1) and § 1.951A–1(d)(1), respectively.

(B) *Decrease in section 245A shareholder's pre-reduction pro rata share for amounts taken into account by U.S. tax resident.* A controlling section 245A shareholder's pre-reduction pro rata share of subpart F income or tested income of a CFC for a taxable year is reduced by an amount equal to the sum of the amounts by which each U.S. tax resident's pro rata share of the subpart F income or tested income is increased as a result of a transfer directly or indirectly of stock of the CFC by the controlling section 245A shareholder or an issuance of stock by the CFC (such an amount with respect to a U.S. tax resident, a *specified amount*), in either case, during the taxable year in which the extraordinary reduction occurs. For purposes of this paragraph (e)(2)(ii)(B), if there are extraordinary reductions with respect to more than one controlling section 245A shareholder during the CFC's taxable year, then a U.S. tax resident's specified amount attributable to an acquisition of stock from the CFC is prorated with respect to each controlling section 245A shareholder based on its relative decrease in ownership of the CFC. See paragraph (j)(5) of this section for an example illustrating a decrease in a section 245A shareholder's pre-reduction pro rata share for amounts taken into account by a U.S. tax resident.

(C) *Prior extraordinary reduction amount.* The term *prior extraordinary reduction amount* means, with respect to a CFC and section 245A shareholder and a taxable year of the CFC in which an extraordinary reduction occurs, the sum of the extraordinary reduction amount of each prior dividend received by the section 245A shareholder from the CFC during the taxable year. A section 245A shareholder's prior extraordinary reduction amount also includes—

(*1*) A prior dividend received by the section 245A shareholder from the CFC during the taxable year to the extent the dividend was not eligible for the section 245A deduction by reason of section 245A(e) or the holding period requirement of section 246 not being satisfied but would have been an extraordinary reduction amount had this paragraph (e) applied to the dividend;

(*2*) If the CFC is a lower-tier CFC for a portion of the taxable year during which the lower-tier CFC pays any dividend to an upper tier-CFC, the portion of a prior dividend received by an upper-tier CFC from the lower-tier CFC during the taxable year of the lower-tier CFC that, by reason of section 245A(e), was included in the upper-tier CFC's foreign personal holding company income and that by reason of section 951(a) was included in income of the section 245A shareholder, and that would have given rise to a tiered extraordinary reduction amount by reason of paragraph (f) of this section had paragraph (f) applied to the dividend of which the section 245A shareholder would have included a pro rata share of the tiered extraordinary reduction amount in income by reason of section 951(a); and

(*3*) If the CFC is a lower-tier CFC for a portion of the taxable year during which the lower-tier CFC pays any dividend to an upper-tier CFC, the sum of the portion of the tiered extraordinary reduction amount of each prior dividend received by an upper-tier CFC from the lower-tier CFC during the taxable year that is included in income of the section 245A shareholder by reason of section 951(a).

(3) *Exceptions*—(i) *Elective exception to close CFC's taxable year*—(A) *In general.* For a taxable year of a CFC in which an extraordinary reduction occurs with respect to a controlling section 245A shareholder and for which, absent this paragraph (e)(3)(i), there would be an extraordinary reduction amount or tiered extraordinary reduction amount greater than zero, no amount is considered an extraordinary reduction amount or tiered extraordinary reduction amount with respect to the controlling section 245A shareholder if each controlling section 245A shareholder elects, and each U.S. tax resident described in paragraph (e)(3)(i)(C)(*2*) of this section agrees, pursuant to this paragraph (e)(3)(i), to close the CFC's taxable year for all purposes of the Internal Revenue Code (and, therefore, as to all shareholders of the CFC) as of the end of the date on

which the extraordinary reduction occurs, or, if the extraordinary reduction occurs by reason of multiple transactions, as of the end of each date on which a transaction forming a part of the extraordinary reduction occurs. Because the determination as to whether there would be an extraordinary reduction amount or tiered extraordinary reduction amount greater than zero is made without regard to this paragraph (e)(3)(i), this determination is made without taking into account any elections that may be available, or other events that may occur, solely by reason of an election described in this paragraph (e)(3)(i), such as the application of section 954(b)(4) to a short taxable year created as a result of the election. If an election is made pursuant to this paragraph (e)(3)(i), all shareholders of the CFC that are a controlling section 245A shareholder or a U.S. tax resident described in paragraph (e)(3)(i)(C)(*2*) of this section must file their respective U.S. income tax and information returns consistently with the election. If each controlling section 245A shareholder elects to close the CFC's taxable year, that closing will be treated as a change in accounting period for purposes of the notice requirement in §1.964–1(c)(3)(iii), treating any controlling section 245A shareholders as controlling domestic shareholders for this purpose. However, the notice described in §1.964–1(c)(3)(iii) does not need to be provided to persons that are U.S. tax residents described in paragraph (e)(3)(i)(C) of this section. For purposes of applying this paragraph (e)(3)(i), a controlling section 245A shareholder that has an extraordinary reduction (or a transaction forming a part thereof) with respect to a CFC is treated as owning the same amount of stock it owned in the CFC immediately before the extraordinary reduction (or a transaction forming a part thereof) on the end of the date on which the extraordinary reduction occurs (or such transaction forming a part thereof occurs). To the extent that shares of a CFC are treated as owned by a controlling section 245A shareholder as of the close of the CFC's taxable year pursuant to the preceding sentence, such shares are treated as not being owned by any other person as of the close of the CFC's taxable year.

(B) *Allocation of foreign taxes.* If an election is made pursuant to this paragraph (e)(3) to close a CFC's taxable year and the CFC's taxable year under foreign law (if any) does not close at the end of the date on which the CFC's taxable year closes as a result of the election, foreign taxes paid or accrued with respect to such foreign taxable year are allocated between the period of the foreign taxable year that ends with, and the period of the foreign taxable year that begins after, the date on which the CFC's taxable year closes as a result of the election. If there is more than one date on which the CFC's taxable year closes as a result of the election, foreign taxes paid or accrued with respect to the foreign taxable year are allocated to all such periods. The allocation is made based on the respective portions of the taxable income of the CFC (as determined under foreign law) for the foreign taxable year that are attributable under the principles of §1.1502–76(b) to the periods during the foreign taxable year. Foreign taxes allocated to a period under this paragraph (e)(3)(i)(B) are treated as paid or accrued by the CFC as of the close of that period.

(C) *Time and manner of making election*—(*1*) *Election by controlling section 245A shareholder.* An election pursuant to this paragraph (e)(3) is made and effective if the statement described in paragraph (e)(3)(i)(D) of this section is timely filed (including extensions) by each controlling section 245A shareholder making the election with its original U.S. tax return for the taxable year in which the extraordinary reduction occurs. If a controlling section 245A shareholder is a member of a consolidated group (within the meaning of §1.1502–1(h)) and participates in the extraordinary reduction, the agent for such group (within the meaning of §1.1502–77(c)(1)) must file the election described in this paragraph (e)(3) on behalf of such member.

(*2*) *Binding agreement.* Before the filing of the statement described in paragraph (e)(3)(i)(D) of this section, each controlling section 245A shareholder must enter into a written, binding agreement with each U.S. tax resident that on the end of the date on which the extraordinary reduction occurs (or, if the extraordinary reduction occurs by reason of multiple transactions, each U.S. tax resident that on the end of each date on which a transaction forming a part of the extraordinary reduction occurs) owns directly or indirectly, without regard to the final two sentences of paragraph (e)(3)(i)(A) of this section, stock of the CFC and is a United States shareholder with respect to the CFC. In the case of a U.S. tax resident that owns stock of the CFC indirectly through one or more partnerships, the partnership that directly owns the stock of the CFC may enter into the binding agreement on behalf of the U.S. tax resident partner provided that, before the due date of the partner's original Federal income tax return, including extensions, the partner delegated the authority to the partnership to enter into the binding agreement pursuant to a written partnership agreement (within the meaning of §1.704–1(b)(2)(ii)(*h*)). The written, binding agreement must provide that each controlling section 245A shareholder will elect to close the taxable year of the CFC.

(*3*) *Transition rule.* In the case of an extraordinary reduction occurring before August 27, 2020, the statement described in paragraph (e)(3)(i)(D) of this section is considered timely filed if it is attached by each controlling section 245A shareholder to an original or amended return for the taxable year in which the extraordinary reduction occurs. In the case of an amended return, the statement is considered timely filed only if it is filed with an amended return no later than February 23, 2021.

(D) *Form and content of statement.* The statement required by paragraph (e)(3)(i)(C) of this section is to be titled ''Elective Section 245A Year-Closing Statement.'' The statement must—

(*1*) Identify (by name and tax identification number, if any) each controlling section 245A shareholder, each U.S tax resident described in paragraph (e)(3)(i)(C) of this section, and the CFC;

(*2*) State the date of the extraordinary reduction (or, if the extraordinary reduction includes transactions on more than one date, the dates of all such transactions) to which the election applies;

(*3*) State the filing controlling section 245A shareholder's pro rata share of the subpart F income, tested income, and foreign taxes described in section 960 with respect to the stock of the CFC subject to the extraordinary reduction, and, if applicable, the amount of earnings and profits attributable to such stock within the meaning of section 1248, as of the date of the extraordinary reduction;

(*4*) State that each controlling section 245A shareholder and each U.S tax resident described in paragraph (e)(3)(i)(C) of this section have entered into a written, binding agreement to elect to close the CFC's taxable year in accordance with paragraph (e)(3)(i)(C) of this section; and

(*5*) Be filed in the manner, if any, prescribed by forms, publications, or other guidance published in the Internal Revenue Bulletin.

(E) *Consistency requirements.* If multiple extraordinary reductions occur with respect to one or more controlling section 245A shareholders' ownership in a single CFC during one or more taxable years of the CFC, then to the extent those extraordinary reductions occur pursuant to a plan or series of related transactions, the election described in this paragraph (e)(3) section may be made only if it is made for all such extraordinary reductions with respect to the CFC for which there was an extraordinary reduction amount. Furthermore, if an extraordinary reduction occurs with respect to a controlling section 245A shareholders' ownership in one or more CFCs, then, to the extent those extraordinary reductions occur pursuant to a plan or series of related transactions, the election described in this paragraph (e)(3) may be made only if it is made for each extraordinary reduction for which there was an extraordinary reduction amount with respect to all of the CFCs that have the same or related (within the meaning of section 267(b) or 707(b)) controlling section 245A shareholders.

(ii) *De minimis subpart F income and tested income.* For a taxable year of a CFC in which an extraordinary reduction occurs, no amount is considered an extraordinary reduction amount (or, with respect to a lower-tier CFC, a tiered extraordinary reduction amount under paragraph (f) of this section) with respect to a controlling section 245A shareholder of the CFC if the sum of the CFC's subpart F income and tested income (as defined in section 951A(c)(2)(A)) for the taxable year does not exceed the lesser of $50 million or 5 percent of the CFC's total income for the taxable year.

(f) *Limitation of amount eligible for section 954(c)(6) where extraordinary reduction occurs with respect to lower-tier CFCs*—(1) *In general.* If an extraordinary reduction occurs with respect to a lower-tier CFC and an upper-tier CFC receives a dividend from the lower-tier CFC in the taxable year in which the extraordinary reduction occurs, then the dividend is eligible for the exception to foreign personal holding company income under section 954(c)(6) (provided all other applicable requirements are satisfied) only with respect to the portion of the dividend that exceeds the tiered extraordinary reduction amount. The preceding sentence does not apply to an amount treated as a dividend received by an upper-tier CFC by reason of section 964(e)(4) (in this case, see paragraphs (b)(1) and (g)(2) of this section). See paragraph (j)(7) of this section for an example illustrating the application of this paragraph (f)(1).

(2) *Definition of tiered extraordinary reduction amount.* The term *tiered extraordinary reduction amount* means, with respect to the portion of a dividend received by an upper-tier CFC from a lower-tier CFC during a taxable year of the lower-tier CFC, the amount of such dividend equal to the excess, if any, of—

(i) The product of—

(A) The sum of the amount of the subpart F income and tested income of the lower-tier CFC for the taxable year; and

(B) The percentage (by value) of stock of the lower-tier CFC owned (within the meaning of section 958(a)(2)) by the upper-tier CFC immediately before the extraordinary reduction (or the first transaction forming a part thereof); over

(ii) The following amounts—

(A) The sum of each U.S. tax resident's pro rata share of the lower-tier CFC's subpart F income and tested income under section 951(a) or 951A(a), respectively, that is attributable to shares of the lower-tier CFC owned (within the meaning of section 958(a)(2)) by the upper-tier CFC immediately prior to the extraordinary reduction (or the first transaction forming a part thereof), computed without the application of this paragraph (f);

(B) The sum of each prior tiered extraordinary reduction amount and sum of each amount included in an upper-tier CFC's subpart F income by reason of section 245A(e) with respect to prior dividends from the lower-tier CFC during the taxable year;

(C) The sum of each U.S. tax resident's pro rata share of an upper-tier CFC's subpart F income under section 951(a) and §1.951–1(e) that is attributable to dividends received from the lower-tier CFC in the taxable year of the extraordinary reduction that do not qualify for the exception to foreign personal holding company income under section 954(c)(6) because the dividends, or portions thereof, are properly allocable to subpart F income of the lower-tier CFC for the taxable year of the extraordinary reduction pursuant to section 954(c)(6)(A);

(D) The sum of the prior extraordinary reduction amounts (but, for this purpose, computed without regard to amounts described in paragraphs (e)(2)(ii)(C)(*2*) and (*3*) of this section) of each controlling section 245A shareholder with respect to shares of the lower-tier CFC that were owned by such controlling section 245A shareholder (including indirectly through a specified entity other than a foreign corporation) for a portion of the taxable year but are owned by an upper-tier CFC (including indirectly through a specified entity other than a foreign corporation) at the time of the distribution of the dividend; and

(E) The product of the amount described in paragraph (f)(2)(i)(B) of this section and the sum of the amounts of each U.S. tax resident's pro rata share of subpart F income and tested income for the taxable year under section 951(a) or 951A(a), respectively, attributable to shares of the lower-tier CFC directly or indirectly acquired by the U.S. tax resident from the lower-tier CFC during the taxable year.

(3) *Transition rule for computing tiered extraordinary reduction amount.* Solely for purposes of applying this paragraph (f) in taxable years of a lower-tier CFC beginning on or after January 1, 2018, and ending before June 14, 2019, a tiered extraordinary reduction amount is determined by treating the lower-tier CFC's subpart F income for the taxable year as if it were neither subpart F income nor tested income.

(g) *Special rules.* The rules in this paragraph (g) apply for purposes of this section.

(1) *Source of dividends.* A dividend received by any person is considered received directly by such person from the foreign corporation whose earnings and profits give rise to the dividend. Therefore, for example, if a section 245A shareholder sells or exchanges stock of an upper-tier CFC and the gain recognized on the sale or exchange is included in the gross income of the section 245A shareholder as a dividend under section 1248(a), then, to the extent the dividend is attributable under section 1248(c)(2) to the earnings and profits of a lower-tier CFC owned, within the meaning of section 958(a)(2), by the section 245A shareholder through the upper-tier CFC, the dividend is considered received directly by the section 245A shareholder from the lower-tier CFC.

(2) *Certain section 964(e) inclusions treated as dividends.* An amount included in the gross income of a section 245A shareholder under section 951(a)(1)(A) by reason of section 964(e)(4) is considered a dividend received by the section 245A shareholder directly from the foreign corporation whose earnings and profits give rise to the amount described in section 964(e)(1). Therefore, for example, if an upper-tier CFC sells or exchanges stock of a lower-tier CFC, and, as a result of the sale or exchange, a section 245A shareholder with respect to the upper-tier CFC includes an amount in gross income under section 951(a)(1)(A) by reason of section 964(e)(4), then the inclusion is treated as a dividend received directly by the section 245A shareholder from the lower-tier CFC whose earnings and profits give rise to the dividend, and the section 245A shareholder is not allowed a section 245A deduction for the dividend to the extent of the ineligible amount of such dividend.

(3) *Rules regarding stock ownership and stock transfers*—(i) *Determining indirect ownership of stock of an SFC or a CFC.* For purposes of this section, if a person owns an interest in, or stock of, a specified entity, including through a chain of ownership of one or more other specified entities, then the person is considered to own indirectly a pro rata share of stock of an SFC or a CFC owned by the specified entity. To determine a person's pro rata share of stock owned by a specified entity, the principles of section 958(a) apply without regard to whether the specified entity is foreign or domestic.

(ii) *Determining indirect transfers for stock owned indirectly.* If, under paragraph (g)(3)(i) of this section, a person is considered to own indirectly stock of an SFC or CFC that is owned by a specified entity, then the following rules apply in determining if the person transfers stock of the SFC or CFC—

(A) To the extent the specified entity transfers stock that is considered owned indirectly by the person immediately before the transfer, the person is considered to transfer indirectly such stock;

(B) If the person transfers an interest in, or stock of, the specified entity, then the person is considered to transfer indirectly the stock of the SFC or CFC attributable to the interest in, or the stock of, the specified entity that is transferred; and

(C) In the case in which the person owns the specified entity through a chain of ownership of one or more other specified entities, if there is a transfer of an interest in, or stock of, another specified entity in the chain of ownership, then the person is considered to transfer indirectly the stock of the SFC or CFC attributable to the interest in, or the stock of, the other specified entity transferred.

(iii) *Definition of specified entity.* The term *specified entity* means any partnership, trust (other than a trust treated as a corporation for U.S. income tax purposes), or estate (in each case, domestic or foreign), or any foreign corporation.

(4) *Coordination rules*—(i) *General rule.* A dividend is first subject to section 245A(e). To the extent the dividend is not a hybrid dividend or tiered hybrid dividend under section 245A(e), the dividend is subject to paragraph (e) or (f) of this section, as applicable, and then, to the extent the dividend is not subject to paragraph (e) or (f) of this section, it is subject to paragraph (c) or (d) of this section, as applicable.

(ii) *Coordination rule for paragraphs (c) and (d) and (e) and (f) of this section, respectively.* If an SFC or CFC pays a dividend (or simultaneous dividends), a portion of which may be subject to paragraph (c) or (e) of this section and a portion of which may be subject to paragraph (d) or (f) of this section, the rules of this section apply by treating the portion of the dividend or dividends that may be subject to paragraph (c) or (e) of this section as if it occurred immediately before the portion of the dividend or dividends that may be subject to paragraph (d) or (f) of this section. For example, if a dividend arising under section 964(e)(4) occurs at the same time as a dividend that would be eligible for the exception to foreign personal holding company income under section 954(c)(6) but for the potential application of paragraph (d) this section, then the tiered extraordinary disposition amount with respect to the other dividend is determined as if the dividend arising under section 964(e)(4) occurs immediately before the other dividend.

(5) *Ordering rule for multiple dividends made by an SFC or a CFC during a taxable year.* If an SFC or a CFC pays dividends on more than one date during its taxable year or at different times on the same date, this section applies based on the order in which the dividends are paid.

(6) *Partner's distributive share of a domestic partnership's pro rata share of subpart F income or tested income.* If a section 245A shareholder or a U.S. tax resident is a direct or indirect partner in a domestic partnership that is a United States shareholder with respect to a CFC and includes in gross income its distributive share of the domestic partnership's inclusion under section 951(a) or 951A(a) with respect to the CFC then, solely for purposes of this section, a reference to the section 245A shareholder's or U.S. tax resident's pro rata share of the CFC's subpart F income or tested income included in gross income under section 951(a) or 951A(a), respectively, includes such person's distributive share of the domestic partnership's pro rata share of the CFC's subpart F income or tested income. A person is an indirect partner with respect to a domestic partnership if the person indirectly owns the domestic partnership through one or more specified entities (other than a foreign corporation).

(7) *Related domestic corporations treated as a single domestic corporation for certain purposes.* For purposes of determining the extent that a dividend is an extraordinary disposition amount or a tiered extraordinary disposition amount, as well as for purposes of determining the extent to which an extraordinary disposition account is reduced by a prior extraordinary disposition amount, domestic corporations that are related parties are treated as a single domestic corporation. Thus, for example, if two domestic corporations are related parties and either or both of them are section 245A shareholders with respect to an SFC, then the extent to which a dividend received by either domestic corporation from the SFC is an extraordinary disposition amount is based on the sum of each domestic corporation's extraordinary disposition account with respect to the SFC. When, by reason of this paragraph (g)(7), the extent to which a dividend is an extraordinary disposition amount or tiered extraordinary disposition amount is determined based on the sum of two or more extraordinary disposition accounts, a pro rata amount in each extraordinary disposition account is considered to give rise to the extraordinary disposition amount or tiered extraordinary disposition amount, if any.

(h) *Anti-abuse rule.* Appropriate adjustments are made pursuant to this section, including adjustments that would disregard a transaction or arrangement in whole or in part, to any amounts determined under (or subject to the application of) this section if a transaction or arrangement is engaged in with a principal purpose of avoiding the purposes of this section. For examples illustrating the application of this paragraph (h), see paragraphs (j)(8) through (10) of this section.

(i) *Definitions.* The following definitions apply for purposes of this section.

(1) *Controlled foreign corporation.* The term *controlled foreign corporation* (or *CFC*) has the meaning provided in section 957.

(2) *Controlling section 245A shareholder.* The term *controlling section 245A shareholder* means, with respect to a CFC, any section 245A shareholder that owns directly or indirectly more than 50 percent (by vote or value) of the stock of the CFC. For purposes of determining whether a section 245A shareholder is a controlling section 245A shareholder with respect to a CFC, all stock of the CFC owned by a related party with respect to the section 245A shareholder or by other persons acting in concert with the section 245A shareholder to undertake an extraordinary reduction is considered owned by the section 245A shareholder. If section 964(e)(4) applies to a sale or exchange of a lower-tier CFC with respect to a controlling section 245A shareholder, all United States shareholders of the CFC are considered to act in concert with regard to the sale or exchange. In addition, if all persons selling stock in a CFC, held directly, sell such stock to the same buyer or buyers (or a related party with respect to the buyer or buyers) as part of the same plan, all sellers will be considered to act in concert with regard to the sale or exchange.

(3) *Disqualified amount.* The term *disqualified amount* has the meaning set forth in paragraph (d)(1) of this section.

(4) *Disqualified period.* The term *disqualified period* has the meaning set forth in paragraph (c)(3)(iii) of this section.

(5) *Extraordinary disposition.* The term *extraordinary disposition* has the meaning set forth in paragraph (c)(3)(ii) of this section.

(6) *Extraordinary disposition account.* The term *extraordinary disposition amount* has the meaning set forth in paragraph (c)(3)(i) of this section.

(7) *Extraordinary disposition amount.* The term *extraordinary disposition amount* has the meaning set forth in paragraph (c)(1) of this section.

(8) *Extraordinary disposition E&P.* The term *extraordinary disposition E&P* has the meaning set forth in paragraph (c)(3)(i)(C) of this section.

(9) *Extraordinary disposition ownership percentage.* The term *extraordinary disposition ownership percentage* has the meaning set forth in paragraph (c)(3)(i)(B) of this section.

(10) *Extraordinary reduction.* The term *extraordinary reduction* has the meaning set forth in paragraph (e)(2)(i)(A) of this section.

(11) *Extraordinary reduction amount.* The term *extraordinary reduction amount* has the meaning set forth in paragraph (e)(1) of this section.

(12) *Ineligible amount.* The term *ineligible amount* has the meaning set forth in paragraph (b)(2) of this section.

(13) *Lower-tier CFC.* The term *lower-tier CFC* means a CFC whose stock is owned (within the meaning of section 958(a)(2)), in whole or in part, by another CFC.

(14) *Non-extraordinary disposition E&P.* The term *non-extraordinary disposition E&P* has the meaning set forth in paragraph (c)(2)(ii) of this section.

(15) *Pre-reduction pro rata share.* The term *pre-reduction pro rata share* has the meaning set forth in paragraph (e)(2)(ii) of this section.

(16) *Prior extraordinary disposition amount.* The term *prior extraordinary disposition amount* has the meaning set forth in paragraph (c)(3)(i)(D) of this section.

(17) *Prior extraordinary reduction amount.* The term *prior extraordinary reduction amount* has the meaning set forth in paragraph (e)(2)(ii)(C) of this section.

(18) *Qualified portion.* The term *qualified portion* has the meaning set forth in paragraph (c)(3)(i)(D)(*2*)(*i*) of this section.

(19) *Related party.* The term *related party* means, with respect to a person, another person bearing a relationship described in section 267(b) or 707(b) to the person, in which case such persons are *related.*

(20) *Section 245A deduction*. The term *section 245A deduction* means, with respect to a dividend received by a section 245A shareholder from an SFC, the amount of the deduction allowed to the section 245A shareholder by reason of the dividend.

(21) *Section 245A shareholder*. The term *section 245A shareholder* means a domestic corporation that is a United States shareholder with respect to an SFC and that owns directly or indirectly stock of the SFC.

(22) *Specified 10-percent owned foreign corporation (SFC)*. The term *specified 10-percent owned foreign corporation* (or *SFC*) has the meaning provided in section 245A(b)(1).

(23) *Specified entity*. The term *specified entity* has the meaning set forth in paragraph (g)(3)(iii) of this section.

(24) *Specified property*. The term *specified property* has the meaning set forth in paragraph (c)(3)(iv) of this section.

(25) *Tiered extraordinary disposition amount*. The term *tiered extraordinary disposition amount* has the meaning set forth in paragraph (d)(2)(i) of this section.

(26) *Tiered extraordinary reduction amount*. The term *tiered extraordinary reduction amount* has the meaning set forth in paragraph (f)(2) of this section.

(27) *United States shareholder*. The term *United States shareholder* has the meaning provided in section 951(b).

(28) *Upper-tier CFC*. The term *upper-tier CFC* means a CFC that owns (within the meaning of section 958(a)(2)) stock in another CFC.

(29) *U.S. tax resident*. The term *U.S. tax resident* means a United States person described in section 7701(a)(30)(A) or (C).

(j) *Examples*. The application of this section is illustrated by the examples in this paragraph (j).

(1) *Facts*. Except as otherwise stated, the facts described in this paragraph (j)(1) are assumed for purposes of the examples.

(i) US1 and US2 are domestic corporations, each with a calendar taxable year, and are not related parties with respect to each other.

(ii) CFC1, CFC2, and CFC3 are foreign corporations that are SFCs and CFCs.

(iii) Each entity uses the U.S. dollar as its functional currency.

(iv) Year 2 begins on or after January 1, 2018 and has 365 days.

(v) Absent application of this section, dividends received by US1 and US2 from a CFC meet the requirements to qualify for the section 245A deduction, and dividends received by one CFC from another CFC qualify for the exception to foreign personal holding company income under section 954(c)(6).

(vi) The de minimis rules in paragraphs (c)(3)(ii)(E) and (e)(3)(ii) of this section do not apply.

(vii) Section 1059 is not relevant to the tax results described in the examples in this paragraph (j).

(2) *Example 1. Extraordinary disposition*—(i) *Facts*. US1 and US2 own 60% and 40%, respectively, of the single class of stock of CFC1. CFC1 owns all of the single class of stock of CFC2. CFC1 and CFC2 use the taxable year ending November 30 as their taxable year. On November 1, 2018, CFC1 sells specified property to CFC2 in exchange for $200x of cash (the ''Property Transfer''). The Property Transfer is outside of CFC1's ordinary course of activities. The transferred property has a basis of $100x in the hands of CFC1. CFC1 recognizes $100x of gain as a result of the Property Transfer ($200x − $100x). On December 1, 2018, CFC1 distributes $80x pro rata to US1 ($48x) and US2 ($32x), all of which is a dividend within the meaning of section 316 and treated as a distribution out of earnings described in section 959(c)(3). No other distributions are made by CFC1 to either US1 or US2 in CFC1's taxable year ending November 30, 2019. For its taxable year ending on November 30, 2019, CFC1 has $110x of earnings and profits described in section 959(c)(3), without regard to any distributions during the taxable year.

(ii) *Analysis*—(A) *Identification of extraordinary disposition*. Because CFC1 is a CFC and uses the taxable year ending on November 30, under paragraph (c)(3)(iii) of this section, it has a disqualified period beginning on January 1, 2018, and ending on November 30, 2018. In addition, under paragraph (c)(3)(ii) of this section, the Property Transfer is an extraordinary disposition because it: Is a disposition of specified property by CFC1 on a date on which it was a CFC and during CFC1's disqualified period; is to CFC2, a related party with respect to CFC1; occurs outside of the ordinary course of CFC1's activities; and, is not subject to the de minimis rule in paragraph (c)(3)(ii)(E) of this section.

(B) *Determination of section 245A shareholders and their extraordinary disposition accounts*. Because CFC1 undertook an extraordinary disposition, under paragraph (c)(3)(i) of this section, a portion of CFC1's earnings and profits are extraordinary disposition E&P and, therefore, give rise to an extraordinary disposition account with respect to each of CFC1's section 245A shareholders. Under paragraph (i)(21) of this section, US1 and US2 are both section 245A shareholders with respect to CFC1. The amount of the extraordinary disposition account with respect to US1 is $60x, which is equal to the product of the extraordinary disposition E&P (the amount of the net gain recognized by CFC1 as a result of the Property Transfer ($100x)) and the extraordinary disposition ownership percentage (the percentage of the stock of CFC1 owned directly or indirectly by US1 on January 1, 2018 (60%)), reduced by the prior extraordinary disposition amount ($0). *See* paragraph (c)(3)(i) of this section. Similarly, the amount of the extraordinary disposition account with respect to US2 is $40x, which is equal to the product of the extraordinary disposition E&P (the net gain recognized by CFC1 as a result of the Property Transfer ($100x)) and extraordinary disposition ownership percentage (the percentage of the stock of CFC1 owned directly or indirectly by US2 on January 1, 2018 (40%)), reduced by the prior extraordinary disposition amount ($0).

(C) *Determination of extraordinary disposition amount with respect to US1.* The dividend of $48x paid to US1 on December 1, 2018, is an extraordinary disposition amount to the extent the dividend is paid out of the extraordinary disposition account with respect to US1. *See* paragraph (c)(1) of this section. Under paragraph (c)(2)(i) of this section, the dividend is first considered paid out of non-extraordinary disposition E&P with respect to US1, to the extent thereof. With respect to US1, $6x of CFC1's earnings and profits is non-extraordinary disposition E&P, calculated as the excess of $66x (the product of $110x of earnings and profits described in section 959(c)(3), without regard to the $80x distribution, and 60%) over $60x (the balance of US1's extraordinary disposition account with respect to CFC1, immediately before the distribution). *See* paragraph (c)(2)(ii) of this section. Thus, $6x of the dividend is considered paid out of non-extraordinary disposition E&P with respect to US1. Under paragraph (c)(2)(i)(B) of this section, the remaining $42x of the dividend is next considered paid out of US1's extraordinary disposition account with respect to CFC1, to the extent thereof. Accordingly, $42x of the dividend is considered paid out of the extraordinary disposition account with respect to CFC1 and gives rise to $42x of an extraordinary disposition amount. As a result, US1's prior extraordinary disposition amount is increased by $42x under paragraph (c)(3)(i)(D) of this section, and US1's extraordinary disposition account is reduced to $18x ($60x − $42x) under paragraph (c)(3)(i)(A) of this section.

(D) *Determination of extraordinary disposition amount with respect to US2.* The dividend of $32x paid to US2, on December 1, 2018, is an extraordinary disposition amount to the extent the dividend is paid out of extraordinary disposition E&P with respect to US2. *See* paragraph (c)(1) of this section. Under paragraph (c)(2)(i) of this section, the dividend is first considered paid out of non-extraordinary disposition E&P with respect to US2, to the extent thereof. With respect to US2, $4x of CFC1's earnings and profits is non-extraordinary disposition E&P, calculated as the excess of $44x (the product of $110x of earnings and profits described in section 959(c)(3), without regard to the $80x distribution, and 40%) over $40x (the balance of US2's extraordinary disposition account with respect to CFC1, immediately before the distribution). *See* paragraph (c)(2)(ii) of this section. Thus, $4x of the dividend is considered paid out of non-extraordinary disposition E&P with respect to US2. Under paragraph (c)(2)(i)(B) of this section, the remaining $28x of the dividend is next considered paid out of US2's extraordinary disposition account with respect to CFC1, to the extent thereof. Accordingly, $28x of the dividend is considered paid out of the extraordinary disposition account with respect to US2 and gives rise to $28x of an extraordinary disposition amount. As a result, US2's prior extraordinary disposition amount is increased by $28x under paragraph (c)(3)(i)(D) of this section, and US2's extraordinary disposition account is reduced to $12x ($40x − $28x) under paragraph (c)(3)(i)(A) of this section.

(E) *Determination of ineligible amount with respect to US1 and US2.* Under paragraph (b)(2) of this section, with respect to US1 and the dividend of $48x, the ineligible amount is $21x, the sum of 50 percent of the extraordinary disposition amount ($42x) and extraordinary reduction amount ($0). Therefore, with respect to the dividend received by US1 of $48x, $27x is eligible for a section 245A deduction. With respect to US2 and the dividend of $32x, the ineligible amount is $14x, the sum of 50% of the extraordinary disposition amount ($28x) and extraordinary reduction amount ($0). Therefore, with respect to the dividend received by US2 of $32x, $18x is eligible for a section 245A deduction.

(3) *Example 2. Application of section 954(c)(6) exception with extraordinary disposition account*—(i) *Facts.* The facts are the same as in paragraph (j)(2)(i) of this section (the facts in *Example 1*) except that the Property Transfer is a sale by CFC2 to CFC1 instead of a sale by CFC1 to CFC2, the $80x distribution is by CFC2 to CFC1 in a separate transaction that is unrelated to the Property Transfer, and the description of the earnings and profits of CFC1 is applied to CFC2. Additionally, absent the application of this section, section 954(c)(6) would apply to the distribution by CFC2 to CFC1. Under section 951(a)(2) and §1.951–1(b) and (e), US1's pro rata share of any subpart F income of CFC1 is 60% and

US2's pro rata share of any subpart F income of CFC2 is 40%.

(ii) *Analysis*—(A) *Identification of extraordinary disposition*. The Property Transfer is an extraordinary disposition under the same analysis as provided in paragraph (j)(2)(ii)(A) of this section (the analysis in *Example 1*).

(B) *Determination of section 245A shareholders and their extraordinary disposition accounts*. Both US1 and US2 are section 245A shareholders with respect to CFC2, US1 has an extraordinary disposition account of $60x with respect to CFC2, and US2 has an extraordinary disposition account of $40x with respect to CFC2 under the same analysis as provided in paragraph (j)(2)(ii)(B) of this section (the analysis in *Example 1*).

(C) *Determination of tiered extraordinary disposition amount*—(*1*) *In general*. US1 and US2 each have a tiered extraordinary disposition amount with respect to the $80x dividend paid by CFC2 to CFC1 to the extent that US1 and US2 would have an extraordinary disposition amount if each had received as a dividend its pro rata share of the dividend from CFC2. *See* paragraph (d)(2)(i) of this section. Under paragraph (d)(2)(ii) of this section, US1's pro rata share of the dividend is $48x (60% × $80x), that is, the increase to US1's pro rata share of the subpart F income if the dividend were included in CFC1's foreign personal holding company income, without regard to section 952(c) and the allocation of expenses. Similarly, US2's pro rata share of the dividend is $32x (40% × $80x).

(*2*) *Determination of tiered extraordinary disposition amount with respect to US1*. The extraordinary disposition amount with respect to US1 is $42x, under the same analysis provided in paragraph (j)(2)(ii)(C) of this section (the analysis in *Example 1*). Accordingly, the tiered extraordinary disposition amount with respect to US1 is $42x.

(*3*) *Determination of extraordinary disposition amount with respect to US2*. The extraordinary disposition amount with respect to US2 is $28x, under the same analysis provided in paragraph (j)(2)(ii)(D) of this section (the analysis in *Example 1*). Accordingly, the tiered extraordinary disposition amount with respect to US2 is $28x.

(D) *Limitation of section 954(c)(6) exception*. The sum of US1 and US2's tiered extraordinary disposition amounts is $70x ($42x + $28x). The portion of the stock of CFC1 (by value) owned (within the meaning of section 958(a)) by U.S. tax residents on the last day of CFC1's taxable year is 100%. Under paragraph (d)(1) of this section, the disqualified amount with respect to the dividend is $70x ($70x/100%). Accordingly, the portion of the $80x dividend from CFC2 to CFC1 that is eligible for the exception to foreign personal holding company income under section 954(c)(6) is $45x, equal to the sum of $10x (the portion of the $80x dividend that exceeds the $70x disqualified amount) and $35x (50 percent of $70x, the portion of the dividend that does not exceed the disqualified amount). Under section 951(a)(2) and §1.951–1(b) and (e), US1 includes $21x (60% × $35x) and US2 includes $14x (40% × $35x) in income under section 951(a).

(E) *Changes in extraordinary disposition account of US1*. Under paragraph (c)(3)(i)(D)(*1*) of this section, US1's prior extraordinary disposition amount with respect to CFC2 is increased by $42x, or 200% of $21x, the amount US1 included in income under section 951(a) with respect to CFC1. Under paragraph (c)(3)(i)(D)(*1*)(*iii*) of this section, US1 has no qualified portion because all of the owners of CFC2 are section 245A shareholders with a tiered extraordinary disposition amount with respect to CFC2. As a result, US1's extraordinary disposition account is reduced to $18x ($60x − $42x) under paragraph (c)(3)(i)(A) of this section.

(F) *Changes in extraordinary disposition account of US2*. Under paragraph (c)(3)(i)(D)(*1*) of this section, US2's prior extraordinary disposition amount with respect to CFC2 is increased by $28x, or 200% of $14x, the amount US2 included in income under section 951(a) with respect to CFC1. Under paragraph (c)(3)(i)(D)(*1*)(*iii*) of this section, US2 has no qualified portion because all of the owners of CFC2 are section 245A shareholders with a tiered extraordinary disposition amount with respect to CFC2. As a result, US2's extraordinary disposition account is reduced to $12x ($40x − $28x) under paragraph (c)(3)(i)(A) of this section.

(4) *Example 3. Extraordinary reduction*—(i) *Facts*. At the beginning of CFC1's taxable year ending on December 31, Year 2, US1 owns all of the single class of stock of CFC1, and no person transferred any CFC1 stock directly or indirectly in Year 1 pursuant to a plan to reduce the percentage of stock (by value) of CFC1 owned by US1. Also as of the beginning of Year 2, CFC1 has no earnings and profits described in section 959(c)(1) or (2), and US1 does not have an extraordinary disposition account with respect to CFC1. As of the end of Year 2, CFC1 has $160x of tested income and no other income. CFC1 has $160x of earnings and profits for Year 2. On October 19, Year 2, US1 sells all of its CFC1 stock to US2 for $100x in a transaction (the ''Stock Sale'') in which US1 recognizes $90x of gain. Under section 1248(a), the entire $90x of gain is included in US1's gross income as a dividend and, pursuant to section 1248(j), the $90x is treated as a dividend for purposes of applying section 245A. At the end of Year 2, under section 951A, US2 takes into account $70x of tested income, calculated as $160x (100% of the $160x of tested income) less $90x, the amount described in section 951(a)(2)(B). The amount described in section 951(a)(2)(B) is the lesser of $90x, the amount of dividends received by US1 with respect to the transferred stock, and $128x, the amount of tested

income attributable to the transferred stock ($160x) multiplied by 292/365 (the ratio of the number of days in Year 2 that US2 did not own the transferred stock to the total number of days in Year 2). US1 does not make an election pursuant to paragraph (e)(3)(i) of this section.

(ii) *Analysis*—(A) *Determination of controlling section 245A shareholder and extraordinary reduction of ownership.* Under paragraph (i)(2) of this section, US1 is a controlling section 245A shareholder with respect to CFC1. In addition, the Stock Sale results in an extraordinary reduction with respect to US1's ownership of CFC1. *See* paragraph (e)(2)(i) of this section. The extraordinary reduction occurs because during Year 2, US1 transferred 100% of the CFC1 stock it owned at the beginning of the year and such amount is more than 5% of the total value of the stock of CFC1 at the beginning of Year 2; it also occurs because on the last day of the year the percentage of stock (by value) of CFC1 that US1 owns directly or indirectly (0%) (the end of year percentage) is less than 90% of the stock (by value) of CFC1 that US1 owns directly or indirectly on the day of the taxable year when it owned the highest percentage of CFC1 stock by value (100%) (the initial percentage), no transactions occurred in the preceding year pursuant to a plan to reduce the percentage of CFC1 stock owned by US1, and the difference between the initial percentage and the end of year percentage (100 percentage points) is at least 5 percentage points.

(B) *Determination of extraordinary reduction amount.* Under paragraph (e)(1) of this section, the entire $90x dividend to US1 is an extraordinary reduction amount with respect to US1 because the dividend is at least equal to US1's pre-reduction pro rata share of CFC1's Year 2 tested income described in paragraph (e)(2)(ii)(A) of this section ($160x), reduced by the amount of tested income taken into account by US2, a U.S. tax resident, under paragraph (e)(2)(ii)(B) of this section ($70x).

(C) *Determination of ineligible amount.* Under paragraph (b)(2) of this section, with respect to US1 and the dividend of $90x, the ineligible amount is $90x, the sum of 50% of the extraordinary disposition amount ($0) and extraordinary reduction amount ($90x). Therefore, with respect to the dividend received of $90x, no portion is eligible for the dividends received deduction allowed under section 245A(a).

(iii) *Alternative facts—election to close CFC's taxable year.* The facts are the same as in paragraph (j)(4)(i) of this section (the facts of this *Example 3*), except that, pursuant to paragraph (e)(3)(i) of this section, US1 elects to close CFC1's Year 2 taxable year for all purposes of the Code as of the end of October 19, Year 2, the date on which the Stock Sale occurs; in addition, US1 and US2 enter into a written, binding agreement that US1 will elect to close CFC1's Year 2 taxable year. Accordingly, under section 951A(a), US1 takes into account 100% of CFC1's tested income for the taxable year beginning January 1, Year 2, and ending October 19, Year 2, and US2 takes into account 100% of CFC1's tested income for the taxable year beginning October 20, Year 2, and ending December 31, Year 2. Under paragraph (e)(3)(i)(A) of this section, no amount is considered an extraordinary reduction amount with respect to US1.

(5) *Example 4. Extraordinary reduction; decrease in section 245A shareholder's pre-reduction pro rata share for amounts taken into account by U.S. tax residents*—(i) *Facts.* At the beginning of CFC1's taxable year ending December 31, Year 2, US1 owns all of the single class of stock of CFC1, and no person transferred any CFC1 stock directly or indirectly in Year 1 pursuant to a plan to reduce the percentage of stock (by value) of CFC1 owned by US1. CFC1 generates $120x of subpart F income during its taxable year ending on December 31, Year 2. On October 1, Year 2, CFC1 distributes a $120x dividend to US1. On October 19, Year 2, US1 sells 100% of its stock of CFC1 to PRS, a domestic partnership, in a transaction in which no gain or loss is realized (the "Stock Sale"). A, an individual who is a citizen of the United States, and B, a foreign individual who is not a U.S. tax resident, each own 50% of the capital and profits interests of PRS. On December 1, Year 2, US2 and FP, a foreign corporation, contribute property to CFC1; in exchange, each of US2 and FP receives 25% of the stock of CFC1. PRS owns the remaining 50% of the stock of CFC1. US1 does not make an election pursuant to paragraph (e)(3)(i) of this section.

(ii) *Analysis*—(A) *Determination of controlling section 245A shareholder and extraordinary reduction.* Under paragraph (i)(2) of this section, US1 is a controlling section 245A shareholder with respect to CFC1. In addition, the Stock Sale results in an extraordinary reduction with respect to US1's ownership of CFC1. *See* paragraph (e)(2)(i) of this section. The extraordinary reduction occurs because during Year 2, US1 transferred 100% of the CFC1 stock it owns on the first day of Year 2, and that amount is more than 5% of the total value of the stock of CFC1 at the beginning of Year 2; it also occurs because on the last day of Year 2 the percentage of stock (by value) of CFC1 that US1 owns directly or indirectly (0%) (the end of year percentage) is less than 90% of the highest percentage of stock (by value) of CFC1 that US1 owns directly or indirectly on the day of the taxable year when it owned the highest percentage of CFC1 stock by value (100%) (the initial percentage), no transactions occurred in the preceding year pursuant to a plan to reduce the percentage of CFC1 stock owned by US1, and the difference between the initial percentage and the end of year percentage (100 percentage points) is at least 5 percentage points.

(B) *Determination of pre-reduction pro rata share.* Before the extraordinary reduction, US1 owned 100% of the stock of CFC1. Thus, under paragraph (e)(2)(ii)(A) of this section, the tentative amount of US1's pre-reduction pro rata share of CFC1's subpart F income is $120x. A and US2 are U.S. tax residents pursuant to paragraph (i)(29) of this section because they are United States persons described in section 7701(a)(30)(A) or (C). Thus, US1's pre-reduction pro rata share amount is subject to the reduction described in paragraph (e)(2)(ii)(B) of this section because U.S. tax residents directly or indirectly acquire stock of CFC1 from US1 or CFC1 during the taxable year in which the extraordinary reduction occurs. With respect to US1's pre-reduction pro rata share of CFC1's subpart F income, the reduction equals the amount of subpart F income of CFC1 taken into account under section 951(a) by these U.S. tax residents.

(C) *Determination of decrease in pre-reduction pro rata share for amounts taken into account by U.S. tax resident.* On December 31, Year 2, both PRS and US2 will be United States shareholders with respect to CFC1 and will include in gross income their pro rata share of CFC1's subpart F income under section 951(a). With respect to US2, this amount will be $30x, which is equal to 25% of CFC1's subpart F income for the taxable year. With respect to PRS, its pro rata share of $60x under section 951(a)(2)(A) (50% of $120x) will be reduced under section 951(a)(2)(B) by $48x. The section 951(a)(2)(B) reduction is equal to the lesser of the $120x dividend paid with respect to those shares to US1 or $48x (50% × $120x × 292/365, the period during the taxable year that PRS did not own CFC1 stock). Thus, PRS includes $12x in gross income pursuant to section 951(a). Of this amount, $6x is allocated to A (as a 50% partner of PRS) and, therefore, treated as taken into account by A under paragraphs (e)(2)(ii)(B) and (g)(6) of this section. Thus, A and US2 take into account a total of $36x of CFC1's subpart F income under section 951(a). This amount reduces US1's pre-reduction pro rata share of CFC1's subpart F income to $84x ($120x − $36x) under paragraph (e)(2)(ii)(B) of this section. CFC1 did not generate tested income during the taxable year and, therefore, no amount is taken into account under section 951A with respect to CFC1, and US1 has no pre-reduction pro rata share with respect to tested income of CFC1.

(D) *Determination of extraordinary reduction amount.* Under paragraph (e)(1) of this section, the extraordinary reduction amount equals $84x, which is the lesser of the amount of the dividend received by US1 from CFC1 during Year 2 ($120x) and the sum of US1's pre-reduction pro rata share of CFC1's subpart F income ($84x) and tested income ($0).

(E) *Determination of ineligible amount.* Under paragraph (b)(2) of this section, with respect to US1 and the dividend of $120x, the ineligible amount is $84x, the sum of 50% of the extraordinary disposition amount ($0) and extraordinary reduction amount ($84x). Therefore, with respect to the dividend received by US1 from CFC1, $36x ($120x − $84x) is eligible for a section 245A deduction.

(6) *Example 5. Controlling section 245A shareholder*—(i) *Facts.* US1 and US2 own 30% and 25% of the stock of CFC1, respectively. FP, a foreign corporation that is not a CFC, owns all of the stock of US1 and US2. FP owns the remaining 45% of the stock of CFC1. On September 30, Year 2, US1 sells all of its stock of CFC1 to US3, a domestic corporation that is not a related party with respect to FP, US1, or US2. No person transferred any stock of CFC1 directly or indirectly in Year 1 pursuant to a plan to reduce the percentage of stock (by value) of CFC1 owned by US1.

(ii) *Analysis.* Under paragraph (i)(21) of this section, US1 is a section 245A shareholder with respect to CFC1, an SFC. Because US1 owns, together with US2 and FP (related persons with respect to US1), more than 50% of the stock of CFC1, US1 is a controlling section 245A shareholder of CFC1. The sale of US1's CFC1 stock results in an extraordinary reduction occurring with respect to US1's ownership of CFC1. The extraordinary reduction occurs because during Year 2, US1 transferred 100% of the stock of CFC1 that it owned at the beginning of the year and that amount is more than 5% of the total value of the stock of CFC1 at the beginning of Year 2. The extraordinary disposition also occurs because on the last day of the year the percentage of stock (by value) of CFC1 that US1 directly or indirectly owns (0%) (the end of year percentage) is less than 90% of the stock (by value) of CFC1 that US1 directly or indirectly owned on the day of the taxable year when it owned the highest percentage of CFC1 stock by value (30%) (the initial percentage), no transactions occurred in the preceding year pursuant to a plan to reduce the percentage of CFC1 stock owned by US1, and the difference between the initial percentage and end of year percentage (30 percentage points) is at least 5 percentage points.

(7) *Example 6. Limitation of section 954(c)(6) exception with respect to an extraordinary reduction*—(i) *Facts.* At the beginning of CFC1 and CFC2's taxable year ending on December 31, Year 2, US1 and A, an individual who is a citizen of the United States, own 80% and 20% of the single class of stock of CFC1, respectively. CFC1 owns 100% of the stock of CFC2. Both US1 and A are United States shareholders with respect to CFC1 and CFC2, and US1 and A are not related parties with respect to each other. No person transferred

CFC2 stock directly or indirectly in Year 2 pursuant to a plan to reduce the percentage of stock (by value) of CFC2 owned by US1, and US1 does not have an extraordinary disposition account with respect to CFC2. At the end of Year 2, and without regard to any distributions during Year 2, CFC2 had $150x of tested income and no other income, and CFC1 had no income or expenses. On June 30, Year 2, CFC2 distributed $150x as a dividend to CFC1, which would qualify for the exception from foreign personal holding company income under section 954(c)(6) but for the application of this section. On August 7, Year 2, CFC1 sells all of its CFC2 stock to US2 for $100x in a transaction (the ''Stock Sale'') in which CFC1 realizes no gain or loss. At the end of Year 2, under section 951A, US2 takes into account $60x of tested income, calculated as $150x (100% of the $150x of tested income) less $90x, the amount described in section 951(a)(2)(B). The amount described in section 951(a)(2)(B) is the lesser of $150x, the amount of dividends received by CFC1 during Year 2 with respect to the transferred stock, and $90x, the amount of tested income attributable to the transferred stock ($150x) multiplied by 219/365 (the ratio of the number of days in Year 2 that US2 did not own the transferred stock to the total number of days in Year 2). US1 does not make an election pursuant to paragraph (e)(3)(i) of this section.

(ii) *Analysis*—(A) *Determination of controlling section 245A shareholder and extraordinary reduction of ownership.* Under paragraph (i)(2) of this section, US1 is a controlling section 245A shareholder with respect to CFC2, but A is not. In addition, the Stock Sale results in an extraordinary reduction with respect to US1's ownership of CFC2. *See* paragraph (e)(2)(i) of this section. The extraordinary reduction occurs because during Year 2, US1 transferred indirectly 100% of the CFC2 stock it owned at the beginning of the year and such amount is more than 5% of the total value of the stock of CFC2 at the beginning of Year 2. The extraordinary disposition also occurs because on the last day of the year the percentage of stock (by value) of CFC2 that US1 owns directly or indirectly (0%) (the end of year percentage) is less than 90% of the stock (by value) of CFC2 that US1 owns directly or indirectly on the day of the taxable year when it owned the highest percentage of CFC2 stock by value (80%) (the initial percentage), no transactions occurred in the preceding year pursuant to a plan to reduce the percentage of CFC2 stock owned by US1, and the difference between the initial percentage and the end of year percentage (80 percentage points) is at least 5 percentage points. Because there is an extraordinary reduction with respect to CFC2 in Year 2 and CFC1 received a dividend from CFC2 in Year 2, under paragraph (f)(1) of this section, it is necessary to determine the limitation on the amount of the dividend eligible for the exception under section 954(c)(6).

(B) *Determination of tiered extraordinary reduction amount.* The limitation on the amount of the dividend eligible for the exception under section 954(c)(6) is based on the tiered extraordinary reduction amount. The sum of the amount of subpart F income and tested income of CFC2 for Year 2 is $150x, and immediately before the extraordinary reduction, CFC1 held 100% of the stock of CFC2. Additionally, US2 is a U.S. tax resident as defined in paragraph (i)(29) of this section because it is a United States person described in section 7701(a)(30)(A) or (C), and US2 has a pro rata share of $60x of tested income under section 951A with respect to CFC2. Accordingly, under paragraph (f)(2) of this section, the tiered extraordinary reduction amount is $90x (($150x × 100%) − $60x).

(C) *Limitation of section 954(c)(6) exception.* Under paragraph (f)(1) of this section, the portion of the $150x dividend from CFC2 to CFC1 that is eligible for the exception to foreign personal holding company income under section 954(c)(6) is $60x ($150x − $90x). To the extent that the $90x that does not qualify for the exception gives rise to additional subpart F income to CFC1, both US1 and A will take into account their pro rata share of that subpart F income under section 951(a)(2) and §1.951–1(b) and (e).

(8) *Example 7. Application of anti-abuse rule to a prepayment of a royalty*—(i) *Facts.* US1 owns 100% of the single class of stock of CFC1 and CFC2. CFC1 has a November 30 taxable year, and CFC2 has a calendar year taxable year. There is a license agreement between CFC1 and CFC2 pursuant to which CFC2 is obligated to pay annual royalties to CFC1 for the use of intangible property. As of November 1, 2018, the remaining term of the agreement is 10 years. On November 1, 2018, CFC1 receives from CFC2, and accrues into income, $100x of pre-paid royalties that are for the use of the intangible property for the subsequent 10 years. The form of the arrangement as a license, including the prepayment of the royalty, is respected for U.S. tax purposes; therefore CFC1's receipt of the $100x royalty prepayment does not constitute a disposition of the intangible property and is excluded from CFC1's subpart F income pursuant to section 954(c)(6). A principal purpose of CFC2 prepaying the royalty is for CFC1 to generate earnings and profits during the disqualified period that would not be subject to current U.S. tax yet may be eligible for the section 245A deduction and could, for example, be used to reduce the amount of gain recognized on a disposition of the stock of CFC1 that would be subject to U.S. tax by increasing the portion of such gain treated as a dividend.

(ii) *Analysis.* Because the royalty prepayment was carried out with a principal purpose of avoiding the purposes of this section, appropriate adjustments are required to be made under the anti-abuse rule in paragraph (h) of this section. CFC1 is a CFC that has a November 30 taxable year, so under paragraph (c)(3)(iii) of this section, CFC1 has a disqualified period beginning on January 1, 2018, and ending on November 30, 2018. In addition, even though the intangible property licensed by CFC1 to CFC2 is specified property, CFC2's prepayment of the royalty would not be treated as a disposition of the specified property by CFC1 and, therefore, would not constitute an extraordinary disposition (and thus would not give rise to extraordinary disposition E&P), absent the application of the anti-abuse rule of paragraph (h) of this section. Pursuant to paragraph (h) of this section, the earnings and profits of CFC1 generated as a result of the $100x of prepaid royalty are treated as extraordinary disposition E&P for purposes of this section and, therefore, US1 has an extraordinary disposition account with respect to CFC1 of $100x. In addition, the prepaid royalty gives rise to a disqualified payment (as defined in §1.951A–2(c)(6)(ii)(A)) of $100x. As a result, §1.245A–7(b) or §1.245A–8(b), as applicable, applies to reduce the disqualified payment in the same manner as if the disqualified payment were disqualified basis, and §1.245A–7(c) or §1.245A–8(c), as applicable, applies to reduce the extraordinary disposition account in the same manner as if the deductions directly or indirectly related to the disqualified payment were deductions attributable to disqualified basis of an item of specified property that corresponds to the extraordinary disposition account.

(9) *Example 8. Application of anti-abuse rule to restructuring transaction*—(i) *Facts.* FP, a foreign corporation with no United States shareholders, owns 100% of the single class of stock of US1. US1 owns 100% of the single class of stock of CFC1 that, in turn, owns 100% of the single class of stock of CFC2. CFC2 has $100x of extraordinary disposition E&P, and US1 has a $100x extraordinary disposition account with respect to CFC2. In Year 1, FP transfers property to CFC1 in exchange for newly issued stock of CFC1. After the transfer, FP and US1 own, respectively, 90% and 10% of the single class of stock of CFC1. In Year 3, CFC2 pays a $100x dividend to CFC1, and the dividend gives rise to a tiered extraordinary disposition amount with respect to US1 of $10x. US1 includes $10x in gross income under section 951(a) with respect to the tiered extraordinary disposition amount. The $10x tiered extraordinary disposition amount reduces US1's extraordinary disposition account from $100x to $90x. In Year 5, CFC1 redeems all of the stock of CFC1 held by US1 in exchange for $100x of cash. Under sections 302(d) and 301(c)(1), the redemption results in a $100x dividend to US1. Under section 959(a), $10x of the $100x dividend is not included in US1's gross income and, but for the application of paragraph (h) of this section, US1 would claim a section 245A deduction of $90x with respect to $90x of the dividend. The transfer of property from FP to CFC1 in exchange for stock of CFC1, the $100x dividend from CFC2 to CFC1, and CFC1's redemption of all of its stock held by US1 (together, the ''Transaction'') were undertaken with the principal purpose of avoiding the application of this section to distributions from CFC2. As a result of the redemption, CFC2 is wholly owned by FP through CFC1, and CFC2's earnings and profits can be distributed without incurring U.S. tax irrespective of the availability of the section 245A deduction or the exception under section 954(c)(6).

(ii) *Analysis.* Because the Transaction was carried out with a principal purpose of avoiding the purposes of this section, appropriate adjustments are required to be made under the anti-abuse rule in paragraph (h) of this section. Pursuant to paragraph (h) of this section, all $90x of the dividend included in US1's income in Year 5 is treated as an extraordinary disposition amount. Therefore, $45x of the dividend is treated as an ineligible amount for which US1 cannot claim a section 245A deduction pursuant to paragraph (b)(2)(i) of this section (that is, 50% of the extraordinary disposition amount) and, accordingly, US1 is only allowed a section 245A deduction of $45x ($90x dividend received, less the $45x ineligible amount) with respect to the $90x dividend from CFC1 that it included in income. In addition, US1's extraordinary disposition account with respect to CFC2 is reduced from $90x to zero pursuant to paragraph (c)(3)(i)(A) and (D) of this section.

(10) *Example 9. Application of anti-abuse rule to a related-party loan*—(i) *Facts.* US1 owns 100% of the single class of stock of CFC1 and CFC2. US1 does not own stock of any other foreign corporation. US1 intends to repatriate $100x cash from CFC1 at the end of taxable year Y1. At the end of taxable year Y1, CFC1 has $100x of earnings and profits described in section 959(c)(3) (all of which is extraordinary disposition E&P) and $100x of cash, and US1 has an extraordinary disposition account balance with respect to CFC1 equal to $100x. In addition, at the end of taxable year Y1, CFC2 has $100x of earnings and profits described in section 959(c)(3). US1 does not have an extraordinary disposition account with respect to CFC2. Anticipating the application of this section to a distribution from CFC1, US1 instead causes CFC1 to loan $100x of cash to CFC2 during taxable year Y1 in exchange for a $100x note. The form of the transaction is respected as a loan for U.S. tax purposes. At the end of taxable Y1, CFC2 distributes $100x of cash to US1. The loan and distribution are part of a plan a principal purpose of which is to repatriate

CFC1's $100x cash without triggering the application of this section.

(ii) *Analysis.* Because the loan from CFC1 to CFC2 and the subsequent distribution of cash were carried out with a principal purpose of avoiding the purposes of this section, appropriate adjustments are required to be made under the anti-abuse rule in paragraph (h) of this section. Pursuant to that rule, the distribution of $100x of cash is treated as a distribution out of US1's extraordinary disposition account with respect to CFC1. Accordingly, the $100x distribution is taxed as a dividend, and only $50x of the dividend received by US1 is eligible for the section 245A deduction pursuant to paragraph (b)(1) of this section. As a result of the distribution, the balance of US1's extraordinary disposition account with respect to CFC1 is reduced by $100x to zero pursuant to paragraph (c)(3)(i)(A) of this section.

(k) *Applicability date*—(1) *In general.* This section applies to taxable periods of a foreign corporation ending on or after June 14, 2019, and to taxable periods of section 245A shareholders in which or with which such taxable periods end. For taxable periods described in the previous sentence, this section (and not §1.245A–5T) applies regardless of whether, but for this paragraph (k)(1), §1.245A–5T would apply. See §1.245A–5T as contained in 26 CFR part 1 edition revised as of April 1, 2020 for distributions occurring after December 31, 2017, as to which this section does not apply.

(2) *Early application of this section.* Notwithstanding paragraph (k)(1) of this section, a taxpayer may choose to apply this section to taxable periods of a foreign corporation ending before June 14, 2019, and to taxable periods of section 245A shareholders in which or with which such taxable periods end, provided that the taxpayer and all persons bearing a relationship to the taxpayer described in section 267(b) or 707(b) apply this section in its entirety for all such taxable periods.

[T.D. 9909, 85 FR 53083, Aug. 27, 2020, as amended by 85 FR 60358, Sept. 25, 2020; 85 FR 72564, Nov. 13, 2020; T.D. 9934, 85 FR 76963, Dec. 1, 2020]

§ 1.245A–6 Coordination of extraordinary disposition and disqualified basis rules.

(a) *Scope.* This section and §§1.245A–7 through 1.245A–11 coordinate the application of the extraordinary disposition rules of §1.245A–5(c) and (d) and the disqualified basis rule of §1.951A–2(c)(5). Section 1.245A–7 provides coordination rules for simple cases, and §1.245A–8 provides coordination rules for complex cases. Section 1.245A–9 provides definitions and other rules, including rules of general applicability for purposes of this section and §§1.245A–7 through 1.245A–11. Section 1.245A–10 provides examples illustrating the application of this section and §§1.245A–7 through 1.245A–9. Section 1.245A–11 provides applicability dates.

(b) *Conditions to apply coordination rules for simple cases.* For a taxable year of a section 245A shareholder for which the conditions described in paragraphs (b)(1) and (2) of this section are satisfied, the section 245A shareholder may apply the coordination rules of §1.245A–7 (rules for simple cases) to an extraordinary disposition account of the section 245A shareholder with respect to an SFC and disqualified basis of an item of specified property that corresponds to the extraordinary disposition account (as determined pursuant to §1.245A–9(b)(1)). If the conditions are not satisfied, then the coordination rules of §1.245A–8 (rules for complex cases) apply beginning with the first day of the first taxable year of the section 245A shareholder for which the conditions are not satisfied and all taxable years thereafter. If the conditions are satisfied for a taxable year of the section 245A shareholder but the section 245A shareholder chooses not to apply the coordination rules of §1.245A–7 for that taxable year, then the coordination rules of §1.245A–8 apply to that taxable year (though, for a subsequent taxable year, the section 245A shareholder may apply the coordination rules of §1.245A–7, provided that the conditions described in paragraphs (b)(1) and (2) of this section are satisfied for such subsequent taxable year and have been satisfied for all earlier taxable years). For purposes of applying paragraphs (b)(1) and (2) of this section, a reference to a section 245A shareholder, an SFC, or a CFC does not include a successor of the section 245A shareholder, the SFC, or the CFC, respectively.

(1) *Requirements related to the SFC.* The condition of this paragraph (b)(1)

is satisfied for a taxable year of the section 245A shareholder if the following requirements are satisfied:

(i) On January 1, 2018, the section 245A shareholder owns (within the meaning of section 958(a)) all of the stock (by vote and value) of the SFC.

(ii) On each day of the taxable year of the section 245A shareholder, the section 245A shareholder owns (within the meaning of section 958(a)) all of the stock (by vote and value) of the SFC.

(iii) On no day during the taxable year of the section 245A shareholder was the SFC a distributing or controlled corporation in a transaction described in a section 355, or did the SFC acquire the assets of a corporation as to which there is an extraordinary disposition account pursuant to a transaction described in section 381 (that is, taking into account the requirements of this paragraph (b)(1) and paragraph (b)(2) of this section, the section 245A shareholder's extraordinary disposition account with respect to the SFC has not been not been adjusted pursuant to the rules of §1.245A–5(c)(4)).

(2) *Requirements related to an item of specified property that corresponds to an extraordinary disposition account and a CFC holding the item.* The condition of this paragraph (b)(2) is satisfied for a taxable year of a section 245A shareholder if the following requirements are satisfied:

(i) For each item of specified property with disqualified basis that corresponds to the extraordinary disposition account, the item of specified property is held by a CFC immediately after the extraordinary disposition of the item of specified property.

(ii) For each CFC described in paragraph (b)(2)(i) of this section—

(A) All of the stock (by vote and value) of the CFC is owned (within the meaning of section 958(a)) by the section 245A shareholder and any domestic affiliates of the section 245A shareholder immediately after the extraordinary disposition described in paragraph (b)(2)(i) of this section;

(B) For each taxable year of the CFC that ends with or within the taxable year of the section 245A shareholder, there is no extraordinary disposition account with respect to the CFC, and the sum of the balance of the hybrid deduction accounts (as described in §1.245A(e)–1(d)(1)) with respect to shares of stock of the CFC is zero (determined as of the end of the taxable year of the CFC and taking into account any adjustments to the accounts for the taxable year); and

(C) On each day of each taxable year of the CFC that ends with or within the taxable year of the section 245A shareholder, and on each day of each taxable year of the CFC that begins with or within the taxable year of the section 245A shareholder—

(*1*) The CFC holds the item of specified property described in paragraph (b)(1)(i) of this section;

(*2*) The section 245A shareholder and any domestic affiliates own (within the meaning of section 958(a)) all of the stock (by vote and value) of the CFC;

(*3*) The CFC does not hold any item of specified property with disqualified basis other than an item of specified property that corresponds to the extraordinary disposition account;

(*4*) The CFC does not own an interest in a partnership, trust, or estate (directly or indirectly through one or more other partnerships, trusts, or estates) that holds an item of specified property with disqualified basis; and

(*5*) The CFC is not engaged in the conduct of a trade or business in the United States and therefore does not have ECTI, and the CFC does not have any deficit in earnings and profits subject to §1.381(c)(2)–1(a)(5).

[T.D. 9934, 85 FR 76963, Dec. 1, 2020]

§ 1.245A–7 Coordination rules for simple cases.

(a) *Scope.* This section applies for a taxable year of a section 245A shareholder for which the conditions of §1.245A–6(b)(1) and (2) are satisfied and for which the section 245A shareholder chooses to apply this section (in lieu of §1.245A–8).

(b) *Reduction of disqualified basis by reason of an extraordinary disposition amount or tiered extraordinary disposition amount*—(1) *In general.* If, for a taxable year of a section 245A shareholder, an extraordinary disposition account of the section 245A shareholder gives rise to one or more extraordinary disposition amounts or tiered extraordinary disposition amounts, then, with respect to an item of specified property that corresponds to the extraordinary disposition account, the disqualified basis of the item of specified property is, solely for purposes of §1.951A–2(c)(5), reduced (but not below zero) by an amount (determined in the functional currency in which the extraordinary disposition account is maintained) equal to the product of—

(i) The sum of the extraordinary disposition amounts and the tiered extraordinary disposition amounts; and

(ii) A fraction, the numerator of which is the disqualified basis of the item of specified property, and the denominator of which is the sum of the disqualified basis of each item of specified property that corresponds to the extraordinary disposition account.

(2) *Timing rules regarding disqualified basis.* See §1.245A–9(b)(2) for timing rules regarding the determination of, and reduction to, disqualified basis of an item of specified property.

(3) *Special rule regarding prior extraordinary disposition amounts.* For purposes of paragraph (b)(1) of this section, to the extent that an extraordinary disposition account of a section 245A shareholder is reduced under §1.245A–5(c)(3)(i)(A) by reason of a prior extraordinary disposition amount described in §1.245A–5(c)(3)(i)(D)(*1*)(*i*) through (*iv*), the extraordinary disposition account is considered to give rise to an extraordinary disposition amount or tiered extraordinary disposition amount (and the amount by which the account is reduced is treated as an extraordinary disposition amount or tiered extraordinary disposition amount).

(c) *Reduction of extraordinary disposition account by reason of the allocation and apportionment of deductions or losses attributable to disqualified basis*—(1) *In general.* If, for a taxable year of a CFC, the CFC holds one or more items of specified property that correspond to an extraordinary disposition account of a section 245A shareholder with respect to an SFC, then the extraordinary disposition account is reduced (but not below zero) by the lesser of the amounts described in paragraphs (c)(1)(i) and (ii) of this section (each determined in the functional currency of the CFC).

(i) The excess (if any) of the adjusted earnings of the CFC for the taxable year of the CFC, over the sum of the previously taxed earnings and profits accounts with respect to the CFC for purposes of section 959 (determined as of the end of the taxable year of the CFC and taking into account any adjustments to the accounts for the taxable year).

(ii) The balance of the section 245A shareholder's RGI account with respect to the CFC (determined as of the end of the taxable year of the CFC, but without regard to the application of paragraph (c)(4)(ii) of this section for the taxable year).

(2) *Timing of reduction to extraordinary disposition account.* See §1.245A–9(b)(3) for timing rules regarding the reduction to an extraordinary disposition account.

(3) *Adjusted earnings.* The term *adjusted earnings* means, with respect to a CFC and a taxable year of the CFC, the earnings and profits of the CFC, determined as of the end of the CFC's taxable year (taking into account all distributions during the taxable year), and with the adjustments described in paragraphs (c)(3)(i) through (iii) of this section.

(i) The earnings and profits are increased by the amount of any deduction or loss that is or was allocated and apportioned to residual CFC gross income of the CFC solely by reason of §1.951A–2(c)(5)(i).

(ii) The earnings and profits are decreased by the amount by which an RGI account with respect to the CFC has been decreased pursuant to paragraph (c)(4)(ii) of this section for a prior taxable year of the CFC.

(iii) The earnings and profits are determined without regard to income described in section 245(a)(5)(A) or dividends described in section 245(a)(5)(B) (determined without regard to section 245(a)(12)).

(4) *RGI account.* For a taxable year of a CFC, the following rules apply to determine the balance of a section 245A shareholder's RGI account with respect to the CFC:

(i) The balance of the RGI account is increased by the sum of the amounts of deductions and losses of the CFC that, but for §1.951A–2(c)(5)(i), would have decreased one or more categories of the CFC's positive subpart F income or the CFC's tested income, or increased or given rise to a tested loss or one or more qualified deficits of the CFC.

(ii) The balance of the RGI account is decreased to the extent that, by reason of the application of paragraph (c)(1) of this section with respect to the taxable year of the CFC, there is a reduction to the extraordinary disposition account of the section 245A shareholder.

[T.D. 9934, 85 FR 76963, Dec. 1, 2020]

§ 1.245A–8 Coordination rules for complex cases.

(a) *Scope*. This section applies beginning with the first day of the first taxable year of a section 245A shareholder for which § 1.245A–7 does not apply and for all taxable years thereafter, or for a taxable year of a section 245A shareholder for which the section 245A shareholder chooses not to apply § 1.245A–7.

(b) *Reduction of disqualified basis by reason of an extraordinary disposition amount or tiered extraordinary disposition amount*—(1) *In general*. If, for a taxable year of a section 245A shareholder, an extraordinary disposition account of the section 245A shareholder gives rise to one or more extraordinary disposition amounts or tiered extraordinary disposition amounts, then, with respect to an item of specified property that corresponds to the extraordinary disposition account and for which the ownership requirement of paragraph (b)(3)(i) of this section is satisfied for the taxable year of the section 245A shareholder, solely for purposes of § 1.951A–2(c)(5), the disqualified basis of the item of specified property is reduced (but not below zero) by an amount (determined in the functional currency in which the extraordinary disposition account is maintained) equal to the product of—

(i) The excess (if any) of—

(A) The sum of the extraordinary disposition amounts and the tiered extraordinary disposition amounts; over

(B) The basis benefit account with respect to the extraordinary disposition account (determined as of the end of the taxable year of the section 245A shareholder, and without regard to the application of paragraph (b)(4)(i)(B) of this section for the taxable year); and

(ii) A fraction, the numerator of which is the disqualified basis of the item of specified property, and the denominator of which is the sum of the disqualified basis of each item of specified property that corresponds to the extraordinary disposition account and for which the ownership requirement of paragraph (b)(3)(i) of this section is satisfied for the taxable year of the section 245A shareholder.

(2) *Timing rules regarding disqualified basis*. See § 1.245A–9(b)(2) for timing rules regarding the determination of, and reduction to, disqualified basis of an item of specified property.

(3) *Ownership requirement with respect to an item of specified property*—(i) *In general*. For a taxable year of a section 245A shareholder, the ownership requirement of this paragraph (b)(3)(i) is satisfied with respect to an item of specified property if, on at least one day that falls within the taxable year, the item of specified property is held by—

(A) The section 245A shareholder;

(B) A person (other than the section 245A shareholder) that, on at least one day that falls within the section 245A shareholder's taxable year, is a related party with respect to the section 245A shareholder (such a person, a *qualified related party* with respect to the section 245A shareholder for the taxable year of the section 245A shareholder); or

(C) A specified entity at least 10 percent of the interests of which are, on at least one day that falls within the section 245A shareholder's taxable year, owned directly or indirectly through one or more other specified entities by the section 245A shareholder or a qualified related party.

(ii) *Rules for determining an interest in a specified entity*. For purposes of paragraph (b)(3)(i)(C) of this section, the phrase *at least 10 percent of the interests* means—

(A) If the specified entity is a foreign corporation, at least 10 percent of the stock (by vote or value) of the foreign corporation;

(B) If the specified entity is a partnership, at least 10 percent of the interests in the capital or profits of the partnership; or

(C) If the specified entity is not a foreign corporation or a partnership, at least 10 percent of the value of the interests in the specified entity.

(4) *Basis benefit account*—(i) *General rules*. The term *basis benefit account* means, with respect to an extraordinary disposition account of a section 245A shareholder, an account of the section 245A shareholder (the initial balance of which is zero), adjusted pursuant to the rules of paragraphs (b)(4)(i)(A) and (B) of this section on the last day of each taxable year of the section 245A shareholder. The basis benefit account must be maintained in the same functional currency as the extraordinary disposition account.

(A) The balance of the basis benefit account is increased to the extent that a basis benefit amount with respect to an item of specified property that corresponds to the section 245A shareholder's extraordinary disposition account is assigned to the taxable year of the section 245A shareholder. However, if the extraordinary disposition ownership percentage applicable to the section 245A shareholder's extraordinary disposition account is less than 100 percent, then, the basis benefit account is instead increased by the amount equal to the basis benefit amount multiplied by the extraordinary disposition ownership percentage.

(B) The balance of the basis benefit account is decreased to the extent that, for a taxable year that includes the date on which the section 245A shareholder's taxable year ends, disqualified basis of an item of specified property would have been reduced pursuant to paragraph (b)(1) of this section but for an amount in the basis benefit account.

(ii) *Rules for determining a basis benefit amount*—(A) *In general*. The term *basis benefit amount* means, with respect to an item of specified property that has disqualified basis, the portion of disqualified basis that, for a taxable year, is directly (or indirectly through one or more specified entities that are not corporations) taken into account for U.S. tax purposes by a U.S. tax resident, a CFC described in §1.267A–5(a)(17), or a specified foreign person and—

(*1*) Reduces the amount of the U.S. tax resident's taxable income, one or more categories of the CFC's positive subpart F income, the CFC's tested income, or the specified foreign person's ECTI, as applicable; or

(*2*) Prevents a decrease or offset of the amount of the CFC's tested loss or qualified deficits.

(B) *Rules for determining whether disqualified basis of an item of specified property is taken into account*. For purposes of paragraph (b)(4)(ii)(A) of this section, disqualified basis of an item of specified property is taken into account for U.S. tax purposes without regard to whether the disqualified basis is reduced or eliminated under §1.951A–3(h)(2)(ii)(B)(*1*).

(C) *Timing rules when disqualified basis gives rise to a deferred or disallowed loss*. To the extent disqualified basis of an item of specified property gives rise to a deduction or loss during a taxable year that is deferred, then the determination of whether the item of deduction or loss gives rise to a basis benefit amount under paragraph (b)(4)(ii)(A) of this section is made when the item of deduction or loss is no longer deferred. In addition, to the extent disqualified basis of an item of specified property gives rise to a deduction or loss during a taxable year that is disallowed under section 267(a)(1), then a basis benefit amount is treated as occurring in the taxable year when and to the extent that gain is reduced pursuant to section 267(d), and provided that the gain is described in paragraph (b)(4)(ii)(A) of this section.

(iii) *Rules for assigning a basis benefit amount to a taxable year of a section 245A shareholder*—(A) *In general*. For purposes of applying paragraph (b)(4)(i)(A) of this section with respect to a section 245A shareholder, a basis benefit amount with respect to an item of specified property is assigned to a taxable year of the section 245A shareholder if—

(*1*) With respect to the item of specified property, the ownership requirement of paragraph (b)(3)(i) of this section is satisfied for the taxable year of the section 245A shareholder; and

(*2*) The basis benefit amount occurs during the taxable year of the section 245A shareholder, or a taxable year of a

U.S. tax resident (other than the section 245A shareholder), a CFC described in §1.267A–5(a)(17), or a specified foreign person, as applicable, that—

(*i*) Ends with or within the taxable year of the section 245A shareholder; or

(*ii*) Begins with or within the taxable year of the section 245A shareholder, but only in a case in which but for this paragraph (b)(4)(iii)(A)(*2*)(*ii*) the basis benefit amount would not be assigned to a taxable year of the section 245A shareholder.

(B) *Anti-duplication rule.* For purposes of paragraph (b)(4)(i)(A) of this section, to the extent that disqualified basis of an item of specified property gives rise to a basis benefit amount that is assigned to a taxable year of a section 245A shareholder under paragraph (b)(4)(iii)(A) of this section, and thereafter such disqualified basis gives rise to an additional basis benefit amount, the additional basis benefit amount cannot be assigned to another taxable year of any section 245A shareholder. Thus, for example, if the entire amount of disqualified basis of an item of specified property gives rise to a basis benefit amount for a particular taxable year of a CFC and is assigned to a taxable year of a section 245A shareholder but, pursuant to §1.951A–3(h)(2)(ii)(B)(*1*)(*ii*), the disqualified basis is not reduced or eliminated in such taxable year of the CFC (because, for example, the buyer is a CFC that is a related party) and, as a result, the disqualified basis thereafter gives rise to an additional basis benefit amount, then no portion of the additional basis benefit amount is assigned to a taxable year of any section 245A shareholder.

(iv) *Successor rules for basis benefit accounts.* To the extent that an extraordinary disposition account of a section 245A shareholder is adjusted pursuant to §1.245A–5(c)(4), a basis benefit account with respect to the extraordinary disposition account is adjusted in a similar manner.

(5) *Special rules regarding duplicate DQB of an item of exchanged basis property*—(i) *Adjustments to certain rules in applying paragraph (b)(1) of this section.* For purposes of paragraph (b)(1) of this section for a taxable year of a section 245A shareholder, the following rules apply with respect to duplicate DQB of an item of exchanged basis property:

(A) Duplicate DQB of the item of exchanged basis property with respect to an item of specified property to which the item of exchanged property relates is not taken into account for purposes of paragraph (b)(1) of this section if the disqualified basis of the item of specified property is taken into account for purposes of paragraph (b)(1) of this section. Thus, for example, if for a taxable year of a section 245A shareholder the ownership requirement of paragraph (b)(3) of this section is satisfied with respect to an item of specified property and an item of exchanged basis property that relates to the item of specified property, all of the disqualified basis of which is duplicate DQB with respect to the item of specified property, then only the disqualified basis of the item of specified property is taken into account for purposes of, and is subject to reduction under, paragraph (b)(1) of this section.

(B) If, pursuant to paragraph (b)(5)(i)(A) of this section, duplicate DQB of an item of exchanged basis property with respect to an item of specified property is not taken into account for purposes of paragraph (b)(1) of this section, then, solely for purposes of §1.951A–2(c)(5), the duplicate DQB of the item of exchanged basis property is reduced (in the same manner as it would be if the disqualified basis were taken into account for purposes of paragraph (b)(1) of this section) by the product of the amounts described in paragraphs (b)(5)(i)(B)(*1*) and (*2*) of this section.

(*1*) The reduction, under paragraph (b)(1) of this section for the taxable year of the section 245A shareholder, to the disqualified basis of the item of specified property to which the item of exchanged basis property relates.

(*2*) A fraction, the numerator of which is the duplicate DQB of the item of exchanged basis property with respect to the item of specified property, and the denominator of which is the sum of the amounts of duplicate DQB with respect to the item of specified property of each item of exchanged basis property that relates to the item of specified property and for which the ownership requirement of paragraph (b)(3)(i) of this section is satisfied for the taxable year of the section 245A shareholder. For purposes of determining this fraction, duplicate DQB of an item of exchanged basis property is determined pursuant to the rules of paragraph (b)(2)(i) of this section (by replacing the term ''paragraph (b)(1)'' in that paragraph with the term ''paragraph (b)(5)(i)(B)''). In addition, duplicate DQB of an item of exchanged basis property is excluded from the denominator of the fraction to the extent the duplicate DQB is attributable to duplicate DQB of another item of exchanged basis property that is included in the denominator of the fraction.

(ii) *Adjustments to certain rules in applying paragraph (b)(4) of this section.* For purposes of paragraph (b)(4)(i)(A) of this section, to the extent that disqualified basis of an item of specified property gives rise to a basis benefit amount that is assigned to a taxable year of a section 245A shareholder under paragraph (b)(4)(iii)(A) of this section, and thereafter duplicate DQB attributable to such disqualified basis of the item of specified property gives rise to an additional basis benefit amount, the additional basis benefit amount cannot be assigned to another taxable year of any section 245A shareholder. Similarly, for purposes of paragraph (b)(4)(i)(A) of this section, to the extent that duplicate DQB attributable to disqualified basis of an item of specified property gives rise to a basis benefit amount that is assigned to a taxable year of a section 245A shareholder under paragraph (b)(4)(iii)(A) of this section, and thereafter such disqualified basis of the item of specified property (or duplicate DQB attributable to such disqualified basis of the item of specified property) gives rise to an additional basis benefit amount, the additional basis benefit amount cannot be assigned to another taxable year of any section 245A shareholder.

(6) *Special rule regarding prior extraordinary disposition amounts.* For purposes of paragraph (b)(1) of this section, to the extent that an extraordinary disposition account of a section 245A shareholder is reduced under §1.245A–5(c)(3)(i)(A) by reason of a prior extraordinary disposition amount described in §1.245A–5(c)(3)(i)(D)(*1*)(*i*) through (*iv*), the extraordinary disposition account is considered to give rise to an extraordinary disposition amount or tiered extraordinary disposition amount (and the amount by which the account is reduced is treated as an extraordinary disposition amount or tiered extraordinary disposition amount).

(c) *Reduction of extraordinary disposition account by reason of the allocation and apportionment of deductions or losses attributable to disqualified basis*—(1) *In general.* For a taxable year of a CFC, if there is an RGI account with respect to the CFC that relates to an extraordinary disposition account of a section 245A shareholder with respect to an SFC, and the section 245A shareholder satisfies the ownership requirement of paragraph (c)(5) of this section for the taxable year of the CFC, then, subject to the limitations in paragraphs (c)(6) and (7) of this section, the extraordinary disposition account is reduced (but not below zero) by the lesser of the following amounts (each determined in the functional currency of the CFC)—

(i) The excess (if any) of—

(A) The product of—

(*1*) The adjusted earnings of the CFC for the taxable year of the CFC; and

(*2*) The percentage of stock of the CFC (by value) that, in aggregate, is owned directly or indirectly through one or more specified entities by the section 245A shareholder and any domestic affiliates on the last day of the taxable year of the CFC; over

(B) The sum of—

(*1*) The sum of the balance of the section 245A shareholder's and any domestic affiliates' previously taxed earnings and profits accounts with respect to the CFC for purposes of section 959 (determined as of the end of the taxable year of the CFC and taking into account any adjustments to the accounts for the taxable year);

(*2*) The sum of the balance of the hybrid deduction accounts (as described in §1.245A(e)–1(d)(1)) with respect to shares of stock of the CFC that the section 245A shareholder and any domestic affiliates own (within the meaning of section 958(a), and determined by treating a domestic partnership as foreign) as of the end of the taxable year of the

CFC and taking into account any adjustments to the accounts for the taxable year; and

(*3*) The sum of the balance of the section 245A shareholder's and any domestic affiliates' extraordinary disposition accounts with respect to the CFC (determined as of the end of the taxable year of the CFC and taking into account any adjustments to the accounts for the taxable year). However, if the section 245A shareholder or a domestic affiliate has an RGI account with respect to the CFC that relates to an extraordinary disposition account with respect to the CFC, then only the excess, if any, of the balance of the extraordinary disposition account over the balance of the RGI account that relates to the extraordinary disposition account (determined as of the end of the taxable year of the CFC, but without regard to the application of paragraph (c)(4)(i)(B) of this section for the taxable year) is taken into account for purposes of this paragraph (c)(1)(i)(B)(*3*). In addition, for purposes of this paragraph (c)(1)(i)(B)(*3*), an extraordinary disposition account that but for paragraph (e)(1) of this section would be with respect to the CFC for purposes of this section is treated as an extraordinary disposition account with respect to the CFC and thus is taken into account for purposes of this paragraph (c)(1)(i)(B)(*3*).

(ii) The balance of the RGI account with respect to the CFC that relates to the section 245A shareholder's extraordinary disposition account with respect to the SFC (determined as of the end of the taxable year of the CFC, but without regard to the application of paragraph (c)(4)(i)(B) of this section for the taxable year).

(2) *Timing of reduction to extraordinary disposition account.* See §1.245A–9(b)(3) for timing rules regarding the reduction to an extraordinary disposition account.

(3) *Adjusted earnings.* The term *adjusted earnings* means, with respect to a CFC and a taxable year of the CFC, the earnings and profits of the CFC, determined as of the end of the CFC's taxable year (taking into account all distributions during the taxable year, and not taking into account any deficit in earnings and profits subject to §1.381(c)(2)–1(a)(5)) and with the adjustments described in paragraphs (c)(3)(i) through (iv) of this section.

(i) The earnings and profits are increased by the amount of any deduction or loss that—

(A) Is or was attributable to disqualified basis of an item of specified property, but only to the extent that gain recognized on the extraordinary disposition of the item of specified property was included in the initial balance of an extraordinary disposition account;

(B) Is or was allocated and apportioned to residual CFC gross income of the CFC (or a predecessor) solely by reason of §1.951A–2(c)(5)(i); and

(C) Does not or has not given rise to or increased a deficit in earnings and profits subject to §1.381(c)(2)–1(a)(5), determined as of the end of the taxable year of the CFC.

(ii) The earnings and profits are decreased by the amount by which any RGI account with respect to the CFC has been decreased pursuant to paragraph (c)(4)(i)(B) of this section for a prior taxable year of the CFC.

(iii) The earnings and profits are determined without regard to earnings attributable to income described in section 245(a)(5)(A) or dividends described in section 245(a)(5)(B) (determined without regard to section 245(a)(12)).

(iv) The earnings and profits are decreased by the amount of any deduction or loss that, but for paragraph (c)(3)(i)(C) of this section, would be described in paragraph (c)(3)(i) of this section.

(4) *RGI account*—(i) *In general.* For a taxable year of a CFC, the following rules apply to determine the balance of a section 245A shareholder's RGI account that is with respect to the CFC and that relates to an extraordinary disposition account of the section 245A shareholder with respect to an SFC:

(A) The balance of the RGI account is increased by the product of the amounts described in paragraphs (c)(4)(i)(A)(*1*) and (2) of this section for a taxable year of the CFC.

(*1*) The sum of the amounts of deductions and losses of the CFC that—

(*i*) Are attributable to disqualified basis of one or more items of specified property that correspond to the extraordinary disposition account; and

(*ii*) But for §1.951A–2(c)(5)(i), would have decreased one or more categories of the CFC's positive subpart F income, the CFC's tested income, or the CFC's ECTI, or increased or given rise to a tested loss or one or more qualified deficits of the CFC.

(*2*) The lesser of—

(*i*) A fraction (expressed as a percentage), the numerator of which is the sum of the portions of the CFC's subpart F income and tested income or tested loss (expressed as a positive number) taken into account under sections 951(a)(1)(A) and 951A(a) (as determined under the rules of §§1.951–1(b) and (e) and 1.951A–1(d)) by the section 245A shareholder and any domestic affiliates of the section 245A shareholder and the section 245A shareholder's and any domestic affiliates' pro rata shares of the CFC's qualified deficits (expressed as a positive number), and the denominator of which is the sum of the CFC's subpart F income, tested income or tested loss (expressed as a positive number), and qualified deficits (expressed as a positive number), but for purposes of this paragraph (c)(4)(i)(A)(*2*)(*i*) treating ECTI (expressed as a positive number) as if it were subpart F income; and

(*ii*) The extraordinary disposition ownership percentage applicable as to the section 245A shareholder's extraordinary disposition account.

(B) The balance of the RGI account is decreased to the extent that, by reason of the application of paragraph (c)(1) of this section with respect to the taxable year of the CFC, there is a reduction to the extraordinary disposition account of the section 245A shareholder.

(ii) *Successor rules for RGI accounts.* To the extent that an extraordinary disposition account of a section 245A shareholder is adjusted pursuant to §1.245A–5(c)(4), an RGI account of a CFC with respect to the extraordinary disposition account is adjusted in a similar manner.

(5) *Ownership requirement with respect to a CFC.* For a taxable year of a CFC, a section 245A shareholder satisfies the ownership requirement of this paragraph (c)(5) if, on the last day of the CFC's taxable year, the section 245A shareholder or a domestic affiliate is a United States shareholder with respect to the CFC.

(6) *Allocation of reductions among multiple extraordinary disposition accounts.* This paragraph (c)(6) applies if, by reason of the application of paragraph (c)(1) of this section with respect to a taxable year of a CFC (and but for the application of this paragraph (c)(6) and paragraph (c)(7) of this section), the sum of the reductions under paragraph (c)(1) of this section to two or more extraordinary disposition accounts of a section 245A shareholder or a domestic affiliate of the section 245A shareholder would exceed the amount described in paragraph (c)(1)(i)(A) of this section (the amount of such excess, the *excess amount*). When this paragraph (c)(6) applies, the reduction to each extraordinary disposition account described in the previous sentence is equal to the reduction that would occur but for this paragraph (c)(6) and paragraph (c)(7) of this section, less the product of the excess amount and a fraction, the numerator of which is the balance of the extraordinary disposition account, and the denominator of which is the sum of the balances of all of the extraordinary dispositions accounts described in the previous sentence. For purposes of determining this fraction, the balance of an extraordinary disposition account is determined as of the end of the taxable year of the section 245A shareholder or the domestic affiliate, as applicable, that includes the date on which the CFC's taxable year ends (and after the determination of any extraordinary disposition amounts or tiered extraordinary disposition amounts for the taxable year of the section 245A shareholder or the domestic affiliate, as applicable, and adjustments to the extraordinary disposition account for prior extraordinary disposition amounts).

(7) *Extraordinary disposition account not reduced below balance of basis benefit account.* An extraordinary disposition account of a section 245A shareholder cannot be reduced pursuant to paragraph (c)(1) of this section below the balance of the basis benefit account with respect to the extraordinary disposition account (determined when a

reduction to the extraordinary disposition account would occur under paragraph (c)(1) of this section).

(d) *Special rules for determining when specified property corresponds to an extraordinary disposition account*—(1) *Substituted property*—(i) *Treatment as specified property that corresponds to an extraordinary disposition account.* For purposes of this section, an item of substituted property is treated as an item of specified property that corresponds to an extraordinary disposition account to which the related item of specified property (that is, the item of specified property to which the item of substituted property relates, as described in paragraph (d)(1)(ii) of this section) corresponds. In addition, in a case in which an item of substituted property relates to an item of specified property that corresponds to a particular extraordinary disposition account and an item of specified property that corresponds to another extraordinary disposition account (such that, pursuant to this paragraph (d)(1)(i), the item of substituted property is treated as corresponding to multiple extraordinary disposition accounts), only the disqualified basis of the item of substituted property attributable to the first item of specified property is taken into account for purposes of applying this section as to the first extraordinary disposition account, and, similarly, only the disqualified basis of the item of substituted property attributable to the second item of specified property is taken into account for purposes of applying this section as to the second extraordinary disposition account.

(ii) *Definition of substituted property.* The term *substituted property* means an item of property the disqualified basis of which is, pursuant to §1.951A–3(h)(2)(ii)(B)(*2*)(*i*) or (*iii*), increased by reason of a reduction under §1.951A–3(h)(2)(ii)(*B*)(*1*) in disqualified basis of an item of specified property. An item of substituted property relates to an item of specified property if the disqualified basis of the item of substituted property was increased by reason of a reduction in disqualified basis of the item of specified property.

(2) *Exchanged basis property*—(i) *Treatment as specified property that corresponds to an extraordinary disposition account for certain purposes.* For purposes of this section, an item of exchanged basis property is treated as an item of specified property that corresponds to an extraordinary disposition account to which the related item of specified property (that is, the item of specified property to which the item of exchanged basis property relates) corresponds.

(ii) *Definition of exchanged basis property.* The term *exchanged basis property* means an item of property the disqualified basis of which, pursuant to §1.951A–3(h)(2)(ii)(B)(*2*)(*ii*), includes disqualified basis of an item of specified property. An item of exchanged basis property relates to an item of specified property if the disqualified basis of the item of exchanged basis property includes disqualified basis of the item of specified property.

(iii) *Definition of duplicate DQB*—(A) *In general.* The term *duplicate DQB* means, with respect to an item of exchanged basis property and the item of specified property to which the exchanged basis property relates, the disqualified basis of the item of exchanged basis property that includes or is attributable to disqualified basis of the item of specified property.

(B) *Certain nonrecognition transfers involving stock or a partnership interest.* To the extent that an item of exchanged basis property that is stock or an interest in a partnership (*lower-tier item*) includes disqualified basis of an item of specified property to which the lower-tier item relates (*contributed item*), and another item of exchanged basis property that is stock or a partnership interest (*upper-tier item*) includes disqualified basis of the lower-tier item that is attributable to disqualified basis of the contributed item, the disqualified basis of the upper-tier item is attributable to disqualified basis of the contributed item and the upper-tier item is an item of exchanged basis property that relates to the contributed item. The principles of the preceding sentence apply each time disqualified basis of an item of exchanged basis property that is stock or an interest in a partnership is included in disqualified basis of another item of exchanged basis property that is stock or an interest in a partnership.

(C) *Multiple nonrecognition transfers of an item of specified property.* To the extent that multiple items of exchanged basis property that are stock or interests in a partnership include disqualified basis of the same item of specified property (*contributed item*) to which the items of exchanged basis property relate, and the issuer of one of the items of exchanged basis property (*upper-tier successor item*) receives the other item of exchanged basis property (*lower-tier successor item*) in exchange for the contributed property, the disqualified basis of the upper-tier successor item is attributable to disqualified basis of the lower-tier successor item and the upper-tier successor item is an item of exchanged basis property that relates to the lower-tier successor item. The principles of the preceding sentence apply each time disqualified basis of an item of specified property to which an item of exchanged basis property that is stock or an interest in partnership relates is included in disqualified basis of another item of exchanged basis property that is stock or an interest in a partnership.

(e) *Special rules when extraordinary disposition accounts are adjusted pursuant to §1.245A–5(c)(4)*—(1) *Extraordinary disposition account with respect to multiple SFCs.* This paragraph (e)(1) applies if, pursuant to §1.245A–5(c)(4)(ii) or (iii) (the transaction or transactions by reason of which §1.245A–5(c)(4)(ii) or (iii) applies, the *adjustment transaction*), an extraordinary disposition account of a section 245A shareholder with respect to an SFC (such extraordinary disposition account, the *transferor ED account;* and such SFC, the *transferor SFC*) gives rise to an increase in the balance of an extraordinary disposition account with respect to another SFC (such extraordinary disposition account, the *transferee ED account;* such SFC, the *transferee SFC;* and such increase, the *adjustment amount*). When this paragraph (e)(1) applies, the following rules apply for purposes of this section:

(i) A ratable portion of the transferee ED account is treated as retaining its status as an extraordinary disposition account with respect to the transferor SFC and is not treated as an extraordinary disposition account with respect to the transferee SFC (the transferee ED account to such extent, the *deemed transferor ED account*), based on the adjustment amount relative to the balance of the transferee ED account (without regard to this paragraph (e)(1)) immediately after the adjustment transaction. Thus, for example, whether or not the transferor SFC is in existence immediately after the transaction, the items of specified property that correspond to the deemed transferor ED account are the same as the items of specified property that correspond to the transferor ED account. As an additional example, whether or not the transferor SFC is in existence immediately after the transaction the extraordinary disposition ownership percentage with respect to the deemed transferor ED account is the same as the extraordinary disposition ownership percentage with respect to the transferor ED account (except to the extent the extraordinary disposition ownership percentage is adjusted pursuant to the rules of paragraph (e)(2) of this section).

(ii) In the case of an amount (such as an extraordinary disposition amount or tiered extraordinary disposition amount) determined by reference to the transferee ED account (without regard to this paragraph (e)(1)), the portion of the amount that is considered attributable to the deemed transferor ED account (and not the transferee ED account) is equal to the product of such amount and a fraction, the numerator of which is the balance of the deemed transferor ED account, and the denominator of which is the balance of the transferee ED account (determined without regard to this paragraph (e)(1)). Thus, for example, if after an adjustment transaction the transferee ED account (without regard to this paragraph (e)(1)) gives rise to an extraordinary disposition amount, and if the fraction (expressed as a percentage) is 40, then, for purposes of this section, 40 percent of the extraordinary disposition amount is treated as attributable to the deemed transferor ED account and the remaining 60 percent of the extraordinary disposition amount is attributable to the transferee ED account, and the balance of each of the deemed transferor ED account and the transferee ED account is correspondingly reduced.

(2) *Extraordinary disposition accounts with respect to a single SFC.* If an extraordinary disposition account of a section 245A shareholder with respect to an SFC is reduced by reason of §1.245A–5(c)(4), then, except as provided in paragraph (e)(1) of this section, for purposes of this section, the extraordinary disposition ownership percentage as to the extraordinary disposition account (as well as the extraordinary disposition ownership percentage as to any extraordinary disposition account with respect to the SFC that is increased by reason of the reduction) is adjusted in a similar manner.

[T.D. 9934, 85 FR 76963, Dec. 1, 2020]

§ 1.245A–9 Other rules and definitions.

(a) *In general.* This section provides rules of general applicability for purposes of §§1.245A–6 through 1.245A–10, a transition rule to revoke an election to eliminate disqualified basis, and definitions.

(b) *Rules of general applicability*—(1) *Correspondence.* An item of specified property corresponds to a section 245A shareholder's extraordinary disposition account if gain was recognized on the extraordinary disposition of the item and the gain was taken into account in determining the initial balance of the account. See §1.245A–8(d) for additional rules regarding when an item of property is treated as corresponding to an extraordinary disposition account in certain complex cases.

(2) *Timing rules related to disqualified basis for purposes of applying §§1.245A–7(b) and 1.245A–8(b)*—(i) *Determination of disqualified basis.* For purposes of determining the fraction described in §1.245A–7(b)(1)(ii) or §1.245A–8(b)(1)(ii) when applying §1.245A–7(b)(1) or §1.245A–8(b)(1)(ii), respectively, for a taxable year of a section 245A shareholder, disqualified basis of an item of specified property is determined as of the beginning of the taxable year of the CFC that holds the item of specified property (in a case in which §1.245A–7(b) applies) or the specified property owner (in a case in which §1.245A–8(b) applies), in either case, that includes the date on which the section 245A shareholder's taxable year ends (and without regard to any reductions to the disqualified basis of the item of specified property pursuant to §1.245A–7(b)(1) or §1.245A–8(b)(1) for such taxable year of the CFC or the specified property owner, as applicable). However, if disqualified basis of the item of specified property arose as a result of an extraordinary disposition that occurred after the beginning of the taxable year of the CFC or the specified property owner described in the preceding sentence, then the disqualified basis of the item of specified property is determined as of the date on which the extraordinary disposition occurred (and without regard to any reductions to the disqualified basis of the item of specified property pursuant to paragraph (b)(1) of this section for such taxable year of the CFC or the specified property owner).

(ii) *Reduction to disqualified basis of an item of specified property.* The reduction to disqualified basis of an item of specified property pursuant to §1.245A–7(b)(1) or §1.245A–8(b)(1) occurs on the date described in paragraph (b)(2)(i) of this section.

(iii) *Definition of specified property owner.* For purposes of applying §1.245A–8(b)(1) and paragraphs (b)(2)(i) and (ii) of this section for a taxable year of a section 245A shareholder, the term *specified property owner* means, with respect to an item of specified property, the person that, on at least one day of the taxable year of the person that includes the date on which the section 245A shareholder's taxable year ends, held the item of specified property. However, if, but for this sentence, there would be more than one specified property owner with respect to the item of specified property, then the specified property owner is the person that held the item of specified property on the earliest date that falls within the section 245A shareholder's taxable year.

(3) *Timing rules for reducing an extraordinary disposition account under §§1.245A–7(c) and 1.245A–8(c).* For purposes of §1.245A–7(c)(1) or §1.245A–

8(c)(1), as applicable, with respect to a taxable year of a CFC, the reduction to an extraordinary disposition account pursuant to § 1.245A–7(c)(1) or § 1.245A–8(c)(1) occurs as of the end of the taxable year of the section 245A shareholder that includes the date on which the CFC's taxable year ends (and after the determination of any extraordinary disposition amounts or tiered extraordinary amounts, adjustments to the extraordinary disposition account for prior extraordinary disposition amounts, and the application of § 1.245A–7(b) or § 1.245A–8(b), as applicable, each for the taxable year of the section 245A shareholder).

(4) *Currency translation.* For purposes of applying §§ 1.245A–7(b) and 1.245A–8(b), the disqualified basis of (and, if applicable, a basis benefit amount with respect to) an item of specified property that corresponds to an extraordinary disposition account are translated (if necessary) into the functional currency in which the extraordinary disposition account is maintained, using the spot rate on the date the extraordinary disposition occurred. A reduction in disqualified basis of an item of specified property determined under § 1.245A–7(b)(1) or § 1.245A–8(b)(1) is translated (if necessary) into the functional currency in which the disqualified basis of the item of specified property is maintained, and a reduction in an extraordinary disposition account determined under § 1.245A–7(c) or § 1.245A–8(c) section is translated (if necessary) into the functional currency in which the extraordinary disposition account is maintained, in each case using the spot rate described in the preceding sentence.

(5) *Anti-avoidance rule.* Appropriate adjustments are made pursuant to this paragraph (b)(5), including adjustments that would disregard a transaction or arrangement in whole or in part, to any amounts determined under (or subject to application of) this section if a transaction or arrangement is engaged in with a principal purpose of avoiding the purposes of §§ 1.245A–6 through 1.245A–10.

(c) *Transition rule to revoke election to eliminate disqualified basis*—(1) *In general.* This paragraph (c)(1) applies to an election that is filed, pursuant to § 1.951A–3(h)(2)(ii)(B)(*3*), to eliminate the disqualified basis of an item of specified property. An election to which this paragraph (c)(1) applies may be revoked if, on or before March 1, 2021—

(i) All controlling domestic shareholders (as defined in § 1.964–1(c)(5)) of the CFC (or, in the case of an election made by a partnership, the partnership) each attach a revocation statement (in the manner described in paragraph (c)(2) of this section) to an amended return, for the taxable year to which the election applies, that revokes the election (or, in the case of a partnership subject to subchapter C of chapter 63 of the Internal Revenue Code, requests administrative adjustment under section 6227); and

(ii) The controlling domestic shareholders (or the partnership) each file an amended tax return, for any other taxable years reflecting the election to eliminate the disqualified basis, that reflects the election having been revoked (or, in the case of a partnership subject to subchapter C of chapter 63, requests administrative adjustment under section 6227).

(2) *Revocation statement.* Except as otherwise provided in publications, forms, instructions, or other guidance, a revocation statement attached by a person to an amended tax return must include the person's name, taxpayer identification number, and a statement that the revocation statement is filed pursuant to paragraph (c)(1) of this section to revoke an election pursuant to § 1.951A–3(h)(2)(ii)(B)(*3*). In addition, the revocation statement must be filed in the manner prescribed in publications, forms, instructions, or other guidance.

(d) *Definitions.* In addition to the definitions in § 1.245A–5, the following definitions apply for purposes of §§ 1.245A–6 through 1.245A–11.

(1) The term *adjusted earnings* has the meaning provided in § 1.245A–7(c)(3) or § 1.245A–8(c)(3), as applicable.

(2) The term *basis benefit account* has the meaning provided in § 1.245A–8(b)(4)(i).

(3) The term *basis benefit amount* has the meaning provided in § 1.245A–8(b)(4)(ii).

(4) The term *disqualified basis* has the meaning provided in § 1.951A–3(h)(2)(ii).

(5) The term *domestic affiliate* means, with respect to a section 245A shareholder, a domestic corporation that is a related party with respect to the section 245A shareholder. *See also* § 1.245A–5(i)(19) (defining related party).

(6) The term *duplicate DQB* has the meaning provided in § 1.245A–8(d)(2)(iii).

(7) The term *ECTI* means, with respect to a taxable year of a specified foreign person, the taxable income (or loss) of the specified foreign person determined by taking into account only items of income and gain that are, or are treated as, effectively connected with the conduct of a trade or business in the United States (as described in § 1.882–4(a)(1)) and are not exempt from U.S. tax pursuant to a treaty obligation of the United States, and items of deduction and loss that are allocated and apportioned to such items of income and gain.

(8) The term *exchanged basis property* has the meaning provided in § 1.245A–8(d)(2)(ii).

(9) The term *qualified deficit* has the meaning provided in section 952(c)(1)(B)(ii).

(10) The term *qualified related party* has the meaning provided in § 1.245A–8(b)(3)(ii).

(11) The term *RGI account* means, with respect to a CFC and an extraordinary disposition account of a section 245A shareholder with respect to an SFC, an account of the section 245A shareholder with respect to an SFC (the initial balance of which is zero), adjusted at the end of each taxable year of the CFC pursuant to the rules of § 1.245A–7(c)(4) or § 1.245A–8(c)(4), as applicable. The RGI account must be maintained in the functional currency of the CFC.

(12) The term *specified foreign person* means a nonresident alien individual (as defined in section 7701(b) and the regulations under section 7701(b)) or a foreign corporation (including a CFC) that conducts, or is treated as conducting, a trade or business in the United States (as described in § 1.882–4(a)(1)).

(13) The term *specified property owner* has the meaning provided in § 1.245A–8(b)(2)(iii).

(14) The term *subpart F income* has the meaning provided in section 952(a).

(15) The term *substituted property* has the meaning provided in § 1.245A–8(d)(1)(ii).

(16) The term *tested income* has the meaning provided in section 951A(c)(2)(A).

(17) The term *tested loss* has the meaning provided in section 951A(c)(2)(B).

[T.D. 9934, 85 FR 76963, Dec. 1, 2020]

§ 1.245A–10 Examples.

(a) *Scope*. This section provides examples illustrating the application of §§ 1.245A–6 through 1.245A–9.

(b) *Presumed facts*. For purposes of the examples in the section, except as otherwise stated, the following facts are presumed:

(1) US1 and US2 are both domestic corporations that have calendar taxable years.

(2) CFC1, CFC2, CFC3, and CFC4 are all SFCs and CFCs that have taxable years ending November 30.

(3) Each entity uses the U.S. dollar as its functional currency.

(4) There are no items of deduction or loss attributable to an item of specified property.

(5) Absent the application of § 1.245A–5, any dividends received by US1 from CFC1 would meet the requirements to qualify for the section 245A deduction.

(6) All dispositions of items of specified property by an SFC during a disqualified period of the SFC to a related party give rise to an extraordinary disposition.

(7) None of the CFCs have a deficit subject to § 1.381(c)(2)–1(a)(5), and none of the CFCs are engaged in the conduct of a trade or business in the United States (and therefore none of the CFCs have ECTI).

(8) There is no previously taxed earnings and profits account with respect to any CFC for purposes of section 959. In addition, each hybrid deduction account with respect to a share of stock of a CFC has a zero balance at all times. Further, there is no extraordinary disposition account with respect to any CFC.

(9) Under § 1.245A–11(b), taxpayers choose to apply §§ 1.245A–6 through 1.245A–11 to the relevant taxable years.

(c) *Examples*—(1) *Example 1. Reduction of disqualified basis under rule for simple cases by reason of dividend paid out of extraordinary disposition account*—(i) *Facts.* US1 owns 100% of the single class of stock of CFC1 and CFC2. On November 30, 2018, in a transaction that is an extraordinary disposition, CFC1 sells two items of specified property, Item 1 and Item 2, to CFC2 in exchange for $150x of cash (the ''Disqualified Transfer''). Item 1 is sold for $90x and Item 2 is sold for $60x. Item 1 and Item 2 each has a basis of $0 in the hands of CFC1 immediately before the Disqualified Transfer, and therefore CFC1 recognizes $150x of gain as a result of the Disqualified Transfer ($150× − $0). After the Disqualified Transfer, CFC2's only assets are Item 1 and Item 2. On November 30, 2018, and thus during US1's taxable year ending December 31, 2018, CFC1 distributes $150x of cash to US1, and all of the distribution is characterized as a dividend under section 301(c)(1) and treated as a distribution out of earnings and profits described in section 959(c)(3). For CFC1's taxable year ending on November 30, 2018, CFC1 has $160x of earnings and profits described in section 959(c)(3), without regard to any distributions during the taxable year. CFC2 continues to hold Item 1 and Item 2. Lastly, because the conditions of §1.245A–6(b)(1) and (2) are satisfied for US1's 2018 taxable year, US1 chooses to apply §1.245A–7 (rules for simple cases) in lieu of §1.245A–8 (rules for complex cases) for that taxable year.

(ii) *Analysis*—(A) *Application of §§1.245A–5 and 1.951A–2 as a result of the Disqualified Transfer.* As a result of the Disqualified Transfer, under §1.951A–2(c)(5), Item 1 has disqualified basis of $90x, and Item 2 has disqualified basis of $60x. In addition, as a result of the Disqualified Transfer, under §1.245A–5(c)(3)(i)(A), US1 has an extraordinary disposition account with respect to CFC1 with an initial balance of $150x. Under §1.245A–5(c)(2)(i), $10x of the dividend is considered paid out of non-extraordinary disposition E&P of CFC1 with respect to US1, and $140x of the dividend is considered paid out of US1's extraordinary disposition account with respect to CFC1 to the extent of the balance of the extraordinary disposition account ($150x). Thus, the dividend of $150x is an extraordinary disposition amount, within the meaning of §1.245A–5(c)(1), to the extent of $140x. As a result, the balance of the extraordinary disposition account is reduced to $10x ($150× − $140x).

(B) *Correspondence requirement.* Under §1.245A–9(b)(1), each of Item 1 and Item 2 corresponds to US1's extraordinary disposition account with respect to CFC1, because as a result of the Disqualified Transfer CFC1 recognized gain with respect to Item 1 and Item 2, and the gain was taken into account in determining the initial balance of US1's extraordinary disposition account with respect to CFC1.

(C) *Reduction of disqualified basis of Item 1.* Because Item 1 corresponds to US1's extraordinary disposition account, the disqualified basis of Item 1 is reduced pursuant to §1.245A–7(b)(1) by reason of US1's $140x extraordinary disposition amount for US1's 2018 taxable year. Paragraphs (c)(2)(ii)(C)(*1*) through (*3*) of this section describe the determinations pursuant to §1.245A–7(b)(1).

(*1*) To determine the reduction to the disqualified basis of Item 1, the disqualified basis of Item 1, as well as the disqualified basis of Item 2, must be determined as of the date described in §1.245A–9(b)(2)(i) (and before the application of §1.245A–7(b)(1)). *See* §1.245A–7(b)(1)(ii). For each of Item 1 and Item 2, that date is December 1, 2018. December 1, 2018, is the first day of the taxable year of CFC2 (the CFC that holds Item 1 and Item 2) beginning on December 1, 2018, which is the taxable year of CFC2 that includes December 31, 2018, the date on which US1's 2018 taxable year ends. *See* §1.245A–9(b)(2)(i).

(*2*) Pursuant to §1.245A–7(b)(1), the disqualified basis of Item 1 is reduced by $84x, computed as the product of—

(*i*) $140x, the extraordinary disposition amount; and

(*ii*) A fraction, the numerator of which is $90x (the disqualified basis of Item 1 on December 1, 2018, and before the application of §1.245A–7(b)(1)), and the denominator of which is $150x (the disqualified basis of Item 1, $90x, plus the disqualified basis of Item 2, $60x, in each case determined on December 1, 2018, and before the application of §1.245A–7(b)(1)). *See* §1.245A–7(b)(1).

(*3*) The $84x reduction to the disqualified basis of Item 1 occurs on December 1, 2018, the date on which the disqualified basis of Item 1 is determined for purposes of determining the reduction pursuant to §1.245A–7(b)(1). *See* §1.245A–9(b)(2)(ii).

(D) *Reduction of disqualified basis of Item 2.* For reasons similar to those described in paragraph (c)(2)(ii)(C) of this section, on December 1, 2018, the disqualified basis of Item 2 is reduced by $56x, the amount equal to the product of $140x, the extraordinary disposition amount, and a fraction, the numerator of which is $60x (the disqualified basis of Item 2 on December 1, 2018, and before the application of §1.245A–7(b)(1)), and the denominator of which is $150x (the disqualified basis of Item 1, $90x, plus the disqualified basis of Item 2, $60x, in each case determined on December 1, 2018, and before the application of §1.245A–7(b)(1)).

(2) *Example 2. Basis benefit amount and impact on reduction to disqualified basis under rule for complex cases*—(i) *Facts.* The facts are the same as in paragraph (c)(1)(i) of this section (*Example 1*) (and the results are the same as in paragraph (c)(1)(ii)(A) of this section), except that, on December 1, 2018, CFC2

sells Item 1 for $90x of cash to an individual that is not a related party with respect to US1 or CFC2 (such transaction, the ''Sale,'' and such individual, ''Individual A''). At the time of the Sale, CFC2's basis in Item 1 is $90x (all of which is disqualified basis, as described in §1.951A–3(h)(2)(ii)(A)). CFC2 takes into the account the disqualified basis of Item 1 for purposes of determining the amount of gain recognized on the Sale, which is $0 ($90x − $90x); but for the disqualified basis, CFC2 would have had $90x of gain that would have been taken into account in computing its tested income. As a result of the Sale, the condition of §1.245A–6(b)(2) is not satisfied, because on at least one day of CFC2's taxable year beginning on December 1, 2018 (which begins within US1's 2018 taxable year) CFC2 does not hold Item 1. *See* §1.245A–6(b)(2)(ii)(C)(*1*). US1 therefore applies §1.245A–8 (rules for complex cases) for its 2018 taxable year. *See* §1.245A–6(b).

(ii) *Analysis*—(A) *Ownership requirement.* With respect to each of Item 1 and Item 2, the ownership requirement of §1.245A–8(b)(3)(i) is satisfied for US1's 2018 taxable year. This is because on at least one day that falls within US1's 2018 taxable year, each of Item 1 and Item 2 is held by CFC2, and US1 directly owns all of the stock of CFC2 throughout such taxable year (and thus, for purposes of applying §1.245A–8(b)(3)(i), US1 owns at least 10% of the interests of CFC2 on at least one day that falls within such taxable year). *See* §1.245A–8(b)(3).

(B) *Basis benefit amount with respect to Item 1 as a result of the Sale.* Under §1.245A–8(b)(4)(i), US1 has a basis benefit account with respect to its extraordinary disposition account with respect to CFC1. As described in paragraphs (c)(2)(ii)(B)(*1*) through (*3*) of this section, the balance of the basis benefit account (which is initially zero) is, on December 31, 2018, increased by $90x, the basis benefit amount with respect to Item 1 and assigned to US1's 2018 taxable year.

(*1*) By reason of the Sale, for CFC2's taxable year beginning December 1, 2018, and ending November 30, 2019, the entire $90x of disqualified basis of Item 1 is taken into account for U.S. tax purposes by CFC2 and, as a result, reduces CFC2's tested income or increases CFC2's tested loss. Accordingly, for such taxable year, there is a $90x basis benefit amount with respect to Item 1. *See* §1.245A–8(b)(4)(ii)(A). The result would be the same if the Sale were to a related person and thus, pursuant to §1.951A–3(h)(2)(ii)(B)(*1*)(*ii*), no portion of the $90x of disqualified basis were eliminated or reduced by reason of the Sale. *See* §1.245A–8(b)(4)(ii)(B).

(*2*) The $90x basis benefit amount with respect to Item 1 is assigned to US1's 2018 taxable year. This is because the ownership requirement of §1.245A–8(b)(3)(i) is satisfied with respect to Item 1 for US1's 2018 taxable year, and the basis benefit amount occurs in CFC2's taxable year beginning December 1, 2018, a taxable year of CFC2 that begins within US1's 2018 taxable year (and, but for §1.245A–8(b)(4)(iii)(A)(*2*)(*ii*), the basis benefit amount would not be assigned to a taxable year of US1, such as the taxable year of US1 beginning January 1, 2019, given that, as result of the Sale, the ownership requirement of §1.245A–8(b)(3)(i) would not be satisfied with respect to Item 1 for such taxable year). *See* §1.245A–8(b)(4)(iii)(A).

(*3*) On December 31, 2018 (the last day of US1's 2018 taxable year), US1's basis benefit account with respect to its extraordinary disposition account with respect to CFC1 is increased by $90x, the $90x basis benefit amount with respect to Item 1 and assigned to US1's 2018 taxable year. The basis benefit account is increased by such amount because Item 1 corresponds to US1's extraordinary disposition account with respect to CFC1, and the extraordinary disposition ownership percentage applicable to such extraordinary disposition account is 100. *See* §1.245A–8(b)(4)(i)(A).

(C) *Basis benefit amount limitation on reduction to disqualified basis.* By reason of US1's $140x extraordinary disposition amount for US1's 2018 taxable year, the disqualified basis of Item 1 is reduced by $30x, and the disqualified basis of Item 2 is reduced by $20x, pursuant to §1.245A–8(b)(1). *See* §1.245A–8(b). Paragraphs (c)(2)(ii)(C)(*1*) through (*4*) of this section describe the determinations pursuant to §1.245A–8(b)(1).

(*1*) For purposes of determining the reduction to the disqualified bases of Item 1 and Item 2, the disqualified bases of the Items are determined on December 1, 2018 (and before the application of §1.245A–8(b)(1)). *See* §1.245A–8(b)(1)(ii). The disqualified bases of the Items are determined on December 1, 2018, because that date is the first day of the taxable year of CFC2 beginning on December 1, 2018, which is the taxable year of CFC2 (the specified property owner of each of Item 1 and Item 2) that includes December 31, 2018, the date on which US1's 2018 taxable year ends. *See* §1.245A–8(b)(2)(i). For purposes of applying §§1.245A–8(b)(1) and §1.245A–9(b)(2) for US1's 2018 taxable year, CFC2 is the specified property owner of each of Item 1 and Item 2 because, on at least one day of CFC2's taxable year that includes the date on which US1's 2018 taxable year ends (that is, on at least one day of CFC2's taxable year beginning December 1, 2018), CFC2 held the Item. *See* §1.245A–9(b)(2)(iii). CFC2 is the specified property owner of Item 1 even though Individual A also held Item 1 during Individual A's taxable year that includes the date on which US1's 2018 taxable year ends because CFC2 held Item 1 on an earlier date than Individual A. *See* §1.245A–9(b)(2)(iii).

(*2*) Pursuant to §1.245A–8(b)(1), the disqualified basis of Item 1 is reduced by $30x, computed as the product of—

(*i*) $50x, the excess of the extraordinary disposition amount ($140x) over the balance of the basis benefit account with respect to US1's extraordinary disposition with respect to CFC1 ($90x); and

(*ii*) A fraction, the numerator of which is $90x (the disqualified basis of Item 1 on December 1, 2018, and before the application of §1.245A–8(b)(1)), and the denominator of which is $150x (the disqualified basis of Item 1, $90x, plus the disqualified basis of Item 2, $60x, in each case determined on December 1, 2018, and before the application of §1.245A–8(b)(1)). *See* paragraph §1.245A–8(b)(1).

(*3*) Pursuant to §1.245A–8(b)(1), the disqualified basis of Item 2 is reduced by $20x, computed as the product of—

(*i*) $50x, the excess of the extraordinary disposition amount ($140x) over the balance of the basis benefit account with respect to US1's extraordinary disposition with respect to CFC1 ($90x); and

(*ii*) A fraction, the numerator of which is $60x (the disqualified basis of Item 2 on December 1, 2018, and before the application of paragraph (b)(1) of this section), and the denominator of which is $150x (the disqualified basis of Item 1, $90x, plus the disqualified basis of Item 2, $60x, in each case determined on December 1, 2018, and before the application of §1.245A–8(b)(1)). *See* §1.245A–8(b)(1).

(*4*) The $30x and $20x reductions to the disqualified bases of Item 1 and Item 2, respectively, occur on December 1, 2018, the date on which the disqualified bases of the Items are determined for purposes of determining the reductions pursuant to §1.245A–8(b)(1). *See* §1.245A–9(b)(2)(ii).

(D) *Reduction of basis benefit account.* The balance of the basis benefit account with respect to US1's extraordinary disposition account with respect to CFC1 is decreased by $90x, the amount by which, for CFC2's taxable year beginning December 1, 2018, the disqualified bases of Item 1 and Item 2 would have been reduced pursuant to §1.245A–8(b)(1) but for the $90x balance of the basis benefit account. *See* §1.245A–8(b)(4)(i)(B). The reduction to the balance of the basis benefit account occurs on December 31, 2018, and after the completion of all other computations pursuant to §1.245A–8(b). *See* §1.245A–8(b)(4)(i)(B).

(3) *Example 3. Reduction in balance of extraordinary disposition account under rules for simple cases by reason of allocation and apportionment of deductions to residual CFC gross income*—(i) *Facts.* The facts are the same as in paragraph (c)(1)(i) of this section (*Example 1*) (and the results are the same as in paragraph (c)(1)(ii)(A) of this section), except that CFC1 does not make a distribution to US1. In addition, during CFC2's taxable year beginning December 1, 2018, and ending November 30, 2019, the disqualified basis of Item 1 gives rise to a $6x amortization deduction, and the disqualified basis of Item 2 gives rise to a $4x amortization deduction, and each of the amortization deductions is allocated and apportioned to residual CFC gross income of CFC2 solely by reason of §1.951A–2(c)(5) (though, but for §1.951A–2(c)(5), would have been allocated and apportioned to gross tested income of CFC2). Further, as of the end of CFC2's taxable year ending November 30, 2019, CFC2 has $15x of earnings and profits. Lastly, because the conditions of §1.245A–6(b)(1) and (2) are satisfied for US1's 2018 taxable year, US1 chooses to apply §1.245A–7 (rules for simple cases) in lieu of §1.245A–8 (rules for complex cases) for that taxable year.

(ii) *Analysis.* Pursuant to §1.245A–7(c)(1), US1's extraordinary disposition account with respect to CFC1 is reduced by the lesser of the amount described in §1.245A–7(c)(1)(i) with respect to US1, and the RGI account of US1 with respect to CFC2 that relates to its extraordinary disposition account with respect to CFC1. *See* §1.245A–7(c)(1). Paragraphs (c)(3)(ii)(A) through (D) of this section describe the determinations pursuant to §1.245A–8(c)(1).

(A) *Computation of adjusted earnings of CFC2, and amount described in §1.245A–7(c)(1)(i) with respect to US1.* To determine the amount described in §1.245A–7(c)(1)(i) with respect to US1, the adjusted earnings of CFC2 must be computed for CFC2's taxable year ending November 30, 2019. *See* §1.245A–7(c)(1)(i). Paragraphs (c)(3)(ii)(A)(*1*) and (*2*) of this section describe these determinations.

(*1*) The adjusted earnings of CFC2 for its taxable year ending November 30, 2019, is $25x, computed as $15x (CFC2's earnings and profits as of November 30, 2019, the last day of that taxable year), plus $10x (the sum of the $6x and $4x amortization deductions of CFC2 for that taxable year, which is the amount of all deductions or losses of CFC2 that is or was attributable to disqualified basis of items of specified property and allocated and apportioned to residual CFC gross income of CFC2 solely by reason of §1.951A–2(c)(5)(i)). *See* §1.245A–7(c)(3).

(*2*) For CFC2's taxable year ending November 30, 2019, the amount described in §1.245A–7(c)(1)(i) with respect to US1 is $25x, computed as the excess of $25x (the adjusted earnings) over $0 (the sum of the balance of the previously taxed earnings and profits accounts with respect to CFC2).

(B) *Increase to balance of RGI account.* Under §1.245A–9(d)(11), US1 has an RGI account with respect to CFC2 that relates to its extraordinary disposition account with respect to CFC1. On November 30, 2019 (the last day of CFC2's taxable year), the balance of the RGI account (which is initially zero) is increased by $10x, the sum of the $6x and $4x amortization deductions of CFC2 for its taxable year ending November 30, 2019. *See* §1.245A–7(c)(4)(i). Each of the amortization deductions is taken into account for this purpose because, but for §1.951A–2(c)(5)(i), the deduction would have decreased CFC2's tested income or increased or given rise to a tested loss of CFC2. *See* §1.245A–7(c)(4)(i).

(C) *Reduction in balance of extraordinary disposition account.* Pursuant to §1.245A–7(c)(1), US1's extraordinary disposition account with respect to CFC1 is reduced by $10x, the lesser of the amount described in §1.245A–7(c)(1)(i) with respect to US1 for CFC2's taxable year ending November 30, 2019 ($25x), and the balance of US1's RGI account with respect to CFC2 that relates to its extraordinary disposition account with respect to CFC1 ($10x, determined as of November 30, 2019, but without regard to the application of §1.245A–7(c)(4)(ii) for the taxable year of CFC2 ending on that date). *See* §1.245A–7(c)(1). The $10x reduction in the balance of US1's extraordinary disposition account occurs on December 31, 2019, the last day of US1's taxable year that includes November 30, 2019 (the last day of CFC2's taxable year). *See* §1.245A–9(c)(3).

(D) *Reduction in balance of RGI account.* On November 30, 2019 (the last day of CFC2's taxable year), the balance of US1's RGI account with respect to CFC2 that relates to its extraordinary disposition account with respect to CFC1 is decreased by $10x, the amount of the reduction, pursuant to §1.245A–7(c)(1) section and by reason of the RGI account, to US1's extraordinary disposition account with respect to CFC1. *See* §1.245A–7(c)(4)(ii). Therefore, following that reduction, the balance of the RGI account is zero ($10x − $10x).

(iii) *Alternative facts in which the reduction is limited by earnings and profits.* The facts are the same as in paragraph (c)(3)(i) of this section (*Example 3*), except that CFC2 has a $5x deficit in its earnings and profits as of the end of its taxable year ending November 30, 2019. In this case—

(A) The adjusted earnings of CFC2 for its taxable year ending November 30, 2019, is $5x, computed as −$5x (CFC2's deficit in earnings and profits as of November 30, 2019) plus $10x (the sum of the $6x and $4x amortization deductions of CFC2), *see* §1.245A–7(c)(3);

(B) The amount described in §1.245A–7(c)(1)(i) with respect to US1 for CFC's taxable year ending November 30, 2019, is $5x, computed as the excess of $5x (the adjusted earnings) over $0 (the sum of the balance of the previously taxed earnings and profits accounts with respect to CFC2), *see* §1.245A–7(c)(1)(i);

(C) On December 31, 2019, US1's extraordinary disposition account with respect to CFC1 is reduced by $5x, the lesser of the amount described in §1.245A–7(c)(1)(i) with respect to US1 for CFC2's taxable year ending November 30, 2019 ($5x), and the balance of US1's RGI account with respect to CFC2 that relates to its extraordinary disposition account with respect to CFC1 ($10x, determined as of November 30, 2019, but without regard to the application of §1.245A–8(c)(4)(i)(B) for the taxable year of CFC2 ending on that date), *see* §§1.245A–7(c)(1) and 1.245A–9(c)(3); and

(D) On November 30, 2019 (the last day of CFC2's taxable year), the balance of US1's RGI account with respect to CFC2 is decreased by $5x (the amount of the reduction, pursuant to §1.245A–7(c)(1) and by reason of the RGI account, to US1's extraordinary disposition account with respect to CFC1) and, therefore, following such reduction, the balance of the RGI account is $5x ($10x − $5x), *see* §1.245A–7(c)(4)(ii).

(4) *Example 4. Reduction to extraordinary disposition accounts limited by §1.245A–8(c)(6)*—(i) *Facts.* The facts are the same as in paragraph (c)(3)(iii) of this section (*Example 3,* alternative facts in which the reduction is limited by earnings and profits) (and the results are the same as in paragraph (c)(1)(ii)(A) of this section), except that US1 also owns 100% of the stock of US2, which owns 100% of the stock of CFC3, and on November 30, 2018, in a transaction that was an extraordinary disposition, CFC3 sold an item of specified property (''Item 3'') to CFC2 in exchange for $200x of cash. Item 3 had a basis of $0 in the hands of CFC3 immediately before the sale and, therefore, CFC3 recognized $200x of gain as a result of the sale ($200x − $0), Item 3 has $200x of disqualified basis under §1.951A–2(c)(5), and US2 has an extraordinary disposition account with respect to CFC3 with an initial balance of $200x under §1.245A–5(c)(3)(i)(A). Moreover, during CFC2's taxable year beginning December 1, 2018, and ending November 30, 2019, the disqualified basis of Item 3 gives rise to a $20x amortization deduction, which is allocated and apportioned to residual CFC gross income of CFC2 solely by reason of §1.951A–2(c)(5) (though, but for §1.951A–2(c)(5), would have been allocated and apportioned to gross tested income of CFC2). Further, as of the end of US1's 2018 taxable year, the balance of US1's basis benefit account with respect to its extraordinary disposition account with respect to CFC1 is $0; similarly, as of the end of US2's 2018 taxable year, the balance of US2's basis benefit account with respect to its extraordinary disposition account with respect to CFC2 is $0. Because CFC2 holds items of specified property that correspond to more than one extraordinary disposition account (that is, Item 1 and Item 2 correspond to US1's extraordinary disposition account with respect to CFC2, and Item 3 corresponds to US2's extraordinary disposition account with respect to CFC2), the condition of §1.245A–6(b)(2) is not satisfied. *See* §1.245A–6(b)(2)(ii)(C)(*3*). US1 and US2 therefore apply §1.245A–8 (rules for complex cases) for their 2018 taxable years.

(ii) *Analysis.* Pursuant to §1.245A–8(c)(1), US1's extraordinary disposition account with respect to CFC1 is, subject to the limitation in §1.245A–8(c)(6), reduced by the lesser of the amount described in § 1.245A–8(c)(1)(i) with respect to US1, and the RGI account of US1 with respect to CFC2 that relates to its extraordinary disposition account with respect to CFC1. *See* § 1.245A–8(c)(1). Similarly, US2's extraordinary disposition account with respect to CFC3 is, subject to the limitation in § 1.245A–8(c)(6), reduced by the lesser of the amount described in § 1.245A–8(c)(1)(i) with respect to US2, and the RGI account of US2 with respect to CFC2 that relates to its extraordinary disposition account with respect to CFC3. *See* § 1.245A–8(c)(1). Paragraphs (c)(4)(ii)(A) through (F) of this section describe the determinations pursuant to § 1.245A–8(c)(1).

(A) *Ownership requirement.* Each of US1 and US2 satisfy the ownership requirement of § 1.245A–8(c)(5) for CFC2's taxable year ending November 30, 2019, because on the last day of that taxable year each is a United States shareholder with respect to CFC2. *See* § 1.245A–8(c)(5).

(B) *Computation of adjusted earnings of CFC2, and amount described in § 1.245A–8(c)(1)(i) with respect to US1 and US2.* The adjusted earnings of CFC2 for its taxable year ending November 30, 2019, is $25x, computed as −$5x (CFC2's deficit in earnings and profits as of November 30, 2019), plus $30x (the sum of the $6x, $4x, and $20x amortization deductions of CFC2). *See* § 1.245A–8(c)(3). For CFC2's taxable year ending November 30, 2019, the amount described in § 1.245A–8(c)(1)(i) with respect to US1 is $25x, computed as the excess of the product of $25x (the adjusted earnings) and 100% (the percentage of the stock of CFC2 that US1 and its domestic affiliate, US2, own), over $0 (the sum of the balance of certain previously taxed earnings and profits accounts and hybrid deduction accounts). *See* § 1.245A–8(c)(1)(i). Similarly, for CFC2's taxable year ending November 30, 2019, the amount described in § 1.245A–8(c)(1)(i) with respect to US2 is $25x, computed as the excess of the product of $25x (the adjusted earnings) and 100% (the percentage of the stock of CFC2 that US2 and its domestic affiliate, US1, own), over $0 (the sum of the balance of certain previously taxed earnings and profits accounts and hybrid deduction accounts). *See* § 1.245A–8(c)(1)(i).

(C) *Increase to balance of RGI account.* As described in paragraph (c)(3)(ii)(B) of this section, US1 has an RGI account with respect to CFC2 that relates to its extraordinary disposition account with respect to CFC1, and the balance of the RGI account is $10x on November 30, 2019 (the last day of CFC2's taxable year). Similarly, US2 has an RGI account with respect to CFC2 that relates to its extraordinary disposition account with respect to CFC3, and the balance of the RGI account is $20x on November 30, 2019 (reflecting a $20x increase to the balance of the account for the $20x amortization deduction of CFC2 for its taxable year ending November 30, 2019). *See* § 1.245A–8(c)(4)(i).

(D) *Reduction in balance of extraordinary disposition accounts but for § 1.245A–8(c)(6).* But for the application of § 1.245A–8(c)(6), US1's extraordinary disposition account with respect to CFC2 would be reduced by $10x, which is the lesser of $25x, the amount described in § 1.245A–8(c)(1)(i) with respect to US1 for CFC2's taxable year ending November 30, 2019, and $10x, the balance of the RGI account of US1 with respect to CFC2 that relates to its extraordinary disposition account with respect to CFC1 (determined as of November 30, 2019, but without regard to the application of § 1.245A–8(c)(4)(i)(B) for the taxable year of CFC2 ending on that date). *See* § 1.245A–8(c)(1)(i) and (ii). Similarly, but for the application of § 1.245A–8(c)(6), US2's extraordinary disposition account with respect to CFC3 would be reduced by $20x, which is the lesser of $25x, the amount described in § 1.245A–8(c)(1)(i) with respect to US2 for CFC2's taxable year ending November 30, 2019, and $20x, the balance of the RGI account of US2 with respect to CFC2 that relates to its extraordinary disposition account with respect to CFC3 (determined as of November 30, 2019, but without regard to the application of § 1.245A–8(c)(4)(i)(B) for the taxable year of CFC2 ending on that date). *See* § 1.245A–8(c)(1)(i) and (ii).

(E) *Application of limitation of § 1.245A–8(c)(6).* As described in paragraph (c)(4)(ii)(D) of this section, but for the application of § 1.245A–8(c)(6), there would be a total of $30x of reductions to US1's extraordinary disposition account with respect to CFC1, and US2's extraordinary disposition account with respect to CFC3, by reason of the application of § 1.245A–8(c)(1) with respect to CFC2's taxable year ending November 30, 2019. Because that $30x exceeds the amount described in § 1.245A–8(c)(1)(i) with respect to US1 and US2 ($25x)—

(*1*) US1's extraordinary disposition account with respect to CFC1 is reduced by $7.86x, computed as $10x (the reduction that would occur but for § 1.245A–8(c)(6)) less the product of $5x (the excess amount, computed as $30x, the total reductions that would occur but for the application of § 1.245A–8(c)(6), less $25x, the amount described in § 1.245A–8(c)(1)(i)) and a fraction, the numerator of which is $150x (the balance of US1's extraordinary disposition account with respect to CFC1) and the denominator of which is $350x ($150x, the balance of US1's extraordinary disposition account with respect to CFC1, plus $200x, the balance of US2's extraordinary disposition account with respect to CFC3), *see* § 1.245A–8(c)(6); and

(*2*) US2's extraordinary disposition account with respect to CFC3 is reduced by $17.14x, computed as $20x (the reduction that would occur but for § 1.245A–8(c)(6)) less the product of $5x (the excess amount, computed as $30x, the total reductions that would occur but for the application of §1.245A–8(c)(6), less $25x, the amount described in §1.245A–8(c)(1)(i)) and a fraction, the numerator of which is $200x (the balance of US2's extraordinary disposition account with respect to CFC3) and the denominator of which is $350x ($150x, the balance of US1's extraordinary disposition account with respect to CFC1, plus $200x, the balance of US2's extraordinary disposition account with respect to CFC3), *see* §1.245A–8(c)(6) of this section.

(F) *Reduction in balance of RGI accounts.* On November 30, 2019 (the last day of CFC2's taxable year)—

(*1*) The balance of US1's RGI account with respect to CFC2 that relates to its extraordinary disposition account with respect to CFC1 is decreased by $7.86x (the amount of the reduction, pursuant to §1.245A–8(c)(1) and by reason of the RGI account, to US1's extraordinary disposition account with respect to CFC1) and, thus, following that reduction, the balance of the RGI account is $2.14x ($10x − $7.86x), *see* §1.245A–8(c)(4)(i)(B); and

(*2*) The balance of US2's RGI account with respect to CFC2 that relates to its extraordinary disposition account with respect to CFC3 is decreased by $17.14x (the amount of the reduction, pursuant to §1.245A–8(c)(1) and by reason of the RGI account, to US2's extraordinary disposition account with respect to CFC3) and, thus, following that reduction, the balance of the RGI account is $2.86x ($20x − $17.14x), *see* §1.245A–8(c)(4)(i)(B).

(5) *Example 5. Computation of duplicate DQB*—(i) *Facts.* The facts are the same as in paragraph (c)(1)(i) of this section (*Example 1*) (and the results are the same as in paragraph (c)(1)(ii)(A) of this section), except that CFC1 does not make any distribution to US1, and on November 30, 2018, immediately after the Disqualified Transfer, CFC2 transfers Item 1 to newly-formed CFC3 solely in exchange for the sole share of stock of CFC3 (the contribution, ''Contribution 1,'' and the share of stock of CFC3, the ''CFC3 Share'') and, immediately after Contribution 1, CFC3 transfers Item 1 to newly-formed CFC4 solely in exchange for the sole share of stock of CFC4 (the contribution, ''Contribution 2,'' and the share of stock of CFC4, the ''CFC4 Share''). Pursuant to section 358(a)(1), CFC2's basis in its share of stock of CFC3 is $90x, and CFC3's basis in its share of stock of CFC4 is $90x basis. As a result of Contribution 1, the condition of §1.245A–6(b)(2) is not satisfied, because on at least one day of CFC2's taxable year ending on November 30, 2018 (which ends within US1's 2018 taxable year), CFC2 does not hold Item 1. *See* §1.245A–6(b)(2)(ii)(C)(*1*). US1 therefore applies §1.245A–8 (rules for complex cases) for its 2018 taxable year. *See* §1.245A–6(b).

(ii) *Analysis*—(A) *Application of exchanged basis rule under section 951A to Contribution 1 and Contribution 2.* As a result of Contribution 1, pursuant to §1.951A–3(h)(2)(ii)(B)(*2*)(*ii*), the disqualified basis of CFC3 Share includes the disqualified basis of Item 1 ($90x), and therefore the disqualified basis of CFC3 Share is $90x. Similarly, as a result of Contribution 2, pursuant to §1.951A–3(h)(2)(ii)(B)(*2*)(*ii*), the disqualified basis of CFC4 Share also includes the disqualified basis of Item 1 ($90x), and therefore the disqualified basis of CFC4 Share is $90x.

(B) *Determination of duplicate DQB of CFC3 Share as a result of Contribution 1.* Because the disqualified basis of CFC3 Share includes the disqualified basis of Item 1, CFC3 Share is an item of exchanged basis property that relates to Item 1. *See* §1.245A–8(d)(2)(ii). In addition, because CFC3 Share is an item of exchanged basis property that relates to Item 1 (which corresponds to US1's extraordinary disposition account with respect to CFC1), CFC3 Share is, for purposes of §1.245A–8, treated as an item of specified property that corresponds to US1's extraordinary disposition account with respect to CFC1. *See* §1.245A–8(d)(2)(i). Further, the duplicate DQB of CFC3 Share as to Item 1 is $90x, the portion of the disqualified basis of CFC3 Share that includes Item 1's disqualified basis of $90x. *See* §1.245A–8(d)(2)(iii)(A).

(C) *Determination of duplicate DQB of CFC4 Share as a result of Contribution 2.* For reasons similar to those described in paragraph (c)(5)(ii)(B) of this section, CFC4 Share is an item of exchanged basis property that relates to Item 1, CFC4 is treated for purposes of §1.245A–8 as an item of specified property that corresponds to US1's extraordinary disposition account with respect to CFC1, and the duplicate DQB of CFC4 Share as to Item 1 is $90x.

(D) *Determination of duplicate DQB of CFC3 Share as a result of Contribution 2.* Because the disqualified basis of CFC3 Share and the disqualified basis of CFC4 Share each includes $90x of the disqualified basis of Item 1 and CFC3 receives the CFC4 Share in Contribution 2, the $90x of disqualified basis of CFC3 Share is attributable to the $90x of disqualified basis of CFC4 Share, and CFC3 Share is an item of exchanged basis property that relates to CFC4 Share. *See* §1.245A–8(d)(2)(i) and (d)(2)(iii)(C). In addition, the duplicate DQB of CFC3 Share as to CFC4 Share is $90x. *See* §1.245A–8(d)(2)(iii)(A).

(E) *Application of duplicate basis rules in §1.245A–8(b)(5).* For purposes of computing the fraction described in §1.245A–8(b)(1)(ii), if US1's extraordinary disposition account with respect to CFC1 were to give rise to an extraordinary disposition amount or a tiered extraordinary disposition amount during US1's 2018 taxable year, then the duplicate DQB of CFC3 Share and the duplicate DQB of CFC4 Share would not be taken into account, because the disqualified basis of Item 1 (an item of specified property that corresponds to US1's extraordinary disposition account and as to which each of CFC3 Share and CFC4 share relates) would be taken into account. *See* §1.245A–8(b)(1)(ii) and (b)(5)(i)(A). Accordingly, in such a case, for US1's 2018 taxable year, the numerator of the fraction described in §1.245A–8(b)(1)(ii) would reflect only the disqualified basis of Item 1 or Item 2, as applicable, and the denominator would reflect only the sum of the disqualified basis of each of Item 1 and Item 2. *See* §1.245A–8(b)(1)(ii) and (b)(5)(i)(A). Furthermore, to the extent there were to be a reduction under §1.245A–8(b)(1) to the disqualified basis of Item 1, then the duplicate DQB of CFC4 Share would be reduced (but not below zero) by the product of the reduction to the disqualified basis of Item 1 and a fraction, the numerator of which would be $90x (the duplicate DQB of CFC4 Share), and the denominator of which would also be $90x (the duplicate DQB of CFC4 Share). *See* §1.245A–8(b)(5)(i)(B). The $90x of duplicate DQB of CFC3 Share would be excluded from the denominator of the fraction described in the previous sentence because it is attributable to the $90x of duplicate DQB of CFC4 Share. *See* §1.245A–8(b)(5)(i)(B)(*2*) (last sentence). For reasons similar to those described in this paragraph (c)(4)(ii)(E) with respect to the application of §1.245A–8(b)(5)(i)(B) to CFC4 Share, the duplicate DQB of CFC3 Share would be reduced (but not below zero) by the product of the reduction to the disqualified basis of Item 1 and a fraction, the numerator of which would be $90x, and the denominator of which would also be $90x.

[T.D. 9934, 85 FR 76963, Dec. 1, 2020]

§ 1.245A–11 Applicability dates.

(a) *In general.* Sections 1.245A–6 through 1.245A–11 apply to taxable years of a foreign corporation beginning on or after December 1, 2020 and to taxable years of section 245A shareholders in which or with which such taxable years end.

(b) *Exception.* Notwithstanding paragraph (a) of this section, a taxpayer may choose to apply §§1.245A–6 through 1.245A–11 for a taxable year of a foreign corporation beginning before December 1, 2020 and to a taxable year of a section 245A shareholder in which or with which such taxable year ends, provided that the taxpayer and all persons bearing a relationship to the taxpayer described in section 267(b) or 707(b) apply §§1.245A–6 through 1.245A–11, in their entirety, and §1.6038–2(f)(18) for all such taxable years and any subsequent taxable years beginning before December 1, 2020.

[T.D. 9934, 85 FR 76963, Dec. 1, 2020]

§ 1.245A(d)–1 Disallowance of foreign tax credit or deduction.

(a) *No foreign tax credit or deduction allowed under section 245A(d)*–(1) *Foreign income taxes paid or accrued by domestic corporations or successors.* No credit under section 901 or deduction is allowed in any taxable year for:

(i) Foreign income taxes paid or accrued by a domestic corporation that are attributable to section 245A(d) income of the domestic corporation;

(ii) Foreign income taxes paid or accrued by a successor to a domestic corporation that are attributable to section 245A(d) income of the successor; and

(iii) Foreign income taxes paid or accrued by a domestic corporation that is a United States shareholder of a foreign corporation, other than a foreign corporation that is a passive foreign investment company (as defined in section 1297) with respect to the domestic corporation and that is not a controlled foreign corporation, that are attributable to non-inclusion income of the foreign corporation and are not otherwise disallowed under paragraph (a)(1)(i) or (ii) of this section.

(2) *Foreign income taxes paid or accrued by foreign corporations.* No credit under section 901 or deduction is allowed in any taxable year for foreign income taxes paid or accrued by a foreign corporation that are attributable to section 245A(d) income, and such taxes are not eligible to be deemed paid under section 960 in any taxable year.

(3) *Effect of disallowance on earnings and profits.* The disallowance of a credit or deduction for foreign income taxes under this paragraph (a) does not affect whether the foreign income taxes reduce earnings and profits of a corporation.

(b) *Attribution of foreign income taxes*—(1) *Section 245A(d) income.* Foreign income taxes are attributable to section 245A(d) income to the extent that the foreign income taxes are allocated and apportioned under §1.861–20 to the section 245A(d) income group. For purposes of this paragraph (b)(1), §1.861–20 is applied by treating the section

245A(d) income group in each section 904 category of a domestic corporation, successor, or foreign corporation as a statutory grouping and treating all other income, including the receipt of a distribution of previously taxed earnings and profits other than section 245A(d) PTEP, as income in the residual grouping. See §1.861–20(d)(2) through (3) for rules regarding the allocation and apportionment of foreign income taxes to the statutory and residual groupings if the taxpayer does not realize, recognize, or take into account a corresponding U.S. item in the U.S. taxable year in which the foreign income taxes are paid or accrued. In the case of a foreign law distribution or foreign law disposition, a corresponding U.S. item is assigned to the statutory and residual groupings under §1.861–20(d)(2)(ii)(B) and (C) without regard to the application of section 246(c), the holding periods described in sections 964(e)(4)(A) and 1248(j), and §1.245A–5.

(2) *Non-inclusion income of a foreign corporation*—(i) *Scope.* This paragraph (b)(2) provides rules for attributing foreign income taxes paid or accrued by a domestic corporation that is a United States shareholder of a foreign corporation to non-inclusion income of the foreign corporation. It applies only in cases in which the foreign income taxes are allocated and apportioned under §1.861–20 by reference to the characterization of the tax book value of stock, whether the stock is held directly or indirectly through a partnership or other passthrough entity, for purposes of allocating and apportioning the domestic corporation's interest expense, or by reference to the income of a foreign corporation that is a reverse hybrid or foreign law CFC.

(ii) *Foreign income taxes on a remittance, U.S. return of capital amount, or U.S. return of partnership basis amount.* This paragraph (b)(2)(ii) applies to foreign income taxes paid or accrued by a domestic corporation that is a United States shareholder of a foreign corporation with respect to foreign taxable income that the domestic corporation includes by reason of a remittance, a distribution (including a foreign law distribution) that is a U.S. return of capital amount or U.S. return of partnership basis amount, or a disposition (including a foreign law disposition) that gives rise to a U.S. return of capital amount or a U.S. return of partnership basis amount. These foreign income taxes are attributable to non-inclusion income of the foreign corporation to the extent that they are allocated and apportioned to the domestic corporation's section 245A subgroup of general category stock, section 245A subgroup of passive category stock, or section 245A subgroup of U.S. source category stock in applying §1.861–20 for purposes of section 904 as the operative section. For purposes of this paragraph (b)(2)(ii), §1.861–20 is applied by treating the domestic corporation's section 245A subgroup of general category stock, section 245A subgroup of passive category stock, and section 245A subgroup of U.S. source category stock as the statutory groupings and treating the tax book value of the non-section 245A subgroup of stock for each separate category as tax book value in the residual grouping.

(iii) *Foreign income taxes on income of a reverse hybrid or a foreign law CFC.* This paragraph (b)(2)(iii) applies to foreign income taxes paid or accrued by a domestic corporation, other than a regulated investment company (as defined in section 851), real estate investment trust (as defined in section 856), or S corporation (as defined in section 1361), that is a United States shareholder of a foreign corporation that is a reverse hybrid or foreign law CFC with respect to the foreign law pass-through income or foreign law inclusion regime income of the reverse hybrid or foreign law CFC, respectively. These taxes are attributable to the non-inclusion income of a reverse hybrid or foreign law CFC to the extent that they are allocated and apportioned to the non-inclusion income group under §1.861–20. For purposes of this paragraph (b)(2)(iii), §1.861–20 is applied by treating the non-inclusion income group in each section 904 category of the domestic corporation and the foreign corporation as a statutory grouping and treating all other income as income in the residual grouping.

(3) *Anti-avoidance rule.* Foreign income taxes are treated as attributable to section 245A(d) income of a domestic

corporation or foreign corporation, or non-inclusion income of a foreign corporation, if a transaction, series of related transactions, or arrangement is undertaken with a principal purpose of avoiding the purposes of section 245A(d) and this section with respect to such foreign income taxes, including, for example, by separating foreign income taxes from the income, or earnings and profits, to which such foreign income taxes relate or by making distributions (or causing inclusions) under foreign law in multiple years that give rise to foreign income taxes that are allocated and apportioned with reference to the same previously taxed earnings and profits. See paragraph (d)(4) of this section (*Example 3*).

(c) *Definitions.* The following definitions apply for purposes of this section.

(1) *Corresponding U.S. item.* The term *corresponding U.S. item* has the meaning set forth in §1.861–20(b).

(2) *Foreign income tax.* The term *foreign income tax* has the meaning set forth in §1.901–2(a).

(3) *Foreign law CFC.* The term *foreign law CFC* has the meaning set forth in §1.861–20(b).

(4) *Foreign law disposition.* The term *foreign law disposition* has the meaning set forth in §1.861–20(b).

(5) *Foreign law distribution.* The term *foreign law distribution* has the meaning set forth in §1.861–20(b).

(6) *Foreign law inclusion regime.* The term *foreign law inclusion regime* has the meaning set forth in §1.861–20(b).

(7) *Foreign law inclusion regime income.* The term *foreign law inclusion regime income* has the meaning set forth in §1.861–20(b).

(8) *Foreign law pass-through income.* The term *foreign law pass-through income* has the meaning set forth in §1.861–20(b).

(9) *Foreign taxable income.* The term *foreign taxable income* has the meaning set forth in §1.861–20(b).

(10) *Gross included tested income.* The term *gross included tested income* means, with respect to a foreign corporation that is described in paragraph (b)(2)(iii) of this section, an item of gross tested income multiplied by the inclusion percentage of a domestic corporation that is described in paragraph (b)(2)(iii) of this section for the domestic corporation's U.S. taxable year with or within which the foreign corporation's taxable year described in §1.861–20(d)(3)(i)(C) or §1.861–20(d)(3)(iii) ends.

(11) *Hybrid dividend.* The term *hybrid dividend* has the meaning set forth in §1.245A(e)–1(b)(2).

(12) *Inclusion percentage.* The term *inclusion percentage* has the meaning set forth in §1.960–1(b).

(13) *Non-inclusion income.* The term *non-inclusion income* means the items of gross income of a foreign corporation other than the items that are described in §1.960–1(d)(2)(ii)(B)(*2*) (items of income assigned to the subpart F income groups) and section 245(a)(5) (without regard to section 245(a)(12)), and other than gross included tested income.

(14) *Non-inclusion income group.* The term *non-inclusion income group* means the income group within a section 904 category that consists of non-inclusion income.

(15) *Non-section 245A subgroup.* The term *non-section 245A subgroup* means each non-section 245A subgroup determined under §1.861–13(a)(5), applied as if the foreign corporation whose stock is being characterized were a controlled foreign corporation.

(16) *Pass-through entity.* The term *pass-through entity* has the meaning set forth in §1.904–5(a)(4).

(17) *Remittance.* The term *remittance* has the meaning set forth in §1.861–20(d)(3)(v)(E).

(18) *Reverse hybrid.* The term *reverse hybrid* has the meaning set forth in §1.861–20(b).

(19) *Section 245A subgroup.* The term *section 245A subgroup* means each section 245A subgroup determined under §1.861–13(a)(5), applied as if the foreign corporation whose stock is being characterized were a controlled foreign corporation.

(20) *Section 245A(d) income.* With respect to a domestic corporation, the term *section 245A(d) income* means a dividend (including a section 1248 dividend and a dividend received indirectly through a pass-through entity) or an inclusion under section 951(a)(1)(A) for which a deduction under section 245A(a) is allowed, a distribution of section 245A(d) PTEP, a hybrid dividend, or an inclusion under section 245A(e)(2) and §1.245A(e)–1(c)(1) by reason of a

tiered hybrid dividend. With respect to a successor of a domestic corporation, the term *section 245A(d) income* means the receipt of a distribution of section 245A(d) PTEP. With respect to a foreign corporation, the term *section 245A(d) income* means an item of subpart F income that gave rise to a deduction under section 245A(a), a tiered hybrid dividend or a distribution of section 245A(d) PTEP. An item described in this paragraph (c)(20) that qualifies for the deduction under section 245A(a) is considered section 245A(d) income regardless of whether the domestic corporation claims the deduction on its return with respect to the item.

(21) *Section 245A(d) income group.* The term *section 245A(d) income group* means an income group within a section 904 category that consists of section 245A(d) income.

(22) *Section 245A(d) PTEP.* The term *section 245A(d) PTEP* means previously taxed earnings and profits described in §1.960–3(c)(2)(v) or (ix) if such previously taxed earnings and profits arose either as a result of a dividend that gave rise to a deduction under section 245A(a), or as a result of a tiered hybrid dividend that, by reason of section 245A(e)(2) and §1.245A(e)–1(c)(1), gave rise to an inclusion in the gross income of a United States shareholder. For purposes of this paragraph (c)(22), a dividend that qualifies for the deduction under section 245A(a) is considered to have given rise to a deduction under section 245A(a) regardless of whether the domestic corporation claims the deduction on its return with respect to the dividend.

(23) *Section 904 category.* The term *section 904 category* has the meaning set forth in §1.960–1(b).

(24) *Section 1248 dividend.* The term *section 1248 dividend* means an amount of gain that is treated as a dividend under section 1248.

(25) *Successor.* The term successor means a person, including an individual who is a citizen or resident of the United States, that acquires from any person any portion of the interest of a United States shareholder in a foreign corporation for purposes of section 959(a).

(26) *Tested income.* The term *tested income* has the meaning set forth in §1.960–1(b).

(27) *Tiered hybrid dividend.* The term *tiered hybrid dividend* has the meaning set forth in §1.245A(e)–1(c)(2).

(28) *U.S. capital gain amount.* The term *U.S. capital gain amount* has the meaning set forth in §1.861–20(b).

(29) *U.S. return of capital amount.* The term *U.S. return of capital amount* has the meaning set forth in §1.861–20(b).

(30) *U.S. return of partnership basis amount.* The term *U.S. return of partnership basis amount* means, with respect to a partnership in which a domestic corporation is a partner, the portion of a distribution by the partnership to the domestic corporation, or the portion of the proceeds of a disposition of the domestic corporation's interest in the partnership, that exceeds the U.S. capital gain amount.

(d) *Examples.* The following examples illustrate the application of this section.

(1) *Presumed facts.* Except as otherwise provided, the following facts are presumed for purposes of the examples:

(i) USP is a domestic corporation;

(ii) CFC is a controlled foreign corporation organized in Country A, and is not a reverse hybrid or a foreign law CFC;

(iii) USP owns all of the outstanding stock of CFC;

(iv) USP would be allowed a deduction under section 245A(a) for dividends received from CFC;

(v) All parties have a U.S. dollar functional currency and a U.S. taxable year and foreign taxable year that correspond to the calendar year; and

(vi) References to income are to gross items of income, and no party has deductions for Country A tax purposes or deductions for Federal income tax purposes (other than foreign income tax expense).

(2) *Example 1: Distribution for foreign and Federal income tax purposes—(i) Facts.* As of December 31, Year 1, CFC has $800x of section 951A PTEP (as defined in §1.960–3(c)(2)(viii)) in a single annual PTEP account (as defined in §1.960–3(c)(1)), and $500x of earnings and profits described in section 959(c)(3). On December 31, Year 1, CFC distributes $1,000x of cash to USP. For Country A

tax purposes, the entire $1,000x distribution is a dividend and is therefore a foreign dividend amount (as defined in §1.861–20(b)). Country A imposes a withholding tax on USP of $150x with respect to the $1,000x of foreign gross dividend income under Country A law. For Federal income tax purposes, USP includes in gross income $200x of the distribution as a dividend for which a deduction is allowable under section 245A(a). The remaining $800x of the distribution is a distribution of PTEP that is excluded from USP's gross income and not treated as a dividend under section 959(a) and (d), respectively. The entire $1,000x dividend is a U.S. dividend amount (as defined in §1.861–20(b)).

(ii) *Analysis*—(A) *In general*. The rules of this section are applied by first determining the portion of the $150x Country A withholding tax that is attributable under paragraph (b)(1) of this section to the section 245A(d) income of USP, and then by determining the portion of the $150x Country A withholding tax that is described in paragraph (b)(2)(i) of this section and that is attributable under either paragraph (b)(2)(ii) or (b)(2)(iii) of this section to the non-inclusion income of CFC. No credit or deduction is allowed in any taxable year under paragraph (a)(1)(i) of this section for any portion of the $150x Country A withholding tax that is attributable to the section 245A(d) income of USP, or, under paragraph (a)(1)(iii) of this section, for any portion of that tax that is attributable to the non-inclusion income of CFC, to the extent the tax is not disallowed under paragraph (a)(1)(i) of this section.

(B) *Attribution of foreign income taxes to section 245A(d) income*. Under paragraph (b)(1) of this section, the $150x Country A withholding tax is attributable to the section 245A(d) income of USP to the extent that it is allocated and apportioned to the section 245A(d) income group (the statutory grouping) under §1.861–20. Section 1.861–20(c) allocates and apportions foreign income tax to the statutory and residual groupings to which the items of foreign gross income that were included in the foreign tax base are assigned under §1.861–20(d). Section 1.861–20(d)(3)(i) assigns foreign gross income that is a foreign dividend amount, to the extent of the U.S. dividend amount, to the statutory and residual groupings to which the U.S. dividend amount is assigned. The $1,000x foreign dividend amount is therefore assigned to the statutory and residual groupings to which the $1,000x U.S. dividend amount is assigned under Federal income tax law. The $1,000x U.S. dividend amount comprises a $200x dividend for which a deduction under section 245A(a) is allowed, which is an item of section 245A(d) income, and $800x of section 951A PTEP, the receipt of which is income in the residual grouping. Accordingly, $200x of the $1,000x of foreign gross dividend income is assigned to the section 245A(d) income group, and $800x is assigned to the residual grouping. Under §1.861–20(f), $30x ($150x × $200x/$1,000x) of the $150x Country A withholding tax is apportioned to the section 245A(d) income group and is attributable to the section 245A(d) income of USP. The remaining $120x ($150x × $800x/$1,000x) of the tax is apportioned to the residual grouping.

(C) *Attribution of foreign income taxes to non-inclusion income*. Under paragraph (b)(2) of this section, the $150x Country A withholding tax may be attributed to non-inclusion income of CFC if the tax is allocated and apportioned under §1.861–20 by reference to either the characterization of the tax book value of stock under §1.861–9 or the income of a foreign corporation that is a reverse hybrid or foreign law CFC. CFC is neither a reverse hybrid nor a foreign law CFC. In addition, no portion of the $150x Country A withholding tax is allocated and apportioned under §1.861–20 by reference to the characterization of the tax book value of CFC's stock. See §1.861–20(d)(3)(i). Therefore, none of the tax is attributable to non-inclusion income of CFC.

(D) *Disallowance*. Under paragraph (a)(1)(i) of this section, no credit under section 901 or deduction is allowed in any taxable year to USP for the $30x portion of the Country A withholding tax that is attributable to section 245A(d) income of USP.

(3) *Example 2: Distribution for foreign law purposes*—(i) *Facts*. As of December 31, Year 1, CFC has $800x of section

951A PTEP (as defined in §1.960–3(c)(2)(viii)) in a single annual PTEP account (as defined in §1.960–3(c)(1)), and $500x of earnings and profits described in section 959(c)(3). On December 31, Year 1, CFC distributes $1,000x of its stock to USP. For Country A tax purposes, the entire $1,000x stock distribution is treated as a dividend to USP and is therefore a foreign dividend amount (as defined in §1.861–20(b)). Country A imposes a withholding tax on USP of $150x with respect to the $1,000x of foreign gross dividend income that USP includes under Country A law. For Federal income tax purposes, USP does not recognize gross income as a result of the stock distribution under section 305(a). The $1,000x stock distribution is therefore a foreign law distribution.

(ii) *Analysis*—(A) *In general*. The rules of this section are applied by first determining the portion of the $150x Country A withholding tax that is attributable under paragraph (b)(1) of this section to the section 245A(d) income of USP, and then by determining the portion of the $150x Country A withholding tax that is described in paragraph (b)(2)(i) of this section and that is attributable under either paragraph (b)(2)(ii) or (b)(2)(iii) of this section to the non-inclusion income of CFC. No credit or deduction is allowed in any taxable year under paragraph (a)(1)(i) of this section for any portion of the $150x Country A withholding tax that is attributable to the section 245A(d) income of USP or, under paragraph (a)(1)(iii) of this section, for any portion of that tax that is attributable to the non-inclusion income of CFC, to the extent the tax is not disallowed under paragraph (a)(1)(i) of this section.

(B) *Attribution of foreign income taxes to section 245A(d) income*. Under paragraph (b)(1) of this section, the $150x Country A withholding tax is attributable to the section 245A(d) income of USP to the extent that it is allocated and apportioned to the section 245A(d) income group (the statutory grouping) under §1.861–20. Section 1.861–20(c) allocates and apportions foreign income tax to the statutory and residual groupings to which the items of foreign gross income that were included in the foreign tax base are assigned under §1.861–20(d). In general, §1.861–20(d) assigns foreign gross income to the statutory and residual groupings to which the corresponding U.S. item is assigned. If a taxpayer does not recognize a corresponding U.S. item in the year in which it pays or accrues foreign income tax with respect to foreign gross income that it includes by reason of a foreign law dividend, §1.861–20(d)(2)(ii)(B) assigns the foreign dividend amount to the same statutory or residual groupings to which the foreign dividend amount would be assigned if a distribution were made for Federal income tax purposes in the amount of, and on the date of, the foreign law distribution. Further, §1.861–20(d)(2)(ii)(B) computes the U.S. dividend amount (as defined in §1.861–20(b)) as if the distribution occurred on the date the distribution occurs for foreign law purposes. Therefore, the foreign dividend amount is assigned to the same statutory and residual groupings to which it would be assigned if a $1,000x distribution occurred on December 31, Year 1 for Federal income tax purposes. If such a distribution occurred, it would result in a $200x dividend to USP for which a deduction would be allowed under section 245A(a). The remaining $800x of the distribution would be excluded from USP's gross income and not treated as a dividend under section 959(a) and (d), respectively. Under paragraphs (c)(20) and (b)(1) of this section, the $1,000x U.S. dividend amount comprises a $200x dividend for which a deduction under section 245A(a) would be allowed, which is an item of section 245A(d) income, and $800x of section 951A PTEP, which is income in the residual grouping. Accordingly, $200x of the $1,000x foreign gross dividend income is assigned to the section 245A(d) income group, and $800x is assigned to the residual grouping. Under §1.861–20(f), $30x ($150x × $200x/$1,000x) of the Country A foreign income tax is apportioned to the section 245A(d) income group and is attributable to the section 245A(d) income of USP. The remaining $120x ($150x × $800x/$1,000x) of the tax is apportioned to the residual grouping.

(C) *Attribution of foreign income taxes to non-inclusion income*. Under paragraph (b)(2) of this section, the $150x

Country A withholding tax may be attributed to non-inclusion income of CFC if the tax is allocated and apportioned under §1.861–20 by reference to either the characterization of the tax book value of stock under §1.861–9 or the income of a foreign corporation that is a reverse hybrid or foreign law CFC. CFC is neither a reverse hybrid nor a foreign law CFC. In addition, no portion of the $150x Country A withholding tax is allocated and apportioned under §1.861–20 by reference to the characterization of the tax book value of CFC's stock. See §1.861–20(d)(3)(i). Therefore, none of the tax is attributable to non-inclusion income of CFC.

(D) *Disallowance.* Under paragraph (a)(1)(i) of this section, no credit under section 901 or deduction is allowed in any taxable year to USP for the $30x portion of the Country A withholding tax that is attributable to section 245A(d) income of USP.

(4) *Example 3: Successive foreign law distributions subject to anti-avoidance rule*—(i) *Facts.* For Year 1, CFC earns $500x of subpart F income that gives rise to a $500x gross income inclusion to USP under section 951(a), and income that creates $500x of earnings and profits described in section 959(c)(3). CFC earns no income in Years 2 through 4. As of January 1, Year 2, and through December 31, Year 4, CFC has $500x of earnings and profits described in section 959(c)(3) and $500x of section 951(a)(1)(A) PTEP (as defined in §1.960–3(c)(2)(x)) in a single annual PTEP account (as defined in §1.960–3(c)(1)). In each of Years 2 and 3, USP makes a consent dividend election under Country A law that, for Country A tax purposes, deems CFC to distribute to USP, and USP immediately to contribute to CFC, $500x on December 31 of each year. For Country A tax purposes, each deemed distribution is a dividend of $500x to USP, and each deemed contribution is a non-taxable contribution of $500x to the capital of CFC. Each $500x deemed distribution is therefore a foreign dividend amount (as defined in §1.861–20(b)). Country A imposes $150x of withholding tax on USP in each of Years 2 and 3 with respect to the $500x of foreign gross dividend income that USP includes in income under Country A law. For Federal income tax purposes, the Country A deemed distributions in Years 2 and 3 are disregarded such that USP recognizes no income, and the deemed distributions are therefore foreign law distributions. On December 31, Year 4, CFC distributes $1,000x to USP, which for Country A tax purposes is treated as a return of contributed capital on which no withholding tax is imposed. For Federal income tax purposes, $500x of the $1,000x distribution is a dividend to USP for which a deduction under section 245A(a) is allowed; the remaining $500x of the distribution is a distribution of section 951(a)(1)(A) PTEP that is excluded from USP's gross income and not treated as a dividend under section 959(a) and (d), respectively. The entire $1,000x dividend is a U.S. dividend amount (as defined in §1.861–20(b)). The Country A consent dividend elections in Years 2 and 3 are made with a principal purpose of avoiding the purposes of section 245A(d) and this section to disallow a credit or deduction for Country A withholding tax incurred with respect to USP's section 245A(d) income.

(ii) *Analysis*—(A) *In general.* The rules of this section are applied by first determining the portion of the $150x Country A withholding tax paid by USP in each of Years 2 and 3 that is attributable under paragraph (b)(1) of this section to the section 245A(d) income of USP, and then by determining the portion of the $150x Country A withholding tax paid by USP in each of Years 2 and 3 that is described in paragraph (b)(2)(i) of this section and that is attributable under either paragraph (b)(2)(ii) or (b)(2)(iii) of this section to the non-inclusion income of CFC. Finally, the anti-avoidance rule under paragraph (b)(3) of this section applies to treat any portion of the $150x Country A withholding tax paid by USP in each of Years 2 and 3 as attributable to section 245A(d) income of USP or non-inclusion income of CFC, if a transaction, series of related transactions, or arrangement is undertaken with a principal purpose of avoiding the purposes of section 245A(d) and this section. No credit or deduction is allowed in any taxable year under paragraph (a)(1)(i) of this section for any portion of the $150x Country A withholding tax paid by USP in each of Years 2 and 3 that is attributable to the section 245A(d) income of USP or, under paragraph (a)(1)(iii) of this section, for any portion of that tax that is attributable to the non-inclusion income of CFC, to the extent the tax is not disallowed under paragraph (a)(1)(i) of this section.

(B) *Attribution of foreign income taxes to section 245A(d) income.* Under paragraph (b)(1) of this section, the $150x Country A withholding tax paid by USP in each of Years 2 and 3 is attributable to the section 245A(d) income of USP to the extent that it is allocated and apportioned to the section 245A(d) income group (the statutory grouping) under §1.861–20. Section 1.861–20(c) allocates and apportions foreign income tax to the statutory and residual groupings to which the items of foreign gross income that were included in the foreign tax base are assigned under §1.861–20(d). In general, §1.861–20(d) assigns foreign gross income to the statutory and residual groupings to which the corresponding U.S. item is assigned. If a taxpayer does not recognize a corresponding U.S. item in the year in which it pays or accrues foreign income tax with respect to foreign gross income that it includes by reason of a foreign law dividend, §1.861–20(d)(2)(ii)(B) assigns the foreign dividend amount to the same statutory or residual groupings to which the foreign dividend amount would be assigned if a distribution were made for Federal income tax purposes in the amount of, and on the date of, the foreign law distribution. Therefore, the $500x foreign dividend amount in each of Years 2 and 3 is assigned to the same statutory and residual groupings to which it would be assigned if a $500x distribution occurred on December 31 of each of those years for Federal income tax purposes.

(*1*) *Year 2 $500x deemed distribution.* CFC made no distributions in Year 1 and earned no income and made no distributions in Year 2 for Federal income tax purposes. As of December 31, Year 2, CFC has $500x of earnings and profits described in section 959(c)(3) and $500x of section 951(a)(1)(A) PTEP. If CFC distributed $500x on that date, the distribution would be a distribution of section 951(a)(1)(A) PTEP. A distribution of previously taxed earnings and profits is a U.S. dividend amount. Section 1.861–20(d)(3)(i) assigns the foreign dividend amount, to the extent of the U.S. dividend amount, to the statutory and residual groupings to which the U.S. dividend amount is assigned. The receipt of a distribution of previously taxed earnings and profits is assigned to the residual grouping under paragraph (b)(1) of this section. Therefore, all $500x foreign dividend amount would be assigned to the residual grouping, and none of the $150x withholding tax paid or accrued by USP in Year 2 would be treated as attributable to section 245A(d) income of USP.

(*2*) *Year 3 $500x deemed distribution.* CFC made no distributions in Year 1 and earned no income and made no distributions in Year 2 or Year 3 for Federal income tax purposes. Consequently, as of December 31, Year 3, CFC has $500x of earnings and profits described in section 959(c)(3) and $500x of section 951(a)(1)(A) PTEP. If CFC distributed $500x on that date, the distribution would be a distribution of section 951(a)(1)(A) PTEP. For the reasons described in paragraph (d)(4)(ii)(B)(*1*) of this section, all $500x of the foreign dividend amount would be assigned to the residual grouping, and none of the $150x withholding tax paid or accrued by USP in Year 3 would be treated as attributable to section 245A(d) income of USP.

(*3*) *Year 4 $1,000x distribution.* The Year 4 $1,000x distribution is, for Country A purposes, a return of capital distribution that is not subject to withholding tax. For Federal income tax purposes, it comprises a $500x dividend for which a deduction under section 245A(a) is allowed, which is an item of section 245A(d) income of USP, and a $500x distribution of section 951(a)(1)(A) PTEP, the receipt of which is income in the residual grouping.

(C) *Attribution of foreign income taxes to non-inclusion income.* Under paragraph (b)(2) of this section, the $150x Country A withholding tax paid by USP in each of Years 2 and 3 may be attributed to non-inclusion income of CFC if the tax is allocated and apportioned under §1.861–20 by reference to either the characterization of the tax book value of stock under §1.861–9 or the income of a foreign corporation that is a reverse hybrid or foreign law CFC. CFC is neither a reverse hybrid nor a foreign law CFC. In addition, no portion of the Country A withholding tax is allocated and apportioned under §1.861–20 by reference to the characterization of the tax book value of CFC's stock. See §1.861–20(d)(3)(i). Therefore, none of the tax is attributable to non-inclusion income of CFC.

(D) *Attribution of foreign income taxes pursuant to anti-avoidance rule.* USP made two successive foreign law distributions in Years 2 and 3 that were subject to Country A withholding tax and that did not individually exceed, but together exceeded, the section 951(a)(1)(A) PTEP of CFC. The Country A withholding tax on each consent dividend is allocated to the residual grouping rather than to the statutory grouping of section 245A(d) income under §§1.861–20(d)(2)(ii) and 1.861–20(d)(3)(i). USP paid no Country A withholding tax on the Year 4 distribution as a result of the Country A consent dividends in Years 2 and 3. If CFC had distributed its earnings and profits in Year 4 without the prior consent dividends, the distribution would have been subject to withholding tax, a portion of which would have been attributable to the section 245A(d) income arising from the distribution. But for the application of the anti-avoidance rule in paragraph (b)(3) of this section, USP would avoid the disallowance under section 245A(d) with respect to this portion of the withholding tax. Because USP made foreign law distributions that caused withholding tax from multiple foreign law distributions to be associated with the same previously taxed earnings and profits with a principal purpose of avoiding the purposes of section 245A(d) and this section, the $150x Country A withholding tax paid by USP in each of Years 2 and 3 is treated as being attributable to section 245A(d) income of USP.

(E) *Disallowance.* Under paragraph (a)(1)(i) of this section, no credit under section 901 or deduction is allowed in any taxable year to USP for the $150x Country A withholding tax paid by USP in each of Years 2 and 3 that is attributable to section 245A(d) income of USP.

(5) *Example 4: Distribution that is in part a dividend and in part a return of capital*—(i) *Facts.* CFC uses the modified gross income method to allocate and apportion its interest expense, and its stock has a tax book value of $10,000x. For Year 1, CFC earns $500x of income that is specified foreign source general category gross income as that term is defined in §1.861–13(a)(1)(i)(A)(*9*) and is therefore neither tested income nor subpart F income of CFC. As of December 31, Year 1, CFC has $500x of earnings and profits described in section 959(c)(3). On that date, CFC distributes $1,000x of cash to USP. For Country A tax purposes, the entire $1,000x distribution is a dividend to USP and is therefore a foreign dividend amount (as defined in §1.861–20(b)). Country A imposes a withholding tax on USP of $150x with respect to the $1,000x of foreign gross dividend income that USP includes under the law of Country A. For Federal income tax purposes, USP includes $500x of the distribution in its gross income as a dividend for which a $500x deduction is allowed to USP under section 245A(a); the remaining $500x of the distribution is applied against and reduces USP's basis in its CFC stock under section 301(c)(2). The portion of the distribution that is a $500x dividend is a U.S. dividend amount (as defined in §1.861–20(b)). The remaining $500x of the distribution is a U.S. return of capital amount.

(ii) *Analysis*—(A) *In general.* The rules of this section are applied by first determining the portion of the $150x Country A withholding tax that is attributable under paragraph (b)(1) of this section to the section 245A(d) income of USP, and then by determining the portion of the $150x Country A withholding tax that is described in paragraph (b)(2)(i) of this section and that is attributable under either paragraph (b)(2)(ii) or (b)(2)(iii) of this section to the non-inclusion income of CFC. No credit or deduction is allowed under paragraph (a)(1)(i) of this section for any portion of the $150x Country A withholding tax that is attributable to the section 245A(d) income of USP or, under paragraph (a)(1)(iii) of this section, for any portion of that tax that is attributable to the non-inclusion income of CFC, to the extent the tax is not disallowed under paragraph (a)(1)(i) of this section.

(B) *Attribution of foreign income taxes to section 245A(d) income.* Under paragraph (b)(1) of this section, the $150x Country A withholding tax is attributable to the section 245A(d) income of USP to the extent that it is allocated and apportioned to the section 245A(d) income group (the statutory grouping) under §1.861–20. Section 1.861–20(c) allocates and apportions foreign income tax to the statutory and residual groupings to which the items of foreign gross income that were included in the foreign tax base are assigned under §1.861–20(d). Section 1.861–20(d)(3)(i) assigns foreign gross income that is a foreign dividend amount, to the extent of the U.S. dividend amount, to the statutory and residual groupings to which the U.S. dividend amount is assigned. Of the $1,000x foreign dividend amount, $500x is therefore assigned to the statutory and residual groupings to which the $500x U.S. dividend amount is assigned under Federal income tax law. The entire $500x U.S. dividend amount is a dividend for which a section 245A(a) deduction is allowed and is therefore section 245A(d) income that is assigned to the section 245A(d) income group. Accordingly, $500x of the foreign dividend amount is assigned to the section 245A(d) income group. Under §1.861–20(f), $75x ($150x × $500x/$1,000x) of the Country A withholding tax is allocated to the section 245A(d) income group and so under paragraph (b)(1) of this section is attributable to the section 245A(d) income of USP.

(C) *Attribution of foreign income taxes to non-inclusion income.* The remaining $75x of the Country A withholding tax is described in paragraph (b)(2)(i) of this section because the $500x of foreign dividend amount that corresponds to the $500x U.S. return of capital amount is assigned, and the remaining withholding tax imposed on that foreign dividend amount is allocated and apportioned, by reference to the characterization of the tax book value of the stock of CFC. Under paragraph (b)(2)(ii) of this section, the remaining $75x Country A withholding tax is attributable to non-inclusion income of CFC to the extent that the tax is allocated and apportioned under §1.861–20 to USP's section 245A subgroup of general category stock, section 245A subgroup of passive category stock, and section 245A subgroup of U.S. source category stock (the statutory groupings) for purposes of section 904 as the operative section. Under §1.861–20(d)(3)(i), the $500x portion of the foreign dividend amount that corresponds to the $500x U.S. return of capital amount is assigned to the statutory and residual groupings to which $500x of earnings of CFC would be assigned if CFC recognized them in Year 1. Those earnings are deemed to arise in the statutory and residual groupings in the same proportions as the proportions of the tax book value of CFC's stock in the groupings for Year 1 for purposes of applying the asset method of expense allocation and apportionment under §1.861–9. Under §1.861–9, §1.861–9T(f), and §1.861–13, for purposes of section 904 as the operative section, all of the tax book value of the stock of CFC is assigned to USP's section 245A subgroup of general category stock because CFC uses the modified gross income method to allocate and apportion its interest expense and earns only specified foreign source general category gross income for Year 1. Under §1.861–20(d)(3)(i), if CFC recognized $500x of earnings in Year 1 these earnings would be deemed to arise in the section 245A subgroup of general category stock. Accordingly, the remaining $500x of foreign dividend amount is assigned to USP's section 245A subgroup of general category stock. Under §1.861–20(f), the remaining $75x of withholding tax is allocated to the section 245A subgroup and, under paragraph (b)(2)(ii) of this section, is attributable to the non-inclusion income of CFC.

(D) *Disallowance.* Under paragraph (a)(1)(i) of this section, no credit under section 901 or deduction is allowed in any taxable year to USP for the $75x portion of the Country A withholding tax that is attributable to section 245A(d) income of USP. Under paragraph (a)(1)(iii) of this section, no credit under section 901 or deduction is allowed in any taxable year to USP for the $75x portion of the Country A withholding tax that is attributable to non-inclusion income of CFC.

(6) *Example 5: Income of a reverse hybrid*—

(i) *Facts.* CFC is a reverse hybrid. In Year 1, CFC earns a $500x item of gain described in section 907(c)(1)(B) that is non-inclusion income. CFC also earns for Federal income tax purposes and Country A tax purposes a $1,000x item of royalty income, of which $500x is gross included tested income and $500x is non-inclusion income. USP includes the $500x item of foreign gain and the $1,000x item of foreign gross royalty income in its Country A taxable income, and the items are foreign law pass-through income. If CFC included these items under Country A tax law, its $1,000x of royalty income for Federal income tax purposes would be the corresponding U.S. item for the foreign gross royalty income, and its $500x of gain for Federal income tax purposes would be the corresponding U.S. item for the foreign gain. Country A imposes a $150x foreign income tax on USP with respect to $1,500x of foreign gross income.

(ii) *Analysis*—(A) *In general.* The rules of this section are applied by first determining the portion of the $150x Country A tax that is attributable under paragraph (b)(1) of this section to the section 245A(d) income of USP, and then by determining the portion of the $150x Country A tax that is described in paragraph (b)(2)(i) of this section and that is attributable under either paragraph (b)(2)(ii) or (iii) of this section to the non-inclusion income of CFC. No credit or deduction is allowed under paragraph (a)(1)(i) of this section for any portion of the $150x Country A tax that is attributable to the section 245A(d) income of USP or, under paragraph (a)(1)(iii) of this section, for any portion of that tax that is attributable to the non-inclusion income of CFC, to the extent the tax is not disallowed under paragraph (a)(1)(i) of this section.

(B) *Attribution of foreign income taxes to section 245A(d) income.* Under paragraph (b)(1) of this section, the $150x Country A tax is attributable to section 245A(d) income to the extent the tax is allocated and apportioned to the section 245A(d) income group (the statutory grouping) under §1.861–20. Section 1.861–20(c) allocates and apportions foreign income tax to the statutory and residual groupings to which the items of foreign gross income that were included in the foreign tax base are assigned under §1.861–20(d). In general, §1.861–20(d) assigns foreign gross income to the statutory and residual groupings to which the corresponding U.S. item is assigned. Section 1.861–20(d)(3)(i)(C) assigns the foreign law pass-through income that USP includes by reason of its ownership of CFC to the statutory and residual groupings by treating USP's foreign law pass-through income as foreign gross income of CFC, and by treating CFC as paying the $150x of Country A tax in CFC's U.S. taxable year within which its foreign taxable year ends (Year 1). CFC is therefore treated as including a $1,000x foreign gross royalty item and a $500x foreign gross income item of gain and paying $150x of Country A tax in Year 1. These foreign gross income items are assigned to the statutory and residual groupings to which the corresponding U.S. items are assigned under Federal income tax law. No foreign gross income is assigned to the section 245A(d) income group because neither the corresponding U.S. item of royalty income nor the corresponding U.S. item of gain is assigned to the section 245A(d) income group. Therefore, none of USP's Country A tax is allocated to the section 245A(d) income group.

(C) *Attribution of foreign income taxes to non-inclusion income.* The $150x Country A tax is described in paragraph (b)(2) of this section because USP is a United States shareholder of CFC, CFC is a reverse hybrid, and §1.861–20(d)(3)(i)(C) allocates and apportions the tax by reference to the income of CFC. Under paragraph (b)(2)(iii) of this section, the $150x Country A tax is attributable to the non-inclusion income of CFC to the extent that the foreign income taxes are allocated and apportioned to the non-inclusion income group under §1.861–20. For the reasons described in paragraph (d)(6)(ii)(B) of this section, under §1.861–20(d)(3)(i)(C) CFC is treated as including a $1,000x foreign gross royalty item and a $500x foreign gross income item of gain and paying $150x of Country A tax in Year 1. These foreign gross income items are assigned to the statutory and residual groupings to which the corresponding U.S. items are assigned under Federal income tax law. For Federal income tax purposes, the $500x item of gain and $500x of the $1,000x item of royalty income are items of non-inclusion income that are therefore assigned to the non-inclusion income group. The remaining $500x of the foreign gross royalty income item is assigned to the residual grouping. Under §1.861–20(f), $100x ($150x × $1,000x/$1,500x) of the Country A tax is apportioned to the non-inclusion income group, and $50x ($150x × $500x/$1,500x) is apportioned to the residual grouping. Under paragraph (b)(2)(iii) of this section, the $100x of Country A tax that is apportioned to the non-inclusion income group under §1.861–20(d)(3)(i)(C) is attributable to non-inclusion income of CFC.

(D) *Disallowance.* Under paragraph (a)(1)(iii) of this section, no credit under section 901 or deduction is allowed in any taxable year to USP for the $100x of Country A foreign income tax that is attributable to non-inclusion income of CFC.

(e) *Applicability date.* This section applies to taxable years of a foreign corporation that begin after December 31, 2019, and end on or after November 2, 2020, and with respect to a United States person, taxable years in which or with which such taxable years of the foreign corporation end.

[T.D. 9959, 87 FR 317, Jan. 4, 2022, as amended by 87 FR 45018, July 27, 2022]

§ 1.245A(e)–1 Special rules for hybrid dividends.

(a) *Overview.* This section provides rules for hybrid dividends. Paragraph (b) of this section disallows the deduction under section 245A(a) for a hybrid dividend received by a United States shareholder from a CFC. Paragraph (c) of this section provides a rule for hybrid dividends of tiered corporations. Paragraph (d) of this section sets forth rules regarding a hybrid deduction account. Paragraph (e) of this section provides an anti-avoidance rule. Paragraph (f) of this section provides definitions. Paragraph (g) of this section illustrates the application of the rules of this section through examples. Paragraph (h) of this section provides the applicability date.

(b) *Hybrid dividends received by United States shareholders*—(1) *In general.* If a United States shareholder receives a hybrid dividend, then—

(i) The United States shareholder is not allowed a deduction under section 245A(a) for the hybrid dividend; and

(ii) The rules of section 245A(d) and §1.245A(d)–1 (disallowance of foreign tax credits and deductions) apply to the hybrid dividend. See paragraph (g)(1) of this section for an example illustrating the application of paragraph (b) of this section.

(2) *Definition of hybrid dividend.* The term *hybrid dividend* means an amount received by a United States shareholder from a CFC for which, without regard to section 245A(e) and this section as well as §1.245A–5, the United States shareholder would be allowed a deduction under section 245A(a), to the extent of the sum of the United States shareholder's hybrid deduction accounts (as described in paragraph (d) of this section) with respect to each share of stock of the CFC, determined at the close of the CFC's taxable year (or in accordance with paragraph (d)(5) of this section, as applicable). No other amount received by a United States shareholder from a CFC is a hybrid dividend for purposes of section 245A.

(3) *Special rule for certain dividends attributable to earnings of lower-tier foreign corporations.* This paragraph (b)(3) applies if a domestic corporation directly or indirectly (as determined under the principles of §1.245A–5(g)(3)(ii)) sells or exchanges stock of a foreign corporation and, pursuant to section 1248, the gain recognized on the sale or exchange is included in gross income as a dividend. In such a case, for purposes of this section—

(i) To the extent that earnings and profits of a lower-tier CFC gave rise to the dividend under section 1248(c)(2), those earnings and profits are treated as distributed as a dividend by the lower-tier CFC directly to the domestic corporation under the principles of §1.1248–1(d); and

(ii) To the extent the domestic corporation indirectly owns (within the meaning of section 958(a)(2), and determined by treating a domestic partnership as foreign) shares of stock of the lower-tier CFC, the hybrid deduction accounts with respect to those shares are treated as the domestic corporation's hybrid deduction accounts with respect to stock of the lower-tier CFC. Thus, for example, if a domestic corporation sells or exchanges all the stock of an upper-tier CFC and under this paragraph (b)(3) there is considered to be a dividend paid directly by the lower-tier CFC to the domestic corporation, then the dividend is generally a hybrid dividend to the extent of the sum of the upper-tier CFC's hybrid deduction accounts with respect to stock of the lower-tier CFC.

(4) *Ordering rule.* Amounts received by a United States shareholder from a CFC are subject to the rules of section 245A(e) and this section based on the order in which they are received. Thus, for example, if on different days during a CFC's taxable year a United States shareholder receives dividends from the CFC, then the rules of section 245A(e) and this section apply first to the dividend received on the earliest date (based on the sum of the United States shareholder's hybrid deduction accounts with respect to each share of stock of the CFC), and then to the dividend received on the next earliest date (based on the remaining sum).

(c) *Hybrid dividends of tiered corporations*—(1) *In general.* If a CFC (the *receiving CFC*) receives a tiered hybrid dividend from another CFC, and a domestic corporation is a United States shareholder with respect to both CFCs, then, notwithstanding any other provision of the Code—

(i) For purposes of section 951(a) as to the United States shareholder, the tiered hybrid dividend is treated for purposes of section 951(a)(1)(A) as subpart F income of the receiving CFC for the taxable year of the CFC in which the tiered hybrid dividend is received;

(ii) The United States shareholder includes in gross income an amount equal to its pro rata share (determined in the same manner as under section 951(a)(2)) of the subpart F income described in paragraph (c)(1)(i) of this section; and

(iii) The rules of section 245A(d) and §1.245A(d)–1 (disallowance of foreign tax credit, including for taxes that would have been deemed paid under section 960(a) or (b), and deductions) apply to the amount included under paragraph (c)(1)(ii) of this section in the United States shareholder's gross income. See paragraph (g)(2) of this section for an example illustrating the application of paragraph (c) of this section.

(2) *Definition of tiered hybrid dividend.* The term *tiered hybrid dividend* means an amount received by a receiving CFC from another CFC to the extent that the amount would be a hybrid dividend under paragraph (b)(2) of this section if, for purposes of section 245A and the regulations in this part under section 245A (except for section 245A(e)(2) and this paragraph (c)), the receiving CFC were a domestic corporation. A tiered hybrid dividend does not include an amount described in section 959(b). No other amount received by a receiving CFC from another CFC is a tiered hybrid dividend for purposes of section 245A.

(3) *Special rule for certain dividends attributable to earnings of lower-tier foreign corporations.* This paragraph (c)(3) applies if a CFC directly or indirectly (as determined under the principles of §1.245A–5(g)(3)(ii)) sells or exchanges stock of a foreign corporation and pursuant to section 964(e)(1) the gain recognized on the sale or exchange is included in gross income as a dividend. In such a case, the rules of paragraph (b)(3) of this section apply, by treating the CFC as the domestic corporation described in paragraph (b)(3) of this section and substituting the phrase "sections 964(e)(1) and 1248(c)(2)" for the phrase "section 1248(c)(2)" in paragraph (b)(3)(i) of this section.

(4) *Interaction with rules under section 964(e).* To the extent a dividend described in section 964(e)(1) (gain on certain stock sales by CFCs treated as dividends) is a tiered hybrid dividend, the rules of section 964(e)(4) do not apply as to a domestic corporation that is a United States shareholder of both of the CFCs described in paragraph (c)(1) of this section and, therefore, such United States shareholder is not allowed a deduction under section

245A(a) for the amount included in gross income under paragraph (c)(1)(ii) of this section.

(d) *Hybrid deduction accounts*—(1) *In general.* A specified owner of a share of CFC stock must maintain a hybrid deduction account with respect to the share. The hybrid deduction account with respect to the share must reflect the amount of hybrid deductions of the CFC allocated to the share (as determined under paragraphs (d)(2) and (3) of this section), and must be maintained in accordance with the rules of paragraphs (d)(4) through (6) of this section.

(2) *Hybrid deductions*—(i) *In general.* The term *hybrid deduction* of a CFC means a deduction or other tax benefit (such as an exemption, exclusion, or credit, to the extent equivalent to a deduction) for which the requirements of paragraphs (d)(2)(i)(A) and (B) of this section are both satisfied.

(A) The deduction or other tax benefit is allowed to the CFC (or a person related to the CFC) under a relevant foreign tax law, regardless of whether the deduction or other tax benefit is used, or otherwise reduces tax, currently under the relevant foreign tax law.

(B) The deduction or other tax benefit relates to or results from an amount paid, accrued, or distributed with respect to an instrument issued by the CFC and treated as stock for U.S. tax purposes, or is a deduction allowed to the CFC with respect to equity. Examples of such a deduction or other tax benefit include an interest deduction, a dividends paid deduction, and a notional interest deduction (or similar deduction determined with respect to the CFC's equity). However, a deduction or other tax benefit relating to or resulting from a distribution by the CFC that is a dividend for purposes of the relevant foreign tax law is considered a hybrid deduction only to the extent it has the effect of causing the earnings that funded the distribution to not be included in income (determined under the principles of §1.267A–3(a)) or otherwise subject to tax under such tax law. Thus, for example, upon a distribution by a CFC that is treated as a dividend for purposes of the CFC's tax law to a shareholder of the CFC, a dividends paid deduction allowed to the CFC under its tax law (or a refund to the shareholder, including through a credit, of tax paid by the CFC on the earnings that funded the distribution) pursuant to an integration or imputation system is not a hybrid deduction of the CFC to the extent that the shareholder, if a tax resident of the CFC's country, includes the distribution in income under the CFC's tax law or, if not a tax resident of the CFC's country, is subject to withholding tax (as defined in section 901(k)(1)(B)) on the distribution under the CFC's tax law. As an additional example, upon a distribution by a CFC to a shareholder of the CFC that is a tax resident of the CFC's country, a dividends received deduction allowed to the shareholder under the tax law of such foreign country pursuant to a regime intended to relieve double-taxation within the group is not a hybrid deduction of the CFC (though if the CFC were also allowed a deduction or other tax benefit for the distribution under such tax, such deduction or other tax benefit would be a hybrid deduction of the CFC). See paragraphs (g)(1) and (2) of this section for examples illustrating the application of paragraph (d) of this section.

(ii) *Coordination with foreign disallowance rules.* The following special rules apply for purposes of determining whether a deduction or other tax benefit is allowed to a CFC (or a person related to the CFC) under a relevant foreign tax law:

(A) Whether the deduction or other tax benefit is allowed is determined without regard to a rule under the relevant foreign tax law that disallows or suspends deductions if a certain ratio or percentage is exceeded (for example, a thin capitalization rule that disallows interest deductions if debt to equity exceeds a certain ratio, or a rule similar to section 163(j) that disallows or suspends interest deductions if interest exceeds a certain percentage of income).

(B) Except as provided in this paragraph (d)(2)(ii)(B), whether the deduction or other tax benefit is allowed is determined without regard to hybrid mismatch rules, if any, under the relevant foreign tax law that may disallow such deduction or other tax benefit. However, whether the deduction or other tax benefit is allowed is determined with regard to hybrid mismatch rules under the relevant foreign tax law if the amount giving rise to the deduction or other tax benefit neither gives rise to a dividend for U.S. tax purposes nor, based on all the facts and circumstances, is reasonably expected to give rise to a dividend for U.S. tax purposes that will be paid within 12 months from the end of the taxable period for which the deduction or other tax benefit would be allowed but for the hybrid mismatch rules. For purposes of this paragraph (d)(2)(ii)(B), the term hybrid mismatch rules has the meaning provided in §1.267A–5(b)(10).

(iii) *Anti-duplication rule.* A deduction or other tax benefit allowed to a CFC (or a person related to the CFC) under a relevant foreign tax law for an amount paid, accrued, or distributed with respect to an instrument issued by the CFC is not a hybrid deduction to the extent that treating it as a hybrid deduction would have the effect of duplicating a hybrid deduction that is a deduction or other tax benefit allowed under such tax law for an amount paid, accrued, or distributed with respect to an instrument that is issued by a CFC at a higher tier and that has terms substantially similar to the terms of the first instrument. For example, if an upper tier CFC issues to a corporate United States shareholder a hybrid instrument (the ''upper tier instrument''), a lower tier CFC issues to the upper tier CFC a hybrid instrument that has terms substantially similar to the terms of the upper tier instrument (the ''mirror instrument''), the CFCs are tax residents of the same foreign country, and the upper tier CFC includes in income under its tax law (as determined under the principles of §1.267A–3(a)) amounts accrued with respect to the mirror instrument, then a deduction allowed to the lower tier CFC under such foreign tax law for an amount accrued pursuant to the mirror instrument is not a hybrid deduction (but a deduction allowed to the upper tier CFC under the foreign tax law for an amount accrued with respect to the upper tier instrument is a hybrid deduction).

(iv) *Application limited to items allowed in taxable years ending on or after December 20, 2018; special rule for deductions with respect to equity.* A deduction or other tax benefit, other than a deduction with respect to equity, allowed to a CFC (or a person related to the CFC) under a relevant foreign tax law is taken into account for purposes of this section only if it was allowed with respect to a taxable year under the relevant foreign tax law ending on or after December 20, 2018. A deduction with respect to equity allowed to a CFC under a relevant foreign tax law is taken into account for purposes of this section only if it was allowed with respect to a taxable year under the relevant foreign tax law beginning on or after December 20, 2018.

(3) *Allocating hybrid deductions to shares.* A hybrid deduction is allocated to a share of stock of a CFC to the extent that the hybrid deduction (or amount equivalent to a deduction) relates to an amount paid, accrued, or distributed by the CFC with respect to the share. However, in the case of a hybrid deduction that is a deduction with respect to equity (such as a notional interest deduction), the deduction is allocated to a share of stock of a CFC based on the product of—

(i) The amount of the deduction allowed for all of the equity of the CFC; and

(ii) A fraction, the numerator of which is the value of the share and the denominator of which is the value of all of the stock of the CFC.

(4) *Maintenance of hybrid deduction accounts*—(i) *In general.* A specified owner's hybrid deduction account with respect to a share of stock of a CFC is, as of the close of the taxable year of the CFC, adjusted pursuant to the following rules.

(A) First, the account is increased by the amount of hybrid deductions of the CFC allocated to the share for the taxable year.

(B) Second, the account is decreased (but not below zero) pursuant to the rules of paragraphs (d)(4)(i)(B)(*1*) through (*3*) of this section, in the order set forth in this paragraph (d)(4)(i)(B).

(*1*) *Adjusted subpart F inclusions*—(*i*) *In general.* Subject to the limitation in paragraph (d)(4)(i)(B)(*1*)(*ii*) of this section, the account is reduced by an adjusted subpart F inclusion with respect to the share for the taxable year, as determined pursuant to the rules of paragraph (d)(4)(ii) of this section.

(*ii*) *Limitation.* The reduction pursuant to paragraph (d)(4)(i)(B)(*1*)(*i*) of this section cannot exceed the hybrid deductions of the CFC allocated to the share for the taxable year multiplied by a fraction, the numerator of which is the sum of the items of gross income of the CFC that give rise to subpart F income (determined without regard to an amount treated as subpart F income by reason of section 964(e)(4)(A)(i), to the extent that a deduction under section 245A(a) is allowed for a portion of the amount included under section 964(e)(4)(A)(ii) in the gross income of a domestic corporation) of the CFC for the taxable year and the denominator of which is the sum of all the items of gross income of the CFC for the taxable year.

(*iii*) *Special rule allocating otherwise unused adjusted subpart F inclusions across accounts in certain cases.* This paragraph (d)(4)(i)(B)(*1*)(*iii*) applies after each of the specified owner's hybrid deduction accounts with respect to its shares of stock of the CFC are adjusted pursuant to paragraph (d)(4)(i)(B)(*1*)(*i*) of this section but before the accounts are adjusted pursuant to paragraph (d)(4)(i)(B)(*2*) of this section, to the extent that one or more of the hybrid deduction accounts would have been reduced by an amount pursuant to paragraph (d)(4)(i)(B)(*1*)(*i*) of this section but for the limitation in paragraph (d)(4)(i)(B)(*1*)(*ii*) of this section (the aggregate of the amounts that would have been reduced but for the limitation, the *unused reduction amount*, and the accounts that would have been reduced by the unused reduction amount, the *unused reduction amount accounts*). When this paragraph (d)(4)(i)(B)(*1*)(*iii*) applies, the specified owner's hybrid deduction accounts other than the unused reduction amount accounts (if any) are ratably reduced by the lesser of the unused reduction amount and the difference of the following two amounts: The hybrid deductions of the CFC allocated to the specified owner's shares of stock of the CFC for the taxable year multiplied by the fraction described in paragraph (d)(4)(i)(B)(*1*)(*ii*) of this section; and the reductions pursuant to paragraph (d)(4)(i)(B)(*1*)(*i*) of this section with respect to the specified owner's shares of stock of the CFC.

(*2*) *Adjusted GILTI inclusions*—(*i*) *In general.* Subject to the limitation in paragraph (d)(4)(i)(B)(*2*)(*ii*) of this section, the account is reduced by an adjusted GILTI inclusion with respect to the share for the taxable year, as determined pursuant to the rules of paragraph (d)(4)(ii) of this section.

(*ii*) *Limitation.* The reduction pursuant to paragraph (d)(4)(i)(B)(*2*)(*i*) of this section cannot exceed the hybrid deductions of the CFC allocated to the share for the taxable year multiplied by a fraction, the numerator of which is the sum of the items of gross tested income of the CFC for the taxable year and the denominator of which is the sum of all the items of gross income of the CFC for the taxable year.

(*iii*) *Special rule allocating otherwise unused adjusted GILTI inclusions across accounts in certain cases.* This paragraph (d)(4)(i)(B)(*2*)(*iii*) applies after each of the specified owner's hybrid deduction accounts with respect to its shares of stock of the CFC are adjusted pursuant to paragraph (d)(4)(i)(B)(*2*)(*i*) of this section but before the accounts are adjusted pursuant to paragraph (d)(4)(i)(B)(*3*) of this section, to the extent that one or more of the hybrid deduction accounts would have been reduced by an amount pursuant to paragraph (d)(4)(i)(B)(*2*)(*i*) of this section but for the limitation in paragraph (d)(4)(i)(B)(*2*)(*ii*) of this section (the aggregate of the amounts that would have been reduced but for the limitation, the *unused reduction amount*, and the accounts that would have been reduced by the unused reduction amount, the *unused reduction amount accounts*). When this paragraph (d)(4)(i)(B)(*2*)(*iii*) applies, the specified owner's hybrid deduction accounts other than the unused reduction amount accounts (if any) are ratably reduced by the lesser of the unused reduction amount and the difference of the following two amounts: The hybrid deductions of the

CFC allocated to the specified owner's shares of stock of the CFC for the taxable year multiplied by the fraction described in paragraph (d)(4)(i)(B)(*2*)(*ii*) of this section; and the reductions pursuant to paragraph (d)(4)(i)(B)(*2*)(*i*) of this section with respect to the specified owner's shares of stock of the CFC. *See* paragraph (g)(1)(v)(C) of this section for an illustration of the application of this paragraph (d)(4)(i)(B)(*2*)(*iii*).

(*3*) *Certain section 956 inclusions*. The account is reduced by an amount included in the gross income of a domestic corporation under sections 951(a)(1)(B) and 956 with respect to the share for the taxable year of the domestic corporation in which or with which the CFC's taxable year ends, to the extent so included by reason of the application of section 245A(e) and this section to the hypothetical distribution described in §1.956–1(a)(2).

(C) Third, the account is decreased by the amount of hybrid deductions in the account that gave rise to a hybrid dividend or tiered hybrid dividend during the taxable year. If the specified owner has more than one hybrid deduction account with respect to its stock of the CFC, then a pro rata amount in each hybrid deduction account is considered to have given rise to the hybrid dividend or tiered hybrid dividend, based on the amounts in the accounts before applying this paragraph (d)(4)(i)(C).

(ii) *Rules regarding adjusted subpart F and GILTI inclusions*. (A) The term *adjusted subpart F inclusion* means, with respect to a share of stock of a CFC for a taxable year of the CFC, a domestic corporation's pro rata share of the CFC's subpart F income included in gross income under section 951(a)(1)(A) (determined without regard to an amount included in gross income by the domestic corporation by reason of section 964(e)(4)(A)(ii), to the extent a deduction under section 245A(a) is allowed for the amount) for the taxable year of the domestic corporation in which or with which the CFC's taxable year ends, to the extent attributable to the share (as determined under the principles of section 951(a)(2) and §1.951–1(b) and (e)), adjusted (but not below zero) by—

(*1*) Adding to the amount the associated foreign income taxes with respect to the amount; and

(*2*) Subtracting from such sum the quotient of the associated foreign income taxes divided by the percentage described in section 11(b).

(B) The term *adjusted GILTI inclusion* means, with respect to a share of stock of a CFC for a taxable year of the CFC, a domestic corporation's GILTI inclusion amount (within the meaning of §1.951A–1(c)(1)) for the U.S. shareholder inclusion year (within the meaning of §1.951A–1(f)(7)), to the extent attributable to the share (as determined under paragraph (d)(4)(ii)(C) of this section), adjusted (but not below zero) by—

(*1*) Adding to the amount the associated foreign income taxes with respect to the amount;

(*2*) Multiplying such sum by the difference of 100 percent and the section 250(a)(1)(B)(i) deduction percentage; and

(*3*) Subtracting from such product the quotient of 80 percent of the associated foreign income taxes divided by the percentage described in section 11(b).

(C) A domestic corporation's GILTI inclusion amount for a U.S. shareholder inclusion year is attributable to a share of stock of the CFC based on a fraction—

(*1*) The numerator of which is the domestic corporation's pro rata share of the tested income of the CFC for the U.S. shareholder inclusion year, to the extent attributable to the share (as determined under the principles of §1.951A–1(d)(2)); and

(*2*) The denominator of which is the aggregate of the domestic corporation's pro rata share of the tested income of each tested income CFC (as defined in §1.951A–2(b)(1)) for the U.S. shareholder inclusion year.

(D) The term *associated foreign income taxes* means—

(*1*) With respect to a domestic corporation's pro rata share of the subpart F income of the CFC included in gross income under section 951(a)(1)(A) and attributable to a share of stock of a CFC for a taxable year of the CFC, current year tax (as described in §1.960–1(b)(4)) allocated and apportioned under §1.960–1(d)(3)(ii) to the subpart F income groups (as described in §1.960–1(b)(30)) of the CFC for the taxable year, to the extent allocated to the share under paragraph (d)(4)(ii)(E) of this section; and

(*2*) With respect to a domestic corporation's GILTI inclusion amount under section 951A attributable to a share of stock of a CFC for a taxable year of the CFC, the product of—

(*i*) Current year tax (as described in §1.960–1(b)(4)) allocated and apportioned under §1.960–1(d)(3)(ii) to the tested income groups (as described in §1.960–1(b)(33)) of the CFC for the taxable year, to the extent allocated to the share under paragraph (d)(4)(ii)(F) of this section;

(*ii*) The domestic corporation's inclusion percentage (as described in §1.960–2(c)(2)); and

(*iii*) The section 904 limitation fraction with respect to the domestic corporation for the U.S. shareholder inclusion year.

(E) Current year tax allocated and apportioned to a subpart F income group of a CFC for a taxable year is allocated to a share of stock of the CFC by multiplying the foreign income tax by a fraction—

(*1*) The numerator of which is the domestic corporation's pro rata share of the subpart F income of the CFC for the taxable year, to the extent attributable to the share (as determined under the principles of section 951(a)(2) and §1.951–1(b) and (e)); and

(*2*) The denominator of which is the subpart F income of the CFC for the taxable year.

(F) Current year tax allocated and apportioned to a tested income group of a CFC for a taxable year is allocated to a share of stock of the CFC by multiplying the foreign income tax by a fraction—

(*1*) The numerator of which is the domestic corporation's pro rata share of tested income of the CFC for the taxable year, to the extent attributable to the share (as determined under the principles §1.951A–1(d)(2)); and

(*2*) The denominator of which is the tested income of the CFC for the taxable year.

(G) The term *section 904 limitation fraction* means, with respect to a domestic corporation for a U.S. shareholder inclusion year, a fraction—

(*1*) The numerator of which is the amount of foreign tax credits for the U.S. shareholder inclusion year that, by reason of sections 901 and 960(d) and taking into account section 904, the domestic corporation is allowed for the separate category set forth in section 904(d)(1)(A) (amounts includible in gross income under section 951A); and

(*2*) The denominator of which is the amount of foreign tax credits for the U.S. shareholder inclusion year that, by reason of sections 901 and 960(d) and without regard to section 904, the domestic corporation would be allowed for the separate category set forth in section 904(d)(1)(A) (amounts includible in gross income under section 951A).

(H) The term *section 250(a)(1)(B)(i) deduction percentage* means, with respect to a domestic corporation for a U.S. shareholder inclusion year, a fraction—

(*1*) The numerator of which is the amount of the deduction under section 250 allowed to the domestic corporation for the U.S. shareholder inclusion year by reason of section 250(a)(1)(B)(i) (taking into account section 250(a)(2)(B)); and

(*2*) The denominator of which is the domestic corporation's GILTI inclusion amount for the U.S. shareholder inclusion year.

(iii) *Acquisition of account and certain other adjustments*—(A) *In general*. The following rules apply when a person (the *acquirer*) directly or indirectly through a partnership, trust, or estate acquires a share of stock of a CFC from another person (the *transferor*).

(*1*) In the case of an acquirer that is a specified owner of the share immediately after the acquisition, the transferor's hybrid deduction account, if any, with respect to the share becomes the hybrid deduction account of the acquirer.

(*2*) In the case of an acquirer that is not a specified owner of the share immediately after the acquisition, the transferor's hybrid deduction account, if any, is eliminated and accordingly is not thereafter taken into account by any person.

(B) *Additional rules*. The following rules apply in addition to the rules of paragraph (d)(4)(iii)(A) of this section.

(*1*) *Certain section 354 or 356 exchanges*. The following rules apply when a shareholder of a CFC (the CFC, the *target CFC;* the shareholder, the *exchanging shareholder*) exchanges stock of the target CFC for stock of another CFC (the *acquiring CFC*) pursuant to an exchange described in section 354 or 356 that occurs in connection with a transaction described in section 381(a)(2) in which the target CFC is the transferor corporation.

(*i*) In the case of an exchanging shareholder that is a specified owner of one or more shares of stock of the acquiring CFC immediately after the exchange, the exchanging shareholder's hybrid deduction accounts with respect to the shares of stock of the target CFC that it exchanges are attributed to the shares of stock of the acquiring CFC that it receives in the exchange.

(*ii*) In the case of an exchanging shareholder that is not a specified owner of one or more shares of stock of the acquiring CFC immediately after the exchange, the exchanging shareholder's hybrid deduction accounts with respect to its shares of stock of the target CFC are eliminated and accordingly are not thereafter taken into account by any person.

(*2*) *Section 332 liquidations*. If a CFC is a distributor corporation in a transaction described in section 381(a)(1) (the *distributor CFC*) in which a controlled foreign corporation is the acquiring corporation (the *distributee CFC*), then each hybrid deduction account with respect to a share of stock of the distributee CFC is increased pro rata by the sum of the hybrid deduction accounts with respect to shares of stock of the distributor CFC.

(*3*) *Recapitalizations*. If a shareholder of a CFC exchanges stock of the CFC pursuant to a reorganization described in section 368(a)(1)(E) or a transaction to which section 1036 applies, then the shareholder's hybrid deduction accounts with respect to the stock of the CFC that it exchanges are attributed to the shares of stock of the CFC that it receives in the exchange.

(*4*) *Certain distributions involving section 355 or 356*. In the case of a transaction involving a distribution under section 355 (or so much of section 356 as it relates to section 355) by a CFC (the *distributing CFC*) of stock of another CFC (the *controlled CFC*), the balance of the hybrid deduction accounts with respect to stock of the distributing CFC is attributed to stock of the controlled CFC in a manner similar to how earnings and profits of the distributing CFC and controlled CFC are adjusted. To the extent the balance of the hybrid deduction accounts with respect to stock of the distributing CFC is not so attributed to stock of the controlled CFC, such balance remains as the balance of the hybrid deduction accounts with respect to stock of the distributing CFC.

(*5*) *Effect of section 338(g) election*—(*i*) *In general*. If an election under section 338(g) is made with respect to a qualified stock purchase (as described in section 338(d)(3)) of stock of a CFC, then a hybrid deduction account with respect to a share of stock of the old target is not treated as (or attributed to) a hybrid deduction account with respect to a share of stock of the new target. Accordingly, immediately after the deemed asset sale described in §1.338–1, the balance of a hybrid deduction account with respect to a share of stock of the new target is zero; the account must then be maintained in accordance with the rules of paragraph (d) of this section.

(*ii*) *Special rule regarding carryover FT stock*. Paragraph (d)(4)(iii)(B)(*5*)(*i*) of this section does not apply as to a hybrid deduction account with respect to a share of carryover FT stock (as described in §1.338–9(b)(3)(i)). A hybrid deduction account with respect to a share of carryover FT stock is attributed to the corresponding share of stock of the new target.

(5) *Determinations and adjustments made during year of transfer in certain cases*. This paragraph (d)(5) applies if on a date other than the date that is the last day of the CFC's taxable year a United States shareholder of the CFC or an upper-tier CFC with respect to the CFC directly or indirectly (as determined under the principles of §1.245A–5(g)(3)(ii)) transfers a share of stock of the CFC, and, during the taxable year, but on or before the transfer date, the United States shareholder or upper-tier CFC receives an amount from the CFC that is subject to the

rules of section 245A(e) and this section. In such a case, the following rules apply:

(i) As to the United States shareholder or upper-tier CFC and the United States shareholder's or upper-tier CFC's hybrid deduction accounts with respect to each share of stock of the CFC (regardless of whether such share is transferred), the determinations and adjustments under this section that would otherwise be made at the close of the CFC's taxable year are made at the close of the date of the transfer. When making these determinations and adjustments at the close of the date of the transfer, each hybrid deduction account described in the previous sentence is pursuant to paragraph (d)(4)(ii)(A) of this section increased by a ratable portion (based on the number of days in the taxable year within the pre-transfer period to the total number of days in the taxable year) of the hybrid deductions of the CFC allocated to the share for the taxable year, and pursuant to paragraph (d)(4)(ii)(C) of this section decreased by the amount of hybrid deductions in the account that gave rise to a hybrid dividend or tiered hybrid dividend during the portion of the taxable year up to and including the transfer date. Thus, for example, if a United States shareholder of a CFC exchanges stock of the CFC in an exchange described in §1.367(b)–4(b)(1)(i) and is required to include in income as a deemed dividend the section 1248 amount attributable to the stock exchanged, then: As of the close of the date of the exchange, each of the United States shareholder's hybrid deductions accounts with respect to a share of stock of the CFC is increased by a ratable portion of the hybrid deductions of the CFC allocated to the share for the taxable year (based on the number of days in the taxable year within the pre-transfer period to the total number of days in the taxable year); the deemed dividend is a hybrid dividend to the extent of the sum of the United States shareholder's hybrid deduction accounts with respect to each share of stock of the CFC; and, as the close of the date of the exchange, each of the accounts is decreased by the amount of hybrid deductions in the account that gave rise to a hybrid dividend during the portion of the taxable year up to and including the date of the exchange.

(ii) As to a hybrid deduction account described in paragraph (d)(5)(i) of this section, the adjustments to the account as of the close of the taxable year of the CFC must take into account the adjustments, if any, occurring with respect to the account pursuant to paragraph (d)(5)(i) of this section. Thus, for example, if an acquisition of a share of stock of a CFC occurs on a date other than the date that is the last day of the CFC's taxable year and pursuant to paragraph (d)(4)(iii)(A)(*1*) of this section the acquirer succeeds to the transferor's hybrid deduction account with respect to the share, then, as of the close of the taxable year of the CFC, the account is increased by a ratable portion of the hybrid deductions of the CFC allocated to the share for the taxable year (based on the number of days in the taxable year within the post-transfer period to the total number of days in the taxable year), and, decreased by the amount of hybrid deductions in the account that gave rise to a hybrid dividend or tiered hybrid dividend during the portion of the taxable year following the transfer date.

(6) *Effects of CFC functional currency*—(i) *Maintenance of the hybrid deduction account.* A hybrid deduction account with respect to a share of CFC stock must be maintained in the functional currency (within the meaning of section 985) of the CFC. Thus, for example, the amount of a hybrid deduction and the adjustments described in paragraphs (d)(4)(i)(A) and (B) of this section are determined based on the functional currency of the CFC. In addition, for purposes of this section, the amount of a deduction or other tax benefit allowed to a CFC (or a person related to the CFC) is determined taking into account foreign currency gain or loss recognized with respect to such deduction or other tax benefit under a provision of foreign tax law comparable to section 988 (treatment of certain foreign currency transactions).

(ii) *Determination of amount of hybrid dividend.* This paragraph (d)(6)(ii) applies if a CFC's functional currency is other than the functional currency of a

United States shareholder or upper-tier CFC that receives an amount from the CFC that is subject to the rules of section 245A(e) and this section. In such a case, the sum of the United States shareholder's or upper-tier CFC's hybrid deduction accounts with respect to each share of stock of the CFC is, for purposes of determining the extent that a dividend is a hybrid dividend or tiered hybrid dividend, translated into the functional currency of the United States shareholder or upper-tier CFC based on the spot rate (within the meaning of §1.988–1(d)) as of the date of the dividend.

(e) *Anti-avoidance rule.* Appropriate adjustments are made pursuant to this section, including adjustments that would disregard the transaction or arrangement, if a transaction or arrangement is undertaken with a principal purpose of avoiding the purposes of section 245A(e) and this section. For example, if a specified owner of a share of CFC stock transfers the share to another person, and a principal purpose of the transfer is to shift the hybrid deduction account with respect to the share to the other person or to cause the hybrid deduction account to be eliminated, then for purposes of this section the shifting or elimination of the hybrid deduction account is disregarded as to the transferor. As another example, if a transaction or arrangement is undertaken to affirmatively fail to satisfy the holding period requirement under section 246(c)(5) with a principal purpose of avoiding the tiered hybrid dividend rules described in paragraph (c) of this section, the transaction or arrangement is disregarded for purposes of this section. This paragraph (e) will not apply, however, to disregard (or make other adjustments with respect to) a transaction pursuant to which an instrument or arrangement that gives rise to hybrid deductions is eliminated or otherwise converted into another instrument or arrangement that does not give rise to hybrid deductions.

(f) *Definitions.* The following definitions apply for purposes of this section.

(1) The term *controlled foreign corporation* (or *CFC*) has the meaning provided in section 957.

(2) The term *domestic corporation* means an entity classified as a domestic corporation under section 7701(a)(3) and (4) or otherwise treated as a domestic corporation by the Internal Revenue Code. However, for purposes of this section, a domestic corporation does not include a regulated investment company (as described in section 851), a real estate investment trust (as described in section 856), or an S corporation (as described in section 1361).

(3) The term *person* has the meaning provided in section 7701(a)(1).

(4) The term *related* has the meaning provided in this paragraph (f)(4). A person is related to a CFC if the person is a related person within the meaning of section 954(d)(3). *See also* §1.954–1(f)(2)(iv)(B)(*1*) (neither section 318(a)(3), nor §1.958–2(d) or the principles thereof, applies to attribute stock or other interests).

(5) The term *relevant foreign tax law* means, with respect to a CFC, any regime of any foreign country or possession of the United States that imposes an income, war profits, or excess profits tax with respect to income of the CFC, other than a foreign anti-deferral regime under which a person that owns an interest in the CFC is liable to tax. If a foreign country has an income tax treaty with the United States that applies to taxes imposed by a political subdivision or other local authority of that country, then the tax law of the political subdivision or other local authority is deemed to be a tax law of a foreign country. Thus, the term includes any regime of a foreign country or possession of the United States that imposes income, war profits, or excess profits tax under which—

(i) The CFC is liable to tax as a resident;

(ii) The CFC has a branch that gives rise to a taxable presence in the foreign country or possession of the United States; or

(iii) A person related to the CFC is liable to tax as a resident, provided that under such person's tax law the person is allowed a deduction for amounts paid or accrued by the CFC (because the CFC is fiscally transparent under the person's tax law).

(6) The term *specified owner* means, with respect to a share of stock of a

CFC, a person for which the requirements of paragraphs (f)(6)(i) and (ii) of this section are satisfied.

(i) The person is a domestic corporation that is a United States shareholder of the CFC, or is an upper-tier CFC that would be a United States shareholder of the CFC were the upper-tier CFC a domestic corporation (provided that, for purposes of sections 951 and 951A, a domestic corporation that is a United States shareholder of the upper-tier CFC owns (within the meaning of section 958(a), and determined by treating a domestic partnership as foreign) one or more shares of stock of the upper-tier CFC).

(ii) The person owns the share directly or indirectly through a partnership, trust, or estate. Thus, for example, if a domestic corporation directly owns all the shares of stock of an upper-tier CFC and the upper-tier CFC directly owns all the shares of stock of another CFC, the domestic corporation is the specified owner with respect to each share of stock of the upper-tier CFC and the upper-tier CFC is the specified owner with respect to each share of stock of the other CFC.

(7) The term *United States shareholder* has the meaning provided in section 951(b).

(g) *Examples.* This paragraph (g) provides examples that illustrate the application of this section. For purposes of the examples in this paragraph (g), unless otherwise indicated, the following facts are presumed. US1 is a domestic corporation. FX and FZ are CFCs formed at the beginning of year 1, and the functional currency (within the meaning of section 985) of each of FX and FZ is the dollar. FX is a tax resident of Country X and FZ is a tax resident of Country Z. US1 is a United States shareholder with respect to FX and FZ. No distributed amounts are attributable to amounts which are, or have been, included in the gross income of a United States shareholder under section 951(a). All instruments are treated as stock for U.S. tax purposes. Only the tax law of the United States contains hybrid mismatch rules. No amounts are included in the gross income of US1 under section 951(a)(1)(A), 951A(a), or 951(a)(1)(B) and section 956.

(1) *Example 1. Hybrid dividend resulting from hybrid instrument*—(i) *Facts.* US1 holds both shares of stock of FX, which have an equal value. One share is treated as indebtedness for Country X tax purposes (''Share A''), and the other is treated as equity for Country X tax purposes (''Share B''). During year 1, under Country X tax law, FX accrues $80x of interest to US1 with respect to Share A and is allowed a deduction for the amount (the ''Hybrid Instrument Deduction''). During year 2, FX distributes $30x to US1 with respect to each of Share A and Share B. For U.S. tax purposes, each of the $30x distributions is treated as a dividend for which, without regard to section 245A(e) and this section as well as § 1.245A–5, US1 would be allowed a deduction under section 245A(a). For Country X tax purposes, the $30x distribution with respect to Share A represents a payment of interest for which a deduction was already allowed (and thus FX is not allowed an additional deduction for the amount), and the $30x distribution with respect to Share B is treated as a dividend (for which no deduction is allowed).

(ii) *Analysis.* The entire $30x of each dividend received by US1 from FX during year 2 is a hybrid dividend, because the sum of US1's hybrid deduction accounts with respect to each of its shares of FX stock at the end of year 2 ($80x) is at least equal to the amount of the dividends ($60x). *See* paragraph (b)(2) of this section. This is the case for the $30x dividend with respect to Share B even though there are no hybrid deductions allocated to Share B. *See* paragraph (b)(2) of this section. As a result, US1 is not allowed a deduction under section 245A(a) for the entire $60x of hybrid dividends and the rules of section 245A(d) and § 1.245A(d)–1 (disallowance of foreign tax credits and deductions) apply. *See* paragraph (b)(1) of this section. Paragraphs (g)(1)(ii)(A) through (D) of this section describe the determinations under this section.

(A) At the end of year 1, US1's hybrid deduction accounts with respect to Share A and Share B are $80x and $0, respectively, calculated as follows.

(*1*) The $80x Hybrid Instrument Deduction allowed to FX under Country X tax law (a relevant foreign tax law) is a hybrid deduction of FX, because the deduction is allowed to FX and relates to or results from an amount accrued with respect to an instrument issued by FX and treated as stock for U.S. tax purposes. *See* paragraph (d)(2)(i) of this section. Thus, FX's hybrid deductions for year 1 are $80x.

(*2*) The entire $80x Hybrid Instrument Deduction is allocated to Share A, because the deduction was accrued with respect to Share A. *See* paragraph (d)(3) of this section. As there are no additional hybrid deductions of FX for year 1, there are no additional hybrid deductions to allocate to either Share A or Share B. Thus, there are no hybrid deductions allocated to Share B.

(*3*) At the end of year 1, US1's hybrid deduction account with respect to Share A is increased by $80x (the amount of hybrid deductions allocated to Share A). *See* paragraph (d)(4)(i)(A) of this section. Because FX did not pay any dividends with respect to either Share A or Share B during year 1 (and therefore did not pay any hybrid dividends or tiered hybrid dividends), no further adjustments are made. *See* paragraph (d)(4)(i)(C) of this section. Therefore, at the end of year 1, US1's hybrid deduction accounts with respect to Share A and Share B are $80x and $0, respectively.

(B) At the end of year 2, and before the adjustments described in paragraph (d)(4)(i)(C) of this section, US1's hybrid deduction accounts with respect to Share A and Share B remain $80x and $0, respectively. This is because there are no hybrid deductions of FX for year 2. *See* paragraph (d)(4)(i)(A) of this section.

(C) Because at the end of year 2 (and before the adjustments described in paragraph (d)(4)(i)(C) of this section) the sum of US1's hybrid deduction accounts with respect to Share A and Share B ($80x, calculated as $80x plus $0) is at least equal to the aggregate $60x of year 2 dividends, the entire $60x dividend is a hybrid dividend. *See* paragraph (b)(2) of this section.

(D) At the end of year 2, US1's hybrid deduction account with respect to Share A is decreased by $60x, the amount of the hybrid deductions in the account that gave rise to a hybrid dividend or tiered hybrid dividend during year 2. *See* paragraph (d)(4)(i)(C) of this section. Because there are no hybrid deductions in the hybrid deduction account with respect to Share B, no adjustments with respect to that account are made under paragraph (d)(4)(i)(C) of this section. Therefore, at the end of year 2 and taking into account the adjustments under paragraph (d)(4)(i)(C) of this section, US1's hybrid deduction account with respect to Share A is $20x ($80x less $60x) and with respect to Share B is $0.

(iii) *Alternative facts—notional interest deductions*. The facts are the same as in paragraph (g)(1)(i) of this section, except that for each of year 1 and year 2 FX is allowed $10x of notional interest deductions with respect to its equity, Share B, under Country X tax law (the ''NIDs''). In addition, during year 2, FX distributes $47.5x (rather than $30x) to US1 with respect to each of Share A and Share B. For U.S. tax purposes, each of the $47.5x distributions is treated as a dividend for which, without regard to section 245A(e) and this section as well as §1.245A–5, US1 would be allowed a deduction under section 245A(a). For Country X tax purposes, the $47.5x distribution with respect to Share A represents a payment of interest for which a deduction was already allowed (and thus FX is not allowed an additional deduction for the amount), and the $47.5x distribution with respect to Share B is treated as a dividend (for which no deduction is allowed). The entire $47.5x of each dividend received by US1 from FX during year 2 is a hybrid dividend, because the sum of US1's hybrid deduction accounts with respect to each of its shares of FX stock at the end of year 2 ($80x plus $20x, or $100x) is at least equal to the amount of the dividends ($95x). *See* paragraph (b)(2) of this section. As a result, US1 is not allowed a deduction under section 245A(a) for the $95x hybrid dividend and the rules of section 245A(d) and §1.245A(d)–1 (disallowance of foreign tax credits and deductions) apply. *See* paragraph (b)(1) of this section. Paragraphs (g)(1)(iii)(A) through (D) of this section describe the determinations under this section.

(A) The $10x of NIDs allowed to FX under Country X tax law in year 1 are hybrid deductions of FX for year 1. *See* paragraph (d)(2)(i) of this section. The

$10x of NIDs is allocated equally to each of Share A and Share B, because the hybrid deduction is with respect to equity and the shares have an equal value. *See* paragraph (d)(3) of this section. Thus, $5x of the NIDs is allocated to each of Share A and Share B for year 1. For the reasons described in paragraph (g)(1)(ii)(A)(*2*) of this section, the entire $80x Hybrid Instrument Deduction is allocated to Share A. Therefore, at the end of year 1, US1's hybrid deduction accounts with respect to Share A and Share B are $85x and $5x, respectively.

(B) Similarly, the $10x of NIDs allowed to FX under Country X tax law in year 2 are hybrid deductions of FX for year 2, and $5x of the NIDs is allocated to each of Share A and Share B for year 2. *See* paragraphs (d)(2)(i) and (d)(3) of this section. Thus, at the end of year 2 (and before the adjustments described in paragraph (d)(4)(i)(C) of this section), US1's hybrid deduction account with respect to Share A is $90x ($85x plus $5x) and with respect to Share B is $10x ($5x plus $5x). *See* paragraph (d)(4)(i) of this section.

(C) Because at the end of year 2 (and before the adjustments described in paragraph (d)(4)(i)(C) of this section) the sum of US1's hybrid deduction accounts with respect to Share A and Share B ($100x, calculated as $90x plus $10x) is at least equal to the aggregate $95x of year 2 dividends, the entire $95x of dividends are hybrid dividends. *See* paragraph (b)(2) of this section.

(D) At the end of year 2, US1's hybrid deduction accounts with respect to Share A and Share B are decreased by the amount of hybrid deductions in the accounts that gave rise to a hybrid dividend or tiered hybrid dividend during year 2. *See* paragraph (d)(4)(i)(C) of this section. A total of $95x of hybrid deductions in the accounts gave rise to a hybrid dividend during year 2. For the hybrid deduction account with respect to Share A, $85.5x in the account is considered to have given rise to a hybrid deduction (calculated as $95x multiplied by $90x/$100x). *See* paragraph (d)(4)(i)(C) of this section. For the hybrid deduction account with respect to Share B, $9.5x in the account is considered to have given rise to a hybrid deduction (calculated as $95x multiplied by $10x/$100x). *See* paragraph (d)(4)(i)(C) of this section. Thus, following these adjustments, at the end of year 2, US1's hybrid deduction account with respect to Share A is $4.5x ($90x less $85.5x) and with respect to Share B is $0.5x ($10x less $9.5x).

(iv) *Alternative facts—deduction in branch country*—(A) *Facts.* The facts are the same as in paragraph (g)(1)(i) of this section, except that for Country X tax purposes Share A is treated as equity (and thus the Hybrid Instrument Deduction does not exist, and under Country X tax law FX is not allowed a deduction for the $30x distributed in year 2 with respect to Share A). However, FX has a branch in Country Z that gives rise to a taxable presence under Country Z tax law, and for Country Z tax purposes Share A is treated as indebtedness and Share B is treated as equity. Also, during year 1, for Country Z tax purposes, FX accrues $80x of interest to US1 with respect to Share A and is allowed an $80x interest deduction with respect to its Country Z branch income. Moreover, for Country Z tax purposes, the $30x distribution with respect to Share A in year 2 represents a payment of interest for which a deduction was already allowed (and thus FX is not allowed an additional deduction for the amount), and the $30x distribution with respect to Share B in year 2 is treated as a dividend (for which no deduction is allowed).

(B) *Analysis.* The $80x interest deduction allowed to FX under Country Z tax law (a relevant foreign tax law) with respect to its Country Z branch income is a hybrid deduction of FX for year 1. *See* paragraphs (d)(2)(i) and (f)(5) of this section. For reasons similar to those discussed in paragraph (g)(1)(ii) of this section, at the end of year 2 (and before the adjustments described in paragraph (d)(4)(i)(C) of this section), US1's hybrid deduction accounts with respect to Share A and Share B are $80x and $0, respectively, and the sum of the accounts is $80x. Accordingly, the entire $60x of the year 2 dividend is a hybrid dividend. *See* paragraph (b)(2) of this section. Further, for the reasons described in paragraph (g)(1)(ii)(D) of this section, at the end of year 2 and taking into account the adjustments under paragraph (d)(4)(i)(C) of this section, US1's hybrid deduction account with respect to Share A is $20x ($80x less $60x) and with respect to Share B is $0.

(v) *Alternative facts—account reduced by adjusted GILTI inclusion.* The facts are the same as in paragraph (g)(1)(i) of this section, except that for taxable year 1 FX has $130x of gross tested income and $10.5x of current year tax (as described in §1.960–1(b)(4)) that is allocated and apportioned under §1.960–1(d)(3)(ii) to the tested income groups of FX. US1's ability to credit the $10.5x of current year tax is not limited under section 904(a). In addition, FX has $119.5x of tested income ($130x of gross tested income, less the $10.5x of current year tax deductions properly allocable to the gross tested income). Further, of US1's pro rata share of the tested income ($119.5x), $80x is attributable to Share A and $39.5x is attributable to Share B (as determined under the principles of §1.951A–1(d)(2)). Moreover, US1's net deemed tangible income return (as defined in §1.951A–1(c)(3)) for taxable year 1 is $71.7x, and US1 does not own any stock of a CFC other than its stock of FX. Thus, US1's GILTI inclusion amount (within the meaning of §1.951A–1(c)(1)) for taxable year 1, the U.S. shareholder inclusion year, is $47.8x (net CFC tested income of $119.5x, less net deemed tangible income return of $71.7x) and US1's inclusion percentage (as described in §1.960–2(c)(2)) is 40 ($47.8x/$119.5x). The deduction allowed to US1 under section 250 by reason of section 250(a)(1)(B)(i) is not limited as a result of section 250(a)(2)(B). At the end of year 1, US1's hybrid deduction account with respect to Share A is: First, increased by $80x (the amount of hybrid deductions allocated to Share A); and second, decreased by $10x (the sum of the adjusted GILTI inclusion with respect to Share A, and the adjusted GILTI inclusion with respect to Share B that is allocated to the hybrid deduction account with respect to Share A) to $70x. *See* paragraphs (d)(4)(i)(A) and (B) of this section. In year 2, the entire $30x of each dividend received by US1 from FX during year 2 is a hybrid dividend, because the sum of US1's hybrid deduction accounts with respect to each of its shares of FX stock at the end of year 2 ($70x) is at least equal to the amount of the dividends ($60x). *See* paragraph (b)(2) of this section. At the end of year 2, US1's hybrid deduction account with respect to Share A is decreased by $60x (the amount of the hybrid deductions in the account that give rise to a hybrid dividend or tiered hybrid dividend during year 2) to $10x. *See* paragraph (d)(4)(i)(C) of this section. Paragraphs (g)(1)(v)(A) through (C) of this section describe the computations pursuant to paragraph (d)(4)(i)(B)(*2*) of this section.

(A) To determine the adjusted GILTI inclusion with respect to Share A for taxable year 1, it must be determined to what extent US1's $47.8x GILTI inclusion amount is attributable to Share A. *See* paragraph (d)(4)(ii)(B) of this section. Here, $32x of the inclusion is attributable to Share A, calculated as $47.8x multiplied by a fraction, the numerator of which is $80x (US1's pro rata share of the tested income of FX attributable to Share A) and denominator of which is $119.5x (US1's pro rata share of the tested income of FX, its only CFC). *See* paragraph (d)(4)(ii)(C) of this section. Next, the associated foreign income taxes with respect to the $32x GILTI inclusion amount attributable to Share A must be determined. *See* paragraphs (d)(4)(ii)(B) and (D) of this section. Such associated foreign income taxes are $2.8x, calculated as $10.5x (the current year tax allocated and apportioned to the tested income groups of FX) multiplied by a fraction, the numerator of which is $80x (US1's pro rata share of the tested income of FX attributable to Share A) and the denominator of which is $119.5x (the tested income of FX), multiplied by 40% (US1's inclusion percentage), multiplied by 1 (the section 904 limitation fraction with respect to US1's GILTI inclusion amount). *See* paragraphs (d)(4)(ii)(D), (F), and (G) of this section. Thus, pursuant to paragraph (d)(4)(ii)(B) of this section, the adjusted GILTI inclusion with respect to Share A is $6.7x, computed by—

(*1*) Adding $2.8x (the associated foreign income taxes with respect to the $32x GILTI inclusion attributable to Share A) to $32x, which is $34.8x;

(*2*) Multiplying $34.8x (the sum of the amounts in paragraph (g)(1)(v)(A)(*1*) of this section) by 50% (the difference of 100 percent and the section 250(a)(1)(B)(i) deduction percentage), which is $17.4x; and

(*3*) Subtracting $10.7x (calculated as $2.24x (80% of the $2.8x of associated foreign income taxes) divided by .21 (the percentage described in section 11(b)) from $17.4x (the product of the amounts in paragraph (g)(1)(v)(A)(*2*) of this section), which is $6.7x.

(B) Pursuant to computations similar to those discussed in paragraph (g)(1)(v)(A) of this section, the adjusted GILTI inclusion with respect to Share B is $3.3x. However, the hybrid deduction account with respect to Share B is not reduced by such $3.3x, because of the limitation in paragraph (d)(4)(i)(B)(*2*)(*ii*) of this section, which, with respect to Share B, limits the reduction pursuant to paragraph (d)(4)(i)(B)(*2*)(*i*) of this section to $0 (calculated as $0, the hybrid deductions allocated to the share for the taxable year, multiplied by 1, the fraction described in paragraph (d)(4)(i)(B)(*2*)(*ii*) of this section (computed as $130x, the sole item of gross tested income, divided by $130x, the sole item of gross income)). *See* paragraphs (d)(4)(i)(B)(*2*)(*i*) and (*ii*) of this section.

(C) US1's hybrid deduction account with respect to Share A is reduced by the entire $6.7x adjusted GILTI inclusion with respect to the share, as such $6.7x does not exceed the limit in paragraph (d)(4)(i)(B)(*2*)(*ii*) of this section ($80x, calculated as $80x, the hybrid deductions allocated to the share for the taxable year, multiplied by 1, the fraction described in paragraph (d)(4)(i)(B)(*2*)(*ii*) of this section). *See* paragraphs (d)(4)(i)(B)(*2*)(*i*) and (*ii*) of this section. In addition, the hybrid deduction account is reduced by another $3.3x, the amount of the adjusted GILTI inclusion with respect to Share B that is allocated to the hybrid deduction account with respect to Share A. *See* paragraph (d)(4)(i)(B)(*2*)(*iii*) of this section. As a result, pursuant to paragraph (d)(4)(i)(B)(*2*) of this section, US1's hybrid deduction account with respect to Share A is reduced by $10x ($6.7x plus $3.3x).

(2) *Example 2. Tiered hybrid dividend rule; tax benefit equivalent to a deduction*—(i) *Facts.* US1 holds all the stock of FX, and FX holds all 100 shares of stock of FZ (the ''FZ shares''), which have an equal value. The FZ shares are treated as equity for Country Z tax purposes. At the end of year 1, the sum of FX's hybrid deduction accounts with respect to each of its shares of FZ stock is $0. During year 2, FZ distributes $10x to FX with respect to each of the FZ shares, for a total of $1,000x. The $1,000x is treated as a dividend for U.S. and Country Z tax purposes, and is not deductible for Country Z tax purposes. If FX were a domestic corporation, then, without regard to section 245A(e) and this section as well as §1.245A–5, FX would be allowed a deduction under section 245A(a) for the $1,000x. Under Country Z tax law, 75% of the corporate income tax paid by a Country Z corporation with respect to a dividend distribution is refunded to the corporation's shareholders (regardless of where such shareholders are tax residents) upon a dividend distribution by the corporation. The corporate tax rate in Country Z is 20%. With respect to FZ's distributions, FX is allowed a refundable tax credit of $187.5x. The $187.5x refundable tax credit is calculated as $1,250x (the amount of pre-tax earnings that funded the distribution, determined as $1,000x (the amount of the distribution) divided by 0.8 (the percentage of pre-tax earnings that a Country Z corporation retains after paying Country Z corporate tax)) multiplied by 0.2 (the Country Z corporate tax rate) multiplied by 0.75 (the percentage of the Country Z tax credit). Under Country Z tax law, FX is not subject to Country Z withholding tax (or any other tax) with respect to the $1,000x dividend distribution.

(ii) *Analysis.* As described in paragraphs (g)(2)(ii)(A) and (B) of this section, the sum of FX's hybrid deduction accounts with respect to each of its shares of FZ stock at the end of year 2 is $937.5x and, as a result, $937.5x of the $1,000x of dividends received by FX from FZ during year 2 is a tiered hybrid dividend. *See* paragraphs (b)(2) and (c)(2) of this section. The $937.5x tiered hybrid dividend is treated for purposes of section 951(a)(1)(A) as subpart F income of FX and US1 must include in gross income its pro rata share of such subpart F income, which is $937.5x. *See* paragraph (c)(1) of this section. This is the case notwithstanding any other provision of the Code, including section 952(c) or section 954(c)(3) or (6). In addition, the rules of section 245A(d) and §1.245A(d)–1 (disallowance of foreign tax credits and deductions) apply with respect to US1's inclusion. *See* paragraph (c)(1) of this section. Paragraphs (g)(2)(ii)(A) through (C) of this section describe the determinations under this section. The characterization of the FZ stock for Country X tax purposes (or for purposes of any other foreign tax law) does not affect this analysis.

(A) The $187.5x refundable tax credit allowed to FX under Country Z tax law (a relevant foreign tax law) is equivalent to a $937.5x deduction, calculated as $187.5x (the amount of the credit) divided by 0.2 (the Country Z corporate tax rate). The $937.5x is a hybrid deduction of FZ because it is allowed to FX (a person related to FZ), it relates to or results from amounts distributed with respect to instruments issued by FZ and treated as stock for U.S. tax purposes, and it has the effect of causing the earnings that funded the distributions to not be included in income under Country Z tax law. *See* paragraph (d)(2)(i) of this section. $9.375x of the hybrid deduction is allocated to each of the FZ shares, calculated as $937.5x (the amount of the hybrid deduction) multiplied by 1/100 (the value of each FZ share relative to the value of all the FZ shares). *See* paragraph (d)(3) of this section. The result would be the same if FX were instead a tax resident of Country Z (and not Country X), FX were allowed the $187.5x refundable tax credit under Country Z tax law, and under Country Z tax law FX were to not include the $1,000x in income (because, for example, Country Z tax law provides Country Z resident corporations a 100% exclusion or dividends received deduction with respect to dividends received from a resident corporation). *See* paragraph (d)(2)(i) of this section.

(B) At the end of year 2, and before the adjustments described in paragraph (d)(4)(i)(C) of this section, the sum of FX's hybrid deduction accounts with respect to each of its shares of FZ stock is $937.5x, calculated as $9.375x (the amount in each account) multiplied by 100 (the number of accounts). *See* paragraph (d)(4)(i) of this section. Accordingly, $937.5x of the $1,000x dividend received by FX from FZ during year 2 is a tiered hybrid dividend. *See* paragraphs (b)(2) and (c)(2) of this section.

(C) At the end of year 2, each of FX's hybrid deduction accounts with respect to its shares of FZ is decreased by the $9.375x in the account that gave rise to a hybrid dividend or tiered hybrid dividend during year 2. *See* paragraph (d)(4)(i)(C) of this section. Thus, following these adjustments, at the end of year 2, each of FX's hybrid deduction accounts with respect to its shares of FZ stock is $0, calculated as $9.375x (the amount in the account before the adjustments described in paragraph (d)(4)(i)(C) of this section) less $9.375x (the adjustment described in paragraph (d)(4)(i)(C) of this section with respect to the account).

(iii) *Alternative facts—imputation system that taxes shareholders*. The facts are the same as in paragraph (g)(2)(i) of this section, except that under Country Z tax law the $1,000x dividend to FX is subject to a 30% gross basis withholding tax, or $300x, and the $187.5x refundable tax credit is applied against and reduces the withholding tax to $112.5x. The $187.5x refundable tax credit provided to FX is not a hybrid deduction because FX was subject to Country Z withholding tax of $300x on the $1,000x dividend (such withholding tax being greater than the $187.5x credit). *See* paragraph (d)(2)(i) of this section. If instead FZ were allowed a $1,000x dividends paid deduction for the $1,000x dividend (and FX were not allowed the refundable tax credit) and the dividend were subject to 5% gross basis withholding tax (or $50x), then $750x of the dividends paid deduction would be a hybrid deduction, calculated as the excess of $1,000x (the dividends paid deduction) over $250x (the amount of income that under Country Z tax law would produce an amount of tax equal to the $50x of withholding tax, calculated as $50x, the amount of withholding tax, divided by 0.2, the Country Z corporate tax rate). *See* paragraph (d)(2)(i) of this section.

(h) *Applicability dates*—(1) *In general*. Except as provided in paragraph (h)(2) of this section, this section applies to distributions made after December 31, 2017, provided that such distributions occur during taxable years ending on or after December 20, 2018. However, taxpayers may apply this section in its entirety to distributions made after December 31, 2017 and occurring during taxable years ending before December 20, 2018. In lieu of applying the regulations in this section, taxpayers may apply the provisions matching this section from the Internal Revenue Bulletin (IRB) 2019–03 (*https://www.irs.gov/pub/irs-irbs/irb19-03.pdf*) in their entirety for all taxable years ending on or before April 8, 2020.

(2) *Special rules*. Paragraphs (d)(4)(i)(B) and (d)(4)(ii) of this section (decrease of hybrid deduction accounts; rules regarding adjusted subpart F and GILTI inclusions) apply to taxable years ending on or after November 12, 2020. However, a taxpayer may choose to apply paragraphs (d)(4)(i)(B) and (d)(4)(ii) of this section to a taxable year ending before November 12, 2020, so long as the taxpayer consistently applies paragraphs (d)(4)(i)(B) and (d)(4)(ii) of this section to that taxable year and any subsequent taxable year ending before November 12, 2020.

[T.D. 9896, 85 FR 19830, Apr. 8, 2020, as amended by T.D. 9909, 85 FR 53096, Aug. 27, 2020; T.D. 9922, 85 FR 72031, Nov. 12, 2020; T.D.9959, 87 FR 324, Jan. 4, 2022]

§ 1.246–1 Deductions not allowed for dividends from certain corporations.

The deductions provided in sections 243 (relating to dividends received by corporations), 244 (relating to dividends received on certain preferred stock), and 245 (relating to dividends received from certain foreign corporations), are not allowable with respect to any dividend received from:

(a) A corporation organized under the China Trade Act, 1922 (15 U.S.C. ch. 4) (see section 941); or

(b) A corporation which is exempt from tax under section 501 (relating to certain charitable, etc., organizations) or section 521 (relating to farmers' cooperative associations) for the taxable year of the corporation in which the distribution is made or for its next preceding taxable year; for

(c) A corporation to which section 931 (relating to income from sources within possessions of the United States) applies for the taxable year of the corporation in which the distribution is made or for its next preceding taxable year; or

(d) A real estate investment trust which, for its taxable year in which the distribution is made, is taxable under Part II, Subchapter M, Chapter 1 of the Code. See section 243(c)(3), paragraph (c) of § 1.243–2, section 857(c), and paragraph (d) of § 1.857–6.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960, as amended by T.D. 6598, 27 FR 4092, Apr. 28, 1962; T.D. 7767, 46 FR 11264, Feb. 6, 1981]

§ 1.246–2 Limitation on aggregate amount of deductions.

(a) *General rule*. The sum of the deductions allowed by sections 243(a)(1) (relating to dividends received by corporations), 244(a) (relating to dividends received on certain preferred stock), and 245 (relating to dividends received from certain foreign corporations), except as provided in section 246(b)(2) and in paragraph (b) of this section, is limited to 85 percent of the taxable income of the corporation. The taxable income of the corporation for this purpose is computed without regard to the net operating loss deduction allowed by section 172, the deduction for dividends paid on certain preferred stock of public utilities allowed by section 247, any capital loss carryback under section 1212(a)(1), and the deductions provided in sections 243(a)(1), 244(a), and 245. For definition of the term *taxable income*, see section 63.

(b) *Effect of net operating loss*. If the shareholder corporation has a net operating loss (as determined under sec. 172) for a taxable year, the limitation provided in section 246(b)(1) and in paragraph (a) of this section is not applicable for such taxable year. In that event, the deductions provided in sections 243(a)(1), 244(a), and 245 shall be allowable for all tax purposes to the shareholder corporation for such taxable year without regard to such limitation. If the shareholder corporation does not have a net operating loss for the taxable year, however, the limitation will be applicable for all tax purposes for such taxable year. In determining whether the shareholder corporation has a net operating loss for a taxable year under section 172, the deductions allowed by sections 243(a)(1), 244(a), and 245 are to be computed without regard to the limitation provided in section 246(b)(1) and in paragraph (a) of this section.

[T.D. 6992, 34 FR 825, Jan. 18, 1969, as amended by T.D. 7301, 39 FR 963, Jan. 4, 1974]

§ 1.246–3 Exclusion of certain dividends.

(a) *In general.* Corporate taxpayers are denied, in certain cases, the dividends-received deduction provided by section 243 (dividends received by corporations), section 244 (dividends received on certain preferred stock), and section 245 (dividends received from certain foreign corporations). The above-mentioned dividends-received deductions are denied, under section 246(c)(1), to corporate shareholders:

(1) If the dividend is in respect of any share of stock which is sold or otherwise disposed of in any case where the taxpayer has held such share for 15 days or less; or

(2) If and to the extent that the taxpayer is under an obligation to make corresponding payments with respect to substantially identical stock or securities. It is immaterial whether the obligation has arisen pursuant to a short sale or otherwise.

(b) *Ninety-day rule for certain preference dividends.* In the case of any stock having a preference in dividends, a special rule is provided by section 246(c)(2) in lieu of the 15-day rule described in section 246(c)(1) and paragraph (a)(1) of this section. If the taxpayer receives dividends on such stock which are attributable to a period or periods aggregating in excess of 366 days, the holding period specified in section 246(c)(1)(A) shall be 90 days (in lieu of 15 days).

(c) *Definitions*—(1) *''Otherwise disposed of''.* As used in this section the term *otherwise disposed of* includes disposal by gift.

(2) *''Substantially identical stock or securities''.* The term *substantially identical stock or securities* is to be applied according to the facts and circumstances in each case. In general, the term has the same meaning as the corresponding terms in sections 1091 and 1233 and the regulations thereunder. See paragraph (d)(1) of § 1.1233–1.

(3) *Obligation to make corresponding payments.* (i) Section 246(c)(1)(B) of the Code denies the dividends-received deduction to a corporate taxpayer to the extent that such taxpayer is under an obligation, with respect to substantially identical stock or securities, to make payments corresponding to the dividend received. Thus, for example, where a corporate taxpayer is in both a ''long'' and ''short'' position with respect to the same stock on the date that such stock goes ex-dividend, the dividend received on the stock owned by the taxpayer will not be eligible for the dividends-received deduction to the extent that the taxpayer is obligated to make payments to cover the dividends with respect to its offsetting short position in the same stock. The dividends-received deduction is denied in such a case without regard to the length of time the taxpayer has held the stock on which such dividends are received.

(ii) The provisions of subdivision (i) of this subparagraph may be illustrated by the following example:

Example. Y Corporation owns 100 shares of the Z Corporation's common stock on January 1, 1959. Z Corporation on January 15, 1959, declares a dividend of $1.00 per share payable to shareholders of record on January 30, 1959. On January 21, 1959, Y Corporation sells short 25 shares of the Z Corporation's common stock and remains in the short position on January 31, 1959, the day that Z Corporation's common stock goes ex-dividend. Y Corporation is therefore obligated to make a payment to the lender of the 25 shares of Z Corporation's common stock which were sold short, corresponding to the $1.00 a share dividend that the lender would have received on those 25 shares, or $25.00. Therefore, $25.00 of the $100.00 that the Y Corporation receives as dividends from the Z Corporation with respect to the 100 shares of common stock in which it has a long position is not eligible for the dividends-received deduction.

(d) *Determination of holding period*—(1) *In general.* Special rules are provided by paragraph (3) of section 246(c) for determining the period for which the taxpayer has held any share of stock for purposes of the restriction provided by such section. In computing the holding period the day of disposition but not the day of acquisition shall be taken into account. Also, there shall not be taken into account any day which is more than 15 days after the date on which the share of stock becomes ex-dividend. Thus, the holding period is automatically terminated at the end of such 15-day period without regard to how long the stock may be held after that date. In the case of stock qualifying under paragraph (2) of section 246(c) (as having preference in dividends) a 90-day period is substituted for the 15-day period prescribed in this subparagraph. Finally, section 1223(4), relating to holding periods in the case of wash sales, shall not apply. Therefore, tacking of the holding period of the stock disposed of to the holding period of the stock acquired where a wash sale occurs is not permitted for purposes of determining the holding period described in section 246(c).

(2) *Special rules.* Section 246(c) requires that the holding periods determined thereunder shall be appropriately reduced for any period that the taxpayer's stock holding is offset by a corresponding short position resulting from an option to sell, a contractual obligation to sell, or a short sale of, substantially identical stock or securities. The holding periods of stock held for a period of 15 days or less on the date such short position is created shall accordingly be reduced to the extent of such short position. Where the amount of stock acquired within such period exceeds the amount as to which the taxpayer establishes a short position, the stock the holding period of which must be reduced because of such short position shall be that most recently acquired within such period. If, on the date the short position is created, the amount of stock subject to the short position exceeds the amount, if any, of stock held by the taxpayer for 15 days or less, the excess shares of stock sold short shall, to the extent thereof, postpone until the termination of the short position the commencement of the holding periods of subsequently acquired stock. Stock having a preference in dividends is also subject to the rules prescribed in this subparagraph, except that the 90-day period provided by paragraph (b) of this section shall apply in lieu of the 15-day period otherwise applicable. The rules prescribed in this subparagraph may be illustrated by the following examples:

Example 1. L Company purchased 100 shares of Z Corporation's common stock during January 1959. On November 26, 1959, L Company purchased an additional 100 shares of the same stock. On December 1, 1959, Z Corporation declared a dividend payable on its common stock to shareholders of record on December 20, 1959. Also on December 1, L Company sold short 150 shares of Z Corporation's common stock. On December 16, 1959 (before the stock went ex-dividend), L Company closed its short sale with 150 shares purchased on that date. In determining, for purposes of section 246(c), whether L Company has held the 100 shares of stock acquired on November 26 for a period in excess of 15 days, the period of the short position (from December 2 through December 16) shall be excluded. Thus, if on or before December 26, 1959, L Company sold the 100 shares of Z Corporation stock which it purchased on November 26, 1959, it would not be entitled to a dividends-received deduction for the dividends received on such shares because it would have held such shares for 15 days or less on the date of the sale. Since L Company had held the 100 shares acquired during January 1959 for more than 15 days on December 2, 1959, and since it was under no obligation to make payments corresponding to the dividends received thereon, section 246(c) is inapplicable to the dividends received with respect to those shares.

Example 2. Assume the same facts as in *Example 1* above except that the additional 100 shares of Z Corporation common stock were purchased by L Company on December 10, 1959, rather than November 26, 1959. In determining, for purposes of section 246(c), whether L Company has held such shares for a period in excess of 15 days, the period from December 11, 1959, until December 16, 1959 (the date the short sale made on December 1 was closed), shall be excluded.

(e) *Effective date.* The provisions of this section shall apply to stock acquired after December 31, 1957, or with respect to stock acquired before that date where the taxpayer has made a short sale of substantially identical stock or securities after that date.

§ 1.246–4 Dividends from a DISC or former DISC.

The deduction provided in section 243 (relating to dividends received by corporations) is not allowable with respect to any dividend (whether in the form of a deemed or actual distribution or an amount treated as a dividend pursuant to section 995(c)) from a corporation which is a DISC or former DISC (as defined in section 992(a)(1) or (3) as the case may be) to the extent such dividend is from the corporation's accumulated DISC income (as defined in section 996(f)(1)) or previously taxed income (as defined in section 996(f)(2)) or is a deemed distribution pursuant to section 995(b)(1) in a taxable year for which the corporation qualifies (or is treated) as a DISC. To the extent that a dividend is paid out of earnings and profits which are not made up of accumulated DISC income or previously taxed income, the corporate recipient is entitled to the deduction provided in section 243 in the same manner and to the same extent as a dividend from a domestic corporation which is not a DISC or former DISC.

[T.D. 7283, 38 FR 20824, Aug. 3, 1973]

§ 1.246–5 Reduction of holding periods in certain situations.

(a) *In general.* Under section 246(c)(4)(C), the holding period of stock for purposes of the dividends received deduction is appropriately reduced for any period in which a taxpayer has diminished its risk of loss by holding one or more other positions with respect to substantially similar or related property. This section provides rules for applying section 246(c)(4)(C).

(b) *Definitions*—(1) *Substantially similar or related property.* The term substantially similar or related property is applied according to the facts and circumstances in each case. In general, property is substantially similar or related to stock when—

(i) The fair market values of the stock and the property primarily reflect the performance of—

(A) A single firm or enterprise;

(B) The same industry or industries; or

(C) The same economic factor or factors such as (but not limited to) interest rates, commodity prices, or foreign-currency exchange rates; and

(ii) Changes in the fair market value of the stock are reasonably expected to approximate, directly or inversely, changes in the fair market value of the property, a fraction of the fair market value of the property, or a multiple of the fair market value of the property.

(2) *Diminished risk of loss.* A taxpayer has diminished its risk of loss on its stock by holding positions with respect to substantially similar or related property if changes in the fair market values of the stock and the positions are reasonably expected to vary inversely.

(3) *Position.* For purposes of this section, a position with respect to property is an interest (including a futures or forward contract or an option) in property or any contractual right to a payment, whether or not severable from stock or other property. A position does not include traditional equity rights to demand payment from the issuer, such as the rights traditionally provided by mandatorily redeemable preferred stock.

(4) *Reasonable expectations.* For purposes of paragraphs (b)(1)(i), (b)(2), or (c)(1)(vi) of this section, reasonable expectations are the expectations of a reasonable person, based on all the facts and circumstances at the later of the time the stock is acquired or the positions are entered into. Reasonable expectations include all explicit or implicit representations made with respect to the marketing or sale of the position.

(c) *Special rules*—(1) *Positions in more than one stock*—(i) *In general.* This paragraph (c)(1) provides rules for the treatment of positions that reflect the value of more than one stock. In general, positions that reflect the value of a portfolio of stocks are treated under the rules of paragraphs (c)(1) (ii) through (iv) of this section, and positions that reflect the value of more than one stock but less than a portfolio are treated under the rules of paragraph (c)(1)(v) of this section. A portfolio for this purpose is any group of stocks of 20 or more unrelated issuers. Paragraph (c)(1)(vi) of this section provides an anti-abuse rule.

(ii) *Portfolios.* Notwithstanding paragraph (b)(1) of this section, a position reflecting the value of a portfolio of stocks is substantially similar or related to the stocks held by the taxpayer only if the position and the taxpayer's holdings substantially overlap as of the most recent testing date. A position may be substantially similar or related to a taxpayer's entire stock holdings or a portion of a taxpayer's stock holdings.

(iii) *Determining substantial overlap.* This paragraph (c)(1)(iii) provides rules for determining whether a position and a taxpayer's stock holdings or a portion of a taxpayer's stock holdings substantially overlap. Paragraphs (c)(1)(iii) (A) through (C) of this section determine whether there is substantial overlap as of any testing date.

(A) *Step One.* Construct a subportfolio (the Subportfolio) that consists of stock in an amount equal to the lesser of the fair market value of each stock represented in the position and the fair market value of the stock in the taxpayer's stock holdings. (The Subportfolio may contain fewer than 20 stocks.)

(B) *Step Two.* If the fair market value of the Subportfolio is equal to or greater than 70 percent of the fair market value of the stocks represented in the position, the position and the Subportfolio substantially overlap.

(C) *Step Three.* If the position does not substantially overlap with the Subportfolio, repeat Steps One and Two (paragraphs (c)(1)(iii)(A) and (B) of this section) reducing the size of the position. The largest percentage of the position that results in a substantial overlap is substantially similar or related to the Subportfolio determined with respect to that percentage of the position.

(iv) *Testing date.* A testing date is any day on which the taxpayer purchases or sells any stock if the fair market value of the stock or the fair market value of substantially similar or related property is reflected in the position, any day on which the taxpayer changes the position, or any day on which the composition of the position changes.

(v) *Nonportfolio positions.* A position that reflects the fair market value of more than one stock but not of a portfolio of stocks is treated as a separate position with respect to each of the stocks the value of which the position reflects.

(vi) *Anti-abuse rule.* Notwithstanding paragraphs (c)(1)(i) through (v) of this section, a position that reflects the value of more than one stock is a position in substantially similar or related property to the appropriate portion of the taxpayer's stock holdings if—

(A) Changes in the value of the position or the stocks reflected in the position are reasonably expected to virtually track (directly or inversely) changes in the value of the taxpayer's stock holdings, or any portion of the taxpayer's stock holdings and other positions of the taxpayer; and

(B) The position is acquired or held as part of a plan a principal purpose of which is to obtain tax savings (including by deferring tax) the value of which is significantly in excess of the expected pre-tax economic profits from the plan.

(2) *Options*—(i) *Options that are significantly out of the money.* For purposes of paragraph (b)(2) of this section, an option to sell that is significantly out of the money does not diminish the taxpayer's risk of loss on its stock unless the option is held as part of a strategy to substantially offset changes in the fair market value of the stock.

(ii) *Conversion rights.* Notwithstanding paragraphs (b)(1) and (2) of this section, a taxpayer is treated as diminishing its risk of loss by holding substantially similar or related property if it engages in the following transactions or their substantial equivalents—

(A) A short sale of common stock while holding convertible preferred stock of the same issuer and the price changes of the convertible preferred stock and the common stock are related;

(B) A short sale of a convertible debenture while holding convertible preferred stock into which the debenture is convertible or common stock; or

(C) A short sale of convertible preferred stock while holding common stock.

(3) *Stacking rule.* If a taxpayer diminishes its risk of loss by holding a position in substantially similar or related property with respect to only a portion of the shares that the taxpayer holds in a particular stock, the holding period of those shares having the shortest holding period is reduced.

(4) *Guarantees, surety agreements, or similar arrangements.* A taxpayer has diminished its risk of loss on stock by holding a position in substantially similar or related property if the taxpayer is the beneficiary of a guarantee, surety agreement, or similar arrangement and the guarantee, surety agreement, or similar arrangement provides for payments that will substantially offset decreases in the fair market value of the stock.

(5) *Hedges counted only once.* A position established as a hedge of one outstanding position, transaction, or obligation of the taxpayer (other than stock) is not treated as diminishing the risk of loss with respect to any other position held by the taxpayer. In determining whether a position is established to hedge an outstanding position, transaction, or obligation of the taxpayer, substantial deference will be given to the relationships that are established in its books and records at the time the position is entered into.

(6) *Use of related persons or pass-through entities.* Positions held by a party related to the taxpayer within the meaning of sections 267(b) or 707(b)(1) are treated as positions held by the taxpayer if the positions are held with a view to avoiding the application of this section or §1.1092(d)–2. In addition, a taxpayer is treated as diminishing its risk of loss by holding substantially similar or related property if the taxpayer holds an interest in, or is the beneficiary of, a pass-through entity, intermediary, or other arrangement with a view to avoiding the application of this section or §1.1092(d)–2.

(7) *Notional principal contracts.* For purposes of this section, rights and obligations under notional principal contracts are considered separately even though payments with regard to those rights and obligations are generally netted for other purposes. Therefore, if a taxpayer is treated under the preceding sentence as receiving payments under a notional principal contract when the fair market value of the taxpayer's stock declines, the taxpayer has diminished its risk of loss by holding a position in substantially similar or related property regardless of the netting of the payments under the contract for any other purposes.

(d) *Examples.* The following examples illustrate the provisions of this section:

Example 1. General application to common stock. Corporation A and Corporation B are both automobile manufacturers. The fair market values of Corporation A and Corporation B common stock primarily reflect the value of the same industry. Because Corporation A and Corporation B common stock are affected not only by the general level of growth in the industry but also by individual corporate management decisions and corporate capital structures, changes in the fair market value of Corporation A common stock are not reasonably expected to approximate changes in the fair market value of the Corporation B common stock. Under paragraph (b)(1) of this section, Corporation A common stock is not substantially similar or related to Corporation B common stock.

Example 2. Common stock value primarily reflects commodity price. Corporation C and Corporation D both hold gold as their primary asset, and historically changes in the fair market value of Corporation C common stock approximated changes in the fair market value of Corporation D common stock. Corporation M purchased Corporation C common stock and sold short Corporation D common stock. Corporation C common stock is substantially similar or related to Corporation D common stock because their fair market values primarily reflect the performance of the same economic factor, the price of gold, and changes in the fair market value of Corporation C common stock are reasonably expected to approximate changes in the fair market value of Corporation D common stock. It was reasonably expected that changes in the fair market values of the Corporation C common stock and the short position in Corporation D common stock would vary inversely. Thus, Corporation M has diminished its risk of loss on its Corporation C common stock for purposes of section 246(c)(4)(C) and this section by holding a position in substantially similar or related property.

Example 3. Portfolios of stocks. (i) Corporation Z holds a portfolio of stocks and acquires a short position on a publicly traded index through a regulated futures contract (RFC) that reflects the value of a portfolio of stocks as defined in paragraph (c)(1)(i) of this section. The index reflects the fair market value of stocks A through T. The values of stocks reflected in the index and the values of the same stocks in Corporation Z's holdings are as follows:

Stock	Z's holdings	RFC	Subportfolio
A	$300	$300	$300
B	300	300	300
C	—	300	—
D	400	500	400
E	300	500	300
F	300	500	300
G	500	600	500
H	300	300	300
I	—	300	—
J	400	450	400
K	200	500	200
L	200	400	200
M	200	500	200
N	100	200	100
O	—	200	—
P	200	200	200
Q	100	300	100
R	200	100	100
S	100	100	100
T	100	200	100
Totals	$4,200	$6,750	$4,100

(ii) The position is substantially similar or related to Z's stock holdings only if they substantially overlap. To determine whether they substantially overlap, Corporation Z must construct a Subportfolio of stocks with the lesser of the value of the stock as reflected in the RFC and its holdings. The Subportfolio is given in the rightmost column above. The value of the Subportfolio is 60.74 percent of the value of the stocks represented in the position ($4100 ÷ $6750), so the position and the Subportfolio do not substantially overlap.

(iii) To determine whether any portion of the position substantially overlaps with any portion of the Z's stock holdings, the values of the stocks in the RFC are reduced for purposes of the above steps. Eighty percent of the position and the corresponding subportfolio (consisting of stocks with a value of the lesser of the stocks represented in Z's holdings and in 80 percent of the RFC) substantially overlap, computed as follows:

Stock	Z's holdings	80% of RFC	Subportfolio
A	$300	$240	$240
B	300	240	240
C	—	240	—
D	400	400	400
E	300	400	300
F	300	400	300
G	500	480	480
H	300	240	240
I	—	240	—
J	400	360	360
K	200	400	200
L	200	320	200
M	200	400	200
N	100	160	100
O	—	160	—
P	200	160	160
Q	100	240	100
R	200	80	80
S	100	80	80
T	100	160	100
Totals	$4,200	$5,400	$3,780

(iv) Because $3,780 is 70 percent of $5,400, the Subportfolio substantially overlaps with 80 percent of the position. Under paragraph (c)(3) of this section, Z's stocks having the shortest holding period are treated as included in the Subportfolio. A larger portion of Z's stocks may be treated as substantially similar or related property under the anti-abuse rule of paragraph (c)(1)(vi) of this section.

Example 4. Hedges counted only once. January 1, 1996, Corporation X owns a $100 million portfolio of stocks all of which would substantially overlap with a $100 million regulated futures contract (RFC) on a commonly used index (the Index). On January 15, Corporation X enters into a $100 million short position in an RFC on the Index with a March delivery date and enters into a $75 million long position in an RFC on the Index for June delivery. Also on January 15, 1996, Corporation X indicates in its books and records that the long and short RFC positions are intended to offset one another. Under paragraph (c)(5) of this section, $75 million of the short position in the RFC is not treated as diminishing the risk of loss on the stock portfolio and instead is treated as a straddle or a hedging transaction, as appropriate, with respect to the $75 million long position in the RFC, under section 1092. The remaining $25 million short position is treated as diminishing the risk of loss on the portfolio by holding a position in substantially similar or related property. The rules of paragraph (c)(1) determine how much of the portfolio is subject to this rule and the rules of paragraph (c)(3) determine which shares have their holding periods tolled.

(e) *Effective date*—(1) *In general.* The provisions of this section apply to dividends received on or after March 17, 1995, on stock acquired after July 18, 1984.

(2) *Special rule for dividends received on certain stock.* Notwithstanding paragraph (e)(1) of this section, this section applies to any dividends received by a taxpayer on stock acquired after July 18, 1984, if the taxpayer has diminished its risk of loss by holding substantially similar or related property involving the following types of transactions—

(i) The short sale of common stock when holding convertible preferred stock of the same issuer and the price changes of the two stocks are related, or the short sale of a convertible debenture while holding convertible preferred stock into which the debenture is convertible (or common stock), or a short sale of convertible preferred stock while holding common stock; or

(ii) The acquisition of a short position in a regulated futures contract on a stock index, or the acquisition of an option to sell the regulated futures contract or the stock index itself, or the grant of a deep-in-the-money option to buy the regulated futures contract or the stock index while holding the stock of an investment company whose principal holdings mimic the performance of the stocks included in the stock index; or alternatively, while holding a portfolio composed of stocks that mimic the performance of the stocks included in the stock index.

[T.D. 8590, 60 FR 14638, Mar. 20, 1995]

§ 1.247–1 Deduction for dividends paid on preferred stock of public utilities.

(a) *Amount of deduction.* (1) A deduction is provided in section 247 for dividends paid during the taxable year by certain public utility corporations (see paragraph (b) of this section) on certain preferred stock (see paragraph (c) of this section). This deduction is an amount equal to the product of a specified fraction times the lesser of (i) the amount of the dividends paid during the taxable year by a public utility on its preferred stock (as defined in paragraph (c) of this section), or (ii) the taxable income of the public utility for such taxable year (computed without regard to the deduction allowed by section 247). The specified fraction for any taxable year is the fraction the numerator of which is 14 and the denominator of which is the sum of the corporation normal tax rate and the surtax rate for such taxable year specified in section 11. Since section 11 provides that for the calendar year 1954 the corporation normal tax rate is 30 percent and the surtax rate is 22 percent, the sum of the two tax rates is 52 percent and the specified fraction for the calendar year 1954 is 14/52. If, for example, section 11 should specify that the corporation's normal tax rate is 25 percent and the surtax rate is 22 percent for the calendar year, the sum of the two tax rates will be 47 percent and the specified fraction for the calendar year will be 14/47. If Corporation A, a public utility which files its income tax return on the calendar year basis, pays $100,000 dividends on its preferred stock in the calendar year 1954 and if its taxable income for such year is greater than $100,000 the deduction allowable to Corporation A under section 247 for 1954 is $100,000 times 14/52, or $26,923.08. If in 1954 Corporation A's taxable income, computed without regard to the deduction provided in section 247, had been $90,000 (that is, less than the amount of the dividends which it paid on its preferred stock in that year), the deduction allowable under section 247 for 1954 would have been $90,000 times 14/52, or $24,230.77.

(2) For the purpose of determining the amount of the deduction provided in section 247(a) and in subparagraph (1) of this paragraph, the amount of dividends paid in a given taxable year shall not include any amount distributed in such year with respect to dividends unpaid and accumulated in any taxable year ending before October 1, 1942. If any distribution is made in the current taxable year with respect to dividends unpaid and accumulated for a prior taxable year, such distribution will be deemed to have been made with respect to the earliest year or years for which there are dividends unpaid and accumulated. Thus, if a public utility makes a distribution with respect to a prior taxable year, it shall be considered that such distribution was made with respect to the earliest year or years for which there are dividends unpaid and accumulated, whether or not the public utility states that the distribution was made with respect to such year or years and even though the public utility stated that the distribution was made with respect to a later year. Even though it has dividends unpaid and accumulated with respect to a taxable year ending before October 1, 1942, a public utility may, however, include the dividends paid with respect to the current taxable year in computing the deduction under section 247. If there are no dividends unpaid and accumulated with respect to a taxable year ending before October 1, 1942, a

public utility may include the dividends paid with respect to a prior taxable year which ended after October 1, 1942, in computing the deduction under section 247; such public utility in addition may include the dividends paid with respect to the current taxable year in computing the deduction under section 247. However, if local law or its own charter requires a public utility to pay all unpaid and accumulated dividends before any dividends can be paid with respect to the current taxable year, such public utility may not include any distribution in the current year in computing the deduction under section 247 to the extent that there are dividends unpaid and accumulated with respect to taxable years ending before October 1, 1942.

(3) If a corporation which is engaged in one or more of the four types of business activities (called utility activities in this section) enumerated in section 247(b)(1) (the furnishing of telephone service or the sale of electrical energy, gas, or water) is also engaged in some other business that does not fall within any of the enumerated categories, the deduction under section 247 is allowable only for such portion of the amount computed under section 247(a) as is allocable to the income from utility activities. For this purpose, the allocation may be made on the basis of the ratio which the total income from the utility activities bears to total income from all sources (total income being considered either gross income or gross receipts, whichever method results in the higher deduction). However, if such an allocation reaches an inequitable result and the books of the corporation are so kept that the taxable income attributable to the utility activities can be readily determined, particularly where the books of the corporation are required by governmental bodies to be so kept for rate making or other purposes, the allocation may be made upon the basis of taxable income. No such apportionment will be required if the income from sources other than utility activities is less than 20 percent of the total income of the corporation, irrespective of the method used in determining such total income.

(b) *Public utility*. As used in section 247 and this section, public utility means a corporation engaged in the furnishing of telephone service, or in the sale of electric energy, gas, or water if the rates charged by such corporation for such furnishing or sale, as the case may be, have been established or approved by a State or political subdivision thereof or by an agency or instrumentality of the United States or by a public utility or public service commission or other similar body of the District of Columbia or of any State or political subdivision thereof. If a schedule of rates has been filed with any of the above bodies having the power to disapprove such rates, then such rates shall be considered as established or approved rates even though such body has taken no action on the filed schedule. Rates fixed by contract between the corporation and the purchaser, except where the purchaser is the United States, a State, the District of Columbia, or an agency or political subdivision of the United States, a State, or the District of Columbia, shall not be considered as established or approved rates in those cases where they are not subject to direct control, or where no maximum rate for such contract rates has been established by the United States, a State, the District of Columbia, or by an agency or political subdivision thereof. The deduction provided in section 247 will not be denied solely because part of the gross income of the corporation consists of revenue derived from such furnishing or sale at rates which are not so regulated, provided the corporation establishes to the satisfaction of the Commissioner (1) that the revenue from regulated rates and the revenue from unregulated rates are derived from the operation of a single interconnected and coordinated system within a single area or region in one or more States, or from the operation of more than one such system and (2) that the regulation to which it is subject in part of its operating territory in one such system is effective to control rates within the unregulated territory of the same system so that the rates within the unregulated territory have been and are substantially as favorable to users and consumers as are the rates within the regulated territory.

(c) *Preferred stock.* (1) For the purposes of section 247 and this section, preferred stock means stock (i) which was issued before October 1, 1942, (ii) the dividends in respect of which (during the whole of the taxable year, or the part of the taxable year after the actual date of the issue of such stock) were cumulative, nonparticipating as to current distributions, and payable in preference to the payment of dividends on other stock, and (iii) the rate of return on which is fixed and cannot be changed by a vote of the board of directors or by some similar method. However, if there are several classes of preferred stock, all of which meet the above requirements, the deduction provided in section 247 shall not be denied in the case of a given class of preferred stock merely because there is another class of preferred stock whose dividends are to be paid before those of the given class of stock. Likewise, it is immaterial for the purposes of section 247 and this section whether the stock be voting or nonvoting stock.

(2) Preferred stock issued on or after October 1, 1942, under certain circumstances will be considered as having been issued before October 1, 1942, for purposes of the deduction provided in section 247. If the new stock is issued on or after October 1, 1942, to refund or replace bonds or debentures which were issued before October 1, 1942, or to refund or replace other stock which was preferred stock within the meaning of section 247(b)(2) (or the corresponding provision of the Internal Revenue Code of 1939), such new stock shall be considered as having been issued before October 1, 1942. If preferred stock is issued to refund or replace stock which was preferred stock within the meaning of section 247(b)(2) (or the corresponding provision of the Internal Revenue Code of 1939), it shall be immaterial whether the preferred stock so refunded or replaced was issued before, on, or after October 1, 1942. If stock issued on or after October 1, 1942, to refund or replace stock which was issued before October 1, 1942, and which was preferred stock within the meaning of section 247(b)(2) (or the corresponding provision of the Internal Revenue Code of 1939), is not itself preferred stock within the meaning of section 247(b)(2) (or the corresponding provision of the Internal Revenue Code of 1939), no stock issued to refund or replace such stock can be considered preferred stock for purposes of the deduction provided in section 247.

(3) In the case of any preferred stock issued on or after October 1, 1942, to refund or replace bonds or debentures issued before October 1, 1942, or to refund or replace other stock which was preferred stock within the meaning of section 247(b)(2) (or the corresponding provision of the Internal Revenue Code of 1939), only that portion of the stock issued on or after October 1, 1942, will be considered as having been issued before October 1, 1942, the par or stated value of which does not exceed the par, stated, or face value of such bonds, debentures, or other preferred stock which the new stock was issued to refund or replace. In such case no shares of the new stock issued on or after October 1, 1942, shall be earmarked in determining the deduction allowable under section 247, but the appropriate allocable portion of the total amount of dividends paid on such stock will be considered as having been paid on stock which was issued before October 1, 1942.

(4) The provisions of section 247(b)(2) may be illustrated by the following example:

Example. A public utility has outstanding 1,000 bonds which were issued before October 1, 1942, and each of which has a face value of $100. On or after October 1, 1942, each of such bonds is retired in exchange for $1\frac{1}{10}$ shares of preferred stock issued on or after October 1, 1942, and having a par value of $100 per share. Only $\frac{10}{11}$ of the dividends paid on the preferred stock thus issued in exchange for the bonds will be considered as having been paid on stock which was issued before October 1, 1942. Likewise, if preferred stock which is issued on or after October 1, 1942, has no par value but a stated value of $50 per share and such stock is issued in a ratio of three shares to one share to refund or replace preferred stock having a par value of $100 per share, only two-thirds of the dividends paid on the new shares of stock will be considered as having been paid on stock which was issued before October 1, 1942.

(5) Whether or not preferred stock issued on or after October 1, 1942, was

issued to refund or replace bonds or debentures issued before October 1, 1942, or to refund or replace other preferred stock, is in each case a question of fact. Among the factors to be considered is whether such stock is new in an economic sense to the corporation or whether it was issued merely to take the place, directly or indirectly, of bonds, debentures, or other preferred stock of such corporation. It is not necessary that the new preferred stock be issued in exchange for such bonds, debentures, or other preferred stock. The mere fact that the bonds, debentures, or other preferred stock remain in existence for a short period of time after the issuance of the new stock (or were retired before the issuance of the new stock) does not necessarily mean that such new stock was not issued to refund or replace such bonds, debentures, or other preferred stock. It is necessary to consider the entire transaction, including the issuance of the new preferred stock, the date of such issuance, the retirement of the old bonds, debentures, or preferred stock, and the date of such retirement, in order to determine whether such new stock really was issued to take the place of bonds, debentures, or other preferred stock of the corporation or whether it represents something essentially new in an economic sense in the corporation's financial structure. If, for example, a public utility, which has outstanding bonds issued before October 1, 1942, issues new preferred stock on October 1, 1954, in order to secure funds with which to retire such bonds and with the money paid in for such stock retires the bonds on November 1, 1954, such stock may be considered as having been issued to refund or replace bonds issued before October 1, 1942. Whether the money used to retire the bonds can be traced back and identified as the money paid in for the stock will have evidentiary value, but will not be conclusive, in determining whether the stock was issued to refund or replace the bonds. Similarly, whether the amount of money used to retire the bonds was smaller than, equal to, or greater than that paid in for the stock, or whether the entire issue of bonds is retired, will be important, but not decisive, in making such determination.

(6) Preferred stock issued on or after October 1, 1942, by a corporation to refund or replace bonds or debentures of a second corporation which were issued before October 1, 1942, or to refund or replace other preferred stock of such second corporation, may be considered as having been issued before October 1, 1942, if such new stock was issued (i) in a transaction which is a reorganization within the meaning of section 368(a) or the corresponding provisions of the Internal Revenue Code of 1939; or (ii) in a transaction to which section 371 (relating to insolvency reorganizations), or the corresponding provisions of the Internal Revenue Code of 1939, is applicable; or (iii) in a transaction which is subject to the provisions of Part VI, Subchapter O, Chapter 1 of the Code (relating to exchanges and distributions in obedience to orders of the Securities and Exchange Commission) or to the corresponding provisions of the Internal Revenue Code of 1939. Whether the stock actually was issued to refund or replace bonds or debentures of the second corporation issued before October 1, 1942, or to refund or replace preferred stock of such second corporation, shall be determined under the same principles as if only one corporation were involved. A corporation may issue stock to refund or replace its own bonds, debentures, or other preferred stock in a transaction which is a reorganization within the meaning of section 368(a) or the corresponding provisions of the Internal Revenue Code of 1939, in a transaction to which section 371 or the corresponding provisions of the Internal Revenue Code of 1939 is applicable, or in a transaction which is subject to the provisions of Part VI, Subchapter O, Chapter 1 of the Code, or to the corresponding provisions of the Internal Revenue Code of 1939. The provisions of this paragraph, in addition, are applicable in case a corporation issues stock on or after October 1, 1942, to refund or replace its own bonds, debentures, or other preferred stock even though the issuance of such stock may not fall within one of the categories enumerated above.

(7) Even though stock issued on or after October 1, 1942, is considered as having been issued before October 1, 1942, by reason of having been issued to

refund or replace bonds or debentures issued before October 1, 1942, or to refund or replace other preferred stock, such stock will not be deemed to be preferred stock within the meaning of section 247(b)(2), and no deduction will be allowable in respect of dividends paid on such stock, unless the stock fulfills all the other requirements of a preferred stock set forth in section 247(b)(2) and in this paragraph.

§ 1.248–1 Election to amortize organizational expenditures.

(a) *In general.* Under section 248(a), a corporation may elect to amortize organizational expenditures as defined in section 248(b) and § 1.248–1(b). In the taxable year in which a corporation begins business, an electing corporation may deduct an amount equal to the lesser of the amount of the organizational expenditures of the corporation, or $5,000 (reduced (but not below zero) by the amount by which the organizational expenditures exceed $50,000). The remainder of the organizational expenditures is deducted ratably over the 180-month period beginning with the month in which the corporation begins business. All organizational expenditures of the corporation are considered in determining whether the organizational expenditures exceed $50,000, including expenditures incurred on or before October 22, 2004.

(b) *Organizational expenditures defined.* (1) Section 248(b) defines the term *organizational expenditures.* Such expenditures, for purposes of section 248 and this section, are those expenditures which are directly incident to the creation of the corporation. An expenditure, in order to qualify as an organizational expenditure, must be (i) incident to the creation of the corporation, (ii) chargeable to the capital account of the corporation, and (iii) of a character which, if expended incident to the creation of a corporation having a limited life, would be amortizable over such life. An expenditure which fails to meet each of these three tests may not be considered an organizational expenditure for purposes of section 248 and this section.

(2) The following are examples of organizational expenditures within the meaning of section 248 and this section: legal services incident to the organization of the corporation, such as drafting the corporate charter, by-laws, minutes of organizational meetings, terms of original stock certificates, and the like; necessary accounting services; expenses of temporary directors and of organizational meetings of directors or stockholders; and fees paid to the State of incorporation.

(3) The following expenditures are not organizational expenditures within the meaning of section 248 and this section:

(i) Expenditures connected with issuing or selling shares of stock or other securities, such as commissions, professional fees, and printing costs. This is so even where the particular issue of stock to which the expenditures relate is for a fixed term of years;

(ii) Expenditures connected with the transfer of assets to a corporation.

(4) Expenditures connected with the reorganization of a corporation, unless directly incident to the creation of a corporation, are not organizational expenditures within the meaning of section 248 and this section.

(c) *Time and manner of making election.* A corporation is deemed to have made an election under section 248(a) to amortize organizational expenditures as defined in section 248(b) and § 1.248–1(b) for the taxable year in which the corporation begins business. A corporation may choose to forgo the deemed election by affirmatively electing to capitalize its organizational expenditures on a timely filed Federal income tax return (including extensions) for the taxable year in which the corporation begins business. The election either to amortize organizational expenditures under section 248(a) or to capitalize organizational expenditures is irrevocable and applies to all organizational expenditures of the corporation. A change in the characterization of an item as an organizational expenditure is a change in method of accounting to which sections 446 and 481(a) apply if the corporation treated the item consistently for two or more taxable years. A change in the determination of the taxable year in which the corporation begins business also is treated as a change in method of accounting if the corporation amortized organizational expenditures for two or more taxable years.

(d) *Determination of when corporation begins business.* The deduction allowed under section 248 must be spread over a period beginning with the month in which the corporation begins business. The determination of the date the corporation begins business presents a question of fact which must be determined in each case in light of all the circumstances of the particular case. The words ''begins business,'' however, do not have the same meaning as ''in existence.'' Ordinarily, a corporation begins business when it starts the business operations for which it was organized; a corporation comes into existence on the date of its incorporation. Mere organizational activities, such as the obtaining of the corporate charter, are not alone sufficient to show the beginning of business. If the activities of the corporation have advanced to the extent necessary to establish the nature of its business operations, however, it will be deemed to have begun business. For example, the acquisition of operating assets which are necessary to the type of business contemplated may constitute the beginning of business.

(e) *Examples.* The following examples illustrate the application of this section:

Example 1. Expenditures of $5,000 or less Corporation X, a calendar year taxpayer, incurs $3,000 of organizational expenditures after October 22, 2004, and begins business on July 1, 2011. Under paragraph (c) of this section, Corporation X is deemed to have elected to amortize organizational expenditures under section 248(a) in 2011. Therefore, Corporation X may deduct the entire amount of the organizational expenditures in 2011, the taxable year in which Corporation X begins business.

Example 2. Expenditures of more than $5,000 but less than or equal to $50,000 The facts are the same as in *Example 1* except that Corporation X incurs organizational expenditures of $41,000. Under paragraph (c) of this section, Corporation X is deemed to have elected to amortize organizational expenditures under section 248(a) in 2011. Therefore, Corporation X may deduct $5,000 and the portion of the remaining $36,000 that is allocable to July through December of 2011 ($36,000/180 × 6 = $1,200) in 2011, the taxable year in which Corporation X begins business. Corporation X may amortize the remaining $34,800 ($36,000 − $1,200 = $34,800) ratably over the remaining 174 months.

Example 3. Subsequent change in the characterization of an item The facts are the same as in *Example 2* except that Corporation X determines in 2013 that Corporation X incurred $10,000 for an additional organizational expenditure erroneously deducted in 2011 under section 162 as a business expense. Under paragraph (c) of this section, Corporation X is deemed to have elected to amortize organizational expenditures under section 248(a) in 2011, including the additional $10,000 of organizational expenditures. Corporation X is using an impermissible method of accounting for the additional $10,000 of organizational expenditures and must change its method under §1.446–1(e) and the applicable general administrative procedures in effect in 2013.

Example 4. Subsequent redetermination of year in which business begins The facts are the same as in *Example 2* except that, in 2012, Corporation X deducted the organizational expenditures allocable to January through December of 2012 ($36,000/180 × 12 = $2,400). In addition, in 2013 it is determined that Corporation X actually began business in 2012. Under paragraph (c) of this section, Corporation X is deemed to have elected to amortize organizational expenditures under section 248(a) in 2012. Corporation X impermissibly deducted organizational expenditures in 2011, and incorrectly determined the amount of organizational expenditures deducted in 2012. Therefore, Corporation X is using an impermissible method of accounting for the organizational expenditures and must change its method under §1.446–1(e) and the applicable general administrative procedures in effect in 2013.

Example 5. Expenditures of more than $50,000 but less than or equal to $55,000 The facts are the same as in *Example 1* except that Corporation X incurs organizational expenditures of $54,500. Under paragraph (c) of this section, Corporation X is deemed to have elected to amortize organizational expenditures under section 248(a) in 2011. Therefore, Corporation X may deduct $500 ($5,000 − $4,500) and the portion of the remaining $54,000 that is allocable to July through December of 2011 ($54,000/180 × 6 = $1,800) in 2011, the taxable year in which Corporation X begins business. Corporation X may amortize the remaining $52,200 ($54,000 − $1,800 = $52,200) ratably over the remaining 174 months.

Example 6. Expenditures of more than $55,000 The facts are the same as in *Example 1* except that Corporation X incurs organizational expenditures of $450,000. Under paragraph (c) of this section, Corporation X is deemed to have elected to amortize organizational expenditures under section 248(a) in 2011. Therefore, Corporation X may deduct the amounts allocable to July through December of 2011 ($450,000/180 × 6 = $15,000) in 2011, the taxable year in which Corporation X begins business. Corporation X may amortize the remaining $435,000 ($450,000 − $15,000 = $435,000) ratably over the remaining 174 months.

(f) *Effective/applicability date.* This section applies to organizational expenditures paid or incurred after August 16, 2011. However, taxpayers may apply all the provisions of this section to organizational expenditures paid or incurred after October 22, 2004, provided that the period of limitations on assessment of tax for the year the election under paragraph (c) of this section is deemed made has not expired. For organizational expenditures paid or incurred on or before September 8, 2008, taxpayers may instead apply §1.248–1, as in effect prior to that date (§1.248–1 as contained in 26 CFR part 1 edition revised as of April 1, 2008).

[T.D. 9411, 73 FR 38913, July 8, 2008, as amended by T.D. 9542, 76 FR 50889, Aug. 17, 2011]

§ 1.249–1 Limitation on deduction of bond premium on repurchase.

(a) *Limitation*—(1) *General rule.* No deduction is allowed to the issuing corporation for any ''repurchase premium'' paid or incurred to repurchase a convertible obligation to the extent the repurchase premium exceeds a ''normal call premium.''

(2) *Exception.* Under paragraph (e) of this section, the preceding sentence shall not apply to the extent the corporation demonstrates that such excess is attributable to the cost of borrowing and not to the conversion feature.

(b) *Obligations*—(1) *Definition.* For purposes of this section, the term *obligation* means any bond, debenture, note, or certificate or other evidence of indebtedness.

(2) *Convertible obligation.* Section 249 applies to an obligation which is convertible into the stock of the issuing corporation or a corporation which, at the time the obligation is issued or repurchased, is in control of or controlled by the issuing corporation. For purposes of this subparagraph, the term *control* has the meaning assigned to such term by section 368(c).

(3) *Comparable nonconvertible obligation.* A nonconvertible obligation is comparable to a convertible obligation if both obligations are of the same grade and classification, with the same issue and maturity dates, and bearing the same rate of interest. The term *comparable nonconvertible obligation* does not include any obligation which is convertible into property.

(c) *Repurchase premium.* For purposes of this section, the term *repurchase premium* means the excess of the repurchase price paid or incurred to repurchase the obligation over its adjusted issue price (within the meaning of §1.1275–1(b)) as of the repurchase date. For the general rules applicable to the deductibility of repurchase premium, see §1.163–7(c). This paragraph (c) applies to convertible obligations repurchased on or after March 2, 1998.

(d) *Normal call premium*—(1) *In general.* Except as provided in subparagraph (2) of this paragraph, for purposes of this section, a *normal call premium* on a convertible obligation is an amount equal to a normal call premium on a nonconvertible obligation which is comparable to the convertible obligation. A normal call premium on a comparable nonconvertible obligation is a call premium specified in dollars under the terms of such obligation. Thus, if such a specified call premium is constant over the entire term of the obligation, the normal call premium is the amount specified. If, however, the specified call premium varies during the period the comparable nonconvertible obligation is callable or if such obligation is not callable over its entire term, the normal call premium is the amount specified for the period during the term of such comparable nonconvertible obligation which corresponds to the period during which the convertible obligation was repurchased.

(2) *One-year's interest rule.* For a convertible obligation repurchased on or after March 2, 1998, a call premium specified in dollars under the terms of the obligation is considered to be a normal call premium on a nonconvertible obligation if the call premium applicable when the obligation is repurchased does not exceed an amount equal to the interest (including original issue discount) that otherwise would be deductible for the taxable year of repurchase (determined as if the obligation were not repurchased). The provisions of this subparagraph

shall not apply if the amount of interest payable for the corporation's taxable year is subject under the terms of the obligation to any contingency other than repurchase prior to the close of such taxable year.

(e) *Exception*—(1) *In general*. If a repurchase premium exceeds a normal call premium, the general rule of paragraph (a) (1) of this section does not apply to the extent that the corporation demonstrates to the satisfaction of the Commissioner or his delegate that such repurchase premium is attributable to the cost of borrowing and is not attributable to the conversion feature. For purposes of this paragraph, if a normal call premium cannot be established under paragraph (d) of this section, the amount thereof shall be considered to be zero.

(2) *Determination of the portion of a repurchase premium attributable to the cost of borrowing and not attributable to the conversion feature*. (i) For purposes of subparagraph (1) of this paragraph, the portion of a repurchase premium which is attributable to the cost of borrowing and which is not attributable to the conversion feature is the amount by which the selling price of the convertible obligation increased between the dates it was issued and repurchased by reason of a decline in yields on comparable nonconvertible obligations traded on an established securities market or, if such comparable traded obligations do not exist, by reason of a decline in yields generally on nonconvertible obligations which are as nearly comparable as possible.

(ii) In determining the amount under paragraph (e)(2)(i) of this section, appropriate consideration shall be given to all factors affecting the selling price or yields of comparable nonconvertible obligations. Such factors include general changes in prevailing yields of comparable obligations between the dates the convertible obligation was issued and repurchased and the amount (if any) by which the selling price of the nonconvertible obligation was affected by reason of any change in the issuing corporation's credit quality or the credit quality of the obligation during such period (determined on the basis of widely published financial information or on the basis of other relevant facts and circumstances which reflect the relative credit quality of the corporation or the comparable obligation).

(iii) The relationship between selling price and yields in subdivision (i) of this subparagraph shall ordinarily be determined by means of standard bond tables.

(f) *Effective/applicability dates*—(1) *In general*. Under section 414(c) of the Tax Reform Act of 1969, the provisions of section 249 and this section shall apply to any repurchase of a convertible obligation occurring after April 22, 1969, other than a convertible obligation repurchased pursuant to a binding obligation incurred on or before April 22, 1969, to repurchase such convertible obligation at a specified call premium. A binding obligation on or before such date may arise if, for example, the issuer irrevocably obligates itself, on or before such date, to repurchase the convertible obligation at a specified price after such date, or if, for example, the issuer, without regard to the terms of the convertible obligation, negotiates a contract which, on or before such date, irrevocably obligates the issuer to repurchase the convertible obligation at a specified price after such date. A binding obligation on or before such date does not include a privilege in the convertible obligation permitting the issuer to call such convertible obligation after such date, which privilege was not exercised on or before such date.

(2) *Effect on transactions not subject to this section*. No inferences shall be drawn from the provisions of section 249 and this section as to the proper treatment of transactions not subject to such provisions because of the effective date limitations thereof. For provisions relating to repurchases of convertible bonds or other evidences of indebtedness to which section 249 and this section do not apply, see §§ 1.163–3(c) and 1.163–4(c).

(3) *Portion of repurchase premium attributable to cost of borrowing*. Paragraph (e)(2)(ii) of this section applies to any repurchase of a convertible obligation occurring on or after July 6, 2011.

(g) *Example*. The provisions of this section may be illustrated by the following example:

Example. On May 15, 1968, corporation A issues a callable 20-year convertible bond at face for $1,000 bearing interest at 10 percent per annum. The bond is convertible at any time into 2 shares of the common stock of corporation A. Under the terms of the bond, the applicable call price prior to May 15, 1975, is $1,100. On June 1, 1974, corporation A calls the bond for $1,100. Since the repurchase premium, $100 (i.e., $1,100 minus $1,000), was specified in dollars in the obligation and does not exceed 1 year's interest at the rate fixed in the obligation, the $100 is considered under paragraph (d) (2) of this section to be a normal call premium on a comparable nonconvertible obligation. Accordingly, A may deduct the $100 under §1.163–3(c).

[T.D. 7259, 38 FR 4254, Feb. 12, 1973, as amended by T.D. 8746, 62 FR 68182, Dec. 31, 1997; T.D. 9533, 76 FR 39281, July 6, 2011; T.D. 9637, 78 FR 54759, Sept. 6, 2013]

§ 1.250–0 Table of contents.

This section contains a listing of the headings for §§1.250–1, 1.250(a)–1, and 1.250(b)–1 through 1.250(b)–6.

§ 1.250(b)–6 Related party transactions.

(a) Scope.
(b) Definitions.
(1) Related party sale.
(2) Related party service.
(3) Unrelated party transaction.
(c) Related party sales.
(1) In general.
(i) Sale of property in an unrelated party transaction.
(ii) Use of property in an unrelated party transaction.
(2) Treatment of foreign related party as seller or renderer.
(3) Transactions between related parties.
(4) Example.
(d) Related party services.
(1) In general.
(2) Substantially similar services.
(3) Special rules.
(i) Rules for determining the location of and price paid by recipients of a service provided by a related party.
(ii) Rules for allocating the benefits provided by and price paid to the renderer of a related party service.
(4) Examples.

[T.D. 9901, 85 FR 43080, July 15, 2020, as amended by 85 FR 60910, Sept. 29, 2020]

§ 1.250–1 Introduction.

(a) *Overview.* Sections 1.250(a)–1 and 1.250(b)–1 through 1.250(b)–6 provide rules to determine a domestic corporation's section 250 deduction. Section 1.250(a)–1 provides rules to determine the amount of a domestic corporation's deduction for foreign-derived intangible income and global intangible low-taxed income. Section 1.250(b)–1 provides general rules and definitions regarding the computation of foreign-derived intangible income. Section 1.250(b)–2 provides rules for determining a domestic corporation's qualified business asset investment. Section 1.250(b)–3 provides general rules and definitions regarding the determination of gross foreign-derived deduction eligible income. Section 1.250(b)–4 provides rules regarding the determination of gross foreign-derived deduction eligible income from the sale of property. Section 1.250(b)–5 provides rules regarding the determination of gross foreign-derived deduction eligible income from the provision of a service. Section 1.250(b)–6 provides rules regarding the sale of property or provision of a service to a related party.

(b) *Applicability dates.* Except as otherwise provided in this paragraph (b), §§ 1.250(a)–1 and 1.250(b)–1 through

1.250(b)–6 apply to taxable years beginning on or after January 1, 2021. Section 1.250(b)–2(h)applies to taxable years ending on or after March 4, 2019. The last sentence in §1.250(b)–2(e)(2) applies to taxable years beginning after December 31, 2017.

[T.D. 9901, 85 FR 43080, July 15, 2020, as amended by 85 FR 68249, Oct. 28, 2020; T.D. 9956, 86 FR 52972, Sept. 24, 2021]

§ 1.250(a)–1 Deduction for foreign-derived intangible income (FDII) and global intangible low-taxed income (GILTI).

(a) *Scope.* This section provides rules for determining the amount of a domestic corporation's deduction for foreign-derived intangible income (FDII) and global intangible low-taxed income (GILTI). Paragraph (b) of this section provides general rules for determining the amount of the deduction. Paragraph (c) of this section provides definitions relevant for determining the amount of the deduction. Paragraph (d) of this section provides reporting requirements for a domestic corporation claiming the deduction. Paragraph (e) of this section provides a rule for determining the amount of the deduction of a member of a consolidated group. Paragraph (f) of this section provides examples illustrating the application of this section.

(b) *Allowance of deduction*—(1) *In general.* A domestic corporation is allowed a deduction for any taxable year equal to the sum of—

(i) 37.5 percent of its foreign-derived intangible income for the year; and

(ii) 50 percent of—

(A) Its global intangible low-taxed income for the year; and

(B) The amount treated as a dividend received by the corporation under section 78 which is attributable to its GILTI for the year.

(2) *Taxable income limitation.* In the case of a domestic corporation with a section 250(a)(2) amount for a taxable year, for purposes of applying paragraph (b)(1) of this section for the year—

(i) The corporation's FDII for the year (if any) is reduced (but not below zero) by an amount that bears the same ratio to the corporation's section 250(a)(2) amount that the corporation's FDII for the year bears to the sum of the corporation's FDII and GILTI for the year; and

(ii) The corporation's GILTI for the year (if any) is reduced (but not below zero) by the excess of the corporation's section 250(a)(2) amount over the amount of the reduction described in paragraph (b)(2)(i) of this section.

(3) *Reduction in deduction for taxable years after 2025.* For any taxable year of a domestic corporation beginning after December 31, 2025, paragraph (b)(1) of this section applies by substituting—

(i) 21.875 percent for 37.5 percent in paragraph (b)(1)(i) of this section; and

(ii) 37.5 percent for 50 percent in paragraph (b)(1)(ii) of this section.

(4) *Treatment under section 4940.* For purposes of section 4940(c)(3)(A), a deduction under section 250(a) is not treated as an ordinary and necessary expense paid or incurred for the production or collection of gross investment income.

(c) *Definitions.* The following definitions apply for purposes of this section.

(1) *Domestic corporation.* The term *domestic corporation* has the meaning set forth in section 7701(a), but does not include a regulated investment company (as defined in section 851), a real estate investment trust (as defined in section 856), or an S corporation (as defined in section 1361).

(2) *Foreign-derived intangible income (FDII).* The term *foreign-derived intangible income* or *FDII* has the meaning set forth in §1.250(b)–1(b).

(3) *Global intangible low-taxed income (GILTI).* The term *global intangible low-taxed income* or *GILTI* means, with respect to a domestic corporation for a taxable year, the corporation's GILTI inclusion amount under §1.951A–1(c) for the taxable year.

(4) *Section 250(a)(2) amount.* The term *section 250(a)(2) amount* means, with respect to a domestic corporation for a taxable year, the excess (if any) of the sum of the corporation's FDII and GILTI (determined without regard to section 250(a)(2) and paragraph (b)(2) of this section), over the corporation's taxable income. For a corporation that is subject to the unrelated business income tax under section 511, taxable income is determined only by reference

to that corporation's unrelated business taxable income defined under section 512.

(5) *Taxable income*—(i) *In general.* The term *taxable income* has the meaning set forth in section 63(a) determined without regard to the deduction allowed under section 250 and this section.

(ii) [Reserved]

(d) *Reporting requirement.* Each domestic corporation (or individual making an election under section 962) that claims a deduction under section 250 for a taxable year must make an annual return on Form 8993, ''Section 250 Deduction for Foreign-Derived Intangible Income (FDII) and Global Intangible Low-Taxed Income (GILTI)'' (or any successor form) for such year, setting forth the information, in such form and manner, as Form 8993 (or any successor form) or its instructions prescribe. Returns on Form 8993 (or any successor form) for a taxable year must be filed with the domestic corporation's (or in the case of a section 962 election, the individual's) income tax return on or before the due date (taking into account extensions) for filing the corporation's (or in the case of a section 962 election, the individual's) income tax return.

(e) *Determination of deduction for consolidated groups.* A member of a consolidated group (as defined in §1.1502–1(h)) determines its deduction under section 250(a) and this section under the rules provided in §1.1502–50(b).

(f) *Example: Application of the taxable income limitation.* The following example illustrates the application of this section. For purposes of the example, it is assumed that DC is a domestic corporation that is not a member of a consolidated group and the taxable year of DC begins after 2017 and before 2026.

(1) *Facts.* For the taxable year, without regard to section 250(a)(2) and paragraph (b)(2) of this section, DC has FDII of $100x and GILTI of $300x. DC's taxable income (without regard to section 250(a) and this section) is $300x.

(2) *Analysis.* DC has a section 250(a)(2) amount of $100x, which is equal to the excess of the sum of DC's FDII and GILTI of $400x ($100x + $300x) over its taxable income of $300x. As a result, DC's FDII and GILTI are reduced, in the aggregate, by $100x under section 250(a)(2) and paragraph (b)(2) of this section for purposes of calculating DC's deduction allowed under section 250(a)(1) and paragraph (b)(1) of this section. DC's FDII is reduced by $25x, the amount that bears the same ratio to the section 250(a)(2) amount ($100x) as DC's FDII ($100x) bears to the sum of DC's FDII and GILTI ($400x). DC's GILTI is reduced by $75x, which is the remainder of the section 250(a)(2) amount ($100x − $25x). Therefore, for purposes of calculating its deduction under section 250(a)(1) and paragraph (b)(1) of this section, DC's FDII is $75x ($100x − $25x) and its GILTI is $225x ($300x − $75x). Accordingly, DC is allowed a deduction for the taxable year under section 250(a)(1) and paragraph (b)(1) of this section of $140.63x ($75x × 0.375 + $225x × 0.50).

[T.D. 9901, 85 FR 43080, July 15, 2020]

§ 1.250(b)–1 Computation of foreign-derived intangible income (FDII).

(a) *Scope.* This section provides rules for computing FDII. Paragraph (b) of this section defines FDII. Paragraph (c) of this section provides definitions that are relevant for computing FDII. Paragraph (d) of this section provides rules for computing gross income and allocating and apportioning deductions for purposes of computing deduction eligible income (DEI) and foreign-derived deduction eligible income (FDDEI). Paragraph (e) of this section provides rules for computing the DEI and FDDEI of a domestic corporate partner. Paragraph (f) of this section provides a rule for computing the FDII of a member of a consolidated group. Paragraph (g) of this section provides a rule for computing the FDII of a tax-exempt corporation.

(b) *Definition of FDII.* Subject to the provisions of this section, the term *FDII* means, with respect to a domestic corporation for a taxable year, the corporation's deemed intangible income for the year multiplied by the corporation's foreign-derived ratio for the year.

(c) *Definitions.* This paragraph (c) provides definitions that apply for purposes of this section and §§1.250(b)–2 through 1.250(b)–6.

(1) *Controlled foreign corporation.* The term *controlled foreign corporation* has the meaning set forth in section 957(a) and §1.957–1(a).

(2) *Deduction eligible income.* The term *deduction eligible income* or *DEI* means, with respect to a domestic corporation for a taxable year, the excess (if any) of the corporation's gross DEI for the year over the deductions properly allocable to gross DEI for the year, as determined under paragraph (d)(2) of this section.

(3) *Deemed intangible income.* The term *deemed intangible income* means, with respect to a domestic corporation for a taxable year, the excess (if any) of the corporation's DEI for the year over the corporation's deemed tangible income return for the year.

(4) *Deemed tangible income return.* The term *deemed tangible income return* means, with respect to a domestic corporation and a taxable year, 10 percent of the corporation's qualified business asset investment for the year.

(5) *Dividend.* The term *dividend* has the meaning set forth in section 316, and includes any amount treated as a dividend under any other provision of subtitle A of the Internal Revenue Code or the regulations in this part (for example, under section 78, 356(a)(2), 367(b), or 1248).

(6) *Domestic corporation.* The term *domestic corporation* has the meaning set forth in §1.250(a)–1(c)(1).

(7) *Domestic oil and gas extraction income.* The term *domestic oil and gas extraction income* means income described in section 907(c)(1), substituting ''within the United States'' for ''without the United States.'' A taxpayer must use a consistent method to determine the amount of its domestic oil and gas extraction income (''DOGEI'') and its foreign oil and gas extraction income (''FOGEI'') from the sale of oil or gas that has been transported or processed. For example, a taxpayer must use a consistent method to determine the amount of FOGEI from the sale of gasoline from foreign crude oil sources in computing the exclusion from gross tested income under §1.951A–2(c)(1)(v) and the amount of DOGEI from the sale of gasoline from domestic crude oil sources in computing its section 250 deduction.

(8) *FDDEI sale.* The term *FDDEI sale* has the meaning set forth in §1.250(b)–4(b).

(9) *FDDEI service.* The term *FDDEI service* has the meaning set forth in §1.250(b)–5(b).

(10) *FDDEI transaction.* The term *FDDEI transaction* means a FDDEI sale or a FDDEI service.

(11) *Foreign branch income.* The term *foreign branch income* has the meaning set forth in section 904(d)(2)(J) and §1.904–4(f)(2).

(12) *Foreign-derived deduction eligible income.* The term *foreign-derived deduction eligible income* or *FDDEI* means, with respect to a domestic corporation for a taxable year, the excess (if any) of the corporation's gross FDDEI for the year, over the deductions properly allocable to gross FDDEI for the year, as determined under paragraph (d)(2) of this section.

(13) *Foreign-derived ratio.* The term *foreign-derived ratio* means, with respect to a domestic corporation for a taxable year, the ratio (not to exceed one) of the corporation's FDDEI for the year to the corporation's DEI for the year. If a domestic corporation has no FDDEI for a taxable year, the corporation's foreign-derived ratio is zero for the taxable year.

(14) *Gross RDEI.* The term *gross RDEI* means, with respect to a domestic corporation or a partnership for a taxable year, the portion of the corporation or partnership's gross DEI for the year that is not included in gross FDDEI.

(15) *Gross DEI.* The term *gross DEI* means, with respect to a domestic corporation or a partnership for a taxable year, the gross income of the corporation or partnership for the year determined without regard to the following items of gross income—

(i) Amounts included in gross income under section 951(a)(1);

(ii) GILTI (as defined in §1.250(a)–1(c)(3));

(iii) Financial services income (as defined in section 904(d)(2)(D) and §1.904–4(e)(1)(ii));

(iv) Dividends received from a controlled foreign corporation with respect to which the corporation or partnership is a United States shareholder;

(v) Domestic oil and gas extraction income; and

(vi) Foreign branch income.

(16) *Gross FDDEI.* The term *gross FDDEI* means, with respect to a domestic corporation or a partnership for a taxable year, the portion of the gross DEI of the corporation or partnership for the year which is derived from all of its FDDEI transactions.

(17) *Modified affiliated group*—(i) *In general.* The term *modified affiliated group* means an affiliated group as defined in section 1504(a) determined by substituting ''more than 50 percent'' for ''at least 80 percent'' each place it appears, and without regard to section 1504(b)(2) and (3).

(ii) *Special rule for noncorporate entities.* Any person (other than a corporation) that is controlled by one or more members of a modified affiliated group (including one or more persons treated as a member or members of a modified affiliated group by reason of this paragraph (c)(17)(ii)) or that controls any such member is treated as a member of the modified affiliated group.

(iii) *Definition of control.* For purposes of paragraph (c)(17)(ii) of this section, the term *control* has the meaning set forth in section 954(d)(3).

(18) *Qualified business asset investment.* The term *qualified business asset investment* or *QBAI* has the meaning set forth in § 1.250(b)–2(b).

(19) *Related party.* The term *related party* means, with respect to any person, any member of a modified affiliated group that includes such person.

(20) *United States shareholder.* The term *United States shareholder* has the meaning set forth in section 951(b) and § 1.951–1(g).

(d) *Treatment of cost of goods sold and allocation and apportionment of deductions*—(1) *Cost of goods sold for determining gross DEI and gross FDDEI.* For purposes of determining the gross income included in gross DEI and gross FDDEI of a domestic corporation or a partnership, the cost of goods sold of the corporation or partnership is attributed to gross receipts with respect to gross DEI or gross FDDEI under any reasonable method that is applied consistently. Cost of goods sold must be attributed to gross receipts with respect to gross DEI or gross FDDEI regardless of whether certain costs included in cost of goods sold can be associated with activities undertaken in an earlier taxable year (including a year before the effective date of section 250). A domestic corporation or partnership may not segregate cost of goods sold with respect to a particular product into component costs and attribute those component costs disproportionately to gross receipts with respect to amounts excluded from gross DEI or gross FDDEI, as applicable.

(2) *Deductions properly allocable to gross DEI and gross FDDEI*—(i) *In general.* For purposes of determining a domestic corporation's deductions that are properly allocable to gross DEI and gross FDDEI, the corporation's deductions are allocated and apportioned to gross DEI and gross FDDEI under the rules of §§ 1.861–8 through 1.861–14T and 1.861–17 by treating section 250(b) as an operative section described in § 1.861–8(f). In allocating and apportioning deductions under §§ 1.861–8 through 1.861–14T and 1.861–17, gross FDDEI and gross RDEI are treated as separate statutory groupings. The deductions allocated and apportioned to gross DEI equal the sum of the deductions allocated and apportioned to gross FDDEI and gross RDEI. All items of gross income described in paragraphs (c)(15)(i) through (vi) of this section are in the residual grouping.

(ii) *Determination of deductions to allocate.* For purposes of determining the deductions of a domestic corporation for a taxable year properly allocable to gross DEI and gross FDDEI, the deductions of the corporation for the taxable year are determined without regard to sections 163(j), 170(b)(2), 172, 246(b), and 250.

(3) *Examples.* The following examples illustrate the application of this paragraph (d).

(i) *Assumed facts.* The following facts are assumed for purposes of the examples—

(A) DC is a domestic corporation that is not a member of a consolidated group.

(B) All sales and services are provided to persons that are not related parties.

(C) All sales and services to foreign persons qualify as FDDEI transactions.

(ii) *Examples*—

(A) *Example 1: Allocation of deductions*—(*1*) *Facts*. For a taxable year, DC manufactures products A and B in the United States. DC sells products A and B and provides services associated with products A and B to United States and foreign persons. DC's QBAI for the taxable year is $1,000x. DC has $300x of deductible interest expense allowed under section 163. DC has assets with a tax book value of $2,500x. The tax book value of DC's assets used to produce products A and B and services is split evenly between assets that produce gross FDDEI and assets that produce gross RDEI. DC has $840x of supportive deductions, as defined in §1.861–8(b)(3), attributable to general and administrative expenses incurred for the purpose of generating the class of gross income that consists of gross DEI. DC apportions the $840x of deductions on the basis of gross income in accordance with §1.861–8T(c)(1). For purposes of determining gross FDDEI and gross DEI under paragraph (d)(1) of this section, DC attributes $200x of cost of goods sold to Product A and $400x of cost of goods sold to Product B, and then attributes the cost of goods sold for each product ratably between the gross receipts of such product sold to foreign persons and the gross receipts of such product sold to United States persons. The manner in which DC attributes the cost of goods sold is a reasonable method. DC has no other items of income, loss, or deduction. For the taxable year, DC has the following income tax items relevant to the determination of its FDII:

TABLE 1 TO PARAGRAPH (d)(3)(ii)(A)(*1*)

	Product A	Product B	Services	Total
Gross receipts from U.S. persons	$200x	$800x	$100x	$1,100x
Gross receipts from foreign persons	200x	800x	100x	1,100x
Total gross receipts	400x	1,600x	200x	2,200x
Cost of goods sold for gross receipts from U.S. persons	100x	200x	0	300x
Cost of goods sold for gross receipts from foreign persons	100x	200x	0	300x
Total cost of goods sold	200x	400x	0	600x
Gross income	200x	1,200x	200x	1,600x
Tax book value of assets used to produce products/services	500x	500x	1,500x	2,500x

(*2*) *Analysis*—(*i*) *Determination of gross FDDEI and gross RDEI*. Because DC does not have any income described in section 250(b)(3)(A)(i)(I) through (VI) and paragraphs (c)(15)(i) through (vi) of this section, none of its gross income is excluded from gross DEI. DC's gross DEI is $1,600x ($2,200x total gross receipts less $600x total cost of goods sold). DC's gross FDDEI is $800x ($1,100x of gross receipts from foreign persons minus attributable cost of goods sold of $300x).

(*ii*) *Determination of foreign-derived deduction eligible income*. To calculate its FDDEI, DC must determine the amount of its deductions that are allocated and apportioned to gross FDDEI and then subtract those amounts from gross FDDEI. DC's interest deduction of $300x is allocated and apportioned to gross FDDEI on the basis of the average total value of DC's assets in each grouping. DC has assets with a tax book value of $2,500x split evenly between assets that produce gross FDDEI and assets that produce gross RDEI. Accordingly, an interest expense deduction of $150x is apportioned to DC's gross FDDEI. With respect to DC's supportive deductions of $840x that are related to DC's gross DEI, DC apportions such deductions between gross FDDEI and gross RDEI on the basis of gross income. Accordingly, supportive deductions of $420x are apportioned to DC's gross FDDEI. Thus, DC's FDDEI is $230x, which is equal to its gross FDDEI of $800x less $150x of interest expense deduction and $420x of supportive deductions.

(*iii*) *Determination of deemed intangible income*. DC's deemed tangible income return is $100x, which is equal to 10 percent of its QBAI of $1,000x. DC's DEI is $460x, which is equal to its gross DEI of $1,600x less $300x of interest expense deductions and $840x of supportive deductions. Therefore, DC's deemed intangible income is $360x, which is equal to the excess of its DEI of $460x over its deemed tangible income return of $100x.

(*iv*) *Determination of foreign-derived intangible income.* DC's foreign-derived ratio is 50 percent, which is the ratio of DC's FDDEI of $230x to DC's DEI of $460x. Therefore, DC's FDII is $180x, which is equal to DC's deemed intangible income of $360x multiplied by its foreign-derived ratio of 50 percent.

(B) *Example 2: Allocation of deductions with respect to a partnership*—(*1*) *Facts*—(*i*) *DC's operations.* DC is engaged in the production and sale of products consisting of two separate product groups in three-digit Standard Industrial Classification (SIC) Industry Groups, hereafter referred to as Group AAA and Group BBB. All of the gross income of DC is included in gross DEI. DC incurs $250x of research and experimental (R&E) expenditures in the United States that are deductible under section 174. None of the R&E is included in cost of goods sold. For purposes of determining gross FDDEI and gross DEI under paragraph (d)(1) of this section, DC attributes $210x of cost of goods sold to Group AAA products and $900x of cost of goods sold to Group BBB products, and then attributes the cost of goods sold with respect to each such product group ratably between the gross receipts with respect to such product group sold to foreign persons and the gross receipts with respect to such product group not sold to foreign persons. The manner in which DC attributes the cost of goods sold is a reasonable method. For the taxable year, DC has the following income tax items relevant to the determination of its FDII:

TABLE 2 TO (d)(3)(ii)(B)(*1*)(*i*)

	Group AAA products	Group BBB products	Total
Gross receipts from U.S. persons	$200x	$800x	$1,000x
Gross receipts from foreign persons	100x	400x	500x
Total gross receipts	300x	1,200x	1,500x
Cost of goods sold for gross receipts from U.S. persons	140x	600x	740x
Cost of goods sold for gross receipts from foreign persons	70x	300x	370x
Total cost of goods sold	210x	900x	1,110x
Gross income	90x	300x	390x
R&E deductions	40x	210x	250x

(*ii*) *PRS's operations.* In addition to its own operations, DC is a partner in PRS, a partnership that also produces products described in SIC Group AAA. DC is allocated 50 percent of all income, gain, loss, and deductions of PRS. During the taxable year, PRS sells Group AAA products solely to foreign persons, and all of its gross income is included in gross DEI. PRS has $400 of gross receipts from sales of Group AAA products for the taxable year and incurs $100x of research and experimental (R&E) expenditures in the United States that are deductible under section 174. None of the R&E is included in cost of goods sold. For purposes of determining gross FDDEI and gross DEI under paragraph (d)(1) of this section, PRS attributes $200x of cost of goods sold to Group AAA products, and then attributes the cost of goods sold with respect to such product group ratably between the gross receipts with respect to such product group sold to foreign persons and the gross receipts with respect to such product group not sold to foreign persons. The manner in which PRS attributes the cost of goods sold is a reasonable method. DC's distributive share of PRS taxable items is $100x of gross income and $50x of R&E deductions, and DC's share of PRS's gross receipts from sales of Group AAA products for the taxable year is $200x under § 1.861–17(f)(3).

(*iii*) *Application of the sales method to allocate and apportion R&E.* DC applies the sales method to apportion its R&E deductions under § 1.861–17. Neither DC nor PRS licenses or sells its intangible property to controlled or uncontrolled corporations in a manner that necessitates including the sales by such corporations for purposes of apportioning DC's R&E deductions.

(*2*) *Analysis*—(*i*) *Determination of gross DEI and gross FDDEI.* Under paragraph (e)(1) of this section, DC's gross DEI, gross FDDEI, and deductions allocable to those amounts include its distributive share of gross DEI, gross FDDEI, and deductions of PRS. Thus, DC's gross DEI for the year is $490x ($390x attributable to DC and $100x attributable to DC's interest in PRS). DC's gross income from sales of Group AAA products to foreign persons is $30x ($100x of gross receipts minus attributable cost of goods sold of $70x). DC's gross income from sales of Group BBB products to foreign persons is $100x ($400x of gross receipts minus attributable cost of goods sold of $300x). DC's gross FDDEI for the year is $230x ($30x from DC's sale of Group AAA products plus $100x from DC's sale of Group BBB products plus DC's distributive share of PRS's gross FDDEI of $100x).

(*ii*) *Allocation and apportionment of R&E deductions*. To determine FDDEI, DC must allocate and apportion its R&E expense of $300x ($250x incurred directly by DC and $50x incurred indirectly through DC's interest in PRS). In accordance with §1.861–17, R&E expenses are first allocated to a class of gross income related to a three-digit SIC group code. DC's R&E expenses related to products in Group AAA are $90x ($40x incurred directly by DC and $50x incurred indirectly through DC's interest in PRS) and its expenses related to Group BBB are $210x. See paragraph (d)(2)(i) of this section. Accordingly, all R&E expense attributable to a particular SIC group code is apportioned on the basis of the amounts of sales within that SIC group code. Total sales within Group AAA were $500x ($300x directly by DC and $200x attributable to DC's interest in PRS), $300x of which were made to foreign persons ($100x directly by DC and $200x attributable to DC's interest in PRS). Therefore, the $90x of R&E expense related to Group AAA is apportioned $54x to gross FDDEI ($90x × $300x/$500x) and $36x to gross RDEI ($90x × $200x/$500x). Total sales within Group BBB were $1,200x, $400x of which were made to foreign persons. Therefore, the $210x of R&E expense related to products in Group BBB is apportioned $70x to gross FDDEI ($210x × $400x/$1,200x) and $140x to gross RDEI ($210x × $800x/$1,200x). Accordingly, DC's FDDEI for the tax year is $106x ($230x gross FDDEI minus $124x of R&E ($54x + $70x) allocated and apportioned to gross FDDEI).

(e) *Domestic corporate partners*—(1) *In general*. A domestic corporation's DEI and FDDEI for a taxable year are determined by taking into account the corporation's share of gross DEI, gross FDDEI, and deductions of any partnership (whether domestic or foreign) in which the corporation is a direct or indirect partner. For purposes of the preceding sentence, a domestic corporation's share of each such item of a partnership is determined in accordance with the corporation's distributive share of the underlying items of income, gain, deduction, and loss of the partnership that comprise such amounts. See §1.250(b)–2(g) for rules on calculating the increase to a domestic corporation's QBAI by the corporation's share of partnership QBAI.

(2) *Reporting requirement for partnership with domestic corporate partners*. A partnership that has one or more direct partners that are domestic corporations and that is required to file a return under section 6031 must furnish to each such partner on or with such partner's Schedule K–1 (Form 1065 or any successor form) by the due date (including extensions) for furnishing Schedule K–1 the partner's share of the partnership's gross DEI, gross FDDEI, deductions that are properly allocable to the partnership's gross DEI and gross FDDEI, and partnership QBAI (as determined under §1.250(b)–2(g)) for each taxable year in which the partnership has gross DEI, gross FDDEI, deductions that are properly allocable to the partnership's gross DEI or gross FDDEI, or partnership specified tangible property (as defined in §1.250(b)–2(g)(5)). In the case of tiered partnerships where one or more partners of an upper-tier partnership are domestic corporations, a lower-tier partnership must report the amount specified in this paragraph (e)(2) to the upper-tier partnership to allow reporting of such information to any partner that is a domestic corporation. To the extent that a partnership cannot determine the information described in the first sentence of this paragraph (e)(2), the partnership must instead furnish to

each partner its share of the partnership's attributes that a partner needs to determine the partner's gross DEI, gross FDDEI, deductions that are properly allocable to the partner's gross DEI and gross FDDEI, and the partner's adjusted bases in partnership specified tangible property.

(3) *Examples.* The following examples illustrate the application of this paragraph (e).

(i) *Assumed facts.* The following facts are assumed for purposes of the examples—

(A) DC, a domestic corporation, is a partner in PRS, a partnership.

(B) FP and FP2 are foreign persons.

(C) FC is a foreign corporation.

(D) The allocations under PRS's partnership agreement satisfy the requirements of section 704.

(E) No partner of PRS is a related party of DC.

(F) DC, PRS, and FC all use the calendar year as their taxable year.

(G) PRS has no items of income, loss, or deduction for its taxable year, except the items of income described.

(ii) *Examples—*

(A) *Example 1: Sale by partnership to foreign person—*(*1*) *Facts.* Under the terms of the partnership agreement, DC is allocated 50 percent of all income, gain, loss, and deductions of PRS. For the taxable year, PRS recognizes $20x of gross income on the sale of general property (as defined in §1.250(b)–3(b)(10)) to FP, a foreign person (as determined under §1.250(b)–4(c)), for a foreign use (as determined under §1.250(b)–4(d)). The gross income recognized on the sale of property is not described in section 250(b)(3)(A)(I) through (VI) or paragraphs (c)(15)(i) through (vi) of this section.

(*2*) *Analysis.* PRS's sale of property to FP is a FDDEI sale as described in §1.250(b)–4(b). Therefore, the gross income derived from the sale ($20x) is included in PRS's gross DEI and gross FDDEI, and DC's share of PRS's gross DEI and gross FDDEI ($10x) is included in DC's gross DEI and gross FDDEI for the taxable year.

(B) *Example 2: Sale by partnership to foreign person attributable to foreign branch—*(*1*) *Facts.* The facts are the same as in paragraph (e)(3)(ii)(A)(*1*) of this section (the facts in *Example 1*), except the income from the sale of property to FP is attributable to a foreign branch of PRS.

(*2*) *Analysis.* PRS's sale of property to FP is excluded from PRS's gross DEI under section 250(b)(3)(A)(VI) and paragraph (c)(15)(vi) of this section. Accordingly, DC's share of PRS's gross income of $10x from the sale is not included in DC's gross DEI or gross FDDEI for the taxable year.

(C) *Example 3: Partnership with a loss in gross FDDEI—*(*1*) *Facts.* The facts are the same as in paragraph (e)(3)(ii)(A)(*1*) of this section (the facts in *Example 1*), except that in the same taxable year, PRS also sells property to FP2, a foreign person (as determined under §1.250(b)–4(c)), for a foreign use (as determined under §1.250(b)–4(d)). After taking into account both sales, PRS has a gross loss of $30x.

(*2*) *Analysis.* Both the sale of property to FP and the sale of property to FP2 are FDDEI sales because each sale is described in §1.250(b)–4(b). DC's share of PRS's gross loss ($15x) from the sales is included in DC's gross DEI and gross FDDEI.

(D) *Example 4: Sale by partnership to foreign related party of the partnership—*(*1*) *Facts.* Under the terms of the partnership agreement, DC has 25 percent of the capital and profits interest in the partnership and is allocated 25 percent of all income, gain, loss, and deductions of PRS. PRS owns 100 percent of the single class of stock of FC. In the taxable year, PRS has $20x of gain on the sale of general property (as defined in §1.250(b)–3(b)(10)) to FC, and FC makes a physical and material change to the property within the meaning of §1.250(b)–4(d)(1)(iii)(B) outside the United States before selling the property to customers in the United States.

(*2*) *Analysis.* The sale of property by PRS to FC is described in §1.250(b)–4(b) without regard to the application of §1.250(b)–6, since the sale is to a foreign person (as determined under §1.250(b)–4(c)) for a foreign use (as determined under §1.250(b)–4(d)). However, FC is a foreign related party of PRS within the meaning of section 250(b)(5)(D) and §1.250(b)–3(b)(6), because FC and PRS are members of a modified affiliated group within the meaning of paragraph (c)(17) of this section. Therefore, the sale by PRS to FC is a related party sale within the meaning of §1.250(b)–6(b)(1). Under section 250(b)(5)(C)(i) and §1.250(b)–6(c), because FC did not sell the property, or use the property in connection with other property sold or the provision of a service, to a foreign unrelated party before the property was subject to a domestic use, the sale by PRS to FC is not a FDDEI sale. See §1.250(b)–6(c)(1). Accordingly, the gain from the sale ($20x) is included in PRS's gross DEI but not its gross FDDEI, and DC's share of PRS's gain ($5x) is included in DC's gross DEI but not gross FDDEI. This is the result notwithstanding that FC is not a related party of DC because FC and DC are not members of a modified affiliated group within the meaning of paragraph (c)(17) of this section.

(f) *Determination of FDII for consolidated groups.* A member of a consolidated group (as defined in §1.1502–1(h)) determines its FDII under the rules provided in §1.1502–50.

(g) *Determination of FDII for tax-exempt corporations.* The FDII of a corporation that is subject to the unrelated business income tax under section 511 is determined only by reference to that corporation's items of income, gain, deduction, or loss, and adjusted bases in property, that are taken into account in computing the corporation's unrelated business taxable income (as defined in section 512). For example, if a corporation that is subject to the unrelated business income tax under section 511 has tangible property used in the production of both unrelated business income and gross income that is not unrelated business income, only the portion of the basis of such property taken into account in computing the corporation's unrelated business taxable income is taken into account in determining the corporation's QBAI. Similarly, if a corporation that is subject to the unrelated business income tax under section 511 has tangible property that is used in both the production of gross DEI and the production of gross income that is not gross DEI, only the corporation's unrelated business income is taken into account in determining the corporation's dual use ratio with respect to such property under §1.250(b)–2(d)(3).

[T.D. 9901, 85 FR 43080, July 15, 2020, as amended by T.D. 9959, 87 FR 324, Jan. 4, 2022]

§ 1.250(b)–2 Qualified business asset investment (QBAI).

(a) *Scope.* This section provides general rules for determining the qualified business asset investment of a domestic corporation for purposes of determining its deemed tangible income return under §1.250(b)–1(c)(4). Paragraph (b) of this section defines qualified business asset investment (QBAI). Paragraph (c) of this section defines tangible property and specified tangible property. Paragraph (d) of this section provides rules for determining the portion of property that is specified tangible property when the property is used in the production of both gross DEI and gross income that is not gross DEI. Paragraph (e) of this section provides rules for determining the adjusted basis of specified tangible property. Paragraph (f) of this section provides rules for determining QBAI of a domestic corporation with a short taxable year. Paragraph (g) of this section provides rules for increasing the QBAI of a domestic corporation by reason of property owned through a partnership. Paragraph (h) of this section provides an anti-avoidance rule that disregards certain transfers when determining the QBAI of a domestic corporation.

(b) *Definition of qualified business asset investment.* The term *qualified business asset investment (QBAI)* means the average of a domestic corporation's aggregate adjusted bases as of the close of each quarter of the domestic corporation's taxable year in specified tangible property that is used in a trade or business of the domestic corporation and is of a type with respect to which a deduction is allowable under section 167. In the case of partially depreciable property, only the depreciable portion of the property is of a type with respect to which a deduction is allowable under section 167.

(c) *Specified tangible property*—(1) *In general.* The term *specified tangible property* means, with respect to a domestic corporation for a taxable year, tangible property of the domestic corporation used in the production of gross DEI for the taxable year. For purposes of the preceding sentence, tangible property of a domestic corporation is used in the production of gross DEI for a taxable year if some or all of the depreciation or cost recovery allowance with respect to the tangible property is either allocated and apportioned to the gross DEI of the domestic corporation for the taxable year under § 1.250(b)–1(d)(2) or capitalized to inventory or other property held for sale, some or all of the gross income or loss from the sale of which is taken into account in determining DEI of the domestic corporation for the taxable year.

(2) *Tangible property*. The term *tangible property* means property for which the depreciation deduction provided by section 167(a) is eligible to be determined under section 168 without regard to section 168(f)(1), (2), or (5), section 168(k)(2)(A)(i)(II), (IV), or (V), and the date placed in service.

(d) *Dual use property*—(1) *In general*. The amount of the adjusted basis in dual use property of a domestic corporation for a taxable year that is treated as adjusted basis in specified tangible property for the taxable year is the average of the domestic corporation's adjusted basis in the property multiplied by the dual use ratio with respect to the property for the taxable year.

(2) *Definition of dual use property*. The term *dual use property* means, with respect to a domestic corporation and a taxable year, specified tangible property of the domestic corporation that is used in both the production of gross DEI and the production of gross income that is not gross DEI for the taxable year. For purposes of the preceding sentence, specified tangible property of a domestic corporation is used in the production of gross DEI and the production of gross income that is not gross DEI for a taxable year if less than all of the depreciation or cost recovery allowance with respect to the property is either allocated and apportioned to the gross DEI of the domestic corporation for the taxable year under § 1.250(b)–1(d)(2) or capitalized to inventory or other property held for sale, the gross income or loss from the sale of which is taken into account in determining the DEI of the domestic corporation for the taxable year.

(3) *Dual use ratio*. The term *dual use ratio* means, with respect to dual use property, a domestic corporation, and a taxable year, a ratio (expressed as a percentage) calculated as—

(i) The sum of—

(A) The depreciation deduction or cost recovery allowance with respect to the property that is allocated and apportioned to the gross DEI of the domestic corporation for the taxable year under § 1.250(b)–1(d)(2); and

(B) The depreciation or cost recovery allowance with respect to the property that is capitalized to inventory or other property held for sale, the gross income or loss from the sale of which is taken into account in determining the DEI of the domestic corporation for the taxable year; divided by

(ii) The sum of—

(A) The total amount of the domestic corporation's depreciation deduction or cost recovery allowance with respect to the property for the taxable year; and

(B) The total amount of the domestic corporation's depreciation or cost recovery allowance with respect to the property capitalized to inventory or other property held for sale, the gross income or loss from the sale of which is taken into account in determining the income or loss of the domestic corporation for the taxable year.

(4) *Example*. The following example illustrates the application of this paragraph (d).

(i) *Facts*. DC, a domestic corporation, owns a machine that produces both gross DEI and income that is not gross DEI. The average adjusted basis of the machine for the taxable year in the hands of DC is $4,000x. The depreciation with respect to the machine for the taxable year is $400x, $320x of which is capitalized to inventory of Product A, gross income or loss from the sale of which is taken into account in determining DC's gross DEI for the taxable year, and $80x of which is capitalized to inventory of Product B, gross income or loss from the sale of which is not taken into account in determining DC's gross DEI for the taxable year. DC also owns an office building for its administrative functions with an average adjusted basis for the taxable year of

$10,000x. DC does not capitalize depreciation with respect to the office building to inventory or other property held for sale. DC's depreciation deduction with respect to the office building is $1,000x for the taxable year, $750x of which is allocated and apportioned to gross DEI under §1.250(b)–1(d)(2), and $250x of which is allocated and apportioned to income other than gross DEI under §1.250(b)–1(d)(2).

(ii) *Analysis*—(A) *Dual use property*. The machine and office building are property for which the depreciation deduction provided by section 167(a) is eligible to be determined under section 168 (without regard to section 168(f)(1), (2), or (5), section 168(k)(2)(A)(i)(II), (IV), or (V), and the date placed in service). Therefore, under paragraph (c)(2) of this section, the machine and office building are tangible property. Furthermore, because the machine and office building are used in the production of gross DEI for the taxable year within the meaning of paragraph (c)(1) of this section, the machine and office building are specified tangible property. Finally, because the machine and office building are used in both the production of gross DEI and the production of gross income that is not gross DEI for the taxable year within the meaning of paragraph (d)(2) of this section, the machine and office building are dual use property. Therefore, under paragraph (d)(1) of this section, the amount of DC's adjusted basis in the machine and office building that is treated as adjusted basis in specified tangible property for the taxable year is determined by multiplying DC's adjusted basis in the machine and office building by DC's dual use ratio with respect to the machine and office building determined under paragraph (d)(3) of this section.

(B) *Depreciation not capitalized to inventory*. Because none of the depreciation with respect to the office building is capitalized to inventory or other property held for sale, DC's dual use ratio with respect to the office building is determined entirely by reference to the depreciation deduction with respect to the office building. Therefore, under paragraph (d)(3) of this section, DC's dual use ratio with respect to the office building for Year 1 is 75 percent, which is DC's depreciation deduction with respect to the office building that is allocated and apportioned to gross DEI under §1.250(b)–1(d)(2) for Year 1 ($750x), divided by the total amount of DC's depreciation deduction with respect to the office building for Year 1 ($1000x). Accordingly, under paragraph (d)(1) of this section, $7,500x ($10,000x × 0.75) of DC's average adjusted bases in the office building is taken into account under paragraph (b) of this section in determining DC's QBAI for the taxable year.

(C) *Depreciation capitalized to inventory*. Because all of the depreciation with respect to the machine is capitalized to inventory, DC's dual use ratio with respect to the machine is determined entirely by reference to the depreciation with respect to the machine that is capitalized to inventory and included in cost of goods sold. Therefore, under paragraph (d)(3) of this section, DC's dual use ratio with respect to the machine for the taxable year is 80 percent, which is DC's depreciation with respect to the machine that is capitalized to inventory of Product A, the gross income or loss from the sale of which is taken into account in determining DC's DEI for the taxable year ($320x), divided by DC's depreciation with respect to the machine that is capitalized to inventory, the gross income or loss from the sale of which is taken into account in determining DC's income for Year 1 ($400x). Accordingly, under paragraph (d)(1) of this section, $3,200x ($4,000x × 0.8) of DC's average adjusted basis in the machine is taken into account under paragraph (b) of this section in determining DC's QBAI for the taxable year.

(e) *Determination of adjusted basis of specified tangible property*—(1) *In general*. The adjusted basis in specified tangible property for purposes of this section is determined by using the cost capitalization methods of accounting used by the domestic corporation for purposes of determining the gross income and deductions of the domestic corporation and the alternative depreciation system under section 168(g), and by allocating the depreciation deduction with respect to such property for the domestic corporation's taxable year ratably to each day during the period in the taxable year to which such depreciation relates. For purposes of the preceding sentence, the period in the taxable year to which such depreciation relates is determined without regard to the applicable convention under section 168(d).

(2) *Effect of change in law.* The adjusted basis in specified tangible property is determined without regard to any provision of law enacted after December 22, 2017, unless such later enacted law specifically and directly amends the definition of QBAI under section 250 or section 951A. For purposes of applying section 250(b)(2)(B) and this paragraph (e), the technical amendment to section 168(g) (to provide a recovery period of 20 years for qualified improvement property for purposes of the alternative depreciation system) enacted in section 2307(a) of the Coronavirus Aid, Relief, and Economic Security Act, Public Law 116–136 (2020) is treated as enacted on December 22, 2017.

(3) *Specified tangible property placed in service before enactment of section 250.* The adjusted basis in specified tangible property placed in service before December 22, 2017, is determined using the alternative depreciation system under section 168(g), as if this system had applied from the date that the property was placed in service.

(f) *Special rules for short taxable years*—(1) *In general.* In the case of a domestic corporation that has a taxable year that is less than twelve months (a *short taxable year*), the rules for determining the QBAI of the domestic corporation under this section are modified as provided in paragraphs (f)(2) and (3) of this section with respect to the taxable year.

(2) *Determination of when the quarter closes.* For purposes of determining when the quarter closes, in determining the QBAI of a domestic corporation for a short taxable year, the quarters of the domestic corporation for purposes of this section are the full quarters beginning and ending within the short taxable year (if any), determining quarter length as if the domestic corporation did not have a short taxable year, plus one or more short quarters (if any).

(3) *Reduction of qualified business asset investment.* The QBAI of a domestic corporation for a short taxable year is the sum of—

(i) The sum of the domestic corporation's aggregate adjusted bases in specified tangible property as of the close of each full quarter (if any) in the domestic corporation's taxable year divided by four; plus

(ii) The domestic corporation's aggregate adjusted bases in specified tangible property as of the close of each short quarter (if any) in the domestic corporation's taxable year multiplied by the sum of the number of days in each short quarter divided by 365.

(4) *Example.* The following example illustrates the application of this paragraph (f).

(i) *Facts.* A, an individual, owns all of the stock of DC, a domestic corporation. A owns DC from the beginning of the taxable year. On July 15 of the taxable year, A sells DC to USP, a domestic corporation that is unrelated to A. DC becomes a member of the consolidated group of which USP is the common parent and as a result, under §1.1502–76(b)(2)(ii), DC's taxable year is treated as ending on July 15. USP and DC both use the calendar year as their taxable year. DC's aggregate adjusted bases in specified tangible property for the taxable year are $250x as of March 31, $300x as of June 30, $275x as of July 15, $500x as of September 30, and $450x as of December 31.

(ii) *Analysis*—(A) *Determination of short taxable years and quarters.* DC has two short taxable years during the year. The first short taxable year is from January 1 to July 15, with two full quarters (January 1 through March 31 and April 1 through June 30) and one short quarter (July 1 through July 15). The second taxable year is from July 16 to December 31, with one short quarter (July 16 through September 30) and one full quarter (October 1 through December 31).

(B) *Calculation of qualified business asset investment for the first short taxable year.* Under paragraph (f)(2) of this section, for the first short taxable year, DC has three quarter closes (March 31, June 30, and July 15). Under paragraph (f)(3) of this section, the QBAI of DC for the first short taxable year is $148.80x, the sum of $137.50x (($250x + $300x)/4) attributable to the two full quarters and $11.30x ($275x × 15/365) attributable to the short quarter.

(C) *Calculation of qualified business asset investment for the second short taxable year.* Under paragraph (f)(2) of this section, for the second short taxable year, DC has two quarter closes (September 30 and December 31). Under paragraph (f)(3) of this section, the QBAI of DC for the second short taxable year is $217.98x, the sum of $112.50x ($450x/4) attributable to the one full quarter and $105.48x ($500x × 77/365) attributable to the short quarter.

(g) *Partnership property*—(1) *In general.* If a domestic corporation holds an interest in one or more partnerships during a taxable year (including indirectly through one or more partnerships that are partners in a lower-tier partnership), the QBAI of the domestic corporation for the taxable year (determined without regard to this paragraph (g)(1)) is increased by the sum of the domestic corporation's partnership QBAI with respect to each partnership for the taxable year.

(2) *Determination of partnership QBAI.* For purposes of paragraph (g)(1) of this section, the term *partnership QBAI* means, with respect to a partnership, a domestic corporation, and a taxable year, the sum of the domestic corporation's partner adjusted basis in each partnership specified tangible property of the partnership for each partnership taxable year that ends with or within the taxable year. If a partnership taxable year is less than twelve months, the principles of paragraph (f) of this section apply in determining a domestic corporation's partnership QBAI with respect to the partnership.

(3) *Determination of partner adjusted basis*—(i) *In general.* For purposes of paragraph (g)(2) of this section, the term *partner adjusted basis* means the amount described in paragraph (g)(3)(ii) of this section with respect to sole use partnership property or paragraph (g)(3)(iii) of this section with respect to dual use partnership property. The principles of section 706(d) apply to this determination.

(ii) *Sole use partnership property*—(A) *In general.* The amount described in this paragraph (g)(3)(ii), with respect to sole use partnership property, a partnership taxable year, and a domestic corporation, is the sum of the domestic corporation's proportionate share of the partnership adjusted basis in the sole use partnership property for the partnership taxable year and the domestic corporation's partner-specific QBAI basis in the sole use partnership property for the partnership taxable year.

(B) *Definition of sole use partnership property.* The term *sole use partnership property* means, with respect to a partnership, a partnership taxable year, and a domestic corporation, partnership specified tangible property of the partnership that is used in the production of only gross DEI of the domestic corporation for the taxable year in which or with which the partnership taxable year ends. For purposes of the preceding sentence, partnership specified tangible property of a partnership is used in the production of only gross DEI for a taxable year if all the domestic corporation's distributive share of the partnership's depreciation deduction or cost recovery allowance with respect to the property (if any) for the partnership taxable year that ends with or within the taxable year is allocated and apportioned to the domestic corporation's gross DEI for the taxable year under §1.250(b)–1(d)(2) and, if any of the partnership's depreciation or cost recovery allowance with respect to the property is capitalized to inventory or other property held for sale, all the domestic corporation's distributive share of the partnership's gross income or loss from the sale of such inventory or other property for the partnership taxable year that ends with or within the taxable year is taken into account in determining the DEI of the domestic corporation for the taxable year.

(iii) *Dual use partnership property*—(A) *In general.* The amount described in this paragraph (g)(3)(iii), with respect to dual use partnership property, a partnership taxable year, and a domestic corporation, is the sum of the domestic corporation's proportionate share of the partnership adjusted basis in the property for the partnership taxable year and the domestic corporation's partner-specific QBAI basis in the property for the partnership taxable year, multiplied by the domestic corporation's dual use ratio with respect to the property for the partnership taxable year determined under the principles of paragraph (d)(3) of this section, except that the ratio described in paragraph (d)(3) of this section is determined by reference to the domestic corporation's distributive share of the amounts described in paragraph (d)(3) of this section.

(B) *Definition of dual use partnership property*. The term *dual use partnership property* means partnership specified tangible property other than sole use partnership property.

(4) *Determination of proportionate share of the partnership's adjusted basis in partnership specified tangible property*—(i) *In general*. For purposes of paragraph (g)(3) of this section, the domestic corporation's proportionate share of the partnership adjusted basis in partnership specified tangible property for a partnership taxable year is the partnership adjusted basis in the property multiplied by the domestic corporation's proportionate share ratio with respect to the property for the partnership taxable year. Solely for purposes of determining the proportionate share ratio under paragraph (g)(4)(ii) of this section, the partnership's calculation of, and a partner's distributive share of, any income, loss, depreciation, or cost recovery allowance is determined under section 704(b).

(ii) *Proportionate share ratio*. The term *proportionate share ratio* means, with respect to a partnership, a partnership taxable year, and a domestic corporation, the ratio (expressed as a percentage) calculated as—

(A) The sum of—

(*1*) The domestic corporation's distributive share of the partnership's depreciation deduction or cost recovery allowance with respect to the property for the partnership taxable year; and

(*2*) The amount of the partnership's depreciation or cost recovery allowance with respect to the property that is capitalized to inventory or other property held for sale, the gross income or loss from the sale of which is taken into account in determining the domestic corporation's distributive share of the partnership's income or loss for the partnership taxable year; divided by

(B) The sum of—

(*1*) The total amount of the partnership's depreciation deduction or cost recovery allowance with respect to the property for the partnership taxable year; and

(*2*) The total amount of the partnership's depreciation or cost recovery allowance with respect to the property capitalized to inventory or other property held for sale, the gross income or loss from the sale of which is taken into account in determining the partnership's income or loss for the partnership taxable year.

(5) *Definition of partnership specified tangible property*. The term *partnership specified tangible property* means, with respect to a domestic corporation, tangible property (as defined in paragraph (c)(2) of this section) of a partnership that is—

(i) Used in the trade or business of the partnership;

(ii) Of a type with respect to which a deduction is allowable under section 167; and

(iii) Used in the production of gross income included in the domestic corporation's gross DEI.

(6) *Determination of partnership adjusted basis*. For purposes of this paragraph (g), the term *partnership adjusted basis* means, with respect to a partnership, partnership specified tangible property, and a partnership taxable year, the amount equal to the average of the partnership's adjusted basis in the partnership specified tangible property as of the close of each quarter in the partnership taxable year determined without regard to any adjustments under section 734(b) except for adjustments under section 734(b)(1)(B) or section 734(b)(2)(B) that are attributable to distributions of tangible property (as defined in paragraph (c)(2) of this section) and for adjustments under section 734(b)(1)(A) or 734(b)(2)(A). The principles of paragraphs (e) and (h) of this section apply for purposes of determining a partnership's adjusted basis in partnership specified tangible property and the proportionate share of the partnership's adjusted basis in partnership specified tangible property.

(7) *Determination of partner-specific QBAI basis.* For purposes of this paragraph (g), the term *partner-specific QBAI basis* means, with respect to a domestic corporation, a partnership, and partnership specified tangible property, the amount that is equal to the average of the basis adjustment under section 743(b) that is allocated to the partnership specified tangible property of the partnership with respect to the domestic corporation as of the close of each quarter in the partnership taxable year. For this purpose, a negative basis adjustment under section 743(b) is expressed as a negative number. The principles of paragraphs (e) and (h) of this section apply for purposes of determining the partner-specific QBAI basis with respect to partnership specified tangible property.

(8) *Examples.* The following examples illustrate the rules of this paragraph (g).

(i) *Assumed facts.* Except as otherwise stated, the following facts are assumed for purposes of the examples:

(A) DC, DC1, DC2, and DC3 are domestic corporations.

(B) PRS is a partnership and its allocations satisfy the requirements of section 704.

(C) All properties are partnership specified tangible property.

(D) All persons use the calendar year as their taxable year.

(E) There is no partner-specific QBAI basis with respect to any property.

(ii) *Example 1: Sole use partnership property*—(A) *Facts.* DC is a partner in PRS. PRS owns two properties, Asset A and Asset B. The average of PRS's adjusted basis as of the close of each quarter of PRS's taxable year in Asset A is $100x and in Asset B is $500x. In Year 1, PRS's section 704(b) depreciation deduction is $10x with respect to Asset A and $5x with respect to Asset B, and DC's section 704(b) distributive share of the depreciation deduction is $8x with respect to Asset A and $1x with respect to Asset B. None of the depreciation with respect to Asset A or Asset B is capitalized to inventory or other property held for sale. DC's entire distributive share of the depreciation deduction with respect to Asset A and Asset B is allocated and apportioned to DC's gross DEI for Year 1 under § 1.250(b)–1(d)(2).

(B) *Analysis*—(*1*) *Sole use partnership property.* Because all of DC's distributive share of the depreciation deduction with respect to Asset A and B is allocated and apportioned to gross DEI for Year 1, Asset A and Asset B are sole use partnership property within the meaning of paragraph (g)(3)(ii)(B) of this section. Therefore, under paragraph (g)(3)(ii)(A) of this section, DC's partner adjusted basis in Asset A and Asset B is equal to the sum of DC's proportionate share of PRS's partnership adjusted basis in Asset A and Asset B for Year 1 and DC's partner-specific QBAI basis in Asset A and Asset B for Year 1, respectively.

(*2*) *Proportionate share.* Under paragraph (g)(4)(i) of this section, DC's proportionate share of PRS's partnership adjusted basis in Asset A and Asset B is PRS's partnership adjusted basis in Asset A and Asset B for Year 1, multiplied by DC's proportionate share ratio with respect to Asset A and Asset B for Year 1, respectively. Because none of the depreciation with respect to Asset A or Asset B is capitalized to inventory or other property held for sale, DC's proportionate share ratio with respect to Asset A and Asset B is determined entirely by reference to the depreciation deduction with respect to Asset A and Asset B. Therefore, DC's proportionate share ratio with respect to Asset A for Year 1 is 80 percent, which is the ratio of DC's section 704(b) distributive share of PRS's section 704(b) depreciation deduction with respect to Asset A for Year 1 ($8x), divided by the total amount of PRS's section 704(b) depreciation deduction with respect to Asset A for Year 1 ($10x). DC's proportionate share ratio with respect to Asset B for Year 1 is 20 percent, which is the ratio of DC's section 704(b) distributive share of PRS's section 704(b) depreciation deduction with respect to Asset B for Year 1 ($1x), divided by the total amount of PRS's section 704(b) depreciation deduction with respect to Asset B for Year 1 ($5x). Accordingly, under paragraph (g)(4)(i) of this section, DC's proportionate share of PRS's partnership adjusted basis in Asset A is

$80x ($100x × 0.8), and DC's proportionate share of PRS's partnership adjusted basis in Asset B is $100x ($500x × 0.2).

(*3*) *Partner adjusted basis.* Because DC has no partner-specific QBAI basis with respect to Asset A and Asset B, DC's partner adjusted basis in Asset A and Asset B is determined entirely by reference to its proportionate share of PRS's partnership adjusted basis in Asset A and Asset B. Therefore, under paragraph (g)(3)(ii)(A) of this section, DC's partner adjusted basis in Asset A is $80x, DC's proportionate share of PRS's partnership adjusted basis in Asset A, and DC's partner adjusted basis in Asset B is $100x, DC's proportionate share of PRS's partnership adjusted basis in Asset B.

(*4*) *Partnership QBAI.* Under paragraph (g)(2) of this section, DC's partnership QBAI with respect to PRS is $180x, the sum of DC's partner adjusted basis in Asset A ($80x) and DC's partner adjusted basis in Asset B ($100x). Accordingly, under paragraph (g)(1) of this section, DC increases its QBAI for Year 1 by $180x.

(iii) *Example 2: Dual use partnership property*—(A) *Facts.* DC owns a 50 percent interest in PRS. All section 704(b) and tax items are identical and are allocated equally between DC and its other partner. PRS owns three properties, Asset C, Asset D, and Asset E. PRS sells two products, Product A and Product B. All of DC's distributive share of the gross income or loss from the sale of Product A is taken into account in determining DC's DEI, and none of DC's distributive share of the gross income or loss from the sale of Product B is taken into account in determining DC's DEI.

(*1*) *Asset C.* The average of PRS's adjusted basis as of the close of each quarter of PRS's taxable year in Asset C is $100x. In Year 1, PRS's depreciation is $10x with respect to Asset C, none of which is capitalized to inventory or other property held for sale. DC's distributive share of the depreciation deduction with respect to Asset C is $5x ($10x × 0.5), $3x of which is allocated and apportioned to DC's gross DEI under §1.250(b)–1(d)(2).

(*2*) *Asset D.* The average of PRS's adjusted basis as of the close of each quarter of PRS's taxable year in Asset D is $500x. In Year 1, PRS's depreciation is $50x with respect to Asset D, $10x of which is capitalized to inventory of Product A and $40x is capitalized to inventory of Product B. None of the $10x depreciation with respect to Asset D capitalized to inventory of Product A is capitalized to ending inventory. However, of the $40x capitalized to inventory of Product B, $10x is capitalized to ending inventory. Therefore, the amount of depreciation with respect to Asset D capitalized to inventory of Product A that is taken into account in determining DC's distributive share of the income or loss of PRS for Year 1 is $5x ($10x × 0.5), and the amount of depreciation with respect to Asset D capitalized to inventory of Product B that is taken into account in determining DC's distributive share of the income or loss of PRS for Year 1 is $15x ($30x × 0.5).

(*3*) *Asset E.* The average of PRS's adjusted basis as of the close of each quarter of PRS's taxable year in Asset E is $600x. In Year 1, PRS's depreciation is $60x with respect to Asset E. Of the $60x depreciation with respect to Asset E, $20x is allowed as a deduction, $24x is capitalized to inventory of Product A, and $16x is capitalized to inventory of Product B. DC's distributive share of the depreciation deduction with respect to Asset E is $10x ($20x × 0.5), $8x of which is allocated and apportioned to DC's gross DEI under §1.250(b)–1(d)(2). None of the $24x depreciation with respect to Asset E capitalized to inventory of Product A is capitalized to ending inventory. However, of the $16x depreciation with respect to Asset E capitalized to inventory of Product B, $10x is capitalized to ending inventory. Therefore, the amount of depreciation with respect to Asset E capitalized to inventory of Product A that is taken into account in determining DC's distributive share of the income or loss of PRS for Year 1 is $12x ($24x × 0.5), and the amount of depreciation with respect to Asset E capitalized to inventory of Product B that is taken into account in determining DC's distributive share of the income or loss of PRS for Year 1 is $3x ($6x × 0.5).

(B) *Analysis*. Because Asset C, Asset D, and Asset E are not used in the production of only gross DEI in Year 1 within the meaning of paragraph (g)(3)(ii)(B) of this section, Asset C, Asset D, and Asset E are dual use partnership property within the meaning of paragraph (g)(3)(iii)(B) of this section. Therefore, under paragraph (g)(3)(iii)(A) of this section, DC's partner adjusted basis in Asset C, Asset D, and Asset E is the sum of DC's proportionate share of PRS's partnership adjusted basis in Asset C, Asset D, and Asset E, respectively, for Year 1, and DC's partner-specific QBAI basis in Asset C, Asset D, and Asset E, respectively, for Year 1, multiplied by DC's dual use ratio with respect to Asset C, Asset D, and Asset E, respectively, for Year 1, determined under the principles of paragraph (d)(3) of this section, except that the ratio described in paragraph (d)(3) of this section is determined by reference to DC's distributive share of the amounts described in paragraph (d)(3) of this section.

(*1*) *Asset C*—(*i*) *Proportionate share*. Under paragraph (g)(4)(i) of this section, DC's proportionate share of PRS's partnership adjusted basis in Asset C is PRS's partnership adjusted basis in Asset C for Year 1, multiplied by DC's proportionate share ratio with respect to Asset C for Year 1. Because none of the depreciation with respect to Asset C is capitalized to inventory or other property held for sale, DC's proportionate share ratio with respect to Asset C is determined entirely by reference to the depreciation deduction with respect to Asset C. Therefore, DC's proportionate share ratio with respect to Asset C is 50 percent, which is the ratio calculated as the amount of DC's section 704(b) distributive share of PRS's section 704(b) depreciation deduction with respect to Asset C for Year 1 ($5x), divided by the total amount of PRS's section 704(b) depreciation deduction with respect to Asset C for Year 1 ($10x). Accordingly, under paragraph (g)(4)(i) of this section, DC's proportionate share of PRS's partnership adjusted basis in Asset C is $50x ($100x × 0.5).

(*ii*) *Dual use ratio*. Because none of the depreciation with respect to Asset C is capitalized to inventory or other property held for sale, DC's dual use ratio with respect to Asset C is determined entirely by reference to the depreciation deduction with respect to Asset C. Therefore, DC's dual use ratio with respect to Asset C is 60 percent, which is the ratio calculated as the amount of DC's distributive share of PRS's depreciation deduction with respect to Asset C that is allocated and apportioned to DC's gross DEI under §1.250(b)–1(d)(2) for Year 1 ($3x), divided by the total amount of DC's distributive share of PRS's depreciation deduction with respect to Asset C for Year 1 ($5x).

(*iii*) *Partner adjusted basis*. Because DC has no partner-specific QBAI basis with respect to Asset C, DC's partner adjusted basis in Asset C is determined entirely by reference to DC's proportionate share of PRS's partnership adjusted basis in Asset C, multiplied by DC's dual use ratio with respect to Asset C. Under paragraph (g)(3)(iii)(A) of this section, DC's partner adjusted basis in Asset C is $30x, DC's proportionate share of PRS's partnership adjusted basis in Asset C for Year 1 ($50x), multiplied by DC's dual use ratio with respect to Asset C for Year 1 (60 percent).

(*2*) *Asset D*—(*i*) *Proportionate share*. Under paragraph (g)(4)(i) of this section, DC's proportionate share of PRS's partnership adjusted basis in Asset D is PRS's partnership adjusted basis in Asset D for Year 1, multiplied by DC's proportionate share ratio with respect to Asset D for Year 1. Because all of the depreciation with respect to Asset D is capitalized to inventory, DC's proportionate share ratio with respect to Asset D is determined entirely by reference to the depreciation with respect to Asset D that is capitalized to inventory and included in cost of goods sold. Therefore, DC's proportionate share ratio with respect to Asset D is 50 percent, which is the ratio calculated as the amount of PRS's section 704(b) depreciation with respect to Asset D capitalized to Product A and Product B that is taken into account in determining DC's section 704(b) distributive share of PRS's income or loss for Year 1 ($20x), divided by the total amount of PRS's section 704(b) depreciation with respect to Asset D capitalized to Product A and Product B that is taken into account in determining PRS's section 704(b) income or loss for Year 1 ($40x). Accordingly, under paragraph (g)(4)(i) of this section, DC's proportionate share of PRS's partnership adjusted basis in Asset D is $250x ($500x × 0.5).

(*ii*) *Dual use ratio*. Because all of the depreciation with respect to Asset D is capitalized to inventory, DC's dual use ratio with respect to Asset D is determined entirely by reference to the depreciation with respect to Asset D that is capitalized to inventory and included in cost of goods sold. Therefore, DC's dual use ratio with respect to Asset D is 25 percent, which is the ratio calculated as the amount of depreciation with respect to Asset D capitalized to inventory of Product A and Product B that is taken into account in determining DC's DEI for Year 1 ($5x), divided by the total amount of depreciation with respect to Asset D capitalized to inventory of Product A and Product B that is taken into account in determining DC's income or loss for Year 1 ($20x).

(*iii*) *Partner adjusted basis*. Because DC has no partner-specific QBAI basis with respect to Asset D, DC's partner adjusted basis in Asset D is determined entirely by reference to DC's proportionate share of PRS's partnership adjusted basis in Asset D, multiplied by DC's dual use ratio with respect to Asset D. Under paragraph (g)(3)(iii)(A) of this section, DC's partner adjusted basis in Asset D is $62.50x, DC's proportionate share of PRS's partnership adjusted basis in Asset D for Year 1 ($250x), multiplied by DC's dual use ratio with respect to Asset D for Year 1 (25 percent).

(*3*) *Asset E*—(*i*) *Proportionate share*. Under paragraph (g)(4)(i) of this section, DC's proportionate share of PRS's partnership adjusted basis in Asset E is PRS's partnership adjusted basis in Asset E for Year 1, multiplied by DC's proportionate share ratio with respect to Asset E for Year 1. Because the depreciation with respect to Asset E is partly deducted and partly capitalized to inventory, DC's proportionate share ratio with respect to Asset E is determined by reference to both the depreciation that is deducted and the depreciation that is capitalized to inventory and included in cost of goods sold. Therefore, DC's proportionate share ratio with respect to Asset E is 50 percent, which is the ratio calculated as the sum ($25x) of the amount of DC's section 704(b) distributive share of PRS's section 704(b) depreciation deduction with respect to Asset E for Year 1 ($10x) and the amount of PRS's section 704(b) depreciation with respect to Asset E capitalized to inventory of Product A and Product B that is taken into account in determining DC's section 704(b) distributive share of PRS's income or loss for Year 1 ($15x), divided by the sum ($50x) of the total amount of PRS's section 704(b) depreciation deduction with respect to Asset E for Year 1 ($20x) and the total amount of PRS's section 704(b) depreciation with respect to Asset E capitalized to inventory of Product A and Product B that is taken into account in determining PRS's section 704(b) income or loss for Year 1 ($30x). Accordingly, under paragraph (g)(4)(i) of this section, DC's proportionate share of PRS's partnership adjusted basis in Asset E is $300x ($600x × 0.5).

(*ii*) *Dual use ratio*. Because the depreciation with respect to Asset E is partly deducted and partly capitalized to inventory, DC's dual use ratio with respect to Asset E is determined by reference to the depreciation that is deducted and the depreciation that is capitalized to inventory and included in cost of goods sold. Therefore, DC's dual use ratio with respect to Asset E is 80 percent, which is the ratio calculated as the sum ($20x) of the amount of DC's distributive share of PRS's depreciation deduction with respect to Asset E that is allocated and apportioned to DC's gross DEI under § 1.250(b)–1(d)(2) for Year 1 ($8x) and the amount of depreciation with respect to Asset E capitalized to inventory of Product A and Product B that is taken into account in determining DC's DEI for Year 1 ($12x), divided by the sum ($25x) of the total amount of DC's distributive share of PRS's depreciation deduction with respect to Asset E for Year 1 ($10x) and the total amount of depreciation with respect to Asset E capitalized to inventory of Product A and Product B that is taken into account in determining DC's income or loss for Year 1 ($15x).

(*iii*) *Partner adjusted basis.* Because DC has no partner-specific QBAI basis with respect to Asset E, DC's partner adjusted basis in Asset E is determined entirely by reference to DC's proportionate share of PRS's partnership adjusted basis in Asset E, multiplied by DC's dual use ratio with respect to Asset E. Under paragraph (g)(3)(iii)(A) of this section, DC's partner adjusted basis in Asset E is $240x, DC's proportionate share of PRS's partnership adjusted basis in Asset E for Year 1 ($300x), multiplied by DC's dual use ratio with respect to Asset E for Year 1 (80 percent).

(*4*) *Partnership QBAI.* Under paragraph (g)(2) of this section, DC's partnership QBAI with respect to PRS is $332.50x, the sum of DC's partner adjusted basis in Asset C ($30x), DC's partner adjusted basis in Asset D ($62.50x), and DC's partner adjusted basis in Asset E ($240x). Accordingly, under paragraph (g)(1) of this section, DC increases its QBAI for Year 1 by $332.50x.

(iv) *Example 3: Sole use partnership specified tangible property; section 743(b) adjustments*—(A) *Facts.* The facts are the same as in paragraph (g)(8)(ii)(A) of this section (the facts in *Example 1*), except that there is an average of $40x positive adjustment to the adjusted basis in Asset A as of the close of each quarter of PRS's taxable year with respect to DC under section 743(b) and an average of $20x negative adjustment to the adjusted basis in Asset B as of the close of each quarter of PRS's taxable year with respect to DC under section 743(b).

(B) *Analysis.* Under paragraph (g)(3)(ii)(A) of this section, DC's partner adjusted basis in Asset A is $120x, which is the sum of $80x (DC's proportionate share of PRS's partnership adjusted basis in Asset A as illustrated in paragraph (g)(8)(ii)(B)(*2*) of this section (the analysis in *Example 1*)) and $40x (DC's partner-specific QBAI basis in Asset A). Under paragraph (g)(3)(ii)(A) of this section, DC's partner adjusted basis in Asset B is $80x, the sum of $100x (DC's proportionate share of the partnership adjusted basis in the property as illustrated in paragraph (g)(8)(ii)(B)(*2*) of this section (the analysis in *Example 1*)) and (−$20x) (DC's partner-specific QBAI basis in Asset B). Therefore, under paragraph (g)(2) of this section, DC's partnership QBAI with respect to PRS is $200x ($120x + $80x). Accordingly, under paragraph (g)(1) of this section, DC increases its QBAI for Year 1 by $200x.

(v) *Example 4: Sale of partnership interest before close of taxable year*—(A) *Facts.* DC1 owns a 50 percent interest in PRS on January 1 of Year 1. PRS does not have an election under section 754 in effect. On July 1 of Year 1, DC1 sells its entire interest in PRS to DC2. PRS owns Asset G. The average of PRS's adjusted basis as of the close of each quarter of PRS's taxable year in Asset G is $100x. DC1's section 704(b) distributive share of the depreciation deduction with respect to Asset G is 25 percent with respect to PRS's entire year. DC2's section 704(b) distributive share of the depreciation deduction with respect to Asset G is also 25 percent with respect to PRS's entire year. Both DC1's and DC2's entire distributive shares of the depreciation deduction with respect to Asset G are allocated and apportioned under §1.250(b)–1(d)(2) to DC1's and DC2's gross DEI, respectively, for Year 1. PRS's allocations satisfy section 706(d).

(B) *Analysis*—(*1*) *DC1.* Because DC1 owns an interest in PRS during DC1's taxable year and receives a distributive share of partnership items of the partnership under section 706(d), DC1 has partnership QBAI with respect to PRS in the amount determined under paragraph (g)(2) of this section. Under paragraph (g)(3)(i) of this section, DC1's partner adjusted basis in Asset G is $25x, the product of $100x (the partnership's adjusted basis in the property) and 25 percent (DC1's section 704(b) distributive share of depreciation deduction with respect to Asset G). Therefore, DC1's partnership QBAI with respect to PRS is $25x. Accordingly, under paragraph (g)(1) of this section, DC1 increases its QBAI by $25x for Year 1.

(*2*) *DC2.* DC2's partner adjusted basis in Asset G is also $25x, the product of $100x (the partnership's adjusted basis in the property) and 25 percent (DC2's section 704(b) distributive share of depreciation deduction with respect to Asset G). Therefore, DC2's partnership QBAI with respect to PRS is $25x. Accordingly, under paragraph (g)(1) of this section, DC2 increases its QBAI by $25x for Year 1.

(vi) *Example 5: Partnership adjusted basis; distribution of property in liquidation of partnership interest*—(A) *Facts.* DC1, DC2, and DC3 are equal partners in PRS, a partnership. DC1 and DC2 each has an adjusted basis of $100x in its partnership interest. DC3 has an adjusted basis of $50x in its partnership interest. PRS has a section 754 election in effect. PRS owns Asset H with a fair market value of $50x and an adjusted basis of $0, Asset I with a fair market value of $100x and an adjusted basis of $100x, and Asset J with a fair market value of $150x and an adjusted basis of $150x. Asset H and Asset J are tangible property, but Asset I is not tangible property. PRS distributes Asset I to DC3 in liquidation of DC3's interest in PRS. None of DC1, DC2, DC3, or PRS recognizes gain on the distribution. Under section 732(b), DC3's adjusted basis in Asset I is $50x. PRS's adjusted basis in Asset H is increased by $50x to $50x under section 734(b)(1)(B), which is the amount by which PRS's adjusted basis in Asset I immediately before the distribution exceeds DC3's adjusted basis in Asset I.

(B) *Analysis.* Under paragraph (g)(6) of this section, PRS's adjusted basis in Asset H is determined without regard to any adjustments under section 734(b) except for adjustments under section 734(b)(1)(B) or section 734(b)(2)(B) that are attributable to distributions of tangible property and for adjustments under section 734(b)(1)(A) or 734(b)(2)(A). The adjustment to the adjusted basis in Asset H is under section 734(b)(1)(B) and is attributable to the distribution of Asset I, which is not tangible property. Accordingly, for purposes of applying paragraph (g)(1) of this section, PRS's adjusted basis in Asset H is $0.

(h) *Anti-avoidance rule for certain transfers of property*—(1) *In general.* If, with a principal purpose of decreasing the amount of its deemed tangible income return, a domestic corporation transfers specified tangible property (*transferred property*) to a specified related party of the domestic corporation and, within the disqualified period, the domestic corporation or an FDII-eligible related party of the domestic corporation leases the same or substantially similar property from any specified related party, then, solely for purposes of determining the QBAI of the domestic corporation under paragraph (b) of this section, the domestic corporation is treated as owning the transferred property from the later of the beginning of the term of the lease or date of the transfer of the property until the earlier of the end of the term of the lease or the end of the recovery period of the property.

(2) *Rule for structured arrangements.* For purposes of paragraph (h)(1) of this section, a transfer of specified tangible property to a person that is not a related party or lease of property from a person that is not a related party is treated as a transfer to or lease from a specified related party if the transfer or lease is pursuant to a structured arrangement. A structured arrangement exists only if either paragraph (h)(2)(i) or (ii) of this section is satisfied.

(i) The reduction in the domestic corporation's deemed tangible income return is priced into the terms of the arrangement with the transferee.

(ii) Based on all the facts and circumstances, the reduction in the domestic corporation's deemed tangible income return is a principal purpose of the arrangement. Facts and circumstances that indicate the reduction in the domestic corporation's deemed tangible income return is a principal purpose of the arrangement include—

(A) Marketing the arrangement as tax-advantaged where some or all of the tax advantage derives from the reduction in the domestic corporation's deemed tangible income return;

(B) Primarily marketing the arrangement to domestic corporations which earn FDDEI;

(C) Features that alter the terms of the arrangement, including the return, in the event the reduction in the domestic corporation's deemed tangible income return is no longer relevant; or

(D) A below-market return absent the tax effects or benefits resulting from the reduction in the domestic corporation's deemed tangible income return.

(3) *Per se rules for certain transactions.* For purposes of paragraph (h)(1) of this section, a transfer of property by a domestic corporation to a specified related party (including a party deemed to be a specified related party under paragraph (h)(2) of this section) followed by a lease of the same or substantially similar property by the domestic corporation or an FDII-eligible related party from a specified related party (including a party deemed to be a specified related party under paragraph (h)(2) of this section) is treated per se as occurring pursuant to a principal purpose of decreasing the amount of the domestic corporation's deemed tangible income return if both the transfer and the lease occur within a six-month period.

(4) *Definitions related to anti-avoidance rule.* The following definitions apply for purpose of this paragraph (h).

(i) *Disqualified period.* The term *disqualified period* means, with respect to a transfer, the period beginning one year before the date of the transfer and ending the earlier of the end of the remaining recovery period (under the system described in section 951A(d)(3)(A)) of the property or one year after the date of the transfer.

(ii) *FDII-eligible related party.* The term *FDII-eligible related party* means, with respect to a domestic corporation, a member of the same consolidated group as the domestic corporation or a partnership with respect to which at least 80 percent of the interests in partnership capital and profits are owned, directly or indirectly, by the domestic corporation or one or more members of the consolidated group that includes the domestic corporation.

(iii) *Specified related party.* The term *specified related party* means, with respect to a domestic corporation, a related party other than an FDII-eligible related party.

(iv) *Transfer.* The term *transfer* means any disposition, exchange, contribution, or distribution of property, and includes an indirect transfer. For example, a transfer of an interest in a partnership is treated as a transfer of the assets of the partnership. In addition, if paragraph (h)(1) of this section applies to treat a domestic corporation as owning specified tangible property by reason of a lease of property, the termination or lapse of the lease of the property is treated as a transfer of the specified tangible property by the domestic corporation to the lessor.

(5) *Transactions occurring before March 4, 2019.* Paragraph (h)(1) of this section does not apply to a transfer of property that occurs before March 4, 2019.

(6) *Examples.* The following examples illustrate the application of this paragraph (h).

(i) *Example 1: Sale-leaseback with a related party*—(A) *Facts.* DC, a domestic corporation, owns Asset A, which is specified tangible property. DC also owns all the single class of stock of DS, a domestic corporation, and FS1 and FS2, each a controlled foreign corporation. DC and DS are members of the same consolidated group. On January 1, Year 1, DC sells Asset A to FS1. At the time of the sale, Asset A had a remaining recovery period of 10 years under the alternative depreciation system. On February 1, Year 1, FS2 leases Asset B, which is substantially similar to Asset A, to DS for a five-year term ending on January 31, Year 6.

(B) *Analysis.* Because DC transfers specified tangible property (Asset A), to a specified related party of DC (FS1), and, within a six month period (January 1, Year 1 to February 1, Year 1), an FDII-eligible related party of DC (DS) leases a substantially similar property (Asset B) from a specified related party (FS2), DC's transfer of Asset A and lease of Asset B are treated as per se occurring pursuant to a principal purpose of decreasing the amount of its deemed tangible income return. Accordingly, for purposes of determining DC's QBAI, DC is treated as owning Asset A from February 1, Year 1, the later of the date of the transfer of Asset A (January 1, Year 1) and the beginning of the term of the lease of Asset B (February 1, Year 1), until January 31, Year 6, the earlier of the end of the term of the lease of Asset B (January 31, Year 6) or the remaining recovery period of Asset A (December 31, Year 10).

(ii) *Example 2: Sale-leaseback with a related party; lapse of initial lease*—(A)

Facts. The facts are the same as in paragraph (h)(6)(i)(A) of this section (the facts in *Example 1*). In addition, DS allows the lease of Asset B to expire on February 1, Year 6. On June 1, Year 6, DS and FS2 renew the lease for a five-year term ending on May 31, Year 11.

(B) *Analysis*. Because DC is treated as owning Asset A under paragraph (h)(1) of this section, the lapse of the lease of Asset B is treated as a transfer of Asset A to FS2 on February 1, Year 6, under paragraph (h)(4)(iv) of this section. Further, because DC is deemed to transfer specified tangible property (Asset A) to a specified related party (FS2) upon the lapse of the lease, and within a six month period (February 1, Year 6 to June 1, Year 6), an FDII-eligible related party of DC (DS) leases a substantially similar property (Asset B), DC's deemed transfer of Asset A under paragraph (h)(4)(iv) of this section and lease of Asset B are treated as per se occurring pursuant to a principal purpose of decreasing the amount of its deemed tangible income return. Accordingly, for purposes of determining DC's QBAI, DC is treated as owning Asset A from June 1, Year 6, the later of the date of the deemed transfer of Asset A (February 1, Year 6) and the beginning of the term of the lease of Asset B (June 1, Year 6), until December 31, Year 10, the earlier of the end of the term of the lease of Asset B (May 31, Year 11) or the remaining recovery period of Asset A (December 31, Year 10).

[T.D. 9901, 85 FR 43080, July 15, 2020, as amended by 85 FR 60910, Sept. 29, 2020; T.D. 9956, 86 FR 52972, Sept. 24, 2021]

§ 1.250(b)–3 Foreign-derived deduction eligible income (FDDEI) transactions.

(a) *Scope*. This section provides rules related to the determination of whether a sale of property or provision of a service is a FDDEI transaction. Paragraph (b) of this section provides definitions related to the determination of whether a sale of property or provision of a service is a FDDEI transaction. Paragraph (c) of this section provides rules regarding a sale of property or provision of a service to a foreign government or an agency or instrumentality thereof. Paragraph (d) of this section provides a rule for characterizing a transaction with both sales and services elements. Paragraph (e) of this section provides a rule for determining whether a sale of property or provision of a service to a partnership is a FDDEI transaction. Paragraph (f) of this section provides rules for substantiating certain FDDEI transactions.

(b) *Definitions*. This paragraph (b) provides definitions that apply for purposes of this section and §§ 1.250(b)–4 through 1.250(b)–6.

(1) *Digital content*. The term *digital content* means a computer program or any other content in digital format. For example, digital content includes books in digital format, movies in digital format, and music in digital format. For purposes of this section, a computer program is a set of statements or instructions to be used directly or indirectly in a computer or other electronic device in order to bring about a certain result, and includes any media, user manuals, documentation, data base, or similar item if the media, user manuals, documentation, data base, or other similar item is incidental to the operation of the computer program.

(2) *End user*. Except as modified by § 1.250(b)–4(d)(2)(ii), the term *end user* means the person that ultimately uses or consumes property or a person that acquires property in a foreign retail sale. A person that acquires property for resale or otherwise as an intermediary is not an end user.

(3) *FDII filing date*. The term *FDII filing date* means, with respect to a sale of property by a seller or provision of a service by a renderer, the date, including extensions, by which the seller or renderer is required to file an income tax return (or in the case of a seller or renderer that is a partnership, a return of partnership income) for the taxable year in which the gross income from the sale of property or provision of a service is included in the gross income of the seller or renderer.

(4) *Finished goods*. The term *finished goods* means general property that is acquired by an end user.

(5) *Foreign person*. The term *foreign person* means a person (as defined in section 7701(a)(1)) that is not a United States person and includes a foreign

government or an international organization.

(6) *Foreign related party*. The term *foreign related party* means, with respect to a seller or renderer, any foreign person that is a related party of the seller or renderer.

(7) *Foreign retail sale*. The term *foreign retail sale* means a sale of general property to a recipient that acquires the general property at a physical retail location (such as a store or warehouse) outside the United States.

(8) *Foreign unrelated party*. The term *foreign unrelated party* means, with respect to a seller, a foreign person that is not a related party of the seller.

(9) *Fungible mass of general property*. The term *fungible mass of general property* means multiple units of property for sale with similar or identical characteristics for which the seller does not know the specific identity of the recipient or the end user for a particular unit.

(10) *General property*. The term *general property* means any property other than: Intangible property (as defined in paragraph (b)(11) of this section); a security (as defined in section 475(c)(2)); an interest in a partnership, trust, or estate; a commodity described in section 475(e)(2)(A) that is not a physical commodity; or a commodity described in section 475(e)(2)(B) through (D). A physical commodity described in section 475(e)(2)(A) is treated as general property, including if it is sold pursuant to a forward or option contract (including a contract described in section 475(e)(2)(C), but not a section 1256 contract as defined in section 1256(b) or other similar contract that is traded on a U.S. or non-U.S. regulated exchange and cleared by a central clearing organization in a manner similar to a section 1256 contract) that is physically settled by delivery of the commodity (provided that the taxpayer physically settled the contract pursuant to a consistent practice adopted for business purposes of determining whether to cash or physically settle such contracts under similar circumstances).

(11) *Intangible property*. The term *intangible property* has the meaning set forth in section 367(d)(4). For purposes of section 250, intangible property does not include a copyrighted article as defined in §1.861–18(c)(3).

(12) *International transportation property*. The term *international transportation property* means aircraft, railroad rolling stock, vessel, motor vehicle, or similar property that provides a mode of transportation and is capable of traveling internationally.

(13) *IP address*. The term *IP address* means a device's internet Protocol address.

(14) *Recipient*. The term *recipient* means a person that purchases property or services from a seller or renderer.

(15) *Renderer*. The term *renderer* means a person that provides a service to a recipient.

(16) *Sale*. The term *sale* means any sale, lease, license, sublicense, exchange, or other disposition of property, and includes any transfer of property in which gain or income is recognized under section 367. In addition, the term *sell* (and any form of the word sell) means any transfer by sale.

(17) *Seller*. The term *seller* means a person that sells property to a recipient.

(18) *United States*. The term *United States* has the meaning set forth in section 7701(a)(9), as expanded by section 638(1) with respect to mines, oil and gas wells, and other natural deposits.

(19) *United States person*. The term *United States person* has the meaning set forth in section 7701(a)(30), except that the term does not include an individual that is a bona fide resident of a United States territory within the meaning of section 937(a).

(20) *United States territory*. The term *United States territory* means American Samoa, Guam, the Northern Mariana Islands, Puerto Rico, or the U.S. Virgin Islands.

(c) *Foreign military sales and services*. If a sale of property or a provision of a service is made to the United States or an instrumentality thereof pursuant to 22 U.S.C. 2751 *et seq*. under which the United States or an instrumentality thereof purchases the property or service for resale or on-service to a foreign government or agency or instrumentality thereof, then the sale of property or provision of a service is treated as a

FDDEI sale or FDDEI service without regard to §1.250(b)–4 or §1.250(b)–5.

(d) *Transactions with multiple elements*. A transaction is classified according to its overall predominant character for purposes of determining whether the transaction is a FDDEI sale under §1.250(b)–4 or a FDDEI service under §1.250(b)–5. For example, whether a transaction that includes both a sales component and a service component is subject to §1.250(b)–4 or §1.250(b)–5 is determined based on whether the overall predominant character, taking into account all relevant facts and circumstances, is a sale or service. In addition, whether a transaction that includes both a sale of general property and a sale of intangible property is subject to §1.250(b)–4(d)(1) or §1.250(b)–4(d)(2) is determined based on whether the overall predominant character, taking into account all relevant facts and circumstances, is a sale of general property or a sale of intangible property.

(e) *Treatment of partnerships*—(1) *In general*. For purposes of determining whether a sale of property to or by a partnership or a provision of a service to or by a partnership is a FDDEI transaction, a partnership is treated as a person. Accordingly, for example, a partnership may be a seller, renderer, recipient, or related party, including a foreign related party (as defined in paragraph (b)(6) of this section).

(2) *Examples*. The following examples illustrate the application of this paragraph (e).

(i) *Example 1: Domestic partner sale to foreign partnership with a foreign branch*—(A) *Facts*. DC, a domestic corporation, is a partner in PRS, a foreign partnership. DC and PRS are not related parties. PRS has a foreign branch within the meaning of §1.904–4(f)(3)(iii). DC and PRS both use the calendar year as their taxable year. For the taxable year, DC recognizes $20x of gain on the sale of general property to PRS for a foreign use (as determined under §1.250(b)–4(d)). During the same taxable year, PRS recognizes $20x of gain on the sale of other general property to a foreign person for a foreign use (as determined under §1.250(b)–4(d)). PRS's income on the sale of the property is attributable to its foreign branch.

(B) *Analysis*. DC's sale of property to PRS, a foreign partnership, is a FDDEI sale because it is a sale to a foreign person for a foreign use. Therefore, DC's gain of $20x on the sale to PRS is included in DC's gross DEI and gross FDDEI. However, PRS's gain of $20x is not included in the gross DEI or gross FDDEI of PRS because the gain is foreign branch income within the meaning of §1.250(b)–1(c)(11). Accordingly, none of PRS's gain on the sale of property is included in DC's gross DEI or gross FDDEI under §1.250(b)–1(e)(1).

(ii) *Example 2: Domestic partner sale to domestic partnership without a foreign branch*—(A) *Facts*. The facts are the same as in paragraph (e)(2)(i)(A) of this section (the facts in *Example 1*), except PRS is a domestic partnership that does not have a foreign branch within the meaning of §1.904–4(f)(3)(iii).

(B) *Analysis*. DC's sale of property to PRS, a domestic partnership, is not a FDDEI sale because the sale is to a United States person. Therefore, the gross income from DC's sale to PRS is included in DC's gross DEI but is not included in its gross FDDEI. However, PRS's sale of other general property is a FDDEI sale, and therefore the gain of $20x is included in the gross DEI and gross FDDEI of PRS. Accordingly, DC includes its distributive share of PRS's gain from the sale in determining DC's gross DEI and gross FDDEI for the taxable year under §1.250(b)–1(e)(1).

(f) *Substantiation for certain FDDEI transactions*—(1) *In general*. Except as provided in paragraph (f)(2) of this section, for purposes of §1.250(b)–4(d)(1)(ii)(C) (foreign use for sale of general property for resale), §1.250(b)–4(d)(1)(iii) (foreign use for sale of general property subject to manufacturing, assembly, or processing outside the United States), §1.250(b)–4(d)(2) (foreign use for sale of intangible property), and §1.250(b)–5(e) (general services provided to business recipients located outside the United States), a transaction is a FDDEI transaction only if the taxpayer substantiates its determination of foreign use (in the case of sales of property) or location outside the United States (in the case of general services provided to a business recipient) as described in the applicable paragraph of §1.250(b)–4(d)(3) or §1.250(b)–5(e)(4). The substantiating documents must be in existence as of the FDII filing date with respect to the FDDEI transaction, and a taxpayer must provide the required substantiating documents within 30 days of a request by the Commissioner or another period as agreed between the Commissioner and the taxpayer.

(2) *Exception for small businesses.* Paragraph (f)(1) of this section, and the specific substantiation requirements described in the applicable paragraph of §1.250(b)–4(d)(3) or §1.250(b)–5(e)(4), do not apply to a taxpayer if the taxpayer and all related parties of the taxpayer, in the aggregate, receive less than $25,000,000 in gross receipts during the taxable year prior to the FDDEI transaction. If the taxpayer's prior taxable year was less than 12 months (a short period), gross receipts are annualized by multiplying the gross receipts for the short period by 365 and dividing the result by the number of days in the short period.

(3) *Treatment of certain loss transactions*—(i) *In general.* If a domestic corporation fails to satisfy the substantiation requirements described in the applicable paragraph of §1.250(b)–4(d)(3) or §1.250(b)–5(e)(4) with respect to a transaction (including in connection with a related party transaction described in §1.250(b)–6), the gross income from the transaction will be treated as gross FDDEI if—

(A) In the case of a sale of property, the seller knows or has reason to know that property is sold to a foreign person for a foreign use (within the meaning of §1.250(b)–4(d)(1) or (2));

(B) In the case of the provision of a general service to a business recipient, the renderer knows or has reason to know that a service is provided to a business recipient located outside the United States; and

(C) Not treating the transaction as a FDDEI transaction would increase the amount of the corporation's FDDEI for the taxable year relative to its FDDEI that would be determined if the transaction were treated as a FDDEI transaction.

(ii) *Reason to know*—(A) *Sales to a foreign person for a foreign use.* For purposes of paragraph (f)(3)(i)(A) of this section, a seller has reason to know that a sale is to a foreign person for a foreign use if the information received as part of the sales process contains information that indicates that the recipient is a foreign person or that the sale is for a foreign use, and the seller fails to obtain evidence establishing that the recipient is not in fact a foreign person or that the sale is not in fact for a foreign use. Information that indicates that a recipient is a foreign person or that the sale is for a foreign use includes, but is not limited to, a foreign phone number, billing address, shipping address, or place of residence; and, with respect to an entity, evidence that the entity is incorporated, formed, or managed outside the United States.

(B) *General services provided to a business recipient located outside the United States.* For purposes of paragraph (f)(3)(i)(B) of this section, a renderer has reason to know that the provision of a general service is to a business recipient located outside the United States if the information received as part of the sales process contains information that indicates that the recipient is a business recipient located outside the United States and the seller fails to obtain evidence establishing that the recipient is not in fact a business recipient located outside the United States. Information that indicates that a recipient is a business recipient includes, but is not limited to, indicia of a business status (such as ''LLC'' or ''Company,'' or similar indicia under applicable domestic or foreign law, in the name) or statements by the recipient indicating that it is a business. Information that indicates that a business recipient is located outside the United States includes, but is not limited to, a foreign phone number, billing address, and evidence that the entity or business is incorporated, formed, or managed outside the United States.

(iii) *Multiple transactions.* If a seller or renderer engages in more than one transaction described in paragraph (f)(3)(i) of this section in a taxable year, paragraph (f)(3)(i) of this section applies by comparing the corporation's FDDEI if each such transaction were not treated as a FDDEI transaction to its FDDEI if each such transaction were treated as a FDDEI transaction.

(iv) *Example*. The following example illustrates the application of this paragraph (f)(3).

(A) *Facts*. During a taxable year, DC, a domestic corporation, manufactures products A and B in the United States. DC sells product A and product B to Y, a foreign person that is a distributor, for $200x and $800x, respectively. DC knows or has reason to know that all of its sales of product A and product B will ultimately be sold to end users located outside the United States. Y provides DC with a statement that satisfies the substantiation requirement of paragraph (f)(1) of this section and §1.250(b)–4(d)(3)(ii) that establishes that its sales of product B are for a foreign use but does not obtain substantiation establishing that any sales of product A are for a foreign use. DC's cost of goods sold is $450x. For purposes of determining gross FDDEI, under §1.250(b)–1(d)(1) DC attributes $250x of cost of goods sold to product A and $200x of cost of goods sold to product B, and then attributes the cost of goods sold for each product ratably between the gross receipts of such product sold to foreign persons and the gross receipts of such product not sold to foreign persons. The manner in which DC attributes the cost of goods sold is a reasonable method. DC has no other items of income, loss, or deduction.

TABLE 1 TO PARAGRAPH (F)(3)(IV)(A)

	Product A	Product B	Total
Gross receipts	$200x	$800x	$1,000x
Cost of Goods Sold	250x	200x	450x
Gross Income (Loss)	(50x)	600x	550x

(B) *Analysis*. By not treating the sales of product A as FDDEI sales, the amount of DC's FDDEI would increase by $50x relative to its FDDEI if the sales of product A were treated as FDDEI sales. Accordingly, because DC knows or has reason to know that its sales of product A are to foreign persons for a foreign use, the sales of product A constitute FDDEI sales under paragraph (f)(3) of this section, and thus the $50x loss from the sale of product A is included in DC's gross FDDEI.

[T.D. 9901, 85 FR 43080, July 15, 2020]

§ 1.250(b)–4 Foreign-derived deduction eligible income (FDDEI) sales.

(a) *Scope*. This section provides rules for determining whether a sale of property is a FDDEI sale. Paragraph (b) of this section defines a FDDEI sale. Paragraph (c) of this section provides rules for determining whether a recipient is a foreign person. Paragraph (d) of this section provides rules for determining whether property is sold for a foreign use. Paragraph (e) of this section provides a special rule for the sale of interests in a disregarded entity. Paragraph (f) of this section provides a rule regarding certain hedging transactions with respect to FDDEI sales.

(b) *Definition of FDDEI sale*. Except as provided in §1.250(b)–6(c), the term *FDDEI sale* means a sale of general property or intangible property to a recipient that is a foreign person (see paragraph (c) of this section for presumption rules relating to determining foreign person status) and that is for a foreign use (as determined under paragraph (d) of this section). A sale of any property other than general property or intangible property is not a FDDEI sale.

(c) *Presumption of foreign person status*—(1) *In general*. The sale of property is presumed to be to a recipient that is a foreign person for purposes of paragraph (b) of this section if the sale is described in paragraph (c)(2) of this section. However, this presumption does not apply if the seller knows or has reason to know that the sale is not to a foreign person. A seller has reason to know that a sale is not to a foreign person if the information received as part of the sales process contains information that indicates that the recipient is not a foreign person and the seller fails to obtain evidence establishing that the recipient is in fact a foreign person. Information that indicates that a recipient is not a foreign person include, but are not limited to, a United States phone number, billing address, shipping address, or place of residence; and, with respect to an entity, evidence that the entity is incorporated, formed, or managed in the United States.

(2) *Sales of property.* A sale of a property is described in this paragraph (c)(2) if:

(i) The sale is a foreign retail sale;

(ii) In the case of a sale of general property that is not a foreign retail sale and the general property is delivered (such as through a commercial carrier) to the recipient or an end user, the shipping address of the recipient or end user is outside the United States;

(iii) In the case of a sale of general property that is not described in either paragraph (c)(2)(i) or (ii) of this section, the billing address of the recipient is outside the United States; or

(iv) In the case of a sale of intangible property, the billing address of the recipient is outside the United States.

(d) *Foreign use*—(1) *Foreign use for general property*—(i) *In general.* The sale of general property is for a foreign use for purposes of paragraph (b) of this section if the seller determines that the sale is for a foreign use under the rules of paragraph (d)(1)(ii) or (iii) of this section and the exception in paragraph (d)(1)(iv) of this section does not apply.

(ii) *Rules for determining foreign use*—(A) *Sales that are delivered to an end user by a carrier or freight forwarder.* Except as otherwise provided in this paragraph (d)(1)(ii)(A), a sale of general property (other than a sale of general property described in paragraphs (d)(1)(ii)(D) through (F) of this section) that is delivered through a carrier or freight forwarder to a recipient that is an end user is for a foreign use if the end user receives delivery of the general property outside the United States. However, a sale described in the preceding sentence is not treated as a sale to an end user for a foreign use if the sale is made with a principal purpose of having the property transported from its location outside the United States to a location within the United States for ultimate use or consumption.

(B) *Sales to an end user without the use of a carrier or freight forwarder.* With respect to sales that are not delivered through the use of a carrier or freight forwarder, a sale of general property (other than a sale of general property described in paragraphs (d)(1)(ii)(D) through (F) of this section) to a recipient that is an end user is for a foreign use if the property is located outside the United States at the time of the sale (including as part of foreign retail sales).

(C) *Sales for resale.* A sale of general property (other than a sale of general property described in paragraphs (d)(1)(ii)(D) through (F) of this section) to a recipient (such as a distributor or retailer) that will resell the general property is for a foreign use if the general property will ultimately be sold to end users outside the United States (including in foreign retail sales) and such sales to end users outside the United States are substantiated under paragraph (d)(3)(ii) of this section. In the case of sales of a fungible mass of general property, the taxpayer may presume that the proportion of its sales that are ultimately sold to end users outside the United States is the same as the proportion of the recipient's resales of that fungible mass to end users outside the United States.

(D) *Sales of digital content.* A sale of general property that primarily contains digital content that is transferred electronically rather than in a physical medium is for a foreign use if the end user downloads, installs, receives, or accesses the purchased digital content on the end user's device outside the United States (see §1.250(b)–5(d)(2) and (e)(2)(iii) for rules that apply in the case of digital content that is not purchased in a sale but is electronically supplied as a service). If information about where the digital content is downloaded, installed, received, or accessed (such as the device's IP address) is unavailable, and the gross receipts from all sales with respect to the end user (which may be a business) are in the aggregate less than $50,000 for the seller's taxable year, a sale of general property described in the preceding sentence is for a foreign use if it is to an end user that has a billing address located outside the United States.

(E) *Sales of international transportation property used for compensation or hire.* A sale of international transportation property used for compensation or hire is for a foreign use if the end user registers the property with a foreign jurisdiction.

(F) *Sales of international transportation property not used for compensation or hire.* A sale of international transportation property not used for compensation or hire is for a foreign use if the end user registers the property in a foreign jurisdiction and hangars or stores the property primarily outside the United States.

(iii) *Sales for manufacturing, assembly, or other processing*—(A) *In general.* A sale of general property is for a foreign use if the sale is to a foreign unrelated party that subjects the property to manufacture, assembly, or other processing outside the United States and such manufacturing, assembly, or other processing outside the United States is substantiated under paragraph (d)(3)(iii) of this section. Property is subject to manufacture, assembly, or other processing only if the property is physically and materially changed (as described in paragraph (d)(1)(iii)(B) of this section) or the property is incorporated as a component into another product (as described in paragraph (d)(1)(iii)(C) of this section).

(B) *Property subject to a physical and material change.* The determination of whether general property is subject to a physical and material change is made based on all the relevant facts and circumstances. General property is subject to a physical and material change if it is substantially transformed and is distinguishable from and cannot be readily returned to its original state.

(C) *Property incorporated into a product as a component.* General property is a component incorporated into another product if the incorporation of the general property into another product involves activities that are substantial in nature and generally considered to constitute the manufacture, assembly, or processing of property based on all the relevant facts and circumstances. However, general property is not considered a component incorporated into another product if it is subject only to packaging, repackaging, labeling, or minor assembly operations. In addition, general property is treated as a component if the seller expects, using reliable estimates, that the fair market value of the property when it is delivered to the recipient will constitute no more than 20 percent of the fair market value of the finished good into which the general property is directly or indirectly incorporated when the finished good is sold to end users (the "20-percent rule"). If the property could be incorporated into a number of different finished goods, a reliable estimate of the fair market value of the finished good may include the average fair market value of a representative range of such goods. For purposes of the 20-percent rule, all general property that is sold by the seller and incorporated into the finished good is treated as a single item of property if the seller sells the property to the recipient and the seller knows or has reason to know that the components will be incorporated into a single item of property (for example, where multiple components are sold as a kit). A seller knows or has reason to know that the components will be incorporated into a single item of property if the information received as part of the sales process indicates that the components will be included in the same second product or the nature of the components compels inclusion into the second product and the seller fails to obtain evidence to the contrary.

(iv) *Sales of property subject to manufacturing, assembly, or other processing in the United States.* If the seller sells general property to a recipient (other than a related party) for manufacturing, assembly, or other processing within the United States, such property is not sold for a foreign use even if the requirements of paragraph (d)(1)(ii) or (iii) of this section are subsequently satisfied. See §1.250(b)–6(c) for rules governing sales of general property to a foreign person that is a related party. Property is subject to manufacture, assembly, or other processing only if the property is physically and materially changed (as described in paragraph (d)(1)(iii)(B) of this section) or the property is incorporated as a component into another product (as described in paragraph (d)(1)(iii)(C) of this section).

(v) *Examples.* The following examples illustrate the application of this paragraph (d)(1).

(A) *Assumed facts.* The following facts are assumed for purposes of the examples—

(*1*) DC is a domestic corporation.

(*2*) FP is a foreign person that is a foreign unrelated party with respect to DC.

(*3*) To the extent a sale is for a foreign use, any applicable substantiation requirements described in paragraph (d)(3)(ii) or (iii) of this section are satisfied.

(B) *Examples—*

(*1*) *Example 1: Manufacturing outside the United States—*(*i*) *Facts.* DC sells batteries for $18x to FP. DC expects that FP will insert the batteries into tablets as part of the process of assembling tablets outside the United States. While the tablets are manufactured in a way that end users would not easily be able to remove the batteries, the batteries could be removed from the tablets and would resemble their original state following the removal. The finished tablets will be sold to end users within and outside the United States. DC's batteries are used in two types of tablets, Tablet A and Tablet B. Based on an economic analysis, DC determines that the fair market value of Tablet A is $90x and the fair market value of Tablet B is $110x. FP informs DC that the number of sales of Tablet A is approximately equal to the number of sales of Tablet B.

(*ii*) *Analysis.* Because the batteries could be removed from the tablets and be returned to their original state, the insertion of the batteries into the tablets does not constitute a physical and material change described in paragraph (d)(1)(iii)(B) of this section. However, the average fair market value of a representative range of tablets that incorporate the batteries is $100x (the average of $90x for Tablet A and $110x for Tablet B because their sales are approximately equal), and $18x is less than 20 percent of $100x. Therefore, the batteries are considered components of the tablets and treated as subject to manufacture, assembly, or other processing outside the United States. See paragraphs (d)(1)(iii)(A) and (C) of this section. As a result, notwithstanding that some tablets incorporating the batteries may be sold to an end user in the United States, DC's sale of batteries is considered for a foreign use. Accordingly, DC's sale of batteries to FP is for a foreign use under paragraph (d)(1)(iii)(A) and (C) of this section, and the sale is a FDDEI sale.

(*2*) *Example 2: Manufacturing outside the United States—*(*i*) *Facts.* The facts are the same as in paragraph (d)(1)(v)(B)(*1*) of this section (the facts in *Example 1*), except FP purchases the batteries from DC for $25x. In addition, FP purchased other components of tablets from other parties. FP has a substantial investment in machinery and tools that are used to assemble tablets.

(*ii*) *Analysis.* Even though the fair market value of the batteries that FP purchases from DC and incorporates into the tablets exceeds 20 percent of the fair market value of the tablets, because the batteries are used by FP in activities that are substantial in nature and generally considered to constitute the manufacture, assembly or other processing of property, the batteries are components of the tablets. As a result, DC's sale of property to FP is still for a foreign use under paragraph (d)(1)(iii)(A) and (C) of this section, and the sale is a FDDEI sale.

(*3*) *Example 3: Sale of products to distributor outside the United States—*(*i*) *Facts.* DC sells smartphones to FP, a distributor of electronics located within Country A. The sales contract between DC and FP provides that FP may sell the smartphones it purchases from DC only to specified retailers located within Country A. The specified retailers only sell electronics, including smartphones, in foreign retail sales.

(*ii*) *Analysis.* Although FP does not sell the smartphones it purchases from DC to end users, FP sells to retailers that sell the smartphones in foreign retail sales. All of the sales of smartphones from DC to FP are sales of general property for a foreign use under paragraph (d)(1)(ii)(C) of this section because FP is only allowed to sell the smartphones to retailers who sell such property in foreign retail sales. As a result, DC's sales of smartphones to FP are FDDEI sales.

(*4*) *Example 4: Sale of a fungible mass of products*—(*i*) *Facts*. DC and persons other than DC sell multiple units of printer paper that is considered fungible general property to FP during the taxable year. FP is a distributor that sells paper to retail stores within and outside the United States. FP informs DC that approximately 25 percent of FP's sales of the paper are to retail stores located outside of the United States for foreign retail sales.

(*ii*) *Analysis*. The sale of paper to FP is for a foreign use to the extent that the paper will be sold to end users located outside the United States under paragraph (d)(1)(ii)(C) of this section. Because a portion of DC's sales to FP are not for a foreign use, DC must determine the amount of paper that is sold for a foreign use. Based on the information provided by FP about its own sales, DC determines under paragraph (d)(1)(ii)(C) of this section that 25 percent of the total units of paper that is fungible general property that FP purchased from all persons in the taxable year will ultimately be sold to end users located outside the United States. Accordingly, DC satisfies the test for a foreign use under paragraph (d)(1)(ii)(C) of this section with respect to 25 percent of its sales of the paper to FP.

(*5*) *Example 5: Limited use license of copyrighted computer software*—(*i*) *Facts*. DC provides FP with a limited use license to copyrighted computer software in exchange for an annual fee of $100x. The limited use license restricts FP's use of the computer software to 100 of FP's employees, who download the software onto their computers. The limited use license prohibits FP from using the computer software in any way other than as an end user, which includes prohibiting sublicensing, selling, reverse engineering, or modifying the computer software. All of FP's employees download the software onto computers that are physically located outside the United States.

(*ii*) *Analysis*. The software licensed to FP is digital content as defined in §1.250(b)–3(b)(1), and is downloaded by an end user as defined in §1.250(b)–3(b)(2). Accordingly, because the software is downloaded solely onto computers outside the United States, DC's license to FP is for a foreign use and therefore a FDDEI sale under paragraph (d)(1)(ii)(D) of this section. The entire $100x of the license fee is included in DC's gross FDDEI for the taxable year.

(*6*) *Example 6: Limited use license of copyrighted computer software used within and outside the United States*—(*i*) *Facts*. The facts are the same as in paragraph (d)(1)(v)(B)(*5*) of this section (the facts in *Example 5*), except that FP has offices both within and outside the United States, and DC's internal records indicates that 50 percent of the downloads of the software are onto computers located outside the United States.

(*ii*) *Analysis*. Because 50 percent of the downloads of the software are onto computers located outside the United States, a portion of DC's license to FP is for a foreign use and therefore such portion is a FDDEI sale. The $50x of license fee derived with respect to such portion is included in DC's gross FDDEI for the taxable year.

(*7*) *Example 7: Sale of a copyrighted article*—(*i*) *Facts*. DC sells copyrighted music available for download on its website. Once downloaded, the recipient listens to the music on electronic devices that do not need to be connected to the internet. DC has data that an individual accesses the website to purchase a song for download on a device located outside the United States. The terms of the sale permit the recipient to use the song for personal use, but convey no other rights to the copyrighted music to the recipient.

(*ii*) *Analysis*. The music acquired through download is digital content as defined in §1.250(b)–3(b)(1). Because the recipient acquires no ownership in copyright rights to the music, the sale is considered a sale of a copyrighted article, and thus is a sale of general property. See §1.250(b)–3(b)(10) and (11). As a result, the sale is considered for a foreign use under paragraph (d)(1)(ii)(D) of this section because the digital content was installed, received, or accessed on the end user's device outside the United States. The income derived with respect to the sale of the music is included in DC's gross FDDEI for the taxable year. See §1.250(b)–5(d)(3) for an example of digital content provided to consumers as a service rather than as a sale.

(2) *Foreign use for intangible property*—(i) *In general*. A sale of rights to exploit intangible property solely outside the United States is for a foreign use. A sale of rights to exploit intangible property solely within the United States is not for a foreign use. A sale of rights to exploit intangible property worldwide is partially for a foreign use and partially not for a foreign use. Whether intangible property is exploited within versus outside the United States is determined based on revenue earned from end users located within versus outside the United States. Therefore, a sale of rights to exploit intangible property both within and outside the United States is for a foreign use in proportion to the revenue earned from end users located outside the United States over the total revenue earned from the exploitation of the intangible property. A sale of intangible property will be treated as a FDDEI sale only if the substantiation requirements of paragraph (d)(3)(iv) of this section are satisfied. For rules specific to determining end users and revenue earned from end users for intangible property used in sales of general property, provision of services, research and development, or consisting of a manufacturing method or process, see paragraph (d)(2)(ii) of this section.

(ii) *Determination of end users and revenue earned from end users*—(A) *Intangible property embedded in general property or used in connection with the sale of general property*. If intangible property is embedded in general property that is sold, or used in connection with a sale of general property, then the end user of the intangible property is the end user of the general property. Revenue is earned from the end user of the general property outside the United States to the extent the sale of the general property is for a foreign use under paragraph (d)(1)(ii) or (iii) of this section.

(B) *Intangible property used in providing a service*. If intangible property is used to provide a service, then the end user of that intangible property is the recipient, consumer, or business recipient of the service or, in the case of a property service or a transportation service that involves the transportation of property, the end user is the owner of the property on which such service is being performed. Such end users are treated as located outside the United States only to the extent the service qualifies as a FDDEI service under § 1.250(b)–5. Therefore, in the case of a recipient of a sale of intangible property that uses such intangible property to provide a property service that qualifies as a FDDEI service to another person, that person is the end user and is treated as located outside the United States.

(C) *Intangible property consisting of a manufacturing method or process*—(*1*) *In general*. Except as provided in paragraph (d)(2)(ii)(C)(*2*) of this section, if intangible property consists of a manufacturing method or process (as defined in paragraph (d)(2)(ii)(C)(*3*) of this section) and is sold to a foreign unrelated party (including in a sale by a foreign related party), then the foreign unrelated party is treated as an end user located outside the United States, unless the seller knows or has reason to know that the manufacturing method or process will be used in the United States, in which case the foreign unrelated party is treated as an end user located within the United States. A seller has reason to know that the manufacturing method or process will be used in the United States if the information received from the recipient as part of the sales process contains information that indicates that the recipient intends to use the manufacturing method or process in the United States and the seller fails to obtain evidence establishing that the recipient does not intend to use the manufacturing method or process in the United States.

(*2*) *Exception for certain manufacturing arrangements*. A sale of intangible property consisting of a manufacturing method or process (including a sale by a foreign related party) to a foreign unrelated party for use in manufacturing products for or on behalf of the seller or any person related to the seller does not qualify as a sale to a foreign unrelated party for purposes of determining the end user under paragraph (d)(2)(ii)(C)(*1*) of this section.

(*3*) *Manufacturing method or process.* For purposes of this section, a manufacturing method or process consists of a sequence of actions or steps that comprise an overall method or process that is used to manufacture a product or produce a particular manufacturing result, which may be in the form of a patent or know-how. Intangible property consisting of the right to make and sell an item of property is not a manufacturing method or process, whereas intangible property consisting of the right to apply a series of actions or steps to be performed to achieve a particular manufacturing result is a manufacturing method or process. For example, a utility or design patent on an article of manufacture, machine, composition of matter, design, or providing the right to sell equipment to perform a process is not a manufacturing method or process, whereas a utility patent covering a method or process of manufacturing is a manufacturing method or process for purposes of this section.

(D) *Intangible property used in research and development.* If intangible property (primary IP) is used to develop new or modify other intangible property (secondary IP), then the end user of the primary IP is the end user (applying paragraph (d)(2)(ii)(A), (B), or (C) of this section) of the secondary IP.

(iii) *Determination of revenue for periodic payments versus lump sums*—(A) *Sales in exchange for periodic payments.* In the case of a sale of intangible property, other than intangible property consisting of a manufacturing method or process that is sold to a foreign unrelated party, to a recipient in exchange for periodic payments, the extent to which the sale is for a foreign use is determined annually based on the actual revenue earned by the recipient from any use of the intangible property for the taxable year in which a periodic payment is received. If actual revenue earned by the recipient cannot be obtained after reasonable efforts, then estimated revenue earned by a recipient that is not a related party of the seller from the use of the intangible property may be used based on the principles of paragraph (d)(2)(iii)(B) of this section.

(B) *Sales in exchange for a lump sum.* In the case of a sale of intangible property, other than intangible property consisting of a manufacturing method or process that is sold to a foreign unrelated party, for a lump sum, the extent to which the sale is for a foreign use is determined based on the ratio of the total net present value of revenue the seller would have expected to earn from the exploitation of the intangible property outside the United States to the total net present value of revenue the seller would have expected to earn from the exploitation of the intangible property. In the case of a recipient that is a foreign unrelated party, net present values of revenue that the recipient expected to earn from the exploitation of the intangible property within and outside the United States may also be used if the seller obtained such revenue data from the recipient near the time of the sale and such revenue data was used to negotiate the lump sum price paid for the intangible property. Net present values must be determined using reliable inputs including, but not limited to, reliable revenue, expenses, and discount rates. The extent to which the inputs are used by the parties to determine the sales price agreed to between the seller and a foreign unrelated party purchasing the intangible property will be a factor in determining whether such inputs are reliable. If the intangible property is sold to a foreign related party, the reliability of the inputs used to determine net present values and the net present values are determined under section 482.

(C) *Sales to a foreign unrelated party of intangible property consisting of a manufacturing method or process.* In the case of a sale to an unrelated foreign party of intangible property consisting of a manufacturing method or process, the revenue earned from the end user is equal to the amount received from the recipient in exchange for the manufacturing method or process. In the case of a bundled sale of intangible property consisting of a manufacturing method or process and intangible property not consisting of a manufacturing method or process, the revenue earned from the intangible property consisting of the manufacturing method or process equals the total amount paid for the bundled sale multiplied by the proportion that the value of the manufacturing method or process bears to the total value of the intangible property. The value of the manufacturing method or process to the total value of the intangible property must be determined using the principles of section 482.

(iv) *Examples.* The following examples illustrate the application of this paragraph (d)(2).

(A) *Assumed facts.* The following facts are assumed for purposes of the examples—

(*1*) DC is a domestic corporation.

(*2*) Except as otherwise provided, FP and FP2 are foreign persons that are foreign unrelated parties with respect to DC.

(*3*) All of DC's income is DEI.

(*4*) Except as otherwise provided, the substantiation requirements described in paragraph (d)(3)(iv) of this section are satisfied.

(*5*) Except as otherwise provided, inputs used to determine the net present values of the revenue are reliable.

(B) *Examples*—

(*1*) *Example 1: License of worldwide rights with actual revenue data from recipient*—(*i*) *Facts.* DC licenses to FP worldwide rights to the copyright to composition A in exchange for annual royalties of 60 percent of revenue from FP's sales of composition A. FP sells composition A to customers through digital downloads from servers. In the taxable year, FP earns $100x in revenue from sales of copies of composition A to customers, of which $60x is from customers located in the United States and the remaining $40x is from customers located outside the United States. FP provides DC with reliable records showing the amount of revenue earned in the taxable year from sales of composition A to establish the royalties owed to DC. These records also provide DC with the amount of revenue earned from sales of composition A to customers located within the United States.

(*ii*) *Analysis.* FP is not the end user of the copyright to composition A under paragraph (d)(2)(ii)(A) of this section because the copyright is used in the sale of general property (the sale of copyrighted articles to customers). The customers that purchase a copy of composition A from FP are the end users (as defined in §1.250(b)–3(b)(2) and paragraph (d)(2)(ii)(A) of this section) because those customers are the recipients of composition A when sold as general property. Based on the actual revenue earned by FP from sales of composition A, 40 percent ($40x/$100x) of the revenue generated by the copyright during the taxable year is earned outside the United States. Accordingly, a portion of DC's license to FP is for a foreign use under paragraph (d)(2) of this section and therefore such portion is a FDDEI sale. The $24x of royalty (0.40 x $60x of total royalties owed to DC during the taxable year) derived with respect to such portion is included in DC's gross FDDEI for the taxable year.

(*2*) *Example 2: Fixed annual payments for worldwide rights without actual revenue data from recipient*—(*i*) *Facts.* The facts are the same as in paragraph (d)(2)(iv)(B)(*1*)(*i*) of this section (the facts in *Example 1*), except FP pays DC a fixed annual payment of $60x each year for the worldwide rights to the copyright to composition A and does not provide DC with data showing how much revenue FP earned from sales of composition A, even after DC requests that FP provide it with such information. DC also is unable to determine how much revenue FP earned from sales of composition A to customers within the United States from the data it has with respect to FP and publicly available data with respect to FP. However, DC's economic analysis of the revenue DC expected it could earn annually from use of composition A as part of determining the annual payments DC would receive from FP from the license of composition A supports a determination that 40 percent of sales of composition A during the tax year would be to customers located outside the United States. During an examination of DC's return for the taxable year, DC provides the IRS with data explaining the economic analysis, inputs, and results from its valuation of composition A used in determining the amount of annual payments agreed to by DC and FP.

(*ii*) *Analysis.* For the same reasons provided in paragraph (d)(2)(iv)(B)(*1*)(*ii*) of this section (the analysis in *Example 1*), the customers that purchase copies of composition A from FP are the end users. DC is allowed to use reliable economic analysis to estimate revenue earned by FP from the use of the copyright to composition A under paragraph (d)(2)(iii)(A) of this section because DC was unable to obtain actual revenue earned by FP from use of the copyright to composition A during the taxable year after reasonable efforts to obtain the actual revenue data. Based on DC's economic analysis, a portion of DC's license to FP is for a foreign use under paragraph (d)(2) of this section and therefore such portion is a FDDEI sale. $24x of the $60x fixed payment to DC (0.40 x $60x) is included in DC's gross FDDEI for the taxable year.

(*3*) *Example 3: Sale of patent rights protected in the United States and other countries; use of financial projections in sale to foreign unrelated party*—(*i*) *Facts.* DC owns a patent for an active pharmaceutical ingredient (''API'') approved for treatment of disease A (''indication A'') in the United States and in Countries A, B, and C. The patent is registered in the United States and in Countries A, B, and C. DC sells to FP all of its patent rights to the API for indication A for a lump sum payment of $1,000x. DC has no basis in the patent rights. To determine the sales price for the patent rights, DC projected that the net present value of the revenue it would earn from selling a pharmaceutical product incorporating the API for indication A was $5,000x, with 15 percent of the net present value of revenue earned from sales within the United States and 85 percent of the net present value of revenue earned from sales outside the United States. DC did not obtain revenue projections from the recipient.

(*ii*) *Analysis.* FP is not the end user of the patent under paragraph (d)(2)(ii)(A) of this section because the patent is used in the sale of general property (the sale of pharmaceutical products to customers) and FP is not the recipient of that general property. The unrelated party customers that purchase the finished pharmaceutical product from FP are the end users (as defined in §1.250(b)–3(b)(2) and paragraph (d)(2)(ii)(A) of this section) because those customers are the unrelated party recipients of the pharmaceutical product when sold as general property. Based on the financial projections DC used to determine the sales price of the patent that FP purchased, a portion of DC's sale to FP is for a foreign use under paragraph (d)(2) of this section and such portion is a FDDEI sale. The $850x (85 percent × $1,000x) of gain derived with respect to such portion is included in DC's gross FDDEI for the taxable year.

(*4*) *Example 4: Sale of patent rights protected in the United States and other countries; use of financial projections in sale to foreign related party*—(*i*) *Facts.* The facts are the same as in paragraph (d)(2)(iv)(B)(*3*)(*i*) of this section (the facts in *Example 3*), except that FP is a foreign related party with respect to DC, and DC projected that the net present value of the revenue it would earn from selling a pharmaceutical product incorporating the API for indication A would result in 1 percent of the revenue earned from sales within the United States and 99 percent of the revenue earned from sales outside the United States. During the examination of DC's return for the taxable year, the IRS determines that DC's substantiation allocating the projected revenue from sales within the United States and outside the United States does not reflect reliable inputs to determine the net present values of revenues under section 482, but determines that the total lump sum price FP paid for DC's patent rights is an arm's length price. The IRS determines that the most reliable net present values of revenue DC would have earned from sales within the United States and outside the United States is $750x and $4250x, respectively.

(*ii*) *Analysis.* For the same reasons provided in paragraph (d)(2)(iv)(B)(*3*)(*ii*) of this section (the analysis in *Example 3*), the customers that purchase the finished pharmaceutical product from FP are the end users. Under paragraph (d)(2)(iii)(B) of this section, the reliability of the inputs DC used to determine the net present values and the net present values are determined under section 482. Based on the sales price of the patent that FP purchased and the IRS-determined net present values of revenue DC would have earned from sales within the United States and outside the United States, a portion of DC's sale to FP is for a foreign use under paragraph (d)(2) of this section and such portion is a FDDEI sale. DC is allowed to include $850x (($4250x divided by $5000x) × $1,000x) of gain in DC's gross FDDEI for the taxable year.

(*5*) *Example 5: Sale of patent of manufacturing method or process protected in the United States and other countries; foreign unrelated party*—(*i*) *Facts*. DC owns the worldwide rights to a patent covering a process for refining crude oil. DC sells to FP the right to DC's patented process for refining crude oil for a lump sum payment of $100x. DC has no basis in the patent rights. DC does not know or have reason to know that FP will use the patented process to refine crude oil within the United States or will sell or license the rights to the patent to a person to refine crude oil within the United States.

(*ii*) *Analysis*. DC's patent covering a process for refining crude oil is a manufacturing method or process as defined in paragraph (d)(2)(ii)(C)(*3*) of this section. Under paragraph (d)(2)(ii)(C)(*1*) of this section, FP is treated as the end user of the patent, and is treated as located outside the United States because FP is a foreign unrelated party and DC does not know or have reason to know that the patented process will be used in the United States. As a result, all of the sale to FP is for a foreign use under paragraph (d)(2) of this section and therefore is a FDDEI sale. The entire $100x lump sum payment is included in DC's gross FDDEI for the taxable year.

(*6*) *Example 6: License of intangible property that includes a patented manufacturing method or process protected in the United States and other countries; foreign unrelated party*—(*i*) *Facts*. DC owns worldwide rights to patents, know-how, and a trademark and tradename for product Z. The patents consist of: a patent covering the right to make, use, and sell product Z (article of manufacture), a patent covering the rights to make, use, and sell a composition of substances used in certain components of product Z (composition of matter), and a patent covering the right to use a manufacturing process consisting of a series of manufacturing steps to manufacture product Z (manufacturing method or process as defined in paragraph (d)(2)(ii)(C)(*3*) of this section) and to sell the product Z that FP manufactures using the manufacturing method or process. The know-how consists entirely of manufacturing know-how used to implement the manufacturing steps that comprise the manufacturing method or process. DC licenses the worldwide rights to the patents, know-how, and the trademark and tradename for product Z to FP in exchange for annual royalties of 60 percent of revenue from sales of product Z. FP manufactures product Z in country X and sells product Z to DC2, a domestic corporation and unrelated party to DC and FP, for resale to customers located within the United States. FP also sells product Z to FP2, a foreign unrelated party with respect to DC and FP, for resale to customers located outside the United States. During the taxable year, FP sells to DC2 $140x of product Z. Also, during the taxable year, FP sells to FP2 $60x of product Z. DC determines under the principles of section 482 that the licensed know-how and the patented manufacturing method or process comprise 10 percent of the arm's length price of the intangible property DC licenses to FP.

(*ii*) *Analysis*—(A) *End users*. Under paragraph (d)(2)(ii)(C)(*1*) of this section, FP is treated as the end user of the patent covering the right to use the manufacturing process and the manufacturing know-how used to implement the manufacturing method or process, and is treated as located outside the United States because FP is a foreign unrelated party and DC does not know or have reason to know that the patented process and know-how will be used in the United States. DC2, FP, and FP2 are not the end users of the remaining intangible property under paragraph (d)(2)(ii)(A) of this section because that intangible property is used in the sale of general property (the sale of product Z) and DC2, FP, and FP2 are not the end users of that general property. The unrelated party customers that purchase product Z from DC2 and FP2 are the end users (as defined in §1.250(b)–3(b)(2) and paragraph (d)(2)(ii)(A) of this section) because those customers are the unrelated party recipients of product Z.

(B) *Foreign use*. Under paragraph (d)(2)(ii)(A) of this section, revenue from royalties paid for the intangible property other than the manufacturing method or process is earned from end users outside the United States to the extent the sale of the general property is for a foreign use under paragraph (d)(1) of this section. FP2 is a reseller of product Z to end users outside the United States, so all sales of product Z to FP2 are for a foreign use under paragraph (d)(1)(ii)(C) of this section. Because DC has determined that 10 percent of the value of the intangible property consists of a manufacturing method or process (as defined in paragraph (d)(2)(ii)(C)(*3*) of this section) used to manufacture product Z, $12x of the $120x royalty FP pays to DC during the taxable year is for foreign use ($120x total royalty × 0.10) based on the location of FP's manufacturing utilizing the know-how or all of the sequence of actions that comprise the manufacturing method or process under paragraph (d)(2)(ii)(C)(*3*) of this section. Based on the sales of product Z within and outside the United States, $32.4x of the royalties FP pays DC for rights to the licensed intangible property during the taxable year (($60x of revenue from sales to FP2 for resale to customers located outside the United States divided by $200x total worldwide sales revenue FP receives from DC2 and FP2) × ($120x total royalties less $12 of those royalties attributable to the manufacturing method or process)) qualifies as income earned from the sale of intangible property for a foreign use under paragraph (d)(2) of this section and therefore such portion is a FDDEI sale. As a result, $44.40x of royalties ($12x + $32.40x) is included in DC's gross FDDEI for the taxable year.

(*7*) *Example 7: License of intangible property that includes a patented manufacturing method or process protected in the United States and other countries; foreign related party with third-party manufacturer*—(*i*) *Facts*. The facts are the same as in paragraph (d)(2)(iv)(B)(*6*)(*i*) of this section (the facts in *Example 6*), except that FP is a foreign related party with respect to DC and FP engages FP2, a foreign unrelated party, to manufacture product Z. FP sublicenses to FP2 the rights to the intangible property FP licenses from DC solely to manufacture product Z and sell product Z to FP. FP2 manufactures product Z in country Y and sells all of product Z it manufactures to FP. During the taxable year, FP sold $80x of product Z to DC2, which DC2 resold to customers located within the United States. Also, during the taxable year, FP sold $120x of product Z to customers located outside the United States.

(*ii*) *Analysis*—(A) *End users*. Under paragraph (d)(2)(ii)(C)(*1*) of this section, FP is not treated as the end user of the patent covering the right to use the manufacturing process and the manufacturing know-how used to implement the manufacturing method or process because FP is a foreign related party with respect to DC. Under paragraph (d)(2)(ii)(C)(*2*) of this section, FP2 is also not treated as the end user of the patent covering the right to use the manufacturing process and the manufacturing know-how used to implement the manufacturing method or process because FP2 is using that intangible property to manufacture product Z for FP. DC2 is also not treated as the end user of the patent covering the right to use the manufacturing process and the manufacturing know-how used to implement the manufacturing method or process because DC2 does not use the patent or know-how in manufacturing. DC2, FP, and FP2 are not the end users of the remaining intangible property under paragraph (d)(2)(ii)(A) of this section because that intangible property is used in the sale of general property (the sale of product Z) and DC2, FP, and FP2 are not the end users of that general property. The unrelated party customers that purchase the Product Z from DC2 and FP are the end users (as defined in §1.250(b)–3(b)(2) and paragraph (d)(2)(ii)(A) of this section) of the intangible property because those customers are the persons that ultimately use or consume product Z.

(B) *Foreign use*. Based on the sales of product Z to customers located within and outside the United States, $72x of the royalties FP pays DC for rights to the licensed intangible property during the taxable year (($120x of revenue from sales to customers located outside the United States divided by $200x total worldwide sales revenue) × $120x total royalties) qualifies as income earned from the sale of intangible property for a foreign use under paragraph (d)(2) of this section and therefore such portion is a FDDEI sale. As a result, $72x of royalties is included in DC's gross FDDEI for the taxable year.

(*8*) *Example 8: Deemed sale in exchange for contingent payments under section 367(d)*—(*i*) *Facts.* DC owns 100 percent of the stock of FP, a foreign related party with respect to DC. FP manufactures and sells product A. For the taxable year, DC contributes to FP exclusive worldwide rights to patents, trademarks, know-how, customer lists, and goodwill and going concern value (collectively, intangible property) related to product A in an exchange described in section 351. DC is required to report an annual income inclusion on its Federal income tax return based on the productivity, use, or disposition of the contributed intangible property under section 367(d). DC includes a percentage of FP's revenue in its gross income under section 367(d) each year. In the current taxable year, FP earns $1,000x of revenue from sales of product A. Based on reliable sales records kept by FP for the taxable year, $300x of FP's revenue is earned from sales of product A to customers within the United States, and $700x of its revenue is earned from sales of product A to customers outside the United States.

(*ii*) *Analysis.* DC's deemed sale of the intangible property to FP in exchange for payments contingent upon the productivity, use, or disposition of the intangible property related to product A under section 367(d) is a sale for purposes of section 250 and this section. See §1.250(b)–3(b)(16). Based on FP's sales records for the taxable year, 70 percent of DC's deemed sale to FP is for a foreign use, and 70 percent of DC's income inclusion under section 367(d) derived with respect to such portion is included in DC's gross FDDEI for the taxable year.

(*9*) *Example 9: License of intangible property followed by a sale of general property in which the intangible property is embedded; unrelated parties*—(*i*) *Facts.* DC owns the worldwide rights to a patent on a silicon chip used in computers, tablets, and smartphones. The patent does not qualify as a manufacturing method or process (as defined in paragraph (d)(2)(ii)(C)(*3*) of this section). DC licenses the worldwide rights to the patent to FP in exchange for annual royalties of 30 percent of revenue from sales of the silicon chips. During the taxable year, FP manufactures silicon chips protected by the patent and sells all of those chips to FP2 for $1,000x. FP2 also purchases similar silicon chips from other suppliers. FP2 uses the silicon chips in computers, tablets, smartphones, and motherboards that FP2 manufactures in country X and sells to its customers located within the United States and foreign countries. For purposes of this example, FP2's manufacturing qualifies as subjecting the silicon chips to manufacture, assembly, or other processing outside the United States as provided in paragraph (d)(1)(iii) of this section.

(*ii*) *Analysis.* FP is not the end user or treated as an end user (as defined in §1.250(b)–3(b)(2) and paragraph (d)(2)(ii)(A) of this section) because FP is not the unrelated party recipient of the general property in which the patent is embedded, and the patent does not qualify as a manufacturing method or process. Under paragraph (d)(2)(ii)(A) of this section, revenue from royalties paid for the patent is earned from end users outside the United States to the extent the sale of the general property is for a foreign use under paragraph (d)(1) of this section. Because FP2 is subjecting the silicon chips to manufacture, assembly, or other processing outside the United States, the revenue from royalties FP pays to DC qualifies for foreign use based on the location of FP2's manufacturing and qualifies as a FDDEI sale. As a result, the entire $300x of annual royalties paid by FP to DC during the taxable year is included in DC's gross FDDEI for the taxable year.

(*10*) *Example 10: License of intangible property followed by a sale of general property in which the intangible property is embedded; related parties*—(*i*) *Facts.* The facts are the same as in paragraph (d)(2)(iv)(B)(*9*)(*i*) of this section (the facts in *Example 9*), except that FP and FP2 are foreign related parties with respect to DC. FP2 sells and ships computers, tablets, and smartphones it manufactures with the silicon chips it purchases from FP to unrelated party wholesalers located within and outside the United States. The wholesalers within the United States only sell to retailers located within the United States and the wholesalers outside the United States only sell to retailers located outside the United States. The retailers within the United States only sell to customers located within the United States and the retailers located outside the United States only sell to customers located outside the United States. FP2 earns $15,000x of revenue from sales to unrelated party wholesalers located outside the United States and $10,000x of revenue from sales to unrelated party wholesalers located within the United States. FP2 also sells and ships motherboards with the silicon chips it purchases from FP to unrelated party manufacturers located outside the United States. FP2 does not sell motherboards with the silicon chips it purchases from FP to unrelated party manufacturers located within the United States. FP2 earns $5,000x of revenue from the sales of these motherboards to manufacturers located outside the United States. For purposes of this example, these manufacturers subject the motherboards to manufacture, assembly, or other processing outside the United States as provided in paragraph (d)(1)(iii) of this section.

(*ii*) *Analysis.* FP is not the end user or treated as an end user (as defined in §1.250(b)–3(b)(2) and paragraph (d)(2)(ii)(A) of this section) of the intangible property because FP is not the end user of the general property in which the patent is embedded (the silicon chips). FP2 is also not the end user (as defined in §1.250(b)–3(b)(2) and paragraph (d)(2)(ii)(A) of this section) of the intangible property because FP2 is not the end user of the silicon chips. Under paragraph (d)(2)(ii)(A) of this section, the customers of the retailers that purchase from the unrelated party wholesalers are the end users. Because the wholesalers located outside the United States only sell to retailers located outside the United States that sell to end users located outside the United States, the location of the wholesalers is a reliable basis for determining the location of the end users. Revenue from royalties paid for the patent is earned from end users outside the United States to the extent the sale of the general property is for a foreign use under paragraph (d)(1) of this section. A portion of the sales to the unrelated party wholesalers qualify as foreign use under paragraph (d)(1) of this section and the sales to the unrelated party manufacturers qualify as foreign use under paragraph (d)(1)(iii) of this section. Accordingly, revenue from royalties FP pays to DC is from a FDDEI sale to the extent of such sales to the unrelated party manufacturers and such portion of sales to unrelated party wholesalers that qualify for foreign use. As a result, $200x of annual royalties paid by FP to DC during the taxable year ((($15,000x of sales to wholesalers located outside the United States plus $5,000x of sales to manufacturers located outside the United States) divided by $30,000x total sales) × $300x) is included in DC's gross FDDEI for the taxable year.

(*11*) *Example 11: License of intangible property followed by a sale of general property that incorporates the intangible property; unrelated parties with manufacturing within the United States*—(*i*) *Facts.* The facts are the same as in paragraph (d)(2)(iv)(B)(*9*)(*i*) of this section (the facts in *Example 9*), except that FP2 manufactures its computers, tablets, smartphones, and motherboards in the United States.

(*ii*) *Analysis.* FP is not the end user or treated as an end user (as defined in §1.250(b)–3(b)(2) and paragraph (d)(2)(ii)(A) of this section) because FP is not the unrelated party recipient of the general property in which the patent is embedded (the silicon chips) and the patent does not qualify as a manufacturing method or process. Under paragraph (d)(2)(ii)(A) of this section, revenue from royalties paid for the patent is earned from end users outside the United States to the extent the sale of the general property is for a foreign use under paragraph (d)(1) of this section. Because FP2 is subjecting the silicon chips to manufacture, assembly, or other processing within the United States, the revenue from royalties FP pays to DC does not qualify as foreign use based on the location of FP2's manufacturing and therefore does not qualify as a FDDEI sale. As a result, none of the $300x of annual royalties paid by FP to DC during the taxable year is included in DC's gross FDDEI for the taxable year.

(*12*) *Example 12: License of intangible property used to provide a service*—(*i*) *Facts*. DC licenses to FP worldwide rights to the copyrights on movies in exchange for an annual royalty of $100x. FP also licenses copyrights on movies from persons other than DC. FP provides a streaming service that meets the definition of an electronically supplied service in §1.250(b)–5(c)(5) to its customers within the United States and foreign countries. FP's streaming service provides its customers a catalog of movies to choose to stream. These movies include the copyrighted movies FP licenses from DC. FP does not provide DC with data showing how much revenue FP earned from streaming services during the taxable year, even after DC requests that FP provide it with such information. DC also is unable to determine how much revenue FP earned from streaming services to customers within the United States from the data it has with respect to FP and publicly available data with respect to FP. However, DC's economic analysis of the revenue DC expected it could earn annually from use of the copyrights as part of determining the annual payments DC would receive from FP from the license of the copyrights supports a determination that $10,000x of revenue would be earned during the taxable year from customers worldwide, and that 40 percent of that revenue would be earned from customers located outside the United States. During an examination of DC's return for the taxable year, DC provides the IRS with data explaining the economic analysis, inputs, and results from its valuation of the copyrights used in determining the amount of annual payments agreed to by DC and FP.

(*ii*) *Analysis*. Under paragraph (d)(2)(ii)(B) of this section, FP's customers are the end users of the copyrights FP licenses from DC because FP uses those copyrights to provide the general service to FP's customers. Under paragraph (d)(2)(ii)(B) of this section, revenue from royalties paid for the copyrights is earned from end users outside the United States to the extent the service qualifies as a FDDEI service under §1.250(b)–5. DC is allowed to use reliable economic analysis to estimate revenue earned by FP from streaming the licensed movies under paragraph (d)(2)(iii)(A) of this section because DC was unable to obtain actual revenue earned by FP from use of the copyrights during the taxable year after reasonable efforts to obtain the actual revenue data. Based on DC's reliable economic analysis, $40x of the annual royalty payment to DC ($0.40 \times$ $100x total annual royalty payment) is included in DC's gross FDDEI for the taxable year.

(*13*) *Example 13: License of intangible property used in research and development of other intangible property*— (*i*) *Facts*. DC owns a patent (''patent A'') for an active pharmaceutical ingredient (''API'') approved for treatment of disease A in the United States and in foreign countries. DC licenses to FP worldwide rights to patent A for an annual royalty of $100x. FP uses patent A in research and development of a new API for treatment of disease B. Patent A does not consist of a manufacturing method or process (as defined in paragraph (d)(2)(ii)(C)(*3*) of this section). FP's research and development is successful, resulting in FP obtaining both a patent for the new API for treatment of disease B and approval for use in the United States and foreign countries. FP does not earn any revenue from sales of finished pharmaceutical products containing the API during years 1 through 4 of the license of patent A. In year 5 of the license of patent A, FP earns $800x of revenue from sales of finished pharmaceutical products containing the API to customers located within the United States and $200x of revenue from sales to customers located in foreign countries.

(*ii*) *Analysis*. FP is not the end user (as defined in §1.250(b)–3(b)(2) and paragraph (d)(2)(ii)(D) of this section) of patent A because FP is not the end user described in paragraph (d)(2)(ii)(A) of this section of the product in which the API that was developed from patent A is embedded. The unrelated party customers that purchase the finished pharmaceutical product from FP are the end users (as defined in § 1.250(b)–3(b)(2) and paragraph (d)(2)(ii)(D) of this section) because those customers are the end users described in paragraph (d)(2)(ii)(A) of this section of the pharmaceutical product in which the newly developed patent is embedded. During the taxable years that include years 1 through 4 of the license of patent A, FP earns no revenue from sales of the API to a foreign person for a foreign use. Under paragraph (d)(2)(ii)(D) of this section, none of the $100x annual royalty payments to DC for each of the tax years that include years 1 through 4 of the license of patent A is included in DC's gross FDDEI. Based on FP's sales of the API during the tax year that includes year 5 of the license of patent A, $20x of the annual royalty payment to DC ($200x of revenue from sales of API to customers located outside the United States divided by $1,000x total worldwide revenue earned from sales of the API) × $100x annual royalty) is included in DC's gross FDDEI for the taxable year.

(3) *Foreign use substantiation for certain sales of property*—(i) *In general*. Except as provided in § 1.250(b)–3(f)(3) (relating to certain loss transactions), a sale of property described in paragraphs (d)(1)(ii)(C) of this section (foreign use for sale of general property for resale), (d)(1)(iii) of this section (foreign use for sale of general property subject to manufacturing, assembly, or processing outside the United States), or (d)(2) of this section (foreign use for sale of intangible property) is a FDDEI transaction only if the taxpayer satisfies the substantiation requirements described in paragraphs (d)(3)(ii), (iii), or (iv) of this section, as applicable.

(ii) *Substantiation of foreign use for resale*. A seller satisfies the substantiation requirements with respect to a sale of property described in paragraph (d)(1)(ii)(C) of this section (sales of general property for resale) only if the seller maintains one or more of the following items—

(A) A binding contract that specifically limits subsequent sales to sales outside the United States;

(B) Proof that property is specifically designed, labeled, or adapted for a foreign market;

(C) Proof that the cost of shipping the property back to the United States relative to the value of the property makes it impractical that the property will be resold in the United States;

(D) Credible evidence obtained or created in the ordinary course of business from the recipient evidencing that property will be sold to an end user outside the United States (or, in the case of sales of fungible mass property, stating what portion of the property will be sold to end users outside the United States); or

(E) A written statement prepared by the seller containing the information described in paragraphs (d)(3)(ii)(E)(*1*) through (*7*) of this section corroborated by evidence that is credible and sufficient to support the information provided.

(*1*) The name and address of the recipient;

(*2*) The date or dates the property was shipped or delivered to the recipient;

(*3*) The amount of gross income from the sale;

(*4*) A full description of the property subject to resale;

(*5*) A description of the method of sales to the end users, such as direct sales by the recipient or sales by the recipient to retail stores;

(*6*) If known, a description of the end users; and

(*7*) A description of how the seller determined that property will be ultimately sold to an end user outside the United States (or, in the case of sales of fungible mass property, of how the taxpayer determined what portion of the property that will ultimately be sold to end users outside the United States).

(iii) *Substantiation of foreign use for manufacturing, assembly, or other processing outside the United States*. A seller satisfies the substantiation requirements with respect to a sale of property described in paragraph (d)(1)(iii) of this section (sales of general property subject to manufacturing, assembly, or other processing outside the United States) if the seller maintains one or more of the following items—

(A) Credible evidence that the property has been sold to a foreign unrelated party that is a manufacturer and such property generally cannot be sold to end users without being subject to a physical and material change (for example, the sale of raw materials that cannot be used except in a manufacturing process);

(B) Credible evidence obtained or created in the ordinary course of business from the recipient to support that the product purchased will be subject to manufacture, assembly, or other processing outside the United States within the meaning of paragraph (d)(1)(iii) of this section; or

(C) A written statement prepared by the seller containing the information described in paragraphs (d)(3)(iii)(C)(*1*) through (*7*) of this section corroborated by evidence that is credible and sufficient to support the information provided.

(*1*) The name and address of the manufacturer of the property;

(*2*) The date or dates the property was shipped or delivered to the recipient;

(*3*) The amount of gross income from the sale;

(*4*) A full description of the general property sold and the type or types of finished goods that will incorporate the general property the taxpayer sold;

(*5*) A description of the manufacturing, assembly, or other processing operations, including the location or locations of manufacture, assembly, or other processing; how the general property will be used in the finished good; and the nature of the finished good's manufacturing, assembly, or other processing operations as compared to the process used to make the general property used to make the finished good;

(*6*) A description of how the seller determined the general property was substantially transformed or the activities were substantial in nature within the meaning of paragraph (d)(1)(iii)(B) or (C) of this section, whichever the case may be; and,

(*7*) If the seller is relying on the rule described in paragraph (d)(1)(iii)(C) of this section (that the fair market value of the general property be no more than twenty percent of the fair market value when incorporated into the finished goods sold to end users), an explanation of how the seller satisfies the requirements in that paragraph.

(iv) *Substantiation of foreign use of intangible property.* A taxpayer satisfies the substantiation requirements with respect to a sale of property described in paragraph (d)(2) of this section (foreign use for intangible property) if the seller maintains one or more of the following items—

(A) A binding contract that specifically provides that the intangible property can be exploited solely outside the United States;

(B) Credible evidence obtained or created in the ordinary course of business from the recipient establishing the portion of its revenue for a taxable year that was derived from exploiting the intangible property outside the United States; or

(C) A written statement prepared by the seller containing the information described in paragraphs (d)(3)(iv)(C)(*1*) through (*9*) of this section corroborated by evidence that is credible and sufficient to support the information provided.

(*1*) The name and address of the recipient;

(*2*) The date of the sale;

(*3*) The amount of gross income from the sale;

(*4*) A description of the intangible property;

(*5*) An explanation of how the intangible property will be used by the recipient (embedded in general property, used to provide a service, used as a manufacturing method or process, or used in research and development);

(*6*) An explanation of how the seller determined what portion of the sale is a FDDEI sale;

(*7*) If the intangible property consists of a manufacturing method or process, an explanation of how the elements of paragraph (d)(2)(ii)(C) of this section are satisfied;

(*8*) If the sale is for periodic payments, an explanation of how the seller determined the extent of foreign use based on the actual revenue earned by the recipient from the use of the intangible property for the taxable year in which a periodic payment is received as required by paragraph (d)(2)(iii)(A) of this section, or, if actual revenue cannot be obtained after reasonable efforts, an explanation of why actual revenue is unavailable and how the seller determined the extent of foreign use based on estimated revenue; and

(*9*) If the sale is for a lump sum, an explanation of how the seller determined the total net present value of revenue it expected to earn from the exploitation of the intangible property outside the United States and the total net present value of revenue it expected to earn from the exploitation of the intangible property as required by paragraph (d)(2)(iii)(B) of this section.

(v) *Examples.* The following examples illustrate the application of this paragraph (d)(3).

(A) *Assumed facts.* The following facts are assumed for purposes of the examples—

(*1*) DC is a domestic corporation.

(*2*) FP is a foreign person located within Country A that is a foreign unrelated party with respect to DC.

(*3*) All of DC's income is DEI.

(*4*) Except as otherwise provided, the substantive rule for foreign use as described in paragraphs (d)(1) and (2) of this section are satisfied.

(B) *Examples*—

(*1*) *Example 1: Substantiation by seller of sale of products to distributor outside the United States with taxpayer statement and corroborating evidence*—(*i*) *Facts.* DC sells smartphones to FP, a distributor of electronics that sells property to end users. As part of their regular business process and pursuant to DC's terms and conditions of sales, DC issues commercial invoices to FP that contain a condition that any subsequent sales must be to end users outside the United States. At or near the time of the FDII filing date, DC prepares a statement containing the information required in paragraph (d)(3)(ii)(E) of this section. During an examination of DC's return for the taxable year, the IRS requests substantiation information of foreign use. DC submits the commercial invoices issued to FP as supporting information that FP's customers are end users outside the United States and all other corroborating evidence to the IRS.

(*ii*) *Analysis.* DC's sale to FP is a sale of general property for resale subject to the substantiation requirements of paragraph (d)(3)(ii) of this section. DC satisfies the substantiation requirement by providing the statement that satisfies the requirements of paragraph (d)(3)(ii)(E) of this section. The commercial invoices issued pursuant to the terms and conditions of sales sufficiently corroborate DC's statement that the smartphones will ultimately be sold to end users outside of the United States.

(*2*) *Example 2: Substantiation of sale of products to distributor outside the United States with recipient provided information*—(*i*) *Facts.* DC sells cameras to FP, a distributor of electronics that sells property to end users outside the United States. FP issues sales invoices to its end users. The invoices contain detailed information about the nature of the subsequent sales of the cameras and the location of the end users for value added tax (VAT) purposes. DC is able to obtain copies of FP's VAT invoices with respect to the camera sales that were maintained and submitted pursuant to Country A law. Rather than prepare a statement described in paragraph (d)(3)(ii)(E) of this section, DC submits FP's invoices to the IRS as substantiation of foreign use.

(*ii*) *Analysis.* DC's sale to FP is a sale of general property for resale subject to the substantiation requirements of paragraph (d)(3)(ii) of this section. DC satisfies the substantiation requirements by providing the invoices that satisfy the requirements of paragraph (d)(3)(ii)(D) of this section. The VAT invoices issued by FP pursuant to Country A law constitute credible evidence from FP that ultimate sales are to end users located outside the United States.

(e) *Sales of interests in a disregarded entity.* Under Federal income tax principles, the sale of any interest in an entity that is disregarded for Federal income tax purposes is considered the sale of the assets of that entity, and this section applies to the sale of each such asset that is general property or intangible property for purposes of determining whether such sale qualifies as a FDDEI sale.

(f) *FDDEI sales hedging transactions*—(1) *In general.* The amount of a corporation's or partnership's gross FDDEI from FDDEI sales of general property in a taxable year is increased by any gain, or decreased by any loss, taken into account in that taxable year with respect to any FDDEI sales hedging transactions (determined by taking into account the applicable Federal income tax accounting rules, including § 1.446–4).

(2) *FDDEI sales hedging transaction*—The term *FDDEI sales hedging transaction* means a transaction that meets the requirements of § 1.1221–2(a) through (e) and that is identified in accordance with the requirements of § 1.1221–2(f), except that the transaction must manage risk of price changes or currency fluctuations with respect to ordinary property, as provided in § 1.1221–2(b)(1), and the ordinary property whose price risk is being hedged must be general property that is sold in a FDDEI sale.

[T.D. 9901, 85 FR 43080, July 15, 2020, as amended by 85 FR 60910, Sept. 29, 2020; 85 FR 68249, Oct. 28, 2020]

§ 1.250(b)–5 Foreign-derived deduction eligible income (FDDEI) services.

(a) *Scope.* This section provides rules for determining whether a provision of a service is a FDDEI service. Paragraph (b) of this section defines a FDDEI service. Paragraph (c) of this section provides definitions relevant for determining whether a provision of a service is a FDDEI service. Paragraph (d) of this section provides rules for determining whether a general service is provided to a consumer located outside the United States. Paragraph (e) of this section provides rules for determining whether a general service is provided to a business recipient located outside the United States. Paragraph (f) of this section provides rules for determining whether a proximate service is provided to a recipient located outside the United States. Paragraph (g) of this section provides rules for determining whether a service is provided with respect to property located outside the United States. Paragraph (h) of this section provides rules for determining whether a transportation service is provided to a recipient, or with respect to property, located outside the United States.

(b) *Definition of FDDEI service.* Except as provided in § 1.250(b)–6(d), the term *FDDEI service* means a provision of a service described in any one of paragraphs (b)(1) through (5) of this section. If only a portion of a service is treated as provided to a person, or with respect to property, outside the United States, the provision of the service is a FDDEI service only to the extent of the gross income derived with respect to such portion.

(1) The provision of a general service to a consumer located outside the United States (as determined under paragraph (d) of this section).

(2) The provision of a general service to a business recipient located outside the United States (as determined under paragraph (e) of this section).

(3) The provision of a proximate service to a recipient located outside the United States (as determined under paragraph (f) of this section).

(4) The provision of a property service with respect to tangible property located outside the United States (as determined under paragraph (g) of this section).

(5) The provision of a transportation service to a recipient, or with respect to property, located outside the United States (as determined under paragraph (h) of this section).

(c) *Definitions.* This paragraph (c) provides definitions that apply for purposes of this section and § 1.250(b)–6.

(1) *Advertising service.* The term *advertising service* means a general service that consists primarily of transmitting or displaying content (including via the internet) with a purpose to generate revenue based on the promotion of a product or service.

(2) *Benefit.* The term *benefit* has the meaning set forth in § 1.482–9(l)(3).

(3) *Business recipient.* The term *business recipient* means a recipient other than a consumer and includes all related parties of the recipient. However, if the recipient is a related party of the taxpayer, the term does not include the taxpayer.

(4) *Consumer.* The term *consumer* means a recipient that is an individual that purchases a general service for personal use.

(5) *Electronically supplied service.* The term *electronically supplied service* means, with respect to a general service other than an advertising service, a service that is delivered primarily over the internet or an electronic network and for which value of the service to the end user is derived primarily from automation or electronic delivery. Electronically supplied services include the provision of access to digital content (as defined in §1.250(b)–3), such as streaming content; on-demand network access to computing resources, such as networks, servers, storage, and software; the provision or support of a business or personal presence on a network, such as a website or a web page; online intermediation platform services; services automatically generated from a computer via the internet or other network in response to data input by the recipient; and similar services. Electronically supplied services do not include services that primarily involve the application of human effort by the renderer (not considering the human effort involved in the development or maintenance of the technology enabling the electronically supplied services). Accordingly, electronically supplied services do not include certain services (such as legal, accounting, medical, or teaching services) involving primarily human effort that are provided electronically.

(6) *General service.* The term *general service* means any service other than a property service, proximate service, or transportation service. The term *general service* includes advertising services and electronically supplied services.

(7) *Property service.* The term *property service* means a service, other than a transportation service, provided with respect to tangible property, but only if substantially all of the service is performed at the location of the property and results in physical manipulation of the property such as through manufacturing, assembly, maintenance, or repair. Substantially all of a service is performed at the location of property only if the renderer spends more than 80 percent of the time providing the service at or near the location of the property.

(8) *Proximate service.* The term *proximate service* means a service, other than a property service or a transportation service, provided to a consumer or business recipient, but only if substantially all of the service is performed in the physical presence of the consumer or, in the case of a business recipient, substantially all of the service is performed in the physical presence of persons working for the business recipient such as employees, contractors, or agents. Substantially all of a service is performed in the physical presence of a consumer or persons working for a business recipient only if the renderer spends more than 80 percent of the time providing the service in the physical presence of such persons.

(9) *Transportation service.* The term *transportation service* means a service to transport a person or property using aircraft, railroad rolling stock, vessel, motor vehicle, or any other mode of transportation. Transportation services include freight forwarding and similar services.

(d) *General services provided to consumers*—(1) *In general.* A general service is provided to a consumer located outside the United States if the consumer of a general service resides outside of the United States when the service is provided. Except as provided in paragraph (d)(2) of this section, if the renderer does not have or cannot after reasonable efforts obtain the consumer's location of residence when the service is provided, the consumer of a general service is treated as residing at the location of the consumer's billing address. However, the rule in the preceding sentence allowing for the use of a consumer's billing address does not apply if the renderer knows or has reason to know that the consumer does not reside outside the United States. A renderer has reason to know that the consumer does not reside outside the United States if the information received as part of the provision of the service indicates that the consumer resides in the United States and the renderer fails to obtain evidence establishing that the consumer resides outside the United States.

(2) *Electronically supplied services.* The consumer of an electronically supplied service is deemed to reside at the location of the device used to receive the service. Such location may be determined based on the location of the IP address when the electronically supplied service is provided. However, if the renderer does not have or cannot after reasonable efforts obtain the consumer's device location, then the location of the device is treated as being outside the United States if the renderer's billing address for the consumer is outside of the United States, subject to the knowledge and reason to know standards described in paragraph (d)(1) of this section.

(3) *Example.* The following example illustrates the application of paragraph (d) of this section.

(i) *Facts.* DC, a domestic corporation, provides a streaming movie service on its website. The terms of the service allow consumers to watch movies over the internet. The terms of the service permit the consumer to view the movies for personal use, but convey no ownership of movies to the consumers.

(ii) *Analysis.* The streaming service is a FDDEI service under paragraph (d)(1) of this section to the extent that the service is provided to consumers that reside outside the United States. The service that DC provides is a general service, provided to consumers that is an electronically supplied service under paragraph (c)(5) of this section. Therefore, the consumers are deemed to reside at the location of the devices used to receive the service under paragraph (d)(2) of this section. However, if the renderer cannot reasonably obtain the consumers' device location (such as IP addresses), the device location is treated as being outside the United States if their billing addresses are outside the United States. See §1.250(b)–4(d)(1)(v)(B)(*7*) for an example of digital content provided to consumers as a sale rather than a service.

(e) *General services provided to business recipients*—(1) *In general.* A general service is provided to a business recipient located outside the United States to the extent that the service confers a benefit on the business recipient's operations outside the United States under the rules in paragraph (e)(2) of this section. The location of residence, incorporation, or formation of a business recipient is not relevant to determining the location of the business recipient's operations that benefit from a general service.

(2) *Determination of business operations that benefit from the service*—(i) *In general.* Except as otherwise provided in paragraph (e)(2)(ii) and (iii) of this section, the determination of which operations of the business recipient located outside the United States benefit from a general service, and the extent to which such operations benefit, is made under the principles of §1.482–9 by treating the taxpayer as one controlled taxpayer, the portions of the business recipient's operations within the United States (if any) that may benefit from the general service as one or more controlled taxpayers, and the portions of the business recipient's operations outside the United States (if any) that may benefit from the general service, each as one or more controlled taxpayers. The extent to which a business recipient's operations within or outside of the United States are treated as one or more separate controlled taxpayers is determined under any reasonable method (for example, separate controlled taxpayers may be determined on a per entity or per country basis, or by aggregating all of the business recipient's operations outside the United States as one controlled taxpayer). The determination of the amount of the benefit conferred on the business recipient's operations that are treated as controlled taxpayers is determined under a reasonable method consistent with the principles of §1.482–9(k), treating the renderer's gross income from the services provided to the business recipient as if it were a ''cost'' as that term is used in §1.482–9(k). Reasonable methods may include, for example, allocations based on time spent or costs incurred by the renderer or sales, profits, or assets of the business recipient. The determination is made when the service is provided based on information obtained from the business recipient or on the renderer's own records (such as time spent working with the business recipient's offices located outside the United States).

(ii) *Advertising services.* With respect to advertising services, the operations of the business recipient that benefit from the advertising service provided by the renderer are deemed to be located where the advertisements are viewed by individuals. If advertising services are displayed via the internet, the advertising services are viewed at the location of the device on which the advertisements are viewed. For this purpose, the IP address may be used to establish the location of a device on which an advertisement is viewed.

(iii) *Electronically supplied services.* With respect to an electronically supplied service, the operations of the business recipient that benefit from that service provided by the renderer are deemed to be located where the business recipient (including employees, contractors, or agents) accesses or otherwise uses the service. If it cannot be determined whether the location is within or outside the United States (such as where the location of access cannot be reliably determined using the location of the IP address of the device used to receive the service), and the gross receipts from all services with respect to the business recipient are in the aggregate less than $50,000 for the renderer's taxable year, the operations of the business recipient that benefit from the service provided by the renderer are deemed to be located at the recipient's billing address; otherwise, the operations of the business recipient that benefit are deemed to be located in the United States. If the renderer provides a service that is partially an electronically supplied service and partially a general service that is not an electronically supplied service (such as a service that is performed partially online and partially by mail or in person), the location of the business recipient is determined using the rule for electronically supplied services in this paragraph (e)(2)(iii) if the primary purpose of the service is to provide electronically supplied services; otherwise, the rule for general services described in paragraph (e)(2)(i) of this section applies.

(3) *Identification of business recipient's operations*—(i) *In general.* For purposes of this paragraph (e), except with respect to advertising services and electronically supplied services, a business recipient is treated as having operations where it maintains an office or other fixed place of business. In general, an office or other fixed place of business is a fixed facility, that is, a place, site, structure, or other similar facility, through which the business recipient engages in a trade or business. For purposes of making the determination in this paragraph (e)(3)(i), the renderer may make reliable assumptions based on the information available to it.

(ii) *Advertising services and electronically supplied services.* The location of a business recipient that receives advertising services or electronically supplied services will be determined under the rules of paragraph (e)(2)(ii) and (iii) of this section, respectively, even if the business recipient does not maintain an office or other fixed place of business in the locations where the advertisements are viewed (in the case of advertising services) or where the general service is accessed (in the case of electronically supplied services).

(iii) *No office or fixed place of business.* In the case of general services other than advertising services and other than electronically supplied services, if the business recipient does not have an identifiable office or fixed place of business (including the office of a principal manager or managing owner), the business recipient is deemed to be located at its primary billing address.

(4) *Substantiation of the location of a business recipient's operations outside the United States.* Except as provided in §1.250(b)–3(f)(3) (relating to certain loss transactions), a general service provided to a business recipient is treated as a FDDEI service only if the renderer substantiates its determination of the extent to which the service benefits a business recipient's operations outside the United States. A renderer satisfies the preceding sentence if the renderer maintains one or more of the following items—

(i) Credible evidence obtained or created in the ordinary course of business from the business recipient establishing the extent to which operations of the business recipient outside the United States benefit from the service; or

(ii) A written statement prepared by the renderer containing the information described in paragraphs (e)(4)(ii)(A) through (F) of this section corroborated by evidence that is credible and sufficient to support the information provided.

(A) The name of the business recipient;

(B) The date or dates of the service;

(C) The amount of gross income from the service;

(D) A full description of the service;

(E) A description of how the service will benefit the business recipient; and

(F) An explanation of how the renderer determined what portion of the service will benefit the business recipient's operations located outside the United States.

(5) *Examples*. The following examples illustrate the application of this paragraph (e).

(i) *Assumed facts*. The following facts are assumed for purposes of the examples—

(A) DC is a domestic corporation.

(B) A and R are not related parties of DC.

(C) Except as otherwise provided, the substantiation requirements described in paragraph (e)(4) of this section are satisfied.

(ii) *Examples—*

(A) *Example 1: Determination of business operations that benefit from the service—*(*1*) *Facts*. For the taxable year, DC provides a consulting service to R, a company that operates restaurants within and outside of the United States, in exchange for $150x. Fifty percent of the sales earned by R and its related parties are from customers located outside of the United States. However, the consulting service that DC provides relates specifically to a single chain of fast food restaurants that R operates. Sales information that R provides to DC indicates that 70 percent of the sales of the fast food restaurant chain are from locations within the United States and 30 percent of the sales are from Country X. DC determines that the use of sales is a reasonable method under the principles of §1.482–9(k) to allocate the benefit of the consulting service among R's fast food operations.

(*2*) *Analysis*. Under paragraph (e)(1) of this section, DC's service is provided to a person located outside the United States to the extent that DC's service confers a benefit to R's operations outside the United States. Under paragraph (e)(2)(i) of this section, DC, R's fast food operations within the United States, and R's fast food operations in Country X, are treated as if they were controlled taxpayers because only these operations may benefit from DC's service. The principles of §1.482–9(k) apply to determine the amount of DC's service that benefits R's operations outside the United States. DC's gross income is allocated based on the sales of the fast food chain of restaurants that benefits from DC's service because using sales is a reasonable method. Therefore, 30 percent of the provision of the consulting service is treated as the provision of a service to a person located outside the United States and a FDDEI service under paragraph (b)(2) of this section. Accordingly, $45x ($150x × 0.30) of DC's gross income from the provision of the consulting service is included in DC's gross FDDEI for the taxable year.

(B) *Example 2: Determination of business operations that benefit from the service; alternative facts—*(*1*) *Facts*. The facts are the same as in paragraph (e)(5)(ii)(A)(*1*) of this section (the facts in *Example 1*), except that DC provides an information technology service to R that benefits R's entire business. DC determines that the use of sales is a reasonable method under the principles of §1.482–9(k) to allocate the benefit of the information technology service among R's entire business.

(*2*) *Analysis*. DC, R's operations within the United States, and R's operations in Country X, are treated as if they were controlled taxpayers because the service that DC provides relates to R's entire business. DC's gross income is allocated based on sales of the entire business because using sales is a reasonable method to determine the amount of DC's service that benefits R's operations outside the United States under the principles of §1.482–9(k). Therefore, 50 percent of the provision of the information technology service is treated as a service to a person located outside the United States and a FDDEI service under paragraph (b)(2) of this section. Accordingly, \$75x (\$150x × 0.50) of DC's gross income from the provision of the information technology service is included in DC's gross FDDEI for the taxable year.

(C) *Example 3: Advertising services*—(*1*) *Facts*. The facts are the same as in paragraph (e)(5)(ii)(A)(*1*) of this section (the facts in *Example 1*), except that DC provides an advertising service to R. DC displays advertisements for R's restaurant chain on its social media website and smartphone application. Based on the IP addresses of the devices on which the advertisements are viewed, 20 percent of the views of the advertisements were from devices located outside the United States.

(*2*) *Analysis*. Because the service that DC provides is an advertising service, under paragraph (e)(2)(i) of this section, as modified by paragraph (e)(2)(ii) of this section, R's operations that benefit from DC's advertising service are deemed to be where the advertisements are viewed. Therefore, 20 percent of the provision of the advertising service is treated as a service to a person located outside the United States and a FDDEI service under paragraph (b)(2) of this section. Accordingly, \$30x (\$150x × 0.20) of DC's gross income from the provision of the advertising service is included in DC's gross FDDEI for the taxable year.

(D) *Example 4: No reliable information about which operations benefit from the service or publicly available information*—(*1*) *Facts*. For the taxable year, DC provides a consulting service to R, a business-facing company that does not advertise its business. All of DC's interaction with R is through R's employees that report to an office in the United States. Statements made by R's employees indicate that the service will benefit R's business operations located within and outside the United States, but do not provide information that would allow DC to reliably determine the extent to which its service will confer a benefit on R's business operations located outside the United States.

(*2*) *Analysis*. DC is unable to determine the extent to which its service will confer a benefit on R's business operations located outside the United States under paragraph (e)(2)(i) of this section. Accordingly, DC cannot substantiate a determination of the extent to which the service benefits a business recipient's operations outside the United States under paragraph (e)(4) of this section. Therefore, no portion of DC's service is a FDDEI service.

(E) *Example 5: Electronically supplied services that are accessed by the business recipient's employees*—(*1*) *Facts*. DC provides payroll services for R. As part of this service, DC maintains a website through which R can enter payroll information for its employees and through which R's employees can enter and change their personal information. DC also causes R's employees' paychecks to be directly deposited into their bank accounts and pays R's employment taxes on R's behalf. The primary purpose of the service is to pay R's employees. R has 100 user accounts that access DC's website. Sixty of the user accounts that access DC's website access the website from devices that are located outside the United States and forty of the user accounts access the website from devices that are located inside the United States.

(*2*) *Analysis*. Under paragraph (e)(1) of this section, DC's service is provided to a person located outside the United States to the extent that DC's service confers a benefit to R's operations outside the United States. The service that DC provides to R is an electronically supplied service under paragraph (c)(5) of this section. Accordingly, under paragraph (e)(2)(i) of this section, as modified by paragraph (e)(2)(iii) of this section, R's operations that benefit from DC's services are deemed to be located where R accesses the service, which is where R's employees access the website. See paragraph (e)(2)(iii) of this section. Accordingly, the portion of the payroll service that is treated as a service to a person located outside the United States and a FDDEI service under paragraph (b)(2) of this section is determined based on the extent to which the locations where R accesses the website are located outside the United States. Because 60 percent (60/100) of user accounts access DC's website from locations outside the United States, 60 percent of the provision of the payroll service is treated as a service to a person located outside the United States and a FDDEI service under paragraph (b)(2) of this section.

(F) *Example 6: Electronically supplied services that are accessed by the business recipient's customers*— (*1*) *Facts*. DC maintains an inventory management website for R, a company that sells consumer goods online. R's offices and all of its employees, who use the website, are located in the United States, but R sells its products to customers both within and outside the United States.

(*2*) *Analysis*. Under paragraph (e)(1) of this section, DC's service is provided to a person located outside the United States to the extent that DC's service confers a benefit to R's operations outside the United States. The service that DC provides to R is an electronically supplied service under paragraph (c)(5) of this section. Accordingly, under paragraph (e)(2)(i) of this section, as modified by paragraph (e)(2)(iii) of this section, R's operations that benefit from DC's services are deemed to be located where the service is accessed by employees. Therefore, none of the provision of the inventory management website is treated as a service to a person located outside the United States and none is a FDDEI service under paragraph (b)(2) of this section.

(G) *Example 7: Service provided to a domestic person*—(*1*) *Facts*. A, a domestic corporation that operates solely in the United States, enters into a services agreement with R, a company that operates solely outside the United States. Under the agreement, A agrees to perform a consulting service for R. A hires DC to provide a service to A that A will use in the provision of a consulting service to R.

(*2*) *Analysis*. Because DC provides a service to A, a person located within the United States, DC's provision of the service to A is not a FDDEI service under paragraph (b)(2) of this section, even though the service is used by A in providing a service to R, a person located outside the United States. See also section 250(b)(5)(B)(ii). However, A's provision of the consulting service to R may be a FDDEI service, in which case A's gross income from the provision of such service would be included in A's gross FDDEI.

(f) *Proximate services*. A proximate service is provided to a recipient located outside the United States if the proximate service is performed outside the United States. In the case of a proximate service performed partly within the United States and partly outside of the United States, a proportionate amount of the service is treated as provided to a recipient located outside the United States corresponding to the portion of time the renderer spends providing the service outside of the United States.

(g) *Property services*—(1) *In general*. Except as provided in paragraph (g)(2) of this section, a property service is provided with respect to tangible property located outside the United States only if the property is located outside the United States for the duration of the period the service is performed.

(2) *Exception for services provided with respect to property temporarily in the United States*. A property service is deemed to be provided with respect to tangible property located outside the United States if the following conditions are satisfied—

(i) The property is temporarily in the United States for the purpose of receiving the property service;

(ii) After the completion of the service, the property will be primarily hangared, stored, or used outside the United States;

(iii) The property is not used to generate revenue in the United States at any point during the duration of the service; and

(iv) The property is owned by a foreign person that resides or primarily operates outside the United States.

(h) *Transportation services*. Except as provided in this paragraph (h), a transportation service is provided to a recipient, or with respect to property, located outside the United States only if both the origin and the destination of the service are outside of the United States. However, in the case of a transportation service provided to a recipient, or with respect to property, where either the origin or the destination of the service is outside of the United States, but not both, then 50 percent of the gross income from the transportation service is considered derived from services provided to a recipient, or with respect to property, located outside the United States.

[T.D. 9901, 85 FR 43080, July 15, 2020, as amended by 85 FR 60910, Sept. 29, 2020; 85 FR 68249, Oct. 28, 2020; T.D. 9959, 87 FR 324, Jan. 4, 2022]

§ 1.250(b)–6 Related party transactions.

(a) *Scope.* This section provides rules for determining whether a sale of property or a provision of a service to a related party is a FDDEI transaction. Paragraph (b) of this section provides definitions relevant for determining whether a sale of property or a provision of a service to a related party is a FDDEI transaction. Paragraph (c) of this section provides rules for determining whether a sale of general property to a foreign related party is a FDDEI sale. Paragraph (d) of this section provides rules for determining whether the provision of a general service to a business recipient that is a related party is a FDDEI service.

(b) *Definitions.* This paragraph (b) provides definitions that apply for purposes of this section.

(1) *Related party sale.* The term *related party sale* means a sale of general property to a foreign related party. See §1.250(b)–1(e)(3)(ii)(D) (*Example 4*) for an illustration of a related party sale in the case of a seller that is a partnership.

(2) *Related party service.* The term *related party service* means a provision of a general service to a business recipient that is a related party of the renderer and that is described in §1.250(b)–5(b)(2) without regard to paragraph (d) of this section.

(3) *Unrelated party transaction.* The term *unrelated party transaction* means, with respect to property purchased by a foreign related party (the "purchased property") in a related party sale from a seller—

(i) A sale of the purchased property by the foreign related party in the ordinary course of its business to a foreign unrelated party with respect to the seller;

(ii) A sale of property by the foreign related party to a foreign unrelated party with respect to the seller, if the purchased property is a constituent part of the property sold to the foreign unrelated party;

(iii) A sale of property by the foreign related party to a foreign unrelated party with respect to the seller, if the purchased property is not a constituent part of the product sold to the foreign unrelated party but rather is used in connection with producing the property sold to the foreign unrelated party; or

(iv) A provision of a service by the foreign related party to a foreign unrelated party with respect to the seller, if the purchased property was used in connection with the provision of the service.

(c) *Related party sales*—(1) *In general.* A related party sale of general property is a FDDEI sale only if the requirements described in either paragraph (c)(1)(i) or (ii) of this section are satisfied with respect to the related party sale. This paragraph (c) does not apply in determining whether a sale of intangible property to a foreign related party is a FDDEI sale.

(i) *Sale of property in an unrelated party transaction.* A related party sale is a FDDEI sale if an unrelated party transaction described in paragraph (b)(3)(i) or (ii) of this section occurs with respect to the property purchased in the related party sale and such unrelated party transaction is described in §1.250(b)–4(b) (definition of FDDEI sale). The seller in the related party sale may establish that an unrelated party transaction will occur with respect to the property, or what portion of the property will be sold in an unrelated party transaction in the case of sale of a fungible mass of general property, based on contractual terms (including, for example, that the related party is contractually bound to only sell the product to foreign unrelated parties), past practices of the foreign related party (such as practices to only sell products to foreign unrelated parties), a showing that the product sold is designed specifically for a foreign market, or books and records otherwise evidencing that sales will be made to foreign unrelated parties.

(ii) *Use of property in an unrelated party transaction.* A related party sale is a FDDEI sale if one or more unrelated party transactions described in paragraph (b)(3)(iii) or (iv) of this section occurs with respect to the property purchased in the related party sale and such unrelated party transaction or transactions would be described in §1.250(b)–4(b) or §1.250(b)–5(b) (definition of FDDEI service). If the property purchased in the related party sale will be used in unrelated party transactions described in the preceding sentence and other transactions, the amount of gross income from the related party sale that is attributable to a FDDEI sale is equal to the gross income from the related party sale multiplied by a fraction, the numerator of which is the revenue that the related party reasonably expects (as of the FDII filing date) to earn from all unrelated party transactions with respect to the property purchased in the related party sale that would be described in §1.250(b)–4(b) or §1.250(b)–5(b) and the denominator of which is the total revenue that the related party reasonably expects (as of the FDII filing date) to earn from all transactions with respect to the property purchased in the related party sale.

(2) *Treatment of foreign related party as seller or renderer*. For purposes of determining whether a sale of property or provision of a service by a foreign related party is, or would be, described in §1.250(b)–4(b) or §1.250(b)–5(b), the foreign related party that sells the property or provides the service is treated as a seller or renderer, as applicable, and the foreign unrelated party is treated as the recipient.

(3) *Transactions between related parties*. For purposes of determining whether an unrelated party sale has occurred and satisfies the requirements of paragraphs (c)(1) or (2) of this section with respect to a sale to a foreign related party (and not for purposes of determining whether a sale is to a foreign person as required by §1.250(b)–4(b)), the seller and all related parties of the seller are treated as if they are part of a single foreign related party. For purposes of the preceding sentence, in determining whether a United States person is a member of the seller's modified affiliated group, and therefore a related party of the seller, the definition of the term *modified affiliated group* in §1.250(b)–1(c)(17) applies without the substitution of ''more than 50 percent'' for ''at least 80 percent'' each place it appears. Accordingly, if a foreign related party sells or uses property purchased in a related party sale in a transaction with a second related party of the seller, transactions between the second related party and an unrelated party may be treated as an unrelated party transaction for purposes of applying paragraph (c)(1) of this section to a related party sale.

(4) *Example*. The following example illustrates the application of this paragraph (c).

(i) *Facts*. DC, a domestic corporation, sells a machine to FC, a foreign related party of DC in a transaction described in §1.250(b)–4(b) (without regard to this paragraph (c)). FC uses the machine solely to manufacture product A. As of the FDII filing date for the taxable year, 75 percent of future revenue from sales by FC to unrelated parties of product A will be from sales that would be described in §1.250(b)–4(b).

(ii) *Analysis*. The sale by DC to FC is a related party sale. Because FC uses the machine to make product A, but the machine is not a constituent part of product A because FC does not undertake further manufacturing with respect to the machine itself, FC's sale of product A is an unrelated party transaction described in paragraph (b)(3)(iii) of this section. Therefore, DC's sale of the machine is only a FDDEI sale if the requirements of paragraph (c)(1)(ii) of this section are satisfied. Because 75 percent of the revenue from future sales of product A will be from unrelated party transactions that would be described in §1.250(b)–4(b), 75 percent of the revenues from DC's sale of the machine to FC constitute FDDEI sales.

(d) *Related party services*—(1) *In general*. Except as provided in this paragraph (d)(1), a related party service is a FDDEI service only if the related party service is not substantially similar to a service that has been provided or will be provided by the related party to a person located within the United States. However, if a related party service is substantially similar to a service provided (in whole or in part) by the related party to a person located in the United States solely by reason of paragraph (d)(2)(ii) of this section, the amount of gross income from the related party service attributable to a FDDEI service is equal to the difference between the gross income from the related party service and the amount of the price paid by persons located within the United States that is attributable to the related party service. Section 250(b)(5)(C)(ii) and this paragraph (d)(1) apply only to a general service provided to a related party that is a business recipient and are not applicable with respect to any other service provided to a related party.

(2) *Substantially similar services.* A related party service is substantially similar to a service provided by the related party to a person located within the United States only if the related party service is used by the related party in whole or part to provide a service to a person located within the United States and either—

(i) 60 percent or more of the benefits conferred by the related party service are directly used by the related party to confer benefits on consumers or business recipients located within the United States; or

(ii) 60 percent or more of the price paid by consumers or business recipients located within the United States for the service provided by the related party is attributable to the related party service.

(3) *Special rules.* For purposes of paragraph (d) of this section, the rules in paragraphs (d)(3)(i) and (ii) of this section apply.

(i) *Rules for determining the location of and price paid by recipients of a service provided by a related party.* The location of a consumer or business recipient with respect to services provided by the related party is determined under §1.250(b)–5(d) and (e)(2), respectively, but treating the related party as the renderer. Accordingly, if the related party provides a service to a business recipient, the related party is treated as conferring benefits on a person located within the United States to the extent that the service confers a benefit on the business recipient's operations located within the United States. Similarly, for purposes of applying paragraph (d)(2)(ii) of this section with respect to business recipients, the price paid by a business recipient to the related party for services is allocated proportionally based on the locations of the business recipient that benefit from the services provided by the related party.

(ii) *Rules for allocating the benefits provided by and price paid to the renderer of a related party service.* For purposes of applying paragraph (d)(2)(i) of this section with respect to benefits that are directly used by the related party to confer benefits on its recipients, the benefits provided by the renderer to the related party are allocated to the related party's consumers or business recipients within the United States based on the proportion of benefits conferred by the related party on consumers or business recipients located within the United States. For purposes of determining the amount of the price paid by persons located within the United States that is attributable to the related party service in applying paragraph (d)(2)(ii) of this section, if the related party provides services that confer benefits on persons located within the United States and outside the United States, the price paid for the related party service by the related party to the renderer is allocated proportionally based on the benefits conferred on each location by the related party to its recipients.

(4) *Examples.* The following examples illustrate the application of this paragraph (d).

(i) *Assumed facts.* The following facts are assumed for purposes of the examples—

(A) DC is a domestic corporation.

(B) FC is a foreign corporation and a foreign related party of DC that operates solely outside the United States.

(C) The service DC provides to FC is a general service provided to a business recipient located outside the United States as described in §1.250(b)–5(b)(2) without regard to the application of paragraph (d) of this section.

(D) The benefits conferred by DC's service to FC's customers are not indirect or remote within the meaning of §1.482–9(l)(3)(ii).

(ii) *Examples*—

(A) *Example 1: Services that are substantially similar services under paragraph (d)(2)(i) of this section*—(*1*) *Facts.* FC enters into a services agreement with R, a company that operates restaurant chains within and outside the United States. Under the agreement, FC agrees to furnish a design for the renovation of a chain of restaurants that R owns; the design will include architectural plans. FC hires DC to provide an architectural service to FC that FC will use in the provision of its design service to R. The architectural service that DC provides to FC will serve no other purpose than to enable FC to provide its service to R. The service that FC provides will benefit only R's operations within the United States. FC pays an arm's length price of $50x to DC for the architectural service and DC recognizes $50x of gross income from the service. FC incurs additional costs to add additional design elements to the plans and charges R a total of $100x for its service.

(*2*) *Analysis.* All of the service that DC provides to FC is directly used in the provision of a service to R because FC uses DC's architectural service to provide its design service to R, and the architectural service that DC provides to FC will serve no purpose other than to enable FC to provide its service to R. In addition, FC is treated as conferring benefits only to persons located within the United States under paragraph (d)(3)(i) of this section because only R's operations within the United States benefit from the service provided by FC that used the service provided by DC. Therefore, the service provided by DC to FC is substantially similar to the service provided by FC to R under paragraph (d)(2)(i) of this section. Accordingly, DC's provision of the architectural service to FC is not a FDDEI service under paragraph (d)(1) of this section, and DC's gross income from the architectural service ($50x) is not included in its gross FDDEI.

(B) *Example 2: Services that are not substantially similar services under paragraph (d)(2)(i) of this section*—(*1*) *Facts.* The facts are the same as paragraph (d)(4)(ii)(A)(*1*) of this section (the facts in *Example 1*), except that 90 percent of R's operations that will benefit from FC's service are located outside the United States.

(*2*) *Analysis*—(*i*) *Analysis under paragraph (d)(2)(i) of this section.* All of the service that DC provides to FC is directly used in the provision of a service to R. However, because 90 percent of R's operations that will benefit from FC's service are located outside the United States under paragraph (d)(3)(i) of this section, only 10 percent of the benefits of FC's service are conferred on persons located within the United States. Further, because FC's service confers a benefit on R's operations located within and outside the United States, the benefit provided by DC to FC is allocated proportionately based on the locations of R that benefit from the services provided by FC under paragraph (d)(3)(ii) of this section. Therefore, only 10 percent of DC's architectural service are directly used by FC to confer benefits on persons located within the United States under paragraph (d)(3)(ii) of this section. Therefore, the architectural service provided by DC to FC is not substantially similar to the design service provided by FC to persons located within the United States under paragraph (d)(2)(i) of this section.

(C) *Example 3: Services that are substantially similar services under paragraph (d)(2)(ii) of this section*—(*1*) *Facts.* The facts are the same as paragraph (d)(4)(ii)(B)(*1*) of this section (the facts in *Example 2*), except that FC pays an arm's length price of $75x to DC for the architectural service and DC recognizes $75x of gross income from the service. As in paragraph (d)(4)(ii)(A)(*1*) and (d)(4)(ii)(B)(*1*) of this section (the facts in *Example 1* and *Example 2*), FC charges R a total of $100x for its service.

(*2*) *Analysis*—(*i*) *Price paid by persons located within the United States.* Under paragraph (d)(3)(i) of this section, FC is treated as conferring benefits on a person located within the United States to the extent that R's operations that will benefit from FC's service are located within the United States. Further, because FC's service confers a benefit on R's operations located within and outside the United States, the price paid by R to FC ($100x) is allocated proportionately based on the locations of R that benefit from the services provided by FC under paragraph (d)(3)(i) of this section. Accordingly, because 10 percent of R's operations that will benefit from FC's services are located within the United States, persons located within the United States are treated as paying $10x ($100x × 0.10) for FC's services for purposes of applying the test in paragraph (d)(2)(ii) of this section.

(*ii*) *Amount attributable to the related party service.* The service that FC provides to R is attributable in part to DC's service because FC uses the architectural plans that DC provides to provide a service to R. Under paragraph (d)(3)(ii) of this section, because the benefits of the service provided by FC are conferred on persons located within the United States and outside the United States, a proportionate amount (10 percent) of the price paid to DC for the related party service ($75x), or $7.5x, is treated as attributable to the services provided to persons located within the United States.

(*iii*) *Application of test in paragraph (d)(2)(ii) of this section.* For purposes of applying the test described in paragraph (d)(2)(ii) of this section, the price paid by persons located within the United States for the service provided by the related party (FC) is $10x, as determined in paragraph (d)(4)(ii)(C)(*2*)(*i*) of this section (the analysis of this *Example 3*). The amount of the price that is attributable to DC's service is $7.5x, as determined in paragraph (d)(4)(ii)(C)(*2*)(*ii*) of this section (the analysis of this *Example 3*). Accordingly, of the price treated as paid to FC by persons located within the United States, 75 percent ($7.5x/$10x) is attributable to the related party service. Because more than 60 percent of the price treated as paid by persons within the United States for FC's service is attributable to DC's service, the service provided by DC to FC is substantially similar to the design service provided by FC to persons located within the United States under paragraph (d)(2)(ii) of this section.

(*iv*) *Conclusion.* Under paragraph (d)(1) of this section, because the related party service provided by DC is substantially similar to the service provided by FC to a person located in the United States solely by reason of paragraph (d)(2)(ii) of this section, the difference between DC's gross income from the related party service and the amount of the price paid by persons located within the United States that is attributable to the related party service is treated as a FDDEI service. Accordingly, $67.5x ($75x—$7.5x) of DC's gross income from the provision of the service to FC is treated as a FDDEI service.

[T.D. 9901, 85 FR 43080, July 15, 2020, as amended by 85 FR 60910, Sept. 29, 2020; 85 FR 68250, Oct. 28, 2020]

ITEMS NOT DEDUCTIBLE

§ 1.261–1 General rule for disallowance of deductions.

In computing taxable income, no deduction shall be allowed, except as otherwise expressly provided in Chapter 1 of the Code, in respect of any of the items specified in Part IX (section 262 and following), Subchapter B, Chapter 1 of the Code, and the regulations thereunder.

§ 1.262–1 Personal, living, and family expenses.

(a) *In general.* In computing taxable income, no deduction shall be allowed, except as otherwise expressly provided in chapter 1 of the Code, for personal, living, and family expenses.

(b) *Examples of personal, living, and family expenses.* Personal, living, and family expenses are illustrated in the following examples:

(1) Premiums paid for life insurance by the insured are not deductible. See also section 264 and the regulations thereunder.

(2) The cost of insuring a dwelling owned and occupied by the taxpayer as a personal residence is not deductible.

(3) Expenses of maintaining a household, including amounts paid for rent, water, utilities, domestic service, and the like, are not deductible. A taxpayer who rents a property for residential purposes, but incidentally conducts business there (his place of business being elsewhere) shall not deduct any part of the rent. If, however, he uses part of the house as his place of business, such portion of the rent and other similar expenses as is properly attributable to such place of business is deductible as a business expense.

(4) Losses sustained by the taxpayer upon the sale or other disposition of property held for personal, living, and family purposes are not deductible. But see section 165 and the regulations thereunder for deduction of losses sustained to such property by reason of casualty, etc.

(5) Expenses incurred in traveling away from home (which include transportation expenses, meals, and lodging) and any other transportation expenses are not deductible unless they qualify as expenses deductible under section 162 (relating to trade or business expenses), section 170 (relating to charitable contributions), section 212 (relating to expenses for production of income), section 213 (relating to medical expenses), or section 217 (relating to moving expenses), and the regulations under those sections. The taxpayer's costs of commuting to his place of business or employment are personal expenses and do not qualify as deductible expenses. For expenses paid or incurred before October 1, 2014, a taxpayer's expenses for lodging when not traveling away from home (local lodging) are nondeductible personal expenses. However, taxpayers may deduct local lodging expenses that qualify under section 162 and are paid or incurred in taxable years for which the period of limitation on credit or refund under section 6511 has not expired. For expenses paid or incurred on or after October 1, 2014, a taxpayer's local lodging expenses are personal expenses and are not deductible unless they qualify as deductible expenses under section 162. Except as permitted under section 162 or 212, the costs of a taxpayer's meals not incurred in traveling away from home are nondeductible personal expenses.

(6) Amounts paid as damages for breach of promise to marry, and attorney's fees and other costs of suit to recover such damages, are not deductible.

(7) Generally, attorney's fees and other costs paid in connection with a divorce, separation, or decree for support are not deductible by either the husband or the wife. However, the part of an attorney's fee and the part of the other costs paid in connection with a divorce, legal separation, written separation agreement, or a decree for support, which are properly attributable to the production or collection of amounts includible in gross income under section 71 are deductible by the wife under section 212.

(8) The cost of equipment of a member of the armed services is deductible only to the extent that it exceeds nontaxable allowances received for such equipment and to the extent that such equipment is especially required by his profession and does not merely take the place of articles required in civilian life. For example, the cost of a sword is an allowable deduction in computing taxable income, but the cost of a uniform is not. However, amounts expended by a reservist for the purchase and maintenance of uniforms which may be worn only when on active duty for training for temporary periods, when attending service school courses, or when attending training assemblies are deductible except to the extent that nontaxable allowances are received for such amounts.

(9) Expenditures made by a taxpayer in obtaining an education or in furthering his education are not deductible unless they qualify under section 162 and §1.162–5 (relating to trade or business expenses).

(c) *Cross references.* Certain items of a personal, living, or family nature are deductible to the extent expressly provided under the following sections, and the regulations under those sections:

(1) Section 163 (interest).

(2) Section 164 (taxes).

(3) Section 165 (losses).

(4) Section 166 (bad debts).

(5) Section 170 (charitable, etc., contributions and gifts).

(6) Section 213 (medical, dental, etc., expenses).

(7) Section 214 (expenses for care of certain dependents).

(8) Section 215 (alimony, etc., payments).

(9) Section 216 (amounts representing taxes and interest paid to cooperative housing corporation).

(10) Section 217 (moving expenses).

[T.D. 6500, 25 FR 11402, Nov. 26, 1960, as amended by T.D. 6796, 30 FR 1041, Feb. 2, 1965; T.D. 6918, 32 FR 6681, May 2, 1967; T.D. 7207, 37 FR 20795, Oct. 4, 1972; T.D. 9696, 79 FR 59114, Oct. 1, 2014]

§ 1.263(a)–0 Outline of regulations under section 263(a).

This section lists the paragraphs in §§ 1.263(a)–1 through 1.263(a)–3 and § 1.263(a)–6.

§ 1.263(a)–1 Capital expenditures; in general.

(a) General rule for capital expenditures.
(b) Coordination with other provisions of the Internal Revenue Code.
(c) Definitions.
(1) Amount paid.
(2) Produce.
(d) Examples of capital expenditures.
(e) Amounts paid to sell property.
(1) In general.
(2) Dealer in property.
(3) Examples.
(f) De minimis safe harbor election.
(1) In general.
(i) Taxpayer with applicable financial statement.
(ii) Taxpayer without applicable financial statement.
(iii) Taxpayer with both an applicable financial statement and a non-qualifying financial statement.
(2) Exceptions to de minimis safe harbor.
(3) Additional rules.
(i) Transaction and other additional costs.
(ii) Materials and supplies.
(iii) Sale or disposition.
(iv) Treatment of de minimis amounts.
(v) Coordination with section 263A.
(vi) Written accounting procedures for groups of entities.
(vii) Combined expensing accounting procedures.
(4) Definition of applicable financial statement.
(5) Time and manner of making election.
(6) Anti-abuse rule.
(7) Examples.
(g) Accounting method changes.
(h) Effective/applicability date.
(1) In general.
(2) Early application of this section.
(i) In general.
(ii) Transition rule for de minimis safe harbor election on 2012 or 2013 returns.
(3) Optional application of TD 9564.

§ 1.263(a)–2 Amounts paid to acquire or produce tangible property.

(a) Overview.
(b) Definitions.
(1) Amount paid.
(2) Personal property.
(3) Real property.
(4) Produce.
(c) Coordination with other provisions of the Internal Revenue Code.
(1) In general.
(2) Materials and supplies.
(d) Acquired or produced tangible property.
(1) Requirement to capitalize.
(2) Examples.
(e) Defense or perfection of title to property.
(1) In general.
(2) Examples.
(f) Transaction costs.
(1) In general.
(2) Scope of facilitate.
(i) In general.
(ii) Inherently facilitative amounts.
(iii) Special rule for acquisitions of real property.
(A) In general.
(B) Acquisitions of real and personal property in a single transaction.
(iv) Employee compensation and overhead costs.
(A) In general.
(B) Election to capitalize.
(3) Treatment of transaction costs.
(i) In general.
(ii) Treatment of inherently facilitative amounts allocable to property not acquired.
(iii) Contingency fees.
(4) Examples.
(g) Treatment of capital expenditures.
(h) Recovery of capitalized amounts.
(1) In general.
(2) Examples.
(i) Accounting method changes.
(j) Effective/applicability date.
(1) In general.
(2) Early application of this section.
(i) In general.
(ii) Transition rule for election to capitalize employee compensation and overhead costs on 2012 or 2013 returns.
(3) Optional application of TD 9564.

§ 1.263(a)–3 Amounts paid to improve tangible property.

(a) Overview.
(b) Definitions.
(1) Amount paid.
(2) Personal property.
(3) Real property.
(4) Owner.
(c) Coordination with other provisions of the Internal Revenue Code.
(1) In general.
(2) Materials and supplies.
(3) Example.
(d) Requirement to capitalize amounts paid for improvements.
(e) Determining the unit of property.
(1) In general.
(2) Building.
(i) In general.
(ii) Application of improvement rules to a building.
(A) Building structure.
(B) Building system.
(iii) Condominium.
(A) In general.
(B) Application of improvement rules to a condominium.

(ii) Transition rule for elections on 2012 and 2013 returns.
(3) Optional application of TD 9564.

§ 1.263(a)–4 Amounts paid to acquire or create intangibles.

(a) Overview.
(b) Capitalization with respect to intangibles.
(1) In general.
(2) Published guidance.
(3) Separate and distinct intangible asset.
(i) Definition.
(ii) Creation or termination of contract rights.
(iii) Amounts paid in performing services.
(iv) Creation of computer software.
(v) Creation of package design.
(4) Coordination with other provisions of the Internal Revenue Code.
(i) In general.
(ii) Example.
(c) Acquired intangibles.
(1) In general.
(2) Readily available software.
(3) Intangibles acquired from an employee.
(4) Examples.
(d) Created intangibles.
(1) In general.
(2) Financial interests.
(i) In general.
(ii) Amounts paid to create, originate, enter into, renew or renegotiate.
(iii) Renegotiate.
(iv) Coordination with other provisions of this paragraph (d).
(v) Coordination with § 1.263(a)–5.
(vi) Examples.
(3) Prepaid expenses.
(i) In general.
(ii) Examples.
(4) Certain memberships and privileges.
(i) In general.
(ii) Examples.
(5) Certain rights obtained from a government agency.
(i) In general.
(ii) Examples.
(6) Certain contract rights.
(i) In general.
(ii) Amounts paid to create, originate, enter into, renew or renegotiate.
(iii) Renegotiate.
(iv) Right.
(v) *De minimis* amounts.
(vi) Exception for lessee construction allowances.
(vii) Examples.
(7) Certain contract terminations.
(i) In general.
(ii) Certain break-up fees.
(iii) Examples.
(8) Certain benefits arising from the provision, production, or improvement of real property.
(i) In general.
(ii) Exclusions.
(iii) Real property.
(iv) Impact fees and dedicated improvements.
(v) Examples.
(9) Defense or perfection of title to intangible property.
(i) In general.
(ii) Certain break-up fees.
(iii) Example.
(e) Transaction costs.
(1) Scope of facilitate.
(i) In general.
(ii) Treatment of termination payments.
(iii) Special rule for contracts.
(iv) Borrowing costs.
(v) Special rule for stock redemption costs of open-end regulated investment companies.
(2) Coordination with paragraph (d) of this section.
(3) Transaction.
(4) Simplifying conventions.
(i) In general.
(ii) Employee compensation.
(iii) *De minimis* costs.
(iv) Election to capitalize.
(5) Examples.
(f) 12-month rule.
(1) In general.
(2) Duration of benefit for contract terminations.
(3) Inapplicability to created financial interests and self-created amortizable section 197 intangibles.
(4) Inapplicability to rights of indefinite duration.
(5) Rights subject to renewal.
(i) In general.
(ii) Reasonable expectancy of renewal.
(iii) Safe harbor pooling method.
(6) Coordination with section 461.
(7) Election to capitalize.
(8) Examples.
(g) Treatment of capitalized costs.
(1) In general.
(2) Financial instruments.
(h) Special rules applicable to pooling.
(1) In general.
(2) Method of accounting.
(3) Adopting or changing to a pooling method.
(4) Definition of pool.
(5) Consistency requirement.
(6) Additional guidance pertaining to pooling.
(7) Example.
(i) [Reserved].
(j) Application to accrual method taxpayers.
(k) Treatment of related parties and indirect payments.
(l) Examples.
(m) Amortization.
(n) Intangible interests in land [Reserved]
(o) Effective date.
(p) Accounting method changes.
(1) In general.
(2) Scope limitations.

[T.D. 9107, 69 FR 444, Jan. 5, 2004, as amended by T.D. 9564, 76 FR 81100, Dec. 27, 2011; T.D. 9636, 78 FR 57708, Sept. 19, 2013; T.D. 9636, 79 FR 42191, July 21, 2014]

§ 1.263(a)–1 Capital expenditures; in general.

(a) *General rule for capital expenditures.* Except as provided in chapter 1 of the Internal Revenue Code, no deduction is allowed for—

(1) Any amount paid for new buildings or for permanent improvements or betterments made to increase the value of any property or estate; or

(2) Any amount paid in restoring property or in making good the exhaustion thereof for which an allowance is or has been made.

(b) *Coordination with other provisions of the Internal Revenue Code.* Nothing in this section changes the treatment of any amount that is specifically provided for under any provision of the Internal Revenue Code or the Treasury Regulations other than section 162(a) or section 212 and the regulations under those sections. For example, see section 263A, which requires taxpayers to capitalize the direct and allocable indirect costs to property produced by the taxpayer and property acquired for resale. See also section 195 requiring taxpayers to capitalize certain costs as start-up expenditures.

(c) *Definitions.* For purposes of this section, the following definitions apply:

(1) *Amount paid.* In the case of a taxpayer using an accrual method of accounting, the terms *amount paid* and *payment* mean a liability incurred (within the meaning of § 1.446–1(c)(1)(ii)). A liability may not be taken into account under this section prior to the taxable year during which the liability is incurred.

(2) *Produce* means construct, build, install, manufacture, develop, create, raise, or grow. This definition is intended to have the same meaning as the definition used for purposes of section 263A(g)(1) and § 1.263A–2(a)(1)(i), except that improvements are excluded from the definition in this paragraph

(c)(2) and are separately defined and addressed in § 1.263(a)–3.

(d) *Examples of capital expenditures.* The following amounts paid are examples of capital expenditures:

(1) An amount paid to acquire or produce a unit of real or personal tangible property. See § 1.263(a)–2.

(2) An amount paid to improve a unit of real or personal tangible property. See § 1.263(a)–3.

(3) An amount paid to acquire or create intangibles. See § 1.263(a)–4.

(4) An amount paid or incurred to facilitate an acquisition of a trade or business, a change in capital structure of a business entity, and certain other transactions. See § 1.263(a)–5.

(5) An amount paid to acquire or create interests in land, such as easements, life estates, mineral interests, timber rights, zoning variances, or other interests in land.

(6) An amount assessed and paid under an agreement between bondholders or shareholders of a corporation to be used in a reorganization of the corporation or voluntary contributions by shareholders to the capital of the corporation for any corporate purpose. See section 118 and § 1.118–1.

(7) An amount paid by a holding company to carry out a guaranty of dividends at a specified rate on the stock of a subsidiary corporation for the purpose of securing new capital for the subsidiary and increasing the value of its stockholdings in the subsidiary. This amount must be added to the cost of the stock in the subsidiary.

(e) *Amounts paid to sell property*—(1) *In general.* Commissions and other transaction costs paid to facilitate the sale of property are not currently deductible under section 162 or 212. Instead, the amounts are capitalized costs that reduce the amount realized in the taxable year in which the sale occurs or are taken into account in the taxable year in which the sale is abandoned if a deduction is permissible. These amounts are not added to the basis of the property sold or treated as an intangible asset under § 1.263(a)–4. See § 1.263(a)–5(g) for the treatment of amounts paid to facilitate the disposition of assets that constitute a trade or business.

(2) *Dealer in property.* In the case of a dealer in property, amounts paid to facilitate the sale of such property are treated as ordinary and necessary business expenses.

(3) *Examples.* The following examples, which assume the sale is not an installment sale under section 453, illustrate the rules of this paragraph (e):

Example 1. Sales costs of real property A owns a parcel of real estate. A sells the real estate and pays legal fees, recording fees, and sales commissions to facilitate the sale. A must capitalize the fees and commissions and, in the taxable year of the sale, must reduce the amount realized from the sale of the real estate by the fees and commissions.

Example 2. Sales costs of dealers Assume the same facts as in *Example 1,* except that A is a dealer in real estate. The commissions and fees paid to facilitate the sale of the real estate may be deducted as ordinary and necessary business expenses under section 162.

Example 3. Sales costs of personal property used in a trade or business B owns a truck for use in B's trade or business. B decides to sell the truck on November 15, Year 1. B pays for an appraisal to determine a reasonable asking price. On February 15, Year 2, B sells the truck to C. In Year 1, B must capitalize the amount paid to appraise the truck, and in Year 2, must reduce the amount realized from the sale of the truck by the amount paid for the appraisal.

Example 4. Costs of abandoned sale of personal property used in a trade or business Assume the same facts as in *Example 3,* except that, instead of selling the truck on February 15, Year 2, B decides on that date not to sell the truck and takes the truck off the market. In Year 1, B must capitalize the amount paid to appraise the truck. However, B may recognize the amount paid to appraise the truck as a loss under section 165 in Year 2, the taxable year when the sale is abandoned.

Example 5. Sales costs of personal property not used in a trade or business Assume the same facts as in *Example 3,* except that B does not use the truck in B's trade or business but instead uses it for personal purposes. In Year 1, B must capitalize the amount paid to appraise the truck, and in Year 2, must reduce the amount realized from the sale of the truck by the amount paid for the appraisal.

Example 6. Costs of abandoned sale of personal property not used in a trade or business Assume the same facts as in *Example 5,* except that, instead of selling the truck on February 15, Year 2, B decides on that date not to sell the truck and takes the truck off the market. In Year 1, B must capitalize the amount paid to appraise the truck. Although B abandons the sale in Year 2, B may not treat the amount paid to appraise the truck as a loss under section 165 because the truck was not used in B's trade or business or in a transaction entered into for profit.

(f) *De minimis safe harbor election*—(1) *In general.* Except as otherwise provided in paragraph (f)(2) of this section, a taxpayer electing to apply the de minimis safe harbor under this paragraph (f) may not capitalize under §1.263(a)–2(d)(1) or §1.263(a)–3(d) any amount paid in the taxable year for the acquisition or production of a unit of tangible property nor treat as a material or supply under §1.162–3(a) any amount paid in the taxable year for tangible property if the amount specified under this paragraph (f)(1) meets the requirements of paragraph (f)(1)(i) or (f)(1)(ii) of this section. However, section 263A and the regulations under section 263A require taxpayers to capitalize the direct and allocable indirect costs of property produced by the taxpayer (for example, property improved by the taxpayer) and property acquired for resale.

(i) *Taxpayer with applicable financial statement.* A taxpayer electing to apply the de minimis safe harbor may not capitalize under §1.263(a)–2(d)(1) or §1.263(a)–3(d) nor treat as a material or supply under §1.162–3(a) any amount paid in the taxable year for property described in paragraph (f)(1) of this section if—

(A) The taxpayer has an applicable financial statement (as defined in paragraph (f)(4) of this section);

(B) The taxpayer has at the beginning of the taxable year written accounting procedures treating as an expense for non-tax purposes—

(*1*) Amounts paid for property costing less than a specified dollar amount; or

(*2*) Amounts paid for property with an economic useful life (as defined in §1.162–3(c)(4)) of 12 months or less;

(C) The taxpayer treats the amount paid for the property as an expense on its applicable financial statement in accordance with its written accounting procedures; and

(D) The amount paid for the property does not exceed $5,000 per invoice (or per item as substantiated by the invoice) or other amount as identified in published guidance in the FEDERAL REGISTER or in the Internal Revenue Bulletin (see §601.601(d)(2)(ii)(*b*) of this chapter).

(ii) *Taxpayer without applicable financial statement.* A taxpayer electing to apply the de minimis safe harbor may not capitalize under §1.263(a)–2(d)(1) or §1.263(a)–3(d) nor treat as a material or supply under §1.162–3(a) any amount paid in the taxable year for property described in paragraph (f)(1) of this section if—

(A) The taxpayer does not have an applicable financial statement (as defined in paragraph (f)(4) of this section);

(B) The taxpayer has at the beginning of the taxable year accounting procedures treating as an expense for non-tax purposes—

(*1*) Amounts paid for property costing less than a specified dollar amount; or

(*2*) Amounts paid for property with an economic useful life (as defined in §1.162–3(c)(4)) of 12 months or less;

(C) The taxpayer treats the amount paid for the property as an expense on its books and records in accordance with these accounting procedures; and

(D) The amount paid for the property does not exceed $500 per invoice (or per item as substantiated by the invoice) or other amount as identified in published guidance in the FEDERAL REGISTER or in the Internal Revenue Bulletin (see §601.601(d)(2)(ii)(*b*) of this chapter).

(iii) *Taxpayer with both an applicable financial statement and a non-qualifying financial statement.* For purposes of this paragraph (f)(1), if a taxpayer has an applicable financial statement defined in paragraph (f)(4) of this section in addition to a financial statement that does not meet requirements of paragraph (f)(4) of this section, the taxpayer must meet the requirements of paragraph (f)(1)(i) of this section to qualify to elect the de minimis safe harbor under this paragraph (f).

(2) *Exceptions to de minimis safe harbor.* The de minimis safe harbor in paragraph (f)(1) of this section does not apply to the following:

(i) Amounts paid for property that is or is intended to be included in inventory property;

(ii) Amounts paid for land;

(iii) Amounts paid for rotable, temporary, and standby emergency spare parts that the taxpayer elects to capitalize and depreciate under § 1.162–3(d); and

(iv) Amounts paid for rotable and temporary spare parts that the taxpayer accounts for under the optional method of accounting for rotable parts pursuant to § 1.162–3(e).

(3) *Additional rules*—(i) *Transaction and other additional costs.* A taxpayer electing to apply the de minimis safe harbor under paragraph (f)(1) of this section is not required to include in the cost of the tangible property the additional costs of acquiring or producing such property if these costs are not included in the same invoice as the tangible property. However, the taxpayer electing to apply the de minimis safe harbor under paragraph (f)(1) of this section must include in the cost of such property all additional costs (for example, delivery fees, installation services, or similar costs) if these additional costs are included on the same invoice with the tangible property. For purposes of this paragraph, if the invoice includes amounts paid for multiple tangible properties and such invoice includes additional invoice costs related to these multiple properties, then the taxpayer must allocate the additional invoice costs to each property using a reasonable method, and each property, including allocable labor and overhead, must meet the requirements of paragraph (f)(1)(i) or paragraph (f)(1)(ii) of this section, whichever is applicable. Reasonable allocation methods include, but are not limited to specific identification, a pro rata allocation, or a weighted average method based on the property's relative cost. For purposes of this paragraph (f)(3)(i), additional costs consist of the costs of facilitating the acquisition or production of such tangible property under § 1.263(a)–2(f) and the costs for work performed prior to the date that the tangible property is placed in service under § 1.263(a)–2(d).

(ii) *Materials and supplies.* If a taxpayer elects to apply the de minimis safe harbor provided under this paragraph (f), then the taxpayer must also apply the de minimis safe harbor to amounts paid for all materials and supplies (as defined under § 1.162–3) that meet the requirements of § 1.263(a)–1(f). See paragraph (f)(3)(iv) of this section for treatment of materials and supplies under the de minimis safe harbor.

(iii) *Sale or disposition.* Property to which a taxpayer applies the de minimis safe harbor contained in this paragraph (f) is not treated upon sale or other disposition as a capital asset under section 1221 or as property used in the trade or business under section 1231.

(iv) *Treatment of de minimis amounts.* An amount paid for property to which a taxpayer properly applies the de minimis safe harbor contained in this paragraph (f) is not treated as a capital expenditure under § 1.263(a)–2(d)(1) or § 1.263(a)–3(d) or as a material and supply under § 1.162–3, and may be deducted under § 1.162–1 in the taxable year the amount is paid provided the amount otherwise constitutes an ordinary and necessary expense incurred in carrying on a trade or business.

(v) *Coordination with section 263A.* Amounts paid for tangible property described in paragraph (f)(1) of this section may be subject to capitalization under section 263A if the amounts paid for tangible property comprise the direct or allocable indirect costs of other property produced by the taxpayer or property acquired for resale. See, for example, § 1.263A–1(e)(3)(ii)(R) requiring taxpayers to capitalize the cost of tools and equipment allocable to property produced or property acquired for resale.

(vi) *Written accounting procedures for groups of entities.* If the taxpayer's financial results are reported on the applicable financial statement (as defined in paragraph (f)(4) of this section) for a group of entities then, for purposes of paragraph (f)(1)(i)(A) of this section, the group's applicable financial statement may be treated as the applicable financial statement of the taxpayer, and for purposes of paragraphs (f)(1)(i)(B) and (f)(1)(i)(C) of this section, the written accounting procedures provided for the group and utilized for the group's applicable financial statement may be treated as the written accounting procedures of the taxpayer.

(vii) *Combined expensing accounting procedures.* For purposes of paragraphs (f)(1)(i) and (f)(1)(ii) of this section, if the taxpayer has, at the beginning of the taxable year, accounting procedures treating as an expense for non-tax purposes amounts paid for property costing less than a specified dollar amount and amounts paid for property with an economic useful life (as defined in §1.162–3(c)(4)) of 12 months or less, then a taxpayer electing to apply the de minimis safe harbor under this paragraph (f) must apply the provisions of this paragraph (f) to amounts qualifying under either accounting procedure.

(4) *Definition of applicable financial statement.* For purposes of this paragraph (f), the taxpayer's applicable financial statement (AFS) is the taxpayer's financial statement listed in paragraphs (f)(4)(i) through (iii) of this section that has the highest priority (including within paragraph (f)(4)(ii) of this section). The financial statements are, in descending priority—

(i) A financial statement required to be filed with the Securities and Exchange Commission (SEC) (the 10–K or the Annual Statement to Shareholders);

(ii) A certified audited financial statement that is accompanied by the report of an independent certified public accountant (or in the case of a foreign entity, by the report of a similarly qualified independent professional) that is used for—

(A) Credit purposes;

(B) Reporting to shareholders, partners, or similar persons; or

(C) Any other substantial non-tax purpose; or

(iii) A financial statement (other than a tax return) required to be provided to the federal or a state government or any federal or state agency (other than the SEC or the Internal Revenue Service).

(5) *Time and manner of election.* A taxpayer that makes the election under this paragraph (f) must make the election for all amounts paid during the taxable year for property described in paragraph (f)(1) of this section and meeting the requirements of paragraph (f)(1)(i) or paragraph (f)(1)(ii) of this section, as applicable. A taxpayer makes the election by attaching a statement to the taxpayer's timely filed original Federal tax return (including extensions) for the taxable year in which these amounts are paid. Sections 301.9100–1 through 301.9100–3 of this chapter provide the rules governing extensions of the time to make regulatory elections. The statement must be titled "Section 1.263(a)–1(f) de minimis safe harbor election" and include the taxpayer's name, address, taxpayer identification number, and a statement that the taxpayer is making the de minimis safe harbor election under §1.263(a)–1(f). In the case of a consolidated group filing a consolidated income tax return, the election is made for each member of the consolidated group by the common parent, and the statement must also include the names and taxpayer identification numbers of each member for which the election is made. In the case of an S corporation or a partnership, the election is made by the S corporation or the partnership and not by the shareholders or partners. An election may not be made through the filing of an application for change in accounting method or, before obtaining the Commissioner's consent to make a late election, by filing an amended Federal tax return. A taxpayer may not revoke an election made under this paragraph (f). The manner of electing the de minimis safe harbor under this paragraph (f) may be modified through guidance of general applicability (see §§601.601(d)(2) and 601.602 of this chapter).

(6) *Anti-abuse rule.* If a taxpayer acts to manipulate transactions with the intent to achieve a tax benefit or to avoid the application of the limitations provided under paragraphs (f)(1)(i)(B)(*1*), (f)(1)(i)(D), (f)(1)(ii)(B)(*1*), and (f)(1)(ii)(D) of this section, appropriate adjustments will be made to carry out the purposes of this section. For example, a taxpayer is deemed to act to manipulate transactions with an intent to avoid the purposes and requirements of this section if—

(i) The taxpayer applies the de minimis safe harbor to amounts substantiated with invoices created to componentize property that is generally acquired or produced by the taxpayer (or other taxpayers in the same or similar trade or business) as a single unit of tangible property; and

(ii) This property, if treated as a single unit, would exceed any of the limitations provided under paragraphs (f)(1)(i)(B)(*1*), (f)(1)(i)(D), (f)(1)(ii)(B)(*1*), and (f)(1)(ii)(D) of this section, as applicable.

(7) *Examples.* The following examples illustrate the application of this paragraph (f). Unless otherwise provided, assume that section 263A does not apply to the amounts described.

Example 1. De minimis safe harbor; taxpayer without AFS. In Year 1, A purchases 10 printers at $250 each for a total cost of $2,500 as indicated by the invoice. Assume that each printer is a unit of property under §1.263(a)–3(e). A does not have an AFS. A has accounting procedures in place at the beginning of Year 1 to expense amounts paid for property costing less than $500, and A treats the amounts paid for the printers as an expense on its books and records. The amounts paid for the printers meet the requirements for the de minimis safe harbor under paragraph (f)(1)(ii) of this section. If A elects to apply the de minimis safe harbor under this paragraph (f) in Year 1, A may not capitalize the amounts paid for the 10 printers or any other amounts meeting the criteria for the de minimis safe harbor under paragraph (f)(1). Instead, in accordance with paragraph (f)(3)(iv) of this section, A may deduct these amounts under §1.162–1 in the taxable year the amounts are paid provided the amounts otherwise constitute deductible ordinary and necessary expenses incurred in carrying on a trade or business.

Example 2. De minimis safe harbor; taxpayer without AFS. In Year 1, B purchases 10 computers at $600 each for a total cost of $6,000 as indicated by the invoice. Assume that each computer is a unit of property under §1.263(a)–3(e). B does not have an AFS. B has accounting procedures in place at the beginning of Year 1 to expense amounts paid for property costing less than $1,000 and B treats the amounts paid for the computers as an expense on its books and records. The amounts paid for the printers do not meet the requirements for the de minimis safe harbor under paragraph (f)(1)(ii) of this section because the amount paid for the property exceeds $500 per invoice (or per item as substantiated by the invoice). B may not apply the de minimis safe harbor election to the amounts paid for the 10 computers under paragraph (f)(1) of this section.

Example 3. De minimis safe harbor; taxpayer with AFS. C is a member of a consolidated group for Federal income tax purposes. C's financial results are reported on the consolidated applicable financial statements for the affiliated group. C's affiliated group has a written accounting policy at the beginning of Year 1, which is followed by C, to expense amounts paid for property costing $5,000 or less. In Year 1, C pays $6,250,000 to purchase 1,250 computers at $5,000 each. C receives an invoice from its supplier indicating the total amount due ($6,250,000) and the price per item ($5,000). Assume that each computer is a unit of property under §1.263(a)–3(e). The amounts paid for the computers meet the requirements for the de minimis safe harbor under paragraph (f)(1)(i) of this section. If C elects to apply the de minimis safe harbor under this paragraph (f) for Year 1, C may not capitalize the amounts paid for the 1,250 computers or any other amounts meeting the criteria for the de minimis safe harbor under paragraph (f)(1) of this section. Instead, in accordance with paragraph (f)(3)(iv) of this section, C may deduct these amounts under §1.162–1 in the taxable year the amounts are paid provided the amounts otherwise constitute deductible ordinary and necessary expenses incurred in carrying on a trade or business.

Example 4. De minimis safe harbor; taxpayer with AFS. D is a member of a consolidated group for Federal income tax purposes. D's financial results are reported on the consolidated applicable financial statements for the affiliated group. D's affiliated group has a written accounting policy at the beginning of Year 1, which is followed by D, to expense amounts paid for property costing less than $15,000. In Year 1, D pays $4,800,000 to purchase 800 elliptical machines at $6,000 each. D receives an invoice from its supplier indicating the total amount due ($4,800,000) and the price per item ($6,000). Assume that each elliptical machine is a unit of property under §1.263(a)–3(e). D may not apply the de minimis safe harbor election to the amounts paid for the 800 elliptical machines under paragraph (f)(1) of this section because the amount paid for the property exceeds $5,000 per invoice (or per item as substantiated by the invoice).

Example 5. De minimis safe harbor; additional invoice costs. E is a member of a consolidated group for Federal income tax purposes. E's financial results are reported on the consolidated applicable financial statements for the affiliated group. E's affiliated group has a written accounting policy at the beginning of Year 1, which is followed by E, to expense amounts paid for property costing less than $5,000. In Year 1, E pays $45,000 for the purchase and installation of wireless routers in each of its 10 office locations. Assume that each wireless router is a unit of property under §1.263(a)–3(e). E receives an invoice from its supplier indicating the total amount due ($45,000), including the material price per item ($2,500), and total delivery and installation ($20,000). E allocates the additional invoice costs to the materials on a pro rata basis, bringing the cost of each router to $4,500 ($2,500 materials + $2,000 labor and overhead). The amounts paid for each router, including the allocable additional invoice costs, meet the requirements for the de minimis safe harbor under paragraph (f)(1)(i) of this section. If E elects to apply the de minimis safe harbor under this paragraph (f) for Year 1, E may not capitalize the amounts paid for the 10 routers (including the additional invoice costs) or any other amounts meeting the criteria for the de minimis safe harbor under paragraph (f)(1) of this section. Instead, in accordance with paragraph (f)(3)(iv) of this section, E may deduct these amounts under § 1.162–1 in the taxable year the amounts are paid provided the amounts otherwise constitute deductible ordinary and necessary expenses incurred in carrying on a trade or business.

Example 6. De minimis safe harbor; non-invoice additional costs. F is a corporation that provides consulting services to its customer. F does not have an AFS, but F has accounting procedures in place at the beginning of Year 1 to expense amounts paid for property costing less than $500. In Year 1, F pays $600 to an interior designer to shop for, evaluate, and make recommendations regarding purchasing new furniture for F's conference room. As a result of the interior designer's recommendations, F acquires a conference table for $500 and 10 chairs for $300 each. In Year 1, F receives an invoice from the interior designer for $600 for his services, and F receives a separate invoice from the furniture supplier indicating a total amount due of $500 for the table and $300 for each chair. For Year 1, F treats the amount paid for the table and each chair as an expense on its books and records, and F elects to use the de minimis safe harbor for amounts paid for tangible property that qualify under the safe harbor. The amount paid to the interior designer is a cost of facilitating the acquisition of the table and chairs under § 1.263(a)–2(f). Under paragraph (f)(3)(i) of this section, F is not required to include in the cost of tangible property the additional costs of acquiring such property if these costs are not included in the same invoice as the tangible property. Thus, F is not required to include a pro rata allocation of the amount paid to the interior designer to determine the application of the de minimis safe harbor to the table and the chairs. Accordingly, the amounts paid by F for the table and each chair meet the requirements for the de minimis safe harbor under paragraph (f)(1)(ii) of this section, and F may not capitalize the amounts paid for the table or each chair under paragraph (f)(1) of this section. In addition, F is not required to capitalize the amounts paid to the interior designer as a cost that facilitates the acquisition of tangible property under § 1.263(a)–2(f)(3)(i). Instead, F may deduct the amounts paid for the table, chairs, and interior designer under § 1.162–1 in the taxable year the amounts are paid provided the amounts otherwise constitute deductible ordinary and necessary expenses incurred in carrying on a trade or business.

Example 7. De minimis safe harbor; 12-month economic useful life. G operates a restaurant. In Year 1, G purchases 10 hand-held point-of-service devices at $300 each for a total cost of $3,000 as indicated by invoice. G also purchases 3 tablet computers at $500 each for a total cost of $1,500 as indicated by invoice. Assume each point-of-service device and each tablet computer has an economic useful life of 12 months or less, beginning when they are used in G's business. Assume that each device and each tablet is a unit of property under § 1.263(a)–3(e). G does not have an AFS, but G has accounting procedures in place at the beginning of Year 1 to expense amounts paid for property costing $300 or less and to expense amounts paid for property with an economic useful life of 12 months or less. Thus, G expenses the amounts paid for the hand-held devices on its books and records because each device costs $300. G also expenses the amounts paid for the tablet computers on its books and records because the computers have an economic useful life of 12 months of less, beginning when they are used. The amounts paid for the hand-held devices and the tablet computers meet the requirements for the de minimis safe harbor under paragraph (f)(1)(ii) of this section. If G elects to apply the de minimis safe harbor under this paragraph (f) in Year 1, G may not capitalize the amounts paid for the hand-held devices, the tablet computers, or any other amounts meeting the criteria for the de minimis safe harbor under paragraph (f)(1) of this section. Instead, in accordance with paragraph (f)(3)(iv) of this section, G may deduct the amounts paid for the hand-held devices and tablet computers under § 1.162–1 in the taxable year the amounts are paid provided the amounts otherwise constitute deductible ordinary and necessary business expenses incurred in carrying on a trade or business.

Example 8. De minimis safe harbor; limitation. Assume the facts as in *Example 7*, except G purchases the 3 tablet computers at $600 each for a total cost of $1,800. The amounts paid for the tablet computers do not meet the de minimis rule safe harbor under paragraphs (f)(1)(ii) and (f)(3)(vii) of this section because the cost of each computer exceeds $500. Therefore, the amounts paid for the tablet computers may not be deducted under the safe harbor.

Example 9. De minimis safe harbor; materials and supplies. H is a corporation that provides consulting services to its customers. H has an AFS and a written accounting policy at the beginning of the taxable year to expense amounts paid for property costing $5,000 or less. In Year 1, H purchases 1,000 computers at $500 each for a total cost of $500,000. Assume that each computer is a unit of property under §1.263(a)–3(e) and is not a material or supply under §1.162–3. In addition, H purchases 200 office chairs at $100 each for a total cost of $20,000 and 250 customized briefcases at $80 each for a total cost of $20,000. Assume that each office chair and each briefcase is a material or supply under §1.162–3(c)(1). H treats the amounts paid for the computers, office chairs, and briefcases as expenses on its AFS. The amounts paid for computers, office chairs, and briefcases meet the requirements for the de minimis safe harbor under paragraph (f)(1)(i) of this section. If H elects to apply the de minimis safe harbor under this paragraph (f) in Year 1, H may not capitalize the amounts paid for the 1,000 computers, the 200 office chairs, and the 250 briefcases under paragraph (f)(1) of this section. H may deduct the amounts paid for the computers, the office chairs, and the briefcases under §1.162–1 in the taxable year the amounts are paid provided the amounts otherwise constitute deductible ordinary and necessary expenses incurred in carrying on a trade or business.

Example 10. De minimis safe harbor; coordination with section 263A. J is a member of a consolidated group for Federal income tax purposes. J's financial results are reported on the consolidated AFS for the affiliated group. J's affiliated group has a written accounting policy at the beginning of Year 1, which is followed by J, to expense amounts paid for property costing less than $1,000 or that has an economic useful life of 12 months or less. In Year 1, J acquires jigs, dies, molds, and patterns for use in the manufacture of J's products. Assume each jig, die, mold, and pattern is a unit of property under §1.263(a)–3(e) and costs less than $1,000. In Year 1, J begins using the jigs, dies, molds and patterns to manufacture its products. Assume these items are materials and supplies under §1.162–3(c)(1)(iii), and J elects to apply the de minimis safe harbor under paragraph (f)(1)(i) of this section to amounts qualifying under the safe harbor in Year 1. Under paragraph (f)(3)(v) of this section, the amounts paid for the jigs, dies, molds, and patterns may be subject to capitalization under section 263A if the amounts paid for these tangible properties comprise the direct or allocable indirect costs of other property produced by the taxpayer or property acquired for resale.

Example 11. De minimis safe harbor; anti-abuse rule. K is a corporation that provides hauling services to its customers. In Year 1, K decides to purchase a truck to use in its business. K does not have an AFS. K has accounting procedures in place at the beginning of Year 1 to expense amounts paid for property costing less than $500. K arranges to purchase a used truck for a total of $1,500. Prior to the acquisition, K requests the seller to provide multiple invoices for different parts of the truck. Accordingly, the seller provides K with four invoices during Year 1—one invoice of $500 for the cab, one invoice of $500 for the engine, one invoice of $300 for the trailer, and a fourth invoice of $200 for the tires. K treats the amounts paid under each invoice as an expense on its books and records. K elects to apply the de minimis safe harbor under paragraph (f) of this section in Year 1 and does not capitalize the amounts paid for each invoice pursuant to the safe harbor. Under paragraph (f)(6) of this section, K has applied the de minimis rule to amounts substantiated with invoices created to componentize property that is generally acquired as a single unit of tangible property in the taxpayer's type of business, and this property, if treated as single unit, would exceed the limitations provided under the de minimis rule. Accordingly, K is deemed to manipulate the transaction to acquire the truck with the intent to avoid the purposes of this paragraph (f). As a result, K may not apply the de minimis rule to these amounts and is subject to appropriate adjustments.

(g) *Accounting method changes.* Except for paragraph (f) of this section (the de minimis safe harbor election), a change to comply with this section is a change in method of accounting to which the provisions of sections 446 and 481 and the accompanying regulations apply. A taxpayer seeking to change to a method of accounting permitted in this section must secure the consent of the Commissioner in accordance with §1.446–1(e) and follow the administrative procedures issued under §1.446–1(e)(3)(ii) for obtaining the Commissioner's consent to change its accounting method.

(h) *Effective/applicability date*—(1) *In general.* Except for paragraph (f) of this section, this section generally applies to taxable years beginning on or after January 1, 2014. Paragraph (f) of this section applies to amounts paid in taxable years beginning on or after January 1, 2014. Except as provided in paragraph (h)(1) and paragraph (h)(2) of this section, §1.263(a)–1 as contained in 26 CFR part 1 edition revised as of April 1, 2011, applies to taxable years beginning before January 1, 2014.

(2) *Early application of this section*—(i) *In general.* Except for paragraph (f) of this section, a taxpayer may choose to apply this section to taxable years beginning on or after January 1, 2012. A

taxpayer may choose to apply paragraph (f) of this section to amounts paid in taxable years beginning on or after January 1, 2012.

(ii) *Transition rule for de minimis safe harbor election on 2012 or 2013 returns.* If under paragraph (h)(2)(i) of this section, a taxpayer chooses to make the election to apply the de minimis safe harbor under paragraph (f) of this section for amounts paid in its taxable year beginning on or after January 1, 2012, and ending on or before September 19, 2013 (applicable taxable year), and the taxpayer did not make the election specified in paragraph (f)(5) of this section on its timely filed original Federal tax return for the applicable taxable year, the taxpayer must make the election specified in paragraph (f)(5) of this section for the applicable taxable year by filing an amended Federal tax return for the applicable taxable year on or before 180 days from the due date including extensions of the taxpayer's Federal tax return for the applicable taxable year, notwithstanding that the taxpayer may not have extended the due date.

(3) *Optional application of TD 9564.* A taxpayer may choose to apply §1.263(a)–1T as contained in TD 9564 (76 FR 81060) December 27, 2011, to taxable years beginning on or after January 1, 2012, and before January 1, 2014.

[T.D. 9636, 78 FR 57710, Sept. 19, 2013, as amended by T.D. 9636, 79 FR 42191, July 21, 2014]

§ 1.263(a)–2 Amounts paid to acquire or produce tangible property.

(a) *Overview.* This section provides rules for applying section 263(a) to amounts paid to acquire or produce a unit of real or personal property. Paragraph (b) of this section contains definitions. Paragraph (c) of this section contains the rules for coordinating this section with other provisions of the Internal Revenue Code (Code). Paragraph (d) of this section provides the general requirement to capitalize amounts paid to acquire or produce a unit of real or personal property. Paragraph (e) of this section provides the requirement to capitalize amounts paid to defend or perfect title to real or personal property. Paragraph (f) of this section provides the rules for determining the extent to which taxpayers must capitalize transaction costs related to the acquisition of tangible property. Paragraphs (g) and (h) of this section address the treatment and recovery of capital expenditures. Paragraph (i) of this section provides for changes in methods of accounting to comply with this section, and paragraph (j) of this section provides the effective and applicability dates for the rules under this section.

(b) *Definitions.* For purposes of this section, the following definitions apply:

(1) *Amount paid.* In the case of a taxpayer using an accrual method of accounting, the terms *amount paid* and *payment* mean a liability incurred (within the meaning of §1.446–1(c)(1)(ii)). A liability may not be taken into account under this section prior to the taxable year during which the liability is incurred.

(2) *Personal property* means tangible personal property as defined in §1.48–1(c).

(3) *Real property* means land and improvements thereto, such as buildings or other inherently permanent structures (including items that are structural components of the buildings or structures) that are not personal property as defined in paragraph (b)(2) of this section. Any property that constitutes other tangible property under §1.48–1(d) is treated as real property for purposes of this section. Local law is not controlling in determining whether property is real property for purposes of this section.

(4) *Produce* means construct, build, install, manufacture, develop, create, raise, or grow. This definition is intended to have the same meaning as the definition used for purposes of section 263A(g)(1) and §1.263A–2(a)(1)(i), except that improvements are excluded from the definition in this paragraph (b)(4) and are separately defined and addressed in §1.263(a)–3.

(c) *Coordination with other provisions of the Code*—(1) *In general.* Nothing in this section changes the treatment of any amount that is specifically provided for under any provision of the Code or the Treasury Regulations other than section 162(a) or section 212 and the regulations under those sections. For example, see section 263A requiring taxpayers to capitalize the direct and allocable indirect costs of property produced by the taxpayer and property acquired for resale. See also section 195 requiring taxpayers to capitalize certain costs as start-up expenditures.

(2) *Materials and supplies.* Nothing in this section changes the treatment of amounts paid to acquire or produce property that is properly treated as materials and supplies under § 1.162–3.

(d) *Acquired or produced tangible property*—(1) *Requirement to capitalize.* Except as provided in § 1.162–3 (relating to materials and supplies) and in § 1.263(a)–1(f) (providing a de minimis safe harbor election), a taxpayer must capitalize amounts paid to acquire or produce a unit of real or personal property (as determined under § 1.263(a)–3(e)), including leasehold improvements, land and land improvements, buildings, machinery and equipment, and furniture and fixtures. Section 1.263(a)–3(f) provides the rules for determining whether amounts are for leasehold improvements. Amounts paid to acquire or produce a unit of real or personal property include the invoice price, transaction costs as determined under paragraph (f) of this section, and costs for work performed prior to the date that the unit of property is placed in service by the taxpayer (without regard to any applicable convention under section 168(d)). A taxpayer also must capitalize amounts paid to acquire real or personal property for resale.

(2) *Examples.* The following examples illustrate the rules of this paragraph (d). Unless otherwise provided, assume that the taxpayer does not elect the de minimis safe harbor under § 1.263(a)–1(f) and that the property is not acquired for resale under section 263A.

Example 1. Acquisition of personal property. A purchases new cash registers for use in its retail store located in leased space in a shopping mall. Assume each cash register is a unit of property as determined under § 1.263(a)–3(e) and is not a material or supply under § 1.162–3. A must capitalize under paragraph (d)(1) of this section the amount paid to acquire each cash register.

Example 2. Acquisition of personal property that is a material or supply; coordination with § 1.162–3. B operates a fleet of aircraft. In Year 1, B acquires a stock of component parts, which it intends to use to maintain and repair its aircraft. Assume that each component part is a material or supply under § 1.162–3(c)(1) and B does not make elections under § 1.162–3(d) to treat the materials and supplies as capital expenditures. In Year 2, B uses the component parts in the repair and maintenance of its aircraft. Because the parts are materials and supplies under § 1.162–3, B is not required to capitalize the amounts paid for the parts under paragraph (d)(1) of this section. Rather, to determine the treatment of these amounts, B must apply the rules under § 1.162–3, governing the treatment of materials and supplies.

Example 3. Acquisition of unit of personal property; coordination with § 1.162–3. C operates a rental business that rents out a variety of small individual items to customers (rental items). C maintains a supply of rental items on hand to replace worn or damaged items. C purchases a large quantity of rental items to be used in its business. Assume that each of these rental items is a unit of property under § 1.263(a)–3(e). Also assume that a portion of the rental items are materials and supplies under § 1.162–3(c)(1). Under paragraph (d)(1) of this section, C must capitalize the amounts paid for the rental items that are not materials and supplies under § 1.162–3(c)(1). However, C must apply the rules in § 1.162–3 to determine the treatment of the rental items that are materials and supplies under § 1.162–3(c)(1).

Example 4. Acquisition or production cost. D purchases and produces jigs, dies, molds, and patterns for use in the manufacture of D's products. Assume that each of these items is a unit of property as determined under § 1.263(a)–3(e) and is not a material and supply under § 1.162–3(c)(1). D is required to capitalize under paragraph (d)(1) of this section the amounts paid to acquire and produce the jigs, dies, molds, and patterns.

Example 5. Acquisition of land. F purchases a parcel of undeveloped real estate. F must capitalize under paragraph (d)(1) of this section the amount paid to acquire the real estate. See paragraph (f) of this section for the treatment of amounts paid to facilitate the acquisition of real property.

Example 6. Acquisition of building. G purchases a building. G must capitalize under paragraph (d)(1) of this section the amount paid to acquire the building. See paragraph (f) of this section for the treatment of amounts paid to facilitate the acquisition of real property.

Example 7. Acquisition of property for resale and production of property for sale; coordination with section 263A. H purchases goods for resale and produces other goods for sale. H must capitalize under paragraph (d)(1) of this section the amounts paid to acquire and produce the goods. See section 263A for the amounts required to be capitalized to the property produced or to the property acquired for resale.

Example 8. Production of building; coordination with section 263A. J constructs a building. J must capitalize under paragraph (d)(1) of this section the amount paid to construct the building. See section 263A for the costs required to be capitalized to the real property produced by J.

Example 9. Acquisition of assets constituting a trade or business. K owns tangible and intangible assets that constitute a trade or business. L purchases all the assets of K in a taxable transaction. L must capitalize under paragraph (d)(1) of this section the amount paid for the tangible assets of K. See §1.263(a)–4 for the treatment of amounts paid to acquire or create intangibles and §1.263(a)–5 for the treatment of amounts paid to facilitate the acquisition of assets that constitute a trade or business. See section 1060 for special allocation rules for certain asset acquisitions.

Example 10. Work performed prior to placing the property in service. In Year 1, M purchases a building for use as a business office. Prior to placing the building in service, M pays amounts to repair cement steps, refinish wood floors, patch holes in walls, and paint the interiors and exteriors of the building. In Year 2, M places the building in service and begins using the building as its business office. Assume that the work that M performs does not constitute an improvement to the building or its structural components under §1.263(a)–3. Under §1.263–3(e)(2)(i), the building and its structural components is a single unit of property. Under paragraph (d)(1) of this section, the amounts paid must be capitalized as amounts to acquire the building unit of property because they were for work performed prior to M's placing the building in service.

Example 11. Work performed prior to placing the property in service. In January Year 1, N purchases a new machine for use in an existing production line of its manufacturing business. Assume that the machine is a unit of property under §1.263(a)–3(e) and is not a material or supply under §1.162–3. N pays amounts to install the machine, and after the machine is installed, N pays amounts to perform a critical test on the machine to ensure that it will operate in accordance with quality standards. On November 1, Year 1, the critical test is complete, and N places the machine in service on the production line. N pays amounts to perform periodic quality control testing after the machine is placed in service. Under paragraph (d)(1) of this section, the amounts paid for the installation and the critical test performed before the machine is placed in service must be capitalized by N as amounts to acquire the machine. However, amounts paid for periodic quality control testing after N placed the machine in service are not required to be capitalized as amounts paid to acquire the machine.

(e) *Defense or perfection of title to property*—(1) *In general.* Amounts paid to defend or perfect title to real or personal property are amounts paid to acquire or produce property within the meaning of this section and must be capitalized.

(2) *Examples.* The following examples illustrate the rule of this paragraph (e):

Example 1. Amounts paid to contest condemnation X owns real property located in County. County files an eminent domain complaint condemning a portion of X's property to use as a roadway. X hires an attorney to contest the condemnation. The amounts that X paid to the attorney must be capitalized because they were to defend X's title to the property.

Example 2. Amounts paid to invalidate ordinance. Y is in the business of quarrying and supplying for sale sand and stone in a certain municipality. Several years after Y establishes its business, the municipality in which it is located passes an ordinance that prohibits the operation of Y's business. Y incurs attorney's fees in a successful prosecution of a suit to invalidate the municipal ordinance. Y prosecutes the suit to preserve its business activities and not to defend Y's title in the property. Therefore, the attorney's fees that Y paid are not required to be capitalized under paragraph (e)(1) of this section.

Example 3. Amounts paid to challenge building line. The board of public works of a municipality establishes a building line across Z's business property, adversely affecting the value of the property. Z incurs legal fees in unsuccessfully litigating the establishment of the building line. The amounts Z paid to the attorney must be capitalized because they were to defend Z's title to the property.

(f) *Transaction costs*—(1) *In general.* Except as provided in §1.263(a)–1(f)(3)(i) (for purposes of the de minimis safe harbor), a taxpayer must capitalize amounts paid to facilitate the acquisition of real or personal property. See §1.263(a)–5 for the treatment of amounts paid to facilitate the acquisition of assets that constitute a trade or business. See §1.167(a)–5 for allocations of facilitative costs between depreciable and non-depreciable property.

(2) *Scope of facilitate*—(i) *In general.* Except as otherwise provided in this section, an amount is paid to facilitate the acquisition of real or personal property if the amount is paid in the process of investigating or otherwise

pursuing the acquisition. Whether an amount is paid in the process of investigating or otherwise pursuing the acquisition is determined based on all of the facts and circumstances. In determining whether an amount is paid to facilitate an acquisition, the fact that the amount would (or would not) have been paid but for the acquisition is relevant but is not determinative. Amounts paid to facilitate an acquisition include, but are not limited to, inherently facilitative amounts specified in paragraph (f)(2)(ii) of this section.

(ii) *Inherently facilitative amounts.* An amount is paid in the process of investigating or otherwise pursuing the acquisition of real or personal property if the amount is inherently facilitative. An amount is inherently facilitative if the amount is paid for—

(A) Transporting the property (for example, shipping fees and moving costs);

(B) Securing an appraisal or determining the value or price of property;

(C) Negotiating the terms or structure of the acquisition and obtaining tax advice on the acquisition;

(D) Application fees, bidding costs, or similar expenses;

(E) Preparing and reviewing the documents that effectuate the acquisition of the property (for example, preparing the bid, offer, sales contract, or purchase agreement);

(F) Examining and evaluating the title of property;

(G) Obtaining regulatory approval of the acquisition or securing permits related to the acquisition, including application fees;

(H) Conveying property between the parties, including sales and transfer taxes, and title registration costs;

(I) Finders' fees or brokers' commissions, including contingency fees (defined in paragraph (f)(3)(iii) of this section);

(J) Architectural, geological, survey, engineering, environmental, or inspection services pertaining to particular properties; or

(K) Services provided by a qualified intermediary or other facilitator of an exchange under section 1031.

(iii) *Special rule for acquisitions of real property*—(A) *In general.* Except as provided in paragraph (f)(2)(ii) of this section (relating to inherently facilitative amounts), an amount paid by the taxpayer in the process of investigating or otherwise pursuing the acquisition of real property does not facilitate the acquisition if it relates to activities performed in the process of determining whether to acquire real property and which real property to acquire.

(B) *Acquisitions of real and personal property in a single transaction.* An amount paid by the taxpayer in the process of investigating or otherwise pursuing the acquisition of personal property facilitates the acquisition of such personal property, even if such property is acquired in a single transaction that also includes the acquisition of real property subject to the special rule set out in paragraph (f)(2)(iii)(A) of this section. A taxpayer may use a reasonable allocation method to determine which costs facilitate the acquisition of personal property and which costs relate to the acquisition of real property and are subject to the special rule of paragraph (f)(2)(iii)(A) of this section.

(iv) *Employee compensation and overhead costs*—(A) *In general.* For purposes of paragraph (f) of this section, amounts paid for employee compensation (within the meaning of §1.263(a)–4(e)(4)(ii)) and overhead are treated as amounts that do not facilitate the acquisition of real or personal property. However, section 263A provides rules for employee compensation and overhead costs required to be capitalized to property produced by the taxpayer or to property acquired for resale.

(B) *Election to capitalize.* A taxpayer may elect to treat amounts paid for employee compensation or overhead as amounts that facilitate the acquisition of property. The election is made separately for each acquisition and applies to employee compensation or overhead, or both. For example, a taxpayer may elect to treat overhead, but not employee compensation, as amounts that facilitate the acquisition of property. A taxpayer makes the election by treating the amounts to which the election applies as amounts that facilitate the acquisition in the taxpayer's timely filed original Federal tax return (including extensions) for the taxable year during which the amounts are paid. Sections 301.9100–1 through 301.9100–3 of this chapter provide the rules governing extensions of the time to make regulatory elections. In the case of an S corporation or a partnership, the election is made by the S corporation or by the partnership, and not by the shareholders or partners. A taxpayer may revoke an election made under this paragraph (f)(2)(iv)(B) with respect to each acquisition only by filing a request for a private letter ruling and obtaining the Commissioner's consent to revoke the election. The Commissioner may grant a request to revoke this election if the taxpayer acted reasonably and in good faith and the revocation will not prejudice the interests of Government. See generally §301.9100–3 of this chapter. The manner of electing and revoking the election to capitalize under this paragraph (f)(2)(iv)(B) may be modified through guidance of general applicability (see §§606.601(d)(2) and 601.602 of this section). An election may not be made or revoked through the filing of an application for change in accounting method or, before obtaining the Commissioner's consent to make the late election or to revoke the election, by filing an amended Federal tax return.

(3) *Treatment of transaction costs*—(i) *In general*. Except as provided under §1.263(a)–1(f)(3)(i) (for purposes of the de minimis safe harbor), all amounts paid to facilitate the acquisition of real or personal property are capital expenditures. Facilitative amounts allocable to real or personal property must be included in the basis of the property acquired.

(ii) *Treatment of inherently facilitative amounts allocable to property not acquired*. Inherently facilitative amounts allocable to real or personal property are capital expenditures related to such property, even if the property is not eventually acquired. Except for contingency fees as defined in paragraph (f)(3)(iii) of this section, inherently facilitative amounts allocable to real or personal property not acquired may be allocated to those properties and recovered as appropriate in accordance with the applicable provisions of the Code and the Treasury Regulations (for example, sections 165, 167, or 168). See paragraph (h) of this section for the recovery of capitalized amounts.

(iii) *Contingency fees*. For purposes of this section, a contingency fee is an amount paid that is contingent on the successful closing of the acquisition of real or personal property. Contingency fees must be included in the basis of the property acquired and may not be allocated to the property not acquired.

(4) *Examples*. The following examples illustrate the rules of paragraph (f) of this section. For purposes of these examples, assume that the taxpayer does not elect the de minimis safe harbor under §1.263(a)–1(f):

Example 1. Broker's fees to facilitate an acquisition A decides to purchase a building in which to relocate its offices and hires a real estate broker to find a suitable building. A pays fees to the broker to find property for A to acquire. Under paragraph (f)(2)(ii)(I) of this section, A must capitalize the amounts paid to the broker because these costs are inherently facilitative of the acquisition of real property.

Example 2. Inspection and survey costs to facilitate an acquisition B decides to purchase Building X and pays amounts to third-party contractors for a termite inspection and an environmental survey of Building X. Under paragraph (f)(2)(ii)(J) of this section, B must capitalize the amounts paid for the inspection and the survey of the building because these costs are inherently facilitative of the acquisition of real property.

Example 3. Moving costs to facilitate an acquisition C purchases all the assets of D and, in connection with the purchase, hires a transportation company to move storage tanks from D's plant to C's plant. Under paragraph (f)(2)(ii)(A) of this section, C must capitalize the amount paid to move the storage tanks from D's plant to C's plant because this cost is inherently facilitative to the acquisition of personal property.

Example 4. Geological and geophysical costs; coordination with other provisions E is in the business of exploring, purchasing, and developing properties in the United States for the production of oil and gas. E considers acquiring a particular property but first incurs costs for the services of an engineering firm to perform geological and geophysical studies to determine if the property is suitable for oil or gas production. Assume that the amounts that E paid to the engineering firm constitute geological and geophysical expenditures under section 167(h). Although the amounts that E paid for the geological and geophysical services are inherently facilitative to the acquisition of real property under paragraph (f)(2)(ii)(J) of this section, E is not required to include those amounts in the basis of the real property acquired. Rather, under paragraph (c) of this section, E must capitalize these costs separately and amortize such costs as required under section 167(h) (addressing the amortization of geological and geophysical expenditures).

Example 5. Scope of facilitate F is in the business of providing legal services to clients. F is interested in acquiring a new conference table for its office. F hires and incurs fees for an interior designer to shop for, evaluate, and make recommendations to F regarding which new table to acquire. Under paragraphs (f)(1) and (2) of this section, F must capitalize the amounts paid to the interior designer to provide these services because they are paid in the process of investigating or otherwise pursuing the acquisition of personal property.

Example 6. Transaction costs allocable to multiple properties G, a retailer, wants to acquire land for the purpose of building a new distribution facility for its products. G considers various properties on Highway X in State Y. G incurs fees for the services of an architect to advise and evaluate the suitability of the sites for the type of facility that G intends to construct on the selected site. G must capitalize the architect fees as amounts paid to acquire land because these amounts are inherently facilitative to the acquisition of land under paragraph (f)(2)(ii)(J) of this section.

Example 7. Transaction costs; coordination with section 263A H, a retailer, wants to acquire land for the purpose of building a new distribution facility for its products. H considers various properties on Highway X in State Y. H incurs fees for the services of an architect to prepare preliminary floor plans for a building that H could construct at any of the sites. Under these facts, the architect's fees are not facilitative to the acquisition of land under paragraph (f) of this section. Therefore, H is not required to capitalize the architect fees as amounts paid to acquire land. However, the amounts paid for the architect's fees may be subject to capitalization under section 263A if these amounts comprise the direct or allocable indirect cost of property produced by H, such as the building.

Example 8. Special rule for acquisitions of real property J owns several retail stores. J decides to examine the feasibility of opening a new store in City X. In October, Year 1, J hires and incurs costs for a development consulting firm to study City X and perform market surveys, evaluate zoning and environmental requirements, and make preliminary reports and recommendations as to areas that J should consider for purposes of locating a new store. In December, Year 1, J continues to consider whether to purchase real property in City X and which property to acquire. J hires, and incurs fees for, an appraiser to perform appraisals on two different sites to determine a fair offering price for each site. In March, Year 2, J decides to acquire one of these two sites for the location of its new store. At the same time, J determines not to acquire the other site. Under paragraph (f)(2)(iii) of this section, J is not required to capitalize amounts paid to the development consultant in Year 1 because the amounts relate to activities performed in the process of determining whether to acquire real property and which real property to acquire, and the amounts are not inherently facilitative costs under paragraph (f)(2)(ii) of this section. However, J must capitalize amounts paid to the appraiser in Year 1 because the appraisal costs are inherently facilitative costs under paragraph (f)(2)(ii)(B) of this section. In Year 2, J must include the appraisal costs allocable to property acquired in the basis of the property acquired. In addition, J may recover the appraisal costs allocable to the property not acquired in accordance with paragraphs (f)(3)(ii) and (h) of this section. See, for example, § 1.165–2 for losses on the permanent withdrawal of non-depreciable property.

Example 9. Contingency fee K owns several restaurant properties. K decides to open a new restaurant in City X. In October, Year 1, K hires a real estate consultant to identify potential property upon which K may locate its restaurant, and is obligated to compensate the consultant upon the acquisition of property. The real estate consultant identifies three properties, and K decides to acquire one of those properties. Upon closing of the acquisition of that property, K pays the consultant its fee. The amount paid to the consultant constitutes a contingency fee under paragraph (f)(3)(iii) of this section because the payment is contingent on the successful closing of the acquisition of property. Accordingly, under paragraph (f)(3)(iii) of this section, K must include the amount paid to the consultant in the basis of the property acquired. K is not permitted to allocate the amount paid between the properties acquired and not acquired.

Example 10. Employee compensation and overhead L, a freight carrier, maintains an acquisition department whose sole function is to arrange for the purchase of vehicles and aircraft from manufacturers or other parties to be used in its freight carrying business. As provided in paragraph (f)(2)(iv)(A) of this section, L is not required to capitalize any portion of the compensation paid to employees in its acquisition department or any portion of its overhead allocable to its acquisition department. However, under paragraph (f)(2)(iv)(B) of this section, L may elect to capitalize the compensation and/or overhead costs allocable to the acquisition of a vehicle or aircraft by treating these amounts as costs that facilitate the acquisition of that property in its timely filed original Federal tax return for the year the amounts are paid.

(g) *Treatment of capital expenditures.* Amounts required to be capitalized under this section are capital expenditures and must be taken into account through a charge to capital account or basis, or in the case of property that is inventory in the hands of a taxpayer, through inclusion in inventory costs.

(h) *Recovery of capitalized amounts*—(1) *In general.* Amounts that are capitalized under this section are recovered through depreciation, cost of goods sold, or by an adjustment to basis at the time the property is placed in service, sold, used, or otherwise disposed of by the taxpayer. Cost recovery is determined by the applicable provisions of the Code and regulations relating to the use, sale, or disposition of property.

(2) *Examples.* The following examples illustrate the rule of paragraph (h)(1) of this section. For purposes of these examples, assume that the taxpayer does not elect the de minimis safe harbor under §1.263(a)–1(f).

Example 1. Recovery when property placed in service X owns a 10-unit apartment building. The refrigerator in one of the apartments stops functioning, and X purchases a new refrigerator to replace the old one. X pays for the acquisition, delivery, and installation of the new refrigerator. Assume that the refrigerator is the unit of property, as determined under §1.263(a)–3(e), and is not a material or supply under §1.162–3. Under paragraph (d)(1) of this section, X is required to capitalize the amounts paid for the acquisition, delivery, and installation of the refrigerator. Under this paragraph (h), the capitalized amounts are recovered through depreciation, which begins when the refrigerator is placed in service by X.

Example 2. Recovery when property used in the production of property Y operates a plant where it manufactures widgets. Y purchases a tractor loader to move raw materials into and around the plant for use in the manufacturing process. Assume that the tractor loader is a unit of property, as determined under §1.263(a)–3(e), and is not a material or supply under §1.162–3. Under paragraph (d)(1) of this section, Y is required to capitalize the amounts paid to acquire the tractor loader. Under this paragraph (h), the capitalized amounts are recovered through depreciation, which begins when Y places the tractor loader in service. However, because the tractor loader is used in the production of property, under section 263A the cost recovery (that is, the depreciation) may also be capitalized to Y's property produced, and, consequently, recovered through cost of goods sold. See §1.263A–1(e)(3)(ii)(I).

(i) *Accounting method changes.* Unless otherwise provided under this section, a change to comply with this section is a change in method of accounting to which the provisions of sections 446 and 481 and the accompanying regulations apply. A taxpayer seeking to change to a method of accounting permitted in this section must secure the consent of the Commissioner in accordance with §1.446–1(e) and follow the administrative procedures issued under §1.446–1(e)(3)(ii) for obtaining the Commissioner's consent to change its accounting method.

(j) *Effective/applicability date*—(1) *In general.* Except for paragraphs (f)(2)(iii), (f)(2)(iv), and (f)(3)(ii) of this section, this section generally applies to taxable years beginning on or after January 1, 2014. Paragraphs (f)(2)(iii), (f)(2)(iv), and (f)(3)(ii) of this section apply to amounts paid in taxable years beginning on or after January 1, 2014. Except as provided in paragraphs (j)(1) and (j)(2) of this section, §1.263(a)–2 as contained in 26 CFR part 1 edition revised as of April 1, 2011, applies to taxable years beginning before January 1, 2014.

(2) *Early application of this section*—(i) *In general.* Except for paragraphs (f)(2)(iii), (f)(2)(iv), and (f)(3)(ii) of this section of this section, a taxpayer may choose to apply this section to taxable years beginning on or after January 1, 2012. A taxpayer may choose to apply paragraphs (f)(2)(iii), (f)(2)(iv), and (f)(3)(ii) of this section to amounts paid in taxable years beginning on or after January 1, 2012.

(ii) *Transition rule for election to capitalize employee compensation and overhead costs on 2012 or 2013 returns.* If under paragraph (j)(2)(i) of this section, a taxpayer chooses to make the election to capitalize employee compensation and overhead costs under paragraph (f)(2)(iv)(B) of this section for amounts paid in its taxable year beginning on or after January 1, 2012, and ending on or before September 19, 2013 (applicable taxable year), and the taxpayer did not make the election specified in paragraph (f)(2)(iv)(B) of this section on its timely filed original Federal tax return for the applicable taxable year, the taxpayer must make the election specified in paragraph (f)(2)(iv)(B) of this section for the applicable taxable year by filing an amended Federal tax return for the applicable taxable year on or before 180 days from the due date including extensions of the taxpayer's Federal tax return for the applicable taxable year, notwithstanding that the taxpayer may not have extended the due date.

(3) *Optional application of TD 9564.* Except for §1.263(a)–2T(f)(2)(iii), (f)(2)(iv), (f)(3)(ii), and (g), a taxpayer may choose to apply §1.263(a)–2T as contained in TD 9564 (76 FR 81060) December 27, 2011, to taxable years beginning on or after January 1, 2012, and before January 1, 2014. A taxpayer may choose to apply §1.263(a)–2T(f)(2)(iii), (f)(2)(iv), (f)(3)(ii) and (g) as contained in TD 9564 (76 FR 81060) December 27, 2011, to amounts paid in taxable years beginning on or after January 1, 2012, and before January 1, 2014.

[T.D. 9636, 78 FR 57714, Sept. 19, 2013, as amended by T.D. 9636, 79 FR 42191, July 21, 2014]

§1.263(a)–3 Amounts paid to improve tangible property.

(a) *Overview.* This section provides rules for applying section 263(a) to amounts paid to improve tangible property. Paragraph (b) of this section provides definitions. Paragraph (c) of this section provides rules for coordinating this section with other provisions of the Internal Revenue Code (Code). Paragraph (d) of this section provides the requirement to capitalize amounts paid to improve tangible property and provides the general rules for determining whether a unit of property is improved. Paragraph (e) of this section provides the rules for determining the appropriate unit of property. Paragraph (f) of this section provides rules for leasehold improvements. Paragraph (g) of this section provides special rules for determining improvement costs in particular contexts, including indirect costs incurred during an improvement, removal costs, aggregation of related costs, and regulatory compliance costs. Paragraph (h) of this section provides a safe harbor for small taxpayers. Paragraph (i) provides a safe harbor for routine maintenance costs. Paragraph (j) of this section provides rules for determining whether amounts are paid for betterments to the unit of property. Paragraph (k) of this section provides rules for determining whether amounts are paid to restore the unit of property. Paragraph (l) of this section provides rules for amounts paid to adapt the unit of property to a new or different use. Paragraph (m) of this section provides an optional regulatory accounting method. Paragraph (n) of this section provides an election to capitalize repair and maintenance costs consistent with books and records. Paragraphs (o) and (p) of this section provide for the treatment and recovery of amounts capitalized under this section. Paragraphs (q) and (r) of this section provide for accounting method changes and state the effective/applicability date for the rules in this section.

(b) *Definitions.* For purposes of this section, the following definitions apply:

(1) *Amount paid.* In the case of a taxpayer using an accrual method of accounting, the terms *amounts paid* and *payment* mean a liability incurred (within the meaning of §1.446–1(c)(1)(ii)). A liability may not be taken into account under this section prior to the taxable year during which the liability is incurred.

(2) *Personal property* means tangible personal property as defined in §1.48–1(c).

(3) *Real property* means land and improvements thereto, such as buildings or other inherently permanent structures (including items that are structural components of the buildings or structures) that are not personal property as defined in paragraph (b)(2) of this section. Any property that constitutes other tangible property under §1.48–1(d) is also treated as real property for purposes of this section. Local law is not controlling in determining whether property is real property for purposes of this section.

(4) *Owner* means the taxpayer that has the benefits and burdens of ownership of the unit of property for Federal income tax purposes.

(c) *Coordination with other provisions of the Code*—(1) *In general.* Nothing in this section changes the treatment of any amount that is specifically provided for under any provision of the Code or the regulations other than section 162(a) or section 212 and the regulations under those sections. For example, see section 263A requiring taxpayers to capitalize the direct and allocable indirect costs of property produced and property acquired for resale.

(2) *Materials and supplies.* A material or supply as defined in §1.162–3(c)(1) that is acquired and used to improve a unit of tangible property is subject to this section and is not treated as a material or supply under §1.162–3.

(3) *Example.* The following example illustrates the rules of this paragraph (c):

Example. Railroad rolling stock X is a railroad that properly treats amounts paid for the rehabilitation of railroad rolling stock as deductible expenses under section 263(d). X is not required to capitalize the amounts paid because nothing in this section changes the treatment of amounts specifically provided for under section 263(d).

(d) *Requirement to capitalize amounts paid for improvements.* Except as provided in paragraph (h) or paragraph (n) of this section or under §1.263(a)–1(f), a taxpayer generally must capitalize the related amounts (as defined in paragraph (g)(3) of this section) paid to improve a unit of property owned by the taxpayer. However, paragraph (f) of this section applies to the treatment of amounts paid to improve leased property. Section 263A provides the requirement to capitalize the direct and allocable indirect costs of property produced by the taxpayer and property acquired for resale. Section 1016 provides for the addition of capitalized amounts to the basis of the property, and section 168 governs the treatment of additions or improvements for depreciation purposes. For purposes of this section, a unit of property is improved if the amounts paid for activities performed after the property is placed in service by the taxpayer—

(1) Are for a betterment to the unit of property (see paragraph (j) of this section);

(2) Restore the unit of property (see paragraph (k) of this section); or

(3) Adapt the unit of property to a new or different use (see paragraph (l) of this section).

(e) *Determining the unit of property*—(1) *In general.* The unit of property rules in this paragraph (e) apply only for purposes of section 263(a) and §§1.263(a)–1, 1.263(a)–2, 1.263(a)–3, and 1.162–3. Unless otherwise specified, the unit of property determination is based upon the functional interdependence standard provided in paragraph (e)(3)(i) of this section. However, special rules are provided for buildings (see paragraph (e)(2) of this section), plant property (see paragraph (e)(3)(ii) of this section), network assets (see paragraph (e)(3)(iii) of this section), leased property (see paragraph (e)(2)(v) of this section for leased buildings and paragraph (e)(3)(iv) of this section for leased property other than buildings), and improvements to property (see paragraph (e)(4) of this section). Additional rules are provided if a taxpayer has assigned different MACRS classes or depreciation methods to components of property or subsequently changes the class or depreciation method of a component or other item of property (see paragraph (e)(5) of this section). Property that is aggregated or subject to a general asset account election or accounted for in a multiple asset account (that is, pooled) may not be treated as a single unit of property.

(2) *Building*—(i) *In general.* Except as otherwise provided in paragraphs (e)(4), and (e)(5)(ii) of this section, in the case of a building (as defined in §1.48–1(e)(1)), each building and its structural components (as defined in §1.48–1(e)(2)) is a single unit of property (''building''). Paragraph (e)(2)(iii) of this section provides the unit of property for condominiums, paragraph (e)(2)(iv) of this section provides the unit of property for cooperatives, and paragraph (e)(2)(v) of this section provides the unit of property for leased buildings.

(ii) *Application of improvement rules to a building.* An amount is paid to improve a building under paragraph (d) of this section if the amount is paid for an improvement under paragraphs (j), (k), or paragraph (l) of this section to any of the following:

(A) *Building structure.* A building structure consists of the building (as defined in §1.48–1(e)(1)), and its structural components (as defined in §1.48–1(e)(2)), other than the structural components designated as buildings systems in paragraph (e)(2)(ii)(B) of this section.

(B) *Building system.* Each of the following structural components (as defined in §1.48–1(e)(2)), including the components thereof, constitutes a building system that is separate from the building structure, and to which the improvement rules must be applied—

(*1*) Heating, ventilation, and air conditioning (''HVAC'') systems (including motors, compressors, boilers, furnace, chillers, pipes, ducts, radiators);

(*2*) Plumbing systems (including pipes, drains, valves, sinks, bathtubs, toilets, water and sanitary sewer collection equipment, and site utility equipment used to distribute water and waste to and from the property line and between buildings and other permanent structures);

(*3*) Electrical systems (including wiring, outlets, junction boxes, lighting fixtures and associated connectors, and site utility equipment used to distribute electricity from the property line to and between buildings and other permanent structures);

(*4*) All escalators;

(*5*) All elevators;

(*6*) Fire-protection and alarm systems (including sensing devices, computer controls, sprinkler heads, sprinkler mains, associated piping or plumbing, pumps, visual and audible alarms, alarm control panels, heat and smoke detection devices, fire escapes, fire doors, emergency exit lighting and signage, and fire fighting equipment, such as extinguishers, and hoses);

(*7*) Security systems for the protection of the building and its occupants (including window and door locks, security cameras, recorders, monitors, motion detectors, security lighting, alarm systems, entry and access systems, related junction boxes, associated wiring and conduit);

(*8*) Gas distribution system (including associated pipes and equipment used to distribute gas to and from the property line and between buildings or permanent structures); and

(*9*) Other structural components identified in published guidance in the FEDERAL REGISTER or in the Internal Revenue Bulletin (see §601.601(d)(2)(ii)(*b*) of this chapter) that are excepted from the building structure under paragraph (e)(2)(ii)(A) of this section and are specifically designated as building systems under this section.

(iii) *Condominium*—(A) *In general.* In the case of a taxpayer that is the owner of an individual unit in a building with multiple units (such as a condominium), the unit of property (''condominium'') is the individual unit owned by the taxpayer and the structural components (as defined in §1.48–1(e)(2)) that are part of the unit.

(B) *Application of improvement rules to a condominium.* An amount is paid to improve a condominium under paragraph (d) of this section if the amount is paid for an improvement under paragraphs (j), (k), or paragraph (l) of this section to the building structure (as defined in paragraph (e)(2)(ii)(A) of this section) that is part of the condominium or to the portion of any building system (as defined in paragraph (e)(2)(ii)(B) of this section) that is part of the condominium. In the case of the condominium management association, the association must apply the improvement rules to the building structure or to any building system described under paragraphs (e)(2)(ii)(A) and (e)(2)(ii)(B) of this section.

(iv) *Cooperative*—(A) *In general.* In the case of a taxpayer that has an ownership interest in a cooperative housing corporation, the unit of property (''cooperative'') is the portion of the building in which the taxpayer has possessory rights and the structural components (as defined in §1.48–1(e)(2)) that are part of the portion of the building subject to the taxpayer's possessory rights (cooperative).

(B) *Application of improvement rules to a cooperative.* An amount is paid to improve a cooperative under paragraph (d) of this section if the amount is paid for an improvement under paragraphs (j), (k), or (l) of this section to the portion of the building structure (as defined in paragraph (e)(2)(ii)(A) of this section) in which the taxpayer has possessory rights or to the portion of any building system (as defined in paragraph (e)(2)(ii)(B) of this section) that is part of the portion of the building structure subject to the taxpayer's possessory rights. In the case of a cooperative housing corporation, the corporation must apply the improvement rules to the building structure or to any building system as described under paragraphs (e)(2)(ii)(A) and (e)(2)(ii)(B) of this section.

(v) *Leased building*—(A) *In general.* In the case of a taxpayer that is a lessee of all or a portion of a building (such as an office, floor, or certain square footage), the unit of property (''leased building property'') is each building and its structural components or the portion of each building subject to the lease and the structural components associated with the leased portion.

(B) *Application of improvement rules to a leased building.* An amount is paid to improve a leased building property under paragraphs (d) and (f)(2) of this section if the amount is paid for an improvement, under paragraphs (j), (k), or (l) of this section, to any of the following:

(*1*) *Entire building.* In the case of a taxpayer that is a lessee of an entire building, the building structure (as defined under paragraph (e)(2)(ii)(A) of this section) or any building system (as defined under paragraph (e)(2)(ii)(B) of this section) that is part of the leased building.

(*2*) *Portion of a building.* In the case of a taxpayer that is a lessee of a portion of a building (such as an office, floor, or certain square footage), the portion of the building structure (as defined under paragraph (e)(2)(ii)(A) of this section) subject to the lease or the portion of any building system (as defined under paragraph (e)(2)(ii)(B) of this section) subject to the lease.

(3) *Property other than building*—(i) *In general.* Except as otherwise provided in paragraphs (e)(3), (e)(4), (e)(5), and (f)(1) of this section, in the case of real or personal property other than property described in paragraph (e)(2) of this section, all the components that are functionally interdependent comprise a single unit of property. Components of property are functionally interdependent if the placing in service of one component by the taxpayer is dependent on the placing in service of the other component by the taxpayer.

(ii) *Plant property*—(A) *Definition.* For purposes of this paragraph (e), the term *plant property* means functionally interdependent machinery or equipment, other than network assets, used to perform an industrial process, such as manufacturing, generation, warehousing, distribution, automated materials handling in service industries, or other similar activities.

(B) *Unit of property for plant property.* In the case of plant property, the unit of property determined under the general rule of paragraph (e)(3)(i) of this section is further divided into smaller units comprised of each component (or group of components) that performs a discrete and major function or operation within the functionally interdependent machinery or equipment.

(iii) *Network assets*—(A) *Definition.* For purposes of this paragraph (e), the term *network assets* means railroad track, oil and gas pipelines, water and sewage pipelines, power transmission and distribution lines, and telephone and cable lines that are owned or leased by taxpayers in each of those respective industries. The term includes, for example, trunk and feeder lines, pole lines, and buried conduit. It does not include property that would be included as building structure or building systems under paragraphs (e)(2)(ii)(A) and (e)(2)(ii)(B) of this section, nor does it include separate property that is adjacent to, but not part of a network asset, such as bridges, culverts, or tunnels.

(B) *Unit of property for network assets.* In the case of network assets, the unit of property is determined by the taxpayer's particular facts and circumstances except as otherwise provided in published guidance in the FEDERAL REGISTER or in the Internal Revenue Bulletin (see §601.601(d)(2)(ii)(*b*) of this chapter). For these purposes, the functional interdependence standard provided in paragraph (e)(3)(i) of this section is not determinative.

(iv) *Leased property other than buildings.* In the case of a taxpayer that is a lessee of real or personal property other than property described in paragraph (e)(2) of this section, the unit of property for the leased property is determined under paragraphs (e)(3)(i),(ii), (iii), and (e)(5) of this section except that, after applying the applicable rules under those paragraphs, the unit of property may not be larger than the property subject to the lease.

(4) *Improvements to property.* An improvement to a unit of property generally is not a unit of property separate from the unit of property improved. For the unit of property for lessee improvements, see also paragraph (f)(2)(ii)) of this section. If a taxpayer elects to treat as a capital expenditure under §1.162–3(d) the amount paid for a rotable spare part, temporary spare part, or standby emergency spare part, and such part is used in an improvement to a unit of property, then for purposes of applying paragraph (d) of this section to the unit of property improved, the part is not a unit of property separate from the unit of property improved.

(5) *Additional rules*—(i) *Year placed in service.* Notwithstanding the unit of property determination under paragraph (e)(3) of this section, a component (or a group of components) of a unit property must be treated as a separate unit of property if, at the time the unit of property is initially placed in service by the taxpayer, the taxpayer has properly treated the component as being within a different class of property under section 168(e) (MACRS classes) than the class of the unit of property of which the component is a part, or the taxpayer has properly depreciated the component using a different depreciation method than the depreciation method of the unit of property of which the component is a part.

(ii) *Change in subsequent taxable year.* Notwithstanding the unit of property determination under paragraphs (e)(2), (3), (4), or (5)(i) of this section, in any taxable year after the unit of property is initially placed in service by the taxpayer, if the taxpayer or the Internal Revenue Service changes the treatment of that property (or any portion thereof) to a proper MACRS class or a proper depreciation method (for example, as a result of a cost segregation study or a change in the use of the property), then the taxpayer must change the unit of property determination for that property (or the portion thereof) under this section to be consistent with the change in treatment for depreciation purposes. Thus, for example, if a portion of a unit of property is properly reclassified to a MACRS class different from the MACRS class of the unit of property of which it was previously treated as a part, then the reclassified portion of the property should be treated as a separate unit of property for purposes of this section.

(6) *Examples.* The following examples illustrate the application of this paragraph (e) and assume that the taxpayer has not made a general asset account election with regard to property or accounted for property in a multiple asset account. In addition, unless the facts specifically indicate otherwise, assume that the additional rules in paragraph (e)(5) of this section do not apply:

Example 1. Building systems A owns an office building that contains a HVAC system. The HVAC system incorporates ten roof-mounted units that service different parts of the building. The roof-mounted units are not connected and have separate controls and duct work that distribute the heated or cooled air to different spaces in the building's interior. A pays an amount for labor and materials for work performed on the roof-mounted units. Under paragraph (e)(2)(i) of this section, A must treat the building and its structural components as a single unit of property. As provided under paragraph (e)(2)(ii) of this section, an amount is paid to improve a building if it is for an improvement to the building structure or any designated building system. Under paragraph (e)(2)(ii)(B)(*1*) of this section, the entire HVAC system, including all of the roof-mounted units and their components, comprise a building system. Therefore, under paragraph (e)(2)(ii) of this section, if an amount paid by A for work on the roof-mounted units is an improvement (for example, a betterment) to the HVAC system, A must treat this amount as an improvement to the building.

Example 2. Building systems B owns a building that it uses in its retail business. The building contains two elevator banks in different locations in its building. Each elevator bank contains three elevators. B pays an amount for labor and materials for work performed on the elevators. Under paragraph (e)(2)(i) of this section, B must treat the building and its structural components as a single unit of property. As provided under paragraph (e)(2)(ii) of this section, an amount is paid to improve a building if it is for an improvement to the building structure or any designated building system. Under paragraph (e)(2)(ii)(B)(*5*) of this section, all six elevators, including all their components, comprise a building system. Therefore, under paragraph (e)(2)(ii) of this section, if an amount paid by B for work on the elevators is an improvement (for example, a betterment) to the elevator system, B must treat this amount as an improvement to the building.

Example 3. Building structure and systems; condominium C owns a condominium unit in a condominium office building. C uses the condominium unit in its business of providing medical services. The condominium unit contains two restrooms, each of which contains a sink, a toilet, water and drainage pipes and other bathroom fixtures. C pays an amount for labor and materials to perform work on the pipes, sinks, toilets, and plumbing fixtures that are part of the condominium. Under paragraph (e)(2)(iii) of this section, C must treat the individual unit that it owns, including the structural components that are part of that unit, as a single unit of property. As provided under paragraph (e)(2)(iii)(B) of this section, an amount is paid to improve the condominium if it is for an improvement to the building structure that is part of the condominium or to a portion of any designated building system that is part of the condominium. Under paragraph (e)(2)(ii)(B)(*2*) of this section, the pipes, sinks, toilets, and plumbing fixtures that are part of C's condominium comprise the plumbing system for the condominium. Therefore, under paragraph (e)(2)(iii) of this section, if an amount paid by C for work on pipes, sinks, toilets, and plumbing fixtures is an improvement (for example, a betterment) to the portion of the plumbing system that is part of C's condominium, C must treat this amount as an improvement to the condominium.

Example 4. Building structure and systems; property other than buildings D, a manufacturer, owns a building adjacent to its manufacturing facility that contains office space and related facilities for D's employees that manage and administer D's manufacturing operations. The office building contains equipment, such as desks, chairs, computers, telephones, and bookshelves that are not building structure or building systems. D pays an amount to add an extension to the office building. Under paragraph (e)(2)(i) of this section, D must treat the building and its structural components as a single unit of property. As provided under paragraph (e)(2)(ii) of this section, an amount is paid to improve a building if it is for an improvement to the building structure or any designated building system. Therefore, under paragraph (e)(2)(ii) of this section, if an amount paid by D for the addition of an extension to the office building is an improvement (for example, a betterment) to the building structure or any of the building systems, D must treat this amount as an improvement to the building. In addition, because the equipment contained within the office building constitutes property other than the building, the units of property for the office equipment are initially determined under paragraph (e)(3)(i) of this section and are comprised of all the components that are functionally interdependent (for example, each desk, each chair, and each book shelf).

Example 5. Plant property; discrete and major function E is an electric utility company that operates a power plant to generate electricity. The power plant includes a structure that is not a building under §1.48–1(e)(1), and, among other things, one pulverizer that grinds coal, a single boiler that produces steam, one turbine that converts the steam into mechanical energy, and one generator that converts mechanical energy into electrical energy. In addition, the turbine contains a series of blades that cause the turbine to rotate when affected by the steam. Because the plant is composed of real and personal tangible property other than a building, the unit of property for the generating equipment is initially determined under the general rule in paragraph (e)(3)(i) of this section and is comprised of all the components that are functionally interdependent. Under this rule, the initial unit of property is the entire plant because the components of the plant are functionally interdependent. However, because the power plant is plant property under paragraph (e)(3)(ii) of this section, the initial unit of property is further divided into smaller units of property by determining the components (or groups of components) that perform discrete and major functions within the plant. Under this paragraph, E must treat the structure, the boiler, the turbine, the generator, and the pulverizer each as a separate unit of property because each of these components performs a discrete and major function within the power plant. E may not treat components, such as the turbine blades, as separate units of property because each of these components does not perform a discrete and major function within the plant.

Example 6. Plant property; discrete and major function F is engaged in a uniform and linen rental business. F owns and operates a plant that utilizes many different machines and equipment in an assembly line-like process to treat, launder, and prepare rental items for its customers. F utilizes two laundering lines in its plant, each of which can operate independently. One line is used for uniforms and another line is used for linens. Both lines incorporate a sorter, boiler, washer, dryer, ironer, folder, and waste water treatment system. Because the laundering equipment contained within the plant is property other than a building, the unit of property for the laundering equipment is initially determined under the general rule in paragraph (e)(3)(i) of this section and is comprised of all the components that are functionally interdependent. Under this rule, the initial units of property are each laundering line because each line is functionally independent and is comprised of components that are functionally interdependent. However, because each line is comprised of plant property under paragraph (e)(3)(ii) of this section, F must further divide these initial units of property into smaller units of property by determining the components (or groups of components) that perform discrete and major functions within the line. Under paragraph (e)(3)(ii) of this section, F must treat each sorter, boiler, washer, dryer, ironer, folder, and waste water treatment system in each line as a separate unit of property because each of these components performs a discrete and major function within the line.

Example 7. Plant property; industrial process G operates a restaurant that prepares and serves food to retail customers. Within its restaurant, G has a large piece of equipment that uses an assembly line-like process to prepare and cook tortillas that G serves only to its restaurant customers. Because the tortilla-making equipment is property other than a building, the unit of property for the equipment is initially determined under the general rule in paragraph (e)(3)(i) of this section and is comprised of all the components that are functionally interdependent. Under this rule, the initial unit of property is the entire tortilla-making equipment because the various components of the equipment are functionally interdependent. The equipment is not plant property under paragraph (e)(3)(ii) of this section because the equipment is not used in an industrial process, as it performs a small-scale function in G's restaurant operations. Thus, G is not required to further divide the equipment into separate units of property based on the components that perform discrete and major functions.

Example 8. Personal property H owns locomotives that it uses in its railroad business. Each locomotive consists of various components, such as an engine, generators, batteries, and trucks. H acquired a locomotive with all its components. Because H's locomotive is property other than a building, the initial unit of property is determined under the general rule in paragraph (e)(3)(i) of this section and is comprised of the components that are functionally interdependent. Under paragraph (e)(3)(i) of this section, the locomotive is a single unit of property because it consists entirely of components that are functionally interdependent.

Example 9. Personal property J provides legal services to its clients. J purchased a laptop computer and a printer for its employees to use in providing legal services. Because the computer and printer are property other than a building, the initial units of property are determined under the general rule in paragraph (e)(3)(i) of this section and are comprised of the components that are functionally interdependent. Under paragraph (e)(3)(i) of this section, the computer and the printer are separate units of property because the computer and the printer are not components that are functionally interdependent (that is, the placing in service of the computer is not dependent on the placing in service of the printer).

Example 10. Building structure and systems; leased building K is a retailer of consumer products. K conducts its retail sales in a building that it leases from L. The leased building consists of the building structure (including the floor, walls, and roof) and various building systems, including a plumbing system, an electrical system, an HVAC system, a security system, and a fire protection and prevention system. K pays an amount for labor and materials to perform work on the HVAC system of the leased building. Under paragraph (e)(2)(v)(A) of this section, because K leases the entire building, K must treat the leased building and its structural components as a single unit of property. As provided under paragraph (e)(2)(v)(B) of this section, an amount is paid to improve a leased building property if it is for an improvement (for example, a betterment) to the leased building structure or to any building system within the leased building. Therefore, under paragraphs (e)(2)(v)(B)(*1*) and (e)(2)(ii)(B)(*1*) of this section, if an amount paid by K for work on the HVAC system is for an improvement to the HVAC system in the leased building, K must treat this amount as an improvement to the entire leased building property.

Example 11. Production of real property related to leased property Assume the same facts as in *Example 10*, except that K receives a construction allowance from L, and K uses the construction allowance to build a driveway adjacent to the leased building. Assume that under the terms of the lease, K, the lessee, is treated as the owner of any property that it constructs on or nearby the leased building. Also assume that section 110 does not apply to the construction allowance. Finally, assume that the driveway is not plant property or a network asset. Because the construction of the driveway consists of the production of real property other than a building, all the components of the driveway are functionally interdependent and are a single unit of property under paragraphs (e)(3)(i) and (e)(3)(iv) of this section.

Example 12. Leasehold improvements; construction allowance used for lessor-owned improvements Assume the same facts as *Example 11*, except that, under the terms of the lease, L, the lessor, is treated as the owner of any property constructed on the leased premises. Because L, the lessor, is the owner of the driveway and the driveway is real property other than a building, all the components of the driveway are functionally interdependent and are a single unit of property under paragraph (e)(3)(i) of this section.

Example 13. Buildings and structural components; leased office space M provides consulting services to its clients. M conducts its consulting services business in two office spaces in the same building, each of which it leases from N under separate lease agreements. Each office space contains a separate HVAC system, which is part of the leased property. Both lease agreements provide that M is responsible for maintaining, repairing, and replacing the HVAC system that is part of the leased property. M pays amounts to perform work on the HVAC system in each office space. Because M leases two separate office spaces subject to two leases, M must treat the portion of the building structure and the structural components subject to each lease as a separate unit of property under paragraph (e)(2)(v)(A) of this section. As provided under paragraph (e)(2)(v)(B) of this section, an amount is paid to improve a leased building property, if it is for an improvement to the leased portion of the building structure or the portion of any designated building system subject to each lease. Under paragraphs (e)(2)(v)(B)(*1*) and (e)(2)(ii)(B)(*1*) of this section, M must treat the HVAC system associated with each leased office space as a building system of that leased building property. Thus, M must treat the HVAC system associated with the first leased office space as a building system of the first leased office space and the HVAC system associated with the second leased office space as a building system of the second leased office space. Under paragraph (e)(2)(v)(B) of this section, if the amount paid by M for work on the HVAC system in one leased office space is for an improvement (for example, a betterment) to the HVAC system that is part of that leased space, then M must treat the amount as an improvement to that individual leased property.

Example 14. Leased property; personal property N is engaged in the business of transporting passengers on private jet aircraft. To conduct its business, N leases several aircraft from O. Under paragraph (e)(3)(iv) of this section (referencing paragraph (e)(3)(i) of this section), N must treat all of the components of each leased aircraft that are functionally interdependent as a single unit of property. Thus, N must treat each leased aircraft as a single unit of property.

Example 15. Improvement property (i) P is a retailer of consumer products. In Year 1, P purchases a building from Q, which P intends to use as a retail sales facility. Under paragraph (e)(2)(i) of this section, P must treat the building and its structural components as a single unit of property. As provided under paragraph (e)(2)(ii) of this section, an amount is paid to improve a building if it is for an improvement to the building structure or any designated building system.

(ii) In Year 2, P pays an amount to construct an extension to the building to be used for additional warehouse space. Assume that the extension involves the addition of walls, floors, roof, and doors, but does not include the addition or extension of any building systems described in paragraph (e)(2)(ii)(B) of this section. Also assume that the amount paid to build the extension is a betterment to the building structure under paragraph (j) of this section, and is therefore treated as an amount paid for an improvement to the entire building under paragraph (e)(2)(ii) of this section. Accordingly, P capitalizes the amount paid as an improvement to the building under paragraph (d) of this section. Under paragraph (e)(4) of this section, the extension is not a unit of property separate from the building, the unit of property improved. Thus, to determine whether any future expenditure constitutes an improvement to the building under paragraph (e)(2)(ii) of this section, P must determine whether the expenditure constitutes an improvement to the building structure, including the building extension, or to any of the designated building systems.

Example 16. Additional rules; year placed in service R is engaged in the business of transporting freight throughout the United States. To conduct its business, R owns a fleet of truck tractors and trailers. Each tractor and trailer is comprised of various components, including tires. R purchased a truck tractor with all of its components, including tires. The tractor tires have an average useful life to R of more than one year. At the time R placed the tractor in service, it treated the tractor tires as a separate asset for depreciation purposes under section 168. R properly treated the tractor (excluding the cost of the tires) as 3-year property and the tractor tires as 5-year property under section 168(e). Because R's tractor is property other than a building, the initial units of property for the tractor are determined under the general rule in paragraph (e)(3)(i) of this section and are comprised of all the components that are functionally interdependent. Under this rule, R must treat the tractor, including its tires, as a single unit of property because the tractor and the tires are functionally interdependent (that is, the placing in service of the tires is dependent upon the placing in service of the tractor). However, under paragraph (e)(5)(i) of this section, R must treat the tractor and tires as separate units of property because R properly treated the tires as being within a different class of property under section 168(e).

Example 17. Additional rules; change in subsequent year S is engaged in the business of leasing nonresidential real property to retailers. In Year 1, S acquired and placed in service a building for use in its retail leasing operation. In Year 5, to accommodate the needs of a new lessee, S incurred costs to improve the building structure. S capitalized the costs of the improvement under paragraph (d) of this section and depreciated the improvement in accordance with section 168(i)(6) as nonresidential real property under section 168(e). In Year 7, S determined that the structural improvement made in Year 5 qualified under section 168(e)(8) as qualified retail improvement property and, therefore, was 15-year property under section 168(e). In Year 7, S changed its method of accounting to use a 15-year recovery period for the improvement. Under paragraph (e)(5)(ii) of this section, in Year 7, S must treat the improvement as a unit of property separate from the building.

Example 18. Additional rules; change in subsequent year In Year 1, T acquired and placed in service a building and parking lot for use in its retail operations. Under §1.263(a)–2 of the regulations, T capitalized the cost of the building and the parking lot and began depreciating the building and the parking lot as nonresidential real property under section 168(e). In Year 3, T completed a cost segregation study under which it properly determined that the parking lot qualified as 15-year property under section 168(e). In Year 3, T changed its method of accounting for the parking lot to use a 15-year recovery period and the 150-percent declining balance method of depreciation. Under paragraph (e)(5)(ii) of this section, beginning in Year 3, T must treat the parking lot as a unit of property separate from the building.

Example 19. Additional rules; change in subsequent year In Year 1, U acquired and placed in service a building for use in its manufacturing business. U capitalized the costs allocable to the building's wiring separately from the building and depreciated the wiring as 7-year property under section 168(e). U capitalized the cost of the building and all other structural components of the building and began depreciating them as nonresidential real property under section 168(e). In Year 3, U completed a cost segregation study under which it properly determined that the wiring is a structural component of the building and, therefore, should have been depreciated as nonresidential real property. In Year 3, U changed its method of accounting to treat the wiring as nonresidential real property. Under paragraph (e)(5)(ii) of this section, U must change the unit of property for the wiring in a manner that is consistent with the change in treatment for depreciation purposes. Therefore, U must change the unit of property for the wiring to treat it as a structural component of the building, and as part of the building unit of property, in accordance with paragraph (e)(2)(i) of this section.

(f) *Improvements to leased property*—(1) *In general*. Except as provided in paragraph (h) of this section (safe harbor for small taxpayers) and under §1.263(a)–1(f) (de minimis safe harbor), this paragraph (f) provides the exclusive rules for determining whether amounts paid by a taxpayer are for an improvement to a leased property and must be capitalized. In the case of a leased building or a leased portion of a building, an amount is paid to improve a leased property if the amount is paid for an improvement to any of the properties specified in paragraph (e)(2)(ii) of this section (for lessor improvements) or in paragraph (e)(2)(v)(B) of this section (for lessee improvements, except as provided in paragraph (f)(2)(ii) of this section). Section 1.263(a)–4 does not apply to amounts paid for improvements to leased property or to amounts paid for the acquisition or production of leasehold improvement property.

(2) *Lessee improvements*—(i) *Requirement to capitalize*. A taxpayer lessee must capitalize the related amounts, as determined under paragraph (g)(3) of this section, that it pays to improve, as defined under paragraph (d) of this section, a leased property except to the extent that section 110 applies to a construction allowance received by the lessee for the purpose of such improvement or when the improvement constitutes a substitute for rent. See §1.61–8(c) for the treatment of lessee expenditures that constitute a substitute for rent. A taxpayer lessee must also capitalize the related amounts that a lessor pays to improve, as defined under paragraph (d) of this section, a leased property if the lessee is the owner of the improvement, except to the extent that section 110 applies to a construction allowance received by the lessee for the purpose of such improvement. An amount paid for a lessee improvement under this paragraph (f)(2)(i) is treated as an amount paid to acquire or produce a unit of real or personal property under §1.263(a)–2(d)(1) of the regulations.

(ii) *Unit of property for lessee improvements*. For purposes of determining whether an amount paid by a lessee constitutes a lessee improvement to a leased property under paragraph (f)(2)(i) of this section, the unit of property and the improvement rules are applied to the leased property in accordance with paragraph (e)(2)(v) (leased buildings) or paragraph (e)(3)(iv) (leased property other than buildings) of this section and include previous lessee improvements. However, if a lessee improvement is comprised of an entire building erected on leased property, then the unit of property for the building and the application of the improvement rules to the building are determined under paragraphs (e)(2)(i) and (e)(2)(ii) of this section.

(3) *Lessor improvements*—(i) *Requirement to capitalize.* A taxpayer lessor must capitalize the related amounts, as determined under paragraph (g)(3) of this section, that it pays directly, or indirectly through a construction allowance to the lessee, to improve, as defined in paragraph (d) of this section, a leased property when the lessor is the owner of the improvement or to the extent that section 110 applies to the construction allowance. A lessor must also capitalize the related amounts that the lessee pays to improve a leased property, as defined in paragraph (e) of this section, when the lessee's improvement constitutes a substitute for rent. See §1.61–8(c) for treatment of expenditures by lessees that constitute a substitute for rent. Amounts capitalized by the lessor under this paragraph (f)(3)(i) may not be capitalized by the lessee. If a lessor improvement is comprised of an entire building erected on leased property, then the amount paid for the building is treated as an amount paid by the lessor to acquire or produce a unit of property under §1.263(a)–2(d)(1). See paragraph (e)(2) of this section for the unit of property for a building and paragraph (e)(3) of this section for the unit of property for real or personal property other than a building.

(ii) *Unit of property for lessor improvements.* In general, an amount capitalized as a lessor improvement under paragraph (f)(3)(i) of this section is not a unit of property separate from the unit of property improved. See paragraph (e)(4) of this section. However, if a lessor improvement is comprised of an entire building erected on leased property, then the unit of property for the building and the application of the improvement rules to the building are determined under paragraphs (e)(2)(i) and (e)(2)(ii) of this section.

(4) *Examples.* The following examples illustrate the application of this paragraph (f) and do not address whether capitalization is required under another provision of the Code (for example, section 263A). For purposes of the following examples, assume that section 110 does not apply to the lessee and the amounts paid by the lessee are not a substitute for rent.

Example 1. Lessee improvements; additions to building (i) T is a retailer of consumer products. In Year 1, T leases a building from L, which T intends to use as a retail sales facility. The leased building consists of the building structure under paragraph (e)(2)(ii)(A) of this section and various building systems under paragraph (e)(2)(ii)(B) of this section, including a plumbing system, an electrical system, and an HVAC system. Under the terms of the lease, T is permitted to improve the building at its own expense. Under paragraph (e)(2)(v)(A) of this section, because T leases the entire building, T must treat the leased building and its structural components as a single unit of property. As provided under paragraph (e)(2)(v)(B)(*1*) of this section, an amount is paid to improve a leased building property if the amount is paid for an improvement to the leased building structure or to any building system within the leased building. Therefore, under paragraphs (e)(2)(v)(B)(*1*) and (e)(2)(ii) of this section, if T pays an amount that improves the building structure, the plumbing system, the electrical system, or the HVAC system, then T must treat this amount as an improvement to the entire leased building property.

(ii) In Year 2, T pays an amount to construct an extension to the building to be used for additional warehouse space. Assume that this amount is for a betterment (as defined under paragraph (j) of this section) to T's leased building structure and does not affect any building systems. Accordingly, the amount that T pays for the building extension is for a betterment to the leased building structure, and thus, under paragraph (e)(2)(v)(B)(*1*) of this section, is treated as an improvement to the entire leased building under paragraph (d) of this section. Because T, the lessee, paid an amount to improve a leased building property, T is required to capitalize the amount paid for the building extension as a leasehold improvement under paragraph (f)(2)(i) of this section. In addition, paragraph (f)(2)(i) of this section requires T to treat the amount paid for the improvement as the acquisition or production of a unit of property (leasehold improvement property) under § 1.263(a)–2(d)(1).

(iii) In Year 5, T pays an amount to add a large overhead door to the building extension that it constructed in Year 2 to accommodate the loading of larger products into the warehouse space. Under paragraph (f)(2)(ii) of this section, to determine whether the amount paid by T is for a leasehold improvement, the unit of property and the improvement rules are applied in accordance with paragraph (e)(2)(v) of this section and include T's previous improvements to the leased property. Therefore, under paragraph (e)(2)(v)(A) of this section, the unit of property is the entire leased building, including the extension built in Year 2. In addition, under paragraph (e)(2)(v)(B) of this section, the leased building property is improved if the amount is paid for an improvement to the building structure or any building system. Assume that the amount paid to add the overhead door is for a betterment, under paragraph (j) of this section, to the building structure, which includes the extension. Accordingly, T must capitalize the amounts paid to add the overhead door as a leasehold improvement to the leased building property. In addition, paragraph (f)(2)(i) of this section requires T to treat the amount paid for the improvement as the acquisition or production of a unit of property (leasehold improvement property) under §1.263(a)–2(d)(1). However, to determine whether a future amount paid by T is for a leasehold improvement to the leased building, the unit of property and the improvement rules are again applied in accordance with paragraph (e)(2)(v) of this section and include the new overhead door.

Example 2. Lessee improvements; additions to certain structural components of buildings (i) Assume the same facts as *Example 1* except that in Year 2, T also pays an amount to construct an extension of the HVAC system into the building extension. Assume that the extension is a betterment, under paragraph (j) of this section, to the leased HVAC system (a building system under paragraph (e)(2)(ii)(B)(*1*) of this section). Accordingly, the amount that T pays for the extension of the HVAC system is for a betterment to the leased building system, the HVAC system, and thus, under paragraph (e)(2)(v)(B)(*1*) of this section, is treated as an improvement to the entire leased building property under paragraph (d) of this section. Because T, the lessee, pays an amount to improve a leased building property, T is required to capitalize the amount paid as a leasehold improvement under paragraph (f)(2)(i) of this section. Under paragraph (f)(2)(i) of this section, T must treat the amount paid for the HVAC extension as the acquisition and production of a unit of property (leasehold improvement property) under § 1.263(a)–2(d)(1).

(ii) In Year 5, T pays an amount to add an additional chiller to the portion of the HVAC system that it constructed in Year 2 to accommodate the climate control requirements for new product offerings. Under paragraph (f)(2)(ii) of this section, to determine whether the amount paid by T is for a leasehold improvement, the unit of property and the improvement rules are applied in accordance with paragraph (e)(2)(v) of this section and include T's previous improvements to the leased building property. Therefore, under paragraph (e)(2)(v)(B) of this section, the leased building property is improved if the amount is paid for an improvement to the building structure or any building system. Assume that the amount paid to add the chiller is for a betterment, under paragraph (j) of this section, to the HVAC system, which includes the extension of the system in Year 2. Accordingly, T must capitalize the amounts paid to add the chiller as a leasehold improvement to the leased building property. In addition, paragraph (f)(2)(i) of this section requires T to treat the amount paid for the chiller as the acquisition or production of a unit of property (leasehold improvement property) under §1.263(a)–2(d)(1). However, to determine whether a future amount paid by T is for a leasehold improvement to the leased building, the unit of property and the improvement rules are again applied in accordance with paragraph (e)(2)(v) of this section and include the new chiller.

Example 3. Lessor Improvements; additions to building (i) T is a retailer of consumer products. In Year 1, T leases a building from L, which T intends to use as a retail sales facility. Pursuant to the lease, L provides a construction allowance to T, which T intends to use to construct an extension to the retail sales facility for additional warehouse space. Assume that the amount paid for any improvement to the building does not exceed the construction allowance and that L is treated as the owner of any improvement to the building. Under paragraph (e)(2)(i) of this section, L must treat the building and its structural components as a single unit of property. As provided under paragraph (e)(2)(ii) of this section, an amount is paid to improve a building if it is paid for an improvement to the building structure or to any building system.

(ii) In Year 2, T uses L's construction allowance to construct an extension to the leased building to provide additional warehouse space in the building. Assume that the extension is a betterment (as defined under paragraph (j) of this section) to the building structure, and therefore, the amount paid for the extension results in an improvement to the building under paragraph (d) of this section. Under paragraph (f)(3)(i) of this section, L, the lessor and owner of the improvement, must capitalize the amounts paid to T to construct the extension to the retail sales facility. T is not permitted to capitalize the amounts paid for the lessor-owned improvement. Finally, under paragraph (f)(3)(ii) of this section, the extension to L's building is not a unit of property separate from the building and its structural components.

Example 4. Lessee property; personal property added to leased building T is a retailer of consumer products. T leases a building from L, which T intends to use as a retail sales facility. Pursuant to the lease, L provides a construction allowance to T, which T uses to acquire and construct partitions for fitting rooms, counters, and shelving. Assume that each partition, counter, and shelving unit is a unit of property under paragraph (e)(3) of this section. Assume that for Federal income tax purposes T is treated as the owner of the partitions, counters, and shelving. T's expenditures for the partitions, counters, and shelving are not improvements to the leased property under paragraph (d) of this section, but rather constitute amounts paid to acquire or produce separate units of personal property under §1.263(a)–2(d)(1).

Example 5. Lessor property; buildings on leased property L is the owner of a parcel of unimproved real property that L leases to T. Pursuant to the lease, L provides a construction allowance to T of $500,000, which T agrees to use to construct a building costing not more than $500,000 on the leased real property and to lease the building from L after it is constructed. Assume that for Federal income tax purposes, L is treated as the owner of the building that T will construct. T uses the $500,000 to construct the building as required under the lease. The building consists of the building structure and the following building systems: (1) a plumbing system; (2) an electrical system; and (3) an HVAC system. Because L provides a construction allowance to T to construct a building and L is treated as the owner of the building, L must capitalize the amounts that it pays indirectly to T to construct the building as a lessor improvement under paragraph (f)(3)(i) of this section. In addition, the amounts paid by L for the construction allowance are treated as amounts paid by L to acquire and produce the building under §1.263(a)–2(d)(1). Further, under paragraph (e)(2)(i) of this section, L must treat the building and its structural components as a single unit of property. Under paragraph (f)(3)(i) of this section, T, the lessee, may not capitalize the amounts paid (with the construction allowance received from L) for construction of the building.

Example 6. Lessee contribution to construction costs Assume the same facts as in *Example 5*, except T spends $600,000 to construct the building. T uses the $500,000 construction allowance provided by L plus $100,000 of its own funds to construct the building that L will own pursuant to the lease. Also assume that the additional $100,000 that T pays is not a substitute for rent. For the reasons discussed in *Example 5*, L must capitalize the $500,000 it paid T to construct the building under §1.263(a)–2(d)(1). In addition, because T spends its own funds to complete the building, T has a depreciable interest of $100,000 in the building and must capitalize the $100,000 it paid to construct the building as a leasehold improvement under §1.263(a)–2(d)(1) of the regulations. Under paragraph (e)(2)(i) of this section, L must treat the building as a single unit of property to the extent of its depreciable interest of $500,000. In addition, under paragraphs (f)(2)(ii) and (e)(2)(i) of this section, T must also treat the building as a single unit of property to the extent of its depreciable interest of $100,000.

(g) *Special rules for determining improvement costs*—(1) *Certain costs incurred during an improvement*—(i) *In general*. A taxpayer must capitalize all the direct costs of an improvement and all the indirect costs (including, for example, otherwise deductible repair costs) that directly benefit or are incurred by reason of an improvement. Indirect costs arising from activities that do not directly benefit and are not incurred by reason of an improvement are not required to be capitalized under section 263(a), regardless of whether the activities are performed at the same time as an improvement.

(ii) *Exception for individuals' residences*. A taxpayer who is an individual may capitalize amounts paid for repairs and maintenance that are made at the same time as capital improvements to units of property not used in the taxpayer's trade or business or for the production of income if the amounts are paid as part of an improvement (for example, a remodeling) of the taxpayer's residence.

(2) *Removal costs*—(i) *In general*. If a taxpayer disposes of a depreciable asset, including a partial disposition under Prop. Reg. §1.168(i)–1(e)(2)(ix) (September 19, 2013), or §1.168(i)–8(d), for Federal income tax purposes and has taken into account the adjusted basis of the asset or component of the asset in realizing gain or loss, then the costs of removing the asset or component are not required to be capitalized under this section. If a depreciable asset is included in a general asset account under section 168(i)(4), and neither the regulations under section 168(i)(4) and §1.168(i)–1(e)(3), apply to a

disposition of such asset, or a portion of such asset under §1.168(i)–1(e)(1)(ii), a loss is treated as being realized in the amount of zero upon the disposition of the asset solely for purposes of this paragraph (g)(2)(i). If a taxpayer disposes of a component of a unit of property, but the disposal of the component is not a disposition for Federal tax purposes, then the taxpayer must deduct or capitalize the costs of removing the component based on whether the removal costs directly benefit or are incurred by reason of a repair to the unit of property or an improvement to the unit of property. But see §1.280B–1 for the rules applicable to demolition of structures.

(ii) *Examples.* Thefollowing examples illustrate the application of paragraph (g)(2)(i) of this section and, unless otherwise stated, do not address whether capitalization is required under another provision of this section or another provision of the Code (for example, section 263A). For purposes of the following examples, assume that §1.168(i)–1(e) or §1.168(i)–8, applies and that §1.280B–1 does not apply.

Example 1. Component removed during improvement; no disposition X owns a factory building with a storage area on the second floor. X pays an amount to remove the original columns and girders supporting the second floor and replace them with new columns and girders to permit storage of supplies with a gross weight 50 percent greater than the previous load-carrying capacity of the storage area. Assume that the replacement of the columns and girders constitutes a betterment to the building structure and is therefore an improvement to the building unit of property under paragraphs (d)(1) and (j) of this section. Assume that X disposes of the original columns and girders and the disposal of these structural components is not a disposition under §1.168(i)–1(e) or §1.168(i)–8. Under paragraphs (g)(2)(i) and (j) of this section, the amount paid to remove the columns and girders must be capitalized as a cost of the improvement, because it directly benefits and is incurred by reason of the improvement to the building.

Example 2. Component removed during improvement; disposition Assume the same facts as *Example 1,* except X disposes of the original columns and girders and elects to treat the disposal of these structural components as a partial disposition of the factory building under §1.168(i)–8(d), taking into account the adjusted basis of the components in realizing loss on the disposition. Under paragraph (g)(2)(i) of this section, the amount paid to remove the columns and girders is not required to be capitalized as part of the cost of the improvement regardless of their relation to the improvement. However, all the remaining costs of replacing the columns and girders must be capitalized as improvements to the building unit of property under paragraphs (d)(1), (j), and (g)(1) of this section.

Example 3. Component removed during repair or maintenance; no disposition Y owns a building in which it conducts its retail business. The roof over Y's building is covered with shingles. Over time, the shingles begin to wear and Y begins to experience leaks into its retail premises. However, the building still functions in Y's business. To eliminate the problems, a contractor recommends that Y remove the original shingles and replace them with new shingles. Accordingly, Y pays the contractor to replace the old shingles with new but comparable shingles. The new shingles are comparable to original shingles but correct the leakage problems. Assume that replacement of old shingles with new shingles to correct the leakage is not a betterment or a restoration of the building structure or systems under paragraph (j) or (k) of this section and does not adapt the building structure or systems to a new or different use under paragraph (l) of this section. Thus, the amounts paid by Y to replace the shingles are not improvements to the building unit of property under paragraph (d) of this section. Under paragraph (g)(2)(i) of this section, the amounts paid to remove the shingles are not required to be capitalized because they directly benefit and are incurred by reason of repair or maintenance to the building structure.

Example 4. Component removed with disposition and restoration Assume the same facts as *Example 3* except Y disposes of the original shingles, and Y elects to treat the disposal of these components as a partial disposition of the building under §1.168(i)–8(d), and deducts the adjusted basis of the components as a loss on the disposition. Under paragraph (k)(1)(i) of this section, amounts paid for replacement of the shingles constitute a restoration of the building structure because the amounts are paid for the replacement of a component of the structure and the taxpayer has properly deducted a loss for that component. Thus, under paragraphs (d)(2) and (k) of this section, Y is required to capitalize the amounts paid for the replacement of the shingles as an improvement to the building unit of property. However, under paragraph (g)(2)(i) of this section, the amounts paid by Y to remove the original shingles are not required to be capitalized as part of the costs of the improvement, regardless of their relation to the improvement.

(3) *Related amounts*. For purposes of paragraph (d) of this section, amounts paid to improve a unit of property include amounts paid over a period of more than one taxable year. Whether amounts are related to the same improvement depends on the facts and circumstances of the activities being performed.

(4) *Compliance with regulatory requirements*. For purposes of this section, a Federal, state, or local regulator's requirement that a taxpayer perform certain repairs or maintenance on a unit of property to continue operating the property is not relevant in determining whether the amount paid improves the unit of property.

(h) *Safe harbor for small taxpayers*—(1) *In general*. A qualifying taxpayer (as defined in paragraph (h)(3) of this section) may elect to not apply paragraph (d) or paragraph (f) of this section to an eligible building property (as defined in paragraph (h)(4) of this section) if the total amount paid during the taxable year for repairs, maintenance, improvements, and similar activities performed on the eligible building property does not exceed the lesser of—

(i) 2 percent of the unadjusted basis (as defined under paragraph (h)(5) of this section) of the eligible building property; or

(ii) $10,000.

(2) *Application with other safe harbor provisions*. For purposes of paragraph (h)(1) of this section, amounts paid for repairs, maintenance, improvements, and similar activities performed on eligible building property include those amounts not capitalized under the de minimis safe harbor election under §1.263(a)-1(f) and those amounts deemed not to improve property under the safe harbor for routine maintenance under paragraph (i) of this section.

(3) *Qualifying taxpayer*—(i) *In general*. For purposes of this paragraph (h), the term *qualifying taxpayer* means a taxpayer whose average annual gross receipts as determined under this paragraph (h)(3) for the three preceding taxable years is less than or equal to $10,000,000.

(ii) *Application to new taxpayers*. If a taxpayer has been in existence for less than three taxable years, the taxpayer determines its average annual gross receipts for the number of taxable years (including short taxable years) that the taxpayer (or its predecessor) has been in existence.

(iii) *Treatment of short taxable year*. In the case of any taxable year of less than 12 months (a short taxable year), the gross receipts shall be annualized by—

(A) Multiplying the gross receipts for the short period by 12; and

(B) Dividing the product determined in paragraph (h)(3)(iii)(A) of this section by the number of months in the short period.

(iv) *Definition of gross receipts*. For purposes of applying paragraph (h)(3)(i) of this section, the term *gross receipts* means the taxpayer's receipts for the taxable year that are properly recognized under the taxpayer's methods of accounting used for Federal income tax purposes for the taxable year. For this purpose, gross receipts include total sales (net of returns and allowances) and all amounts received for services. In addition, gross receipts include any income from investments and from incidental or outside sources. For example, gross receipts include interest (including original issue discount and tax-exempt interest within the meaning of section 103), dividends, rents, royalties, and annuities, regardless of whether such amounts are derived in the ordinary course of the taxpayer's trade of business. Gross receipts are not reduced by cost of goods sold or by the cost of property sold if such property is described in section 1221(a)(1), (3), (4), or (5). With respect to sales of capital assets as defined in section 1221, or sales of property described in section 1221(a)(2) (relating to property used in a trade or business), gross receipts shall be reduced by the taxpayer's adjusted basis in such property. Gross receipts do not include the repayment of a loan or similar instrument (for example, a repayment of the principal amount of a loan held by a commercial lender) and, except to the extent of gain recognized, do not include gross receipts derived from a non-recognition transaction, such as a section 1031 exchange. Finally, gross receipts do not include amounts received by the taxpayer with respect to sales tax or other similar state and local taxes if, under the applicable state or local law, the tax is legally imposed on the purchaser of the good or service, and the taxpayer merely collects and remits the tax to the taxing authority. If, in contrast, the tax is imposed on the taxpayer under the applicable law, then gross receipts include the amounts received that are allocable to the payment of such tax.

(4) *Eligible building property.* For purposes of this section, the term *eligible building property* refers to each unit of property defined in paragraph (e)(2)(i) (building), paragraph (e)(2)(iii)(A) (condominium), paragraph (e)(2)(iv)(A) (cooperative), or paragraph (e)(2)(v)(A) (leased building or portion of building) of this section, as applicable, that has an unadjusted basis of $1,000,000 or less.

(5) *Unadjusted basis*—(i) *Eligible building property owned by taxpayer.* For purposes of this section, the unadjusted basis of eligible building property owned by the taxpayer means the basis as determined under section 1012, or other applicable sections of Chapter 1, including subchapters O (relating to gain or loss on dispositions of property), C (relating to corporate distributions and adjustments), K (relating to partners and partnerships), and P (relating to capital gains and losses). Unadjusted basis is determined without regard to any adjustments described in section 1016(a)(2) or (3) or to amounts for which the taxpayer has elected to treat as an expense (for example, under sections 179, 179B, or 179C).

(ii) *Eligible building property leased to the taxpayer.* For purposes of this section, the unadjusted basis of eligible building property leased to the taxpayer is the total amount of (undiscounted) rent paid or expected to be paid by the lessee under the lease for the entire term of the lease, including renewal periods if all the facts and circumstances in existence during the taxable year in which the lease is entered indicate a reasonable expectancy of renewal. Section 1.263(a)–4(f)(5)(ii) provides the factors that are significant in determining whether there exists a reasonable expectancy of renewal for purposes of this paragraph.

(6) *Time and manner of election.* A taxpayer makes the election described in paragraph (h)(1) of this section by attaching a statement to the taxpayer's timely filed original Federal tax return (including extensions) for the taxable year in which amounts are paid for repairs, maintenance, improvements, and similar activities performed on the eligible building property providing that such amounts qualify under the safe harbor provided in paragraph (h)(1) of this section. Sections 301.9100–1 through 301.9100–3 of this chapter provide the rules governing extensions of the time to make regulatory elections. The statement must be titled, "Section 1.263(a)–3(h) Safe Harbor Election for Small Taxpayers" and include the taxpayer's name, address, taxpayer identification number, and a description of each eligible building property to which the taxpayer is applying the election. In the case of an S corporation or a partnership, the election is made by the S corporation or by the partnership, and not by the shareholders or partners. An election may not be made through the filing of an application for change in accounting method or, before obtaining the Commissioner's consent to make a late election, by filing an amended Federal tax return. A taxpayer may not revoke an election made under this paragraph (h). The time and manner of making the election under this paragraph (h) may be modified through guidance of general applicability (see §§ 601.601(d)(2) and 601.602 of this chapter).

(7) *Treatment of safe harbor amounts.* Amounts paid by the taxpayer for repairs, maintenance, improvements, and similar activities to which the taxpayer properly applies the safe harbor under paragraph (h)(1) of this section and for which the taxpayer properly makes the election under paragraph (h)(6) of this section are not treated as improvements under paragraph (d) or (f) of this section and may be deducted under § 1.162–1 or § 1.212–1, as applicable, in the taxable year these amounts are paid, provided the amounts otherwise qualify for a deduction under these sections.

(8) *Safe harbor exceeded.* If total amounts paid by a qualifying taxpayer during the taxable year for repairs, maintenance, improvements, and similar activities performed on an eligible

building property exceed the safe harbor limitations specified in paragraph (h)(1) of this section, then the safe harbor election is not available for that eligible building property and the taxpayer must apply the general improvement rules under this section to determine whether amounts are for improvements to the unit of property, including the safe harbor for routine maintenance under paragraph (i) of this section. The taxpayer may also elect to apply the de minimis safe harbor under §1.263(a)–1(f) to amounts qualifying under that safe harbor irrespective of the application of this paragraph (h).

(9) *Modification of safe harbor amounts.* The amount limitations provided in paragraphs (h)(1)(i), (h)(1)(ii), and (h)(3) of this section may be modified through published guidance in the FEDERAL REGISTER or in the Internal Revenue Bulletin (see §601.601(d)(2)(ii)(*b*) of this chapter).

(10) *Examples.* The following examples illustrate the rules of this paragraph (h). Assume that §1.212–1 does not apply to the amounts paid.

Example 1. Safe harbor for small taxpayers applicable A is a qualifying taxpayer under paragraph (h)(3) of this section. A owns an office building in which A provides consulting services. In Year 1, A's building has an unadjusted basis of $750,000 as determined under paragraph (h)(5)(i) of this section. In Year 1, A pays $5,500 for repairs, maintenance, improvements and similar activities to the office building. Because A's building unit of property has an unadjusted basis of $1,000,000 or less, A's building constitutes eligible building property under paragraph (h)(4) of this section. The aggregate amount paid by A during Year 1 for repairs, maintenance, improvements and similar activities on this eligible building property does not exceed the lesser of $15,000 (2 percent of the building's unadjusted basis of $750,000) or $10,000. Therefore, under paragraph (h)(1) of this section, A may elect to not apply the capitalization rule of paragraph (d) of this section to the amounts paid for repair, maintenance, improvements, or similar activities on the office building in Year 1. If A properly makes the election under paragraph (h)(6) of this section for the office building and the amounts otherwise constitute deductible ordinary and necessary expenses incurred in carrying on a trade or business, A may deduct these amounts under §1.162–1 in Year 1.

Example 2. Safe harbor for small taxpayers inapplicable Assume the same facts as in *Example 1,* except that A pays $10,500 for repairs, maintenance, improvements, and similar activities performed on its office building in Year 1. Because this amount exceeds $10,000, the lesser of the two limitations provided in paragraph (h)(1) of this section, A may not apply the safe harbor for small taxpayers under paragraph (h)(1) of this section to the total amounts paid for repairs, maintenance, improvements, and similar activities performed on the building. Therefore, A must apply the general improvement rules under this section to determine which of the aggregate amounts paid are for improvements and must be capitalized under paragraph (d) of this section and which of the amounts are for repair and maintenance under §1.162–4.

Example 3. Safe harbor applied building-by-building (i) B is a qualifying taxpayer under paragraph (h)(3) of this section. B owns two rental properties, Building M and Building N. Building M and Building N are both multi-family residential buildings. In Year 1, each property has an unadjusted basis of $300,000 under paragraph (h)(5) of this section. Because Building M and Building N each have an unadjusted basis of $1,000,000 or less, Building M and Building N each constitute eligible building property in Year 1 under paragraph (h)(4) of this section. In Year 1, B pays $5,000 for repairs, maintenance, improvements, and similar activities performed on Building M. In Year 1, B also pays $7,000 for repairs, maintenance, improvements, and similar activities performed on Building N.

(ii) The total amount paid by B during Year 1 for repairs, maintenance, improvements and similar activities on Building M ($5,000) does not exceed the lesser of $6,000 (2 percent of the building's unadjusted basis of $300,000) or $10,000. Therefore, under paragraph (h)(1) of this section, for Year 1, B may elect to not apply the capitalization rule under paragraph (d) of this section to the amounts it paid for repairs, maintenance, improvements, and similar activities on Building M. If B properly makes the election under paragraph (h)(6) of this section for Building M and the amounts otherwise constitute deductible ordinary and necessary expenses incurred in carrying on B's trade or business, B may deduct these amounts under §1.162–1.

(iii) The total amount paid by B during Year 1 for repairs, maintenance, improvements and similar activities on Building N ($7,000) exceeds $6,000 (2 percent of the building's unadjusted basis of $300,000), the lesser of the two limitations provided under paragraph (h)(1) of this section. Therefore, B may not apply the safe harbor under paragraph (h)(1) of this section to the total amounts paid for repairs, maintenance, improvements, and similar activities performed on Building N. Instead, B must apply the general improvement rules under this section to determine which of the total amounts paid for work performed on Building N are for improvements and must be capitalized under paragraph (d) of this section and which amounts are for repair and maintenance under §1.162–4.

Example 4. Safe harbor applied to leased building property C is a qualifying taxpayer under paragraph (h)(3) of this section. C is the lessee of a building in which C operates a retail store. The lease is a triple-net lease, and the lease term is 20 years, including reasonably expected renewals. C pays $4,000 per month in rent. In Year 1, C pays $7,000 for repairs, maintenance, improvements, and similar activities performed on the building. Under paragraph (h)(5)(ii) of this section, the unadjusted basis of C's leased unit of property is $960,000 ($4,000 monthly rent × 12 months × 20 years). Because C's leased building has an unadjusted basis of $1,000,000 or less, the building is eligible building property for Year 1 under paragraph (h)(4) of this section. The total amount paid by C during Year 1 for repairs, maintenance, improvements, and similar activities on the leased building ($7,000) does not exceed the lesser of $19,200 (2 percent of the building's unadjusted basis of $960,000) or $10,000. Therefore, under paragraph (h)(1) of this section, for Year 1, C may elect to not apply the capitalization rule under paragraph (d) of this section to the amounts it paid for repairs, maintenance, improvements, and similar activities on the leased building. If C properly makes the election under paragraph (h)(6) of this section for the leased building and the amounts otherwise constitute deductible ordinary and necessary expenses incurred in carrying on C's trade or business, C may deduct these amounts under §1.162–1.

(i) *Safe harbor for routine maintenance on property*—(1) *In general.* An amount paid for routine maintenance (as defined in paragraph (i)(1)(i) or (i)(1)(ii) of this section, as applicable) on a unit of tangible property, or in the case of a building, on any of the properties designated in paragraphs (e)(2)(ii), (e)(2)(iii)(B), (e)(2)(iv)(B), or paragraph (e)(2)(v)(B) of this section, is deemed not to improve that unit of property.

(i) *Routine maintenance for buildings.* Routine maintenance for a building unit of property is the recurring activities that a taxpayer expects to perform as a result of the taxpayer's use of any of the properties designated in paragraphs (e)(2)(ii), (e)(2)(iii)(B), (e)(2)(iv)(B), or (e)(2)(v)(B) of this section to keep the building structure or each building system in its ordinarily efficient operating condition. Routine maintenance activities include, for example, the inspection, cleaning, and testing of the building structure or each building system, and the replacement of damaged or worn parts with comparable and commercially available replacement parts. Routine maintenance may be performed any time during the useful life of the building structure or building systems. However, the activities are routine only if the taxpayer reasonably expects to perform the activities more than once during the 10-year period beginning at the time the building structure or the building system upon which the routine maintenance is performed is placed in service by the taxpayer. A taxpayer's expectation will not be deemed unreasonable merely because the taxpayer does not actually perform the maintenance a second time during the 10-year period, provided that the taxpayer can otherwise substantiate that its expectation was reasonable at the time the property was placed in service. Factors to be considered in determining whether maintenance is routine and whether a taxpayer's expectation is reasonable include the recurring nature of the activity, industry practice, manufacturers' recommendations, and the taxpayer's experience with similar or identical property. With respect to a taxpayer that is a lessor of a building or a part of the building, the taxpayer's use of the building unit of property includes the lessee's use of its unit of property.

(ii) *Routine maintenance for property other than buildings.* Routine maintenance for property other than buildings is the recurring activities that a taxpayer expects to perform as a result of the taxpayer's use of the unit of property to keep the unit of property in its ordinarily efficient operating condition. Routine maintenance activities include, for example, the inspection, cleaning, and testing of the unit of property, and the replacement of damaged or worn parts of the unit of property with comparable and commercially available replacement parts. Routine maintenance may be performed any time during the useful life of the unit of property. However, the activities are routine only if, at the time the unit of property is placed in service by the taxpayer, the taxpayer reasonably expects to perform the activities more than once during the class life (as defined in paragraph (i)(4) of this section) of the unit of property. A taxpayer's expectation will not be deemed unreasonable merely because the taxpayer does not actually perform the maintenance a second time during the class life of the unit of property, provided that the taxpayer can otherwise substantiate that its expectation was reasonable at the time the property was placed in service. Factors to be considered in determining whether maintenance is routine and whether the taxpayer's expectation is reasonable include the recurring nature of the activity, industry practice, manufacturers' recommendations, and the taxpayer's experience with similar or identical property. With respect to a taxpayer that is a lessor of a unit of property, the taxpayer's use of the unit of property includes the lessee's use of the unit of property.

(2) *Rotable and temporary spare parts.* Except as provided in paragraph (i)(3) of this section, for purposes of paragraph (i)(1)(ii) of this section, amounts paid for routine maintenance include routine maintenance performed on (and with regard to) rotable and temporary spare parts.

(3) *Exceptions.* Routine maintenance does not include the following:

(i) Amounts paid for a betterment to a unit of property under paragraph (j) of this section;

(ii) Amounts paid for the replacement of a component of a unit of property for which the taxpayer has properly deducted a loss for that component (other than a casualty loss under §1.165–7) (see paragraph (k)(1)(i) of this section);

(iii) Amounts paid for the replacement of a component of a unit of property for which the taxpayer has properly taken into account the adjusted basis of the component in realizing gain or loss resulting from the sale or exchange of the component (see paragraph (k)(1)(ii) of this section);

(iv) Amounts paid for the restoration of damage to a unit of property for which the taxpayer is required to take a basis adjustment as a result of a casualty loss under section 165, or relating to a casualty event described in section 165, subject to the limitation in paragraph (k)(4) of this section (see paragraph (k)(1)(iii) of this section);

(v) Amounts paid to return a unit of property to its ordinarily efficient operating condition, if the property has deteriorated to a state of disrepair and is no longer functional for its intended use (see paragraph (k)(1)(iv) of this section);

(vi) Amounts paid to adapt a unit of property to a new or different use under paragraph (l) of this section;

(vii) Amounts paid for repairs, maintenance, or improvement of network assets (as defined in paragraph (e)(3)(iii)(A) of this section); or

(viii) Amounts paid for repairs, maintenance, or improvement of rotable and temporary spare parts to which the taxpayer applies the optional method of accounting for rotable and temporary spare parts under §1.162–3(e).

(4) *Class life.* The class life of a unit of property is the recovery period prescribed for the property under sections 168(g)(2) and (3) for purposes of the alternative depreciation system, regardless of whether the property is depreciated under section 168(g). For purposes of determining class life under this section, section 168(g)(3)(A) (relating to tax-exempt use property subject to lease) does not apply. If the unit of property is comprised of components with different class lives, then the class life of the unit of property is deemed to be the same as the component with the longest class life.

(5) *Coordination with section 263A.* Amounts paid for routine maintenance under this paragraph (i) may be subject to capitalization under section 263A if these amounts comprise the direct or allocable indirect costs of other property produced by the taxpayer or property acquired for resale. See, for example, §1.263A–1(e)(3)(ii)(O) requiring taxpayers to capitalize the cost of repairing equipment or facilities allocable to property produced or property acquired for resale.

(6) *Examples.* The following examples illustrate the application of this paragraph (i) and, unless otherwise stated, do not address the treatment under other provisions of the Code (for example, section 263A). In addition, unless

otherwise stated, assume that the taxpayer has not applied the optional method of accounting for rotable and temporary spare parts under §1.162–3(e).

Example 1. Routine maintenance on component (i) A is a commercial airline engaged in the business of transporting passengers and freight throughout the United States and abroad. To conduct its business, A owns or leases various types of aircraft. As a condition of maintaining its airworthiness certification for these aircraft, A is required by the Federal Aviation Administration (FAA) to establish and adhere to a continuous maintenance program for each aircraft within its fleet. These programs, which are designed by A and the aircraft's manufacturer and approved by the FAA, are incorporated into each aircraft's maintenance manual. The maintenance manuals require a variety of periodic maintenance visits at various intervals. One type of maintenance visit is an engine shop visit (ESV), which A expects to perform on its aircraft engines approximately every 4 years to keep its aircraft in its ordinarily efficient operating condition. In Year 1, A purchased a new aircraft, which included four new engines attached to the airframe. The four aircraft engines acquired with the aircraft are not materials or supplies under §1.162–3(c)(1)(i) because they are acquired as part of a single unit of property, the aircraft. In Year 5, A performs its first ESV on the aircraft engines. The ESV includes disassembly, cleaning, inspection, repair, replacement, reassembly, and testing of the engine and its component parts. During the ESV, the engine is removed from the aircraft and shipped to an outside vendor who performs the ESV. If inspection or testing discloses a discrepancy in a part's conformity to the specifications in A's maintenance program, the part is repaired, or if necessary, replaced with a comparable and commercially available replacement part. After the ESVs, the engines are returned to A to be reinstalled on another aircraft or stored for later installation. Assume that the class life for A's aircraft, including the engines, is 12 years. Assume that none of the exceptions set out in paragraph (i)(3) of this section apply to the costs of performing the ESVs.

(ii) Because the ESVs involve the recurring activities that A expects to perform as a result of its use of the aircraft to keep the aircraft in ordinarily efficient operating condition and consist of maintenance activities that A expects to perform more than once during the 12 year class life of the aircraft, A's ESVs are within the routine maintenance safe harbor under paragraph (i)(1)(ii) of this section. Accordingly, the amounts paid for the ESVs are deemed not to improve the aircraft and are not required to be capitalized under paragraph (d) of this section.

Example 2. Routine maintenance after class life Assume the same facts as in *Example 1*, except that in year 15 A pays amounts to perform an ESV on one of the original aircraft engines after the end of the class life of the aircraft. Because this ESV involves the same routine maintenance activities that were performed on aircraft engines in *Example 1*, this ESV also is within the routine maintenance safe harbor under paragraph (i)(1)(ii) of this section. Accordingly, the amounts paid for this ESV, even though performed after the class life of the aircraft, are deemed not to improve the aircraft and are not required to be capitalized under paragraph (d) of this section.

Example 3. Routine maintenance on rotable spare parts (i) Assume the same facts as in *Example 1*, except that in addition to the four engines purchased as part of the aircraft, A separately purchases four additional new engines that A intends to use in its aircraft fleet to avoid operational downtime when ESVs are required to be performed on the engines previously installed on an aircraft. Later in Year 1, A installs these four engines on an aircraft in its fleet. In Year 5, A performs the first ESVs on these four engines. Assume that these ESVs involve the same routine maintenance activities that were performed on the engines in *Example 1*, and that none of the exceptions set out in paragraph (i)(3) of this section apply to these ESVs. After the ESVs were performed, these engines were reinstalled on other aircraft or stored for later installation.

(ii) The additional aircraft engines are rotable spare parts under §1.162–3(c)(2) because they were acquired separately from the aircraft, are removable from the aircraft, and are repaired and reinstalled on other aircraft or stored for later installation. Assume the class life of an engine is the same as the airframe, 12 years. Because the ESVs involve the recurring activities that A expects to perform as a result of its use of the engines to keep the engines in ordinarily efficient operating condition, and consist of maintenance activities that A expects to perform more than once during the 12 year class life of the engine, the ESVs fall within the routine maintenance safe harbor under paragraph (i)(1)(ii) of this section. Accordingly, the amounts paid for the ESVs for the four additional engines are deemed not to improve these engines and are not required to be capitalized under paragraph (d) of this section. For the treatment of amounts paid to acquire the engines, see §1.162–3(a).

Example 4. Routine maintenance resulting from prior owner's use (i) In January, Year 1, B purchases a used machine for use in its manufacturing operations. Assume that the machine is the unit of property and has a class life of 10 years. B places the machine in service in January, Year 1, and at that time, B expects to perform manufacturer recommended scheduled maintenance on the machine approximately every three years. The scheduled maintenance includes the cleaning and oiling of the machine, the inspection of parts for defects, and the replacement of minor items such as springs, bearings, and seals with comparable and commercially available replacement parts. At the time B purchased the machine, the machine was approaching the end of a three-year scheduled maintenance period. As a result, in February, Year 1, B pays amounts to perform the manufacturer recommended scheduled maintenance. Assume that none of the exceptions set out in paragraph (i)(3) of this section apply to the amounts paid for the scheduled maintenance.

(ii) The majority of B's costs do not qualify under the routine maintenance safe harbor in paragraph (i)(1)(ii) of this section because the costs were incurred primarily as a result of the prior owner's use of the property and not B's use. B acquired the machine just before it had received its three-year scheduled maintenance. Accordingly, the amounts paid for the scheduled maintenance resulted from the prior owner's, and not B's, use of the property and must be capitalized if those amounts result in a betterment under paragraph (i) of this section, including the amelioration of a material condition or defect, or otherwise result in an improvement under paragraph (d) of this section.

Example 5. Routine maintenance resulting from new owner's use Assume the same facts as in *Example 4*, except that after B pays amounts for the maintenance in Year 1, B continues to operate the machine in its manufacturing business. In Year 4, B pays amounts to perform the next scheduled manufacturer recommended maintenance on the machine. Assume that the scheduled maintenance activities performed are the same as those performed in *Example 4* and that none of the exceptions set out in paragraph (i)(3) of this section apply to the amounts paid for the scheduled maintenance. Because the scheduled maintenance performed in Year 4 involves the recurring activities that B performs as a result of its use of the machine, keeps the machine in an ordinarily efficient operating condition, and consists of maintenance activities that B expects to perform more than once during the 10-year class life of the machine, B's scheduled maintenance costs are within the routine maintenance safe harbor under paragraph (i)(1)(ii) of this section. Accordingly, the amounts paid for the scheduled maintenance in Year 4 are deemed not to improve the machine and are not required to be capitalized under paragraph (d) of this section.

Example 6. Routine maintenance; replacement of substantial structural part; coordination with section 263A C is in the business of producing commercial products for sale. As part of the production process, C places raw materials into lined containers in which a chemical reaction is used to convert raw materials into the finished product. The lining, which comprises 60 percent of the total physical structure of the container, is a substantial structural part of the container. Assume that each container, including its lining, is the unit of property and that a container has a class life of 12 years. At the time that C placed the container into service, C was aware that approximately every three years, the container lining would need to be replaced with comparable and commercially available replacement materials. At the end of three years, the container will continue to function, but will become less efficient and the replacement of the lining will be necessary to keep the container in an ordinarily efficient operating condition. In Year 1, C acquired 10 new containers and placed them into service. In Year 4, Year 7, Year 9, and Year 12, C pays amounts to replace the containers' linings with comparable and commercially available replacement parts. Assume that none of the exceptions set out in paragraph (i)(3) of this section apply to the amounts paid for the replacement linings. Because the replacement of the linings involves recurring activities that C expects to perform as a result of its use of the containers to keep the containers in their ordinarily efficient operating condition and consists of maintenance activities that C expects to perform more than once during the 12-year class life of the containers, C's lining replacement costs are within the routine maintenance safe harbor under paragraph (i)(1)(ii) of this section. Accordingly, the amounts that C paid for the replacement of the container linings are deemed not to improve the containers and are not required to be capitalized under paragraph (d) of this section. However, the amounts paid to replace the lining may be subject to capitalization under section 263A if the amounts paid for this maintenance comprise the direct or allocable indirect costs of the property produced by C. See § 1.263A–1(e)(3)(ii)(O).

Example 7. Routine maintenance once during class life D is a Class I railroad that owns a fleet of freight cars. Assume that a freight car, including all its components, is a unit of property and has a class life of 14 years. At the time that D places a freight car into service, D expects to perform cyclical reconditioning to the car every 8 to 10 years to keep the freight car in ordinarily efficient operating condition. During this reconditioning, D pays amounts to disassemble, inspect, and recondition or replace components of the freight car with comparable and commercially available replacement parts. Ten years after D places the freight car in service, D pays amounts to perform a cyclical reconditioning on the car. Because D expects to perform the reconditioning only once during the 14 year class life of the freight car, the amounts D pays for the reconditioning do not qualify for the routine maintenance safe harbor under paragraph (i)(1)(ii) of this section. Accordingly, D must capitalize the amounts paid for the reconditioning of the freight car if these amounts result in an improvement under paragraph (d) of this section.

Example 8. Routine maintenance; reasonable expectation Assume the same facts as *Example 7*, except in Year 1, D acquires and places in service several refrigerated freight cars, which also have a class life of 14 years. Because of the special requirements of these cars, at the time they are placed in service, D expects to perform a reconditioning of the refrigeration components of the freight car every 6 years to keep the freight car in an ordinarily efficient operating condition. During the reconditioning, D pays amounts to disassemble, inspect, and recondition or replace the refrigeration components of the freight car with comparable and commercially available replacement parts. Assume that none of the exceptions set out in paragraph (i)(3) of this section apply to the amounts paid for the reconditioning of these freight cars. In Year 6, D pays amounts to perform a reconditioning on the refrigeration components on one of the freight cars. However, because of changes in the frequency that D utilizes this freight car, D does not perform the second reconditioning on the same freight car until Year 15, after the end of the 14-year class life of the car. Under paragraph (i)(1)(ii) of this section, D's reasonable expectation that it would perform the reconditioning every 6 years will not be deemed unreasonable merely because D did not actually perform the reconditioning a second time during the 14-year class life, provided that D can substantiate that its expectation was reasonable at the time the property was placed in service. If D can demonstrate that its expectation was reasonable in Year 1 using the factors provided in paragraph (i)(1)(ii) of this section, then the amounts paid by D to recondition the refrigerated freight car components in Year 6 and in Year 15 are within the routine maintenance safe harbor under paragraph (i)(1)(ii) of this section.

Example 9. Routine maintenance on non-rotable part E is a towboat operator that owns and leases a fleet of towboats. Each towboat is equipped with two diesel-powered engines. Assume that each towboat, including its engines, is the unit of property and that a towboat has a class life of 18 years. At the time that E places its towboats into service, E is aware that approximately every three to four years E will need to perform scheduled maintenance on the two towboat engines to keep the engines in their ordinarily efficient operating condition. This maintenance is completed while the engines are attached to the towboat and involves the cleaning and inspecting of the engines to determine which parts are within acceptable operating tolerances and can continue to be used, which parts must be reconditioned to be brought back to acceptable tolerances, and which parts must be replaced. Engine parts replaced during these procedures are replaced with comparable and commercially available replacement parts. Assume the towboat engines are not rotable spare parts under §1.162–3(c)(2). In Year 1, E acquired a new towboat, including its two engines, and placed the towboat into service. In Year 5, E pays amounts to perform scheduled maintenance on both engines in the towboat. Assume that none of the exceptions set out in paragraph (i)(3) of this section apply to the scheduled maintenance costs. Because the scheduled maintenance involves recurring activities that E expects to perform more than once during the 18-year class life of the towboat, the maintenance results from E's use of the towboat, and the maintenance is performed to keep the towboat in an ordinarily efficient operating condition, the scheduled maintenance on E's towboat is within the routine maintenance safe harbor under paragraph (i)(1)(ii) of this section. Accordingly, the amounts paid for the scheduled maintenance to its towboat engines in Year 5 are deemed not to improve the towboat and are not required to be capitalized under paragraph (d) of this section.

Example 10. Routine maintenance with related betterments Assume the same facts as *Example 9*, except that in Year 9 E's towboat engines are due for another scheduled maintenance visit. At this time, E decides to upgrade the engines to increase their horsepower and propulsion, which would permit the towboats to tow heavier loads. Accordingly, in Year 9, E pays amounts to perform many of the same activities that it would perform during the typical scheduled maintenance activities such as cleaning, inspecting, reconditioning, and replacing minor parts, but at the same time, E incurs costs to upgrade certain engine parts to increase the towing capacity of the boats in excess of the capacity of the boats when E placed them in service. In combination with the replacement of parts with new and upgraded parts, the scheduled maintenance must be completed to perform the horsepower and propulsion upgrade. Thus, the work done on the engines encompasses more than the recurring activities that E expected to perform as a result of its use of the towboats and did more than keep the towboat in its ordinarily efficient operating condition. Rather under paragraph (j) of this section, the amounts paid to increase the horsepower and propulsion of the engines are for a betterment to the towboat, and such amounts are excepted from the routine maintenance safe harbor under paragraph (i)(3)(i) of this section. In addition, under paragraph (g)(1)(i) of this section, the scheduled maintenance procedures directly benefit the upgrades. Therefore, the amounts that E paid in Year 9 for the maintenance and upgrade of the engines do not qualify for the routine maintenance safe harbor described under paragraph (i)(1)(ii) of this section. Rather, E must capitalize the amounts paid for maintenance and upgrades of the engines as an improvement to the towboats under paragraph (d) of this section.

Example 11. Routine maintenance with unrelated improvements Assume the same facts as *Example 9*, except in Year 5, in addition to paying amounts to perform the scheduled engine maintenance on both engines, E also incurs costs to upgrade the communications and navigation systems in the pilot house of the towboat with new state-of-the-art systems. Assume the amounts paid to upgrade the communications and navigation systems are for betterments under paragraph (j) of this section, and therefore result in an improvement to the towboat under paragraph (d) of this section. In contrast with *Example 9*, the amounts paid for the scheduled maintenance on E's towboat engines are not otherwise related to the upgrades to the navigation systems. Because the scheduled maintenance on the towboat engines does not directly benefit and is not incurred by reason of the upgrades to the communication and navigation systems, the amounts paid for the scheduled engine maintenance are not a direct or indirect cost of the improvement under paragraph (g)(1)(i) of this section. Accordingly, the amounts paid for the scheduled maintenance to its towboat engines in Year 5 are routine maintenance deemed not to improve the towboat and are not required to be capitalized under paragraph (d) of this section.

Example 12. Exceptions to routine maintenance F owns and operates a farming and cattle ranch with an irrigation system that provides water for crops. Assume that each canal in the irrigation system is a single unit of property and has a class life of 20 years. At the time F placed the canals into service, F expected to have to perform major maintenance on the canals every three years to keep the canals in their ordinarily efficient operating condition. This maintenance includes draining the canals, and then cleaning, inspecting, repairing, and reconditioning or replacing parts of the canal with comparable and commercially available replacement parts. F placed the canals into service in Year 1 and did not perform any maintenance on the canals until Year 6. At that time, the canals had fallen into a state of disrepair and no longer functioned for irrigation. In Year 6, F pays amounts to drain the canals and do extensive cleaning, repairing, reconditioning, and replacing parts of the canals with comparable and commercially available replacement parts. Although the work performed on F's canals was similar to the activities that F expected to perform, but did not perform, every three years, the costs of these activities do not fall within the routine maintenance safe harbor. Specifically, under paragraph (i)(3)(v) of this section, routine maintenance does not include activities that return a unit of property to its former ordinarily efficient operating condition if the property has deteriorated to a state of disrepair and is no longer functional for its intended use. Accordingly, amounts that F pays for work performed on the canals in Year 6 must be capitalized if they result in improvements under paragraph (d) of this section (for example, restorations under paragraph (k) of this section).

Example 13. Routine maintenance on a building; escalator system In Year 1, G acquires a large retail mall in which it leases space to retailers. The mall contains an escalator system with 40 escalators, which includes landing platforms, trusses, tracks, steps, handrails, and safety brushes. In Year 1, when G placed its building into service, G reasonably expected that it would need to replace the handrails on the escalators approximately every four years to keep the escalator system in its ordinarily efficient operating condition. After a routine inspection and test of the escalator system in Year 4, G determines that the handrails need to be replaced and pays an amount to replace the handrails with comparable and commercially available handrails. The escalator system, including the handrails, is a building system under paragraph (e)(2)(ii)(B)(*4*) of this section. Assume that none of the exceptions in paragraph (i)(3) of this section apply to the scheduled maintenance costs. Because the replacement of the handrails involves recurring activities that G expects to perform as a result of its use of the escalator system to keep the escalator system in an ordinarily efficient operating condition, and G reasonably expects to perform these activities more than once during the 10-year period beginning at the time building system was placed in service, the amounts paid by G for the handrail replacements are within the routine maintenance safe harbor under paragraph (i)(1)(i) of this section. Accordingly, the amounts paid for the replacement of the handrails in Year 4 are deemed not to improve the building unit of property and are not required to be capitalized under paragraph (d) of this section.

Example 14. Not routine maintenance; escalator system Assume the same facts as in *Example 13*, except that in Year 9, G pays amounts to replace the steps of the escalators. In Year 1, when G placed its building into service, G reasonably expected that approximately every 18 to 20 years G would need to replace the steps to keep the escalator system in its ordinarily efficient operating condition. Because the replacement does not involve recurring activities that G expects to perform more than once during the 10-year period beginning at the time the building structure or the building system was placed in service, the costs of these activities do not fall within the routine maintenance safe harbor. Accordingly, amounts that G pays to replace the steps in Year 9 must be capitalized if they result in improvements under paragraph (d) of this section (for example, restorations under paragraph (k) of this section).

Example 15. Routine maintenance on building; reasonable expectation In Year 1, H acquires a new office building, which it uses to provide services. The building contains an HVAC system, which is a building system under paragraph (e)(2)(ii)(B)(*1*) of this section. In Year 1, when H placed its building into service, H reasonably expected that every four years H would need to pay an outside contractor to perform detailed testing, monitoring, and preventative maintenance on its HVAC system to keep the HVAC system in its ordinarily efficient operating condition. This scheduled maintenance includes disassembly, cleaning, inspection, repair, replacement, reassembly, and testing of the HVAC system and many of its component parts. If inspection or testing discloses a problem with any component, the part is repaired, or if necessary, replaced with a comparable and commercially available replacement part. The scheduled maintenance at these intervals is recommended by the manufacturer of the HVAC system and is routinely performed on similar systems in similar buildings. Assume that none of the exceptions in paragraph (i)(3) of this section apply to the amounts paid for the maintenance on the HVAC system. In Year 4, H pays amounts to a contractor to perform the scheduled maintenance. However, H does not perform this scheduled maintenance on its building again until Year 11. Under paragraph (i)(1)(i) of this section, H's reasonable expectation that it would perform the maintenance every 4 years will not be deemed unreasonable merely because H did not actually perform the maintenance a second time during the 10-year period, provided that H can substantiate that its expectation was reasonable at the time the property was placed in service. If H can demonstrate that its expectation was reasonable in Year 1 using the other factors considered in paragraph (i)(1)(i), then the amounts H paid for the maintenance of the HVAC system in Year 4 and in Year 11 are within the routine maintenance safe harbor under paragraph (i)(1)(i) of this section.

(j) *Capitalization of betterments*—(1) *In general.* A taxpayer must capitalize as an improvement an amount paid for a betterment to a unit of property. An amount is paid for a betterment to a unit of property only if it—

(i) Ameliorates a material condition or defect that either existed prior to the taxpayer's acquisition of the unit of property or arose during the production of the unit of property, whether or not the taxpayer was aware of the condition or defect at the time of acquisition or production;

(ii) Is for a material addition, including a physical enlargement, expansion, extension, or addition of a major component (as defined in paragraph (k)(6) of this section) to the unit of property or a material increase in the capacity, including additional cubic or linear space, of the unit of property; or

(iii) Is reasonably expected to materially increase the productivity, efficiency, strength, quality, or output of the unit of property.

(2) *Application of betterment rules*—(i) *In general.* The applicability of each quantitative and qualitative factor provided in paragraphs (j)(1)(ii) and (j)(1)(iii) of this section to a particular unit of property depends on the nature of the unit of property. For example, if an addition or an increase in a particular factor cannot be measured in the context of a specific type of property, this factor is not relevant in the determination of whether an amount has been paid for a betterment to the unit of property.

(ii) *Application of betterment rules to buildings.* An amount is paid to improve a building if it is paid for a betterment, as defined under paragraph (j)(1) of this section, to a property specified under paragraph (e)(2)(ii) (building), paragraph (e)(2)(iii)(B) (condominium), paragraph (e)(2)(iv)(B) (cooperative), or paragraph (e)(2)(v)(B) (leased building or leased portion of building) of this section. For example, an amount is paid to improve a building if it is paid for an increase in the efficiency of the building structure or any one of its building systems (for example, the HVAC system).

(iii) *Unavailability of replacement parts.* If a taxpayer replaces a part of a unit of property that cannot reasonably be replaced with the same type of part (for example, because of technological advancements or product enhancements), the replacement of the part with an improved, but comparable, part does not, by itself, result in a betterment to the unit of property.

(iv) *Appropriate comparison*—(A) *In general*. In cases in which an expenditure is necessitated by normal wear and tear or damage to the unit of property that occurred during the taxpayer's use of the unit of property, the determination of whether an expenditure is for the betterment of the unit of property is made by comparing the condition of the property immediately after the expenditure with the condition of the property immediately prior to the circumstances necessitating the expenditure.

(B) *Normal wear and tear*. If the expenditure is made to correct the effects of normal wear and tear to the unit of property that occurred during the taxpayer's use of the unit of property, the condition of the property immediately prior to the circumstances necessitating the expenditure is the condition of the property after the last time the taxpayer corrected the effects of normal wear and tear (whether the amounts paid were for maintenance or improvements) or, if the taxpayer has not previously corrected the effects of normal wear and tear, the condition of the property when placed in service by the taxpayer.

(C) *Damage to property*. If the expenditure is made to correct damage to a unit of property that occurred during the taxpayer's use of the unit of property, the condition of the property immediately prior to the circumstances necessitating the expenditure is the condition of the property immediately prior to damage.

(3) *Examples*. The following examples illustrate the application of this paragraph (j) only and do not address whether capitalization is required under another provision of this section or another provision of the Internal Revenue Code (for example, section 263A). Unless otherwise provided, assume that the appropriate comparison in paragraph (j)(2)(iv) of this section is not applicable under the facts.

Example 1. Amelioration of pre-existing material condition or defect In Year 1, A purchases a store located on a parcel of land that contains underground gasoline storage tanks left by prior occupants. Assume that the parcel of land is the unit of property. The tanks had leaked prior to A's purchase, causing soil contamination. A is not aware of the contamination at the time of purchase. In Year 2, A discovers the contamination and incurs costs to remediate the soil. The remediation costs are for a betterment to the land under paragraph (j)(1)(i) of this section because A incurred the costs to ameliorate a material condition or defect that existed prior to A's acquisition of the land.

Example 2. Not amelioration of pre-existing condition or defect B owns an office building that was constructed with insulation that contained asbestos. The health dangers of asbestos were not widely known when the building was constructed. Several years after B places the building into service, B determines that certain areas of asbestos-containing insulation have begun to deteriorate and could eventually pose a health risk to employees. Therefore, B pays an amount to remove the asbestos-containing insulation from the building structure and replace it with new insulation that is safer to employees, but no more efficient or effective than the asbestos insulation. Under paragraphs (e)(2)(ii) and (j)(2)(ii) of this section, an amount is paid to improve a building unit of property if the amount is paid for a betterment to the building structure or any building system. Although the asbestos is determined to be unsafe under certain circumstances, the presence of asbestos insulation in a building, by itself, is not a preexisting material condition or defect of the building structure under paragraph (j)(1)(i) of this section. In addition, the removal and replacement of the asbestos is not for a material addition to the building structure or a material increase in the capacity of the building structure under paragraphs (j)(1)(ii) and (j)(2)(iv) of this section as compared to the condition of the property prior to the deterioration of the insulation. Similarly, the removal and replacement of asbestos is not reasonably expected to materially increase the productivity, efficiency, strength, quality, or output of the building structure under paragraphs (j)(1)(iii) and (j)(2)(iv) of this section as compared to the condition of the property prior to the deterioration of the insulation. Therefore, the amount paid to remove and replace the asbestos insulation is not for a betterment to the building structure or an improvement to the building under paragraph (j) of this section.

Example 3. Not amelioration of pre-existing material condition or defect (i) In January, Year 1, C purchased a used machine for use in its manufacturing operations. Assume that the machine is a unit of property and has a class life of 10 years. C placed the machine in service in January, Year 1 and at that time expected to perform manufacturer recommended scheduled maintenance on the machine every three years. The scheduled maintenance includes cleaning and oiling the machine, inspecting parts for defects, and replacing minor items, such as springs, bearings, and seals, with comparable and commercially available replacement parts. The scheduled maintenance does not include any material additions or materially increase the capacity, productivity, efficiency, strength, quality, or output of the machine. At the time C purchased the machine, it was approaching the end of a three-year scheduled maintenance period. As a result, in February, Year 1, C pays an amount to perform the manufacturer recommended scheduled maintenance to keep the machine in its ordinarily efficient operating condition.

(ii) The amount that C pays does not qualify under the routine maintenance safe harbor in paragraph (i) of this section, because the cost primarily results from the prior owner's use of the property and not the taxpayer's use. C acquired the machine just before it had received its three-year scheduled maintenance. Accordingly, the amount that C pays for the scheduled maintenance results from the prior owner's use of the property and ameliorates conditions or defects that existed prior to C's ownership of the machine. Nevertheless, considering the purpose and minor nature of the work performed, this amount does not ameliorate a material condition or defect in the machine under paragraph (j)(1)(i) of this section, is not for a material addition to or increase in capacity of the machine under paragraph (j)(1)(ii) of this section, and is not reasonably expected to materially increase the productivity, efficiency, strength, quality, or output of the machine under paragraph (j)(1)(iii) of this section. Therefore, C is not required to capitalize the amount paid for the scheduled maintenance as a betterment to the unit of property under this paragraph (j).

Example 4. Not amelioration of pre-existing material condition or defect D purchases a used ice resurfacing machine for use in the operation of its ice skating rink. To comply with local regulations, D is required to routinely monitor the air quality in the ice skating rink. One week after D places the machine into service, during a routine air quality check, D discovers that the operation of the machine is adversely affecting the air quality in the skating rink. As a result, D pays an amount to inspect and retune the machine, which includes replacing minor components of the engine that had worn out prior to D's acquisition of the machine. Assume the resurfacing machine, including the engine, is the unit of property. The routine maintenance safe harbor in paragraph (i) of this section does not apply to the amounts paid, because the activities performed do not relate solely to the taxpayer's use of the machine. The amount that D pays to inspect, retune, and replace minor components of the ice resurfacing machine ameliorates a condition or defect that existed prior to D's acquisition of the equipment. Nevertheless, considering the purpose and minor nature of the work performed, this amount does not ameliorate a material condition or defect in the machine under paragraph (j)(1)(i) of this section. In addition, the amount is not paid for a material addition to the machine or a material increase in the capacity of the machine under paragraph (j)(1)(ii) of this section. Also, the activities are not reasonably expected to materially increase the productivity, efficiency, strength, quality, or output of the machine under paragraph (j)(1)(iii) of this section. Therefore, D is not required to capitalize the amount paid to inspect, retune, and replace minor components of the machine as a betterment under this paragraph (j).

Example 5. Amelioration of material condition or defect (i) E acquires a building for use in its business of providing assisted living services. Before and after the purchase, the building functions as an assisted living facility. However, at the time of the purchase, E is aware that the building is in a condition that is below the standards that E requires for facilities used in its business. Immediately after the acquisition and during the following two years, while E continues to use the building as an assisted living facility, E pays amounts for extensive repairs and maintenance, and the acquisition of new property to bring the facility into the high-quality condition for which E's facilities are known. The work on E's building includes repairing damaged drywall, repainting, rewallpapering, replacing windows, repairing and replacing doors, replacing and regrouting tile, repairing millwork, and repairing and replacing roofing materials. The work also involves the replacement of section 1245 property, including window treatments, furniture, and cabinets. The work that E performs affects only the building structure under paragraph (e)(2)(ii)(A) of this section and does not affect any of the building systems described in paragraph (e)(2)(ii)(B) of this section. Assume that each section 1245 property is a separate unit of property.

(ii) Under paragraphs (e)(2)(ii) and (j)(2)(ii) of this section, an amount is paid to improve a building unit of property if the amount is paid for a betterment to the building structure or any building system. Considering the purpose of the expenditure and the effect of the expenditures on the building structure, the amounts that E paid for repairs and maintenance to the building structure comprise a betterment to the building structure under paragraph (j)(1)(i) of this section because the amounts ameliorate material conditions that existed prior to E's acquisition of the building. Therefore, E must treat the amounts paid for the betterment to the building structure as an improvement to the building and must capitalize the amounts under paragraphs (j) and (d)(1) of this section. Moreover, E is required to capitalize the amounts paid to acquire and install each section 1245 property, including each window treatment, each item of furniture, and each cabinet, in accordance with §1.263(a)–2(d)(1).

Example 6. Not a betterment; building refresh (i) F owns a nationwide chain of retail stores that sell a wide variety of items. To maintain the appearance and functionality of its store buildings after several years of wear, F periodically pays amounts to refresh the look and layout of its stores. The work that F performs during a refresh consists of cosmetic and layout changes to the store's interiors and general repairs and maintenance to the store building to modernize the store buildings and reorganize the merchandise displays. The work to each store consists of replacing and reconfiguring display tables and racks to provide better exposure of the merchandise, making corresponding lighting relocations and flooring repairs, moving one wall to accommodate the reconfiguration of tables and racks, patching holes in walls, repainting the interior structure with a new color scheme to coordinate with new signage, replacing damaged ceiling tiles, cleaning and repairing wood flooring throughout the store building, and power washing building exteriors. The display tables and the racks all constitute section 1245 property. F pays amounts to refresh 50 stores during the taxable year. Assume that each section 1245 property within each store is a separate unit of property. Finally, assume that the work does not ameliorate any material conditions or defects that existed when F acquired the store buildings or result in any material additions to the store buildings.

(ii) Under paragraphs (e)(2)(ii) and (j)(2)(ii) of this section, an amount is paid to improve a building unit of property if the amount is paid for a betterment to the building structure or any building system. Considering the facts and circumstances including the purpose of the expenditure, the physical nature of the work performed, and the effect of the expenditure on the buildings' structure and systems, the amounts paid for the refresh of each building are not for any material additions to, or material increases in the capacity of, the buildings' structure or systems as compared with the condition of the structure or systems after the previous refresh. Moreover, the amounts paid are not reasonably expected to materially increase the productivity, efficiency, strength, quality, or output of any building structure or system under as compared to the condition of the structures or systems after the previous refresh. Rather, the work performed keeps F's store buildings' structures and buildings' systems in their ordinarily efficient operating condition. Therefore, F is not required to treat the amounts paid for the refresh of its store buildings' structures and buildings' systems as betterments under paragraphs (j)(1)(ii), (j)(1)(iii), and (j)(2)(iv) of this section. However, F is required to capitalize the amounts paid to acquire and install each section 1245 property in accordance with §1.263(a)–2(d)(1).

Example 7. Building refresh; limited improvement (i) Assume the same facts as *Example 6* except, in the course of the refresh to one of its store buildings, F also pays amounts to increase the building's storage space, add a second loading dock, and add a second overhead door. Specifically, at the same time F pays amounts to perform the refresh, F pays additional amounts to construct an addition to the back of the store building, including adding a new overhead door and loading dock to the building. The work also involves upgrades to the electrical system of the building, including the addition of a second service box with increased amperage and new wiring from the service box to provide lighting and power throughout the new space. Although it is performed at the same time, the construction of the additions does not affect, and is not otherwise related to, the refresh of the retail space.

(ii) Under paragraphs (e)(2)(ii) and (j)(2)(ii) of this section, an amount is paid to improve a building unit of property if the amount is paid for a betterment to the building structure or any building system. Under paragraph (j)(1)(ii) of this section, the amounts paid by F to add the storage space, loading dock, overhead door, and expand the electrical system are for betterments to F's building structure and to the electrical system because they are for material additions to, and a material increase in capacity of, the structure and the electrical system of F's store building. Accordingly, F must treat the amounts paid for these betterments as improvements to the building unit of property and capitalize these amounts under paragraphs (d)(1) and (j) of this section. However, for the reasons discussed in *Example 6*, F is not required to treat the amounts paid for the refresh of its store building structure and systems as a betterments under paragraph (j)(1) of this section. In addition, F is not required under paragraph (g)(1) of this section to capitalize the refresh costs described in *Example 6* because these costs do not directly benefit and are not incurred by reason of the additions to the building structure and electrical system. As in *Example 6*, F is required to capitalize the amounts paid to acquire and install each section 1245 property in accordance with §1.263(a)–2(d)(1).

Example 8. Betterment; building remodel (i) G owns a large chain of retail stores that sell a variety of items. G determines that due to changes in the retail market, it can no longer compete in its current store class and decides to upgrade its stores to offer higher end products to a different type of customer. To offer these products and attract different types of customers, G must substantially remodel its stores. Thus, G pays amounts to remodel its stores by performing work on the buildings' structures and systems as defined under paragraphs (e)(2)(ii)(A) and (e)(2)(ii)(B) of this section. This work includes replacing large parts of the exterior walls with windows, replacing the escalators with a monumental staircase, adding a new glass enclosed elevator, rebuilding the interior and exterior facades, replacing vinyl floors with ceramic flooring, replacing ceiling tiles with acoustical tiles, and removing and rebuilding walls to move changing rooms and create specialty departments. The work also includes upgrades to increase the capacity of the buildings' electrical system to accommodate the structural changes and the addition of new section 1245 property, such as new product information kiosks and point of sale systems. The work to the electrical system also involves the installation of new more efficient and mood enhancing lighting fixtures. In addition, the work includes remodeling all bathrooms by replacing contractor-grade plumbing fixtures with designer-grade fixtures that conserve water and energy. Finally, G also pays amounts to clean debris resulting from construction during the remodel, patch holes in walls that were made to upgrade the electrical system, repaint existing walls with a new color scheme to match the new interior construction, and to power wash building exteriors to enhance the new exterior facade.

(ii) Under paragraphs (e)(2)(ii) and (j)(2)(ii) of this section, an amount is paid to improve a building unit of property if the amount is paid for a betterment to the building structure or any building system. Considering the facts and circumstances, including the purpose of the expenditure, the physical nature of the work performed, and the effect of the work on the buildings' structures and buildings' systems, the amounts that G pays for the remodeling of its stores result in betterments to the buildings' structures and several of its systems under paragraph (j) of this section. Specifically, the amounts paid to replace large parts of the exterior walls with windows, replace the escalators with a monumental staircase, add a new elevator, rebuild the interior and exterior facades, replace vinyl floors with ceramic flooring, replace the ceiling tiles with acoustical tiles, and to remove and rebuild walls are for material additions, that is the addition of major components, to the building structure under paragraph (j)(1)(ii) of this section and are reasonably expected to increase the quality of the building structure under paragraph (j)(1)(iii) of this section. Similarly, the amounts paid to upgrade the electrical system are to materially increase the capacity of the electrical system under paragraph (j)(1)(ii) of this section and are reasonably expected to increase the quality of this system under paragraph (j)(1)(iii) of this section. In addition, the amounts paid to remodel the bathrooms with higher grade and more resource-efficient materials are reasonably expected to increase the efficiency and quality of the plumbing system under paragraph (j)(1)(iii) of this section. Finally, the amounts paid to clean debris, patch and repaint existing walls with a new color scheme, and to power wash building exteriors, while not betterments by themselves, directly benefitted and were incurred by reason of the improvements to G's store buildings' structures and electrical systems under paragraph (g)(1) of this section. Therefore, G must treat the amounts paid for betterments to the store buildings' structures and systems, including the costs of cleaning, patching, repairing, and power washing the building, as improvements to G's buildings and must capitalize these amounts under paragraphs (d)(1) and (j) of this section. Moreover, G is required to capitalize the amounts paid to acquire and install each section 1245 property in accordance with §1.263(a)–2(d)(1). For the treatment of amounts paid to remove components of property, see paragraph (g)(2) of this section.

Example 9. Not betterment; relocation and reinstallation of personal property In Year 1, H purchases new cash registers for use in its retail store located in leased space in a shopping mall. Assume that each cash register is a unit of property as determined under paragraph (e)(3) of this section. In Year 1, H capitalizes the costs of acquiring and installing the new cash registers under §1.263(a)–2(d)(1). In Year 3, H's lease expires, and H decides to relocate its retail store to a different building. In addition to various other costs, H pays $5,000 to move the cash registers and $1,000 to reinstall them in the new store. The cash registers are used for the same purpose and in the same manner that they were used in the former location. The amounts that H pays to move and reinstall the cash registers into its new store do not result in a betterment to the cash registers under paragraph (j) of this section.

Example 10. Betterment; relocation and reinstallation of equipment J operates a manufacturing facility in Building A, which contains various machines that J uses in its manufacturing business. J decides to expand part of its operations by relocating a machine to Building B to reconfigure the machine with additional components. Assume that the machine is a single unit of property under paragraph (e)(3) of this section. J pays amounts to disassemble the machine, to move the machine to the new location, and to reinstall the machine in a new configuration with additional components. Assume that the reinstallation, including the reconfiguration and the addition of components, is for an increase in capacity of the machine, and therefore is for a betterment to the machine under paragraph (j)(1)(ii) of this section. Accordingly, J must capitalize the costs of reinstalling the machine as an improvement to the machine under paragraphs (j) and (d)(1) of this section. J is also required to capitalize the costs of disassembling and moving the machine to Building B because these costs directly benefit and are incurred by reason of the improvement to the machine under paragraph (g)(1) of this section.

Example 11. Betterment; regulatory requirement K owns a building that it uses in its business. In Year 1, City C passes an ordinance setting higher safety standards for buildings because of the hazardous conditions caused by earthquakes. To comply with the ordinance, K pays an amount to add expansion bolts to its building structure. These bolts anchor the wooden framing of K's building to its cement foundation, providing additional structural support and resistance to seismic forces, making the building more resistant to damage from lateral movement. Under paragraphs (e)(2)(ii) and (j)(2)(ii) of this section, an amount is paid to improve a building unit of property if the amount is paid for a betterment to the building structure or any building system. The framing and foundation are part of the building structure as defined in paragraph (e)(2)(ii)(A) of this section. Prior to the ordinance, the old building was in good condition but did not meet City C's new requirements for earthquake resistance. The amount paid by K for the addition of the expansion bolts met City C's new requirement, but also materially increased the strength of the building structure under paragraph (j)(1)(iii) of this section. Therefore, K must treat the amount paid to add the expansion bolts as a betterment to the building structure and must capitalize this amount as an improvement to building under paragraphs (d)(1) and (j) of this section. Under paragraph (g)(4) of this section, City C's new requirement that K's building meet certain safety standards to continue to operate is not relevant in determining whether the amount paid improved the building.

Example 12. Not a betterment; regulatory requirement L owns a meat processing plant. After operating the plant for many years, L discovers that oil is seeping through the concrete walls of the plant. Federal inspectors advise L that it must correct the seepage problem or shut down its plant. To correct the problem, L pays an amount to add a concrete lining to the walls from the floor to a height of about four feet and also to add concrete to the floor of the plant. Under paragraphs (e)(2)(ii) and (j)(2)(ii) of this section, an amount is paid to improve a building unit of property if the amount is paid for a betterment to the building structure or any building system. The walls are part of the building structure as defined in paragraph (e)(2)(ii)(A) of this section. The condition necessitating the expenditure was the seepage of the oil into the plant. Prior to the seepage, the walls did not leak and were functioning for their intended use. L is not required to treat the amount paid as a betterment under paragraphs (j)(1)(ii) and (j)(2)(iv) of this section because it is not paid for a material addition to, or a material increase in the capacity of, the building's structure as compared to the condition of the structure prior to the seepage of oil. Moreover, the amount paid is not reasonably expected to materially increase the productivity, efficiency, strength, quality, or output of the building structure under paragraphs (j)(1)(iii) and (j)(2)(iv) as compared to the condition of the structure prior to the seepage of the oil Therefore, L is not required to treat the amount paid to correct the seepage as a betterment to the building under paragraph (d)(1) or (j) of this section. The federal inspectors' requirement that L correct the seepage to continue operating the plant is not relevant in determining whether the amount paid improves the plant.

Example 13. Not a betterment; new roof membrane M owns a building that it uses for its retail business. Over time, the waterproof membrane (top layer) on the roof of M's building begins to wear, and M began to experience water seepage and leaks throughout its retail premises. To eliminate the problems, a contractor recommends that M put a new rubber membrane on the worn membrane. Accordingly, M pays the contractor to add the new membrane. The new membrane is comparable to the worn membrane when it was originally placed in service by the taxpayer. Under paragraphs (e)(2)(ii) and (j)(2)(ii) of this section, an amount is paid to improve a building unit of property if the amount is paid for a betterment to the building structure or any building system. The roof is part of the building structure under paragraph (e)(2)(ii)(A) of this section. The condition necessitating the expenditure was the normal wear of M's roof. Under paragraph (j)(2)(iv) of this section, to determine whether the amounts are for a betterment, the condition of the building structure after the expenditure must be compared to the condition of the structure when M placed the building into service because M has not previously corrected the effects of normal wear and tear. Under these facts, the amount paid to add the new membrane to the roof is not for a material addition or a material increase in the capacity of the building structure under paragraph (j)(1)(ii) of this section as compared to the condition of the structure when it was placed in service. Moreover, the new membrane is not reasonably expected to materially increase the productivity, efficiency, strength, quality, or output of the building structure under paragraph (j)(1)(iii) of this section as compared to the condition of the building structure when it was placed in service. Therefore, M is not required to treat the amount paid to add the new membrane as a betterment to the building under paragraph (d)(1) or (j) of this section.

Example 14. Material increase in capacity; building N owns a factory building with a storage area on the second floor. N pays an amount to reinforce the columns and girders supporting the second floor to permit storage of supplies with a gross weight 50 percent greater than the previous load-carrying capacity of the storage area. Under paragraphs (e)(2)(ii) and (j)(2)(ii) of this section, an amount is paid to improve a building unit of property if the amount is paid for a betterment to the building structure or any building system. The columns and girders are part of the building structure defined under paragraph (e)(2)(ii)(A) of this section. N must treat the amount paid to reinforce the columns and girders as a betterment under paragraphs (j)(1)(ii) and (j)(1)(iii) of this section because it materially increases the load-carrying capacity and the strength of the building structure. Therefore, N must capitalize this amount as an improvement to the building under paragraphs (d)(1) and (j) of this section.

Example 15. Material increase in capacity; channel O owns harbor facilities consisting of a slip for the loading and unloading of barges and a channel leading from the slip to the river. At the time of purchase, the channel was 150 feet wide, 1,000 feet long, and 10 feet deep. Several years after purchasing the harbor facilities, to allow for ingress and egress and for the unloading of larger barges, O decides to deepen the channel to a depth of 20 feet. O pays a contractor to dredge the channel to 20 feet. Assume the channel is the unit of property. O must capitalize the amounts paid for the dredging as an improvement to the channel because they are for a material increase in the capacity of the unit of property under paragraph (j)(1)(ii) of this section.

Example 16. Not a material increase in capacity; channel Assume the same facts as in *Example 15*, except that the channel was susceptible to siltation and, after dredging to 20 feet, the channel depth had been reduced to 18 feet. O pays a contractor to redredge the channel to a depth of 20 feet. The expenditure was necessitated by the siltation of the channel. Both prior to the siltation and after the redredging, the depth of the channel was 20 feet. Applying the comparison rule under paragraph (j)(2)(iv) of this section, the amounts paid by O to redredge the channel are not for a betterment under paragraph (j)(1)(ii) of this section because they are not for a material addition to, or a material increase in the capacity of, the unit of property as compared to the condition of the property prior to the siltation. Similarly, these amounts are not for a betterment under paragraph (j)(1)(iii) of this section because the amounts are not reasonably expected to increase the productivity, efficiency, strength, quality, or output of the unit of property as compared to the condition of the property before the siltation. Therefore, O is not required to capitalize these amounts as improvement under paragraphs (d)(1) and (j) of this section.

Example 17. Material increase in capacity; channel Assume the same facts as in *Example 16* except that after the redredging, there is more siltation, and the channel depth is reduced back to 18 feet. In addition, to allow for additional ingress and egress and for the unloading of even larger barges, O decides to deepen the channel to a depth of 25 feet. O pays a contractor to redredge the channel to 25 feet. O must capitalize the amounts paid for the dredging as an improvement to the channel because the amounts are for a material increase in the capacity of the unit of property under paragraph (j)(1)(ii) of this section as compared to condition of the unit of property before the siltation. As part of this improvement, O is also required to capitalize the portion of the redredge costs allocable to restoring the depth lost to the siltation because, under paragraph (g)(1)(i) of this section, these amounts directly benefit and are incurred by reason of the improvement to the unit of property.

Example 18. Not a material increase in capacity; building P owns a building used in its trade or business. The first floor has a drop-ceiling. To fully expose windows on the first floor, P pays an amount to remove the drop-ceiling and repaint the original ceiling. Under paragraphs (e)(2)(ii) and (j)(2)(ii) of this section, an amount is paid to improve a building unit of property if the amount is paid for a betterment to the building structure or any building system. The ceiling is part of the building structure as defined under paragraph (e)(2)(ii)(A) of this section. P is not required to treat the amount paid to remove the drop-ceiling as a betterment to the building because it was not for a material addition or material increase in the capacity of the building structure under paragraph (j)(1)(ii) of this section and it was not reasonably expected to materially increase to the efficiency, strength, or quality of the building structure under paragraph (j)(1)(iii) of this section. In addition, under paragraph (j)(2)(i) of this section, because the effect on productivity and output of the building structure cannot be measured in this context, these factors are not relevant in determining whether there is a betterment to the building structure.

Example 19. Material increase in capacity; building Q owns a building that it uses in its retail business. The building contains one floor of retail space with very high ceilings. Q pays an amount to add a stairway and a mezzanine for the purposes of adding additional selling space within its building. Under paragraphs (e)(2)(ii) and (j)(2)(ii) of this section, an amount is paid to improve a building unit of property if the amount is paid for a betterment to the building structure or any building system. The stairway and the mezzanine are part of the building structure as defined under paragraph (e)(2)(ii)(A) of this section. Q is required to treat the amount paid to add the stairway and mezzanine as a betterment because it is for a material addition to, and an increase in the capacity of, the building structure under paragraph (j)(1)(ii) of this section. Therefore, Q must capitalize this amount as an improvement to the building unit of property under paragraphs (d)(1) and (j) of this section.

Example 20. Not material increase in efficiency; HVAC system R owns an office building that it uses to provide services to customers. The building contains an HVAC system that incorporates 10 roof-mounted units that provide heating and air conditioning for different parts of the building. The HVAC system also consists of controls for the entire system and duct work that distributes the heated or cooled air to the various spaces in the building's interior. After many years of use of the HVAC system, R begins to experience climate control problems in various offices throughout the office building and consults with a contractor to determine the cause. The contractor recommends that R replace two of the roof-mounted units. R pays an amount to replace the two specified units. The two new units are expected to eliminate the climate control problems and to be 10 percent more energy efficient than the replaced units in their original condition. No work is performed on the other roof-mounted heating/cooling units, the duct work, or the controls. Under paragraphs (e)(2)(ii) and (j)(2)(ii) of this section, an amount is paid to improve a building unit of property if the amount is paid for a betterment to the building structure or any building system. The HVAC system, including the two-roof mounted units, is a building system under paragraph (e)(2)(ii)(B)(*1*) of this section. The replacement of the two roof-mounted units is not a material addition to or a material increase in the capacity of the HVAC system under paragraphs (j)(1)(ii) and (j)(3)(ii) of this section as compared to the condition of the system prior to the climate control problems. In addition, given the 10 percent efficiency increase in two units of the entire HVAC system, the replacement is not expected to materially increase the productivity, efficiency, strength, quality, or output of the HVAC system under paragraphs (j)(1)(iii) and (j)(2)(iv) of this section as compared to the condition of the system prior to the climate control problems. Therefore, R is not required to capitalize the amounts paid for these replacements as betterments to the building unit of property under paragraphs (d)(1) and (j) of this section.

Example 21. Material increase in efficiency; building S owns a building that it uses in its service business. S conducts an energy assessment and determines that it could significantly reduce its energy costs by adding insulation to its building. S pays an insulation contractor to apply a combination of loose-fill, spray foam, and blanket insulation throughout S's building structure, including within the attic, walls, and crawl spaces. S reasonably expects the new insulation to make the building more energy efficient because the contractor indicated that the new insulation would reduce its annual energy and power costs by approximately 50 percent of its annual costs during the last five years. Under paragraphs (e)(2)(ii) and (j)(2)(ii) of this section, an amount is paid to improve a building if the amount is paid for a betterment to the building structure or any building system. Therefore, under paragraphs (d)(1) and (j) of this section, S must capitalize as a betterment the amount paid to add the insulation because the insulation is reasonably expected to materially increase the efficiency of the building structure under paragraph (j)(1)(iii) of this section.

Example 22. Material addition; building T owns and operates a restaurant, which provides a variety of prepared foods to its customers. To better accommodate its customers and increase customer traffic, T decides to add a drive-through service area. As a result, T pays amounts to partition an area within its restaurant for a drive-through service counter, to construct a service window with necessary security features, to build an overhang for vehicles, and to construct a drive-up menu board. Assume that the drive-up menu board is section 1245 property that is a separate unit of property under paragraph (e)(3) of this section. Under paragraphs (e)(2)(ii) and (j)(2)(ii) of this section, an amount is paid to improve a building unit of property if the amount is paid for a betterment to the building structure or any building system. The amounts paid for the partition, service window and overhang are betterments to the building structure because they comprise a material addition (that is, a physical expansion, extension, and addition of a major component) to the building structure under paragraph (j)(1)(ii) of this section. Accordingly, T must capitalize as an improvement the amounts paid to add the partition, drive-through window, and overhang under paragraphs (d)(1) and (j) of this section. T is also required to capitalize the amounts paid to acquire and install each section 1245 property in accordance with § 1.263(a)–2(d)(1).

Example 23. Costs incurred during betterment U owns a building that it uses in its service business. To accommodate new employees and equipment, U pays amounts to increase the load capacity of its electrical system by adding a second electrical panel with additional circuits and adding wiring and outlets throughout the electrical system of its building. To complete the upgrades to the electrical system, the contractor makes several holes in walls. As a result, U also incurs costs to patch the holes and repaint several walls. Under paragraphs (e)(2)(ii) and (j)(2)(ii) of this section, an amount is paid to improve a building unit of property if the amount is paid for a betterment to the building structure or any building system. The amounts paid to upgrade the panel and wiring are for betterments to U's electrical system because they increase the capacity of the electrical system under paragraph (j)(1)(ii) of this section and increase the strength and output of the electrical system under paragraph (j)(1)(iii) of this section. Accordingly, U is required to capitalize the costs of the upgrade to the electrical system as an improvement to the building unit of property under paragraphs (d)(1) and (j) of this section. Moreover, under paragraph (g)(1) of this section, U is required to capitalize the amounts paid to patch holes and repaint several walls in its building because these costs directly benefit and are incurred by reason of the improvement to U's building unit of property.

(k) *Capitalization of restorations*—(1) *In general.* A taxpayer must capitalize as an improvement an amount paid to restore a unit of property, including an amount paid to make good the exhaustion for which an allowance is or has been made. An amount restores a unit of property only if it—

(i) Is for the replacement of a component of a unit of property for which the taxpayer has properly deducted a loss for that component, other than a casualty loss under § 1.165–7;

(ii) Is for the replacement of a component of a unit of property for which the taxpayer has properly taken into account the adjusted basis of the component in realizing gain or loss resulting from the sale or exchange of the component;

(iii) Is for the restoration of damage to a unit of property for which the taxpayer is required to take a basis adjustment as a result of a casualty loss under section 165, or relating to a casualty event described in section 165, subject to the limitation in paragraph (k)(4) of this section;

(iv) Returns the unit of property to its ordinarily efficient operating condition if the property has deteriorated to a state of disrepair and is no longer functional for its intended use;

(v) Results in the rebuilding of the unit of property to a like-new condition as determined under paragraph (k)(5) of this section after the end of its class life as defined in paragraph (i)(4) of this section; or

(vi) Is for the replacement of a part or combination of parts that comprise a major component or a substantial structural part of a unit of property as determined under paragraph (k)(6) of this section.

(2) *Application of restorations to buildings.* An amount is paid to improve a building if it is paid to restore, as defined under paragraph (k)(1) of this section, a property specified under paragraph (e)(2)(ii) (building), paragraph (e)(2)(iii)(B) (condominium), paragraph (e)(2)(iv)(B) (cooperative), or paragraph (e)(2)(v)(B) (leased building or portion of building) of this section. For example, an amount is paid to improve a building if it is paid for the replacement of a part or combination of parts that comprise a major component or substantial structural part of the building structure or any one of its building systems (for example, the HVAC system). See paragraph (k)(6) of this section.

(3) *Exception for losses based on salvage value.* A taxpayer is not required to treat as a restoration amounts paid under paragraph (k)(1)(i) or paragraph (k)(1)(ii) of this section if the unit of property has been fully depreciated and the loss is attributable only to remaining salvage value as computed for federal income tax purposes.

(4) *Restoration of damage from casualty*—(i) *Limitation.* For purposes of paragraph (k)(1)(iii) of this section, the amount paid for restoration of damage to the unit of property that must be capitalized under this paragraph (k) is limited to the excess (if any) of—

(A) The amount prescribed by § 1.1011–1 as the adjusted basis of the single, identifiable property (under § 1.167–7(b)(2)(i)) for determining the loss allowable on account of the casualty, over

(B) The amount paid for restoration of damage to the unit of property under paragraph (k)(1)(iii) of this section that also constitutes an improvement under any other provision of paragraph (k)(1) of this section.

(ii) *Amounts in excess of limitation.* The amounts paid for restoration of damage to a unit of property as described in paragraph (k)(1)(iii) of this section, but that exceed the limitation provided in paragraph (k)(4)(i) of this section, must be treated in accordance with the provisions of the Internal Revenue Code and regulations that are otherwise applicable. See, for example, §1.162–4 (repairs and maintenance); §1.263(a)–2 (costs to acquire and produce units of property); and §1.263(a)-3 (costs to improve units of property).

(5) *Rebuild to like-new condition.* For purposes of paragraph (k)(1)(v) of this section, a unit of property is rebuilt to a like-new condition if it is brought to the status of new, rebuilt, remanufactured, or a similar status under the terms of any federal regulatory guideline or the manufacturer's original specifications. Generally, a comprehensive maintenance program, even though substantial, does not return a unit of property to a like-new condition.

(6) *Replacement of a major component or a substantial structural part*—(i) *In general.* To determine whether an amount is for the replacement of a part or a combination of parts that comprise a major component or a substantial structural part of the unit of property under paragraph (k)(1)(vi) of this section, it is appropriate to consider all the facts and circumstances. These facts and circumstances include the quantitative and qualitative significance of the part or combination of parts in relation to the unit of property.

(A) *Major component.* A major component is a part or combination of parts that performs a discrete and critical function in the operation of the unit of property. An incidental component of the unit of property, even though such component performs a discrete and critical function in the operation of the unit of property, generally will not, by itself, constitute a major component.

(B) *Substantial structural part.* A substantial structural part is a part or combination of parts that comprises a large portion of the physical structure of the unit of property.

(ii) *Major components and substantial structural parts of buildings.* In the case of a building, an amount is for the replacement of a major component or a substantial structural part of the building unit of property if—

(A) The replacement includes a part or combination of parts that comprise a major component (as defined in paragraph (k)(6)(i)(A) of this section), or a significant portion of a major component, of any of the properties designated in paragraph (e)(2)(ii) (building), paragraph (e)(2)(iii)(B) (condominium), paragraph (e)(2)(iv)(B) (cooperative), or paragraph (e)(2)(v)(B) (leased building or leased portion of a building) of this section; or

(B) The replacement includes a part or combination of parts that comprises a large portion of the physical structure of any of the properties designated in paragraph (e)(2)(ii) (building), paragraph (e)(2)(iii)(B) (condominium), paragraph (e)(2)(iv)(B) (cooperative), or paragraph (e)(2)(v)(B) (leased building or portion of building) of this section.

(7) *Examples.* The following examples illustrate the application of this paragraph (k) only and do not address whether capitalization is required under another provision of this section or another provision of the Code (for example, section 263A). Unless otherwise stated, assume that the taxpayer has not properly deducted a loss for, nor taken into account the adjusted basis on a sale or exchange of, any unit of property, asset, or component of a unit of property that is replaced.

Example 1. Replacement of loss component A owns a manufacturing building containing various types of manufacturing equipment. A does a cost segregation study of the manufacturing building and properly determines that a walk-in freezer in the manufacturing building is section 1245 property as defined in section 1245(a)(3). The freezer is not part of the building structure or the HVAC system under paragraph (e)(2)(i) or (e)(2)(ii)(B)(*1*) of this section. Several components of the walk-in freezer cease to function, and A decides to replace them. A abandons the old freezer components and properly recognizes a loss from the abandonment of the components. A replaces the abandoned freezer components with new components and incurs costs to acquire and install the new components. Under paragraph (k)(1)(i) of this section, A must capitalize the amounts paid to acquire and install the new freezer components because A replaced components for which it had properly deducted a loss.

Example 2. Replacement of sold component Assume the same facts as in *Example 1*, except that A did not abandon the components but instead sold them to another party and properly recognized a loss on the sale. Under paragraph (k)(1)(ii) of this section, A must capitalize the amounts paid to acquire and install the new freezer components because A replaced components for which it had properly taken into account the adjusted basis of the components in realizing a loss from the sale of the components.

Example 3. Restoration after casualty loss B owns an office building that it uses in its trade or business. A storm damages the office building at a time when the building has an adjusted basis of $500,000. B deducts under section 165 a casualty loss in the amount of $50,000, and properly reduces its basis in the office building to $450,000. B hires a contractor to repair the damage to the building, including the repair of the building roof and the removal of debris from the building premises. B pays the contractor $50,000 for the work. Under paragraph (k)(1)(iii) of this section, B must treat the $50,000 amount paid to the contractor as a restoration of the building structure because B properly adjusted its basis in that amount as a result of a casualty loss under section 165, and the amount does not exceed the limit in paragraph (k)(4) of this section. Therefore, B must treat the amount paid as an improvement to the building unit of property and, under paragraph (d)(2) of this section, must capitalize the amount paid.

Example 4. Restoration after casualty event Assume the same facts as in *Example 3*, except that B receives insurance proceeds of $50,000 after the casualty to compensate for its loss. B cannot deduct a casualty loss under section 165 because its loss was compensated by insurance. However, B properly reduces its basis in the property by the amount of the insurance proceeds. Under paragraph (k)(1)(iii) of this section, B must treat the $50,000 amount paid to the contractor as a restoration of the building structure because B has properly taken a basis adjustment relating to a casualty event described in section 165, and the amount does not exceed the limit in paragraph (k)(4) of this section. Therefore, B must treat the amount paid as an improvement to the building unit of property and, under paragraph (d)(2) of this section, must capitalize the amount paid.

Example 5. Restoration after casualty loss; limitation (i) C owns a building that it uses in its trade or business. A storm damages the building at a time when the building has an adjusted basis of $500,000. C determines that the cost of restoring its property is $750,000, deducts a casualty loss under section 165 in the amount of $500,000, and properly reduces its basis in the building to $0. C hires a contractor to repair the damage to the building and pays the contractor $750,000 for the work. The work involves replacing the entire roof structure of the building at a cost of $350,000 and pumping water from the building, cleaning debris from the interior and exterior, and replacing areas of damaged dry wall and flooring at a cost of $400,000. Although resulting from the casualty event, the pumping, cleaning, and replacing damaged drywall and flooring, does not directly benefit and is not incurred by reason of the roof replacement.

(ii) Under paragraph (k)(1)(vi) of this section, C must capitalize as an improvement the $350,000 amount paid to the contractor to replace the roof structure because the roof structure constitutes a major component and a substantial structural part of the building unit of property. In addition, under paragraphs (k)(1)(iii) and (k)(4)(i), C must treat as a restoration the remaining costs, limited to the excess of the adjusted basis of the building over the amounts paid for the improvement under paragraph (k)(1)(vi). Accordingly, C must treat as a restoration $150,000 ($500,000—$350,000) of the $400,000 paid for the portion of the costs related to repairing and cleaning the building structure under paragraph (k)(1)(iii) of this section. Thus, in addition to the $350,000 to replace the roof structure, C must also capitalize the $150,000 as an improvement to the building unit of property under paragraph (d)(2) of this section. C is not required to capitalize the remaining $250,000 repair and cleaning costs under paragraph (k)(1)(iii) of this section.

Example 6. Restoration of property in a state of disrepair D owns and operates a farm with several barns and outbuildings. D did not use or maintain one of the outbuildings on a regular basis, and the outbuilding fell into a state of disrepair. The outbuilding previously was used for storage but can no longer be used for that purpose because the building is not structurally sound. D decides to restore the outbuilding and pays an amount to shore up the walls and replace the siding. Under paragraphs (e)(2)(ii) and (k)(2) of this section, an amount is paid to improve a building if the amount is paid to restore the building structure or any building system. The walls and siding are part of the building structure under paragraph (e)(2)(ii)(A) of this section. Under paragraph (k)(1)(iv) of this section, D must treat the amount paid to shore up the walls and replace the siding as a restoration of the building structure because the amounts return the building structure to its ordinarily efficient operating condition after it had deteriorated to a state of disrepair and was no longer functional for its intended use. Therefore, D must treat the amount paid to shore up the walls and replace the siding as an improvement to the building unit of property and, under paragraph (d)(2) of this section, must capitalize the amount paid.

Example 7. Rebuild of property to like-new condition before end of class life E is a Class I railroad that owns a fleet of freight cars. Assume the freight cars have a recovery period of 7 years under section 168(c) and a class life of 14 years. Every 8 to 10 years, E rebuilds its freight cars. Ten years after E places the freight car in service, E performs a rebuild to the manufacturer's original specification, which includes a complete disassembly, inspection, and reconditioning or replacement of components of the suspension and draft systems, trailer hitches, and other special equipment. E also modifies the car to upgrade various components to the latest engineering standards. The freight car is stripped to the frame, with all of its substantial components either reconditioned or replaced. The frame itself is the longest-lasting part of the car and is reconditioned. The walls of the freight car are replaced or are sandblasted and repainted. New wheels are installed on the car. All the remaining components of the car are restored before they are reassembled. At the end of the rebuild, the freight car has been restored to like-new condition under the manufacturer's specifications. Assume the freight car is the unit of property. E is not required to treat as an improvement and capitalize the amounts paid to rebuild the freight car under paragraph (k)(1)(v) of this section because, although the amounts paid restore the freight car to like-new condition, the amounts were not paid after the end of the class life of the freight car. However, paragraphs (k)(1)(vi) and (k)(6) of this section are applicable for determining whether any amounts must be capitalized because they are paid for the replacement of a major component or a substantial structural part of the unit of property.

Example 8. Rebuild of property to like-new condition after end of class life Assume the same facts as in *Example 7*, except that E rebuilds the freight car 15 years after E places it in service. Under paragraph (k)(1)(v) of this section, E must treat as an improvement and capitalize the amounts paid to rebuild the freight car because the amounts paid restore the freight car to like-new condition after the end of the class life of the freight car.

Example 9. Not a rebuild to a like-new condition F is a commercial airline engaged in the business of transporting freight and passengers. To conduct its business, F owns several aircraft. As a condition of maintaining its airworthiness certificates, F is required by the FAA to establish and adhere to a continuous maintenance program for each aircraft in its fleet. F performs heavy maintenance on its airframes every 8 to 10 years. In Year 1, F purchased an aircraft for $15 million. In Year 16, F paid $2 million for the labor and materials necessary to perform the second heavy maintenance visit on the airframe of an aircraft. To perform the heavy maintenance visit, F extensively disassembles the airframe, removing items such as engines, landing gear, cabin and passenger compartment seats, side and ceiling panels, baggage stowage bins, galleys, lavatories, floor boards, cargo loading systems, and flight control surfaces. As specified by F's maintenance manual for the aircraft, F then performs certain tasks on the disassembled airframe for the purpose of preventing deterioration of the inherent safety and reliability levels of the airframe. These tasks include lubrication and service, operational and visual checks, inspection and functional checks, reconditioning of minor parts and components, and removal, discard, and replacement of certain life-limited single cell parts, such as cartridges, canisters, cylinders, and disks. Reconditioning of parts includes burnishing corrosion, repairing cracks, dents, gouges, punctures, tightening or replacing loose or missing fasteners, replacing damaged seals, gaskets, or valves, and similar activities. In addition to the tasks described above, to comply with certain FAA airworthiness directives, F inspects specific skin locations, applies doublers over small areas where cracks were found, adds structural reinforcements, and replaces skin panels on a small section of the fuselage. However, the heavy maintenance does not include the replacement of any major components or substantial structural parts of the aircraft with new components. In addition, the heavy maintenance visit does not bring the aircraft to the status of new, rebuilt, remanufactured, or a similar status under FAA guidelines or the manufacturer's original specifications. After the heavy maintenance, the aircraft was reassembled. Assume the aircraft, including the engines, is a unit of property and has a class life of 12 years under section 168(c). Although the heavy maintenance is performed after the end of the class life of the aircraft, F is not required to treat the heavy maintenance as a restoration and improvement of the unit of property under paragraph (k)(1)(v) of this section because, although extensive, the amounts paid do not restore the aircraft to like-new condition. See also paragraph (i)(1)(iii) of this section for the application of the safe harbor for routine maintenance.

Example 10. Replacement of major component or substantial structural part; personal property

≤ G is a common carrier that owns a fleet of petroleum hauling trucks. G pays amounts to replace the existing engine, cab, and petroleum tank with a new engine, cab, and tank. Assume the tractor of the truck (which includes the cab and the engine) is a single unit of property and that the trailer (which contains the petroleum tank) is a separate unit of property. The new engine and the cab each constitute a part or combination of parts that comprise a major component of G's tractor, because they perform a discrete and critical function in the operation of the tractor. In addition, the cab constitutes a part or combination of parts that comprise a substantial structural part of G's tractor. Therefore, the amounts paid for the replacement of the engine and the cab must be capitalized under paragraph (k)(1)(vi) of this section. Moreover, the new petroleum tank constitutes a part or combination of parts that comprise a major component and a substantial structural part of the trailer. Accordingly, the amounts paid for the replacement of the tank also must be capitalized under paragraph (k)(1)(vi) of this section.

Example 11. Repair performed during restoration Assume the same facts as in *Example 10*, except that, at the same time the engine and cab of the tractor are replaced, G pays amounts to paint the cab of the tractor with its company logo and to fix a broken taillight on the tractor. The repair of the broken taillight and the painting of the cab generally are deductible expenses under § 1.162–4. However, under paragraph (g)(1)(i) of this section, a taxpayer must capitalize all the direct costs of an improvement and all the indirect costs that directly benefit or are incurred by reason of an improvement. Repairs and maintenance that do not directly benefit or are not incurred by reason of an improvement are not required to be capitalized under section 263(a), regardless of whether they are made at the same time as an improvement. For the amounts paid to paint the logo on the cab, G's need to paint the logo arose from the replacement of the cab with a new cab. Therefore, under paragraph (g)(1)(i) of this section, G must capitalize the amounts paid to paint the cab as part of the improvement to the tractor because these amounts directly benefit and are incurred by reason of the restoration of the tractor. The amounts paid to repair the broken taillight are not for the replacement of a major component, do not directly benefit, and are not incurred by reason of the replacement of the cab or the engine under paragraph (g)(1)(i) of this section, even though the repair was performed at the same time as these replacements. Thus, G is not required to capitalize the amounts paid to repair the broken taillight.

Example 12. Related amounts to replace major component or substantial structural part; personal property (i) H owns a retail gasoline station, consisting of a paved area used for automobile access to the pumps and parking areas, a building used to market gasoline, and a canopy covering the gasoline pumps. The premises also consist of underground storage tanks (USTs) that are connected by piping to the pumps and are part of the gasoline pumping system used in the immediate retail sale of gas. The USTs are components of the gasoline pumping system. To comply with regulations issued by the Environmental Protection Agency, H is required to remove and replace leaking USTs. In Year 1, H hires a contractor to perform the removal and replacement, which consists of removing the old tanks and installing new tanks with leak detection systems. The removal of the old tanks includes removing the paving material covering the tanks, excavating a hole large enough to gain access to the old tanks, disconnecting any strapping and pipe connections to the old tanks, and lifting the old tanks out of the hole. Installation of the new tanks includes placement of a liner in the excavated hole, placement of the new tanks, installation of a leak detection system, installation of an overfill system, connection of the tanks to the pipes leading to the pumps, backfilling of the hole, and replacement of the paving. H also is required to pay a permit fee to the county to undertake the installation of the new tanks.

(ii) H pays the permit fee to the county on October 15, Year 1. On December 15, Year 1, the contractor completes the removal of the old USTs and bills H for the costs of removal. On January 15, Year 2, the contractor completes the installation of the new USTs and bills H for the remainder of the work. Assume that H computes its taxes on a calendar year basis and H's gasoline pumping system is the unit of property. Under paragraph (k)(1)(vi) of this section, H must capitalize the amounts paid to replace the USTs as a restoration to the gasoline pumping system because the USTs are parts or combinations of parts that comprise a major component and substantial structural part of the gasoline pumping system. Moreover, under paragraph (g)(2) of this section, H must capitalize the costs of removing the old USTs because H has not taken a loss on the disposition of the USTs, and the amounts to remove the USTs directly benefit and are incurred by reason of the restoration of, and improvement to, the gasoline pumping system. In addition, under paragraph (g)(1) of this section, H must capitalize the permit fees because they directly benefit and are incurred by reason of the improvement to the gasoline pumping system. Finally, under paragraph (g)(3) of this section, H must capitalize the related amounts paid to improve the gasoline pumping system, including the permit fees, the amount paid to remove the old USTs, and the amount paid to install the new USTs, even though the amounts were separately invoiced, paid to different parties, and incurred in different tax years.

Example 13. Not replacement of major component; incidental J owns a machine shop in which it makes dies used by manufacturers. In Year 1, J purchased a drill press for use in its production process. In Year 3, J discovers that the power switch assembly, which controls the supply of electric power to the drill press, has become damaged and cannot operate. To correct this problem, J pays amounts to replace the power switch assembly with comparable and commercially available replacement parts. Assume that the drill press is a unit of property under paragraph (e) of this section and the power switch assembly is a small component of the drill press that may be removed and installed with relative ease. The power switch assembly is not a major component of the unit of property under paragraph (k)(6)(i)(A) of this section because, although the power assembly may affect the function of J's drill press by controlling the supply of electric power, the power assembly is an incidental component of the drill press. In addition, the power assembly is not a substantial structural part of J's drill press under paragraph (k)(6)(i)(B) of this section. Therefore, J is not required to capitalize the costs to replace the power switch assembly under paragraph (k)(1)(vi) of this section.

Example 14. Replacement of major component or substantial structural part; roof K owns a manufacturing building. K discovers several leaks in the roof of the building and hires a contractor to inspect and fix the roof. The contractor discovers that a major portion of the decking has rotted and recommends the replacement of the entire roof. K pays the contractor to replace the entire roof, including the decking, insulation, asphalt, and various coatings. Under paragraphs (e)(2)(ii) and (k)(2) of this section, an amount is paid to improve a building if the amount is paid to restore the building structure or any building system. The roof is part of the building structure as defined under paragraph (e)(2)(ii)(A) of this section. Because the entire roof performs a discrete and critical function in the building structure, the roof comprises a major component of the building structure under paragraph (k)(6)(ii)(A) of this section. In addition, because the roof comprises a large portion of the physical structure of the building structure, the roof comprises a substantial structural part of the building structure under paragraph (k)(6)(ii)(B) of this section. Therefore, under either analysis, K must treat the amount paid to replace the roof as a restoration of the building under paragraphs (k)(1)(vi) and (k)(2) of this section and must capitalize the amount paid as an improvement under paragraph (d)(2) of this section.

Example 15. Not replacement of major component or substantial structural part; roof membrane L owns a building in which it conducts its retail business. The roof decking over L's building is covered with a waterproof rubber membrane. Over time, the rubber membrane begins to wear, and L begins to experience leaks into its retail premises. However, the building is still functioning in L's business. To eliminate the problems, a contractor recommends that L replace the membrane on the roof with a new rubber membrane. Accordingly, L pays the contractor to strip the original membrane and replace it with a new rubber membrane. The new membrane is comparable to the original membrane but corrects the leakage problems. Under paragraphs (e)(2)(ii) and (k)(2) of this section, an amount is paid to improve a building if the amount is paid to restore the building structure or any building system. The roof, including the membrane, is part of the building structure as defined under paragraph (e)(2)(ii)(A) of this section. Because the entire roof performs a discrete and critical function in the building structure, the roof comprises a major component of the building structure under paragraph (k)(6)(ii)(A) of this section. Although the replacement membrane may aid in the function of the building structure, it does not, by itself, comprise a significant portion of the roof major component under paragraph (k)(6)(ii)(A) of this section. In addition, the replacement membrane does not comprise a substantial structural part of L's building structure under paragraph (k)(6)(ii)(B) of this section. Therefore, L is not required to capitalize the amount paid to replace the membrane as a restoration of the building under paragraph (k)(1)(vi) of this section.

Example 16. Not a replacement of major component or substantial structural part; HVAC system M owns a building in which it operates an office that provides medical services. The building contains one HVAC system, which is comprised of three furnaces, three air conditioning units, and duct work that runs throughout the building to distribute the hot or cold air throughout the building. One furnace in M's building breaks down, and M pays an amount to replace it with a new furnace. Under paragraphs (e)(2)(ii) and (k)(2) of this section, an amount is paid to improve a building if the amount is paid to restore the building structure or any building system. The HVAC system, including the furnaces, is a building system under paragraph (e)(2)(ii)(B)(*1*) of this section. As the parts that provide the heating function in the system, the three furnaces, together, perform a discrete and critical function in the operation of the HVAC system and are therefore a major component of the HVAC system under paragraph (k)(6)(i)(A) of this section. However, the single furnace is not a significant portion of this major component of the HVAC system under paragraph (k)(6)(ii)(A) of this section, or a substantial structural part of the HVAC system under paragraph (k)(6)(ii)(B) of this section. Therefore, M is not required to treat the amount paid to replace the furnace as a restoration of the building under paragraph (k)(1)(vi) of this section.

Example 17. Replacement of major component or substantial structural part; HVAC system N owns a large office building in which it provides consulting services. The building contains one HVAC system, which is comprised of one chiller unit, one boiler, pumps, duct work, diffusers, air handlers, outside air intake, and a cooling tower. The chiller unit includes the compressor, evaporator, condenser, and expansion valve, and it functions to cool the water used to generate air conditioning throughout the building. N pays an amount to replace the chiller with a comparable unit. Under paragraphs (e)(2)(ii) and (k)(2) of this section, an amount is paid to improve a building if the amount is paid to restore the building structure or any building system. The HVAC system, including the chiller unit, is a building system under paragraph (e)(2)(ii)(B)(*1*) of this section. The chiller unit performs a discrete and critical function in the operation of the HVAC system because it provides the cooling mechanism for the entire system. Therefore, the chiller unit is a major component of the HVAC system under paragraph (k)(6)(ii)(A) of this section. Because the chiller unit comprises a major component of a building system, N must treat the amount paid to replace the chiller unit as a restoration to the building under paragraphs (k)(1)(vi) and (k)(2) of this section and must capitalize the amount paid as an improvement to the building under paragraph (d)(2) of this section.

Example 18. Not replacement of major component or substantial structural part; HVAC system O owns an office building that it uses to provide services to customers. The building contains a HVAC system that incorporates ten roof-mounted units that provide heating and air conditioning for the building. The HVAC system also consists of controls for the entire system and duct work that distributes the heated or cooled air to the various spaces in the building's interior. O begins to experience climate control problems in various offices throughout the office building and consults with a contractor to determine the cause. The contractor recommends that O replace three of the roof-mounted heating and cooling units. O pays an amount to replace the three specified units. No work is performed on the other roof-mounted heating and cooling units, the duct work, or the controls. Under paragraphs (e)(2)(ii) and (k)(2) of this section, an amount is paid to improve a building if the amount restores the building structure or any building system. The HVAC system, including the 10 roof-mounted heating and cooling units, is a building system under paragraph (e)(2)(ii)(B)(*1*) of this section. As the components that generate the heat and the air conditioning in the HVAC system, the 10 roof-mounted units, together, perform a discrete and critical function in the operation of the HVAC system and, therefore, are a major component of the HVAC system under paragraph (k)(6)(ii)(A) of this section. The three roof-mounted heating and cooling units are not a significant portion of a major component of the HVAC system under (k)(6)(ii)(A) of this section, or a substantial structural part of the HVAC system, under paragraph (k)(6)(ii)(B) of this section. Accordingly, O is not required to treat the amount paid to replace the three roof-mounted heating and cooling units as a restoration of the building under paragraph (k)(1)(iv) of this section.

Example 19. Replacement of major component or substantial structural part; fire protection system P owns a building that it uses to operate its business. P pays an amount to replace the sprinkler system in the building with a new sprinkler system. Under paragraphs (e)(2)(ii) and (k)(2) of this section, an amount is paid to improve a building if the amount restores the building structure or any building system. The fire protection and alarm system, including the sprinkler system, is a building system under paragraph (e)(2)(ii)(B)(*6*) of this section. As the component that provides the fire suppression mechanism in the system, the sprinkler system performs a discrete and critical function in the operation of the fire protection and alarm system and is therefore a major component of the system under paragraph (k)(6)(ii)(A) of this section. Because the sprinkler system comprises a major component of a building system, P must treat the amount paid to replace the sprinkler system as restoration to the building unit of property under paragraphs (k)(1)(vi) and (k)(2) of this section and must capitalize the amount paid as an improvement to the building under paragraph (d)(2) of this section.

Example 20. Replacement of major component or substantial structural part; electrical system Q owns a building that it uses to operate its business. Q pays an amount to replace the wiring throughout the building with new wiring that meets building code requirements. Under paragraphs (e)(2)(ii) and (k)(2) of this section, an amount is paid to improve a building if the amount restores the building structure or any building system. The electrical system, including the wiring, is a building system under paragraph (e)(2)(ii)(B)(*3*) of this section. As the component that distributes the electricity throughout the system, the wiring performs a discrete and critical function in the operation of the electrical system under paragraph (k)(6)(ii)(A) of this section. The wiring also comprises a large portion of the physical structure of the electrical system under paragraph (k)(6)(ii)(B) of this section. Because the wiring comprises a major component and a substantial structural part of a building system, Q must treat the amount paid to replace the wiring as a restoration to the building under paragraphs (k)(1)(vi) and (k)(2) of this section and must capitalize the amount paid as an improvement to the building under paragraph (d)(2) of this section.

Example 21. Not a replacement of major component or substantial structural part; electrical system R owns a building that it uses to operate its business. R pays an amount to replace 30 percent of the wiring throughout the building with new wiring that meets building code requirements. Under paragraphs (e)(2)(ii) and (k)(2) of this section, an amount is paid to improve a building if the amount restores the building structure or any building system. The electrical system, including the wiring, is a building system under paragraph (e)(2)(ii)(B)(*3*) of this section. All the wiring in the building comprises a major component because it performs a discrete and critical function in the operation of the electrical system. However, the portion of the wiring that was replaced is not a significant portion of the wiring major component under paragraph (k)(6)(ii)(A) of this section, nor does it comprise a substantial structural part of the electrical system under paragraph (k)(6)(ii)(B) of this section. Therefore, under paragraph (k)(6) of this section, the replacement of 30 percent of the wiring is not the replacement of a major component or substantial structural part of the building, and R is not required to treat the amount paid to replace 30 percent of the wiring as a restoration to the building under paragraph (k)(1)(iv) of this section.

Example 22. Replacement of major component or substantial structural part; plumbing system S owns a building in which it conducts a retail business. The retail building has three floors. The retail building has men's and women's restrooms on two of the three floors. S decides to update the restrooms by paying an amount to replace the plumbing fixtures in all of the restrooms, including all the toilets and sinks, with modern style plumbing fixtures of similar quality and function. S does not replace the pipes connecting the fixtures to the building's plumbing system. Under paragraphs (e)(2)(ii) and (k)(2) of this section, an amount is paid to improve a building if the amount restores the building structure or any building system. The plumbing system, including the plumbing fixtures, is a building system under paragraph (e)(2)(ii)(B)(*2*) of this section. All the toilets together perform a discrete and critical function in the operation of the plumbing system, and all the sinks, together, also perform a discrete and critical function in the operation of the plumbing system. Therefore, under paragraph (k)(6)(ii)(A) of this section, all the toilets comprise a major component of the plumbing system, and all the sinks comprise a major component of the plumbing system. Accordingly, S must treat the amount paid to replace all of the toilets and all of the sinks as a restoration of the building under paragraphs (k)(1)(vi) and (k)(2) of this section and must capitalize the amount paid as an improvement to the building under paragraph (d)(2) of this section.

Example 23. Not replacement of major component or substantial structural part; plumbing system Assume the same facts as *Example 22* except that S does not update all the bathroom fixtures. Instead, S only pays an amount to replace 8 of the total of 20 sinks located in the various restrooms. The 8 replaced sinks, by themselves, do not comprise a significant portion of a major component (the 20 sinks) of the plumbing system under paragraph (k)(6)(ii)(A) of this section nor do they comprise a large portion of the physical structure of the plumbing system under paragraph (k)(6)(ii)(B) of this section. Therefore, under paragraph (k)(6) of this section, the replacement of the eight sinks does not constitute the replacement of a major component or substantial structural part of the building, and S is not required to treat the amount paid to replace the eight sinks as a restoration of a building under paragraph (k)(1)(iv) of this section.

Example 24. Replacement of major component or substantial structural part; plumbing system (i) T owns and operates a hotel building. T decides that, to attract customers and to remain competitive, it needs to update the guest rooms in its facility. Accordingly, T pays amounts to replace the bathtubs, toilets, and sinks, and to repair, repaint, and retile the bathroom walls and floors, which is necessitated by the installation of the new plumbing components. The replacement bathtubs, toilets, sinks, and tile are new and in a different style, but are similar in function and quality to the replaced items. T also pays amounts to replace certain section 1245 property, such as the guest room furniture, carpeting, drapes, table lamps, and partition walls separating the bathroom area. T completes this work on two floors at a time, closing those floors and leaving the rest of the hotel open for business. In Year 1, T pays amounts to perform the updates for 4 of the 20 hotel room floors and expects to complete the renovation of the remaining rooms over the next two years.

(ii) Under paragraphs (e)(2)(ii) and (k)(2) of this section, an amount is paid to improve a building if the amount restores the building structure or any building system. The plumbing system, including the bathtubs, toilets, and sinks, is a building system under paragraph (e)(2)(ii)(B)(*2*) of this section. All the bathtubs, together, all the toilets, together, and all the sinks together in the hotel building perform discrete and critical functions in the operation of the plumbing system under paragraph (k)(6)(ii)(A) of this section and comprise a large portion of the physical structure of the plumbing system under paragraph (k)(6)(ii)(B) of this section. Therefore, under paragraph (k)(6)(ii) of this section, these plumbing components comprise major components and substantial structural parts of the plumbing system, and T must treat the amount paid to replace these plumbing components as a restoration of, and improvement to, the building under paragraphs (k)(1)(vi) and (k)(2) of this section. In addition, under paragraph (g)(1)(i) of this section, T must treat the costs of repairing, repainting, and retiling the bathroom walls and floors as improvement costs because these costs directly benefit and are incurred by reason of the improvement to the building. Further, under paragraph (g)(3) of this section, T must treat the costs incurred in Years 1, 2, and 3 for the bathroom remodeling as improvement costs, even though they are incurred over a period of several taxable years, because they are related amounts paid to improve the building unit of property. Accordingly, under paragraph (d)(2) of this section, T must treat all the amounts it incurs to update its hotel restrooms as an improvement to the hotel building and capitalize these amounts. In addition, under §1.263(a)–2 of the regulations, T must capitalize the amounts paid to acquire and install each section 1245 property.

Example 25. Not replacement of major component or substantial structural part; windows U owns a large office building that it uses to provide office space for employees that manage U's operations. The building has 300 exterior windows that represent 25 percent of the total surface area of the building. In Year 1, U pays an amount to replace 100 of the exterior windows that had become damaged. At the time of these replacements, U has no plans to replace any other windows in the near future. Under paragraphs (e)(2)(ii) and (k)(2) of this section, an amount is paid to improve a building if the amount restores the building structure or any building system. The exterior windows are part of the building structure as defined under paragraph (e)(2)(ii)(A) of this section. The 300 exterior windows perform a discrete and critical function in the operation of the building structure and are, therefore, a major component of the building structure under paragraph (k)(6)(i)(A) of this section. However, the 100 windows do not comprise a significant portion of this major component of the building structure under paragraph (k)(6)(ii)(A) of this section or a substantial structural part of the building structure under paragraph (k)(6)(ii)(B) of this section. Therefore, under paragraph (k)(6) of this section, the replacement of the 100 windows does not constitute the replacement of a major component or substantial structural part of the building, and U is not required to treat the amount paid to replace the 100 windows as restoration of the building under paragraph (k)(1)(iv) of this section.

Example 26. Replacement of major component; windows Assume the same facts as *Example 25*, except that that U replaces 200 of the 300 windows on the building. The 300 exterior windows perform a discrete and critical function in the operation of the building structure and are, therefore, a major component of the building structure under paragraph (k)(6)(i)(A) of this section. The 200 windows comprise a significant portion of this major component of the building structure under paragraph (k)(6)(ii)(A) of this section. Therefore, under paragraph (k)(6) of this section, the replacement of the 200 windows comprise the replacement of a major component of the building structure. Accordingly, U must treat the amount paid to replace the 200 windows as a restoration of the building under paragraphs (k)(1)(vi) and (k)(2) of this section and must capitalize the amount paid as an improvement to the building under paragraph (d)(2) of this section.

Example 27. Replacement of substantial structural part; windows Assume the same facts as *Example 25*, except that the building is a modern design and the 300 windows represent 90 percent of the total surface area of the building. U replaces 100 of the 300 windows on the building. The 300 exterior windows perform a discrete and critical function in the operation of the building structure and are, therefore, a major component of the building structure under paragraph (k)(6)(i)(A) of this section. The 100 windows do not comprise a significant portion of this major component of the building structure under paragraph (k)(6)(ii)(A) of this section, however, they do comprise a substantial structural part of the building structure under paragraph (k)(6)(ii)(B) of this section. Therefore, under paragraph (k)(6) of this section, the replacement of the 100 windows comprise the replacement of a substantial structural part of the building structure. Accordingly, U must treat the amount paid to replace the 100 windows as a restoration of the building unit of property under paragraphs (k)(1)(vi) and (k)(2) of this section and must capitalize the amount paid as an improvement to the building under paragraph (d)(2) of this section.

Example 28. Not replacement of major component or substantial structural part; floors V owns and operates a hotel building. V decides to refresh the appearance of the hotel lobby by replacing the floors in the lobby. The hotel lobby comprises less than 10 percent of the square footage of the entire hotel building. V pays an amount to replace the wood flooring in the lobby with new wood flooring of a similar quality. V did not replace any other flooring in the building. Assume that the wood flooring constitutes section 1250 property. Under paragraphs (e)(2)(ii) and (k)(2) of this section, an amount is paid to improve a building if the amount restores the building structure or any building system. The wood flooring is part of the building structure under paragraph (e)(2)(ii)(A) of this section. All the floors in the hotel building comprise a major component of the building structure because they perform a discrete and critical function in the operation of the building structure. However, the lobby floors are not a significant portion of a major component (that is, all the floors) under paragraph (k)(6)(ii)(A) of this section, nor do the lobby floors comprise a substantial structural part of the building structure under paragraph (k)(6)(ii)(B) of this section. Therefore, under paragraph (k)(6) of this section, the replacement of the lobby floors is not the replacement of a major component or substantial structural part of the building unit of property, and V is not required to treat the amount paid for the replacement of the lobby floors as a restoration to the building under paragraph (k)(1)(iv) of this section.

Example 29. Replacement of major component or substantial structural part; floors Assume the same facts as *Example 28*, except that V decides to refresh the appearance of all the public areas of the hotel building by replacing all the floors in the public areas. To that end, V pays an amount to replace all the wood floors in all the public areas of the hotel building with new wood floors. The public areas include the lobby, the hallways, the meeting rooms, the ballrooms, and other public rooms throughout the hotel interiors. The public areas comprise approximately 40 percent of the square footage of the entire hotel building. All the floors in the hotel building comprise a major component of the building structure because they perform a discrete and critical function in the operation of the building structure. The floors in all the public areas of the hotel comprise a significant portion of a major component (that is, all the building floors) of the building structure. Therefore, under paragraph (k)(6)(ii)(A) of this section, the replacement of all the public area floors constitutes the replacement of a major component of the building structure. Accordingly, V must treat the amount paid to replace the public area floors as a restoration of the building unit of property under paragraphs (k)(1)(vi) and (k)(2) of this section and must capitalize the amounts as an improvement to the building under paragraph (d)(2) of this section.

Example 30. Replacement with no disposition (i) X owns an office building with four elevators serving all floors in the building. X replaces one of the elevators. The elevator is a structural component of the office building. X chooses to apply §1.168(i)–8 to taxable years beginning on or after January 1, 2012, and before the applicability date of the final regulations. In accordance with §1.168(i)–8(c)(4)(ii)(A), the office building (including its structural components) is the asset for tax disposition purposes. X also does not make the partial disposition election provided under §1.168(i)–8(d)(2) for the elevator. Thus, the retirement of the replaced elevator is not a disposition under section 168, and no loss is taken into account for purposes of paragraph (k)(1)(i) of this section.

(ii) Under paragraphs (e)(2)(ii) and (k)(2) of this section, an amount is paid to improve a building if the amount restores the building structure or any building system. The elevator system, including all four elevators, is a building system under paragraph (e)(2)(ii)(B)(*5*) of this section. The replacement elevator does not perform a discrete and critical function in the operation of elevator system under paragraph (k)(6)(ii)(A) of this section nor does it comprise a large portion of the physical structure of the elevator system under paragraph (k)(6)(ii)(B) of this section. Therefore, under paragraph (k)(6) of this section, the replacement elevator does not constitute the replacement of a major component or substantial structural part of the elevator system. Accordingly, X is not required to treat the amount paid to replace the elevator as a restoration to the building under either paragraph (k)(1)(i) or paragraph (k)(1)(vi) of this section.

Example 31. Replacement with disposition The facts are the same as in *Example 30*, except X makes the partial disposition election provided under paragraph §1.168(i)–8(d)(2) for the elevator. Although the office building (including its structural components) is the asset for disposition purposes, the result of X making the partial disposition election for the elevator is that the retirement of the replaced elevator is a disposition. Thus, depreciation for the retired elevator ceases at the time of its retirement (taking into account the applicable convention), and X recognizes a loss upon this retirement. Accordingly, X must treat the amount paid to replace the elevator as a restoration of the building under paragraphs (k)(1)(i) and (k)(2) of this section and must capitalize the amount paid as an improvement to the building under paragraph (d)(2) of this section. In addition, the replacement elevator is treated as a separate asset for tax disposition purposes pursuant to §1.168(i)–8(c)(4)(ii)(D), and for depreciation purposes pursuant to section 168(i)(6).

(l) *Capitalization of amounts to adapt property to a new or different use*—(1) *In general.* A taxpayer must capitalize as an improvement an amount paid to adapt a unit of property to a new or different use. In general, an amount is paid to adapt a unit of property to a new or different use if the adaptation is not consistent with the taxpayer's ordinary use of the unit of property at the time originally placed in service by the taxpayer.

(2) *Application of adaption rule to buildings.* In the case of a building, an amount is paid to improve a building if it is paid to adapt to a new or different use a property specified under paragraph (e)(2)(ii) (building), paragraph (e)(2)(iii)(B) (condominium), paragraph (e)(2)(iv)(B) (cooperative), or paragraph (e)(2)(v)(B) (leased building or leased portion of building) of this section. For example, an amount is paid to improve a building if it is paid to adapt the building structure or any one of its buildings systems to a new or different use.

(3) *Examples.* The following examples illustrate the application of this paragraph (l) only and do not address whether capitalization is required under another provision of this section or under another provision of the Code (for example, section 263A). Unless otherwise stated, assume that the taxpayer has not properly deducted a loss for any unit of property, asset, or component of a unit of property that is removed and replaced.

Example 1. New or different use; change in building use A is a manufacturer and owns a manufacturing building that it has used for manufacturing since Year 1, when A placed it in service. In Year 30, A pays an amount to convert its manufacturing building into a showroom for its business. To convert the facility, A removes and replaces various structural components to provide a better layout for the showroom and its offices. A also repaints the building interiors as part of the conversion. When building materials are removed and replaced, A uses comparable and commercially available replacement materials. Under paragraphs (l)(2) and (e)(2)(ii) of this section, an amount is paid to improve A's manufacturing building if the amount adapts the building structure or any designated building system to a new or different use. Under paragraph (l)(1) of this section, the amount paid to convert the manufacturing building into a showroom adapts the building structure to a new or different use because the conversion to a showroom is not consistent with A's ordinary use of the building structure at the time it was placed in service. Therefore, A must capitalize the amount paid to convert the building into a showroom as an improvement to the building under paragraphs (d)(3) and (l) of this section.

Example 2. Not a new or different use; leased building B owns and leases out space in a building consisting of twenty retail spaces. The space was designed to be reconfigured; that is, adjoining spaces could be combined into one space. One of the tenants expands its occupancy by leasing two adjoining retail spaces. To facilitate the new lease, B pays an amount to remove the walls between the three retail spaces. Assume that the walls between spaces are part of the building and its structural components. Under paragraphs (l)(2) and (e)(2)(ii) of this section, an amount is paid to improve B's building if it adapts the building structure or any of the building systems to a new or different use. Under paragraph (l)(1) of this section, the amount paid to convert three retail spaces into one larger space for an existing tenant does not adapt B's building structure to a new or different use because the combination of retail spaces is consistent with B's intended, ordinary use of the building structure. Therefore, the amount paid by B to remove the walls does not improve the building under paragraph (l) of this section and is not required to be capitalized under paragraph (d)(3) of this section.

Example 3. Not a new or different use; preparing building for sale C owns a building consisting of twenty retail spaces. C decides to sell the building. In anticipation of selling the building, C pays an amount to repaint the interior walls and to refinish the hardwood floors. Under paragraphs (l)(2) and (e)(2)(ii) of this section, an amount is paid to improve C's building to a new or different use if it adapts the building structure or any of the building systems to a new or different use. Preparing the building for sale does not constitute a new or different use for the building structure under paragraph (l)(1) of this section. Therefore, the amount paid by C to prepare the building structure for sale does not improve the building under paragraph (l) of this section and is not required to be capitalized under paragraph (d)(3) of this section.

Example 4. New or different use; land D owns a parcel of land on which it previously operated a manufacturing facility. Assume that the land is the unit of property. During the course of D's operation of the manufacturing facility, the land became contaminated with wastes from its manufacturing processes. D discontinues manufacturing operations at the site and decides to develop the property for residential housing. In anticipation of building residential property, D pays an amount to remediate the contamination caused by D's manufacturing process. In addition, D pays an amount to regrade the land so that it can be used for residential purposes. Amounts that D pays to clean up wastes do not adapt the land to a new or different use, regardless of the extent to which the land was cleaned, because this cleanup merely returns the land to the condition it was in before the land was contaminated in

D's operations. Therefore, D is not required to capitalize the amount paid for the cleanup under paragraph (l)(1) of this section. However, the amount paid to regrade the land so that it can be used for residential purposes adapts the land to a new or different use that is inconsistent with D's intended ordinary use of the property at the time it was placed in service. Accordingly, the amounts paid to regrade the land must be capitalized as improvements to the land under paragraphs (d)(3) and (l) of this section.

Example 5. New or different use; part of building (i) E owns a building in which it operates a retail drug store. The store consists of a pharmacy for filling medication prescriptions and various departments where customers can purchase food, toiletries, home goods, school supplies, cards, over-the-counter medications, and other similar items. E decides to create a walk-in medical clinic where nurse practitioners and physicians' assistants diagnose, treat, and write prescriptions for common illnesses and injuries, administer common vaccinations, conduct physicals and wellness screenings, and provide routine lab tests and services for common chronic conditions. To create the clinic, E pays amounts to reconfigure the pharmacy building. E incurs costs to build new walls creating an examination room, lab room, reception area, and waiting area. E installs additional plumbing, electrical wiring, and outlets to support the lab. E also acquires section 1245 property, such as computers, furniture, and equipment necessary for the new clinic. E treats the amounts paid for those units of property as costs of acquiring new units of property under §1.263(a)–2.

(ii) Under paragraphs (l)(2) and (e)(2)(ii) of this section, an amount is paid to improve E's building if it adapts the building structure or any of the building systems to a new or different use. Under paragraph (l)(1) of this section, the amount paid to convert part of the retail drug store building structure into a medical clinic adapts the building structure to a new and different use, because the use of the building structure to provide clinical medical services is not consistent with E's intended ordinary use of the building structure at the time it was placed in service. Similarly, the amounts paid to add to the plumbing system and the electrical systems to support the new medical services is not consistent with E's intended ordinary use of these systems when the systems were placed in service. Therefore, E must treat the amount paid for the conversion of the building structure, plumbing system, and electrical system as an improvement to the building and capitalize the amount under paragraphs (d)(3) and (l) of this section.

Example 6. Not a new or different use; part of building (i) F owns a building in which it operates a grocery store. The grocery store includes various departments for fresh produce, frozen foods, fresh meats, dairy products, toiletries, and over-the-counter medicines. The grocery store also includes separate counters for deli meats, prepared foods, and baked goods, often made to order. To better accommodate its customers' shopping needs, F decides to add a sushi bar where customers can order freshly prepared sushi from the counter for take-home or to eat at the counter. To create the sushi bar, F pays amounts to add a sushi counter and chairs, add additional wiring and outlets to support the counter, and install additional pipes and a sink, to provide for the safe handling of the food. F also pays amounts to replace flooring and wall coverings in the sushi bar area with decorative coverings to reflect more appropriate décor. Assume the sushi counter and chairs are section 1245 property, and F treats the amounts paid for those units of property as costs of acquiring new units of property under §1.263(a)–2.

(ii) Under paragraphs (l)(2) and (e)(2)(ii) of this section, an amount is paid to improve F's building if it adapts the building structure or any of the building systems to a new or different use. Under paragraph (l)(1) of this section, the amount paid to convert a part of F's retail grocery into a sushi bar area does not adapt F's building structure, plumbing system, or electrical system to a new or different use, because the sale of sushi is consistent with F's intended, ordinary use of the building structure and these systems in its grocery sales business, which includes selling food to its customers at various specialized counters. Accordingly, the amount paid by F to replace the wall and floor finishes, add wiring, and add plumbing to create the sushi bar space does not improve the building unit of property under paragraph (l) of this section and is not required to be capitalized under paragraph (d)(3) of this section.

Example 7. Not a new or different use; part of building (i) G owns a hospital with various departments dedicated to the provision of clinical medical care. To better accommodate its patients' needs, G decides to modify the emergency room space to provide both emergency care and outpatient surgery. To modify the space, G pays amounts to move interior walls, add additional wiring and outlets, replace floor tiles and doors, and repaint the walls. To complete the outpatient surgery center, G also pays amounts to install miscellaneous medical equipment necessary for the provision of surgical services. Assume the medical equipment is section 1245 property, and G treats the amounts paid for those units of property as costs of acquiring new units of property under §1.263(a)–2.

(ii) Under paragraphs (l)(2) and (e)(2)(ii) of this section, an amount is paid to improve G's building if it adapts the building structure or any of the building systems to a new or different use. Under paragraph (l)(1) of this section, the amount paid to convert part of G's emergency room into an outpatient surgery center does not adapt G's building structure or electrical system to a new or different use, because the provision of outpatient surgery is consistent with G's intended, ordinary use of the building structure and these systems in its clinical medical care business. Accordingly, the amounts paid by G to relocate interior walls, add additional wiring and outlets, replace floor tiles and doors, and repaint the walls to create outpatient surgery space do not improve the building under paragraph (l) of this section and are not required to be capitalized under paragraph (d)(3) of this section.

(m) *Optional regulatory accounting method*—(1) *In general.* This paragraph (m) provides an optional simplified method (the regulatory accounting method) for regulated taxpayers to determine whether amounts paid to repair, maintain, or improve tangible property are to be treated as deductible expenses or capital expenditures. A taxpayer that uses the regulatory accounting method described in paragraph (m)(3) of this section must use that method for property subject to regulatory accounting instead of determining whether amounts paid to repair, maintain, or improve property are capital expenditures or deductible expenses under the general principles of sections 162(a), 212, and 263(a). Thus, the capitalization rules in paragraph (d) (and the routine maintenance safe harbor described in paragraph (i)) of this section do not apply to amounts paid to repair, maintain, or improve property subject to regulatory accounting by taxpayers that use the regulatory accounting method under this paragraph (m).

(2) *Eligibility for regulatory accounting method.* A taxpayer that is engaged in a trade or business in a regulated industry is a regulated taxpayer and may use the regulatory accounting method under this paragraph (m). For purposes of this paragraph (m), a taxpayer is in a regulated industry only if the taxpayer is subject to the regulatory accounting rules of the Federal Energy Regulatory Commission (FERC), the Federal Communications Commission (FCC), or the Surface Transportation Board (STB).

(3) *Description of regulatory accounting method.* Under the regulatory accounting method, a taxpayer must follow the method of accounting for regulatory accounting purposes that it is required to follow for FERC, FCC, or STB (whichever is applicable) in determining whether an amount paid repairs, maintains, or improves property under this section. Therefore, a taxpayer must capitalize for Federal income tax purposes an amount paid that is capitalized as an improvement for regulatory accounting purposes. A taxpayer may not capitalize for Federal income tax purposes under this section an amount paid that is not capitalized as an improvement for regulatory accounting purposes. A taxpayer that uses the regulatory accounting method must use that method for all of its tangible property that is subject to regulatory accounting rules. The method does not apply to tangible property that is not subject to regulatory accounting rules. The method also does not apply to property for the taxable years in which the taxpayer elected to apply the repair allowance under §1.167(a)–11(d)(2). The regulatory accounting method is a method of accounting under section 446(a).

(4) *Examples.* The following examples illustrate the application of this paragraph (m):

Example 1. Taxpayer subject to regulatory accounting rules of FERC W is an electric utility company that operates a power plant that generates electricity and that owns and operates network assets to transmit and distribute the electricity to its customers. W is subject to the regulatory accounting rules of FERC, and W uses the regulatory accounting method under paragraph (m) of this section. W does not capitalize on its books and records for regulatory accounting purposes the cost of repairs and maintenance performed on its turbines or its network assets. Under the regulatory accounting method, W may not capitalize for Federal income tax purposes amounts paid for repairs performed on its turbines or its network assets.

Example 2. Taxpayer not subject to regulatory accounting rules of FERC X is an electric utility company that operates a power plant to generate electricity. X previously was subject to the regulatory accounting rules of FERC, but currently X is not required to use FERC's regulatory accounting rules. X cannot use the regulatory accounting method provided in this paragraph (m).

Example 3. Taxpayer subject to regulatory accounting rules of FCC Y is a telecommunications company that is subject to the regulatory accounting rules of the FCC. Y uses the regulatory accounting method under this paragraph (m). Y's assets include a telephone central office switching center, which contains numerous switches and various switching equipment. Y capitalizes on its books and records for regulatory accounting purposes the cost of replacing each switch. Under the regulatory accounting method, Y is required to capitalize for Federal income tax purposes amounts paid to replace each switch.

Example 4. Taxpayer subject to regulatory accounting rules of STB Z is a Class I railroad that is subject to the regulatory accounting rules of the STB. Z uses the regulatory accounting method under this paragraph (m). Z capitalizes on its books and records for regulatory accounting purposes the cost of locomotive rebuilds. Under the regulatory accounting method, Z is required to capitalize for Federal income tax purposes amounts paid to rebuild its locomotives.

(n) *Election to capitalize repair and maintenance costs*—(1) *In general.* A taxpayer may elect to treat amounts paid during the taxable year for repair and maintenance (as defined under §1.162–4) to tangible property as amounts paid to improve that property under this section and as an asset subject to the allowance for depreciation if the taxpayer incurs these amounts in carrying on the taxpayer's trade or business and if the taxpayer treats these amounts as capital expenditures on its books and records regularly used in computing income (''books and records''). A taxpayer that elects to apply this paragraph (n) in a taxable year must apply this paragraph to all amounts paid for repair and maintenance to tangible property that it treats as capital expenditures on its books and records in that taxable year. Any amounts for which this election is made shall not be treated as amounts paid for repair or maintenance under §1.162–4.

(2) *Time and manner of election.* A taxpayer makes this election under this paragraph (n) by attaching a statement to the taxpayer's timely filed original Federal tax return (including extensions) for the taxable year in which the taxpayer pays amounts described under paragraph (n)(1) of this paragraph. Sections 301.9100–1 through 301.9100–3 of this chapter provide the rules governing extensions of the time to make regulatory elections. The statement must be titled ''Section 1.263(a)–3(n) Election'' and include the taxpayer's name, address, taxpayer identification number, and a statement that the taxpayer is making the election to capitalize repair and maintenance costs under §1.263(a)–3(n). In the case of a consolidated group filing a consolidated income tax return, the election is made for each member of the consolidated group by the common parent, and the statement must also include the names and taxpayer identification numbers of each member for which the election is made. In the case of an S corporation or a partnership, the election is made by the S corporation or partnership and not by the shareholders or partners. A taxpayer making this election for a taxable year must treat any amounts paid for repairs and maintenance during the taxable year that are capitalized on the taxpayer's books and records as improvements to tangible property. The taxpayer must begin to depreciate the cost of such improvements amounts when they are placed in service by the taxpayer under the applicable provisions of the Code and regulations. An election may not be made through the filing of an application for change in accounting method or, before obtaining the Commissioner's consent to make a late election, by filing an amended Federal tax return. The time and manner of electing to capitalize repair and maintenance costs under this paragraph (n) may be modified through guidance of general applicability (see §§601.601(d)(2) and 601.602 of this chapter).

(3) *Exception.* This paragraph (n) does not apply to amounts paid for repairs or maintenance of rotable or temporary spare parts to which the taxpayer applies the optional method of accounting for rotable and temporary spare parts under §1.162–3(e).

(4) *Examples.* The following examples illustrate the application of this paragraph (n):

Example 1. Election to capitalize routine maintenance on non-rotable part (i) Q is a towboat operator that owns a fleet of towboats that it uses in its trade or business. Each towboat is equipped with two diesel-powered engines. Assume that each towboat, including its engines, is the unit of property and that a towboat has a class life of 18 years. Assume the towboat engines are not rotable spare parts under §1.162–3(c)(2). In Year 1, Q acquired a new towboat, including its two engines, and placed the towboat into service. In Year 4, Q pays amounts to perform scheduled maintenance on both engines in the towboat. Assume that none of the exceptions set out in paragraph (i)(3) of this section apply to the scheduled maintenance costs and that the scheduled maintenance on Q's towboat is within the routine maintenance safe harbor under paragraph (i)(1)(ii) of this section. Accordingly, the amounts paid for the scheduled maintenance to its towboat engines in Year 4 are deemed not to improve the towboat and are not required to be capitalized under paragraph (d) of this section.

(ii) On its books and records, Q treats amounts paid for scheduled maintenance on its towboat engines as capital expenditures. For administrative convenience, Q decides to account for these costs in the same way for Federal income tax purposes. Under paragraph (n) of this section, in Year 4, Q may elect to capitalize the amounts paid for the scheduled maintenance on its towboat engines. If Q elects to capitalize such amounts, Q must capitalize all amounts paid for repair and maintenance to tangible property that Q treats as capital expenditures on its books and records in Year 4.

Example 2. No election to capitalize routine maintenance Assume the same facts as *Example 1*, except in Year 8, Q pays amounts to perform scheduled maintenance for a second time on the towboat engines. On its books and records, Q treats the amounts paid for this scheduled maintenance as capital expenditures. However, in Year 8, Q decides not to make the election to capitalize the amounts paid for scheduled maintenance under paragraph (n) of this section. Because Q does not make the election under paragraph (n) for Year 8, Q may apply the routine maintenance safe harbor under paragraph (i)(1)(ii) of this section to the amounts paid in Year 8, and not treat these amounts as capital expenditures. Because the election is made for each taxable year, there is no effect on the scheduled maintenance costs capitalized by Q on its Federal tax return for Year 4.

Example 3. Election to capitalize replacement of building component (i) R owns an office building that it uses to provide services to customers. The building contains a HVAC system that incorporates ten roof-mounted units that provide heating and air conditioning for different parts of the building. In Year 1, R pays an amount to replace 2 of the 10 units to address climate control problems in various offices throughout the office building. Assume that the replacement of the two units does not constitute an improvement to the HVAC system, and, accordingly, to the building unit of property under paragraph (d) of this section, and that R may deduct these amounts as repairs and maintenance under §1.162–4.

(ii) On its books and records, R treats amounts paid for the two HVAC components as capital expenditures. R determines that it would prefer to account for these amounts in the same way for Federal income tax purposes. Under this paragraph (n), in Year 1, R may elect to capitalize the amounts paid for the new HVAC components. If R elects to capitalize such amounts, R must capitalize all amounts paid for repair and maintenance to tangible property that R treats as capital expenditures on its books and records in Year 1.

(o) *Treatment of capital expenditures.* Amounts required to be capitalized under this section are capital expenditures and must be taken into account through a charge to capital account or basis, or in the case of property that is inventory in the hands of a taxpayer, through inclusion in inventory costs.

(p) *Recovery of capitalized amounts.* Amounts that are capitalized under this section are recovered through depreciation, cost of goods sold, or by an adjustment to basis at the time the property is placed in service, sold, used, or otherwise disposed of by the taxpayer. Cost recovery is determined by the applicable Code and regulation provisions relating to the use, sale, or disposition of property.

(q) *Accounting method changes.* Except as otherwise provided in this section, a change to comply with this section is a change in method of accounting to which the provisions of sections 446 and 481 and the accompanying regulations apply. A taxpayer seeking to change to a method of accounting permitted in this section must secure the consent of the Commissioner in accordance with §1.446–1(e) and follow the administrative procedures issued under §1.446–1(e)(3)(ii) for obtaining the Commissioner's consent to change its accounting method.

(r) *Effective/applicability date*—(1) *In general.* Except for paragraphs (h), (m), and (n) of this section, this section applies to taxable years beginning on or after January 1, 2014. Paragraphs (h), (m), and (n) of this section apply to amounts paid in taxable years beginning on or after January 1, 2014. Except as provided in paragraphs (r)(2) and (r)(3) of this section, §1.263(a)–3 as contained in 26 CFR part 1 edition revised as of April 1, 2011, applies to taxable years beginning before January 1, 2014.

(2) *Early application of this section*—(i) *In general.* Except for paragraphs (h), (m), and (n) of this section, a taxpayer may choose to apply this section to taxable years beginning on or after January 1, 2012. A taxpayer may choose to apply paragraphs (h), (m), and (n) of this section to amounts paid in taxable years beginning on or after January 1, 2012.

(ii) *Transition rule for certain elections on 2012 or 2013 returns.* If under paragraph (r)(2)(i) of this section, a taxpayer chooses to make the election to apply the safe harbor for small taxpayers under paragraph (h) of this section or the election to capitalize repair and maintenance costs under paragraph (n) of this section for amounts paid in its taxable year beginning on or after January 1, 2012, and ending on or before September 19, 2013 (applicable taxable year), and the taxpayer did not make the election specified in paragraph (h)(6) or paragraph (n)(2) of this section on its timely filed original Federal tax return for the applicable taxable year, the taxpayer must make the election specified in paragraph (h)(6) or paragraph (n)(2) of this section for the applicable taxable year by filing an amended Federal tax return (including the required statements) for the applicable taxable year on or before 180 days from the due date including extensions of the taxpayer's Federal tax return for the applicable taxable year, notwithstanding that the taxpayer may not have extended the due date.

(3) *Optional application of TD 9564.* A taxpayer may choose to apply §1.263(a)–3T as contained in TD 9564 (76 FR 81060) December 27, 2011, to taxable years beginning on or after January 1, 2012, and before January 1, 2014.

[T.D. 9636, 78 FR 57718, Sept. 19, 2013, as amended by T.D. 9636, 79 FR 42191, July 21, 2014; T.D. 9689, 79 FR 48684, Aug. 18, 2014]

§ 1.263(a)–4 Amounts paid to acquire or create intangibles.

(a) *Overview.* This section provides rules for applying section 263(a) to amounts paid to acquire or create intangibles. Except to the extent provided in paragraph (d)(8) of this section, the rules provided by this section do not apply to amounts paid to acquire or create tangible assets. Paragraph (b) of this section provides a general principle of capitalization. Paragraphs (c) and (d) of this section identify intangibles for which capitalization is specifically required under the general principle. Paragraph (e) of this section provides rules for determining the extent to which taxpayers must capitalize transaction costs. Paragraph (f) of this section provides a 12-month rule intended to simplify the application of the general principle to certain payments that create benefits of a brief duration. Additional rules and examples relating to these provisions are provided in paragraphs (g) through (n) of this section. The applicability date of the rules in this section is provided in paragraph (o) of this section. Paragraph (p) of this section provides rules applicable to changes in methods of accounting made to comply with this section.

(b) *Capitalization with respect to intangibles*—(1) *In general.* Except as otherwise provided in this section, a taxpayer must capitalize—

(i) An amount paid to acquire an intangible (see paragraph (c) of this section);

(ii) An amount paid to create an intangible described in paragraph (d) of this section;

(iii) An amount paid to create or enhance a separate and distinct intangible asset within the meaning of paragraph (b)(3) of this section;

(iv) An amount paid to create or enhance a future benefit identified in published guidance in the FEDERAL REGISTER or in the Internal Revenue Bulletin (*see* §601.601(d)(2)(ii) of this chapter) as an intangible for which capitalization is required under this section; and

(v) An amount paid to facilitate (within the meaning of paragraph (e)(1) of this section) an acquisition or creation of an intangible described in paragraph (b)(1)(i), (ii), (iii) or (iv) of this section.

(2) *Published guidance.* Any published guidance identifying a future benefit as an intangible for which capitalization is required under paragraph (b)(1)(iv) of this section applies only to amounts paid on or after the date of publication of the guidance.

(3) *Separate and distinct intangible asset*—(i) *Definition.* The term *separate and distinct intangible asset* means a property interest of ascertainable and measurable value in money's worth that is subject to protection under applicable State, Federal or foreign law and the possession and control of which is intrinsically capable of being sold, transferred or pledged (ignoring any restrictions imposed on assignability) separate and apart from a trade or business. In addition, for purposes of this section, a fund (or similar account) is treated as a separate and distinct intangible asset of the taxpayer if amounts in the fund (or account) may revert to the taxpayer. The determination of whether a payment creates a separate and distinct intangible asset is made based on all of the facts and circumstances existing during the taxable year in which the payment is made.

(ii) *Creation or termination of contract rights.* Amounts paid to another party to create, originate, enter into, renew or renegotiate an agreement with that party that produces rights or benefits for the taxpayer (and amounts paid to facilitate the creation, origination, enhancement, renewal or renegotiation of such an agreement) are treated as amounts that do not create (or facilitate the creation of) a separate and distinct intangible asset within the meaning of this paragraph (b)(3). Further, amounts paid to another party to terminate (or facilitate the termination of) an agreement with that party are treated as amounts that do not create a separate and distinct intangible asset within the meaning of this paragraph (b)(3). *See* paragraphs (d)(2), (d)(6), and (d)(7) of this section for rules that specifically require capitalization of amounts paid to create or terminate certain agreements.

(iii) *Amounts paid in performing services.* Amounts paid in performing services under an agreement are treated as amounts that do not create a separate and distinct intangible asset within the meaning of this paragraph (b)(3), regardless of whether the amounts result in the creation of an income stream under the agreement.

(iv) *Creation of computer software.* Except as otherwise provided in the Internal Revenue Code, the regulations thereunder, or other published guidance in the FEDERAL REGISTER or in the Internal Revenue Bulletin (*see* § 601.601(d)(2)(ii) of this chapter), amounts paid to develop computer software are treated as amounts that do not create a separate and distinct intangible asset within the meaning of this paragraph (b)(3).

(v) *Creation of package design.* Amounts paid to develop a package design are treated as amounts that do not create a separate and distinct intangible asset within the meaning of this paragraph (b)(3). For purposes of this section, the term *package design* means the specific graphic arrangement or design of shapes, colors, words, pictures, lettering, and other elements on a given product package, or the design of a container with respect to its shape or function.

(4) *Coordination with other provisions of the Internal Revenue Code*—(i) *In general.* Nothing in this section changes the treatment of an amount that is specifically provided for under any other provision of the Internal Revenue Code (other than section 162(a) or 212) or the regulations thereunder.

(ii) *Example.* The following example illustrates the rule of this paragraph (b)(4):

Example. On January 1, 2004, G enters into an interest rate swap agreement with unrelated counterparty H under which, for a term of five years, G is obligated to make annual payments at 11% and H is obligated to make annual payments at LIBOR on a notional principal amount of $100 million. At the time G and H enter into this swap agreement, the rate for similar on-market swaps is LIBOR to 10%. To compensate for this difference, on January 1, 2004, H pays G a yield adjustment fee of $3,790,786. This yield adjustment fee constitutes an amount paid to create an intangible and would be capitalized under paragraph (d)(2) of this section. However, because the yield adjustment fee is a nonperiodic payment on a notional principal contract as defined in §1.446–3(c), the treatment of this fee is governed by §1.446–3 and not this section.

(c) *Acquired intangibles*—(1) *In general.* A taxpayer must capitalize amounts paid to another party to acquire any intangible from that party in a purchase or similar transaction. Examples of intangibles within the scope of this paragraph (c) include, but are not limited to, the following (if acquired from another party in a purchase or similar transaction):

(i) An ownership interest in a corporation, partnership, trust, estate, limited liability company, or other entity.

(ii) A debt instrument, deposit, stripped bond, stripped coupon (including a servicing right treated for federal income tax purposes as a stripped coupon), regular interest in a REMIC or FASIT, or any other intangible treated as debt for federal income tax purposes.

(iii) A financial instrument, such as—

(A) A notional principal contract;

(B) A foreign currency contract;

(C) A futures contract;

(D) A forward contract (including an agreement under which the taxpayer has the right and obligation to provide or to acquire property (or to be compensated for such property, regardless of whether the taxpayer provides or acquires the property));

(E) An option (including an agreement under which the taxpayer has the right to provide or to acquire property (or to be compensated for such property, regardless of whether the taxpayer provides or acquires the property)); and

(F) Any other financial derivative.

(iv) An endowment contract, annuity contract, or insurance contract.

(v) Non-functional currency.

(vi) A lease.

(vii) A patent or copyright.

(viii) A franchise, trademark or tradename (as defined in §1.197–2(b)(10)).

(ix) An assembled workforce (as defined in §1.197–2(b)(3)).

(x) Goodwill (as defined in §1.197–2(b)(1)) or going concern value (as defined in §1.197–2(b)(2)).

(xi) A customer list.

(xii) A servicing right (for example, a mortgage servicing right that is not treated for Federal income tax purposes as a stripped coupon).

(xiii) A customer-based intangible (as defined in §1.197–2(b)(6)) or supplier-based intangible (as defined in §1.197–2(b)(7)).

(xiv) Computer software.

(xv) An agreement providing either party the right to use, possess or sell an intangible described in paragraphs (c)(1)(i) through (v) of this section.

(2) *Readily available software.* An amount paid to obtain a nonexclusive license for software that is (or has been) readily available to the general public on similar terms and has not been substantially modified (within the meaning of §1.197–2(c)(4)) is treated for purposes of this paragraph (c) as an amount paid to another party to acquire an intangible from that party in a purchase or similar transaction.

(3) *Intangibles acquired from an employee.* Amounts paid to an employee to acquire an intangible from that employee are not required to be capitalized under this section if the amounts are includible in the employee's income in connection with the performance of services under section 61 or 83. For purposes of this section, whether an individual is an employee is determined in accordance with the rules contained in section 3401(c) and the regulations thereunder.

(4) *Examples.* The following examples illustrate the rules of this paragraph (c):

Example 1. Debt instrument. X corporation, a commercial bank, purchases a portfolio of existing loans from Y corporation, another financial institution. X pays Y $2,000,000 in exchange for the portfolio. The $2,000,000 paid to Y constitutes an amount paid to acquire an intangible from Y and must be capitalized.

Example 2. Option. W corporation owns all of the outstanding stock of X corporation. Y corporation holds a call option entitling it to purchase from W all of the outstanding stock of X at a certain price per share. Z corporation acquires the call option from Y in exchange for $5,000,000. The $5,000,000 paid to Y constitutes an amount paid to acquire an intangible from Y and must be capitalized.

Example 3. Ownership interest in a corporation. Same as *Example 2*, but assume Z exercises its option and purchases from W all of the outstanding stock of X in exchange for $100,000,000. The $100,000,000 paid to W constitutes an amount paid to acquire an intangible from W and must be capitalized.

Example 4. Customer list. N corporation, a retailer, sells its products through its catalog and mail order system. N purchases a customer list from R corporation. N pays R $100,000 in exchange for the customer list. The $100,000 paid to R constitutes an amount paid to acquire an intangible from R and must be capitalized.

Example 5. Goodwill. Z corporation pays W corporation $10,000,000 to purchase all of the assets of W in a transaction that constitutes an applicable asset acquisition under section 1060(c). Of the $10,000,000 consideration paid in the transaction, $9,000,000 is allocable to tangible assets purchased from W and $1,000,000 is allocable to goodwill. The $1,000,000 allocable to goodwill constitutes an amount paid to W to acquire an intangible from W and must be capitalized.

(d) *Created intangibles—(1) In general.* Except as provided in paragraph (f) of this section (relating to the 12-month rule), a taxpayer must capitalize amounts paid to create an intangible described in this paragraph (d). The determination of whether an amount is paid to create an intangible described in this paragraph (d) is to be made based on all of the facts and circumstances, disregarding distinctions between the labels used in this paragraph (d) to describe the intangible and the labels used by the taxpayer and other parties to the transaction.

(2) *Financial interests*—(i) In general. A taxpayer must capitalize amounts paid to another party to create, originate, enter into, renew or renegotiate with that party any of the following financial interests, whether or not the interest is regularly traded on an established market:

(A) An ownership interest in a corporation, partnership, trust, estate, limited liability company, or other entity.

(B) A debt instrument, deposit, stripped bond, stripped coupon (including a servicing right treated for federal income tax purposes as a stripped coupon), regular interest in a REMIC or FASIT, or any other intangible treated as debt for Federal income tax purposes.

(C) A financial instrument, such as—

(*1*) A letter of credit;

(*2*) A credit card agreement;

(*3*) A notional principal contract;

(*4*) A foreign currency contract;

(*5*) A futures contract;

(*6*) A forward contract (including an agreement under which the taxpayer has the right and obligation to provide or to acquire property (or to be compensated for such property, regardless of whether the taxpayer provides or acquires the property));

(*7*) An option (including an agreement under which the taxpayer has the right to provide or to acquire property (or to be compensated for such property, regardless of whether the taxpayer provides or acquires the property)); and

(*8*) Any other financial derivative.

(D) An endowment contract, annuity contract, or insurance contract that has or may have cash value.

(E) Non-functional currency.

(F) An agreement providing either party the right to use, possess or sell a financial interest described in this paragraph (d)(2).

(ii) *Amounts paid to create, originate, enter into, renew or renegotiate.* An amount paid to another party is not paid to create, originate, enter into, renew or renegotiate a financial interest with that party if the payment is made with the mere hope or expectation of developing or maintaining a business relationship with that party and is not contingent on the origination, renewal or renegotiation of a financial interest with that party.

(iii) *Renegotiate.* A taxpayer is treated as renegotiating a financial interest if the terms of the financial interest are modified. A taxpayer also is treated as renegotiating a financial interest if the taxpayer enters into a new financial interest with the same party (or substantially the same parties) to a terminated financial interest, the taxpayer could not cancel the terminated financial interest without the consent of the other party (or parties), and the other party (or parties) would not have consented to the cancellation unless the taxpayer entered into the new financial interest. A taxpayer is treated as unable to cancel a financial interest without the consent of the other party (or parties) if, under the terms of the financial interest, the taxpayer is subject to a termination penalty and the other party (or parties) to the financial interest modifies the terms of the penalty.

(iv) *Coordination with other provisions of this paragraph (d).* An amount described in this paragraph (d)(2) that is also described elsewhere in paragraph (d) of this section is treated as described only in this paragraph (d)(2).

(v) *Coordination with §1.263(a)–5. See* §1.263(a)–5 for the treatment of borrowing costs and the treatment of amounts paid by an option writer.

(vi) *Examples.* The following examples illustrate the rules of this paragraph (d)(2):

Example 1. Loan. X corporation, a commercial bank, makes a loan to A in the principal amount of $250,000. The $250,000 principal amount of the loan paid to A constitutes an amount paid to another party to create a debt instrument with that party under paragraph (d)(2)(i)(B) of this section and must be capitalized.

Example 2. Option. W corporation owns all of the outstanding stock of X corporation. Y corporation pays W $1,000,000 in exchange for W's grant of a 3-year call option to Y permitting Y to purchase all of the outstanding stock of X at a certain price per share. Y's payment of $1,000,000 to W constitutes an amount paid to another party to create an option with that party under paragraph (d)(2)(i)(C)(*7*) of this section and must be capitalized.

Example 3. Partnership interest. Z corporation pays $10,000 to P, a partnership, in exchange for an ownership interest in P. Z's payment of $10,000 to P constitutes an amount paid to another party to create an ownership interest in a partnership with that party under paragraph (d)(2)(i)(A) of this section and must be capitalized.

Example 4. Take or pay contract. Q corporation, a producer of natural gas, pays $1,000,000 to R during 2005 to induce R corporation to enter into a 5-year ''take or pay'' gas purchase contract. Under the contract, R is liable to pay for a specified minimum amount of gas, whether or not R takes such gas. Q's payment of $1,000,000 is an amount paid to another party to induce that party to enter into an agreement providing Q the right and obligation to provide property or be compensated for such property (regardless of whether the property is provided) under paragraph (d)(2)(i)(C)(*6*) of this section and must be capitalized.

Example 5. Agreement to provide property. P corporation pays R corporation $1,000,000 in exchange for R's agreement to purchase 1,000 units of P's product at any time within the three succeeding calendar years. The agreement describes P's $1,000,000 as a sales discount. P's $1,000,000 payment is an amount paid to induce R to enter into an agreement providing P the right and obligation to provide property under paragraph (d)(2)(i)(C)(*6*) of this section and must be capitalized.

Example 6. Customer incentive payment. S corporation, a computer manufacturer, seeks to develop a business relationship with V corporation, a computer retailer. As an incentive to encourage V to purchase computers from S, S enters into an agreement with V under which S agrees that, if V purchases $20,000,000 of computers from S within 3 years from the date of the agreement, S will pay V $2,000,000 on the date that V reaches the $20,000,000 threshold. V reaches the $20,000,000 threshold during the third year of the agreement, and S pays V $2,000,000. S is not required to capitalize its payment to V under this paragraph (d)(2) because the payment does not provide S the right or obligation to provide property and does not create a separate and distinct intangible asset for S within the meaning of paragraph (b)(3)(i) of this section.

(3) *Prepaid expenses*—(i) In general. A taxpayer must capitalize prepaid expenses.

(ii) *Examples.* The following examples illustrate the rules of this paragraph (d)(3):

Example 1. Prepaid insurance. N corporation, an accrual method taxpayer, pays $10,000 to an insurer to obtain three years of coverage under a property and casualty insurance policy. The $10,000 is a prepaid expense and must be capitalized under this paragraph (d)(3). Paragraph (d)(2) of this section does not apply to the payment because the policy has no cash value.

Example 2. Prepaid rent. X corporation, a cash method taxpayer, enters into a 24-month lease of office space. At the time of the lease signing, X prepays $240,000. No other amounts are due under the lease. The $240,000 is a prepaid expense and must be capitalized under this paragraph (d)(3).

(4) *Certain memberships and privileges*—(i) *In general.* A taxpayer must capitalize amounts paid to an organization to obtain, renew, renegotiate, or upgrade a membership or privilege from that organization. A taxpayer is not required to capitalize under this paragraph (d)(4) an amount paid to obtain, renew, renegotiate or upgrade certification of the taxpayer's products, services, or business processes.

(ii) *Examples.* The following examples illustrate the rules of this paragraph (d)(4):

Example 1. Hospital privilege. B, a physician, pays $10,000 to Y corporation to obtain lifetime staff privileges at a hospital operated by Y. B must capitalize the $10,000 payment under this paragraph (d)(4).

Example 2. Initiation fee. X corporation pays a $50,000 initiation fee to obtain membership in a trade association. X must capitalize the $50,000 payment under this paragraph (d)(4).

Example 3. Product rating. V corporation, an automobile manufacturer, pays W corporation, a national quality ratings association, $100,000 to conduct a study and provide a rating of the quality and safety of a line of V's automobiles. V's payment is an amount paid to obtain a certification of V's product and is not required to be capitalized under this paragraph (d)(4).

Example 4. Business process certification. Z corporation, a manufacturer, seeks to obtain a certification that its quality control standards meet a series of international standards known as ISO 9000. Z pays $50,000 to an independent registrar to obtain a certification from the registrar that Z's quality management system conforms to the ISO 9000 standard. Z's payment is an amount paid to obtain a certification of Z's business processes and is not required to be capitalized under this paragraph (d)(4).

(5) *Certain rights obtained from a governmental agency*—(i) *In general.* A taxpayer must capitalize amounts paid to a governmental agency to obtain, renew, renegotiate, or upgrade its rights under a trademark, trade name, copyright, license, permit, franchise, or other similar right granted by that governmental agency.

(ii) *Examples.* The following examples illustrate the rules of this paragraph (d)(5):

Example 1. Business license. X corporation pays $15,000 to state Y to obtain a business license that is valid indefinitely. Under this paragraph (d)(5), the amount paid to state Y is an amount paid to a government agency for a right granted by that agency. Accordingly, X must capitalize the $15,000 payment.

Example 2. Bar admission. A, an individual, pays $1,000 to an agency of state Z to obtain a license to practice law in state Z that is valid indefinitely, provided A adheres to the requirements governing the practice of law in state Z. Under this paragraph (d)(5), the amount paid to state Z is an amount paid to a government agency for a right granted by that agency. Accordingly, A must capitalize the $1,000 payment.

(6) *Certain contract rights*—(i) *In general.* Except as otherwise provided in this paragraph (d)(6), a taxpayer must capitalize amounts paid to another party to create, originate, enter into, renew or renegotiate with that party—

(A) An agreement providing the taxpayer the right to use tangible or intangible property or the right to be compensated for the use of tangible or intangible property;

(B) An agreement providing the taxpayer the right to provide or to receive services (or the right to be compensated for services regardless of whether the taxpayer provides such services);

(C) A covenant not to compete or an agreement having substantially the same effect as a covenant not to compete (except, in the case of an agreement that requires the performance of services, to the extent that the amount represents reasonable compensation for services actually rendered);

(D) An agreement not to acquire additional ownership interests in the taxpayer; or

(E) An agreement providing the taxpayer (as the covered party) with an annuity, an endowment, or insurance coverage.

(ii) *Amounts paid to create, originate, enter into, renew or renegotiate.* An amount paid to another party is not paid to create, originate, enter into, renew or renegotiate an agreement with that party if the payment is made with the mere hope or expectation of developing or maintaining a business relationship with that party and is not contingent on the origination, renewal or renegotiation of an agreement with that party.

(iii) *Renegotiate.* A taxpayer is treated as renegotiating an agreement if the terms of the agreement are modified. A taxpayer also is treated as renegotiating an agreement if the taxpayer enters into a new agreement with the same party (or substantially the same parties) to a terminated agreement, the taxpayer could not cancel the terminated agreement without the consent of the other party (or parties), and the other party (or parties) would not have consented to the cancellation unless the taxpayer entered into the new agreement. A taxpayer is treated as unable to cancel an agreement without the consent of the other party (or parties) if, under the terms of the agreement, the taxpayer is subject to a termination penalty and the other party (or parties) to the agreement modifies the terms of the penalty.

(iv) *Right.* An agreement does not provide the taxpayer a right to use property or to provide or receive services if the agreement may be terminated at will by the other party (or parties) to the agreement before the end of the period prescribed by paragraph (f)(1) of this section. An agreement is not terminable at will if the other party (or parties) to the agreement is economically compelled not to terminate the agreement until the end of the period prescribed by paragraph (f)(1) of this section. All of the facts and circumstances will be considered in determining whether the other party (or parties) to an agreement is economically compelled not to terminate the agreement. An agreement also does not provide the taxpayer the right to provide services if the agreement merely provides that the taxpayer will stand ready to provide services if requested, but places no obligation on another person to request or pay for the taxpayer's services.

(v) *De minimis amounts.* A taxpayer is not required to capitalize amounts paid to another party (or parties) to create, originate, enter into, renew or renegotiate with that party (or those parties) an agreement described in paragraph (d)(6)(i) of this section if the aggregate of all amounts paid to that party (or those parties) with respect to the agreement does not exceed $5,000. If the aggregate of all amounts paid to the other party (or parties) with respect to that agreement exceeds $5,000, then all amounts must be capitalized. For purposes of this paragraph (d)(6), an amount paid in the form of property is valued at its fair market value at the time of the payment. In general, a taxpayer must determine whether the rules of this paragraph (d)(6)(v) apply by accounting for the specific amounts paid with respect to each agreement. However, a taxpayer that reasonably expects to create, originate, enter into, renew or renegotiate at least 25 similar agreements during the taxable year may establish a pool of agreements for purposes of determining the amounts paid with respect to the agreements in the pool. Under this pooling method, the amount paid with respect to each agreement included in the pool is equal to the average amount paid with respect to all agreements included in the pool. A taxpayer computes the average amount paid with respect to all agreements included in the pool by dividing the sum of all amounts paid with respect to all agreements included in the pool by the number of agreements included in the pool. See paragraph (h) of this section for additional rules relating to pooling.

(vi) *Exception for lessee construction allowances.* Paragraph (d)(6)(i) of this section does not apply to amounts paid by a lessor to a lessee as a construction allowance to the extent the lessee expends the amount for the tangible property that is owned by the lessor for Federal income tax purposes (*see,* for example, section 110).

(vii) *Examples.* The following examples illustrate the rules of this paragraph (d)(6):

Example 1. New lease agreement. V seeks to lease commercial property in a prominent downtown location of city R. V pays Z, the owner of the commercial property, $50,000 in exchange for Z entering into a 10-year lease with V. V's payment is an amount paid to another party to enter into an agreement providing V the right to use tangible property. Because the $50,000 payment exceeds $5,000, no portion of the amount paid to Z is *de minimis* for purposes of paragraph (d)(6)(v) of this section. Under paragraph (d)(6)(i)(A) of this section, V must capitalize the entire $50,000 payment.

Example 2. Modification of lease agreement. Partnership Y leases a piece of equipment for use in its business from Z corporation. When the lease has a remaining term of 3 years, Y requests that Z modify the existing lease by extending the remaining term by 5 years. Y pays $50,000 to Z in exchange for Z's agreement to modify the existing lease. Y's payment of $50,000 is an amount paid to another party to renegotiate an agreement providing Y the right to use property. Because the $50,000 payment exceeds $5,000, no portion of the amount paid to Z is *de minimis* for purposes of paragraph (d)(6)(v) of this section. Under paragraph (d)(6)(i)(A) of this section, Y must capitalize the entire $50,000 payment.

Example 3. Modification of lease agreement. In 2004, R enters into a 5-year, noncancelable lease of a mainframe computer for use in its business. R subsequently determines that the mainframe computer that R is leasing is no longer adequate for its needs. In 2006, R and P corporation (the lessor) agree to terminate the 2004 lease and to enter into a new 5-year lease for a different and more powerful mainframe computer. R pays P a $75,000 early termination fee. P would not have agreed to terminate the 2004 lease unless R agreed to enter into the 2006 lease. R's payment of $75,000 is an amount paid to another party to renegotiate an agreement providing R the right to use property. Because the $75,000 payment exceeds $5,000, no portion of the amount paid to P is *de minimis* for purposes of paragraph (d)(6)(v) of this section. Under paragraph (d)(6)(i)(A) of this section, R must capitalize the entire $75,000 payment.

Example 4. Modification of lease agreement. Same as *Example 3,* except the 2004 lease agreement allows R to terminate the lease at any time subject to a $75,000 early termination fee. Because R can terminate the lease without P's approval, R's payment of $75,000 is not an amount paid to another party to renegotiate an agreement. Accordingly, R is not required to capitalize the $75,000 payment under this paragraph (d)(6).

Example 5. Modification of lease agreement. Same as *Example 4,* except P agreed to reduce the early termination fee to $60,000. Because R did not pay an amount to renegotiate the early termination fee, R's payment of $60,000 is not an amount paid to another party to renegotiate an agreement. Accordingly, R is not required to capitalize the $60,000 payment under this paragraph (d)(6).

Example 6. Covenant not to compete. R corporation enters into an agreement with A, an individual, that prohibits A from competing with R for a period of three years. To encourage A to enter into the agreement, R agrees to pay A $100,000 upon the signing of the agreement. R's payment is an amount paid to another party to enter into a covenant not to compete. Because the $100,000 payment exceeds $5,000, no portion of the amount paid to A is *de minimis* for purposes of paragraph (d)(6)(v) of this section. Under paragraph (d)(6)(i)(C) of this section, R must capitalize the entire $100,000 payment.

Example 7. Standstill agreement. During 2004 through 2005, X corporation acquires a large minority interest in the stock of Z corporation. To ensure that X does not take control of Z, Z pays X $5,000,000 for a standstill agreement under which X agrees not to acquire any more stock in Z for a period of 10 years. Z's payment is an amount paid to another party to enter into an agreement not to acquire additional ownership interests in Z. Because the $5,000,000 payment exceeds $5,000, no portion of the amount paid to X is *de minimis* for purposes of paragraph (d)(6)(v) of this section. Under paragraph (d)(6)(i)(D) of this section, Z must capitalize the entire $5,000,000 payment.

Example 8. Signing bonus. Employer B pays a $25,000 signing bonus to employee C to induce C to come to work for B. C can leave B's employment at any time to work for a competitor of B and is not required to repay the $25,000 bonus to B. Because C is not economically compelled to continue his employment with B, B's payment does not provide B the right to receive services from C. Accordingly, B is not required to capitalize the $25,000 payment.

Example 9. Renewal. In 2000, M corporation and N corporation enter into a 5-year agreement that gives M the right to manage N's investment portfolio. In 2005, N has the option of renewing the agreement for another three years. During 2004, M pays $10,000 to send several employees of N to an investment seminar. M pays the $10,000 to help develop and maintain its business relationship with N with the expectation that N will renew its agreement with M in 2005. Because M's payment is not contingent on N agreeing to renew the agreement, M's payment is not an amount paid to renew an agreement under paragraph (d)(6)(ii) of this section and is not required to be capitalized.

Example 10. De minimis payments. X corporation is engaged in the business of providing wireless telecommunications services to customers. To induce customer B to enter into a 3-year non-cancelable telecommunications contract, X provides B with a free wireless telephone. The fair market value of the wireless telephone is $300 at the time it is provided to B. X's provision of a wireless telephone to B is an amount paid to B to induce B to enter into an agreement providing X the right to provide services, as described in paragraph (d)(6)(i)(B) of this section. Because the amount of the inducement is $300, the amount of the inducement is *de minimis* under paragraph (d)(6)(v) of this section. Accordingly, X is not required to capitalize the amount of the inducement provided to B.

(7) *Certain contract terminations*—(i) *In general.* A taxpayer must capitalize amounts paid to another party to terminate—

(A) A lease of real or tangible personal property between the taxpayer (as lessor) and that party (as lessee);

(B) An agreement that grants that party the exclusive right to acquire or use the taxpayer's property or services or to conduct the taxpayer's business (other than an intangible described in paragraph (c)(1)(i) through (iv) of this section or a financial interest described in paragraph (d)(2) of this section); or

(C) An agreement that prohibits the taxpayer from competing with that party or from acquiring property or services from a competitor of that party.

(ii) *Certain break-up fees.* Paragraph (d)(7)(i) of this section does not apply to the termination of a transaction described in §1.263(a)–5(a) (relating to an acquisition of a trade or business, a change in the capital structure of a business entity, and certain other transactions). *See* §1.263(a)–5(c)(8) for rules governing the treatment of amounts paid to terminate a transaction to which that section applies.

(iii) *Examples.* The following examples illustrate the rules of this paragraph (d)(7):

Example 1. Termination of exclusive license agreement. On July 1, 2005, N enters into a license agreement with R corporation under which N grants R the exclusive right to manufacture and distribute goods using N's design and trademarks for a period of 10 years. On June 30, 2007, N pays R $5,000,000 in exchange for R's agreement to terminate the exclusive license agreement. N's payment to terminate its license agreement with R constitutes a payment to terminate an exclusive license to use the taxpayer's property, as described in paragraph (d)(7)(i)(B) of this section. Accordingly, N must capitalize its $5,000,000 payment to R.

Example 2. Termination of exclusive distribution agreement. On March 1, 2005, L, a manufacturer, enters into an agreement with M granting M the right to be the sole distributor of L's products in state X for 10 years. On July 1, 2008, L pays M $50,000 in exchange for M's agreement to terminate the distribution agreement. L's payment to terminate its agreement with M constitutes a payment to terminate an exclusive right to acquire L's property, as described in paragraph (d)(7)(i)(B) of this section. Accordingly, L must capitalize its $50,000 payment to M.

Example 3. Termination of covenant not to compete. On February 1, 2005, Y corporation enters into a covenant not to compete with Z corporation that prohibits Y from competing with Z in city V for a period of 5 years. On January 31, 2007, Y pays Z $1,000,000 in exchange for Z's agreement to terminate the covenant not to compete. Y's payment to terminate the covenant not to compete with Z constitutes a payment to terminate an agreement that prohibits Y from competing with Z, as described in paragraph (d)(7)(i)(C) of this section. Accordingly, Y must capitalize its $1,000,000 payment to Z.

Example 4. Termination of merger agreement. N corporation and U corporation enter into an agreement under which N agrees to merge into U. Subsequently, N pays U $10,000,000 to terminate the merger agreement. As provided in paragraph (d)(7)(ii) of this section, N's $10,000,000 payment to terminate the merger agreement with U is not required to be capitalized under this paragraph (d)(7). In addition, N's $10,000,000 does not create a separate and distinct intangible asset for N within the meaning of paragraph (b)(3)(i) of this section. (*See* §1.263(a)–5 for additional rules regarding termination of merger agreements).

(8) *Certain benefits arising from the provision, production, or improvement of real property*—(i) *In general.* A taxpayer must capitalize amounts paid for real property if the taxpayer transfers ownership of the real property to another person (except to the extent the real property is sold for fair market value) and if the real property can reasonably be expected to produce significant economic benefits to the taxpayer after the transfer. A taxpayer also must capitalize amounts paid to produce or improve real property owned by another (except to the extent the taxpayer is selling services at fair market value to produce or improve the real property) if the real property can reasonably be expected to produce significant economic benefits for the taxpayer.

(ii) *Exclusions.* A taxpayer is not required to capitalize an amount under paragraph (d)(8)(i) of this section if the taxpayer transfers real property or pays an amount to produce or improve real property owned by another in exchange for services, the purchase or use of property, or the creation of an intangible described in paragraph (d) of this section (other than in this paragraph (d)(8)). The preceding sentence does not apply to the extent the taxpayer does not receive fair market value consideration for the real property that is relinquished or for the amounts that are paid by the taxpayer to produce or improve real property owned by another.

(iii) *Real property.* For purposes of this paragraph (d)(8), real property includes property that is affixed to real property and that will ordinarily remain affixed for an indefinite period of time, such as roads, bridges, tunnels, pavements, wharves and docks, breakwaters and sea walls, elevators, power generation and transmission facilities, and pollution control facilities.

(iv) *Impact fees and dedicated improvements.* Paragraph (d)(8)(i) of this section does not apply to amounts paid to satisfy one-time charges imposed by a State or local government against new development (or expansion of existing development) to finance specific offsite capital improvements for general public use that are necessitated by the new or expanded development. In addition, paragraph (d)(8)(i) of this section does not apply to amounts paid for real property or improvements to real property constructed by the taxpayer where the real property or improvements benefit new development or expansion of existing development, are immediately transferred to a State or local government for dedication to the general public use, and are maintained by the State or local government. See section 263A and the regulations thereunder for capitalization rules that apply to amounts referred to in this paragraph (d)(8)(iv).

(v) *Examples.* The following examples illustrate the rules of this paragraph (d)(8):

Example 1. Amount paid to produce real property owned by another. W corporation operates a quarry on the east side of a river in city Z and a crusher on the west side of the river. City Z's existing bridges are of insufficient capacity to be traveled by trucks in transferring stone from W's quarry to its crusher. As a result, the efficiency of W's operations is greatly reduced. W contributes $1,000,000 to city Z to defray in part the cost of constructing a publicly owned bridge capable of accommodating W's trucks. W's payment to city Z is an amount paid to produce or improve real property (within the meaning of paragraph (d)(8)(iii) of this section) that can reasonably be expected to produce significant economic benefits for W. Under paragraph (d)(8)(i) of this section, W must capitalize the $1,000,000 paid to city Z.

Example 2. Transfer of real property to another. K corporation, a shipping company, uses smaller vessels to unload its ocean-going vessels at port X. There is no natural harbor at port X, and during stormy weather the transfer of freight between K's ocean vessels and port X is extremely difficult and sometimes impossible, which can be very costly to K. Consequently, K constructs a short breakwater at a cost of $50,000. The short breakwater, however, is inadequate, so K persuades the port authority to build a larger breakwater that will allow K to unload its vessels at any time of the year and during all kinds of weather. K contributes the short breakwater and pays $200,000 to the port authority for use in building the larger breakwater. Because the transfer of the small breakwater and $200,000 is reasonably expected to produce significant economic benefits for K, K must capitalize both the adjusted basis of the small breakwater (determined at the time the small breakwater is contributed) and the $200,000 payment under this paragraph (d)(8).

Example 3. Dedicated improvements. X corporation is engaged in the development and sale of residential real estate. In connection with a residential real estate project under construction by X in city Z, X is required by city Z to construct ingress and egress roads to and from its project and immediately transfer the roads to city Z for dedication to general public use. The roads will be maintained by city Z. X pays its subcontractor $100,000 to construct the ingress and egress roads. X's payment is a dedicated improvement within the meaning of paragraph (d)(8)(iv) of this section. Accordingly, X is not required to capitalize the $100,000 payment under this paragraph (d)(8). See section 263A and the regulations thereunder for capitalization rules that apply to amounts referred to in paragraph (d)(8)(iv) of this section.

(9) *Defense or perfection of title to intangible property*—(i) *In general.* A taxpayer must capitalize amounts paid to another party to defend or perfect title to intangible property if that other party challenges the taxpayer's title to the intangible property.

(ii) *Certain break-up fees.* Paragraph (d)(9)(i) of this section does not apply to the termination of a transaction described in § 1.263(a)–5(a) (relating to an acquisition of a trade or business, a change in the capital structure of a business entity, and certain other transactions). *See* § 1.263(a)–5 for rules governing the treatment of amounts paid to terminate a transaction to which that section applies. Paragraph (d)(9)(i) of this section also does not apply to an amount paid to another party to terminate an agreement that grants that party the right to purchase the taxpayer's intangible property.

(iii) *Example.* The following example illustrates the rules of this paragraph (d)(9):

Example. Defense of title. R corporation claims to own an exclusive patent on a particular technology. U corporation brings a lawsuit against R, claiming that U is the true owner of the patent and that R stole the technology from U. The sole issue in the suit involves the validity of R's patent. R chooses to settle the suit by paying U $100,000 in exchange for U's release of all future claim to the patent. R's payment to U is an amount paid to defend or perfect title to intangible property under paragraph (d)(9) of this section and must be capitalized.

(e) *Transaction costs*—(1) *Scope of facilitate*—(i) *In general.* Except as otherwise provided in this section, an amount is paid to facilitate the acquisition or creation of an intangible (the transaction) if the amount is paid in the process of investigating or otherwise pursuing the transaction. Whether an amount is paid in the process of investigating or otherwise pursuing the transaction is determined based on all of the facts and circumstances. In determining whether an amount is paid to facilitate a transaction, the fact that the amount would (or would not) have been paid but for the transaction is relevant, but is not determinative. An amount paid to determine the value or price of an intangible is an amount paid in the process of investigating or otherwise pursuing the transaction.

(ii) *Treatment of termination payments.* An amount paid to terminate (or acilitate the termination of) an existing agreement does not facilitate the acquisition or creation of another agreement under this section. See paragraph (d)(6)(iii) of this section for the treatment of termination fees paid to the other party (or parties) of a renegotiated agreement.

(iii) *Special rule for contracts.* An amount is treated as not paid in the process of investigating or otherwise pursuing the creation of an agreement described in paragraph (d)(2) or (d)(6) of this section if the amount relates to activities performed before the earlier of the date the taxpayer begins preparing its bid for the agreement or the date the taxpayer begins discussing or negotiating the agreement with another party to the agreement.

(iv) *Borrowing costs.* An amount paid to facilitate a borrowing does not facilitate an acquisition or creation of an intangible described in paragraphs (b)(1)(i) through (iv) of this section. *See* §§ 1.263(a)–5 and 1.446–5 for the treatment of an amount paid to facilitate a borrowing.

(v) *Special rule for stock redemption costs of open-end regulated investment companies.* An amount paid by an open-end regulated investment company (within the meaning of section 851) to facilitate a redemption of its stock is treated as an amount that does not facilitate the acquisition of an intangible under this section.

(2) *Coordination with paragraph (d) of this section.* In the case of an amount paid to facilitate the creation of an intangible described in paragraph (d) of this section, the provisions of this paragraph (e) apply regardless of whether a payment described in paragraph (d) is made.

(3) *Transaction.* For purposes of this section, the term *transaction* means all of the factual elements comprising an acquisition or creation of an intangible and includes a series of steps carried out as part of a single plan. Thus, a transaction can involve more than one invoice and more than one intangible. For example, a purchase of intangibles under one purchase agreement constitutes a single transaction, notwithstanding the fact that the acquisition involves multiple intangibles and the amounts paid to facilitate the acquisition are capable of being allocated among the various intangibles acquired.

(4) *Simplifying conventions*—(i) *In general.* For purposes of this section, employee compensation (within the meaning of paragraph (e)(4)(ii) of this section), overhead, and *de minimis* costs (within the meaning of paragraph (e)(4)(iii) of this section) are treated as amounts that do not facilitate the acquisition or creation of an intangible.

(ii) *Employee compensation*—(A) *In general.* The term *employee compensation* means compensation (including salary, bonuses and commissions) paid to an employee of the taxpayer. For purposes of this section, whether an individual is an employee is determined in accordance with the rules contained in section 3401(c) and the regulations thereunder.

(B) *Certain amounts treated as employee compensation.* For purposes of this section, a guaranteed payment to a partner in a partnership is treated as employee compensation. For purposes of this section, annual compensation paid to a director of a corporation is treated as employee compensation. For example, an amount paid to a director of a corporation for attendance at a regular meeting of the board of directors (or committee thereof) is treated as employee compensation for purposes of this section. However, an amount paid to a director for attendance at a special meeting of the board of directors (or committee thereof) is not treated as employee compensation. An amount paid to a person that is not an employee of the taxpayer (including the employer of the individual who performs the services) is treated as employee compensation for purposes of this section only if the amount is paid for secretarial, clerical, or similar administrative support services. In the case of an affiliated group of corporations filing a consolidated Federal income tax return, a payment by one member of the group to a second member of the group for services performed by an employee of the second member is treated as employee compensation if the services provided by the employee are provided at a time during which both members are affiliated.

(iii) *De minimis costs*—(A) *In general.* Except as provided in paragraph (e)(4)(iii)(B) of this section, the term *de minimis costs* means amounts (other than employee compensation and overhead) paid in the process of investigating or otherwise pursuing a transaction if, in the aggregate, the amounts do not exceed $5,000 (or such greater amount as may be set forth in published guidance). If the amounts exceed $5,000 (or such greater amount as may be set forth in published guidance), none of the amounts are *de minimis* costs within the meaning of this paragraph (e)(4)(iii)(A). For purposes of this paragraph (e)(4)(iii), an amount paid in the form of property is valued at its fair market value at the time of the payment. In determining the amount of transaction costs paid in the process of investigating or otherwise pursuing a transaction, a taxpayer generally must account for the specific costs paid with respect to each transaction. However, a taxpayer that reasonably expects to enter into at least 25 similar transactions during the taxable year may establish a pool of similar transactions for purposes of determining the amount of transaction costs paid in the process of investigating or otherwise pursuing the transactions in the pool. Under this pooling method, the amount of transaction costs paid in the process of investigating or otherwise pursuing each transaction included in the pool is equal to the average transaction costs paid in the process of investigating or otherwise pursuing all transactions included in the pool. A taxpayer computes the average transaction costs paid in the process of investigating or otherwise pursuing all transactions included in the pool by dividing the sum of all transaction costs paid in the process of investigating or otherwise pursuing all transactions included in the pool by the number of transactions included in the pool. *See* paragraph (h) of this section for additional rules relating to pooling.

(B) *Treatment of commissions.* The term *de minimis costs* does not include commissions paid to facilitate the acquisition of an intangible described in paragraphs (c)(1)(i) through (v) of this section or to facilitate the creation, origination, entrance into, renewal or renegotiation of an intangible described in paragraph (d)(2)(i) of this section.

(iv) *Election to capitalize.* A taxpayer may elect to treat employee compensation, overhead, or *de minimis* costs paid in the process of investigating or otherwise pursuing a transaction as amounts that facilitate the transaction. The election is made separately for each transaction and applies to employee compensation, overhead, or *de minimis* costs, or to any combination thereof. For example, a taxpayer may elect to treat overhead and *de minimis* costs, but not employee compensation, as amounts that facilitate the transaction. A taxpayer makes the election by treating the amounts to which the election applies as amounts that facilitate the transaction in the taxpayer's timely filed original Federal income tax return (including extensions) for the taxable year during which the amounts are paid. In the case of an affiliated group of corporations filing a consolidated return, the election is made separately with respect to each member of the group, and not with respect to the group as a whole. In the case of an S corporation or partnership, the election is made by the S corporation or by the partnership, and not by the shareholders or partners. An election made under this paragraph (e)(4)(iv) is revocable with respect to each taxable year for which made only with the consent of the Commissioner.

(5) *Examples.* The following examples illustrate the rules of this paragraph (e):

Example 1. Costs to facilitate. In December 2005, R corporation, a calendar year taxpayer, enters into negotiations with X corporation to lease commercial property from X for a period of 25 years. R pays A, its outside legal counsel, $4,000 in December 2005 for services rendered by A during December in assisting with negotiations with X. In January 2006, R and X finalize the terms of the lease and execute the lease agreement. R pays B, another of its outside legal counsel, $2,000 in January 2006 for services rendered by B during January in drafting the lease agreement. The agreement between R and X is an agreement providing R the right to use property, as described in paragraph (d)(6)(i)(A) of this section. R's payments to its outside counsel are amounts paid to facilitate the creation of the agreement. As provided in paragraph (e)(4)(iii)(A) of this section, R must aggregate its transaction costs for purposes of determining whether the transaction costs are *de minimis.* Because R's aggregate transaction costs exceed $5,000, R's transaction costs are not *de minimis* costs within the meaning of paragraph (e)(4)(iii)(A) of this section. Accordingly, R must capitalize the $4,000 paid to A and the $2,000 paid to B under paragraph (b)(1)(v) of this section.

Example 2. Costs to facilitate. Partnership X leases its manufacturing equipment from Y corporation under a 10-year lease. During 2005, when the lease has a remaining term of 4 years, X enters into a written agreement with Z corporation, a competitor of Y, under which X agrees to lease its manufacturing equipment from Z, subject to the condition that X first successfully terminates its lease with Y. X pays Y $50,000 in exchange for Y's agreement to terminate the equipment lease. Under paragraph (e)(1)(ii), X's $50,000 payment does not facilitate the creation of the new lease with Z. In addition, X's $50,000 payment does not terminate an agreement described in paragraph (d)(7) of this section. Accordingly, X is not required to capitalize the $50,000 termination payment under this section.

Example 3. Costs to facilitate. W corporation enters into a lease agreement with X corporation under which W agrees to lease property to X for a period of 5 years. W pays its outside counsel $7,000 for legal services rendered in drafting the lease agreement and negotiating with X. The agreement between W and X is an agreement providing W the right to be compensated for the use of property, as described in paragraph (d)(6)(i)(A) of this section. Under paragraph (e)(1)(i) of this section, W's payment to its outside counsel is an amount paid to facilitate the creation of that agreement. As provided by paragraph (e)(2) of this section, W must capitalize its $7,000 payment to outside counsel notwithstanding the fact that W made no payment described in paragraph (d)(6)(i) of this section.

Example 4. Costs to facilitate. U corporation, which owns a majority of the common stock of T corporation, votes its controlling interest in favor of a perpetual extension of T's charter. M, a minority shareholder in T, votes against the extension. Under applicable state law, U is required to purchase the stock of T held by M. When U and M are unable to agree on the value of M's shares, U brings an action in state court to appraise the value of M's stock interest. U pays attorney, accountant and appraisal fees of $25,000 for services rendered in connection with the negotiation and litigation with M. Because U's attorney, accountant and appraisal costs help establish the purchase price of M's stock, U's $25,000 payment facilitates the acquisition of stock. Accordingly, U must capitalize the $25,000 payment under paragraph (b)(1)(v) of this section.

Example 5. Costs to facilitate. For several years, H corporation has provided services to J corporation whenever requested by J. H wants to enter into a multiple-year contract with J that would give H the right to provide services to J. On June 10, 2004, H starts to prepare a bid to provide services to J and pays a consultant $15,000 to research potential competitors. On August 10, 2004, H raises the possibility of a multi-year contract with J. On October 10, 2004, H and J enter into a contract giving H the right to provide services to J for five years. During 2004, H pays $7,000 to travel to the city in which J's offices are located to continue providing services to J under their prior arrangement and pays $6,000 for travel to the city in which J's offices are located to further develop H's business relationship with J (for example, to introduce new employees, update J on current developments and take J's executives to dinner). H also pays $8,000 for travel costs to meet with J to discuss and negotiate the contract. Because the contract gives H the right to provide services to J, H must capitalize amounts paid to facilitate the creation of the contract. The $7,000 of travel expenses paid to provide services to J under their prior arrangement does not facilitate the creation of the contract and is not required to be capitalized, regardless of when the travel occurs. The $6,000 of travel expenses paid to further develop H's business relationship with J is paid in the process of pursuing the contract (and therefore must be capitalized) only to the extent the expenses relate to travel on or after June 10, 2004 (the date H begins to prepare a bid) and before October 11, 2004 (the date after H and J enter into the contract). The $8,000 of travel expenses paid to meet with J to discuss and negotiate the contract is paid in the process of pursuing the contact and must be capitalized. The $15,000 of consultant fees is paid to investigate the contract and also must be capitalized.

Example 6. Costs that do not facilitate. X corporation brings a legal action against Y corporation to recover lost profits resulting from Y's alleged infringement of X's copyright. Y does not challenge X's copyright, but argues that it did not infringe upon X's copyright. X pays its outside counsel $25,000 for legal services rendered in pursuing the suit against Y. Because X's title to its copyright is not in question, X's action against Y does not involve X's defense or perfection of title to intangible property. Thus, the amount paid to outside counsel does not facilitate the creation of an intangible described in paragraph (d)(9) of this section. Accordingly, X is not required to capitalize its $25,000 payment under this section.

Example 7. De minimis rule. W corporation, a commercial bank, acquires a portfolio containing 100 loans from Y corporation. As part of the acquisition, W pays an independent appraiser a fee of $10,000 to appraise the portfolio. The fee is an amount paid to facilitate W's acquisition of an intangible. The acquisition of the loan portfolio is a single transaction within the meaning of paragraph (e)(3) of this section. Because the amount paid to facilitate the transaction exceeds $5,000, the amount is not *de minimis* as defined in paragraph (e)(4)(iii)(A) of this section. Accordingly, W must capitalize the $10,000 fee under paragraph (b)(1)(v) of this section.

Example 8. Compensation and overhead. P corporation, a commercial bank, maintains a loan acquisition department whose sole function is to acquire loans from other financial institutions. As provided in paragraph (e)(4)(i) of this section, P is not required to capitalize any portion of the compensation paid to the employees in its loan acquisition department or any portion of its overhead allocable to the loan acquisition department.

(f) *12-month rule*—(1) *In general.* Except as otherwise provided in this paragraph (f), a taxpayer is not required to capitalize under this section amounts paid to create (or to facilitate the creation of) any right or benefit for the taxpayer that does not extend beyond the earlier of—

(i) 12 months after the first date on which the taxpayer realizes the right or benefit; or

(ii) The end of the taxable year following the taxable year in which the payment is made.

(2) *Duration of benefit for contract terminations.* For purposes of this paragraph (f), amounts paid to terminate a contract or other agreement described in paragraph (d)(7)(i) of this section prior to its expiration date (or amounts paid to facilitate such termination) create a benefit for the taxpayer that lasts for the unexpired term of the agreement immediately before the date of the termination. If the terms of a contract or other agreement described in paragraph (d)(7)(i) of this section permit the taxpayer to terminate the contract or agreement after a notice period, amounts paid by the taxpayer to terminate the contract or agreement before the end of the notice period create a benefit for the taxpayer that lasts for the amount of time by which the notice period is shortened.

(3) *Inapplicability to created financial interests and self-created amortizable section 197 intangibles.* Paragraph (f)(1) of this section does not apply to amounts paid to create (or facilitate the creation of) an intangible described in paragraph (d)(2) of this section (relating to amounts paid to create financial interests) or to amounts paid to create (or facilitate the creation of) an intangible that constitutes an amortizable section 197 intangible within the meaning of section 197(c).

(4) *Inapplicability to rights of indefinite duration.* Paragraph (f)(1) of this section does not apply to amounts paid to create (or facilitate the creation of) an intangible of indefinite duration. A right has an indefinite duration if it has no period of duration fixed by agreement or by law, or if it is not based on a period of time, such as a right attributable to an agreement to provide or receive a fixed amount of goods or services. For example, a license granted by a governmental agency that permits the taxpayer to operate a business conveys a right of indefinite duration if the license may be revoked only upon the taxpayer's violation of the terms of the license.

(5) *Rights subject to renewal*—(i) *In general.* For purposes of paragraph (f)(1) of this section, the duration of a right includes any renewal period if all of the facts and circumstances in existence during the taxable year in which the right is created indicate a reasonable expectancy of renewal.

(ii) *Reasonable expectancy of renewal.* The following factors are significant in determining whether there exists a reasonable expectancy of renewal:

(A) *Renewal history.* The fact that similar rights are historically renewed is evidence of a reasonable expectancy of renewal. On the other hand, the fact that similar rights are rarely renewed is evidence of a lack of a reasonable expectancy of renewal. Where the taxpayer has no experience with similar rights, or where the taxpayer holds similar rights only occasionally, this factor is less indicative of a reasonable expectancy of renewal.

(B) *Economics of the transaction.* The fact that renewal is necessary for the taxpayer to earn back its investment in the right is evidence of a reasonable expectancy of renewal. For example, if a taxpayer pays $14,000 to enter into a renewable contract with an initial 9-month term that is expected to generate income to the taxpayer of $1,000 per month, the fact that renewal is necessary for the taxpayer to earn back its $14,000 payment is evidence of a reasonable expectancy of renewal.

(C) *Likelihood of renewal by other party.* Evidence that indicates a likelihood of renewal by the other party to a right, such as a bargain renewal option or similar arrangement, is evidence of a reasonable expectancy of renewal. However, the mere fact that the other party will have the opportunity to renew on the same terms as are available to others is not evidence of a reasonable expectancy of renewal.

(D) *Terms of renewal.* The fact that material terms of the right are subject to renegotiation at the end of the initial term is evidence of a lack of a reasonable expectancy of renewal. For example, if the parties to an agreement must renegotiate price or amount, the renegotiation requirement is evidence of a lack of a reasonable expectancy of renewal.

(E) *Terminations.* The fact that similar rights are typically terminated prior to renewal is evidence of a lack of a reasonably expectancy of renewal.

(iii) *Safe harbor pooling method.* In lieu of applying the reasonable expectancy of renewal test described in paragraph (f)(5)(ii) of this section to each separate right created during a taxable year, a taxpayer that reasonably expects to enter into at least 25 similar rights during the taxable year may establish a pool of similar rights for which the initial term does not extend beyond the period prescribed in paragraph (f)(1) of this section and may elect to apply the reasonable expectancy of renewal test to that pool. *See* paragraph (h) of this section for additional rules relating to pooling. The application of paragraph (f)(1) of this section to each pool is determined in the following manner:

(A) All amounts (except *de minimis* costs described in paragraph (d)(6)(v) of this section) paid to create the rights included in the pool and all amounts paid to facilitate the creation of the rights included in the pool are aggregated.

(B) If less than 20 percent of the rights in the pool are reasonably expected to be renewed beyond the period prescribed in paragraph (f)(1) of this section, all rights in the pool are treated as having a duration that does not extend beyond the period prescribed in paragraph (f)(1) of this section, and the taxpayer is not required to capitalize under this section any portion of the aggregate amount described in paragraph (f)(5)(iii)(A) of this section.

(C) If more than 80 percent of the rights in the pool are reasonably expected to be renewed beyond the period prescribed in paragraph (f)(1) of this section, all rights in the pool are treated as having a duration that extends beyond the period prescribed in paragraph (f)(1) of this section, and the taxpayer is required to capitalize under this section the aggregate amount described in paragraph (f)(5)(iii)(A) of this section.

(D) If 20 percent or more, but 80 percent or less, of the rights in the pool are reasonably expected to be renewed beyond the period prescribed in paragraph (f)(1) of this section, the aggregate amount described in paragraph (f)(5)(iii)(A) of this section is multiplied by the percentage of the rights in the pool that are reasonably expected to be renewed beyond the period prescribed in paragraph (f)(1) of this section and the taxpayer must capitalize the resulting amount under this section by treating such amount as creating a separate intangible. The amount determined by multiplying the aggregate amount described in paragraph (f)(5)(iii)(A) of this section by the percentage of rights in the pool that are not reasonably expected to be renewed beyond the period prescribed in paragraph (f)(1) of this section is not required to be capitalized under this section.

(6) *Coordination with section 461.* In the case of a taxpayer using an accrual method of accounting, the rules of this paragraph (f) do not affect the determination of whether a liability is incurred during the taxable year, including the determination of whether economic performance has occurred with respect to the liability. See §1.461–4 for rules relating to economic performance.

(7) *Election to capitalize.* A taxpayer may elect not to apply the rule contained in paragraph (f)(1) of this section. An election made under this paragraph (f)(7) applies to all similar transactions during the taxable year to which paragraph (f)(1) of this section would apply (but for the election under this paragraph (f)(7)). For example, a taxpayer may elect under this paragraph (f)(7) to capitalize its costs of prepaying insurance contracts for 12 months, but may continue to apply the rule in paragraph (f)(1) to its costs of entering into non-renewable, 12-month service contracts. A taxpayer makes the election by treating the amounts as capital expenditures in its timely filed original federal income tax return (including extensions) for the taxable year during which the amounts are paid. In the case of an affiliated group of corporations filing a consolidated return, the election is made separately with respect to each member of the group, and not with respect to the group as a whole. In the case of an S corporation or partnership, the election is made by the S corporation or by the partnership, and not by the shareholders or partners. An election made under this paragraph (f)(7) is revocable with respect to each taxable year for which made only with the consent of the Commissioner.

(8) *Examples.* The rules of this paragraph (f) are illustrated by the following examples, in which it is assumed (unless otherwise stated) that the taxpayer is a calendar year, accrual method taxpayer that does not have a short taxable year in any taxable year and has not made an election under paragraph (f)(7) of this section:

Example 1. Prepaid expenses. On December 1, 2005, N corporation pays a $10,000 insurance premium to obtain a property insurance policy (with no cash value) with a 1-year term that begins on February 1, 2006. The amount paid by N is a prepaid expense described in paragraph (d)(3) of this section and not paragraph (d)(2) of this section. Because the right or benefit attributable to the $10,000 payment extends beyond the end of the taxable year following the taxable year in which the payment is made, the 12-month rule provided by this paragraph (f) does not apply. N must capitalize the $10,000 payment.

Example 2. Prepaid expenses. (i) Assume the same facts as in *Example 1*, except that the policy has a term beginning on December 15, 2005. The 12-month rule of this paragraph (f) applies to the $10,000 payment because the right or benefit attributable to the payment neither extends more than 12 months beyond December 15, 2005 (the first date the benefit is realized by the taxpayer) nor beyond the end of the taxable year following the taxable year in which the payment is made. Accordingly, N is not required to capitalize the $10,000 payment.

(ii) Alternatively, assume N capitalizes prepaid expenses for financial accounting and reporting purposes and elects under paragraph (f)(7) of this section not to apply the 12-month rule contained in paragraph (f)(1) of this section. N must capitalize the $10,000 payment for Federal income tax purposes.

Example 3. Financial interests. On October 1, 2005, X corporation makes a 9-month loan to B in the principal amount of $250,000. The principal amount of the loan to B constitutes an amount paid to create or originate a financial interest under paragraph (d)(2)(i)(B) of this section. The 9-month term of the loan does not extend beyond the period prescribed by paragraph (f)(1) of this section. However, as provided by paragraph (f)(3) of this section, the rules of this paragraph (f) do not apply to intangibles described in paragraph (d)(2) of this section. Accordingly, X must capitalize the $250,000 loan amount.

Example 4. Financial interests. X corporation owns all of the outstanding stock of Z corporation. On December 1, 2005, Y corporation pays X $1,000,000 in exchange for X's grant of a 9-month call option to Y permitting Y to purchase all of the outstanding stock of Z. Y's payment to X constitutes an amount paid to create or originate an option with X under paragraph (d)(2)(i)(C)(*7*) of this section. The 9-month term of the option does not extend beyond the period prescribed by paragraph (f)(1) of this section. However, as provided by paragraph (f)(3) of this section, the rules of this paragraph (f) do not apply to intangibles described in paragraph (d)(2) of this section. Accordingly, Y must capitalize the $1,000,000 payment.

Example 5. License. (i) On July 1, 2005, R corporation pays $10,000 to state X to obtain a license to operate a business in state X for a period of 5 years. The terms of the license require R to pay state X an annual fee of $500 due on July 1, 2005, and each of the succeeding four years. R pays the $500 fee on July 1 as required by the license.

(ii) R's payment of $10,000 is an amount paid to a governmental agency for a license granted by that agency to which paragraph (d)(5) of this section applies. Because R's payment creates rights or benefits for R that extend beyond 12 months after the first date on which R realizes the rights or benefits attributable to the payment and beyond the end of 2006 (the taxable year following the taxable year in which the payment is made), the rules of this paragraph (f) do not apply to R's payment. Accordingly, R must capitalize the $10,000 payment.

(iii) R's payment of each $500 annual fee is a prepaid expense described in paragraph (d)(3) of this section. R is not required to capitalize the $500 fee in each taxable year. The rules of this paragraph (f) apply to each such payment because each payment provides a right or benefit to R that does not extend beyond 12 months after the first date on which R realizes the rights or benefits attributable to the payment and does not extend beyond the end of the taxable year following the taxable year in which the payment is made.

Example 6. Lease. On December 1, 2005, W corporation enters into a lease agreement with X corporation under which W agrees to lease property to X for a period of 9 months, beginning on December 1, 2005. W pays its outside counsel $7,000 for legal services rendered in drafting the lease agreement and negotiating with X. The agreement between W and X is an agreement providing W the right to be compensated for the use of property, as described in paragraph (d)(6)(i)(A) of this section. W's $7,000 payment to its outside counsel is an amount paid to facilitate W's creation of the lease as described in paragraph (e)(1)(i) of this section. The 12-month rule of this paragraph (f) applies to the $7,000 payment because the right or benefit that the $7,000 payment facilitates the creation of neither extends more than 12 months beyond December 1, 2005 (the first date the benefit is realized by the taxpayer) nor beyond the end of the taxable year following the taxable year in which the payment is made. Accordingly, W is not required to capitalize its payment to its outside counsel.

Example 7. Certain contract terminations. V corporation owns real property that it has leased to A for a period of 15 years. When the lease has a remaining unexpired term of 5 years, V and A agree to terminate the lease, enabling V to use the property in its trade or business. V pays A $100,000 in exchange for A's agreement to terminate the lease. V's payment to A to terminate the lease is described in paragraph (d)(7)(i)(A) of this section. Under paragraph (f)(2) of this section, V's payment creates a benefit for V with a duration of 5 years, the remaining unexpired term of the lease as of the date of the termination. Because the benefit attributable to the expenditure extends beyond 12 months after the first date on which V realizes the rights or benefits attributable to the payment and beyond the end of the taxable year following the taxable year in which the payment is made, the rules of this paragraph (f) do not apply to the payment. V must capitalize the $100,000 payment.

Example 8. Certain contract terminations. Assume the same facts as in *Example 7,* except that the lease is terminated when it has a remaining unexpired term of 10 months. Under paragraph (f)(2) of this section, V's payment creates a benefit for V with a duration of 10 months. The 12-month rule of this paragraph (f) applies to the payment because the benefit attributable to the payment neither extends more than 12 months beyond the date of termination (the first date the benefit is realized by V) nor beyond the end of the taxable year following the taxable year in which the payment is made. Accordingly, V is not required to capitalize the $100,000 payment.

Example 9. Certain contract terminations. Assume the same facts as in *Example 7,* except that either party can terminate the lease upon 12 months notice. When the lease has a remaining unexpired term of 5 years, V wants to terminate the lease, however, V does not want to wait another 12 months. V pays A $50,000 for the ability to terminate the lease with one month's notice. V's payment to A to terminate the lease is described in paragraph (d)(7)(i)(A) of this section. Under paragraph (f)(2) of this section, V's payment creates a benefit for V with a duration of 11 months, the time by which the notice period is shortened. The 12-month rule of this paragraph (f) applies to V's $50,000 payment because the benefit attributable to the payment neither extends more than 12 months beyond the date of termination (the first date the benefit is realized by V) nor beyond the end of the taxable year following the taxable year in which the payment is made. Accordingly, V is not required to capitalize the $50,000 payment.

Example 10. Coordination with section 461. (i) U corporation leases office space from W corporation at a monthly rental rate of $2,000. On August 1, 2005, U prepays its office rent expense for the first six months of 2006 in the amount of $12,000. For purposes of this example, it is assumed that the recurring item exception provided by §1.461–5 does not apply and that the lease between W and U is not a section 467 rental agreement as defined in section 467(d).

(ii) Under §1.461–4(d)(3), U's prepayment of rent is a payment for the use of property by U for which economic performance occurs ratably over the period of time U is entitled to use the property. Accordingly, because economic performance with respect to U's prepayment of rent does not occur until 2006, U's prepaid rent is not incurred in 2005 and therefore is not properly taken into account through capitalization, deduction, or otherwise in 2005. Thus, the rules of this paragraph (f) do not apply to U's prepayment of its rent.

(iii) Alternatively, assume that U uses the cash method of accounting and the economic performance rules in §1.461–4 therefore do not apply to U. The 12-month rule of this paragraph (f) applies to the $12,000 payment because the rights or benefits attributable to U's prepayment of its rent do not extend beyond December 31, 2006. Accordingly, U is not required to capitalize its prepaid rent.

Example 11. Coordination with section 461. N corporation pays R corporation, an advertising and marketing firm, $40,000 on August 1, 2005, for advertising and marketing services to be provided to N throughout calendar year 2006. For purposes of this example, it is assumed that the recurring item exception provided by §1.461–5 does not apply. Under §1.461–4(d)(2), N's payment arises out of the provision of services to N by R for which economic performance occurs as the services are provided. Accordingly, because economic performance with respect to N's prepaid advertising expense does not occur until 2006, N's prepaid advertising expense is not incurred in 2005 and therefore is not properly taken into account through capitalization, deduction, or otherwise in 2005. Thus, the rules of this paragraph (f) do not apply to N's payment.

(g) *Treatment of capitalized costs*—(1) *In general.* An amount required to be capitalized by this section is not currently deductible under section 162. Instead, the amount generally is added to the basis of the intangible acquired or created. See section 1012.

(2) *Financial instruments.* In the case of a financial instrument described in paragraph (c)(1)(iii) or (d)(2)(i)(C) of this section, notwithstanding paragraph (g)(1) of this section, if under other provisions of law the amount required to be capitalized is not required to be added to the basis of the intangible acquired or created, then the other provisions of law will govern the tax treatment of the amount.

(h) *Special rules applicable to pooling*—(1) *In general.* Except as otherwise provided, the rules of this paragraph (h) apply to the pooling methods described in paragraph (d)(6)(v) of this section (relating to *de minimis* rules applicable to certain contract rights), paragraph (e)(4)(iii)(A) of this section (relating to *de minimis* rules applicable to transaction costs), and paragraph (f)(5)(iii) of this section (relating to the application of the 12-month rule to renewable rights).

(2) *Method of accounting.* A pooling method authorized by this section constitutes a method of accounting for purposes of section 446. A taxpayer that adopts or changes to a pooling method authorized by this section must use the method for the year of adoption and for all subsequent taxable years during which the taxpayer qualifies to use the pooling method unless a change to another method is required by the Commissioner in order to clearly reflect income, or unless permission to change to another method is granted by the Commissioner as provided in §1.446–1(e).

(3) *Adopting or changing to a pooling method.* A taxpayer adopts (or changes to) a pooling method authorized by this section for any taxable year by establishing one or more pools for the taxable year in accordance with the rules governing the particular pooling method and the rules prescribed by this paragraph (h), and by using the pooling method to compute its taxable income for the year of adoption (or change).

(4) *Definition of pool.* A taxpayer may use any reasonable method of defining a pool of similar transactions, agreements or rights, including a method based on the type of customer or the type of product or service provided under a contract. However, a taxpayer that pools similar transactions, agreements or rights must include in the pool all similar transactions, agreements or rights created during the taxable year. For purposes of the pooling methods described in paragraph (d)(6)(v) of this section (relating to *de minimis* rules applicable to certain contract rights) and paragraph (e)(4)(iii)(A) of this section (relating to *de minimis* rules applicable to transaction costs), an agreement (or a transaction) is treated as not similar to

other agreements (or transactions) included in the pool if the amount at issue with respect to that agreement (or transaction) is reasonably expected to differ significantly from the average amount at issue with respect to the other agreements (or transactions) properly included in the pool.

(5) *Consistency requirement.* A taxpayer that uses the pooling method described in paragraph (f)(5)(iii) of this section for purposes of applying the 12-month rule to a right or benefit—

(i) Must use the pooling methods described in paragraph (d)(6)(v) of this section (relating to *de minimis* rules applicable to certain contract rights) and paragraph (e)(4)(iii)(A) of this section (relating to *de minimis* rules applicable to transaction costs) for purposes of determining the amount paid to create, or facilitate the creation of, the right or benefit; and

(ii) Must use the same pool for purposes of paragraph (d)(6)(v) of this section and paragraph (e)(4)(iii)(A) of this section as is used for purposes of paragraph (f)(5)(iii) of this section.

(6) *Additional guidance pertaining to pooling.* The Internal Revenue Service may publish guidance in the Internal Revenue Bulletin (*see* §601.601(d)(2) of this chapter) prescribing additional rules for applying the pooling methods authorized by this section to specific industries or to specific types of transactions.

(7) *Example.* The following example illustrates the rules of this paragraph (h):

Example. Pooling. (i) In the course of its business, W corporation enters into 3-year non-cancelable contracts that provide W the right to provide services to its customers. W generally pays certain amounts in the process of pursuing an agreement with a customer, including amounts paid to credit reporting agencies to verify the credit history of the potential customer and commissions paid to the independent sales agent who secures the agreement with the customer. In the case of agreements that W enters into with customers who are individuals, the agreements contain substantially similar terms and conditions and W typically pays between $100 and $200 in the process of pursuing each transaction. During 2005, W enters into agreements with 300 individuals. Also during 2005, W enters into an agreement with X corporation containing terms and conditions that are substantially similar to those contained in the agreements W enters into with its customers who are individuals. W pays certain amounts in the process of pursuing the agreement with X that W would not typically incur in the process of pursuing an agreement with its customers who are individuals. For example, W pays amounts to prepare and submit a bid for the agreement with X and amounts to travel to X's headquarters to make a sales presentation to X's management. In the aggregate, W pays $11,000 in the process of obtaining the agreement with X.

(ii) The agreements between W and its customers are agreements providing W the right to provide services, as described in paragraph (d)(6)(i)(B) of this section. Under paragraph (b)(1)(v) of this section, W must capitalize transaction costs paid to facilitate the creation of these agreements. Because W enters into at least 25 similar transactions during 2005, W may pool its transactions for purposes of determining whether its transaction costs are *de minimis* within the meaning of paragraph (e)(4)(iii)(A) of this section. W adopts a pooling method by establishing one or more pools of similar transactions and by using the pooling method to compute its taxable income beginning in its 2005 taxable year. If W adopts a pooling method, W must include all similar transactions in the pool. Under paragraph (h)(4) of this section, the transaction with X is not similar to the transactions W enters into with its customers who are individuals. While the agreement with X contains terms and conditions that are substantially similar to those contained in the agreements W enters into with its customers who are individuals, the transaction costs paid in the process of pursuing the agreement with X are reasonably expected to differ significantly from the average transaction costs attributable to transactions with its customers who are individuals. Accordingly, W may not include the transaction with X in the pool of transactions with customers who are individuals.

(i) [Reserved]

(j) *Application to accrual method taxpayers.* For purposes of this section, the terms *amount paid* and *payment* mean, in the case of a taxpayer using an accrual method of accounting, a liability incurred (within the meaning of §1.446–1(c)(1)(ii)). A liability may not be taken into account under this section prior to the taxable year during which the liability is incurred.

(k) *Treatment of related parties and indirect payments.* For purposes of this section, references to a party other than the taxpayer include persons related to that party and persons acting for or on behalf of that party (including persons to whom the taxpayer becomes obligated as a result of assuming a liability of that party). For this purpose, persons are related only if their relationship is described in section 267(b) or 707(b) or they are engaged in trades or businesses under common control within the meaning of section 41(f)(1). References to an amount paid to or by a party include an amount paid on behalf of that party.

(l) *Examples.* The rules of this section are illustrated by the following examples in which it is assumed that the Internal Revenue Service has not published guidance that requires capitalization under paragraph (b)(1)(iv) of this section (relating to amounts paid to create or enhance a future benefit that is identified in published guidance as an intangible for which capitalization is required):

Example 1. License granted by a governmental unit. (i) X corporation pays $25,000 to state R to obtain a license to sell alcoholic beverages in its restaurant. The license is valid indefinitely, provided X complies with all applicable laws regarding the sale of alcoholic beverages in state R. X pays its outside counsel $4,000 for legal services rendered in preparing the license application and otherwise representing X during the licensing process. In addition, X determines that $2,000 of salaries paid to its employees is allocable to services rendered by the employees in obtaining the license.

(ii) X's payment of $25,000 is an amount paid to a governmental unit to obtain a license granted by that agency, as described in paragraph (d)(5)(i) of this section. The right has an indefinite duration and constitutes an amortizable section 197 intangible. Accordingly, as provided in paragraph (f)(3) of this section, the provisions of paragraph (f) of this section (relating to the 12-month rule) do not apply to X's payment. X must capitalize its $25,000 payment to obtain the license from state R.

(iii) As provided in paragraph (e)(4) of this section, X is not required to capitalize employee compensation because such amounts are treated as amounts that do not facilitate the acquisition or creation of an intangible. Thus, X is not required to capitalize the $2,000 of employee compensation allocable to the transaction.

(iv) X's payment of $4,000 to its outside counsel is an amount paid to facilitate the creation of an intangible, as described in paragraph (e)(1)(i) of this section. Because X's transaction costs do not exceed $5,000, X's transaction costs are *de minimis* within the meaning of paragraph (e)(4)(iii)(A) of this section. Accordingly, X is not required to capitalize the $4,000 payment to its outside counsel under this section.

Example 2. Franchise agreement. (i) R corporation is a franchisor of income tax return preparation outlets. V corporation negotiates with R to obtain the right to operate an income tax return preparation outlet under a franchise from R. V pays an initial $100,000 franchise fee to R in exchange for the franchise agreement. In addition, V pays its outside counsel $4,000 to represent V during the negotiations with R. V also pays $2,000 to an industry consultant to advise V during the negotiations with R.

(ii) Under paragraph (d)(6)(i)(A) of this section, V's payment of $100,000 is an amount paid to another party to enter into an agreement with that party providing V the right to use tangible or intangible property. Accordingly, V must capitalize its $100,000 payment to R. The franchise agreement is a self-created amortizable section 197 intangible within the meaning of section 197(c). Accordingly, as provided in paragraph (f)(3) of this section, the 12-month rule contained in paragraph (f)(1) of this section does not apply.

(iii) V's payment of $4,000 to its outside counsel and $2,000 to the industry consultant are amounts paid to facilitate the creation of an intangible, as described in paragraph (e)(1)(i) of this section. Because V's aggregate transaction costs exceed $5,000, V's transaction costs are not *de minimis* within the meaning of paragraph (e)(4)(iii)(A) of this section. Accordingly, V must capitalize the $4,000 payment to its outside counsel and the $2,000 payment to the industry consultant under this section into the basis of the franchise, as provided in paragraph (g) of this section.

Example 3. Covenant not to compete. (i) On December 1, 2005, N corporation, a calendar year taxpayer, enters into a covenant not to compete with B, a key employee that is leaving the employ of N. The covenant not to compete is not entered into in connection with the acquisition of an interest in a trade or business. The covenant not to compete prohibits B from competing with N for a period of 9 months, beginning December 1, 2005. N pays B $25,000 in full consideration for B's agreement not to compete. In addition, N pays its outside counsel $6,000 to facilitate the creation of the covenant not to compete with B. N does not have a short taxable year in 2005 or 2006.

(ii) Under paragraph (d)(6)(i)(C) of this section, N's payment of $25,000 is an amount paid to another party to induce that party to enter into a covenant not to compete with N. However, because the covenant not to compete has a duration that does not extend beyond 12 months after the first date on which N realizes the rights attributable to its payment (*i.e.,* December 1, 2005) or beyond the end of the taxable year following the taxable year in which payment is made, the 12-month rule contained in paragraph (f)(1) of this section applies. Accordingly, N is not required to capitalize its $25,000 payment to B or its $6,000 payment to facilitate the creation of the covenant not to compete.

Example 4. Demand-side management. (i) X corporation, a public utility engaged in generating and distributing electrical energy, provides programs to its customers to promote energy conservation and energy efficiency. These programs are aimed at reducing electrical costs to X's customers, building goodwill with X's customers, and reducing X's future operating and capital costs. X provides these programs without obligating any of its customers participating in the programs to purchase power from X in the future. Under these programs, X pays a consultant to help industrial customers design energy-efficient manufacturing processes, to conduct ''energy efficiency audits'' that serve to identify for customers inefficiencies in their energy usage patterns, and to provide cash allowances to encourage residential customers to replace existing appliances with more energy efficient appliances.

(ii) The amounts paid by X to the consultant are not amounts to acquire or create an intangible under paragraph (c) or (d) of this section or to facilitate such an acquisition or creation. In addition, the amounts do not create a separate and distinct intangible asset within the meaning of paragraph (b)(3) of this section. Accordingly, the amounts paid to the consultant are not required to be capitalized under this section. While the amounts may serve to reduce future operating and capital costs and create goodwill with customers, these benefits, without more, are not intangibles for which capitalization is required under this section.

Example 5. Business process re-engineering. (i) V corporation manufactures its products using a batch production system. Under this system, V continuously produces component parts of its various products and stockpiles these parts until they are needed in V's final assembly line. Finished goods are stockpiled awaiting orders from customers. V discovers that this process ties up significant amounts of V's capital in work-in-process and finished goods inventories. V hires B, a consultant, to advise V on improving the efficiency of its manufacturing operations. B recommends a complete re-engineering of V's manufacturing process to a process known as just-in-time manufacturing. Just-in-time manufacturing involves reconfiguring a manufacturing plant to a configuration of ''cells'' where each team in a cell performs the entire manufacturing process for a particular customer order, thus reducing inventory stockpiles.

(ii) V incurred three categories of costs to convert its manufacturing process to a just-in-time system. First, V paid B, a consultant, $250,000 in professional fees to implement the conversion of V's plant to a just-in-time system. Second, V paid C, a contractor, $100,000 to relocate and reconfigure V's manufacturing equipment from an assembly line layout to a configuration of cells. Third, V paid D, a consultant, $50,000 to train V's employees in the just-in-time manufacturing process.

(iii) The amounts paid by V to B, C, and D are not amounts to acquire or create an intangible under paragraph (c) or (d) of this section or to facilitate such an acquisition or creation. In addition, the amounts do not create a separate and distinct intangible asset within the meaning of paragraph (b)(3) of this section. Accordingly, the amounts paid to B, C, and D are not required to be capitalized under this section. While the amounts produce long term benefits to V in the form of reduced inventory stockpiles, improved product quality, and increased efficiency, these benefits, without more, are not intangibles for which capitalization is required under this section.

Example 6. Defense of business reputation. (i) X, an investment adviser, serves as the fund manager of a money market investment fund. X, like its competitors in the industry, strives to maintain a constant net asset value for its money market fund of $1.00 per share. During 2005, in the course of managing the fund assets, X incorrectly predicts the direction of market interest rates, resulting in significant investment losses to the fund. Due to these significant losses, X is faced with the prospect of reporting a net asset value that is less than $1.00 per share. X is not aware of any investment adviser in its industry that has ever reported a net asset value for its money market fund of less than $1.00 per share. X is concerned that reporting a net asset value of less than $1.00 per share will significantly harm its reputation as an investment adviser, and could lead to litigation by shareholders. X decides to contribute $2,000,000 to the fund in order to raise the net asset value of the fund to $1.00 per share. This contribution is not a loan to the fund and does not give X any ownership interest in the fund.

(ii) The $2,000,000 contribution is not an amount paid to acquire or create an intangible under paragraph (c) or (d) of this section or to facilitate such an acquisition or creation. In addition, the amount does not create a separate and distinct intangible asset within the meaning of paragraph (b)(3) of this section. Accordingly, the amount contributed to the fund is not required to be capitalized under this section. While the amount serves to protect the business reputation of the taxpayer and may protect the taxpayer from litigation by shareholders, these benefits, without more, are not intangibles for which capitalization is required under this section.

Example 7. Product launch costs. (i) R corporation, a manufacturer of pharmaceutical products, is required by law to obtain regulatory approval before selling its products. While awaiting regulatory approval on Product A, R pays to develop and implement a marketing strategy and an advertising campaign to raise consumer awareness of the purported need for Product A. R also pays to train health care professionals and other distributors in the proper use of Product A.

(ii) The amounts paid by R are not amounts paid to acquire or create an intangible under paragraph (c) or (d) of this section or to facilitate such an acquisition or creation. In addition, the amounts do not create a separate and distinct intangible asset within the meaning of paragraph (b)(3) of this section. Accordingly, R is not required to capitalize these amounts under this section. While the amounts may benefit R by creating consumer demand for Product A and increasing awareness of Product A among distributors, these benefits, without more, are not intangibles for which capitalization is required under this section.

Example 8. Stocklifting costs. (i) N corporation is a wholesale distributor of Brand A aftermarket automobile replacement parts. In an effort to induce a retail automobile parts supply store to stock only Brand A parts, N offers to replace all of the store's inventory of other branded parts with Brand A parts, and to credit the store for its cost of other branded parts. The store is under no obligation to continue stocking Brand A parts or to purchase a minimum volume of Brand A parts from N in the future.

(ii) The amount paid by N as a credit to the store for the cost of other branded parts is not an amount paid to acquire or create an intangible under paragraph (c) or (d) of this section or to facilitate such an acquisition or creation. In addition, the amount does not create a separate and distinct intangible asset within the meaning of paragraph (b)(3) of this section. Accordingly, N is not required to capitalize the amount under this section. While the amount may create a hope or expectation by N that the store will continue to stock Brand A parts, this benefit, without more, is not an intangible for which capitalization is required under this section.

(iii) Alternatively, assume that N agrees to credit the store for its cost of other branded parts in exchange for the store's agreement to purchase all of its inventory requirements for such parts from N for a period of at least 3 years. The amount paid by N as a credit to the store for the cost of other branded parts is an amount paid to induce the store to enter into an agreement providing R the right to provide property. Accordingly, R must capitalize its payment.

Example 9. Package design costs. (i) Z corporation manufactures and markets personal care products. Z pays $100,000 to a consultant to develop a package design for Z's newest product, Product A. Z also pays a fee to a government agency to obtain trademark and copyright protection on certain elements of the package design. Z pays its outside legal counsel $10,000 for services rendered in preparing and filing the trademark and copyright applications and for other services rendered in securing the trademark and copyright protection.

(ii) The $100,000 paid by Z to the consultant for development of the package design is not an amount paid to acquire or create an intangible under paragraph (c) or (d) of this section or to facilitate such an acquisition or creation. In addition, as provided in paragraph (b)(3)(v) of this section, amounts paid to develop a package design are treated as amounts that do not create a separate and distinct intangible asset. Accordingly, Z is not required to capitalize the $100,000 payment under this section.

(iii) The amounts paid by Z to the government agency to obtain trademark and copyright protection are amounts paid to a government agency for a right granted by that agency. Accordingly, Z must capitalize the payment. In addition, the $10,000 paid by Z to its outside counsel is an amount paid to facilitate the creation of the trademark and copyright. Because the aggregate amounts paid to facilitate the transaction exceed $5,000, the amounts are not *de minimis* as defined in paragraph (e)(4)(iii)(A) of this section. Accordingly, Z must capitalize the $10,000 payment to its outside counsel under paragraph (b)(1)(v) of this section.

(iv) Alternatively, assume that Z acquires an existing package design for Product A as part of an acquisition of a trade or business that constitutes an applicable asset acquisition within the meaning of section 1060(c). Assume further that $100,000 of the consideration paid by N in the acquisition is properly allocable to the package design for Product A. Under paragraph (c)(1) of this section, Z must capitalize the $100,000 payment.

Example 10. Contract to provide services. (i) Q corporation, a financial planning firm, provides financial advisory services on a fee-only basis. During 2005, Q and several other financial planning firms submit separate bids to R corporation for a contract to become one of three providers of financial advisory services to R's employees. Q pays $2,000 to a printing company to develop and produce materials for its sales presentation to R's management. Q also pays $6,000 to travel to R's corporate headquarters to make the sales presentation, and $20,000 of salaries to its employees for services performed in preparing the bid and making the presentation to R's management. Q's bid is successful and Q enters into an agreement with R in

2005 under which Q agrees to provide financial advisory services to R's employees, and R agrees to pay Q's fee on behalf of each employee who chooses to utilize such services. R enters into similar agreements with two other financial planning firms, and R's employees may choose to use the services of any one of the three firms. Based on its past experience, Q reasonably expects to provide services to at least 5 percent of R's employees.

(ii) Q's agreement with R is not an agreement providing Q the right to provide services, as described in paragraph (d)(6)(i)(B) of this section. Under paragraph (d)(6)(iv) the agreement places no obligation on another person to request or pay for Q's services. Accordingly, Q is not required to capitalize any of the amounts paid in the process of pursuing the agreement with R.

Example 11. Mutual fund distributor. (i) D incurs costs to enter into a distribution agreement with M, a mutual fund. The initial term of the distribution agreement is two years, and afterwards must be approved annually by M. The distribution agreement can be terminated by either party on 60 days notice. Although distribution agreements are rarely terminated in the mutual fund industry, M is not economically compelled to continue D's distribution agreement. Under the distribution agreement, D has the exclusive right to sell shares of M and agrees to use its best efforts to solicit orders for the sale of shares of M. D sells shares in M directly to the general public as well as through brokers. When an investor places an order for M shares with a broker, D pays the broker a commission for selling the shares to the investor. Under the distribution agreement, D receives compensation from M in the form of 12b–1 fees (which equal a percentage of M's net asset value attributable to investors that have held their shares for up to 6 years) and contingent deferred sales charges (which are paid if the investor redeems the purchased shares within 6 years).

(ii) The distribution agreement is not an agreement providing D with the right to provide services, as described in paragraph (d)(6)(i)(B) of this section, because the distribution agreement can be terminated by M at will upon 60 days notice and M is not economically compelled to continue the distribution agreement. Accordingly, D is not required to capitalize the costs of creating (or facilitating the creation of) the distribution agreement under paragraphs (b)(1)(ii) or (v) of this section. In addition, as provided in paragraph (b)(3)(ii) of this section, amounts paid to create an agreement are treated as amounts that do not create a separate and distinct intangible asset. Accordingly, D also is not required to capitalize the costs of creating (or facilitating the creation of) the distribution agreement under paragraph (b)(1)(iii) or (v) of this section.

(iii) Under paragraph (b)(3)(iii), the broker commissions paid by D in performing services under the distribution agreement do not create (or facilitate the creation of) a separate and distinct intangible asset. In addition, the broker commissions do not create an intangible described in paragraph (d) of this section. Accordingly, D is not required to capitalize the broker commissions under this section.

(m) *Amortization*. For rules relating to amortization of certain intangibles, see §1.167(a)–3.

(n) *Intangible interests in land*. [Reserved].

(o) *Effective date*. This section applies to amounts paid or incurred on or after December 31, 2003.

(p) *Accounting method changes*—(1) *In general*. A taxpayer seeking to change a method of accounting to comply with this section must secure the consent of the Commissioner in accordance with the requirements of §1.446–1(e). For the taxpayer's first taxable year ending on or after December 31, 2003, the taxpayer is granted the consent of the Commissioner to change its method of accounting to comply with this section, provided the taxpayer follows the administrative procedures issued under §1.446–1(e)(3)(ii) for obtaining the Commissioner's automatic consent to a change in accounting method (for further guidance, for example, see Rev. Proc. 2002–9 (2002–1 C.B. 327) and §601.601(d)(2)(ii)(*b*) of this chapter).

(2) *Scope limitations*. Any limitations on obtaining the automatic consent of the Commissioner do not apply to a taxpayer seeking to change to a method of accounting to comply with this section for its first taxable year ending on or after December 31, 2003.

(3) *Section 481(a) adjustment*. With the exception of a change to a pooling method authorized by this section, the section 481(a) adjustment for a change in method of accounting to comply with this section for a taxpayer's first taxable year ending on or after December 31, 2003 is determined by taking into account only amounts paid or incurred in taxable years ending on or after January 24, 2002. A taxpayer seeking to change to a pooling method authorized by this section on or after the effective date of these regulations

must change to the method using a cut-off method.

[T.D. 9107, 69 FR 446, Jan. 5, 2004]

§ 1.263(a)–5 Amounts paid or incurred to facilitate an acquisition of a trade or business, a change in the capital structure of a business entity, and certain other transactions.

(a) *General rule.* A taxpayer must capitalize an amount paid to facilitate (within the meaning of paragraph (b) of this section) each of the following transactions, without regard to whether the transaction is comprised of a single step or a series of steps carried out as part of a single plan and without regard to whether gain or loss is recognized in the transaction:

(1) An acquisition of assets that constitute a trade or business (whether the taxpayer is the acquirer in the acquisition or the target of the acquisition).

(2) An acquisition by the taxpayer of an ownership interest in a business entity if, immediately after the acquisition, the taxpayer and the business entity are related within the meaning of section 267(b) or 707(b) (*see* § 1.263(a)–4 for rules requiring capitalization of amounts paid by the taxpayer to acquire an ownership interest in a business entity, or to facilitate the acquisition of an ownership interest in a business entity, where the taxpayer and the business entity are not related within the meaning of section 267(b) or 707(b) immediately after the acquisition).

(3) An acquisition of an ownership interest in the taxpayer (other than an acquisition by the taxpayer of an ownership interest in the taxpayer, whether by redemption or otherwise).

(4) A restructuring, recapitalization, or reorganization of the capital structure of a business entity (including reorganizations described in section 368 and distributions of stock by the taxpayer as described in section 355).

(5) A transfer described in section 351 or section 721 (whether the taxpayer is the transferor or transferee).

(6) A formation or organization of a disregarded entity.

(7) An acquisition of capital.

(8) A stock issuance.

(9) A borrowing. For purposes of this section, a borrowing means any issuance of debt, including an issuance of debt in an acquisition of capital or in a recapitalization. A borrowing also includes debt issued in a debt for debt exchange under § 1.1001–3.

(10) Writing an option.

(b) *Scope of facilitate*—(1) *In general.* Except as otherwise provided in this section, an amount is paid to facilitate a transaction described in paragraph (a) of this section if the amount is paid in the process of investigating or otherwise pursuing the transaction. Whether an amount is paid in the process of investigating or otherwise pursuing the transaction is determined based on all of the facts and circumstances. In determining whether an amount is paid to facilitate a transaction, the fact that the amount would (or would not) have been paid but for the transaction is relevant, but is not determinative. An amount paid to determine the value or price of a transaction is an amount paid in the process of investigating or otherwise pursuing the transaction. An amount paid to another party in exchange for tangible or intangible property is not an amount paid to facilitate the exchange. For example, the purchase price paid to the target of an asset acquisition in exchange for its assets is not an amount paid to facilitate the acquisition. Similarly, the purchase price paid by an acquirer to the target's shareholders in exchange for their stock in a stock acquisition is not an amount paid to facilitate the acquisition of the stock. See § 1.263(a)–1, § 1.263(a)–2, and § 1.263(a)–4 for rules requiring capitalization of the purchase price paid to acquire property.

(2) *Ordering rules.* An amount paid in the process of investigating or otherwise pursuing both a transaction described in paragraph (a) of this section and an acquisition or creation of an intangible described in § 1.263(a)–4 is subject to the rules contained in this section, and not to the rules contained in § 1.263(a)–4. In addition, an amount required to be capitalized by § 1.263(a)–1, § 1.263(a)–2, or § 1.263(a)–4 does not facilitate a transaction described in paragraph (a) of this section.

(c) *Special rules for certain costs*—(1) *Borrowing costs.* An amount paid to facilitate a borrowing does not facilitate another transaction (other than the borrowing) described in paragraph (a) of this section.

(2) *Costs of asset sales.* An amount paid by a taxpayer to facilitate a sale of its assets does not facilitate another transaction (other than the sale) described in paragraph (a) of this section. For example, where a target corporation, in preparation for a merger with an acquiring corporation, sells assets that are not desired by the acquiring corporation, amounts paid to facilitate the sale of the unwanted assets are not required to be capitalized as amounts paid to facilitate the merger.

(3) *Mandatory stock distributions.* An amount paid in the process of investigating or otherwise pursuing a distribution of stock by a taxpayer to its shareholders does not facilitate a transaction described in paragraph (a) of this section if the divestiture of the stock (or of properties transferred to an entity whose stock is distributed) is required by law, regulatory mandate, or court order. A taxpayer is not required to capitalize (under this section or §1.263(a)–4) an amount paid to organize (or facilitate the organization of) an entity if the entity is organized solely to receive properties that the taxpayer is required to divest by law, regulatory mandate, or court order and if the taxpayer distributes the stock of the entity to its shareholders. A taxpayer also is not required to capitalize (under this section or §1.263(a)–4) an amount paid to transfer property to an entity if the taxpayer is required to divest itself of that property by law, regulatory mandate, or court order and if the stock of the recipient entity is distributed to the taxpayer's shareholders.

(4) *Bankruptcy reorganization costs.* An amount paid to institute or administer a proceeding under Chapter 11 of the Bankruptcy Code by a taxpayer that is the debtor under the proceeding constitutes an amount paid to facilitate a reorganization within the meaning of paragraph (a)(4) of this section, regardless of the purpose for which the proceeding is instituted. For example, an amount paid to prepare and file a petition under Chapter 11, to obtain an extension of the exclusivity period under Chapter 11, to formulate plans of reorganization under Chapter 11, to analyze plans of reorganization formulated by another party in interest, or to contest or obtain approval of a plan of reorganization under Chapter 11 facilitates a reorganization within the meaning of this section. However, amounts specifically paid to formulate, analyze, contest or obtain approval of the portion of a plan of reorganization under Chapter 11 that resolves tort liabilities of the taxpayer do not facilitate a reorganization within the meaning of paragraph (a)(4) of this section if the amounts would have been treated as ordinary and necessary business expenses under section 162 had the bankruptcy proceeding not been instituted. In addition, an amount paid by the taxpayer to defend against the commencement of an involuntary bankruptcy proceeding against the taxpayer does not facilitate a reorganization within the meaning of paragraph (a)(4) of this section. An amount paid by the debtor to operate its business during a Chapter 11 bankruptcy proceeding is not an amount paid to institute or administer the bankruptcy proceeding and does not facilitate a reorganization. Such amount is treated in the same manner as it would have been treated had the bankruptcy proceeding not been instituted.

(5) *Stock issuance costs of open-end regulated investment companies.* Amounts paid by an open-end regulated investment company (within the meaning of section 851) to facilitate an issuance of its stock are treated as amounts that do not facilitate a transaction described in paragraph (a) of this section unless the amounts are paid during the initial stock offering period.

(6) *Integration costs.* An amount paid to integrate the business operations of the taxpayer with the business operations of another does not facilitate a transaction described in paragraph (a) of this section, regardless of when the integration activities occur.

(7) *Registrar and transfer agent fees for the maintenance of capital stock records.* An amount paid by a taxpayer to a registrar or transfer agent in connection with the transfer of the taxpayer's capital stock does not facilitate a transaction described in paragraph (a) of this section unless the amount is paid

with respect to a specific transaction described in paragraph (a). For example, a taxpayer is not required to capitalize periodic payments to a transfer agent for maintaining records of the names and addresses of shareholders who trade the taxpayer's shares on a national exchange. By comparison, a taxpayer is required to capitalize an amount paid to the transfer agent for distributing proxy statements requesting shareholder approval of a transaction described in paragraph (a) of this section.

(8) *Termination payments and amounts paid to facilitate mutually exclusive transactions.* An amount paid to terminate (or facilitate the termination of) an agreement to enter into a transaction described in paragraph (a) of this section constitutes an amount paid to facilitate a second transaction described in paragraph (a) of this section only if the transactions are mutually exclusive. An amount paid to facilitate a transaction described in paragraph (a) of this section is treated as an amount paid to facilitate a second transaction described in paragraph (a) of this section only if the transactions are mutually exclusive.

(d) *Simplifying conventions*—(1) *In general.* For purposes of this section, employee compensation (within the meaning of paragraph (d)(2) of this section), overhead, and *de minimis* costs (within the meaning of paragraph (d)(3) of this section) are treated as amounts that do not facilitate a transaction described in paragraph (a) of this section.

(2) *Employee compensation*—(i) *In general.* The term *employee compensation* means compensation (including salary, bonuses and commissions) paid to an employee of the taxpayer. For purposes of this section, whether an individual is an employee is determined in accordance with the rules contained in section 3401(c) and the regulations thereunder.

(ii) *Certain amounts treated as employee compensation.* For purposes of this section, a guaranteed payment to a partner in a partnership is treated as employee compensation. For purposes of this section, annual compensation paid to a director of a corporation is treated as employee compensation. For example, an amount paid to a director of a corporation for attendance at a regular meeting of the board of directors (or committee thereof) is treated as employee compensation for purposes of this section. However, an amount paid to the director for attendance at a special meeting of the board of directors (or committee thereof) is not treated as employee compensation. An amount paid to a person that is not an employee of the taxpayer (including the employer of the individual who performs the services) is treated as employee compensation for purposes of this section only if the amount is paid for secretarial, clerical, or similar administrative support services (other than services involving the preparation and distribution of proxy solicitations and other documents seeking shareholder approval of a transaction described in paragraph (a) of this section). In the case of an affiliated group of corporations filing a consolidated federal income tax return, a payment by one member of the group to a second member of the group for services performed by an employee of the second member is treated as employee compensation if the services provided by the employee are provided at a time during which both members are affiliated.

(3) *De minimis costs*—(i) *In general.* The term *de minimis costs* means amounts (other than employee compensation and overhead) paid in the process of investigating or otherwise pursuing a transaction described in paragraph (a) of this section if, in the aggregate, the amounts do not exceed $5,000 (or such greater amount as may be set forth in published guidance). If the amounts exceed $5,000 (or such greater amount as may be set forth in published guidance), none of the amounts are *de minimis costs* within the meaning of this paragraph (d)(3). For purposes of this paragraph (d)(3), an amount paid in the form of property is valued at its fair market value at the time of the payment.

(ii) *Treatment of commissions.* The term *de minimis costs* does not include commissions paid to facilitate a transaction described in paragraph (a) of this section.

(4) *Election to capitalize.* A taxpayer may elect to treat employee compensation, overhead, or *de minimis costs* paid in the process of investigating or otherwise pursuing a transaction described in paragraph (a) of this section as amounts that facilitate the transaction. The election is made separately for each transaction and applies to employee compensation, overhead, or *de minimis costs,* or to any combination thereof. For example, a taxpayer may elect to treat overhead and *de minimis costs,* but not employee compensation, as amounts that facilitate the transaction. A taxpayer makes the election by treating the amounts to which the election applies as amounts that facilitate the transaction in the taxpayer's timely filed original federal income tax return (including extensions) for the taxable year during which the amounts are paid. In the case of an affiliated group of corporations filing a consolidated return, the election is made separately with respect to each member of the group, and not with respect to the group as a whole. In the case of an S corporation or partnership, the election is made by the S corporation or by the partnership, and not by the shareholders or partners. An election made under this paragraph (d)(4) is revocable with respect to each taxable year for which made only with the consent of the Commissioner.

(e) *Certain acquisitive transactions*—(1) *In general.* Except as provided in paragraph (e)(2) of this section (relating to inherently facilitative amounts), an amount paid by the taxpayer in the process of investigating or otherwise pursuing a covered transaction (as described in paragraph (e)(3) of this section) facilitates the transaction within the meaning of this section only if the amount relates to activities performed on or after the earlier of—

(i) The date on which a letter of intent, exclusivity agreement, or similar written communication (other than a confidentiality agreement) is executed by representatives of the acquirer and the target; or

(ii) The date on which the material terms of the transaction (as tentatively agreed to by representatives of the acquirer and the target) are authorized or approved by the taxpayer's board of directors (or committee of the board of directors) or, in the case of a taxpayer that is not a corporation, the date on which the material terms of the transaction (as tentatively agreed to by representatives of the acquirer and the target) are authorized or approved by the appropriate governing officials of the taxpayer. In the case of a transaction that does not require authorization or approval of the taxpayer's board of directors (or appropriate governing officials in the case of a taxpayer that is not a corporation) the date determined under this paragraph (e)(1)(ii) is the date on which the acquirer and the target execute a binding written contract reflecting the terms of the transaction.

(2) *Exception for inherently facilitative amounts.* An amount paid in the process of investigating or otherwise pursuing a covered transaction facilitates that transaction if the amount is inherently facilitative, regardless of whether the amount is paid for activities performed prior to the date determined under paragraph (e)(1) of this section. An amount is inherently facilitative if the amount is paid for—

(i) Securing an appraisal, formal written evaluation, or fairness opinion related to the transaction;

(ii) Structuring the transaction, including negotiating the structure of the transaction and obtaining tax advice on the structure of the transaction (for example, obtaining tax advice on the application of section 368);

(iii) Preparing and reviewing the documents that effectuate the transaction (for example, a merger agreement or purchase agreement);

(iv) Obtaining regulatory approval of the transaction, including preparing and reviewing regulatory filings;

(v) Obtaining shareholder approval of the transaction (for example, proxy costs, solicitation costs, and costs to promote the transaction to shareholders); or

(vi) Conveying property between the parties to the transaction (for example, transfer taxes and title registration costs).

(3) *Covered transactions.* For purposes of this paragraph (e), the term *covered transaction* means the following transactions:

(i) A taxable acquisition by the taxpayer of assets that constitute a trade or business.

(ii) A taxable acquisition of an ownership interest in a business entity (whether the taxpayer is the acquirer in the acquisition or the target of the acquisition) if, immediately after the acquisition, the acquirer and the target are related within the meaning of section 267(b) or 707(b).

(iii) A reorganization described in section 368(a)(1)(A), (B), or (C) or a reorganization described in section 368(a)(1)(D) in which stock or securities of the corporation to which the assets are transferred are distributed in a transaction which qualifies under section 354 or 356 (whether the taxpayer is the acquirer or the target in the reorganization).

(f) *Documentation of success-based fees*—An amount paid that is contingent on the successful closing of a transaction described in paragraph (a) of this section is an amount paid to facilitate the transaction except to the extent the taxpayer maintains sufficient documentation to establish that a portion of the fee is allocable to activities that do not facilitate the transaction. This documentation must be completed on or before the due date of the taxpayer's timely filed original federal income tax return (including extensions) for the taxable year during which the transaction closes. For purposes of this paragraph (f), documentation must consist of more than merely an allocation between activities that facilitate the transaction and activities that do not facilitate the transaction, and must consist of supporting records (for example, time records, itemized invoices, or other records) that identify—

(1) The various activities performed by the service provider;

(2) The amount of the fee (or percentage of time) that is allocable to each of the various activities performed;

(3) Where the date the activity was performed is relevant to understanding whether the activity facilitated the transaction, the amount of the fee (or percentage of time) that is allocable to the performance of that activity before and after the relevant date; and

(4) The name, business address, and business telephone number of the service provider.

(g) *Treatment of capitalized costs*—(1) *Tax-free acquisitive transactions*. [Reserved]

(2) *Taxable acquisitive transactions*—(i) *Acquirer*. In the case of an acquisition, merger, or consolidation that is not described in section 368, an amount required to be capitalized under this section by the acquirer is added to the basis of the acquired assets (in the case of a transaction that is treated as an acquisition of the assets of the target for federal income tax purposes) or the acquired stock (in the case of a transaction that is treated as an acquisition of the stock of the target for federal income tax purposes).

(ii) *Target*—(A) *Asset acquisition*. In the case of an acquisition, merger, or consolidation that is not described in section 368 and that is treated as an acquisition of the assets of the target for federal income tax purposes, an amount required to be capitalized under this section by the target is treated as a reduction of the target's amount realized on the disposition of its assets.

(B) *Stock acquisition*. [Reserved]

(3) *Stock issuance transactions*. [Reserved]

(4) *Borrowings*. For the treatment of amounts required to be capitalized under this section with respect to a borrowing, see § 1.446–5.

(5) *Treatment of capitalized amounts by option writer*. An amount required to be capitalized by an option writer under paragraph (a)(10) of this section is not currently deductible under section 162 or 212. Instead, the amount required to be capitalized generally reduces the total premium received by the option writer. However, other provisions of law may limit the reduction of the premium by the capitalized amount (for example, if the capitalized amount is never deductible by the option writer).

(h) *Application to accrual method taxpayers*. For purposes of this section, the terms *amount paid* and *payment* mean, in the case of a taxpayer using an accrual method of accounting, a liability incurred (within the meaning of § 1.446–1(c)(1)(ii)). A liability may not be taken into account under this section prior to the taxable year during which the liability is incurred.

(i) [Reserved]

(j) *Coordination with other provisions of the Internal Revenue Code.* Nothing in this section changes the treatment of an amount that is specifically provided for under any other provision of the Internal Revenue Code (other than section 162(a) or 212) or regulations thereunder.

(k) *Treatment of indirect payments.* For purposes of this section, references to an amount paid to or by a party include an amount paid on behalf of that party.

(l) *Examples.* The following examples illustrate the rules of this section:

Example 1. Costs to facilitate. Q corporation pays its outside counsel $20,000 to assist Q in registering its stock with the Securities and Exchange Commission. Q is not a regulated investment company within the meaning of section 851. Q's payments to its outside counsel are amounts paid to facilitate the issuance of stock. Accordingly, Q must capitalize its $20,000 payment under paragraph (a)(8) of this section (whether incurred before or after the issuance of the stock and whether or not the registration is productive of equity capital).

Example 2. Costs to facilitate. Q corporation seeks to acquire all of the outstanding stock of Y corporation. To finance the acquisition, Q must issue new debt. Q pays an investment banker $25,000 to market the debt to the public and pays its outside counsel $10,000 to prepare the offering documents for the debt. Q's payment of $35,000 facilitates a borrowing and must be capitalized under paragraph (a)(9) of this section. As provided in paragraph (c)(1) of this section, Q's payment does not facilitate the acquisition of Y, notwithstanding the fact that Q incurred the new debt to finance its acquisition of Y. See §1.446–5 for the treatment of Q's capitalized payment.

Example 3. Costs to facilitate. (i) Z agrees to pay investment banker B $1,000,000 for B's services in evaluating four alternative transactions ($250,000 for each alternative): An initial public offering; a borrowing of funds; an acquisition by Z of a competitor; and an acquisition of Z by a competitor. Z eventually decides to pursue a borrowing and abandons the other options.

(ii) The $250,000 payment to evaluate the possibility of a borrowing is an amount paid in the process of investigating or otherwise pursuing a transaction described in paragraph (a)(9) of this section. Accordingly Z must capitalize that $250,000 payment to B. See §1.446–5 for the treatment of Z's capitalized payment.

(iii) The $250,000 payment to evaluate the possibility of an initial public offering is an amount paid in the process of investigating or otherwise pursuing a transaction described in paragraph (a)(8) of this section. Accordingly, Z must capitalize that $250,000 payment to B under this section. Because the borrowing and the initial public offering are not mutually exclusive transactions, the $250,000 is not treated as an amount paid to facilitate the borrowing. When Z abandons the initial public offering, Z may recover under section 165 the $250,000 paid to facilitate the initial public offering.

(iv) The $500,000 paid by Z to evaluate the possibilities of an acquisition of Z by a competitor and an acquisition of a competitor by Z are amounts paid in the process of investigating or otherwise pursuing transactions described in paragraphs (a) and (e)(3) of this section. Accordingly, Z is only required to capitalize under this section the portion of the $500,000 payment that relates to inherently facilitative activities under paragraph (e)(2) of this section or to activities performed on or after the date determined under paragraph (e)(1) of this section. Because the borrowing and the possible acquisitions are not mutually exclusive transactions, no portion of the $500,000 is treated as an amount paid to facilitate the borrowing. When Z abandons the acquisition transactions, Z may recover under section 165 any portion of the $500,000 that was paid to facilitate the acquisitions.

Example 4. Corporate acquisition. (i) On February 1, 2005, R corporation decides to investigate the acquisition of three potential targets: T corporation, U corporation, and V corporation. R's consideration of T, U, and V represents the consideration of three distinct transactions, any or all of which R might consummate and has the financial ability to consummate. On March 1, 2005, R enters into an exclusivity agreement with T and stops pursuing U and V. On July 1, 2005, R acquires all of the stock of T in a transaction described in section 368. R pays $1,000,000 to an investment banker and $50,000 to its outside counsel to conduct due diligence on T, U, and V; determine the value of T, U, and V; negotiate and structure the transaction with T; draft the merger agreement; secure shareholder approval; prepare SEC filings; and obtain the necessary regulatory approvals.

(ii) Under paragraph (e)(1) of this section, the amounts paid to conduct due diligence on T, U and V prior to March 1, 2005 (the date of the exclusivity agreement) are not amounts paid to facilitate the acquisition of the stock of T, U or V and are not required to be capitalized under this section. However, the amounts paid to conduct due diligence on T on and after March 1, 2005, are amounts paid to facilitate the acquisition of the stock of T and must be capitalized under paragraph (a)(2) of this section.

(iii) Under paragraph (e)(2) of this section, the amounts paid to determine the value of T, negotiate and structure the transaction with T, draft the merger agreement, secure shareholder approval, prepare SEC filings, and obtain necessary regulatory approvals are inherently facilitative amounts paid to facilitate the acquisition of the stock of T and must be capitalized, regardless of whether those activities occur prior to, on, or after March 1, 2005.

(iv) Under paragraph (e)(2) of this section, the amounts paid to determine the value of U and V are inherently facilitative amounts paid to facilitate the acquisition of U or V and must be capitalized. Because the acquisition of U, V, and T are not mutually exclusive transactions, the costs that facilitate the acquisition of U and V do not facilitate the acquisition of T. Accordingly, the amounts paid to determine the value of U and V may be recovered under section 165 in the taxable year that R abandons the planned mergers with U and V.

Example 5. Corporate acquisition; employee bonus. Assume the same facts as in *Example 4*, except R pays a bonus of $10,000 to one of its corporate officers who negotiated the acquisition of T. As provided by paragraph (d)(1) of this section, Y is not required to capitalize any portion of the bonus paid to the corporate officer.

Example 6. Corporate acquisition; integration costs. Assume the same facts as in *Example 4*, except that, before and after the acquisition is consummated, R incurs costs to relocate personnel and equipment, provide severance benefits to terminated employees, integrate records and information systems, prepare new financial statements for the combined entity, and reduce redundancies in the combined business operations. Under paragraph (c)(6) of this section, these costs do not facilitate the acquisition of T. Accordingly, R is not required to capitalize any of these costs under this section.

Example 7. Corporate acquisition; compensation to target's employees. Assume the same facts as in *Example 4*, except that, prior to the acquisition, certain employees of T held unexercised options issued pursuant to T's stock option plan. These options granted the employees the right to purchase T stock at a fixed option price. The options did not have a readily ascertainable value (within the meaning of §1.83–7(b)), and thus no amount was included in the employees' income when the options were granted. As a condition of the acquisition, T is required to terminate its stock option plan. T therefore agrees to pay its employees who hold unexercised stock options the difference between the option price and the current value of T's stock in consideration of their agreement to cancel their unexercised options. Under paragraph (d)(1) of this section, T is not required to capitalize the amounts paid to its employees. See section 83 for the treatment of amounts received in cancellation of stock options.

Example 8. Asset acquisition; employee compensation. N corporation owns tangible and intangible assets that constitute a trade or business. M corporation purchases all the assets of N in a taxable transaction. Under paragraph (a)(1) of this section, M must capitalize amounts paid to facilitate the acquisition of the assets of N. Under paragraph (d)(1) of this section, no portion of the salaries of M's employees who work on the acquisition are treated as facilitating the transaction.

Example 9. Corporate acquisition; retainer. Y corporation's outside counsel charges Y $60,000 for services rendered in facilitating the friendly acquisition of the stock of Y corporation by X corporation. Y has an agreement with its outside counsel under which Y pays an annual retainer of $50,000. Y's outside counsel has the right to offset amounts billed for any legal services rendered against the annual retainer. Pursuant to this agreement, Y's outside counsel offsets $50,000 of the legal fees from the acquisition against the retainer and bills Y for the balance of $10,000. The $60,000 legal fee is an amount paid to facilitate the acquisition of an ownership interest in Y as described in paragraph (a)(3) of this section. Y must capitalize the full amount of the $60,000 legal fee.

Example 10. Corporate acquisition; antitrust defense costs. On March 1, 2005, V corporation enters into an agreement with X corporation to acquire all of the outstanding stock of X. On April 1, 2005, federal and state regulators file suit against V to prevent the acquisition of X on the ground that the acquisition violates antitrust laws. V enters into a consent agreement with regulators on May 1, 2005, that allows the acquisition to proceed, but requires V to hold separate the business operations of X pending the outcome of the antitrust suit and subjects V to possible divestiture. V acquires title to all of the outstanding stock of X on June 1, 2005. After June 1, 2005, the regulators pursue antitrust litigation against V seeking rescission of the acquisition. V pays $50,000 to its outside counsel for services rendered after June 1, 2005, to defend against the antitrust litigation. V ultimately prevails in the antitrust litigation. V's costs to defend the antitrust litigation are costs to facilitate its acquisition of the stock of X under paragraph (a)(2) of this section and must be capitalized. Although title to the shares of X passed to V prior to the date V incurred costs to defend the antitrust litigation, the amounts paid by V are paid in the process of pursuing the acquisition of the stock of X because the acquisition was not complete until the antitrust litigation was ultimately resolved. V must capitalize the $50,000 in legal fees.

Example 11. Corporate acquisition; defensive measures. (i) On January 15, 2005, Y corporation, a publicly traded corporation, becomes the target of a hostile takeover attempt by Z corporation. In an effort to defend against the takeover, Y pays legal fees to seek an injunction against the takeover and investment banking fees to locate a potential "white knight" acquirer. Y also pays amounts to complete a defensive recapitalization, and pays $50,000 to an investment banker for a fairness opinion regarding Z's initial offer. Y's efforts to enjoin the takeover and locate a white knight acquirer are unsuccessful, and on March 15, 2005, Y's board of directors decides to abandon its defense against the takeover and negotiate with Z in an effort to obtain the highest possible price for its shareholders. After Y abandons its defense against the takeover, Y pays an investment banker $1,000,000 for a second fairness opinion and for services rendered in negotiating with Z.

(ii) The legal fees paid by Y to seek an injunction against the takeover are not amounts paid in the process of investigating or otherwise pursuing the transaction with Z. Accordingly, these legal fees are not required to be capitalized under this section.

(iii) The investment banking fees paid to search for a white knight acquirer do not facilitate an acquisition of Y by a white knight because none of Y's costs with respect to a white knight were inherently facilitative amounts and because Y did not reach the date described in paragraph (e)(1) of this section with respect to a white knight. Accordingly, these amounts are not required to be capitalized under this section.

(iv) The amounts paid by Y to investigate and complete the recapitalization must be capitalized under paragraph (a)(4) of this section.

(v) The $50,000 paid to the investment bankers for a fairness opinion during Y's defense against the takeover and the $1,000,000 paid to the investment bankers after Y abandons its defense against the takeover are inherently facilitative amounts with respect to the transaction with Z and must be capitalized under paragraph (a)(3) of this section.

Example 12. Corporate acquisition; acquisition by white knight. (i) Assume the same facts as in *Example 11*, except that Y's investment bankers identify three potential white knight acquirers: U corporation, V corporation, and W corporation. Y pays its investment bankers to conduct due diligence on the three potential white knight acquirers. On March 15, 2005, Y's board of directors approves a tentative acquisition agreement under which W agrees to acquire all of the stock of Y, and the investment bankers stop due diligence on U and V. On June 15, 2005, W acquires all of the stock of Y.

(ii) Under paragraph (e)(1) of this section, the amounts paid to conduct due diligence on U, V, and W prior to March 15, 2005 (the date of board of directors' approval) are not amounts paid to facilitate the acquisition of the stock of Y and are not required to be capitalized under this section. However, the amounts paid to conduct due diligence on W on and after March 15, 2005, facilitate the acquisition of the stock of Y and are required to be capitalized.

Example 13. Corporate acquisition; mutually exclusive costs. (i) Assume the same facts as in *Example 11*, except that Y's investment banker finds W, a white knight. Y and W execute a letter of intent on March 10, 2005. Under the terms of the letter of intent, Y must pay W a $10,000,000 break-up fee if the merger with W does not occur. On April 1, 2005, Z significantly increases the amount of its offer, and Y decides to accept Z's offer instead of merging with W. Y pays its investment banker $500,000 for inherently facilitative costs with respect to the potential merger with W. Y also pays its investment banker $2,000,000 for due diligence costs with respect to the potential merger with W, $1,000,000 of which relates to services performed on or after March 10, 2005.

(ii) Y's $500,000 payment for inherently facilitative costs and Y's $1,000,000 payment for due diligence activities performed on or after March 10, 2005 (the date the letter of intent with W is entered into) facilitate the potential merger with W. Because Y could not merge with both W and Z, under paragraph (c)(8) of this section the $500,000 and $1,000,000 payments also facilitate the transaction between Y and Z. Accordingly, Y must capitalize the $500,000 and $1,000,000 payments as amounts that facilitate the transaction with Z.

(iii) Similarly, because Y could not merge with both W and Z, under paragraph (c)(8) of this section the $10,000,000 termination payment facilitates the transaction between Y and Z. Accordingly, Y must capitalize the $10,000,000 termination payment as an amount that facilitates the transaction with Z.

Example 14. Break-up fee; transactions not mutually exclusive. N corporation and U corporation enter into an agreement under which U would acquire all the stock or all the assets of N in exchange for U stock. Under the terms of the agreement, if either party terminates the agreement, the terminating party must pay the other party $10,000,000. U decides to terminate the agreement and pays N $10,000,000. Shortly thereafter, U acquires all the stock of V corporation, a competitor of N. U had the financial resources to have acquired both N and V. U's $10,000,000 payment does not facilitate U's acquisition of V. Accordingly, U is not required to capitalize the $10,000,000 payment under this section.

Example 15. Corporate reorganization; initial public offering. Y corporation is a closely held corporation. Y's board of directors authorizes an initial public offering of Y's stock to fund future growth. Y pays $5,000,000 in professional fees for investment banking services related to the determination of the offering price and legal services related to the development of the offering prospectus and the registration and issuance of stock. The investment banking and legal services are performed both before and after board authorization. Under paragraph (a)(8) of this section, the $5,000,000 is an amount paid to facilitate a stock issuance.

Example 16. Auction. (i) N corporation seeks to dispose of all of the stock of its wholly owned subsidiary, P corporation, through an auction process and requests that each bidder submit a non-binding purchase offer in the form of a draft agreement. Q corporation hires an investment banker to assist in the preparation of Q's bid to acquire P and to conduct a due diligence investigation of P. On July 1, 2005, Q submits its draft agreement. On August 1, 2005, N informs Q that it has accepted Q's offer, and presents Q with a signed letter of intent to sell all of the stock of P to Q. On August 5, 2005, Q's board of directors approves the terms of the transaction and authorizes Q to execute the letter of intent. Q executes a binding letter of intent with N on August 6, 2005.

(ii) Under paragraph (e)(1) of this section, the amounts paid by Q to its investment banker that are not inherently facilitative and that are paid for activities performed prior to August 5, 2005 (the date Q's board of directors approves the transaction) are not amounts paid to facilitate the acquisition of P. Amounts paid by Q to its investment banker for activities performed on or after August 5, 2005, and amounts paid by Q to its investment banker that are inherently facilitative amounts within the meaning of paragraph (e)(2) of this section are required to be capitalized under this section.

Example 17. Stock distribution. Z corporation distributes natural gas throughout state Y. The federal government brings an antitrust action against Z seeking divestiture of certain of Z's natural gas distribution assets. As a result of a court ordered divestiture, Z and the federal government agree to a plan of divestiture that requires Z to organize a subsidiary to receive the divested assets and to distribute the stock of the subsidiary to its shareholders. During 2005, Z pays $300,000 to various independent contractors for the following services: studying customer demand in the area to be served by the divested assets, identifying assets to be transferred to the subsidiary, organizing the subsidiary, structuring the transfer of assets to the subsidiary to qualify as a tax-free transaction to Z, and distributing the stock of the subsidiary to the stockholders. Under paragraph (c)(3) of this section, Z is not required to capitalize any portion of the $300,000 payments.

Example 18. Bankruptcy reorganization. (i) X corporation is the defendant in numerous lawsuits alleging tort liability based on X's role in manufacturing certain defective products. X files a petition for reorganization under Chapter 11 of the Bankruptcy Code in an effort to manage all of the lawsuits in a single proceeding. X pays its outside counsel to prepare the petition and plan of reorganization, to analyze adequate protection under the plan, to attend hearings before the Bankruptcy Court concerning the plan, and to defend against motions by creditors and tort claimants to strike the taxpayer's plan.

(ii) X's reorganization under Chapter 11 of the Bankruptcy Code is a reorganization within the meaning of paragraph (a)(4) of this section. Under paragraph (c)(4) of this section, amounts paid by X to its outside counsel to prepare, analyze or obtain approval of the portion of X's plan of reorganization that resolves X's tort liability do not facilitate the reorganization and are not required to be capitalized, provided that such amounts would have been treated as ordinary and necessary business expenses under section 162 had the bankruptcy proceeding not been instituted. All other amounts paid by X to its outside counsel for the services described above (including all amounts paid to prepare the bankruptcy petition) facilitate the reorganization and must be capitalized.

(m) *Effective date.* This section applies to amounts paid or incurred on or after December 31, 2003.

(n) *Accounting method changes*—(1) *In general.* A taxpayer seeking to change a method of accounting to comply with this section must secure the consent of the Commissioner in accordance with the requirements of §1.446–1(e). For the taxpayer's first taxable year ending on or after December 31, 2003, the taxpayer is granted the consent of the Commissioner to change its method of accounting to comply with this section, provided the taxpayer follows the administrative procedures issued under §1.446–1(e)(3)(ii) for obtaining the Commissioner's automatic consent to a change in accounting method (for further guidance, for example, see Rev. Proc. 2002–9 (2002–1 C.B. 327) and §601.601(d)(2)(ii)(*b*) of this chapter).

(2) *Scope limitations.* Any limitations on obtaining the automatic consent of the Commissioner do not apply to a taxpayer seeking to change to a method of accounting to comply with this section for its first taxable year ending on or after December 31, 2003.

(3) *Section 481(a) adjustment*. The section 481(a) adjustment for a change in method of accounting to comply with this section for a taxpayer's first taxable year ending on or after December 31, 2003 is determined by taking into account only amounts paid or incurred in taxable years ending on or after January 24, 2002.

[T.D. 9107, 69 FR 446, Jan. 5, 2004]

§ 1.263(a)–6 Election to deduct or capitalize certain expenditures.

(a) *In general*. Under certain provisions of the Internal Revenue Code (Code), taxpayers may elect to treat capital expenditures as deductible expenses or as deferred expenses, or to treat deductible expenses as capital expenditures.

(b) *Election provisions*. The sections referred to in paragraph (a) of this section include:

(1) Section 173 (circulation expenditures);

(2) Section 174 (research and experimental expenditures);

(3) Section 175 (soil and water conservation expenditures; endangered species recovery expenditures);

(4) Section 179 (election to expense certain depreciable business assets);

(5) Section 179A (deduction for cleanfuel vehicles and certain refueling property);

(6) Section 179B (deduction for capital costs incurred in complying with environmental protection agency sulfur regulations);

(7) Section 179C (election to expense certain refineries);

(8) Section 179D (energy efficient commercial buildings deduction);

(9) Section 179E (election to expense advanced mine safety equipment);

(10) Section 180 (expenditures by farmers for fertilizer);

(11) Section 181 (treatment of certain qualified film and television productions);

(12) Section 190 (expenditures to remove architectural and transportation barriers to the handicapped and elderly);

(13) Section 193 (tertiary injectants);

(14) Section 194 (treatment of reforestation expenditures);

(15) Section 195 (start-up expenditures);

(16) Section 198 (expensing of environmental remediation costs);

(17) Section 198A (expensing of qualified disaster expenses);

(18) Section 248 (organization expenditures of a corporation);

(19) Section 266 (carrying charges);

(20) Section 616 (development expenditures); and

(21) Section 709 (organization and syndication fees of a partnership).

(c) *Effective/applicability date*—(1) *In general*. This section applies to taxable years beginning on or after January 1, 2014. Except as provided in paragraphs (c)(2) and (c)(3) of this section, §1.263(a)–3 as contained in 26 CFR part 1 edition revised as of April 1, 2011, applies to taxable years beginning before January 1, 2014. For the effective dates of the enumerated election provisions, see those Code sections and the regulations under those sections.

(2) *Early application of this section*. A taxpayer may choose to apply this section to taxable years beginning on or after January 1, 2012.

(3) *Optional application of TD 9564*. A taxpayer may choose to apply §1.263(a)–6T as contained in TD 9564 (76 FR 81060) December 27, 2011, to taxable years beginning on or after January 1, 2012, and before January 1, 2014.

[T.D. 9636, 78 FR 57745, Sept. 19, 2013]

§ 1.263(b)–1 Expenditures for advertising or promotion of good will.

See §1.162–14 for the rules applicable to a corporation which has elected to capitalize expenditures for advertising or the promotion of good will under the provisions of section 733 or section 451 of the Internal Revenue Code of 1939, in computing its excess profits tax credit under Subchapter E, Chapter 2, or Subchapter D, Chapter 1, of the Internal Revenue Code of 1939.

§ 1.263(c)–1 Intangible drilling and development costs in the case of oil and gas wells.

For rules relating to the option to deduct as expenses intangible drilling and development costs in the case of oil and gas wells, see §1.612–4.

§ 1.263(e)–1 Expenditures in connection with certain railroad rolling stock.

(a) *Allowance of deduction*—(1) *Election*. Under section 263(e), for any taxable year beginning after December 31, 1969, a taxpayer may elect to treat certain expenditures paid or incurred during such taxable year as deductible repairs under section 162 or 212. This election applies only to expenditures described in paragraph (c) of this section in connection with the rehabilitation of a unit of railroad rolling stock (as defined in paragraph (b)(2) of this section) used by a domestic common carrier by railroad (as defined in paragraph (b) (3) and (4) of this section). However, an election under section 263(e) may not be made with respect to expenditures in connection with any unit of railroad rolling stock for which an election under section 263(f) and the regulations thereunder is in effect. An election made under section 263(e) is an annual election which may be made with respect to one or more of the units of railroad rolling stock owned by the taxpayer.

(2) *Special 20 percent rule*. Section 263(e) shall not apply if, under paragraph (d) of this section, expenditures paid or incurred during any period of 12 calendar months in connection with the rehabilitation of a unit exceed 20 percent of the basis (as defined in paragraph (b)(1) of this section) of such unit in the hands of the taxpayer. However, section 263(e) does not constitute a limit on the deduction of expenditures for repairs which are deductible without regard to such section. Accordingly, amounts otherwise deductible as repairs will continue to be deductible even though such amounts exceed 20 percent of the basis of the unit of railroad rolling stock in the hands of the taxpayer.

(3) *Time and manner of making election*. (i) An election by a taxpayer under section 263(e) shall be made by a statement to that effect attached to its income tax return or amended income tax return for the taxable year for which the election is made if such return or amended return is filed no later than the time prescribed by law (including extensions thereof) for filing the return for the taxable year of election. An election under section 263(e) may be made with respect to one or more of the units of railroad rolling stock owned by the taxpayer. If an election is not made within the time and in the manner prescribed in this subparagraph, no election may be made (by the filing of an amended return or in any other manner) with respect to the taxable year.

(ii) If the taxpayer has filed a return on or before March 14, 1973, and has claimed a deduction under section 162 or 212 by reason of section 263(e), and if the taxpayer does not desire to make an election under section 263(e) for the taxable year with respect to which such return was filed, the taxpayer shall file an amended return for such taxable year on or before May 14, 1973, and shall pay any additional tax due for such year. The taxpayer shall also file an amended return for each taxable year which is affected by the filing of an amended return under the preceding sentence and shall pay any additional tax due for such year. Nothing in this subdivision shall be construed as extending the time specified in section 6511 within which a claim for credit or refund may be filed.

(iii) If an election under section 263(e) was not made at the time the return for a taxable year was filed, and it is subsequently determined that an expenditure was erroneously treated as an expenditure which was not in connection with rehabilitation (as determined under paragraph (c) of this section), an election under section 263(e) may be made with respect to the unit of railroad rolling stock for which such expenditure was made for such taxable year, notwithstanding any provision in this subparagraph (3) to the contrary. Nothing in this subdivision shall be construed as extending the time specified in section 6511 within which a claim for credit or refund may be filed.

(iv) The statement required by subdivision (i) of this subparagraph shall include the following information:

(*a*) The total number of units of railroad rolling stock with respect to which an election is being made under section 263(e).

(*b*) The aggregate basis (as defined in paragraph (b) (1) of this section) of the units described in (a) of this subdivision (iv), and

(*c*) The total deduction being claimed under section 263(e) for the taxable year.

(b) *Definitions*—(1) *Basis.* (i) In general, for purposes of section 263(e) the basis of a unit of railroad rolling stock shall be the adjusted basis of such unit determined without regard to the adjustments provided in paragraphs (1), (2), and (3) of section 1016(a) and section 1017. Thus, the basis of property would generally be its cost without regard to adjustments to basis such as for depreciation or for capital improvements. If the basis of a unit in the hands of a transferee is determined in whole or in part by reference to its basis in the hands of the transferor, for example, by reason of the application of section 362 (relating to basis to corporations), 374 (relating to gain or loss not recognized in certain railroad reorganizations), or 723 (relating to the basis of property contributed to a partnership), then the basis of such unit in the hands of the transferor for purposes of section 263(e) shall be its basis for purposes of section 263(e) in the hands of the transferee. Similarly, when the basis of a unit of railroad rolling stock in the hands of the taxpayer is determined in whole or in part by reference to the basis of another unit, for example, by reason of the application of the first sentence of section 1033(c) (relating to involuntary conversions), then the basis of the latter unit for purposes of section 263(e) shall be the basis for purposes of section 263(e) of the former unit. The question whether a capital expenditure in connection with a unit of railroad rolling stock results in the retirement of such unit and the creation of another unit of railroad rolling stock shall be determined without regard to rules under the uniform system of accounts prescribed by the Interstate Commerce Commission.

(ii) For example, if a unit of railroad rolling stock has a cost to M of $10,000 and because of depreciation adjustments of $4,000 and capital expenditures of $3,000, such unit has an adjusted basis in the hands of M of $9,000, the basis for purposes of section 263(e) of such unit in the hands of M is $10,000. Further, if M transfers such unit to N in a transaction in which no gain or loss is recognized such as, for example, a transaction to which section 351(a) (relating to a transfer to a corporation controlled by the transferor) applies, the basis of such unit for purposes of section 263(e) is $10,000 in the hands of N.

(2) *Railroad rolling stock.* For purposes of this section, the term *unit* or *unit of railroad rolling stock* means a unit of transportation equipment the expenditures for which are of a type chargeable (or in the case of property leased to a domestic common carrier by railroad, would be chargeable) to the equipment investment accounts in the uniform system of accounts for railroad companies prescribed by the Interstate Commerce Commission (49 CFR Part 1201), but only if (i) such unit exclusively moves on, moves under, or is guided by rail, and (ii) such unit is not a locomotive. Thus, for example, a unit of railroad rolling stock includes a box car, a gondola car, a passenger car, a car designed to carry truck trailers and containerized freight, a wreck crane, and a bunk car. However, such term does not include equipment which does not exclusively move on, move under, or is not exclusively guided by rail such as, for example, a barge, a tugboat, a container which is used on cars designed to carry containerized freight, a truck trailer, or an automobile. A locomotive is self-propelled equipment, the sole function of which is to push or pull railroad rolling stock. Thus, a self-propelled passenger or freight car is not a locomotive.

(3) *Domestic common carrier by railroad.* The term *domestic common carrier by railroad* means a railroad subject to regulation under Part I of the Interstate Commerce Act (49 U.S.C. 1 *et seq.*) or a railroad which would be subject to regulation under Part I of the Interstate Commerce Act if it were engaged in interstate commerce.

(4) *Use.* For purposes of this section, a unit of railroad rolling stock is not used by a domestic common carrier by railroad if it is owned by a person other than a domestic common carrier by railroad and (i) is exclusively used for transportation by the owner or (ii) is exclusively used for transportation by another person which is not a domestic

common carrier by railroad. Thus, for example, a unit of railroad rolling stock which is owned by a person which is not a domestic common carrier by railroad and is leased to a manufacturing company by the owner is not a unit of railroad rolling stock used by a domestic common carrier by railroad.

(c) *Expenditures considered in connection with rehabilitation.* For purposes of section 263(e) and this section all expenditures which would be properly chargeable to capital account but for the application of section 263 (e) or (f) shall be considered to be expenditures in connection with the rehabilitation of a unit of railroad rolling stock. Expenditures which are paid or incurred in connection with incidental repairs or maintenance of a unit of railroad rolling stock and which are deductible without regard to section 263 (e) or (f) shall not be included in any determination or computation under section 263(e) and shall not be treated as paid or incurred in connection with the rehabilitation of a unit of railroad rolling stock for purposes of section 263(e). The determination of whether an item would be, but for section 263 (e) or (f), properly chargeable to capital account shall be made in a manner consistent with the principles for classification of expenditures as between capital and expenses under the Internal Revenue Code. See, for example, §§ 1.162–4, 1.263(a)–1, 1.263(a)–2, and paragraph (a)(4) (ii) and (iii) of § 1.446–1. An expenditure shall be classified as capital or as expense without regard to its classification under the uniform system of accounts prescribed by the Interstate Commerce Commission.

(d) *20-percent limitation*—(1) *In general.* No expenditures in connection with the rehabilitation of a unit of railroad rolling stock shall be treated as a deductible repair by reason of an election under section 263(e) if, during any period of 12 calendar months in which the month the expenditure is included falls, all such expenditures exceed an amount equal to 20 percent of the basis (as defined in paragraph (b)(1) of this section) of such unit in the hands of the taxpayer. All such expenditures shall be included in the computation of the 20-percent limitation even if such expenditures were deducted under section 263(f) in either the preceding or succeeding taxable year. Solely for purposes of the 20-percent limitation in this paragraph, such expenditures shall be deemed to be included in the month in which a rehabilitation of the unit of railroad rolling stock is completed. For the requirement that expenditures treated as repairs solely by reason of an election under section 263(e) be deducted in the taxable year paid or incurred, see paragraph (a) of this section.

(2) *12-month period.* For purposes of this section, any period of 12 calendar months shall consist of any 12 consecutive calendar months except that calendar months prior to the calendar month of January 1970 shall not be included in determining such period.

(3) *Period for certain corporate acquisitions.* If a unit of railroad rolling stock to which section 263(e) applies is sold, exchanged, or otherwise disposed of in a transaction in which its basis in the hands of the transferee is determined in whole or in part by reference to its basis in the hands of the transferor (see paragraph (b)(1) of this section), calendar months during which such unit is in the hands of the transferor and in the hands of such transferee shall both be included in the calendar months used by the transferor and the transferee to determine any period of 12 calendar months for purposes of section 263(e).

(4) *Deduction allowed in year paid or incurred.* If, based on the information available when the income tax return for a taxable year is filed, an expenditure paid or incurred in such taxable year would be deductible by reason of the application of section 263(e) but for the fact that it cannot be established whether the 20-percent limitation in subparagraph (1) of this paragraph will be exceeded, the expenditure shall be deducted for such taxable year. If by reason of the application of such 20-percent limitation it is subsequently determined that such expenditure is not deductible as a repair, an amended return shall be filed for the year in which such deduction was treated as a deductible repair and additional tax, if any, for such year shall be paid. Appropriate adjustment with respect to the

taxpayer's tax liability for any other affected year shall be made. Nothing in this subparagraph shall be construed as extending the time specified in section 6511 within which a claim for credit or refund may be filed.

(e) *Recordkeeping requirements*—(1) *In general.* Such records as will enable the accurate determination of the expenditures which may be subject to the treatment provided in section 263(e) shall be maintained. No deduction shall be allowed under section 162 or 212 by reason of section 263(e) with respect to a unit unless the taxpayer substantiates by adequate records that expenditures in connection with such unit of railroad rolling stock meet the requirements and limitations of this section.

(2) *Separate records.* A separate section 263(e) record shall be maintained for each unit with respect to which an election under section 263(e) is made. Such record shall:

(i) Identify the unit,

(ii) State the basis (as defined in paragraph (b)(1) of this section) and the date of acquisition of the unit,

(iii) Enumerate for each unit the amount of all expenditures incurred in connection with rehabilitation of such unit which would, but for section 263 (e) or (f), be properly chargeable to capital account (including expenditures incurred by the taxpayer in connection with rehabilitation of such unit undertaken by a person other than the taxpayer) regardless of whether such expenditures during any 12-month period exceed 20 percent of the basis of such unit,

(iv) Describe the nature of the work in connection with each expenditure, and

(v) Specify the calendar month in which the rehabilitation is completed and the taxable year in which each expenditure is paid or incurred.

A section 263(e) record need only be prepared for a unit of railroad rolling stock for the period beginning on the first day of the eleventh calendar month immediately preceding the month in which the rehabilitation of such unit is completed and ending on the last day of the eleventh calendar month immediately succeeding such month. No section 263(e) record need be prepared for calendar months before January 1970.

(3) *Records for certain expenditures:* Expenditures determined to be incidental repairs and maintenance (referred to in paragraph (c) of this section) shall not be entered in the section 263(e) record. However, each taxpayer shall maintain records to reflect that such expenditures are properly deductible.

(4) *Convenience rule.* In general, expenditures and information maintained in compliance with subparagraphs (1) and (2) of this paragraph shall be recorded in the section 263(e) record of the specific unit with respect to which such expenditures are incurred. However, when a group of units of the same type are rehabilitated in a single project and the expenditure for each unit in the project will approximate the average expenditure per unit for the project, expenditures for the project may be aggregated without regard to the unit in the project with respect to which each expenditure is connected, and an amount equal to the aggregate expenditures for the project divided by the number of units in the project may be entered in the section 263(e) account of each unit in the project.

(f) *Examples.* The provisions of this section may be illustrated by the following examples:

Example 1. M Corporation, a domestic common carrier by railroad, uses the calendar year as its taxable year. M owns and uses several gondola cars to which an election under section 263(e) applies for its taxable years 1970–1972. Gondola car No.1 has a basis (defined in paragraph (b)(1) of this section) of $10,000. No expenditures properly chargeable to the section 263(e) record are made on gondola car No. 1 in 1970 and 1971, except in January 1971. In January 1971, M at a cost of $1,500 performed rehabilitation work on gondola car No. 1. Such amount was properly entered in the section 263(e) record for gondola car No.1. Since the expenditures in such record do not exceed an amount equal to 20 percent of the basis of gondola car No. 1 ($2,000) during any period of 12 calendar months in which January 1971 falls, the expenditures during January 1971 shall be treated as a deductible expense regardless of what the treatment would have been if section 263(e) had not been enacted.

Example 2. Assume the same facts as in *Example 1.* Assume further that for 1970, 1971, and 1972, only the following expenditures in connection with rehabilitation which would, but for section 263(e), be properly chargeable to capital account were deemed included for gondola car No. 2:

(a) December 1970	$1,500
(b) November 1971	600
(c) December 1971	400
(d) January 1972	1,050

Assume further that gondola car No. 2 has a basis (as defined in paragraph (b) (1) of this section) equal to $10,000, that M files its tax return by September 15 following each taxable year, and that each rehabilitation was completed in the month in which expenditures in connection with it were incurred. Any expenditures in connection with each gondola car (No. 1 or No. 2) have no effect on the treatment of expenditures in connection with the other gondola car. With respect to gondola car No. 2, the expenditures of December 1970 are treated as deductible repairs at the time M's income tax return for 1970 is filed because, based on the information available when the income tax return for 1970 is filed, such expenditure would be deductible by reason of application of section 263(e) but for the fact that it cannot be established whether the 20-percent limitation in paragraph (d)(1) of this section will be exceeded. Nevertheless, because such expenditures during the period of 12 calendar months including calendar months December 1970 and November 1971 exceed $2,000, the December 1970 rehabilitation expenditures are not subject to the provisions of section 263(e). Because such rehabilitation expenditures during the period of 12 calendar months including calendar months February 1971 and January 1972 exceed $2,000, rehabilitation expenditures in 1971 are not subject to the provisions of section 263(e). Similarly, the 1972 rehabilitation expenditures are not subject to the provisions of section 263(e).

[T.D. 7257, 38 FR 4255, Feb. 12, 1973]

§ 1.263(f)–1 Reasonable repair allowance.

(a) For rules regarding the election of the repair allowance authorized by section 263(f), the definition of repair allowance property, and the conditions under which an election may be made, see paragraphs (d) (2) and (f) of § 1.167(a)–11. An election may be made under this section for a taxable year only if the taxpayer makes an election under § 1.167(a)–11 for such taxable year.

(Sec. 263(f), 85 Stat. 509 (26 U.S.C. 263))

[T.D. 7272, 38 FR 9986, Apr. 23, 1973; 38 FR 12919, May 17, 1973, as amended by T.D. 7593, 44 FR 5421, Jan. 26, 1979]

§ 1.263A–0 Outline of regulations under section 263A.

This section lists the paragraphs in §§ 1.263A–1 through 1.263A–4 and §§ 1.263A–7 through 1.263A–15 as follows:

§ 1.263A–1 Uniform Capitalization of Costs.

(B) Legal services.
(C) Centralized payroll services.
(D) Centralized data processing services.
(E) Engineering and design services.
(F) Safety engineering services.
(v) Accounting method change.
(h) Simplified service cost method.
(1) Introduction.
(2) Eligible property.
(i) In general.
(A) Inventory property.
(B) Non-inventory property held for sale.
(C) Certain self-constructed assets.
(D) Self-constructed assets produced on a repetitive basis.
(ii) Election to exclude self-constructed assets.
(3) General allocation formula.
(4) Labor-based allocation ratio.
(5) Production cost allocation ratio.
(6) Definition of total mixed service costs.
(7) Costs allocable to more than one business.
(8) De minimis rule.
(9) Separate election.
(i) [Reserved]
(j) Exemption for certain small business taxpayers.
(1) In general.
(2) Application of the section 448(c) gross receipts test.
(i) In general.
(ii) Gross receipts of individuals, etc.
(iii) Partners and S corporation shareholders.
(iv) Examples.
(A) Example 1
(B) Example 2
(3) Change in method of accounting.
(i) In general.
(ii) Prior section 263A method change.
(k) Special rules
(1) Costs provided by a related person.
(i) In general
(ii) Exceptions
(2) Optional capitalization of period costs.
(i) In general.
(ii) Period costs eligible for capitalization.
(3) Trade or business application
(4) Transfers with a principal purpose of tax avoidance. [Reserved]
(l) Change in method of accounting.
(1) In general.
(2) Scope limitations.
(3) Audit protection.
(4) Section 481(a) adjustment.
(5) Time for requesting change.
(m) Effective/applicability date.
(1) In general.
(2) Mixed service costs; self-constructed tangible personal property produced on a routine and repetitive basis.
(3) Costs allocable to property sold; indirect costs; licensing and franchise costs.
(4) Materials and supplies.
(5) Definitions of section 471 costs and additional section 263A costs.
(6) Exemption for certain small business taxpayers.

§ 1.263A–2 Rules Relating to Property Produced by the Taxpayer.

(a) In general.
(1) Produce.
(i) In general.
(ii) Ownership.
(A) General rule.
(B) Property produced for the taxpayer under a contract.
(*1*) In general.
(*2*) Definition of contract.
(C) Home construction contracts.
(2) Tangible personal property.
(i) General rule.
(ii) Intellectual or creative property.
(A) Intellectual or creative property that is tangible personal property.
(*1*) Books.
(*2*) Sound recordings.
(B) Intellectual or creative property that is not tangible personal property.
(*1*) Evidences of value.
(*2*) Property provided incident to services.
(3) Costs required to be capitalized by producers.
(i) In general.
(ii) Pre-production costs.
(iii) Post-production costs.
(4) Practical capacity concept.
(5) Taxpayers required to capitalize costs under this section.
(b) Simplified production method.
(1) Introduction.
(2) Eligible property.
(i) In general.
(A) Inventory property.
(B) Non-inventory property held for sale.
(C) Certain self-constructed assets.
(D) Self-constructed assets produced on a repetitive basis.
(ii) Election to exclude self-constructed assets.
(3) Simplified production method without historic absorption ratio election.
(i) General allocation formula.
(ii) Definitions.
(A) Absorption ratio.
(*1*) Additional section 263A costs incurred during the taxable year.
(*2*) Section 471 costs incurred during the taxable year.
(B) Section 471 costs remaining on hand at year end.
(C) Costs allocable only to property sold.
(iii) LIFO taxpayers electing the simplified production method.
(A) In general.
(B) LIFO increment.
(C) LIFO decrement.
(iv) De minimis rule for producers with total indirect costs of $200,000 or less.
(A) In general.
(B) Related party and aggregation rules.
(v) Examples.

(4) Simplified production method with historic absorption ratio election.
(i) In general.
(ii) Operating rules and definitions.
(A) Historic absorption ratio.
(B) Test period.
(*1*) In general.
(*2*) Updated test period.
(C) Qualifying period.
(*1*) In general.
(*2*) Extension of qualifying period.
(iii) Method of accounting.
(A) Adoption and use.
(B) Revocation of election.
(iv) Reporting and recordkeeping requirements.
(A) Reporting.
(B) Recordkeeping.
(v) Transition rules.
(A) Transition to elect historic absorption ratio.
(B) Transition to revoke historic absorption ratio.
(vi) Example.
(c) Modified simplified production method.
(1) Introduction.
(2) Eligible property.
(i) In general.
(ii) Election to exclude self-constructed assets.
(3) Modified simplified production method without historic absorption ratio election.
(i) General allocation formula.
(A) In general.
(B) Effect of allocation.
(ii) Definitions.
(A) Direct material costs.
(B) Pre-production absorption ratio.
(*1*) Pre-production additional section 263A costs.
(*2*) Pre-production section 471 costs.
(C) Pre-production section 471 costs remaining on hand at year end.
(D) Production absorption ratio.
(*1*) Production additional section 263A costs.
(*2*) Residual pre-production additional section 263A costs.
(*3*) Production section 471 costs.
(*4*) Direct materials adjustment.
(E) Production section 471 costs remaining on hand at year end.
(F) Costs allocated to property sold.
(iii) Allocable mixed service costs.
(A) In general.
(B) Taxpayer using the simplified service cost method.
(C) De minimis rule.
(iv) LIFO taxpayers electing the modified simplified production method.
(A) In general.
(B) LIFO increment.
(*1*) In general.
(*2*) Combined absorption ratio defined.
(C) LIFO decrement.
(v) De minimis rule for producers with total indirect costs of $200,000 or less.
(vi) Examples.
(4) Modified simplified production method with historic absorption ratio election.
(i) In general.
(ii) Operating rules and definitions.
(A) Pre-production historic absorption ratio.
(B) Production historic absorption ratio.
(iii) LIFO taxpayers making the historic absorption ratio election.
(A) In general.
(B) Combined historic absorption ratio.
(*1*) Total allocable additional section 263A costs incurred during the test period.
(*2*) Total section 471 costs remaining on hand at each year end of the test period.
(iv) Extension of qualifying period.
(v) Examples.
(d) Additional simplified methods for producers.
(e) Cross reference.
(f) Change in method of accounting.
(1) In general.
(2) Scope limitations.
(3) Audit protection.
(4) Section 481(a) adjustment.
(5) Time for requesting change.
(g) Effective/applicability date.

§ 1.263A–3 Rules Relating to Property Acquired for Resale

(a) Capitalization rules for property acquired for resale.
(1) In general.
(2) Resellers with production activities.
(i) In general.
(ii) Exemption for small business taxpayers.
(iii) De minimis production activities.
(A) In general.
(B) Example.
(3) Resellers with property produced under a contract.
(4) Use of the simplified resale method.
(i) In general.
(ii) Resellers with de minimis production activities.
(iii) Resellers with property produced under a contract.
(iv) Application of simplified resale method.
(5) *De minimis* production activities.
(i) In general.
(ii) Definition of gross receipts to determine *de minimis* production activities.
(iii) Example.
(b) [Reserved].
(c) Purchasing, handling, and storage costs.
(1) In general.
(2) Costs attributable to purchasing, handling, and storage.
(3) Purchasing costs.
(i) In general.
(ii) Determination of whether personnel are engaged in purchasing activities.
(A) ⅓–⅔ rule for allocating labor costs.

(B) Example.
(4) Handling costs.
(i) In general.
(ii) Processing costs.
(iii) Assembling costs.
(iv) Repackaging costs.
(v) Transportation costs.
(vi) Costs not considered handling costs.
(A) Distribution costs.
(B) Delivery of custom-ordered items.
(C) Repackaging after sale occurs.
(5) Storage costs.
(i) In general.
(ii) Definitions.
(A) On-site storage facility.
(B) Retail sales facility.
(C) An integral part of a retail sales facility.
(D) On-site sales.
(E) Retail customer.
(*1*) In general.
(*2*) Certain non-retail customers treated as retail customers.
(F) Off-site storage facility.
(G) Dual-function storage facility.
(iii) Treatment of storage costs incurred at a dual-function storage facility.
(A) In general.
(B) Dual-function storage facility allocation ratio.
(*1*) In general.
(*2*) Illustration of ratio allocation.
(*3*) Appropriate adjustments for other uses of a dual-function storage facility.
(C) De minimis 90–10 rule for dual-function storage facilities.
(iv) Costs not attributable to an off-site storage facility.
(v) Examples.
(d) Simplified resale method.
(1) Introduction.
(2) Eligible property.
(3) Simplified resale method without historic absorption ratio election.
(i) General allocation formula.
(A) In general.
(B) Effect of allocation.
(C) Definitions.
(*1*) Combined absorption ratio.
(*2*) Section 471 costs remaining on hand at year end.
(*3*) Costs allocable only to property sold.
(D) Storage and handling costs absorption ratio.
(E) Purchasing costs absorption ratio.
(F) Allocable mixed service costs.
(ii) LIFO taxpayers electing simplified resale method.
(A) In general.
(B) LIFO increment.
(C) LIFO decrement.
(iii) Permissible variations of the simplified resale method.
(iv) Examples.
(4) Simplified resale method with historic absorption ratio election.
(i) In general.
(ii) Operating rules and definitions.
(A) Historic absorption ratio.
(B) Test period.
(*1*) In general.
(*2*) Updated test period.
(C) Qualifying period.
(*1*) In general.
(*2*) Extension of qualifying period.
(iii) Method of accounting.
(A) Adoption and use.
(B) Revocation of election.
(iv) Reporting and recordkeeping requirements.
(A) Reporting.
(B) Recordkeeping.
(v) Transition rules.
(A) Transition to elect historic absorption ratio.
(B) Transition to revoke historic absorption ratio.
(vi) Example.
(5) Additional simplified methods for resellers.
(e) Cross reference.
(f) Effective/applicability date.

§ 1.263A–4 Rules for property produced in a farming business.

(a) Introduction.
(1) In general.
(2) Exception.
(i) In general.
(ii) Tax shelter.
(A) In general.
(B) Presumption.
(iii) Examples.
(3) Exemption for certain small business taxpayers.
(4) Costs required to be capitalized or inventoried under another provision.
(5) Farming business.
(i) In general.
(A) Plant.
(B) Animal.
(ii) Incidental activities.
(A) In general.
(B) Activities that are not incidental.
(iii) Examples.
(b) Application of section 263A to property produced in a farming business.
(1) In general.
(i) Plants.
(ii) Animals.
(2) Preproductive period.
(i) Plant.
(A) In general.
(B) Applicability of section 263A.
(C) Actual preproductive period.
(*1*) Beginning of the preproductive period.
(*2*) End of the preproductive period.
(*i*) In general.
(*ii*) Marketable quantities.
(D) Examples.
(ii) Animal.
(A) Beginning of the preproductive period.
(B) End of the preproductive period.

(C) Allocation of costs between animal and first yield.
(c) Inventory methods.
(1) In general.
(2) Available for property used in a trade or business.
(3) Exclusion of property to which section 263A does not apply.
(d) Election not to have section 263A apply under section 263A(d)(3).
(1) Introduction.
(2) Availability of the election.
(3) Time and manner of making the election.
(i) Automatic election.
(ii) Nonautomatic election.
(4) Special rules.
(i) Section 1245 treatment.
(ii) Required use of alternative depreciation system.
(iii) Related person.
(A) In general.
(B) Members of family.
(5) Revocation of section 263A(d)(3) election to permit exemption under section 263A(i).
(6) Change from applying exemption under section 263A(i) to making a section 263A(d)(3) election.
(7) Examples.
(e) Exception for certain costs resulting from casualty losses.
(1) In general.
(2) Ownership.
(3) Examples.
(4) Special rule for citrus and almond groves.
(i) In general.
(ii) Example.
(5) Special temporary rule for citrus plants lost by reason of casualty.
(f) Change in method of accounting.
(1) Effective date.
(2) Change in method of accounting.
(g) Effective date.
(1) In general.
(2) Changes made by Tax Cuts and Jobs Act (Pub. L. 115–97).

§ 1.263A–7 Changing a method of accounting under section 263A.

(a) Introduction.
(1) Purpose.
(2) Taxpayers that adopt a method of accounting under section 263A.
(3) Taxpayers that change a method of accounting under section 263A.
(4) Applicability dates.
(i) In general.
(ii) Changes made by Tax Cuts and Jobs Act (Pub. L. 115–97).
(5) Definition of change in method of accounting.
(b) Rules applicable to a change in method of accounting.
(1) General rules.
(2) Special rules.
(i) Ordering rules when multiple changes in method of accounting occur in the year of change.
(A) In general.
(B) Exceptions to the general ordering rule.
(*1*) Change from the LIFO inventory method.
(*2*) Change from the specific goods LIFO inventory method.
(*3*) Change in overall method of accounting.
(*4*) Change in method of accounting for depreciation.
(ii) Adjustment required by section 481(a).
(iii) Base year.
(A) Need for a new base year.
(*1*) Facts and circumstances revaluation method used.
(*2*) 3-year average method used.
(*i*) Simplified method not used.
(*ii*) Simplified method used.
(B) Computing a new base year.
(c) Inventory.
(1) Need for adjustments.
(2) Revaluing beginning inventory.
(i) In general.
(ii) Methods to revalue inventory.
(iii) Facts and circumstances revaluation method.
(A) In general.
(B) Exception.
(C) Estimates and procedures allowed.
(D) Use by dollar-value LIFO taxpayers.
(E) Examples.
(iv) Weighted average method.
(A) In general.
(B) Weighted average method for FIFO taxpayers.
(*1*) In general.
(*2*) Example.
(C) Weighted average method for specific goods LIFO taxpayers.
(*1*) In general.
(*2*) Example.
(D) Adjustments to inventory costs from prior years.
(v) 3-year average method.
(A) In general.
(B) Consecutive year requirement.
(C) Example.
(D) Short taxable years.
(E) Adjustments to inventory costs from prior years.
(*1*) General rule.
(*2*) Examples of costs eligible for restatement adjustment procedure.
(F) Restatement adjustment procedure.
(*1*) In general.
(*2*) Examples of restatement adjustment procedure.
(3) Intercompany items.
(i) Revaluing intercompany transactions.
(ii) Example.
(iii) Availability of revaluation methods.
(4) Anti-abuse rule.
(i) In general.

(ii) Deemed avoidance of this section.
(A) Scope.
(B) General rule.
(iii) Election to use transferor's LIFO layers.
(iv) Tax avoidance intent not required.
(v) Related corporation.
(d) Non-inventory property.
(1) Need for adjustments.
(2) Revaluing property.

§ 1.263A–8 Requirement to capitalize interest.

(a) In general.
(1) General rule.
(2) Treatment of interest required to be capitalized.
(3) Methods of accounting under section 263A(f).
(4) Special definitions.
(i) Related person.
(ii) Placed in service.
(b) Designated property.
(1) In general.
(2) Special rules.
(i) Application of thresholds.
(ii) Relevant activities and costs.
(iii) Production period and cost of production.
(3) Excluded property.
(4) De minimis rule.
(i) In general.
(ii) Determination of total production expenditures.
(c) Definition of real property.
(1) In general.
(2) Unsevered natural products of land.
(3) Inherently permanent structures.
(4) Machinery.
(i) Treatment.
(ii) Certain factors not determinative.
(d) Production.
(1) Definition of produce.
(2) Property produced under a contract.
(i) Customer.
(ii) Contractor.
(iii) Definition of a contract.
(iv) Determination of whether thresholds are satisfied.
(A) Customer.
(B) Contractor.
(v) Exclusion for property subject to long-term contract rules.
(3) Improvements to existing property.
(i) In general.
(ii) Real property.
(iii) Tangible personal property.

§ 1.263A–9 The avoided cost method.

(a) In general.
(1) Description.
(2) Overview.
(i) In general.
(ii) Rules that apply in determining amounts.
(3) Definitions of interest and incurred.
(4) Definition of eligible debt.
(b) Traced debt amount.
(1) General rule.
(2) Identification and definition of traced debt.
(3) Example.
(c) Excess expenditure amount.
(1) General rule.
(2) Interest required to be capitalized.
(3) Example.
(4) Treatment of interest subject to a deferral provision.
(5) Definitions.
(i) Nontraced debt.
(A) Defined.
(B) Example.
(ii) Average excess expenditures.
(A) General rule.
(B) Example.
(iii) Weighted average interest rate.
(A) Determination of rate.
(B) Interest incurred on nontraced debt.
(C) Average nontraced debt.
(D) Special rules if taxpayer has no nontraced debt or rate is contingent.
(6) Examples.
(7) Special rules where the excess expenditure amount exceeds incurred interest.
(i) Allocation of total incurred interest to units.
(ii) Application of related person rules to average excess expenditures.
(iii) Special rule for corporations.
(d) Election not to trace debt.
(1) General rule.
(2) Example.
(e) Election to use external rate.
(1) In general.
(2) Eligible taxpayer.
(f) Selection of computation period and measurement dates and application of averaging conventions.
(1) Computation period.
(i) In general.
(ii) Method of accounting.
(iii) Production period beginning or ending during the computation period.
(2) Measurement dates.
(i) In general.
(ii) Measurement period.
(iii) Measurement dates on which accumulated production expenditures must be taken into account.
(iv) More frequent measurement dates.
(3) Examples.
(g) Special rules.
(1) Ordering rules.
(i) Provisions preempted by section 263A(f).
(ii) Deferral provisions applied before this section.
(2) Application of section 263A(f) to deferred interest.
(i) In general.
(ii) Capitalization of deferral amount.
(iii) Deferred capitalization.
(iv) Substitute capitalization.
(A) General rule.

(B) Capitalization of amount carried forward.
(C) Method of accounting.
(v) Examples.
(3) Simplified inventory method.
(i) In general.
(ii) Segmentation of inventory.
(A) General rule.
(B) Example.
(iii) Aggregate interest capitalization amount.
(A) Computation period and weighted average interest rate.
(B) Computation of the tentative aggregate interest capitalization amount.
(C) Coordination with other interest capitalization computations.
(*1*) In general.
(*2*) Deferred interest.
(*3*) Other coordinating provisions.
(D) Treatment of increases or decreases in the aggregate interest capitalization amount.
(E) Example.
(iv) Method of accounting.
(4) Financial accounting method disregarded.
(5) Treatment of intercompany transactions.
(i) General rule.
(ii) Special rule for consolidated group with limited outside borrowing.
(iii) Example.
(6) Notional principal contracts and other derivatives. [Reserved]
(7) 15-day repayment rule.

§ 1.263A–10 Unit of property.

(a) In general.
(b) Units of real property.
(1) In general.
(2) Functional interdependence.
(3) Common features.
(4) Allocation of costs to unit.
(5) Treatment of costs when a common feature is included in a unit of real property.
(i) General rule.
(ii) Production activity not undertaken on benefitted property.
(A) Direct production activity not undertaken.
(*1*) In general.
(*2*) Land attributable to a benefitted property.
(B) Suspension of direct production activity after clearing and grading undertaken.
(*1*) General rule.
(*2*) Accumulated production expenditures.
(iii) Common feature placed in service before the end of production of a benefitted property.
(iv) Benefitted property sold before production completed on common feature.
(v) Benefitted property placed in service before production completed on common feature.
(6) Examples.
(c) Units of tangible personal property.
(d) Treatment of installations.

§ 1.263A–11 Accumulated production expenditures.

(a) General rule.
(b) When costs are first taken into account.
(1) In general.
(2) Dedication rule for materials and supplies.
(c) Property produced under a contract.
(1) Customer.
(2) Contractor.
(d) Property used to produce designated property.
(1) In general.
(2) Example.
(3) Excluded equipment and facilities.
(e) Improvements.
(1) General rule.
(2) De minimis rule.
(f) Mid-production purchases.
(g) Related person costs.
(h) Installation.

§ 1.263A–12 Production period.

(a) In general.
(b) Related person activities.
(c) Beginning of production period.
(1) In general.
(2) Real property.
(3) Tangible personal property.
(d) End of production period.
(1) In general.
(2) Special rules.
(3) Sequential production or delivery.
(4) Examples.
(e) Physical production activities.
(1) In general.
(2) Illustrations.
(f) Activities not considered physical production.
(1) Planning and design.
(2) Incidental repairs.
(g) Suspension of production period.
(1) In general.
(2) Special rule.
(3) Method of accounting.
(4) Example.

§ 1.263A–13 Oil and gas activities.

(a) In general.
(b) Generally applicable rules.
(1) Beginning of production period.
(i) Onshore activities.
(ii) Offshore activities.
(2) End of production period.
(3) Accumulated production expenditures.
(i) Costs included.
(ii) Improvement unit.
(c) Special rules when definite plan not established.
(1) In general.
(2) Oil and gas units.
(i) First productive well unit.

[T.D. 8482, 58 FR 42207, Aug. 9, 1993, as amended by T.D. 8584, 59 FR 67196, Dec. 29, 1994; 60 FR 16574, Mar. 31, 1995; T.D. 8728, 62 FR 42054, Aug. 5, 1997; T.D. 8897, 65 FR 50643, Aug. 21, 2000; T.D. 9636, 78 FR 57745, Sept. 19, 2013; T.D. 9652, 79 FR 2096, Jan. 13, 2014; T.D. 9843, 83 FR 58485, Nov. 20, 2018; T.D, 9942, 86 FR 264, Jan. 5, 2021; 86 FR 32185, June 17, 2021]

§ 1.263A–1 Uniform capitalization of costs.

(a) *Introduction*—(1) *In general.* The regulations under §§ 1.263A–1 through 1.263A–6 provide guidance to taxpayers that are required to capitalize certain costs under section 263A. These regulations generally apply to all costs required to be capitalized under section 263A except for interest that must be capitalized under section 263A(f) and the regulations thereunder. Statutory or regulatory exceptions may provide that section 263A does not apply to certain activities or costs; however, those activities or costs may nevertheless be subject to capitalization requirements under other provisions of the Internal Revenue Code and regulations.

(2) *Applicability dates.* (i) In general, this section and §§ 1.263A–2 and 1.263A–3 apply to costs incurred in taxable years beginning after December 31, 1993. In the case of property that is inventory in the hands of the taxpayer, however, these sections are applicable for taxable years beginning after December 31, 1993. The small business taxpayer exception described in paragraph (b)(1) of this section and set forth in paragraph (j) of this section is applicable for taxable years beginning after December 31, 2017. Changes in methods of accounting necessary as a result of the rules in this section and §§ 1.263A–2 and 1.263A–3 must be made under terms and conditions prescribed by the Commissioner. Under these terms and conditions, the principles of § 1.263A–7 must be applied in revaluing inventory property.

(ii) For taxable years beginning before January 1, 1994, taxpayers must take reasonable positions on their federal income tax returns when applying section 263A. For purposes of this paragraph (a)(2)(iii), a reasonable position is a position consistent with the temporary regulations, revenue rulings, revenue procedures, notices, and announcements concerning section 263A applicable in taxable years beginning before January 1, 1994. See § 601.601(d)(2)(ii)(*b*) of this chapter.

(3) *General scope*—(i) *Property to which section 263A applies.* Taxpayers subject to section 263A must capitalize all direct costs and certain indirect costs properly allocable to—

(A) Real property and tangible personal property produced by the taxpayer; and

(B) Real property and personal property described in section 1221(1), which is acquired by the taxpayer for resale.

(ii) *Property produced.* Taxpayers that produce real property and tangible personal property (producers) must capitalize all the direct costs of producing the property and the property's properly allocable share of indirect costs (described in paragraphs (e)(2)(i) and (3) of this section), regardless of whether the property is sold or used in the taxpayer's trade or business. See § 1.263A–2 for rules relating to producers.

(iii) *Property acquired for resale.* Retailers, wholesalers, and other taxpayers that acquire property described in section 1221(1) for resale (resellers) must capitalize the direct costs of acquiring the property and the property's properly allocable share of indirect costs (described in paragraphs (e)(2)(ii) and (3) of this section). See § 1.263A–3 for rules relating to resellers. See also section 263A(b)(2)(B), which excepts from section 263A personal property acquired for resale by a small reseller.

(iv) *Inventories valued at market.* Section 263A does not apply to inventories valued at market under either the market method or the lower of cost or market method if the market valuation used by the taxpayer generally equals the property's fair market value. For purposes of this paragraph (a)(3)(iv), the term fair market value means the price at which the taxpayer sells its inventory to its customers (e.g., as in the market value definition provided in §1.471–4(b)) less, if applicable, the direct cost of disposing of the inventory. However, section 263A does apply in determining the market value of any inventory for which market is determined with reference to replacement cost or reproduction cost. See §§1.471–4 and 1.471–5.

(v) *Property produced in a farming business.* Section 263A generally requires taxpayers engaged in a farming business to capitalize certain costs. See sections 263A(d) and 263A(e) and §1.263A–4 for rules relating to taxpayers engaged in a farming business.

(vi) *Creative property.* Section 263A generally requires taxpayers engaged in the production and resale of creative property to capitalize certain costs.

(vii) *Property produced or property acquired for resale by foreign persons.* Section 263A generally applies to foreign persons.

(b) *Exceptions*— (1) *Small business taxpayers.* For taxable years beginning after December 31, 2017, see section 263A(i) and paragraph (j) of this section for an exemption for certain small business taxpayers from the requirements of section 263A.

(2) *Long-term contracts.* Except for certain home construction contracts described in section 460(e)(1), section 263A does not apply to any property produced by the taxpayer pursuant to a long-term contract as defined in section 460(f), regardless of whether the taxpayer uses an inventory method to account for such production.

(3) *Costs incurred in certain farming businesses.* See section 263A(d) for an exception for costs paid or incurred in certain farming businesses. See §1.263A–4 for specific rules relating to taxpayers engaged in the trade or business of farming.

(4) *Costs incurred in raising, harvesting, or growing timber.* See section 263A(c)(5) for an exception for costs paid or incurred in raising, harvesting, or growing timber and certain ornamental trees. See §1.263A–4, however, for rules relating to taxpayers producing certain trees to which section 263A applies.

(5) *Qualified creative expenses.* See section 263A(h) for an exception for qualified creative expenses paid or incurred by certain free-lance authors, photographers, and artists.

(6) *Certain not-for-profit activities.* See section 263A(c)(1) for an exception for property produced by a taxpayer for use by the taxpayer other than in a trade or business or an activity conducted for profit. This exception does not apply, however, to property produced by an exempt organization in connection with its unrelated trade or business activities.

(7) *Intangible drilling and development costs.* See section 263A(c)(3) for an exception for intangible drilling and development costs. Additionally, section 263A does not apply to any amount allowable as a deduction under section 59(e) with respect to qualified expenditures under sections 263(c), 616(a), or 617(a).

(8) *Natural gas acquired for resale.* Under this paragraph (b)(8), section 263A does not apply to any costs incurred by a taxpayer relating to natural gas acquired for resale to the extent such costs would otherwise be allocable to cushion gas.

(i) *Cushion gas.* Cushion gas is the portion of gas stored in an underground storage facility or reservoir that is required to maintain the level of pressure necessary for operation of the facility. However, section 263A applies to costs incurred by a taxpayer relating to natural gas acquired for resale to the extent such costs are properly allocable to emergency gas.

(ii) *Emergency gas.* Emergency gas is natural gas stored in an underground storage facility or reservoir for use during periods of unusually heavy customer demand.

(9) *Research and experimental expenditures.* See section 263A(c)(2) for an exception for any research and experimental expenditure allowable as a deduction under section 174 or the regulations thereunder. Additionally, section 263A does not apply to any amount allowable as a deduction under section 59(e) with respect to qualified expenditures under section 174.

(10) *Certain property that is substantially constructed.* Section 263A does not apply to any property produced by a taxpayer for use in its trade or business if substantial construction occurred before March 1, 1986.

(i) For purposes of this section, substantial construction is deemed to have occurred if the lesser of—

(A) 10 percent of the total estimated costs of construction; or

(B) The greater of $10 million or 2 percent of the total estimated costs of construction, was incurred before March 1, 1986.

(ii) For purposes of the provision in paragraph (b)(10)(i) of this section, the total estimated costs of construction shall be determined by reference to a reasonable estimate, on or before March 1, 1986, of such amount. Assume, for example, that on March 1, 1986, the estimated costs of constructing a facility were $150 million. Assume that before March 1, 1986, $12 million of construction costs had been incurred. Based on the above facts, substantial construction would be deemed to have occurred before March 1, 1986, because $12 million (the costs of construction incurred before such date) is greater than $10 million (the lesser of $15 million; or the greater of $10 million or $3 million). For purposes of this provision, construction costs are defined as those costs incurred after construction has commenced at the site of the property being constructed (unless the property will not be located on land and, therefore, the initial construction of the property must begin at a location other than the intended site). For example, in the case of a building, construction commences when work begins on the building, such as the excavation of the site, the pouring of pads for the building, or the driving of foundation pilings into the ground. Preliminary activities such as project engineering and architectural design do not constitute the commencement of construction, nor are such costs considered construction costs, for purposes of this paragraph (b)(10).

(11) *Certain property provided incident to services*—(i) *In general.* Under this paragraph (b)(11), section 263A does not apply to property that is provided to a client (or customer) incident to the provision of services by the taxpayer if the property provided to the client is—

(A) De minimis in amount; and

(B) Not inventory in the hands of the service provider.

(ii) *Definition of services.* For purposes of this paragraph (b)(11), services is defined with reference to its ordinary and accepted meaning under federal income tax principles. In determining whether a taxpayer is a bona-fide service provider under this paragraph (b)(11), the nature of the taxpayer's trade or business and the facts and circumstances surrounding the taxpayer's trade or business activities must be considered. Examples of taxpayers qualifying as service providers under this paragraph include taxpayers performing services in the fields of health, law, engineering, architecture, accounting, actuarial science, performing arts, or consulting.

(iii) *De minimis property provided incident to services.* In determining whether property provided to a client by a service provider is de minimis in amount, all facts and circumstances, such as the nature of the taxpayer's trade or business and the volume of its service activities in the trade or business, must be considered. A significant factor in making this determination is the relationship between the acquisition or direct materials costs of the property that is provided to clients and the price that the taxpayer charges its clients for its services and the property. For purposes of this paragraph (b)(11), if the acquisition or direct materials cost of the property provided to a client incident to the services is less than or equal to five percent of the price charged to the client for the services and property, the property is de minimis. If the acquisition or direct materials cost of the property exceeds five percent of the price charged for the services and property, the property may be de minimis if additional facts and circumstances so indicate.

(12) *De minimis rule for certain producers with total indirect costs of $200,000 or less.* See § 1.263A–2(b)(3)(iv) for a de minimis rule that treats producers with total indirect costs of $200,000 or less as having no additional section 263A costs (as defined in paragraph (d)(3) of this section) for purposes of the simplified production method.

(13) *Exception for the origination of loans.* For purposes of section 263A(b)(2)(A), the origination of loans is not considered the acquisition of intangible property for resale. (But section 263A(b)(2)(A) does include the acquisition by a taxpayer of pre-existing loans from other persons for resale.)

(c) *General operation of section 263A*—(1) *Allocations.* Under section 263A, taxpayers must capitalize their direct costs and a properly allocable share of their indirect costs to property produced or property acquired for resale. In order to determine these capitalizable costs, taxpayers must allocate or apportion costs to various activities, including production or resale activities. After section 263A costs are allocated to the appropriate production or resale activities, these costs are generally allocated to the items of property produced or property acquired for resale during the taxable year and capitalized to the items that remain on hand at the end of the taxable year. See however, the simplified production method, the modified simplified production method, and the simplified resale method in §§ 1.263A–2(b) and (c) and 1.263A–3(d).

(2) *Otherwise deductible.* (i) Any cost which (but for section 263A and the regulations thereunder) may not be taken into account in computing taxable income for any taxable year is not treated as a cost properly allocable to property produced or acquired for resale under section 263A and the regulations thereunder. Thus, for example, if a business meal deduction is limited by section 274(n) to 80 percent of the cost of the meal, the amount properly allocable to property produced or acquired for resale under section 263A is also limited to 80 percent of the cost of the meal.

(ii) The amount of any cost required to be capitalized under section 263A may not be included in inventory or charged to capital accounts or basis any earlier than the taxable year during which the amount is incurred within the meaning of § 1.446–1(c)(1)(ii).

(3) *Capitalize.* Capitalize means, in the case of property that is inventory in the hands of a taxpayer, to include in inventory costs and, in the case of other property, to charge to a capital account or basis.

(4) *Recovery of capitalized costs.* Costs that are capitalized under section 263A are recovered through depreciation, amortization, cost of goods sold, or by an adjustment to basis at the time the property is used, sold, placed in service, or otherwise disposed of by the taxpayer. Cost recovery is determined by the applicable Internal Revenue Code and regulation provisions relating to use, sale, or disposition of property.

(5) *Costs allocable to property sold.* A cost that is allocated under this section, § 1.263A–2, or § 1.263A–3 entirely to property sold must be included in cost of goods sold and may not be included in determining the cost of goods on hand at the end of the taxable year.

(d) *Definitions*—(1) *Self-constructed assets.* Self-constructed assets are assets produced by a taxpayer for use by the taxpayer in its trade or business. Self-constructed assets are subject to section 263A.

(2) *Section 471 costs*—(i) *In general.* Except as otherwise provided in paragraphs (d)(2)(ii), (iv), (v), and (vi) of this section, for purposes of section 263A, a taxpayer's section 471 costs are the types of costs, other than interest, that a taxpayer capitalizes to property produced or property acquired for resale in its financial statement. Thus, although section 471 applies only to inventories, section 471 costs include any non-inventory costs, other than interest, that a taxpayer capitalizes to, or includes in acquisition or production costs of, property produced or property acquired for resale in its financial statement. Except as otherwise provided in paragraph (d)(2)(iii) of this section, a taxpayer determines the amounts of section 471 costs by using

the amounts of such costs that are incurred in the taxable year for federal income tax purposes.

(ii) *Inclusion of direct costs*—(A) *In general*. Notwithstanding the last sentence of paragraph (g)(2) of this section, a taxpayer's section 471 costs must include all direct costs of property produced and property acquired for resale, whether or not a taxpayer capitalizes these costs to property produced or property acquired for resale in its financial statement. See paragraph (e)(2) of this section for a description of direct costs of property produced and property acquired for resale.

(B) *Allocation of direct costs*. Except for any direct costs that are treated as additional section 263A costs under paragraphs (d)(2)(iv) and (v) of this section, a taxpayer's direct costs of property produced and property acquired for resale must be allocated using a method provided in paragraph (f) of this section.

(iii) *Alternative method to determine amounts of section 471 costs by using taxpayer's financial statement*—(A) *In general*. In lieu of determining the amounts of section 471 costs under paragraph (d)(2)(i) of this section, a taxpayer described in paragraph (d)(3)(ii)(B) of this section may determine the amounts of section 471 costs by using the amounts of such costs that are incurred in the taxable year in its financial statement using the taxpayer's financial statement methods of accounting if the taxpayer's financial statement is described in paragraph (d)(6)(i), (ii), or (iii) of this section. If the taxpayer's financial statement is described only in paragraph (d)(6)(iv) of this section, the taxpayer may not use the alternative method described in this paragraph (d)(2)(iii) and must use the method described in paragraph (d)(2)(i) of this section to determine its amounts of section 471 costs. A taxpayer using the alternative method described in this paragraph (d)(2)(iii) must remove all section 471 costs described in paragraph (d)(2)(vi) of this section, if any, by including negative adjustments in additional section 263A costs. A taxpayer using the alternative method described in this paragraph (d)(2)(iii) applies the method to all of its section 471 costs, including costs described under paragraphs (d)(2)(ii), (iv), (v), and (vi) of this section.

(B) *Book-to-tax adjustments*. A taxpayer using the alternative method described in this paragraph (d)(2)(iii) must include as additional section 263A costs all negative and positive adjustments required to be made as a result of differences in the book and tax amounts of the taxpayer's section 471 costs, including adjustments for direct costs required to be added to section 471 costs under paragraph (d)(2)(ii) of this section, and costs removed from section 471 costs under paragraphs (d)(2)(vi) and (d)(3)(ii)(B) of this section. In addition, the taxpayer must include as additional section 263A costs all negative and positive adjustments required to be made as a result of differences in the book and tax amounts of section 471 costs that are treated as additional section 263A costs (for example, de minimis direct costs described in paragraph (d)(2)(iv) of this section and certain variances and under or over-applied burdens described in paragraph (d)(2)(v) of this section). For purposes of determining the negative and positive adjustments required to be made as a result of differences in book and tax amounts for a taxpayer using the burden rate or standard cost methods described in paragraph (f)(3) of this section, the taxpayer compares the actual amount of the cost incurred in the taxable year for federal income tax purposes to the actual amount of the cost incurred in the taxable year in its financial statement using the taxpayer's financial statement methods of accounting, regardless of how the taxpayer treats its variances or under or over-applied burdens.

(C) *Exclusion of certain financial statement items*. A taxpayer that determines the amounts of section 471 costs under this paragraph (d)(2)(iii) may not include any financial statement write-downs, reserves, or other financial statement valuation adjustments when determining the amounts of its section 471 costs.

(D) *Changes in method of accounting*. The use of this method to determine the amounts of section 471 costs under this paragraph (d)(2)(iii) is the adoption of, or a change in, a method of accounting under section 446 of the Internal Revenue Code.

(E) *Examples*. The following examples illustrate this paragraph (d)(2)(iii):

(*1*) *Example 1—Alternative-method taxpayer using de minimis direct labor costs rule*. Taxpayer P uses the modified simplified production method described in §1.263A–2(c) and determines its amounts of section 471 costs by using the alternative method under paragraph (d)(2)(iii) of this section. Additionally, P uses the de minimis direct labor costs rule under paragraph (d)(2)(iv)(B) of this section. P does not capitalize vacation pay or holiday pay to property produced or property acquired for resale in its financial statement but does capitalize all other direct labor costs to such property in its financial statement. On its 2018 financial statement, P incurs $3,500,000 of total direct labor costs, including $110,000 of vacation pay costs and $10,000 of holiday pay costs. For federal income tax purposes, P incurs $150,000 of vacation pay costs and $18,000 of holiday pay costs in the taxable year. P's uncapitalized direct labor costs are $120,000 ($110,000 of vacation pay plus $10,000 of holiday pay). For purposes of the five percent test in paragraph (d)(2)(iv)(B) of this section, P's uncapitalized direct labor costs are 3.43% of total direct labor costs ($120,000 divided by $3,500,000). Accordingly, under paragraph (d)(2)(iv)(B) of this section, P includes $120,000 in its additional section 263A costs and excludes that amount from its section 471 costs in the taxable year. Additionally, pursuant to paragraph (d)(2)(iii)(B) of this section, P includes in additional section 263A costs a positive book-to-tax adjustment of $40,000 for vacation pay costs ($150,000 tax amount − $110,000 book amount) and a positive book-to-tax adjustment of $8,000 for holiday pay costs ($18,000 tax amount − $10,000 book amount).

(*2*) *Example 2—Alternative-method taxpayer with under and over-applied burdens that uses safe harbor rule for certain variances and under or over-applied burdens*. Taxpayer X uses the modified simplified production method described in §1.263A–2(c) and determines its amounts of section 471 costs by using the alternative method under paragraph (d)(2)(iii) of this section. In 2018, X uses a burden rate method for book purposes to allocate costs to Products A and B, and does not capitalize any under or over-applied burdens to property produced or property acquired for resale in its financial statement. X does not allocate costs to any other products using a burden rate method, and X does not allocate costs to any products using a standard cost method. On its 2018 financial statement, using X's burden rate, the total amount of predetermined indirect costs for Product A is $545,000 and the total amount of actual indirect costs incurred for Product A is $550,000; accordingly, X has an under-applied burden of $5,000 for Product A. For federal income tax purposes, the actual indirect costs incurred in 2018 for Product A is $560,000. Additionally, on its 2018 financial statement, using X's burden rate, the total amount of predetermined indirect costs for Product B is $250,000 and the total amount of actual indirect costs incurred for Product B is $225,000; accordingly, X has an over-applied burden of $25,000 for Product B. For federal income tax purposes, the actual indirect costs incurred in 2018 for Product B is $240,000. X uses the safe harbor rule for certain variances and under or over-applied burdens. Prior to the application of this safe harbor rule, X's total section 471 costs for 2018 for Products A and B (the only items to which X allocates costs using a standard cost method or burden rate method) are $2,000,000, which includes $550,000 actual indirect costs for Product A, $225,000 actual indirect costs for Product B, and $1,225,000 of other section 471 costs for Products A and B that are not allocated under X's burden rate method. For purposes of determining the amount of uncapitalized variances and uncapitalized under or over-applied burdens for the five percent test in paragraph (d)(2)(v)(A) of this section, X's under and over-applied burdens for Products A and B are treated as positive amounts. Consequently, the sum of X's uncapitalized variances and uncapitalized under or over-applied burdens is $30,000 ($5,000 under-applied burden for Product A plus $25,000 over-applied burden for Product B). Accordingly, under paragraph (d)(2)(v)(A) of this section, the sum of X's uncapitalized variances and uncapitalized under or over-applied burdens is 1.5% of X's total section 471 costs for all items to which it allocates costs using a standard cost method or burden rate method ($30,000 divided by $2,000,000), and X includes a positive $5,000 under-applied burden for Product A and a negative $25,000 over-applied burden for Product B in its additional section 263A costs, and excludes those amounts from its section 471 costs. Additionally, pursuant to paragraph (d)(2)(iii)(B) of this section, X includes in its additional section 263A costs a positive book-to-tax adjustment of $10,000 for Product A ($560,000 actual cost tax amount − $550,000 actual cost book amount) and a positive book-to-tax adjustment of $15,000 for Product B ($240,000 actual tax amount cost − $225,000 actual book amount cost) in the taxable year.

(iv) *De minimis rule exceptions for certain direct costs*—(A) *In general*. Notwithstanding paragraph (d)(2)(ii) of this section, a taxpayer that uses the simplified resale method, the simplified production method, or the modified simplified production method, and that does not capitalize certain direct costs to property produced or property acquired for resale in its financial statement (uncapitalized direct labor costs or uncapitalized direct material costs), may use either or both the de minimis direct labor costs rule or the de minimis direct material costs rule to include in additional section 263A costs, and exclude from section 471 costs, certain uncapitalized direct labor costs or uncapitalized direct material costs that are incurred in the taxable year as provided in paragraphs (d)(2)(iv)(B) and (C) of this section, respectively. The use of the de minimis rules described in paragraphs (d)(2)(iv)(B) and (C) of this section is the adoption of, or a change in, a method of accounting under section 446 of the Internal Revenue Code.

(B) *De minimis rule for certain direct labor costs*. A taxpayer described in paragraph (d)(2)(iv)(A) of this section that uses the de minimis rule described in this paragraph (d)(2)(iv)(B) includes in additional section 263A costs, and excludes from section 471 costs, the sum of the amounts of all of those uncapitalized direct labor costs that are incurred in the taxable year, if that sum is less than five percent of total direct labor costs incurred in the taxable year (whether or not capitalized in the taxpayer's financial statement), or another amount specified in other published guidance (*see* § 601.601(d)(2) of this chapter). For purposes of determining the amount of uncapitalized direct labor costs for this five percent test, any amounts that constitute a reduction to costs are treated as a positive amount. The amounts of uncapitalized direct labor costs used for the five percent test, and the amounts of uncapitalized direct labor costs included in additional section 263A costs under this paragraph (d)(2)(iv)(B), must not include amounts relating to basic compensation or overtime, or the types of costs included in the taxpayer's standard cost or burden rate methods used for section 471 costs (but see paragraphs (d)(2)(v) and (f)(3)(i)(C) of this section for special rules for certain variances and under or over-applied burdens).

(C) *De minimis rule for certain direct material costs*. A taxpayer described in paragraph (d)(2)(iv)(A) of this section that uses the de minimis rule described in this paragraph (d)(2)(iv)(C) includes in additional section 263A costs, and excludes from section 471 costs, the sum of the amounts of all of those uncapitalized direct material costs that are incurred in the taxable year, if that sum is less than five percent of total direct material costs incurred in the taxable year (whether or not capitalized in the taxpayer's financial statement), or another amount specified in other published guidance (*see* § 601.601(d)(2) of this chapter). For purposes of determining the amount of uncapitalized direct material costs for this five percent test, any amounts that constitute a reduction to costs, such as cash and trade discounts, are treated as a positive amount. The amounts of uncapitalized direct material costs used for the five percent test, and the amounts of uncapitalized direct material costs included in additional section 263A costs under this paragraph (d)(2)(iv)(C), must not include the types of costs included in the taxpayer's standard cost method used for section 471 costs (but see paragraphs (d)(2)(v) and (f)(3)(ii)(B) of this section for special rules for certain variances).

(D) *Taxpayers using a historic absorption ratio*. A taxpayer that uses the historic absorption ratio provided in §1.263A–2(b)(4) or (c)(4) or §1.263A–3(d)(4), and that uses a de minimis rule described in paragraph (d)(2)(iv) of this section during its test period or updated test period, determines whether direct labor costs or direct material costs, as applicable, are included in any of its section 471 costs remaining on hand at year end during its qualifying period or extended qualifying period according to how those direct labor costs or direct material costs, respectively, are identified in at least two of the three years of the taxpayer's applicable test period or updated test period. If a taxpayer described in this paragraph (d)(2)(iv)(D) is required to revise any of its actual absorption ratios for its test period or updated test period as a result of a change in a method of accounting, the taxpayer determines whether direct labor costs or direct material costs, as applicable, are included in any of its section 471 costs on hand at year end during a qualifying period or extended qualifying period according to how those direct labor costs or direct material costs, respectively, are identified in the taxpayer's revised actual absorption ratios during its applicable test period or updated test period.

(E) *Examples*. The following examples illustrate this paragraph (d)(2)(iv):

(*1*) *Example 1—Taxpayer using de minimis direct material costs rule*. Taxpayer R uses the modified simplified production method described in §1.263A–2(c) and the de minimis method of accounting under paragraph (d)(2)(iv)(C) of this section. In 2018, R does not capitalize freight-in costs or trade discounts to property produced or property acquired for resale in its financial statement but does capitalize all other direct material costs to such property in its financial statement. R incurs total direct material costs of $3,105,000, which represents invoice price of $3,000,000 on goods purchased, plus $120,000 of freight-in costs, less $15,000 for trade discounts. For purposes of determining the amount of uncapitalized direct material costs for the five percent test in paragraph (d)(2)(iv)(C) of this section, R's trade discounts are treated as a positive amount. Consequently, R's uncapitalized direct material costs for purposes of the five percent test are $135,000 ($120,000 of freight-in plus $15,000 of trade discounts). Accordingly, under paragraph (d)(2)(iv)(C) of this section, R's uncapitalized direct material costs are 4.35% of total direct material costs ($135,000 divided by $3,105,000), and R includes a positive $120,000 of freight-in and a negative $15,000 of trade discounts in its additional section 263A costs and excludes those amounts from its section 471 costs in the taxable year.

(*2*) *Example 2—Taxpayer using de minimis direct labor costs rule and historic absorption ratio*. Taxpayer S uses the historic absorption ratio provided in §1.263A–2(c)(4). S uses the de minimis method of accounting under paragraph (d)(2)(iv)(B). S excludes certain uncapitalized direct labor costs from its section 471 costs (and includes them in additional section 263A costs) under paragraph (d)(2)(iv)(B) of this section in Years 1 and 3 of its applicable test period. Because S excluded direct labor costs from its section 471 costs in at least two of the three years of its applicable test period, S must exclude those same costs from its pre-production and production section 471 costs remaining on hand at year end during its qualifying period or extended qualifying period.

(v) *Safe harbor method for certain variances and under or over-applied burdens*—(A) *In general*. Notwithstanding paragraphs (d)(2)(i) and (ii), (f)(3)(i)(C), and (f)(3)(ii)(B) of this section, a taxpayer that uses the simplified resale method, the simplified production method, or the modified simplified production method, may use the safe harbor method described in this paragraph (d)(2)(v)(A) for all of its variances and under or over-applied burdens that are not capitalized to property produced or property acquired for resale in its financial statement (uncapitalized variances and uncapitalized under or over-applied burdens). A taxpayer using this safe harbor method must include in additional section 263A costs, and exclude from section 471 costs, the sum of the amounts of all of those uncapitalized variances and uncapitalized under or over-applied burdens for the taxable year, if that sum is less than five percent of the taxpayer's total section 471 costs for all items to which it allocates costs using a standard cost method or burden rate method, or another percentage specified in other published guidance (*see* § 601.601(d)(2) of this chapter). If the sum of uncapitalized variances and uncapitalized under or over-applied burdens is not less than this five percent threshold, the taxpayer may not exclude such uncapitalized variances and uncapitalized under or over-applied burdens from section 471 costs, and must reallocate such uncapitalized variances and uncapitalized under or over-applied burdens to or among the units of property to which the costs are allocable in accordance with paragraphs (f)(3)(i)(C) and (f)(3)(ii)(B) of this section (but see paragraph (d)(2)(v)(B) of this section for a rule that a taxpayer using the safe harbor method described in this paragraph (d)(2)(v)(A) may not use the methods of accounting described in paragraphs (f)(3)(i)(C) and (f)(3)(ii)(B) of this section to treat certain uncapitalized variances and certain uncapitalized under or over-applied burdens as not allocable to property). For purposes of determining the amounts of uncapitalized variances and uncapitalized under or over-applied burdens for this five percent test, all variances and under or over-applied burdens are treated as positive amounts. Additionally, for purposes of this five percent test, a taxpayer's total section 471 costs for all items to which it allocates costs using a standard cost method or burden rate method are determined before application of the safe harbor method described in this paragraph (d)(2)(v)(A), and therefore this amount must reflect the actual amounts incurred by the taxpayer for those items during the taxable year, which includes variances and under or over-applied burdens. The variances described in this paragraph (d)(2)(v)(A) include any variances on cash or trade discounts, if those discounts are capitalized as part of the taxpayer's standard cost method used for section 471 costs.

(B) *Consistency requirement.* A taxpayer using the safe harbor method described in paragraph (d)(2)(v)(A) of this section must use the method consistently for all items to which it allocates costs using a standard cost method or burden rate method and may not use the methods of accounting described in paragraphs (f)(3)(i)(C) and (f)(3)(ii)(B) of this section to treat its uncapitalized variances and uncapitalized under or over-applied burdens that are not significant in amount relative to the taxpayer's total indirect costs incurred with respect to production and resale activities for the year as not allocable to property produced or property acquired for resale.

(C) *Allocation of variances and under or over-applied burdens between production and preproduction costs under the modified simplified production method.* In the case of a taxpayer using the modified simplified production method and the safe harbor method described in paragraph (d)(2)(v)(A) of this section, uncapitalized variances and uncapitalized under or over-applied burdens treated as additional section 263A costs under the safe harbor method must be allocated between production additional section 263A costs, as described in § 1.263A–2(c)(3)(ii)(D)(*1*), and pre-production additional section 263A costs, as described in § 1.263A–2(c)(3)(ii)(B)(*1*), using any reasonable method. In the case of a taxpayer using the modified simplified production method and the safe harbor method described in paragraph (d)(2)(v)(A) of this section, uncapitalized variances and uncapitalized under or over-applied burdens that are not excluded from section 471 costs must be allocated between production section 471 costs, as described in § 1.263A–2(c)(3)(ii)(D)(*3*), and pre-production section 471 costs, as described in § 1.263A–2(c)(3)(ii)(B)(*2*) based on the taxpayer's reallocation of such uncapitalized variances and uncapitalized under or over-applied burdens to or among the units of property to which the costs are allocable in accordance with paragraphs (f)(3)(i)(C) and (f)(3)(ii)(B) of this section, as described in paragraph (d)(2)(v)(A) of this section.

(D) *Allocation of variances and under or over-applied burdens between storage and handling costs absorption ratio and purchasing costs absorption ratio under the simplified resale method.* In the case of a taxpayer using the simplified resale method, any uncapitalized variances and uncapitalized under or over-applied burdens treated as additional section 263A costs under the safe harbor method described in paragraph (d)(2)(v)(A) of this section must be allocated between storage and handling costs, as described in §1.263A–3(d)(3)(i)(D)(*2*), and current year's purchasing costs, as described in §1.263A–3(d)(3)(i)(E)(*2*), using any reasonable method.

(E) *Method of accounting.* The use of the safe harbor method described in this paragraph (d)(2)(v) is the adoption of, or a change in, a method of accounting under section 446 of the Internal Revenue Code.

(vi) *Removal of section 471 costs.* A taxpayer must remove those costs included in its section 471 costs that are not permitted to be capitalized under either paragraph (c)(2) or (j)(2)(ii) of this section and those costs included in its section 471 costs that are eligible for capitalization under paragraph (j)(2) of this section that the taxpayer does not elect to capitalize under section 263A. Except as otherwise provided in paragraph (d)(3)(ii)(B) of this section, a taxpayer must remove costs pursuant to this paragraph (d)(2)(vi) by adjusting its section 471 costs and may not remove the costs by including a negative adjustment in its additional section 263A costs. A taxpayer that removes costs pursuant to this paragraph (d)(2)(vi) by adjusting its section 471 costs must use a reasonable method that approximates the manner in which the taxpayer originally capitalized the costs to its property produced or property acquired for resale in its financial statement.

(vii) *Method changes.* A taxpayer using the simplified production method, simplified resale method, or the modified simplified production method and that changes its financial statement practices for a cost in a manner that would change its section 471 costs is required to change its method of accounting for federal income tax purposes. A taxpayer may change its method of accounting for determining section 471 costs only with the consent of the Commissioner as required under section 446(e) and the corresponding regulations.

(3) *Additional section 263A costs*—(i) *In general.* Additional section 263A costs are the costs, other than interest, that are not included in a taxpayer's section 471 costs but that are required to be capitalized under section 263A. Additional section 263A costs generally do not include the direct costs that are required to be included in a taxpayer's section 471 costs under paragraph (d)(2)(ii) of this section; however, additional section 263A costs must include any direct costs excluded from section 471 costs under paragraphs (d)(2)(iv) and (v) of this section. For a taxpayer using the alternative method described in paragraph (d)(2)(iii) of this section, additional section 263A costs must also include any negative or positive adjustments required to be made as a result of differences in the book and tax amounts of the taxpayer's section 471 costs.

(ii) *Negative adjustments*—(A) *In general.* Except as otherwise provided by regulations or other published guidance (*see* §601.601(d)(2) of this chapter), a taxpayer may not include negative adjustments in additional section 263A costs. However, for a taxpayer using the alternative method described in paragraph (d)(2)(iii) of this section, see paragraph (d)(2)(iii)(B) of this section for negative or positive adjustments required to be made as a result of differences in the book and tax amounts of the taxpayer's section 471 costs.

(B) *Exception for certain taxpayers removing costs from section 471 costs.* Notwithstanding paragraphs (d)(2)(vi) and (d)(3)(ii)(A) of this section, and except as otherwise provided in paragraphs (d)(3)(ii)(C) and (D) of this section, the following taxpayers may, but are not required to, include negative adjustments in additional section 263A costs to remove the taxpayer's section 471 costs that are described in paragraph (d)(2)(vi) of this section (costs that are not required to be, or are not permitted to be, capitalized under section 263A):

(*1*) A taxpayer using the simplified production method under § 1.263A–2(b) if the taxpayer's (or its predecessor's) average annual gross receipts for the three previous taxable years (test period) do not exceed $50,000,000, or another amount specified in other published guidance (*see* § 601.601(d)(2) of this chapter). The rules of § 1.263A–1(j) apply for purposes of determining the amount of a taxpayer's gross receipts and the test period;

(*2*) A taxpayer using the modified simplified production method under § 1.263A–2(c); and

(*3*) A taxpayer using the simplified resale method under § 1.263A–3(d).

(C) *No negative adjustments for cash or trade discounts.* A taxpayer may not include negative adjustments in additional section 263A costs for cash or trade discounts described in § 1.471–3(b). However, see paragraph (d)(2)(iv)(C) of this section for a de minimis rule for certain direct material costs that may be included in additional section 263A costs and paragraph (d)(2)(v) of this section for certain variance amounts that may be included in additional section 263A costs.

(D) *No negative adjustments for certain expenses.* A taxpayer may not include negative adjustments in additional section 263A costs for an amount which is of a type for which a deduction would be disallowed under section 162(c), (e), (f), or (g) and the regulations thereunder in the case of a business expense.

(E) *Consistency requirement for negative adjustments.* A taxpayer that is permitted to include negative adjustments in additional section 263A costs to remove section 471 costs under paragraph (d)(3)(ii)(B) of this section and that includes negative adjustments to remove section 471 costs must use that method of accounting to remove all section 471 costs required to be removed under paragraph (d)(2)(vi) of this section.

(4) *Section 263A costs.* Section 263A costs are defined as the costs that a taxpayer must capitalize under section 263A. Thus, section 263A costs are the sum of a taxpayer's section 471 costs, its additional section 263A costs, and interest capitalizable under section 263A(f).

(5) *Classification of costs.* A taxpayer must classify section 471 costs, additional section 263A costs, and any permitted adjustments to section 471 or additional section 263A costs, using the narrower of the classifications of costs described in paragraphs (e)(2), (3), and (4) of this section, whether or not the taxpayer is required to maintain inventories, or the classifications of costs used by a taxpayer in its financial statement. If a cost is not described in paragraph (e)(2), (3), or (4) of this section, the cost is to be classified using the classification of costs used in the taxpayer's financial statement.

(6) *Financial statement.* For purposes of section 263A, financial statement means the taxpayer's financial statement listed in paragraphs (d)(6)(i) through (iv) of this section that has the highest priority, including within paragraphs (d)(6)(ii) and (iv) of this section. The financial statements are, in descending priority:

(i) A financial statement required to be filed with the Securities and Exchange Commission (SEC) (the 10–K or the Annual Statement to Shareholders);

(ii) A certified audited financial statement that is accompanied by the report of an independent certified public accountant (or in the case of a foreign entity, by the report of a similarly qualified independent professional) that is used for:

(A) Credit purposes;

(B) Reporting to shareholders, partners, or similar persons; or

(C) Any other substantial non-tax purpose;

(iii) A financial statement (other than a tax return) required to be provided to the federal or a state government or any federal or state agency (other than the SEC or the Internal Revenue Service); or

(iv) A financial statement that is used for:

(A) Credit purposes;

(B) Reporting to shareholders, partners, or similar persons; or

(C) Any other substantial non-tax purpose.

(e) *Types of costs subject to capitalization*—(1) *In general.* Taxpayers subject to section 263A must capitalize all direct costs and certain indirect costs properly allocable to property produced or property acquired for resale. This paragraph (e) describes the types of costs subject to section 263A.

(2) *Direct costs*—(i) *Producers.* Producers must capitalize direct material costs and direct labor costs.

(A) *Direct material costs. Direct materials costs* include the cost of those materials that become an integral part of specific property produced and those materials that are consumed in the ordinary course of production and that can be identified or associated with particular units or groups of units of property produced. For example, a cost described in §1.162–3, relating to the cost of a material or supply, may be a direct material cost.

(B) *Direct labor costs* include the costs of labor that can be identified or associated with particular units or groups of units of specific property produced. For this purpose, labor encompasses full-time and part-time employees, as well as contract employees and independent contractors. Direct labor costs include all elements of compensation other than employee benefit costs described in paragraph (e)(3)(ii)(D) of this section. Elements of direct labor costs include basic compensation, overtime pay, vacation pay, holiday pay, sick leave pay (other than payments pursuant to a wage continuation plan under section 105(d) as it existed prior to its repeal in 1983), shift differential, payroll taxes, and payments to a supplemental unemployment benefit plan.

(ii) *Resellers.* Resellers must capitalize the acquisition costs of property acquired for resale. In the case of inventory, the acquisition cost is the cost described in §1.471–3(b).

(3) *Indirect costs*—(i) *In general.* (A) Indirect costs are defined as all costs other than direct material costs and direct labor costs (in the case of property produced) or acquisition costs (in the case of property acquired for resale). Taxpayers subject to section 263A must capitalize all indirect costs properly allocable to property produced or property acquired for resale. Indirect costs are properly allocable to property produced or property acquired for resale when the costs directly benefit or are incurred by reason of the performance of production or resale activities. Indirect costs may directly benefit or be incurred by reason of the performance of production or resale activities even if the costs are calculated as a percentage of revenue or gross profit from the sale of inventory, are determined by reference to the number of units of property sold, or are incurred only upon the sale of inventory. Indirect costs may be allocable to both production and resale activities, as well as to other activities that are not subject to section 263A. Taxpayers must make a reasonable allocation of indirect costs between production, resale, and other activities.

(B) *Example.* The following example illustrates the provisions of this paragraph (e)(3)(i):

(i) Taxpayer A manufactures tablecloths and other linens. A enters into a licensing agreement with Company L under which A may label its tablecloths with L's trademark if the tablecloths meet certain specified quality standards. In exchange for its right to use L's trademark, the licensing agreement requires A to pay L a royalty of $X for each tablecloth carrying L's trademark that A sells. The licensing agreement does not require A to pay L any minimum or lump-sum royalties.

(ii) The licensing agreement provides A with the right to use L's intellectual property, a trademark. The licensing agreement also requires A to conduct its production activities according to certain standards as a condition of exercising that right. Thus, A's right to use L's trademark under the licensing agreement is directly related to A's production of tablecloths. The royalties the licensing agreement requires A to pay for using L's trademark are the costs A incurs in exchange for these rights. Therefore, although A incurs royalty costs only when A sells a tablecloth carrying L's trademark, the royalty costs directly benefit production activities and are incurred by reason of production activities within the meaning of paragraph (e)(3)(i)(A) of this section.

(ii) *Examples of indirect costs required to be capitalized.* The following are examples of indirect costs that must be capitalized to the extent they are properly allocable to property produced or property acquired for resale:

(A) *Indirect labor costs.* Indirect labor costs include all labor costs (including the elements of labor costs set forth in paragraph (e)(2)(i) of this section) that cannot be directly identified or associated with particular units or groups of units of specific property produced or property acquired for resale (e.g., factory labor that is not direct labor). As in the case of direct labor, indirect labor encompasses full-time and part-time employees, as well as contract employees and independent contractors.

(B) *Officers' compensation.* Officers' compensation includes compensation paid to officers of the taxpayer.

(C) *Pension and other related costs.* Pension and other related costs include contributions paid to or made under any stock bonus, pension, profit-sharing or annuity plan, or other plan deferring the receipt of compensation, whether or not the plan qualifies under section 401(a). Contributions to employee plans representing past services must be capitalized in the same manner (and in the same proportion to property currently being acquired or produced) as amounts contributed for current service.

(D) *Employee benefit expenses.* Employee benefit expenses include all other employee benefit expenses (not described in paragraph (e)(3)(ii)(C) of this section) to the extent such expenses are otherwise allowable as deductions under chapter 1 of the Internal Revenue Code. These other employee benefit expenses include: worker's compensation; amounts otherwise deductible or allowable in reducing earnings and profits under section 404A; payments pursuant to a wage continuation plan under section 105(d) as it existed prior to its repeal in 1983; amounts includible in the gross income of employees under a method or arrangement of employer contributions or compensation that has the effect of a stock bonus, pension, profit-sharing or annuity plan, or other plan deferring receipt of compensation or providing deferred benefits; premiums on life and health insurance; and miscellaneous benefits provided for employees such as safety, medical treatment, recreational and eating facilities, membership dues, etc. Employee benefit expenses do not, however, include direct labor costs described in paragraph (e)(2)(i) of this section.

(E) *Indirect material costs. Indirect material costs* include the cost of materials that are not an integral part of specific property produced and the cost of materials that are consumed in the ordinary course of performing production or resale activities that cannot be identified or associated with particular units of property. Thus, for example, a cost described in §1.162–3, relating to the cost of a material or supply, may be an indirect cost.

(F) *Purchasing costs.* Purchasing costs include costs attributable to purchasing activities. See §1.263A–3(c)(3) for a further discussion of purchasing costs.

(G) *Handling costs.* Handling costs include costs attributable to processing, assembling, repackaging and transporting goods, and other similar activities. See §1.263A–3(c)(4) for a further discussion of handling costs.

(H) *Storage costs.* Storage costs include the costs of carrying, storing, or warehousing property. See §1.263A–3(c)(5) for a further discussion of storage costs.

(I) *Cost recovery.* Cost recovery includes depreciation, amortization, and cost recovery allowances on equipment and facilities (including depreciation or amortization of self-constructed assets or other previously produced or acquired property to which section 263A or section 263 applies).

(J) *Depletion.* Depletion includes allowances for depletion, whether or not in excess of cost. Depletion is, however, only properly allocable to property that has been sold (i.e., for purposes of determining gain or loss on the sale of the property).

(K) *Rent.* Rent includes the cost of renting or leasing equipment, facilities, or land.

(L) *Taxes.* Taxes include those taxes (other than taxes described in paragraph (e)(3)(iii)(F) of this section) that are otherwise allowable as a deduction to the extent such taxes are attributable to labor, materials, supplies, equipment, land, or facilities used in production or resale activities.

(M) *Insurance.* Insurance includes the cost of insurance on plant or facility, machinery, equipment, materials, property produced, or property acquired for resale.

(N) *Utilities.* Utilities include the cost of electricity, gas, and water.

(O) *Repairs and maintenance.* Repairs and maintenance include the cost of repairing and maintaining equipment or facilities.

(P) *Engineering and design costs.* Engineering and design costs include preproduction costs, such as costs attributable to research, experimental, engineering, and design activities (to the extent that such amounts are not research and experimental expenditures as described in section 174 and the regulations thereunder).

(Q) *Spoilage.* Spoilage includes the costs of rework labor, scrap, and spoilage.

(R) *Tools and equipment.* Tools and equipment include the costs of tools and equipment which are not otherwise capitalized.

(S) *Quality control.* Quality control includes the costs of quality control and inspection.

(T) *Bidding costs.* Bidding costs are costs incurred in the solicitation of contracts (including contracts pertaining to property acquired for resale) ultimately awarded to the taxpayer. The taxpayer must defer all bidding costs paid or incurred in the solicitation of a particular contract until the contract is awarded. If the contract is awarded to the taxpayer, the bidding costs become part of the indirect costs allocated to the subject matter of the contract. If the contract is not awarded to the taxpayer, bidding costs are deductible in the taxable year that the contract is awarded to another party, or in the taxable year that the taxpayer is notified in writing that no contract will be awarded and that the contract (or a similar or related contract) will not be rebid, or in the taxable year that the taxpayer abandons its bid or proposal, whichever occurs first. Abandoning a bid does not include modifying, supplementing, or changing the original bid or proposal. If the taxpayer is awarded only part of the bid (for example, the taxpayer submitted one bid to build each of two different types of products, and the taxpayer was awarded a contract to build only one of the two types of products), the taxpayer shall deduct the portion of the bidding costs related to the portion of the bid not awarded to the taxpayer. In the case of a bid or proposal for a multi-unit contract, all bidding costs must be included in the costs allocated to the subject matter of the contract awarded to the taxpayer to produce or acquire for resale any of such units. For example, where the taxpayer submits one bid to produce three similar turbines and the taxpayer is awarded a contract to produce only two of the three turbines, all bidding costs must be included in the cost of the two turbines. For purposes of this paragraph (e)(3)(ii)(T), a contract means—

(*1*) In the case of a specific unit of property, any agreement under which the taxpayer would produce or sell property to another party if the agreement is entered into before the taxpayer produces or acquires the specific unit of property to be delivered to the party under the agreement; and

(*2*) In the case of fungible property, any agreement to the extent that, at the time the agreement is entered into, the taxpayer has on hand an insufficient quantity of completed fungible items of such property that may be used to satisfy the agreement (plus any other production or sales agreements of the taxpayer).

(U) *Licensing and franchise costs.* (*1*) Licensing and franchise costs include fees incurred in securing the contractual right to use a trademark, corporate plan, manufacturing procedure, special recipe, or other similar right associated with property produced or property acquired for resale. These costs include the otherwise deductible portion (such as amortization) of the initial fees incurred to obtain the license or franchise and any minimum annual payments and any royalties that are incurred by a licensee or a franchisee. These costs also include fees, payments, and royalties otherwise described in this paragraph (e)(3)(ii)(U) that a taxpayer incurs (within the meaning of section 461) only upon the sale of property produced or acquired for resale.

(*2*) If a taxpayer incurs (within the meaning of section 461) a fee, payment, or royalty described in this paragraph (e)(3)(ii)(U) only upon the sale of property produced or acquired for resale and the cost is required to be capitalized under this paragraph (e)(3), the taxpayer may properly allocate the cost entirely to property produced or acquired for resale by the taxpayer that has been sold.

(V) *Interest.* Interest includes interest on debt incurred or continued during the production period to finance the production of real property or tangible personal property to which section 263A(f) applies.

(W) *Capitalizable service costs.* Service costs that are required to be capitalized include capitalizable service costs and capitalizable mixed service costs as defined in paragraph (e)(4) of this section.

(iii) *Indirect costs not capitalized.* The following indirect costs are not required to be capitalized under section 263A:

(A) *Selling and distribution costs.* These costs are marketing, selling, advertising, and distribution costs.

(B) *Research and experimental expenditures.* Research and experimental expenditures are expenditures described in section 174 and the regulations thereunder.

(C) *Section 179 costs.* Section 179 costs are expenses for certain depreciable assets deductible at the election of the taxpayer under section 179 and the regulations thereunder.

(D) *Section 165 losses.* Section 165 losses are losses under section 165 and the regulations thereunder.

(E) *Cost recovery allowances on temporarily idle equipment and facilities*—(*1*) *In general.* Cost recovery allowances on temporarily idle equipment and facilities include only depreciation, amortization, and cost recovery allowances on equipment and facilities that have been placed in service but are temporarily idle. Equipment and facilities are temporarily idle when a taxpayer takes them out of service for a finite period. However, equipment and facilities are not considered temporarily idle—

(*i*) During worker breaks, non-working hours, or on regularly scheduled non-working days (such as holidays or weekends);

(*ii*) During normal interruptions in the operation of the equipment or facilities;

(*iii*) When equipment is enroute to or located at a job site; or

(*iv*) When under normal operating conditions, the equipment is used or operated only during certain shifts.

(*2*) *Examples.* The provisions of this paragraph (e)(3)(iii)(E) are illustrated by the following examples:

Example 1. Equipment operated only during certain shifts. Taxpayer A manufactures widgets. Although A's manufacturing facility operates 24 hours each day in three shifts, A only operates its stamping machine during one shift each day. Because A only operates its stamping machine during certain shifts, A's stamping machine is not considered temporarily idle during the two shifts that it is not operated.

Example 2. Facility shut down for retooling. Taxpayer B owns and operates a manufacturing facility. B closes its manufacturing facility for two weeks to retool its assembly line. B's manufacturing facility is considered temporarily idle during this two-week period.

(F) *Taxes assessed on the basis of income.* Taxes assessed on the basis of income include only state, local, and foreign income taxes, and franchise taxes that are assessed on the taxpayer based on income.

(G) *Strike expenses.* Strike expenses include only costs associated with hiring employees to replace striking personnel (but not wages of replacement personnel), costs of security, and legal fees associated with settling strikes.

(H) *Warranty and product liability costs.* Warranty costs and product liability costs are costs incurred in fulfilling product warranty obligations for products that have been sold and costs incurred for product liability insurance.

(I) *On-site storage costs.* On-site storage costs are storage and warehousing costs incurred by a taxpayer at an on-site storage facility, as defined in §1.263A–3(c)(5)(ii)(A), with respect to property produced or property acquired for resale.

(J) *Unsuccessful bidding expenses.* Unsuccessful bidding costs are bidding expenses incurred in the solicitation of contracts not awarded to the taxpayer.

(K) *Deductible service costs.* Service costs that are not required to be capitalized include deductible service costs and deductible mixed service costs as defined in paragraph (e)(4) of this section.

(4) *Service costs*—(i) *Introduction.* This paragraph (e)(4) provides definitions and categories of service costs. Paragraph (g)(4) of this section provides specific rules for determining the amount of service costs allocable to property produced or property acquired for resale. In addition, paragraph (h) of this section provides a simplified method for determining the amount of service costs that must be capitalized.

(A) *Definition of service costs.* Service costs are defined as a type of indirect costs (e.g., general and administrative costs) that can be identified specifically with a service department or function or that directly benefit or are incurred by reason of a service department or function.

(B) *Definition of service departments.* Service departments are defined as administrative, service, or support departments that incur service costs. The facts and circumstances of the taxpayer's activities and business organization control whether a department is a service department. For example, service departments include personnel, accounting, data processing, security, legal, and other similar departments.

(ii) *Various service cost categories*—(A) *Capitalizable service costs.* Capitalizable service costs are defined as service costs that directly benefit or are incurred by reason of the performance of the production or resale activities of the taxpayer. Therefore, these service costs are required to be capitalized under section 263A. Examples of service departments or functions that incur capitalizable service costs are provided in paragraph (e)(4)(iii) of this section.

(B) *Deductible service costs.* Deductible service costs are defined as service costs that do not directly benefit or are not incurred by reason of the performance of the production or resale activities of the taxpayer, and therefore, are not required to be capitalized under section 263A. Deductible service costs generally include costs incurred by reason of the taxpayer's overall management or policy guidance functions. In addition, deductible service costs include costs incurred by reason of the marketing, selling, advertising, and distribution activities of the taxpayer. Examples of service departments or functions that incur deductible service costs are provided in paragraph (e)(4)(iv) of this section.

(C) *Mixed service costs.* Mixed service costs are defined as service costs that are partially allocable to production or resale activities (capitalizable mixed service costs) and partially allocable to non-production or non-resale activities (deductible mixed service costs). For example, a personnel department may incur costs to recruit factory workers, the costs of which are allocable to production activities, and it may incur costs to develop wage, salary, and benefit policies, the costs of which are allocable to non-production activities.

(iii) *Examples of capitalizable service costs.* Costs incurred in the following departments or functions are generally allocated among production or resale activities:

(A) The administration and coordination of production or resale activities (wherever performed in the business organization of the taxpayer).

(B) Personnel operations, including the cost of recruiting, hiring, relocating, assigning, and maintaining personnel records or employees.

(C) Purchasing operations, including purchasing materials and equipment, scheduling and coordinating delivery of materials and equipment to or from factories or job sites, and expediting and follow-up.

(D) Materials handling and warehousing and storage operations.

(E) Accounting and data services operations, including, for example, cost accounting, accounts payable, disbursements, and payroll functions (but excluding accounts receivable and customer billing functions).

(F) Data processing.

(G) Security services.

(H) Legal services.

(iv) *Examples of deductible service costs.* Costs incurred in the following departments or functions are not generally allocated to production or resale activities:

(A) Departments or functions responsible for overall management of the taxpayer or for setting overall policy for all of the taxpayer's activities or trades or businesses, such as the board of directors (including their immediate staff), and the chief executive, financial, accounting, and legal officers (including their immediate staff) of the taxpayer, provided that no substantial part of the cost of such departments or functions benefits a particular production or resale activity.

(B) Strategic business planning.

(C) General financial accounting.

(D) General financial planning (including general budgeting) and financial management (including bank relations and cash management).

(E) Personnel policy (such as establishing and managing personnel policy in general; developing wage, salary, and benefit policies; developing employee training programs unrelated to particular production or resale activities; negotiating with labor unions; and maintaining relations with retired workers).

(F) Quality control policy.

(G) Safety engineering policy.

(H) Insurance or risk management policy (but not including bid or performance bonds or insurance related to activities associated with property produced or property acquired for resale).

(I) Environmental management policy (except to the extent that the costs of any system or procedure benefits a particular production or resale activity).

(J) General economic analysis and forecasting.

(K) Internal audit.

(L) Shareholder, public, and industrial relations.

(M) Tax services.

(N) Marketing, selling, or advertising.

(f) *Cost allocation methods*—(1) *Introduction.* This paragraph (f) sets forth various detailed or specific (facts-and-circumstances) cost allocation methods that taxpayers may use to allocate direct and indirect costs to property produced and property acquired for resale. Paragraph (g) of this section provides general rules for applying these allocation methods to various categories of costs (i.e., direct materials, direct labor, and indirect costs, including service costs). In addition, in lieu of a facts-and-circumstances allocation method, taxpayers may use the simplified methods provided in §§1.263A–2(b) and (c) and 1.263A–3(d) to allocate direct and indirect costs to eligible property produced or eligible property acquired for resale; see those sections for definitions of eligible property. Paragraph (h) of this section provides a simplified method for determining the amount of mixed service costs required to be capitalized to eligible property. The methodology set forth in paragraph (h) of this section for mixed service costs may be used in conjunction with either a facts-and-circumstances or a simplified method of allocating costs to eligible property produced or eligible property acquired for resale.

(2) *Specific identification method.* A specific identification method traces costs to a cost objective, such as a function, department, activity, or product, on the basis of a cause and effect or other reasonable relationship between the costs and the cost objective.

(3) *Burden rate and standard cost methods*—(i) *Burden rate method*—(A) *In general.* A burden rate method allocates an appropriate amount of indirect costs to property produced or property acquired for resale during a taxable year using predetermined rates that approximate the actual amount of indirect costs incurred by the taxpayer during the taxable year. Burden rates (such as ratios based on direct costs, hours, or similar items) may be developed by the taxpayer in accordance with acceptable accounting principles and applied in a reasonable manner. A taxpayer may allocate different indirect costs on the basis of different burden rates. Thus, for example, the taxpayer may use one burden rate for allocating the cost of rent and another burden rate for allocating the cost of utilities. Any periodic adjustment to a burden rate that merely reflects current operating conditions, such as increases in automation or changes in operation or prices, is not a change in method of accounting under section 446(e). A change, however, in the concept or base upon which such rates are developed, such as a change from basing the rates on direct labor hours to basing them on direct machine hours, is a change in

method of accounting to which section 446(e) applies.

(B) *Development of burden rates.* The following factors, among others, may be used in developing burden rates:

(*1*) The selection of an appropriate level of activity and a period of time upon which to base the calculation of rates reflecting operating conditions for purposes of the unit costs being determined.

(*2*) The selection of an appropriate statistical base, such as direct labor hours, direct labor dollars, machine hours, or a combination thereof, upon which to apply the overhead rate.

(*3*) The appropriate budgeting, classification, and analysis of expenses (for example, the analysis of fixed versus variable costs).

(C) *Operation of the burden rate method.* The purpose of the burden rate method is to allocate an appropriate amount of indirect costs to production or resale activities through the use of predetermined rates intended to approximate the actual amount of indirect costs incurred. Accordingly, the proper use of the burden rate method under this section requires that any net negative or net positive difference between the total predetermined amount of costs allocated to property and the total amount of indirect costs actually incurred and required to be allocated to such property (i.e., the under or over-applied burden) must be treated as an adjustment to the taxpayer's ending inventory or capital account (as the case may be) in the taxable year in which such difference arises. However, if such adjustment is not significant in amount in relation to the taxpayer's total indirect costs incurred with respect to production or resale activities for the year, such adjustment need not be allocated to the property produced or property acquired for resale unless such allocation is made in the taxpayer's financial statement. The taxpayer must treat both positive and negative adjustments consistently.

(ii) *Standard cost method*—(A) *In general.* A standard cost method allocates an appropriate amount of direct and indirect costs to property produced by the taxpayer through the use of preestablished standard allowances, without reference to costs actually incurred during the taxable year. A taxpayer may use a standard cost method to allocate costs, provided variances are treated in accordance with the procedures prescribed in paragraph (f)(3)(ii)(B) of this section. Any periodic adjustment to standard costs that merely reflects current operating conditions, such as increases in automation or changes in operation or prices, is not a change in method of accounting under section 446(e). A change, however, in the concept or base upon which standard costs are developed is a change in method of accounting to which section 446(e) applies.

(B) *Treatment of variances.* For purposes of this section, net positive overhead variance means the excess of total standard indirect costs over total actual indirect costs and net negative overhead variance means the excess of total actual indirect costs over total standard indirect costs. The proper use of a standard cost method requires that a taxpayer must reallocate to property a pro rata portion of any net negative or net positive overhead variances and any net negative or net positive direct cost variances. The taxpayer must apportion such variances to or among the property to which the costs are allocable. However, if such variances are not significant in amount relative to the taxpayer's total indirect costs incurred with respect to production and resale activities for the year, such variances need not be allocated to property produced or property acquired for resale unless such allocation is made in the taxpayer's financial statement. A taxpayer must treat both positive and negative variances consistently.

(4) *Reasonable allocation methods.* A taxpayer may use the methods described in paragraph (f) (2) or (3) of this section if they are reasonable allocation methods within the meaning of this paragraph (f)(4). In addition, a taxpayer may use any other reasonable method to properly allocate direct and indirect costs among units of property produced or property acquired for resale during the taxable year. An allocation method is reasonable if, with respect to the taxpayer's production or resale activities taken as a whole—

(i) The total costs actually capitalized during the taxable year do not differ significantly from the aggregate costs that would be properly capitalized using another permissible method described in this section or in §§ 1.263A–2 and 1.263A–3, with appropriate consideration given to the volume and value of the taxpayer's production or resale activities, the availability of costing information, the time and cost of using various allocation methods, and the accuracy of the allocation method chosen as compared with other allocation methods;

(ii) The allocation method is applied consistently by the taxpayer; and

(iii) The allocation method is not used to circumvent the requirements of the simplified methods in this section or in § 1.263A–2, § 1.263A–3, or the principles of section 263A.

(g) *Allocating categories of costs*—(1) *Direct materials*. Direct material costs (as defined in paragraph (e)(2) of this section) incurred during the taxable year must be allocated to the property produced or property acquired for resale by the taxpayer using the taxpayer's d of accounting for materials (e.g., specific identification; first-in, first-out (FIFO); or last-in, first-out (LIFO)), or any other reasonable allocation method (as defined under the principles of paragraph (f)(4) of this section).

(2) *Direct labor*. Direct labor costs (as defined in paragraph (e)(2) of this section) incurred during the taxable year are generally allocated to property produced or property acquired for resale using a specific identification method, standard cost method, or any other reasonable allocation method (as defined under the principles of paragraph (f)(4) of this section). All elements of compensation, other than basic compensation, may be grouped together and then allocated in proportion to the charge for basic compensation. Further, a taxpayer is not treated as using an erroneous method of accounting if direct labor costs are treated as indirect costs under the taxpayer's allocation method, provided such costs are capitalized to the extent required by paragraph (g)(3) of this section.

(3) *Indirect costs*. Indirect costs (as defined in paragraph (e)(3) of this section) are generally allocated to intermediate cost objectives such as departments or activities prior to the allocation of such costs to property produced or property acquired for resale. Indirect costs are allocated using either a specific identification method, a standard cost method, a burden rate method, or any other reasonable allocation method (as defined under the principles of paragraph (f)(4) of this section).

(4) *Service costs*—(i) *In general*. Service costs are a type of indirect costs that may be allocated using the same allocation methods available for allocating other indirect costs described in paragraph (g)(3) of this section. Generally, taxpayers that use a specific identification method or another reasonable allocation method must allocate service costs to particular departments or activities based on a factor or relationship that reasonably relates the service costs to the benefits received from the service departments or activities. For example, a reasonable factor for allocating legal services to particular departments or activities is the number of hours of legal services attributable to each department or activity. See paragraph (g)(4)(iv) of this section for other illustrations. Using reasonable factors or relationships, a taxpayer must allocate mixed service costs under a direct reallocation method described in paragraph (g)(4)(iii)(A) of this section, a step-allocation method described in paragraph (g)(4)(iii)(B) of this section, or any other reasonable allocation method (as defined under the principles of paragraph (f)(4) of this section).

(ii) *De minimis rule*. For purposes of administrative convenience, if 90 percent or more of a mixed service department's costs are deductible service costs, a taxpayer may elect not to allocate any portion of the service department's costs to property produced or property acquired for resale. For example, if 90 percent of the costs of an electing taxpayer's industrial relations department benefit the taxpayer's overall policy-making activities, the taxpayer is not required to allocate any portion of these costs to a production activity. Under this election, however, if 90 percent or more of a mixed service department's costs are capitalizable service costs, a taxpayer must allocate 100 percent of the department's costs to the production or resale activity benefitted. For example, if 90 percent of the costs of an electing taxpayer's accounting department benefit the taxpayer's manufacturing activity, the taxpayer must allocate 100 percent of the costs of the accounting department to the manufacturing activity. An election under this paragraph (g)(4)(ii) applies to all of a taxpayer's mixed service departments and constitutes the adoption of a (or a change in) method of accounting under section 446 of the Internal Revenue Code.

(iii) *Methods for allocating mixed service costs*—(A) *Direct reallocation method.* Under the direct reallocation method, the total costs (direct and indirect) of all mixed service departments are allocated only to departments or cost centers engaged in production or resale activities and then from those departments to particular activities. This direct reallocation method ignores benefits provided by one mixed service department to other mixed service departments, and also excludes other mixed service departments from the base used to make the allocation.

(B) *Step-allocation method.* (*1*) Under a step-allocation method, a sequence of allocations is made by the taxpayer. First, the total costs of the mixed service departments that benefit the greatest number of other departments are allocated to—

(*i*) Other mixed service departments;

(*ii*) Departments that incur only deductible service costs; and

(*iii*) Departments that exclusively engage in production or resale activities.

(*2*) A taxpayer continues allocating mixed service costs in the manner described in paragraph (g)(4)(iii)(B)(*1*) of this section (i.e., from the service departments benefitting the greatest number of departments to the service departments benefitting the least number of departments) until all mixed service costs are allocated to the types of departments listed in this paragraph (g)(4)(iii). Thus, a step-allocation method recognizes the benefits provided by one mixed service department to another mixed service department and also includes mixed service departments that have not yet been allocated in the base used to make the allocation.

(C) *Examples.* The provisions of this paragraph (g)(4)(iii) are illustrated by the following examples:

Example 1. Direct reallocation method. (i) Taxpayer E has the following five departments: the Assembling Department, the Painting Department, and the Finishing Department (production departments), and the Personnel Department and the Data Processing Department (mixed service departments). E allocates the Personnel Department's costs on the basis of total payroll costs and the Data Processing Department's costs on the basis of data processing hours.

(ii) Under a direct reallocation method, E allocates the Personnel Department's costs directly to its Assembling, Painting, and Finishing Department, and not to its Data Processing department.

Department	Total dept. costs	Amount of payroll costs	Allocation ratio	Amount allocated
Personnel	$500,000	$50,000	....	<$500,000>
Data Proc'g	250,000	15,000		
Assembling	250,000	15,000	15,000/285,000	26,315
Painting	1,000,000	90,000	90,000/285,000	157,895
Finishing	2,000,000	180,000	180,000/285,000	315,790
Total	$4,000,000	$350,000		

(iii) After E allocates the Personnel Department's costs, E then allocates the costs of its Data Processing Department in the same manner.

Department	Total dept. cost after initial allocation	Total data proc. hours	Allocation ratio	Amount allocated	Total dept. cost after final allocation
Personnel	0	2,000	....	....	0
Data Proc'g	$250,000	....	....	<$250,000>	....

Department	Total dept. cost after initial allocation	Total data proc. hours	Allocation ratio	Amount allocated	Total dept. cost after final allocation
Assembling	276,315	2,000	2,000/10,000	50,000	$326,315
Painting	1,157,895	0	0/10,000	0	1,157,895
Finishing	2,315,790	8,000	8,000/10,000	200,000	2,515,790
Total	$4,000,000	12,000			$4,000,000

Example 2. Step-allocation method. (i) Taxpayer F has the following five departments: the Manufacturing Department (a production department), the Marketing Department and the Finance Department (departments that incur only deductible service costs), the Personnel Department and the Data Processing Department (mixed service departments). F uses a step-allocation method and allocates the Personnel Department's costs on the basis of total payroll costs and the Data Processing Department's costs on the basis of data processing hours. F's Personnel Department benefits all four of F's other departments, while its Data Processing Department benefits only three departments. Because F's Personnel Department benefits the greatest number of other departments, F first allocates its Personnel Department's costs to its Manufacturing, Marketing, Finance and Data Processing departments, as follows:

Department	Total cost of dept.	Total payroll costs	Allocation ratio	Amount allocated
Personnel	$500,000	$50,000		<$500,000>
Data Proc'g	250,000	15,000	15,000/300,000	25,000
Finance	250,000	15,000	15,000/300,000	25,000
Marketing	1,000,000	90,000	90,000/300,000	150,000
Manufac'g	2,000,000	180,000	180,000/300,000	300,000
	4,000,000	350,000		

(ii) Under a step-allocation method, the denominator of F's allocation ratio includes the payroll costs of its Manufacturing, Marketing, Finance, and Data Processing departments.

(iii) Next, F allocates the costs of its Data Processing Department on the basis of data processing hours. Because the costs incurred by F's Personnel Department have already been allocated, no allocation is made to the Personnel Department.

Department	Total dept. cost after initial allocation	Total data proc. hours	Allocation		
ratio.					
Personnel	$0	2,000			$0
Data Proc'g	275,000			<$275,000>	0
Finance	275,000	2,000	2,000/10,000	55,000	330,000
Marketing	1,150,000	0	0/10,000	0	1,150,000
Manufac'g	2,300,000	8,000	8,000/10,000	220,000	2,520,000
	4,000,000	12,000			4,000,000

(iv) Under the second step of F's step-allocation method, the denominator of F's allocation ratio includes the data processing hours of its Manufacturing, Marketing, and Finance Departments, but does not include the data processing hours of its Personnel Department (the other mixed service department) because the costs of that department have previously been allocated.

(iv) *Illustrations of mixed service cost allocations using reasonable factors or relationships.* This paragraph (g)(4)(iv) illustrates various reasonable factors and relationships that may be used in allocating different types of mixed service costs. Taxpayers, however, are permitted to use other reasonable factors and relationships to allocate mixed service costs. In addition, the factors or relationships illustrated in this paragraph (g)(4)(iv) may be used to allocate other types of service costs not illustrated in this paragraph (g)(4)(iv).

(A) *Security services.* The costs of security or protection services must be allocated to each physical area that receives the services using any reasonable method applied consistently (e.g., the size of the physical area, the number of employees in the area, or the relative fair market value of assets located in the area).

(B) *Legal services.* The costs of legal services are generally allocable to a particular production or resale activity on the basis of the approximate number of hours of legal service performed in connection with the activity, including research, bidding, negotiating, drafting, reviewing a contract, obtaining necessary licenses and permits, and resolving disputes. Different hourly rates may be appropriate for different services. In determining the number of hours allocable to any activity, estimates are appropriate, detailed time records are not required to be kept, and insubstantial amounts of services provided to an activity by senior legal staff (such as administrators or reviewers) may be ignored. Legal costs may also be allocated to a particular production or resale activity based on the ratio of the total direct costs incurred for the activity to the total direct costs incurred with respect to all production or resale activities. The taxpayer must also allocate directly to an activity the cost incurred for any outside legal services. Legal costs relating to general corporate functions are not required to be allocated to a particular production or resale activity.

(C) *Centralized payroll services.* The costs of a centralized payroll department or activity are generally allocated to the departments or activities benefitted on the basis of the gross dollar amount of payroll processed.

(D) *Centralized data processing services.* The costs of a centralized data processing department are generally allocated to all departments or activities benefitted using any reasonable basis, such as total direct data processing costs or the number of data processing hours supplied. The costs of data processing systems or applications developed for a particular activity are directly allocated to that activity.

(E) *Engineering and design services.* The costs of an engineering or a design department are generally directly allocable to the departments or activities benefitted based on the ratio of the approximate number of hours of work performed with respect to the particular activity to the total number of hours of engineering or design work performed for all activities. Different services may be allocated at different hourly rates.

(F) *Safety engineering services.* The costs of a safety engineering departments or activities generally benefit all of the taxpayer's activities and, thus, should be allocated using a reasonable basis, such as: the approximate number of safety inspections made in connection with a particular activity as a fraction of total inspections, the number of employees assigned to an activity as a fraction of total employees, or the total labor hours worked in connection with an activity as a fraction of total hours. However, in determining the allocable costs of a safety engineering department, costs attributable to providing a safety program relating only to a particular activity must be directly assigned to such activity. Additionally, the cost of a safety engineering department only responsible for setting safety policy and establishing safety procedures to be used in all of the taxpayer's activities is not required to be allocated.

(v) *Accounting method change.* A change in the method or base used to allocate service costs (such as changing from an allocation base using direct labor costs to a base using direct labor hours), or a change in the taxpayer's determination of what functions or departments of the taxpayer are to be allocated, is a change in method of accounting to which section 446(e) and the regulations thereunder apply.

(h) *Simplified service cost method*—(1) *Introduction.* This paragraph (h) provides a simplified method for determining capitalizable mixed service costs incurred during the taxable year with respect to eligible property (i.e., the aggregate portion of mixed service costs that are properly allocable to the taxpayer's production or resale activities).

(2) *Eligible property*—(i) *In general*. Except as otherwise provided in paragraph (h)(2)(ii) of this section, the simplified service cost method, if elected for any trade or business of the taxpayer, must be used for all production and resale activities of the trade or business associated with any of the following categories of property that are subject to section 263A:

(A) *Inventory property*. Stock in trade or other property properly includible in the inventory of the taxpayer.

(B) *Non-inventory property held for sale*. Non-inventory property held by a taxpayer primarily for sale to customers in the ordinary course of the taxpayer's trade or business.

(C) *Certain self-constructed assets*. Self-constructed assets substantially identical in nature to, and produced in the same manner as, inventory property produced by the taxpayer or other property produced by the taxpayer and held primarily for sale to customers in the ordinary course of the taxpayer's trade or business.

(D) *Self-constructed tangible personal property produced on a routine and repetitive basis—(1) In general*. Self-constructed tangible personal property produced by the taxpayer on a routine and repetitive basis in the ordinary course of the taxpayer's trade or business. Self-constructed tangible personal property is produced by the taxpayer on a routine and repetitive basis in the ordinary course of the taxpayer's trade or business when units of tangible personal property (as defined in §1.263A–10(c)) are mass-produced, that is, numerous substantially identical assets are manufactured within a taxable year using standardized designs and assembly line techniques, and either the applicable recovery period of the property determined under section 168(c) is not longer than 3 years or the property is a material or supply that will be used and consumed within 3 years of being produced. For purposes of this paragraph (h)(2)(i)(D), the applicable recovery period of the assets will be determined at the end of the taxable year in which the assets are placed in service for purposes of §1.46–3(d). Subsequent changes to the applicable recovery period after the assets are placed in service will not affect the determination of whether the assets are produced on a routine and repetitive basis for purposes of this paragraph (h)(2)(i)(D).

(2) *Examples*. The following examples illustrate this paragraph (h)(2)(i)(D):

Example 1. Y is a manufacturer of automobiles. During the taxable year Y produces numerous substantially identical dies and molds using standardized designs and assembly line techniques. The dies and molds have a 3-year applicable recovery period for purposes of section 168(c). Y uses the dies and molds to produce or process particular automobile components and does not hold them for sale. The dies and molds are produced on a routine and repetitive basis in the ordinary course of Y's business for purposes of this paragraph because the dies and molds are both mass-produced and have a recovery period of not longer than 3 years.

Example 2. Z is an electric utility that regularly manufactures and installs identical poles that are used in transmitting and distributing electricity. The poles have a 20-year applicable recovery period for purposes of section 168(c). The poles are not produced on a routine and repetitive basis in the ordinary course of Z's business for purposes of this paragraph because the poles have an applicable recovery period that is longer than 3 years.

(ii) *Election to exclude self-constructed assets*. At the taxpayer's election, the simplified service cost method may be applied within a trade or business to only the categories of inventory property and non-inventory property held for sale described in paragraphs (h)(2)(i)(A) and(B) of this section. Taxpayers electing to exclude the self-constructed assets described in paragraphs (h)(2)(i)(C) and (D) of this section from application of the simplified service cost method must, however, allocate service costs to such property in accordance with paragraph (g)(4) of this section.

(3) *General allocation formula*. (i) Under the simplified service cost method, a taxpayer computes its capitalizable mixed service costs using the following formula:

$$\text{Allocation ratio} \times \text{total mixed service costs}$$

(ii) A producer may elect one of two allocation ratios, the labor-based allocation ratio or the production cost allocation ratio. A reseller that satisfies the requirements for using the simplified resale method of §1.263A–3(d) (whether or not that method is elected) may elect the simplified service cost method, but must use a labor-based allocation ratio. (See §1.263A–3(d) for labor-based allocation ratios to be used in conjunction with the simplified resale method.) The allocation ratio used by a trade or business of a taxpayer is a method of accounting which must be applied consistently within the trade or business.

(4) *Labor-based allocation ratio.* (i) The labor-based allocation ratio is computed as follows:

$$\frac{\text{Section 263A labor costs}}{\text{Total labor costs}}$$

(ii) Section 263A labor costs are defined as the total labor costs (excluding labor costs included in mixed service costs) allocable to property produced and property acquired for resale under section 263A that are incurred in the taxpayer's trade or business during the taxable year. Total labor costs are defined as the total labor costs (excluding labor costs included in mixed service costs) incurred in the taxpayer's trade or business during the taxable year. Total labor costs include labor costs incurred in all parts of the trade or business (i.e., if the taxpayer has both property produced and property acquired for resale, the taxpayer must include labor costs from resale activities as well as production activities). For example, taxpayer G incurs $1,000 of total mixed service costs during the taxable year. G's section 263A labor costs are $5,000 and its total labor costs are $10,000. Under the labor-based allocation ratio, G's capitalizable mixed service costs are $500 (i.e., $1,000 × ($5,000 divided by $10,000)).

(5) *Production cost allocation ratio.* (i) Producers may use the production cost allocation ratio, computed as follows:

$$\frac{\text{Section 263A production costs}}{\text{Total costs}}$$

(ii) Section 263A production costs are defined as the total costs (excluding mixed service costs and interest) allocable to property produced (and property acquired for resale if the producer is also engaged in resale activities) under section 263A that are incurred in the taxpayer's trade or business during the taxable year. Total costs are defined as all costs (excluding mixed service costs and interest) incurred in the taxpayer's trade or business during the taxable year. Total costs include all direct and indirect costs allocable to property produced (and property acquired for resale if the producer is also engaged in resale activities) as well as all other costs of the taxpayer's trade or business, including, but not limited to: salaries and other labor costs of all personnel; all depreciation taken for federal income tax purposes; research and experimental expenditures; and selling, marketing, and distribution costs. Such costs do not include, however, taxes described in paragraph (e)(3)(iii)(F) of this section. For example, taxpayer H, a producer, incurs $1,000 of total mixed service costs in the taxable year. H's section 263A production costs are $10,000 and its total costs are $20,000. Under the production cost allocation ratio, H's capitalizable mixed service costs are $500 (i.e., $1,000 × ($10,000 divided by $20,000)).

(6) *Definition of total mixed service costs.* Total mixed service costs are defined as the total costs incurred during the taxable year in all departments or functions of the taxpayer's trade or business that perform mixed service activities. See paragraph (e)(4)(ii)(C) of this section which defines mixed service costs. In determining the total mixed service costs of a trade or business, the taxpayer must include all costs incurred in its mixed service departments and cannot exclude any otherwise deductible service costs. For example, if the accounting department within a trade or business is a mixed

service department, then in determining the total mixed service costs of the trade or business, the taxpayer cannot exclude the costs of personnel in the accounting department that perform services relating to non-production activities (e.g., accounts receivable or customer billing activities). Instead, the entire cost of the accounting department must be included in the total mixed service costs.

(7) *Costs allocable to more than one business.* To the extent mixed service costs, labor costs, or other costs are incurred in more than one trade or business, the taxpayer must determine the amounts allocable to the particular trade or business for which the simplified service cost method is being applied by using any reasonable allocation method consistent with the principles of paragraph (f)(4) of this section.

(8) *De minimis rule.* If the taxpayer elects to apply the de minimis rule of paragraph (g)(4)(ii) of this section to any mixed service department, the department is not considered a mixed service department for purposes of the simplified service cost method. Instead, the costs of such department are allocated exclusively to the particular activity satisfying the 90-percent test.

(9) *Separate election.* A taxpayer may elect the simplified service cost method in conjunction with any other allocation method used at the trade or business level, including the simplified methods described in §§ 1.263A–2(b) and (c) and 1.263A–3(d). However, the election of the simplified service cost method must be made independently of the election to use those other simplified methods.

(i) [Reserved]

(j) *Exemption for certain small business taxpayers*—(1) *In general.* A taxpayer, other than a tax shelter prohibited from using the cash receipts and disbursements method of accounting under section 448(a)(3), that meets the gross receipts test under section 448(c) and § 1.448–2(c) (section 448(c) gross receipts test) for any taxable year (small business taxpayer) is not required to capitalize costs under section 263A to any real or tangible personal property produced, and any real or personal property described in section 1221(a)(1) acquired for resale, during that taxable year. This section 448(c) gross receipts test applies even if the taxpayer is not otherwise subject to section 448(a).

(2) *Application of the section 448(c) gross receipts test*—(i) *In general.* In the case of any taxpayer that is not a corporation or a partnership, and except as provided in paragraphs (j)(2)(ii) and (iii) of this section, the section 448(c) gross receipts test is applied in the same manner as if each trade or business of the taxpayer were a corporation or partnership.

(ii) *Gross receipts of individuals, etc.* Except when the aggregation rules of section 448(c)(2) apply, the gross receipts of a taxpayer other than a corporation or partnership are the amount derived from all trades or businesses of such taxpayer. Amounts not related to a trade or business are excluded from the gross receipts of the taxpayer. For example, an individual taxpayer's gross receipts do not include inherently personal amounts, such as personal injury awards or settlements with respect to an injury of the individual taxpayer, disability benefits, Social Security benefits received by the taxpayer during the taxable year, and wages received as an employee that are reported on Form W–2.

(iii) *Partners and S corporation shareholders.* Except when the aggregation rules of section 448(c)(2) apply, each partner in a partnership includes a share of the partnership's gross receipts in proportion to such partner's distributive share, as determined under section 704, of items of gross income that were taken into account by the partnership under section 703. Similarly, a shareholder of an S corporation includes such shareholder's *pro rata* share of S corporation gross receipts taken into account by the S corporation under section 1363(b).

(iv) *Examples.* The operation of this paragraph (j) is illustrated by the following examples:

(A) *Example 1.* Taxpayer A is an individual who operates two separate and distinct trades or business that are reported on Schedule C, *Profit or Loss from Business,* of A's Federal income tax return. For 2020, one trade or business has annual average gross receipts of $5 million, and the other trade or business has average annual gross receipts of $35 million. Under paragraph (j)(2)(ii) of this section, for 2020, neither of A's trades or businesses meets the gross receipts test of paragraph (j)(2) of this section ($5 million + $35 million = $40 million, which is greater than the inflation-adjusted gross receipts test amount for 2020, which is $26 million).

(B) *Example 2.* Taxpayer B is an individual who operates three separate and distinct trades or business that are reported on Schedule C of B's Federal income tax return. For 2020, Business X is a retail store with average annual gross receipts of $15 million, Business Y is a dance studio with average annual gross receipts of $6 million, and Business Z is a car repair shop with average annual gross receipts of $12 million. Under paragraph (j)(2)(ii) of this section, B's gross receipts are the combined amount derived from all three of B's trades or businesses. Therefore, for 2020, X, Y and Z do not meet the gross receipts test of paragraph (j)(2)(i) of this section ($15 million + $6 million + $12 million = $33 million, which is greater than the inflation-adjusted gross receipts test amount for 2020, which is $26 million).

(3) *Change in method of accounting*—(i) *In general.* A change from applying the small business taxpayer exemption under paragraph (j) of this section to not applying the exemption under this paragraph (j), or *vice versa,* is a change in method of accounting under section 446(e) and §1.446–1(e). A taxpayer changing its method of accounting under paragraph (j) of this section may do so only with the consent of the Commissioner as required under section 446(e) and §1.446–1. In the case of any taxpayer required by this section to change its method of accounting for any taxable year, the change shall be treated as a change initiated by the taxpayer. For rules relating to the clear reflection of income and the pattern of consistent treatment of an item, see section 446 and §1.446–1. The amount of the net section 481(a) adjustment and the adjustment period necessary to implement a change in method of accounting required under this section are determined under §1.446–1(e) and the applicable administrative procedures to obtain the Commissioner's consent to change a method of accounting as published in the Internal Revenue Bulletin (see Revenue Procedure 2015–13 (2015–5 IRB 419) (or successor) (see also §601.601(d)(2) of this chapter).

(ii) *Automatic consent for certain method changes.* Certain changes in method of accounting made under paragraph (j) of this section may be made under the procedures to obtain the automatic consent of the Commissioner to change a method of accounting. See Revenue Procedure 2015–13 (2015–5 IRB 419) (or successor) (see also §601.601(d)(2) of this chapter)). In certain situations, special terms and conditions may apply.

(k) *Special rules*—(1) *Costs provided by a related person*—(i) *In general.* A taxpayer subject to section 263A must capitalize an arm's-length charge for any section 263A costs (e.g., costs of materials, labor, or services) incurred by a related person that are properly allocable to the property produced or property acquired for resale by the taxpayer. Both the taxpayer and the related person must account for the transaction as if an arm's-length charge had been incurred by the taxpayer with respect to its property produced or property acquired for resale. For purposes of this paragraph (j)(1)(i), a taxpayer is considered related to another person if the taxpayer and such person are described in section 482. Further, for purposes of this paragraph (j)(1)(i), arm's-length charge means the arm's-length charge (or other appropriate charge where permitted and applicable) under the principles of section 482. Any correlative adjustments necessary because of the arm's-length charge requirement of this paragraph (j)(1)(i) shall be determined under the principles of section 482.

(ii) *Exceptions.* The provisions of paragraph (j)(1)(i) of this section do not apply if, and to the extent that—

(A) It would be inappropriate under the principles of section 482 for the Commissioner to adjust the income of the taxpayer or the related person with respect to the transaction at issue; or

(B) A transaction is accounted for under an alternative Internal Revenue Code section resulting in the capitalization (or deferral of the deduction) of the costs of the items provided by the related party and the related party does not deduct such costs earlier than the costs would have been deducted by the taxpayer if the costs were capitalized under section 263A. See §1.1502–13.

(2) *Optional capitalization of period costs*—(i) *In general.* Taxpayers are not required to capitalize indirect costs that do not directly benefit or are not incurred by reason of the production of property or acquisition of property for resale (i.e., period costs). A taxpayer may, however, elect to capitalize certain period costs if: The method is consistently applied; is used in computing beginning inventories, ending inventories, and cost of goods sold; and does not result in a material distortion of the taxpayer's income. A material distortion relates to the source, character, amount, or timing of the cost capitalized or any other item affected by the capitalization of the cost. Thus, for example, a taxpayer may not capitalize a period cost under section 263A if capitalization would result in a material change in the computation of the foreign tax credit limitation under section 904. An election to capitalize a period cost is the adoption of (or a change in) a method of accounting under section 446 of the Internal Revenue Code.

(ii) *Period costs eligible for capitalization.* The types of period costs eligible for capitalization under this paragraph (j)(2) include only the types of period costs (e.g., under paragraph (e)(3)(iii) of this section) for which some portion of the costs incurred is properly allocable to property produced or property acquired for resale in the year of the election. Thus, for example, marketing or advertising costs, no portion of which are properly allocable to property produced or property acquired for resale, do not qualify for elective capitalization under this paragraph (j)(2).

(3) *Trade or business application.* Notwithstanding the references generally to taxpayer throughout this section and §§1.263A–2 and 1.263A–3, the methods of accounting provided under section 263A are to be elected and applied independently for each separate and distinct trade or business of the taxpayer in accordance with the provisions of section 446(d) and the regulations thereunder.

(4) *Transfers with a principal purpose of tax avoidance.* The District Director may require appropriate adjustments to valuations of inventory and other property subject to section 263A if a transfer of property is made to another person for a principal purpose of avoiding the application of section 263A. Thus, for example, the District Director may require a taxpayer using the simplified production method of §1.263A–2(b) to apply that method to transferred inventories immediately prior to a transfer under section 351 if a principal purpose of the transfer is to avoid the application of section 263A.

(l) *Change in method of accounting*—(1) *In general.* A change in a taxpayer's treatment of mixed service costs to comply with paragraph (h)(2)(i)(D) of this section is a change in method of accounting to which the provisions of sections 446 and 481 and the regulations under those sections apply. See §1.263A–7. For a taxpayer's first taxable year ending on or after August 2, 2005, the taxpayer is granted the consent of the Commissioner to change its method of accounting to comply with paragraph (h)(2)(i)(D) of this section, provided the taxpayer follows the administrative procedures, as modified by paragraphs (k)(2) through (4) of this section, issued under §1.446–1(e)(3)(ii) for obtaining the Commissioner's automatic consent to a change in accounting method (for further guidance, for example, see Rev. Proc. 2002–9 (2002–1 CB 327), as modified and clarified by Announcement 2002–17 (2002–1 CB 561), modified and amplified by Rev. Proc. 2002–19 (2002–1 CB 696), and amplified, clarified, and modified by Rev. Proc. 2002–54 (2002–2 CB 432), and §601.601(d)(2)(ii)(*b*) of this chapter). For purposes of Form 3115, "Application for Change in Accounting Method," the designated number for the automatic accounting method change authorized by this paragraph (k) is "95." If Form 3115 is revised or renumbered, any reference in this section to that form is treated as a reference to the revised or renumbered form. Alternatively, notwithstanding the provisions of any administrative procedures that preclude a taxpayer from requesting the advance consent of the Commissioner to change a method of accounting that is required to be made pursuant to a published automatic change procedure, for its first taxable year ending on or after August 2, 2005, a taxpayer may request the advance consent of the Commissioner to change its method of accounting to comply with paragraph (h)(2)(i)(D) of this section, provided the taxpayer follows the administrative procedures, as modified by paragraphs (k)(2) through (5) of this section, for obtaining the advance consent of the Commissioner (for further guidance, for example, see Rev. Proc. 97–27 (1997–1 CB 680), as modified and amplified by Rev. Proc. 2002–19 (2002–1 CB 696), as amplified and clarified by Rev. Proc. 2002–54 (2002–2 CB 432), and §601.601(d)(2)(ii)(*b*) of this chapter). For the taxpayer's second and subsequent taxable years ending on or after August 2, 2005, requests to secure the consent of the Commissioner must be made under the administrative procedures, as modified by paragraphs (k)(3) and (4) of this section, for obtaining the Commissioner's advance consent to a change in accounting method.

(2) *Scope limitations.* Any limitations on obtaining the automatic consent or advance consent of the Commissioner do not apply to a taxpayer seeking to change its method of accounting to comply with paragraph (h)(2)(i)(D) of this section for its first taxable year ending on or after August 2, 2005.

(3) *Audit protection.* A taxpayer that changes its method of accounting in accordance with this paragraph (k) to comply with paragraph (h)(2)(i)(D) of this section does not receive audit protection if its method of accounting for mixed service costs is an issue under consideration at the time the application is filed with the national office.

(4) *Section 481(a) adjustment.* A change in method of accounting to conform to paragraph (h)(2)(i)(D) of this section requires a section 481(a) adjustment. The section 481(a) adjustment period is two taxable years for a net positive adjustment for an accounting method change that is made to conform to paragraph (h)(2)(i)(D) of this section.

(5) *Time for requesting change.* Notwithstanding the provisions of §1.446–1(e)(3)(i) and any contrary administrative procedure, a taxpayer may submit a request for advance consent to change its method of accounting to comply with paragraph (h)(2)(i)(D) of this section for its first taxable year ending on or after August 2, 2005, on or before the date that is 30 days after the end of the taxable year for which the change is requested.

(m) *Effective/applicability date*—(1) *In general.* Except as provided in (l)(2), (l)(3), and (l)(4) of this section, the effective dates for this section are provided in paragraph (a)(2) of this section.

(2) *Mixed service costs; self-constructed tangible personal property produced on a routine and repetitive basis.* Paragraphs (h)(2)(i)(D), (k), and (l)(2) of this section apply for taxable years ending on or after August 2, 2005.

(3) *Costs allocable to property sold; indirect costs; licensing and franchise costs.* Paragraphs (c)(5), (e)(3)(i), and (e)(3)(ii)(U) of this section apply for taxable years ending on or after January 13, 2014.

(4) *Materials and supplies*—(i) *In general.* The last sentence of paragraphs (e)(2)(i)(A) and (e)(3)(ii)(E) of this section, and paragraph (l)(4) of this section apply to amounts paid (to acquire or produce property) in taxable years beginning on or after January 1, 2014.

(ii) *Early application of this section.* A taxpayer may choose to apply the last sentence of paragraphs (e)(2)(i)(A) and (e)(3)(ii)(E) of this section, and paragraph (l)(4) of this section to amounts paid (to acquire or produce property) in taxable years beginning on or after January 1, 2012.

(iii) *Optional application of TD 9564.* A taxpayer may choose to apply §1.263A–1T(b)(14), the introductory phrase of §1.263A–1T(c)(4), the last sentence of §1.263A–1T(e)(2)(i)(A), the last sentence of §1.263A–1T(e)(3)(ii)(E), §1.263A–1T(l), and §1.263A–1T(m)(2), as these provisions are contained in TD 9564 (76 FR 81060) December 27, 2011, to amounts paid (to acquire or produce property) in taxable years beginning on or after January 1, 2012, and before January 1, 2014.

(5) *Definitions of section 471 costs and additional section 263A costs.* Paragraphs (d)(2) and (3) of this section apply for taxable years beginning on or after November 20, 2018. For any taxable year that both begins before November 20,

2018 and ends after November 20, 2018, the IRS will not challenge return positions consistent with all of paragraphs (d)(2) and (3) of this section.

(6) *Exemption for certain small business taxpayers.* The second and third sentence in paragraph (a)(2)(i), paragraphs (b)(1) and (j) of this section apply to taxable years beginning on or after January 5, 2021. However, for a taxable year beginning after December 31, 2017, and before January 5, 2021, a taxpayer may apply the paragraphs described in the first sentence of this paragraph (m)(6), provided that the taxpayer follows all the applicable rules contained in the regulations under section 263A for such taxable year and all subsequent taxable years.

[T.D. 8482, 58 FR 42209, Aug. 9, 1993]

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting §1.263A–1, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at *www.govinfo.gov.*

§ 1.263A–2 Rules relating to property produced by the taxpayer.

(a) *In general.* Section 263A applies to real property and tangible personal property produced by a taxpayer for use in its trade or business or for sale to its customers. In addition, section 263A applies to property produced for a taxpayer under a contract with another party. The principal terms related to the scope of section 263A with respect to producers are provided in this paragraph (a). See §1.263A–1(b)(11) for an exception in the case of certain de minimis property provided to customers incident to the provision of services. For taxable years beginning after December 31, 2017, see §1.263A–1(j) for an exception in the case of a small business taxpayer that meets the gross receipts test of section 448(c) and §1.448–2(c).

(1) *Produce*—(i) *In general.* For purposes of section 263A, produce includes the following: construct, build, install, manufacture, develop, improve, create, raise, or grow.

(ii) *Ownership*—(A) *General rule.* Except as provided in paragraphs (a)(1)(ii)(B) and (C) of this section, a taxpayer is not considered to be producing property unless the taxpayer is considered an owner of the property produced under federal income tax principles. The determination as to whether a taxpayer is an owner is based on all of the facts and circumstances, including the various benefits and burdens of ownership vested with the taxpayer. A taxpayer may be considered an owner of property produced, even though the taxpayer does not have legal title to the property.

(B) *Property produced for the taxpayer under a contract*—(*1*) *In general.* Property produced for the taxpayer under a contract with another party is treated as property produced by the taxpayer to the extent the taxpayer makes payments or otherwise incurs costs with respect to the property. A taxpayer has made payment under this section if the transaction would be considered payment by a taxpayer using the cash receipts and disbursements method of accounting.

(*2*) *Definition of a contract*—(*i*) *General rule.* Except as provided under paragraph (a)(1)(ii)(B)(*2*)(*ii*) of this section, a contract is any agreement providing for the production of property if the agreement is entered into before the production of the property to be delivered under the contract is completed. Whether an agreement exists depends on all the facts and circumstances. Facts and circumstances indicating an agreement include, for example, the making of a prepayment, or an arrangement to make a prepayment, for property prior to the date of the completion of production of the property, or the incurring of significant expenditures for property of specialized design or specialized application that is not intended for self-use.

(*ii*) *Routine purchase order exception.* A routine purchase order for fungible property is not treated as a contract for purposes of this section. An agreement will not be treated as a routine purchase order for fungible property, however, if the contractor is required to make more than de minimis modifications to the property to tailor it to the customer's specific needs, or if at the time the agreement is entered into, the customer knows or has reason to know that the contractor cannot satisfy the agreement within 30 days out of existing stocks and normal production of finished goods.

(C) Home construction contracts. Section 263A applies to a home construction contract unless that contract will be completed within two years of the contract commencement date, and, for contracts entered into after December 31, 2017, in taxable years ending after December 31, 2017, the taxpayer meets the gross receipts test of section 448(c) and § 1.448–2(c) for the taxable year in which such contract is entered into. Except as otherwise provided in this paragraph (a)(1)(ii)(C), section 263A applies to such a contract even if the contractor is not considered the owner of the property produced under the contract under Federal income tax principles.

(2) *Tangible personal property*—(i) *General rule.* In general, section 263A applies to the costs of producing tangible personal property, and not to the costs of producing intangible property. For example, section 263A applies to the costs manufacturers incur to produce goods, but does not apply to the costs financial institutions incur to originate loans.

(ii) *Intellectual or creative property.* For purposes of determining whether a taxpayer producing intellectual or creative property is producing tangible personal property or intangible property, the term tangible personal property includes films, sound recordings, video tapes, books, and other similar property embodying words, ideas, concepts, images, or sounds by the creator thereof. Other similar property for this purpose generally means intellectual or creative property for which, as costs are incurred in producing the property, it is intended (or is reasonably likely) that any tangible medium in which the property is embodied will be mass distributed by the creator or any one or more third parties in a form that is not substantially altered. However, any intellectual or creative property that is embodied in a tangible medium that is mass distributed merely incident to the distribution of a principal product or good of the creator is not other similar property for these purposes.

(A) *Intellectual or creative property that is tangible personal property.* Section 263A applies to tangible personal property defined in this paragraph (a)(2) without regard to whether such property is treated as tangible or intangible property under other sections of the Internal Revenue Code. Thus, for example, section 263A applies to the costs of producing a motion picture or researching and writing a book even though these assets may be considered intangible for other purposes of the Internal Revenue Code. Tangible personal property includes, for example, the following:

(*1*) *Books.* The costs of producing and developing books (including teaching aids and other literary works) required to be capitalized under this section include costs incurred by an author in researching, preparing, and writing the book. (However, see section 263A(h), which provides an exemption from the capitalization requirements of section 263A in the case of certain free-lance authors.) In addition, the costs of producing and developing books include prepublication expenditures incurred by publishers, including payments made to authors (other than commissions for sales of books that have already taken place), as well as costs incurred by publishers in writing, editing, compiling, illustrating, designing, and developing the books. The costs of producing a book also include the costs of producing the underlying manuscript, copyright, or license. (These costs are distinguished from the separately capitalizable costs of printing and binding the tangible medium embodying the book (e.g., paper and ink).) See § 1.174–2(a)(1), which provides that the term research or experimental expenditures does not include expenditures incurred for research in connection with literary, historical, or similar projects.

(*2*) *Sound recordings.* A sound recording is a work that results from the fixation of a series of musical, spoken, or other sounds, regardless of the nature of the material objects, such as discs, tapes, or other phonorecordings, in which such sounds are embodied.

(B) *Intellectual or creative property that is not tangible personal property.* Items that are not considered tangible personal property within the meaning of section 263A(b) and paragraph (a)(2)(ii) of this section include:

(*1*) *Evidences of value.* Tangible personal property does not include property that is representative or evidence of value, such as stock, securities, debt instruments, mortgages, or loans.

(*2*) *Property provided incident to services.* Tangible personal property does not include de minimis property provided to a client or customer incident to the provision of services, such as wills prepared by attorneys, or blueprints prepared by architects. See §1.263A–1(b)(11).

(3) *Costs required to be capitalized by producers*—(i) *In general.* Except as specifically provided in section 263A(f) with respect to interest costs, producers must capitalize direct and indirect costs properly allocable to property produced under section 263A, without regard to whether those costs are incurred before, during, or after the production period (as defined in section 263A(f)(4)(B)).

(ii) *Pre-production costs.* If property is held for future production, taxpayers must capitalize direct and indirect costs allocable to such property (e.g., purchasing, storage, handling, and other costs), even though production has not begun. If property is not held for production, indirect costs incurred prior to the beginning of the production period must be allocated to the property and capitalized if, at the time the costs are incurred, it is reasonably likely that production will occur at some future date. Thus, for example, a manufacturer must capitalize the costs of storing and handling raw materials before the raw materials are committed to production. In addition, a real estate developer must capitalize property taxes incurred with respect to property if, at the time the taxes are incurred, it is reasonably likely that the property will be subsequently developed.

(iii) *Post-production costs.* Generally, producers must capitalize all indirect costs incurred subsequent to completion of production that are properly allocable to the property produced. Thus, for example, storage and handling costs incurred while holding the property produced for sale after production must be capitalized to the property to the extent properly allocable to the property. However, see §1.263A–3(c) for exceptions.

(4) *Practical capacity concept.* Notwithstanding any provision to the contrary, the use, directly or indirectly, of the practical capacity concept is not permitted under section 263A. For purposes of section 263A, the term practical capacity concept means any concept, method, procedure, or formula (such as the practical capacity concept described in §1.471–11(d)(4)) whereunder fixed costs are not capitalized because of the relationship between the actual production at the taxpayer's production facility and the practical capacity of the facility. For purposes of this section, the practical capacity of a facility includes either the practical capacity or theoretical capacity of the facility, as defined in §1.471–11(d)(4), or any similar determination of productive or operating capacity. The practical capacity concept may not be used with respect to any activity to which section 263A applies (i.e., production or resale activities). A taxpayer shall not be considered to be using the practical capacity concept solely because the taxpayer properly does not capitalize costs described in §1.263A–1(e)(3)(iii)(E), relating to certain costs attributable to temporarily idle equipment.

(5) *Taxpayers required to capitalize costs under this section.* This section generally applies to taxpayers that produce property. If a taxpayer is engaged in both production activities and resale activities, the taxpayer applies the principles of this section as if it read production or resale activities, and by applying appropriate principles from §1.263A–3. If a taxpayer is engaged in both production and resale activities, the taxpayer may elect the simplified production method or the modified simplified production method provided in this section, but generally may not elect the simplified resale method discussed in §1.263A–3(d). If elected, the simplified production method or the modified simplified production method must be applied to all eligible property produced and all eligible property acquired for resale by the taxpayer.

(b) *Simplified production method*—(1) *Introduction*. This paragraph (b) provides a simplified method for determining the additional section 263A costs properly allocable to ending inventories of property produced and other eligible property on hand at the end of the taxable year.

(2) *Eligible property*—(i) *In general*. Except as otherwise provided in paragraph (b)(2)(ii) of this section, the simplified production method, if elected for any trade or business of a producer, must be used for all production and resale activities associated with any of the following categories of property to which section 263A applies:

(A) *Inventory property*. Stock in trade or other property properly includible in the inventory of the taxpayer.

(B) *Non-inventory property held for sale*. Non-inventory property held by a taxpayer primarily for sale to customers in the ordinary course of the taxpayer's trade or business.

(C) *Certain self-constructed assets*. Self-constructed assets substantially identical in nature to, and produced in the same manner as, inventory property produced by the taxpayer or other property produced by the taxpayer and held primarily for sale to customers in the ordinary course of the taxpayer's trade or business.

(D) *Self-constructed tangible personal property produced on a routine and repetitive basis—(1) In general*. Self-constructed tangible personal property produced by the taxpayer on a routine and repetitive basis in the ordinary course of the taxpayer's trade or business. Self-constructed tangible personal property is produced by the taxpayer on a routine and repetitive basis in the ordinary course of the taxpayer's trade or business when units of tangible personal property (as defined in §1.263A–10(c)) are mass-produced, that is, numerous substantially identical assets are manufactured within a taxable year using standardized designs and assembly line techniques, and either the applicable recovery period of the property determined under section 168(c) is not longer than 3 years or the property is a material or supply that will be used and consumed within 3 years of being produced. For purposes of this paragraph (b)(2)(i)(D), the applicable recovery period of the assets will be determined at the end of the taxable year in which the assets are placed in service for purposes of §1.46–3(d). Subsequent changes to the applicable recovery period after the assets are placed in service will not affect the determination of whether the assets are produced on a routine and repetitive basis for purposes of this paragraph (b)(2)(i)(D).

(2) *Examples*. The following examples illustrate this paragraph (b)(2)(i)(D):

Example 1. Y is a manufacturer of automobiles. During the taxable year Y produces numerous substantially identical dies and molds using standardized designs and assembly line techniques. The dies and molds have a 3-year applicable recovery period for purposes of section 168(c). Y uses the dies and molds to produce or process particular automobile components and does not hold them for sale. The dies and molds are produced on a routine and repetitive basis in the ordinary course of Y's business for purposes of this paragraph because the dies and molds are both mass-produced and have a recovery period of not longer than 3 years.

Example 2. Z is an electric utility that regularly manufactures and installs identical poles that are used in transmitting and distributing electricity. The poles have a 20-year applicable recovery period for purposes of section 168(c). The poles are not produced on a routine and repetitive basis in the ordinary course of Z's business for purposes of this paragraph because the poles have an applicable recovery period that is longer than 3 years.

(ii) *Election to exclude self-constructed assets*. At the taxpayer's election, the simplified production method may be applied within a trade or business to only the categories of inventory property and non-inventory property held for sale described in paragraphs (b)(2)(i) (A) and (B) of this section. Taxpayers electing to exclude the self- constructed assets, defined in paragraphs (b)(2)(i) (C) and (D) of this section, from application of the simplified production method must, however, allocate additional section 263A costs to such property in accordance with §1.263A–1 (f).

(3) *Simplified production method without historic absorption ratio election*—(i) *General allocation formula*—(A) *In general*. Except as otherwise provided in paragraph (b)(3)(iv) of this section, the additional section 263A costs allocable

to eligible property remaining on hand at the close of the taxable year under the simplified production method are computed as follows:

$$\text{Absorption ratio} \times \text{section 471 costs remaining on hand at year end}$$

(B) *Effect of allocation.* The absorption ratio generally is multiplied by the section 471 costs remaining in ending inventory or otherwise on hand at the end of each taxable year in which the simplified production method is applied. The resulting product is the additional section 263A costs that are added to the taxpayer's ending section 471 costs to determine the section 263A costs that are capitalized. See, however, paragraph (b)(3)(iii) of this section for special rules applicable to LIFO taxpayers. Except as otherwise provided in this section or in §1.263A–1 or 1.263A–3, additional section 263A costs that are allocated to inventories on hand at the close of the taxable year under the simplified production method of this paragraph (b) are treated as inventory costs for all purposes of the Internal Revenue Code.

(ii) *Definitions*—(A) *Absorption ratio.* Under the simplified production method, the absorption ratio is determined as follows:

$$\frac{\text{Additional section 263A costs incurred during the taxable year}}{\text{Section 471 costs incurred during the taxable year}}$$

(*1*) *Additional section 263A costs incurred during the taxable year.* Additional section 263A costs incurred during the taxable year are defined as the additional section 263A costs described in §1.263A–1(d)(3) that a taxpayer incurs during its current taxable year.

(*2*) *Section 471 costs incurred during the taxable year.* Section 471 costs incurred during the taxable year are defined as the section 471 costs described in §1.263A–1(d)(2) that a taxpayer incurs during its current taxable year.

(B) *Section 471 costs remaining on hand at year end.* Section 471 costs remaining on hand at year end means the section 471 costs, as defined in §1.263A–1(d)(2), that a taxpayer incurs during its current taxable year which remain in its ending inventory or are otherwise on hand at year end. For LIFO inventories of a taxpayer, the section 471 costs remaining on hand at year end means the increment, if any, for the current year stated in terms of section 471 costs. See paragraph (b)(3)(iii) of this section.

(C) *Costs allocated to property sold.* Additional section 263A costs incurred during the taxable year, as defined in paragraph (b)(3)(ii)(A)(*1*) of this section, section 471 costs incurred during the taxable year, as defined in paragraph (b)(3)(ii)(A)(*2*) of this section, and section 471 costs remaining on hand at year end, as defined in paragraph (b)(3)(ii)(B) of this section, do not include costs described in §1.263A–1(e)(3)(ii) or cost reductions described in §1.471–3(e) that a taxpayer properly allocates entirely to property that has been sold.

(iii) *LIFO taxpayers electing the simplified production method*—(A) *In general.* Under the simplified production method, a taxpayer using a LIFO method must calculate a particular year's index (e.g., under §1.472–8(e)) without regard to its additional section 263A costs. Similarly, a taxpayer that adjusts current-year costs by applicable indexes to determine whether there has been an inventory increment or decrement in the current year for a particular LIFO pool must disregard the additional section 263A costs in making that determination.

(B) *LIFO increment.* If the taxpayer determines there has been an inventory increment, the taxpayer must state the amount of the increment in current-year dollars (stated in terms of section

471 costs). The taxpayer then multiplies this amount by the absorption ratio. The resulting product is the additional section 263A costs that must be added to the taxpayer's increment for the year stated in terms of section 471 costs.

(C) *LIFO decrement.* If the taxpayer determines there has been an inventory decrement, the taxpayer must state the amount of the decrement in dollars applicable to the particular year for which the LIFO layer has been invaded. The additional section 263A costs incurred in prior years that are applicable to the decrement are charged to cost of goods sold. The additional section 263A costs that are applicable to the decrement are determined by multiplying the additional section 263A costs allocated to the layer of the pool in which the decrement occurred by the ratio of the decrement (excluding additional section 263A costs) to the section 471 costs in the layer of that pool.

(iv) *De minimis rule for producers with total indirect costs of $200,000 or less*—(A) *In general.* If a producer using the simplified production method incurs $200,000 or less of total indirect costs in a taxable year, the additional section 263A costs allocable to eligible property remaining on hand at the close of the taxable year are deemed to be zero. Solely for purposes of this paragraph (b)(3)(iv), taxpayers are permitted to exclude any category of indirect costs (listed in §1.263A–1(e)(3)(iii)) that is not required to be capitalized (e.g., selling and distribution costs) in determining total indirect costs.

(B) *Related party and aggregation rules.* In determining whether the producer incurs $200,000 or less of total indirect costs in a taxable year, the related party and aggregation rules of §1.263A–3(b)(3) are applied by substituting total indirect costs for gross receipts wherever gross receipts appears.

(v) *Examples.* The provisions of this paragraph (b) are illustrated by the following examples.

Example 1. FIFO inventory method. (i) Taxpayer J uses the FIFO method of accounting for inventories. J's beginning inventory for 1994 (all of which is sold during 1994) is $2,500,000 (consisting of $2,000,000 of section 471 costs and $500,000 of additional section 263A costs). During 1994, J incurs $10,000,000 of section 471 costs and $1,000,000 of additional section 263A costs. J's additional section 263A costs include capitalizable mixed service costs computed under the simplified service cost method as well as other allocable costs. J's section 471 costs remaining in ending inventory at the end of 1994 are $3,000,000. J computes its absorption ratio for 1994, as follows:

$$\frac{\text{Additional section 263A costs incurred during 1994}}{\text{Section 471 costs incurred during 1994}} = \frac{\$1{,}000{,}000}{\$10{,}000{,}000} = 10\%$$

(ii) Under the simplified production method, J determines the additional section 263A costs allocable to its ending inventory by multiplying the absorption ratio by the section 471 costs remaining in its ending inventory:

$$\text{Additional section 263A costs} = 10\% \times \$3{,}000{,}000 = \$300{,}000$$

(iii) J adds this $300,000 to the $3,000,000 of section 471 costs remaining in its ending inventory to calculate its total ending inventory of $3,300,000. The balance of J's additional section 263A costs incurred during 1994, $700,000, ($1,000,000 less $300,000) is taken into account in 1994 as part of J's cost of goods sold.

Example 2. LIFO inventory method. (i) Taxpayer K uses a dollar-value LIFO inventory method. K's beginning inventory for 1994 is $2,500,000 (consisting of $2,000,000 of section 471 costs and $500,000 of additional section 263A costs). During 1994, K incurs $10,000,000 of section 471 costs and $1,000,000 of additional section 263A costs. K's 1994 LIFO increment is $1,000,000 ($3,000,000 of section 471 costs in ending inventory less $2,000,000 of section 471 costs in beginning inventory).

(ii) To determine the additional section 263A costs allocable to its ending inventory, K multiplies the 10% absorption ratio ($1,000,000 of additional section 263A costs divided by $10,000,000 of section 471 costs) by the $1,000,000 LIFO increment. Thus, K's additional section 263A costs allocable to its ending inventory are $100,000 ($1,000,000 multiplied by 10%). This $100,000 is added to the $1,000,000 to determine a total 1994 LIFO increment of $1,100,000. K's ending inventory is $3,600,000 (its beginning inventory of $2,500,000 plus the $1,100,000 increment). The balance of K's additional section 263A costs incurred during 1994, $900,000 ($1,000,000 less $100,000), is taken into account in 1994 as part of K's cost of goods sold.

(iii) In 1995, K sells one-half of the inventory in its 1994 LIFO increment. K must include in its cost of goods sold for 1995 the amount of additional section 263A costs relating to this inventory, $50,000 (one-half of the tional section 263A costs capitalized in 1994 ending inventory, or $100,000).

Example 3. LIFO pools. (i) Taxpayer U begins its business in 1994 and adopts the LIFO inventory method. During 1994, L incurs $10,000 of section 471 costs and $1,000 of additional section 263A costs. At the end of 1994, L's ending inventory includes $3,000 of section 471 costs contained in three LIFO pools (X, Y, and Z) as shown below. Under the simplified production method, L computes its absorption ratio and inventory for 1994 as follows:

$$\frac{\text{Additional section 263A costs incurred during 1994}}{\text{Section 471 costs incurred during 1994}} = \frac{\$1,000}{\$10,000} = 10\%$$

	Total	X	Y	Z
1994:				
Ending section 471 costs	$3,000	$1,600	$600	$800
Additional section 263A costs (10%)	300	160	60	80
1994 ending inventory	$3,300	$1,760	$660	$880

(ii) During 1995, L incurs $2,000 of section 471 costs as shown below and $400 of additional section 263A costs. Moreover, L sells goods from pools X, Y, and Z having a total cost of $1,000. L computes its absorption ratio and inventory for 1995:

$$\frac{\text{Additional section 263A costs incurred during 1995}}{\text{Section 471 costs incurred during 1995}} = \frac{\$400}{\$2,000} = 20\%$$

	Total	X	Y	Z
1995:				
Beginning section 471 costs	$3,000	$1,600	$600	$800
1995 section 471 costs	2,000	1,500	300	200
Section 471 cost of goods sold	(1,000)	(300)	(300)	(400)
1995 ending section 471 costs	$4,000	$2,800	$600	$600
Consisting of:				
1994 layer	$2,800	$1,600	$600	$600
1995 layer	1,200	1,200	....	....
	$4,000	$2,800	$600	$600
Additional section 263A costs:				
1994 (10%)	$280	$160	$60	$60
1995 (20%)	240	240	....	....
	$520	$400	$60	$60
1995 ending inventory	$4,520	$3,200	$660	$660

(iii) In 1995, L experiences a $200 decrement in pool Z. Thus, L must charge the additional section 263A costs incurred in prior years applicable to the decrement to 1995's cost of goods sold. To do so, L determines a ratio by dividing the decrement by the section 471 costs in the 1994 layer ($200 divided by $800, or 25%). L then multiplies this ratio (25%) by the additional section 263A costs in the 1994 layer ($80) to determine the additional section 263A costs applicable to the decrement ($20). Therefore, $20 is taken into account by L in 1995 as part of its cost of goods sold ($80 multiplied by 25%).

(4) *Simplified production method with historic absorption ratio election*—(i) *In general*. This paragraph (b)(4) generally permits producers using the simplified production method to elect a historic absorption ratio in determining additional section 263A costs allocable to eligible property remaining on hand at the close of their taxable years. Except as provided in paragraph (b)(4)(v) of this section, a taxpayer may only make a historic absorption ratio election if it has used the simplified production method for three or more consecutive taxable years immediately prior to the year of election and has capitalized additional section 263A costs using an actual absorption ratio (as defined under

paragraph (b)(3)(ii) of this section) for its three most recent consecutive taxable years. This method is not available to a taxpayer that is deemed to have zero additional section 263A costs under paragraph (b)(3)(iv) of this section. The historic absorption ratio is used in lieu of an actual absorption ratio computed under paragraph (b)(3)(ii) of this section and is based on costs capitalized by a taxpayer during its test period. If elected, the historic absorption ratio must be used for each taxable year within the qualifying period described in paragraph (b)(4)(ii)(C) of this section.

(ii) *Operating rules and definitions*—(A) *Historic absorption ratio*. (*1*) The historic absorption ratio is equal to the following ratio:

$$\frac{\text{Additional section 263A costs incurred during the test period}}{\text{Section 471 costs incurred during the test period}}$$

(*2*) Additional section 263A costs incurred during the test period are defined as the additional section 263A costs described in §1.263A–1(d)(3) that the taxpayer incurs during the test period described in paragraph (b)(4)(ii)(B) of this section.

(*3*) Section 471 costs incurred during the test period mean the section 471 costs described in §1.263A–1(d)(2) that the taxpayer incurs during the test period described in paragraph (b)(4)(ii)(B) of this section.

(*4*) Additional section 263A costs incurred during the test period, as defined in paragraph (b)(4)(ii)(A)(*2*) of this section, and section 471 costs incurred during the test period, as defined in paragraph (b)(4)(ii)(A)(*3*) of this section, do not include costs specifically described in §1.263A–1(e)(3)(ii) or cost reductions described in §1.471–3(e) that a taxpayer properly allocates entirely to property that has been sold.

(*B*) *Test period—(1) In general*. The test period is generally the three taxable-year period immediately prior to the taxable year that the historic absorption ratio is elected.

(*2*) *Updated test period*. The test period begins again with the beginning of the first taxable year after the close of a qualifying period. This new test period, the updated test period, is the three taxable-year period beginning with the first taxable year after the close of the qualifying period as defined in paragraph (b)(4)(ii)(C) of this section.

(C) *Qualifying period*—(*1*) *In general*. A qualifying period includes each of the first five taxable years beginning with the first taxable year after a test period (or an updated test period).

(*2*) *Extension of qualifying period*. In the first taxable year following the close of each qualifying period, (e.g., the sixth taxable year following the test period), the taxpayer must compute the actual absorption ratio under the simplified production method. If the actual absorption ratio computed for this taxable year (the recomputation year) is within one-half of one percentage point (plus or minus) of the historic absorption ratio used in determining capitalizable costs for the qualifying period (i.e., the previous five taxable years), the qualifying period is extended to include the recomputation year and the following five taxable years, and the taxpayer must continue to use the historic absorption ratio throughout the extended qualifying period. If, however, the actual absorption ratio computed for the recomputation year is not within one-half of one percentage point (plus or minus) of the historic absorption ratio, the taxpayer must use actual absorption ratios beginning with the recomputation year under the simplified production method and throughout the updated test period. The taxpayer must resume using the historic absorption ratio (determined with reference to the updated test period) in the third taxable year following the recomputation year.

(iii) *Method of accounting*—(A) *Adoption and use*. The election to use the historic absorption ratio is a method of accounting. A taxpayer using the simplified production method may elect the historic absorption ratio in any taxable year if permitted under this paragraph (b)(4), provided the taxpayer has not obtained the Commissioner's consent to revoke the historic absorption ratio election within its prior six taxable years. The election is to be effected on a cut-off basis, and thus, no adjustment under section 481(a) is required or permitted. The use of a historic absorption ratio has no effect on other methods of accounting adopted by the taxpayer and used in conjunction with the simplified production method in determining its section 263A costs. Accordingly, in computing its actual absorption ratios, the taxpayer must use the same methods of accounting used in computing its historic absorption ratio during its most recent test period unless the taxpayer obtains the consent of the Commissioner. Finally, for purposes of this paragraph (b)(4)(iii), the recomputation of the historic absorption ratio during an updated test period and the change from a historic absorption ratio to an actual absorption ratio by reason of the requirements of this paragraph (b)(4) are not considered changes in methods of accounting under section 446(e) and, thus, do not require the consent of the Commissioner or any adjustments under section 481(a).

(B) *Revocation of election*. A taxpayer may only revoke its election to use the historic absorption ratio with the consent of the Commissioner in a manner prescribed under section 446(e) and the regulations thereunder. Consent to the change for any taxable year that is included in the qualifying period (or an extended qualifying period) will be granted only upon a showing of unusual circumstances.

(iv) *Reporting and recordkeeping requirements*—(A) *Reporting*. A taxpayer making an election under this paragraph (b)(4) must attach a statement to its federal income tax return for the taxable year in which the election is made showing the actual absorption ratios determined under the simplified production method during its first test period. This statement must disclose the historic absorption ratio to be used by the taxpayer during its qualifying period. A similar statement must be attached to the federal income tax return for the first taxable year within any subsequent qualifying period (i.e., after an updated test period).

(B) *Recordkeeping*. A taxpayer must maintain all appropriate records and details supporting the historic absorption ratio until the expiration of the statute of limitations for the last year for which the taxpayer applied the particular historic absorption ratio in determining additional section 263A costs capitalized to eligible property.

(v)(A) *Transition to elect historic absorption ratio*. Taxpayers will be permitted to elect a historic absorption ratio in their first, second, or third taxable year beginning after December 31, 1993, under such terms and conditions as may be prescribed by the Commissioner. Taxpayers are eligible to make an election under these transition rules whether or not they previously used the simplified production method. A taxpayer making such an election must recompute (or compute) its additional section 263A costs, and thus, its historic absorption ratio for its first test period as if the rules prescribed in this section and §§ 1.263A–1 and 1.263A–3 had applied throughout the test period.

(B) *Transition to revoke historic absorption ratio.* Notwithstanding the requirements provided in paragraph (b)(4)(iii)(B) of this section regarding revocations of the historic absorption ratio during a qualifying period, a taxpayer will be permitted to revoke the historic absorption ratio in their first, second, or third taxable year ending on or after *November 20, 2018*, under such administrative procedures and with terms and conditions prescribed by the Commissioner.

(vi) *Example.* The provisions of this paragraph (b)(4) are illustrated by the following example:

Example. (i) Taxpayer M uses the FIFO method of accounting for inventories and for 1994 elects to use the historic absorption ratio with the simplified production method. After recomputing its additional section 263A costs in accordance with the transition rules of paragraph (b)(4)(v) of this section, M identifies the following costs incurred during the test period:

1991:
Add'l section 263A costs—$100
Section 471 costs—$3,000
1992:
Add'l section 263A costs—$200
Section 471 costs—$4,000
1993:
Add'l section 263A costs—$300
Section 471 costs—$5,000

(ii) Therefore, M computes a 5% historic absorption ratio determined as follows:

$$\text{Historic absorption ratio} = \frac{\$100 + 200 + 300}{\$3{,}000 + 4{,}000 + 5{,}000} = \frac{\$600}{\$12{,}000} = 5\%$$

(iii) In 1994, M incurs $10,000 of section 471 costs of which $3,000 remain in inventory at the end of the year. Under the simplified production method using a historic absorption ratio, M determines the additional section 263A costs allocable to its ending inventory by multiplying its historic absorption ratio (5%) by the section 471 costs remaining in its ending inventory as follows:

$$\text{Additional section 263A costs} = 5\% \times \$3{,}000 = \$150$$

(iv) To determine its ending inventory under section 263A, M adds the additional section 263A costs allocable to ending inventory to its section 471 costs remaining in ending inventory ($3,150 = $150 + $3,000). The balance of M's additional section 263A costs incurred during 1994 is taken into account in 1994 as part of M's cost of goods sold.

(v) M's qualifying period ends with the close of its 1998 taxable year. Therefore, 1999 is a recomputation year in which M must compute its actual absorption ratio. M determines its actual absorption ratio for 1999 to be 5.25% and compares that ratio to its historic absorption ratio (5.0%). Therefore, M must continue to use its historic absorption ratio of 5.0% throughout an extended qualifying period, 1999 through 2004 (the recomputation year and the following five taxable years).

(vi) If, instead, M's actual absorption ratio for 1999 were not between 4.5% and 5.5%, M's qualifying period would end and M would be required to compute a new historic absorption ratio with reference to an updated test period of 1999, 2000, and 2001. Once M's historic absorption ratio is determined for the updated test period, it would be used for a new qualifying period beginning in 2002.

(c) *Modified simplified production method*—(1) *Introduction.* This paragraph (c) provides a simplified method for determining the additional section 263A costs properly allocable to ending inventories of property produced and other eligible property on hand at the end of the taxable year.

(2) *Eligible property*—(i) *In general.* Except as otherwise provided in paragraph (c)(2)(ii) of this section, the modified simplified production method, if elected for any trade or business of a

producer, must be used for all production and resale activities associated with any of the categories of property to which section 263A applies as described in paragraph (b)(2)(i) of this section.

(ii) *Election to exclude-self-constructed assets.* A taxpayer using the modified simplified production method may elect to exclude self-constructed assets from application of the modified simplified production method by following the same rules applicable to a taxpayer using the simplified production method provided in paragraph (b)(2)(ii) of this section.

(3) *Modified simplified production method without historic absorption ratio election*—(i) *General allocation formula*—(A) *In general.* Except as otherwise provided in paragraph (c)(3)(v) of this section, the additional section 263A costs allocable to eligible property remaining on hand at the close of the taxable year under the modified simplified production method are computed as follows:

$$\left(\text{Pre-production absorption ratio} \times \begin{array}{c}\text{Pre-production}\\ \text{section 471 costs}\\ \text{remaining on hand}\\ \text{at year end}\end{array}\right) + \left(\text{Production absorption ratio} \times \begin{array}{c}\text{Production}\\ \text{section 471 costs}\\ \text{remaining on hand}\\ \text{at year end}\end{array}\right)$$

(B) *Effect of allocation.* The pre-production and production absorption ratios generally are multiplied by the pre-production and production section 471 costs, respectively, remaining in ending inventory or otherwise on hand at the end of each taxable year in which the modified simplified production method is applied. The sum of the resulting products is the additional section 263A costs that are added to the taxpayer's ending section 471 costs to determine the section 263A costs that are capitalized. See, however, paragraph (c)(3)(iv) of this section for special rules applicable to LIFO taxpayers. Except as otherwise provided in this section or in §1.263A–1 or §1.263A–3, additional section 263A costs that are allocated to inventories on hand at the close of the taxable year under the modified simplified production method of this paragraph (c) are treated as inventory costs for all purposes of the Internal Revenue Code.

(ii) *Definitions*—(A) *Direct material costs.* For purposes of paragraph (c) of this section, direct material costs has the same meaning as described in §1.263A–1(e)(2)(i)(A). For purposes of paragraph (c) of this section, direct material costs include property produced for the taxpayer under a contract with another party that are direct material costs for the taxpayer to be used in an additional production process of the taxpayer.

(B) *Pre-production absorption ratio.* Under the modified simplified production method, the pre-production absorption ratio is determined as follows:

$$\frac{\text{Pre-production additional section 263A costs}}{\text{Pre-production section 471 costs}}$$

(*1*) *Pre-production additional section 263A costs.* Pre-production additional section 263A costs are defined as the additional section 263A costs described in §1.263A–1(d)(3) that are pre-production costs, as described in paragraph (a)(3)(ii) of this section, that a taxpayer incurs during its current taxable year, including capitalizable mixed service costs allocable to pre-production additional section 263A costs, as described in paragraph (c)(3)(iii) of this section, that a taxpayer incurs during its current taxable year:

(*i*) Plus additional section 263A costs properly allocable to property acquired for resale that a taxpayer incurs during its current taxable year; and

(*ii*) Plus additional section 263A costs properly allocable to property produced for the taxpayer under a contract with another party that is treated as property produced by the taxpayer, as described in paragraph (a)(1)(ii)(B) of this section, that a taxpayer incurs during its current taxable year.

(*2*) *Pre-production section 471 costs.* Pre-production section 471 costs are defined as the section 471 costs described in §1.263A–1(d)(2) that are direct material costs that a taxpayer incurs during its current taxable year plus the section 471 costs for property acquired for resale (*see* §1.263A–1(e)(2)(ii)) that a taxpayer incurs during its current taxable year, including property produced for the taxpayer under a contract with another party that is acquired for resale.

(C) *Pre-production section 471 costs remaining on hand at year end.* Pre-production section 471 costs remaining on hand at year end means the pre-production section 471 costs, as defined in paragraph (c)(3)(ii)(B)(*2*) of this section, that a taxpayer incurs during its current taxable year which remain in its ending inventory or are otherwise on hand at year end, excluding the section 471 costs that are direct material costs that have entered or completed production at year end (for example, direct material costs in ending work-in-process inventory and ending finished goods inventory). For LIFO inventories of a taxpayer, see paragraph (c)(3)(iv) of this section.

(D) *Production absorption ratio.* Under the modified simplified production method, the production absorption ratio is determined as follows:

$$\frac{\text{(Production additional section 263A costs + Residual pre-production additional section 263A costs)}}{\text{(Production section 471 costs + Direct materials adjustment)}}$$

(*1*) *Production additional section 263A costs.* Production additional section 263A costs are defined as the additional section 263A costs described in §1.263A–1(d)(3) that are not pre-production additional section 263A costs, as defined in paragraph (c)(3)(ii)(B)(*1*) of this section, that a taxpayer incurs during its current taxable year, including capitalizable mixed service costs not allocable to pre-production additional section 263A costs, as described in paragraph (c)(3)(iii) of this section, that a taxpayer incurs during its current taxable year. For example, production additional section 263A costs include post-production costs, other than post-production costs included in section 471 costs, as described in paragraph (a)(3)(iii) of this section.

(*2*) *Residual pre-production additional section 263A costs.* Residual pre-production additional section 263A costs are defined as the pre-production additional section 263A costs, as defined in paragraph (c)(3)(ii)(B)(*1*) of this section, that a taxpayer incurs during its current taxable year less the product of the pre-production absorption ratio, as determined in paragraph (c)(3)(ii)(B) of this section, and the pre-production section 471 costs remaining on hand at year end, as defined in paragraph (c)(3)(ii)(C) of this section.

(*3*) *Production section 471 costs.* Production section 471 costs are defined as the section 471 costs described in §1.263A–1(d)(2) that a taxpayer incurs during its current taxable year less pre-production section 471 costs, as defined in paragraph (c)(3)(ii)(B)(*2*) of this section, that a taxpayer incurs during its current taxable year.

(*4*) *Direct materials adjustment.* The direct materials adjustment is defined as the section 471 costs that are direct material costs, including property produced for a taxpayer under a contract with another party that are direct material costs for the taxpayer to be used in an additional production process of the taxpayer, that had not entered production at the beginning of the current taxable year:

(*i*) Plus the section 471 costs that are direct material costs incurred during the current taxable year (that is, direct material purchases); and (*ii*) Less the section 471 costs that are direct material costs that have not entered production at the end of the current taxable year.

(E) *Production section 471 costs remaining on hand at year end.* Production section 471 costs remaining on hand at year end means the section 471 costs, as defined in §1.263A–1(d)(2), that a taxpayer incurs during its current taxable year which remain in its ending inventory or are otherwise on hand at year end, less the pre-production section 471 costs remaining on hand at year end, as described in paragraph (c)(3)(ii)(C) of this section. For LIFO inventories of a taxpayer, see paragraph (c)(3)(iv) of this section.

(F) *Costs allocated to property sold.* The terms defined in paragraph (c)(3)(ii) of this section do not include costs described in §1.263A–1(e)(3)(ii) or cost reductions described in §1.471–3(e) that a taxpayer properly allocates entirely to property that has been sold.

(iii) *Allocable mixed service costs*—(A) *In general.* If a taxpayer using the modified simplified production method determines its capitalizable mixed service costs using a method described in §1.263A–1(g)(4), the taxpayer must use a reasonable method to allocate the costs (for example, department or activity costs) between production and pre-production additional section 263A costs. If the taxpayer's §1.263A–1(g)(4) method allocates costs to a department or activity that is exclusively identified as production or pre-production, those costs must be allocated to production or pre-production additional section 263A costs, respectively.

(B) *Taxpayer using the simplified service cost method.* If a taxpayer using the modified simplified production method determines its capitalizable mixed service costs using the simplified service cost method described in §1.263A–1(h), the amount of capitalizable mixed service costs, as computed using the general allocation formula in §1.263A–1(h)(3)(i), allocated to and included in pre-production additional section 263A costs in the absorption ratio described in paragraph (c)(3)(ii)(B) of this section is determined based on either of the following: The proportion of direct material costs to total section 471 costs that a taxpayer incurs during its current taxable year or the proportion of pre-production labor costs to total labor costs that a taxpayer incurs during its current taxable year. The taxpayer must include the capitalizable mixed service costs that are not allocated to pre-production additional section 263A costs in production additional section 263A costs in the absorption ratio described in paragraph (c)(3)(ii)(D) of this section. A taxpayer that allocates capitalizable mixed service costs based on labor under this paragraph (c)(3)(iii)(B) must exclude mixed service labor costs from both pre-production labor costs and total labor costs.

(C) *De minimis rule.* Notwithstanding paragraphs (c)(3)(iii)(A) and (B) of this section, if 90 percent or more of a taxpayer's capitalizable mixed service costs determined under paragraph (c)(3)(iii)(A) or (B) of this section are allocated to pre-production additional section 263A costs or production additional section 263A costs, the taxpayer may elect to allocate 100 percent of its capitalizable mixed service costs to that amount. For example, if 90 percent of capitalizable mixed service costs are allocated to production additional section 263A costs based on the labor costs that are pre-production costs in total labor costs incurred in the taxpayer's trade or business during the taxable year, then 100 percent of capitalizable mixed service costs may be allocated to production additional section 263A costs. An election to allocate capitalizable mixed service costs under this paragraph (c)(3)(iii)(C) is the adoption of, or a change in, a method of accounting under section 446 of the Internal Revenue Code.

(iv) *LIFO taxpayers electing the modified simplified production method*—(A) *In general.* Under the modified simplified production method, a taxpayer using a LIFO method must calculate a particular year's index (for example, under §1.472–8(e)) without regard to its additional section 263A costs. Similarly, a taxpayer that adjusts current-year costs by applicable indexes to determine whether there has been an inventory increment or decrement in the current year for a particular LIFO pool must disregard the additional section

263A costs in making that determination.

(B) *LIFO increment*—(*1*) *In general*. If the taxpayer determines there has been an inventory increment, the taxpayer must state the amount of the increment in terms of section 471 costs in current-year dollars. The taxpayer then multiplies this amount by the combined absorption ratio, as defined in paragraph (c)(3)(iv)(B)(*2*) of this section. The resulting product is the additional section 263A costs that must be added to the taxpayer's increment in terms of section 471 costs in current-year dollars for the taxable year.

(*2*) *Combined absorption ratio defined*. For purposes of paragraph (c)(3)(iv)(B)(*1*) of this section, the combined absorption ratio is the additional section 263A costs allocable to eligible property remaining on hand at the close of the taxable year, as described in paragraph (c)(3)(i)(A) of this section, determined on a non-LIFO basis, divided by the pre-production and production section 471 costs remaining on hand at year end, determined on a non-LIFO basis.

(C) *LIFO decrement*. If the taxpayer determines there has been an inventory decrement, the taxpayer must state the amount of the decrement in dollars applicable to the particular year for which the LIFO layer has been invaded. The additional section 263A costs incurred in prior years that are applicable to the decrement are charged to cost of goods sold. The additional section 263A costs that are applicable to the decrement are determined by multiplying the additional section 263A costs allocated to the layer of the pool in which the decrement occurred by the ratio of the decrement, excluding additional section 263A costs, to the section 471 costs in the layer of that pool.

(v) *De minimis rule for producers with total indirect costs of $200,000 or less*. Paragraph (b)(3)(iv) of this section, which provides that the additional section 263A costs allocable to eligible property remaining on hand at the close of the taxable year are deemed to be zero for producers with total indirect costs of $200,000 or less, applies to the modified simplified production method.

(vi) *Examples*. The provisions of this paragraph (c) are illustrated by the following examples:

(A) *Example 1—FIFO inventory method*.

(*1*) Taxpayer P uses the FIFO method of accounting for inventories valued at cost. P's beginning inventory for 2018 (all of which is sold during 2018) is $2,500,000, consisting of $500,000 of pre-production section 471 costs (including $400,000 of direct material costs and $100,000 of property acquired for resale), $1,500,000 of production section 471 costs, and $500,000 of additional section 263A costs. During 2018, P incurs $2,500,000 of pre-production section 471 costs (including $1,900,000 of direct material costs and $600,000 of property acquired for resale), $7,500,000 of production section 471 costs, $200,000 of pre-production additional section 263A costs, and $800,000 of production additional section 263A costs. P's additional section 263A costs include capitalizable mixed service costs under the simplified service cost method. P's pre-production and production section 471 costs remaining in ending inventory at the end of 2018 are $1,000,000 (including $800,000 of direct material costs and $200,000 of property acquired for resale) and $2,000,000, respectively. P computes its pre-production absorption ratio for 2018 under paragraph (c)(3)(ii)(B) of this section, as follows:

$$\frac{\text{Pre-production additional section 263A costs}}{\text{Pre-production section 471 costs}} = \frac{\$200{,}000}{\$2{,}500{,}000} = 8.00\%$$

(*2*) Under paragraph (c)(3)(ii)(D)(*2*) of this section, P's residual pre-production additional section 263A costs for 2018 are $120,000 ($200,000 of pre-production additional section 263A costs less $80,000 (the product of the 8% pre-production absorption ratio and the $1,000,000 of pre-production section 471 costs remaining on hand at year end)).

(*3*) Under paragraph (c)(3)(ii)(D)(*4*) of this section, P's direct materials adjustment for 2018 is $1,500,000 ($400,000 of direct material costs in beginning raw materials inventory, plus $1,900,000 of direct material costs incurred to acquire raw materials during the taxable year, less $800,000 direct material costs in ending raw materials inventory).

(*4*) P computes its production absorption ratio for 2018 under paragraph (c)(3)(ii)(D) of this section, as follows:

$$\frac{\text{(Production additional section 263A costs + Residual pre-production additional section 263A costs)}}{\text{(Production section 471 costs + Direct materials adjustment)}} = \frac{(\$800{,}000 + 120{,}000)}{(\$7{,}500{,}000 + 1{,}500{,}000)} = 10.22\%$$

(*5*) Under the modified simplified production method, P determines the additional section 263A costs allocable to its ending inventory under paragraph (c)(3)(i)(A) of this section by multiplying the pre-production absorption ratio by the pre-production section 471 costs remaining on hand at year end and the production absorption ratio by the production section 471 costs remaining on hand at year end, as follows:

Additional section 263A costs = (8% × $1,000,000) + (10.22% × $2,000,000) = $284,400

(*6*) P adds this $284,400 to the $3,000,000 of section 471 costs remaining on hand at year end to calculate its total ending inventory of $3,284,400. The balance of P's additional section 263A costs incurred during 2018, $715,600 ($1,000,000 less $284,400), is taken into account in 2018 as part of P's cost of goods sold.

(*7*) P's computation is summarized in the following table:

	Reference	Amount
Beginning Inventory:		
Direct material costs	a	$ 400,000
Property acquired for resale	b	100,000
Pre-production section 471 costs	c = a + b	500,000
Production section 471 costs	d	1,500,000
Additional section 263A costs	e	500,000
Total	f = c d + e	2,500,000
Incurred During 2018:		
Direct material costs	g	1,900,000
Property acquired for resale	h	600,000
Pre-production section 471 costs	i = g + h	2,500,000
Production section 471 costs	j	7,500,000
Pre-production additional section 263A costs	k	200,000
Production additional section 263A costs	l	800,000
Total	m = i + j + k + l	11,000,000
Ending Inventory:		
Direct material costs	n	800,000
Property acquired for resale	o	200,000
Pre-production section 471 costs	p = n + o	1,000,000
Production section 471 costs	q	2,000,000
Section 471 costs	r = p + q	3,000,000
Additional section 263A costs allocable to ending inventory	s = v + z	284,400
Total	t = r + s	3,284,400

	Reference	Amount
Modified Simplified Production Method:		
Pre-production additional section 263A costs	k	200,000
Pre-production section 471 costs	i	2,500,000
Pre-production absorption ratio	u = k / i	8.00%
Pre-production section 471 costs remaining on hand at year end	p	1,000,000
Pre-production additional section 263A costs allocable to ending inventory	v = u * p	80,000
Production additional section 263A costs	l	800,000
Residual pre-production additional section 263A costs	w = k − (u * p)	120,000
Production section 471 costs	j	7,500,000
Direct materials adjustment	x = a + g − n	1,500,000
Production absorption ratio	y = (l + w) / (j + x)	10.22%
Production section 471 costs remaining on hand at year end	q	2,000,000
Production additional section 263A costs allocable to ending inventory	z = y * q	204,400
Summary:		
Pre-production additional section 263A costs allocable to ending inventory	v	80,000
Production additional section 263A costs allocable to ending inventory	z	204,400
Additional section 263A costs allocable to ending inventory	s	284,400
Section 471 costs	r	3,000,000
Total Ending Inventory	t	3,284,400

(B) *Example 2—FIFO inventory method with alternative method to determine amounts of section 471 costs.*

(*1*) The facts are the same as in *Example 1* of paragraph (c)(3)(vi)(A) of this section, except that P uses the alternative method to determine amounts of section 471 costs by using its financial statement under § 1.263A–1(d)(2)(iii) rather than tax amounts under § 1.263A–1(d)(2)(i). In 2018, P's production section 471 costs exclude $40,000 of tax depreciation in excess of financial statement depreciation and include $50,000 of financial statement direct labor in excess of tax direct labor. These are P's only differences in its book and tax amounts.

(*2*) Under § 1.263A–1(d)(2)(iii)(B), the positive $40,000 depreciation adjustment and the negative $50,000 direct labor adjustment must be included in additional section 263A costs. Accordingly, P's production additional section 263A costs are $790,000 ($800,000 plus $40,000 less $50,000).

(*3*) P computes its production absorption ratio for 2018 under paragraph (c)(3)(ii)(D) of this section, as follows:

$$\frac{\text{(Production additional section 263A costs + Residual pre-production additional section 263A costs)}}{\text{(Production section 471 costs + Direct materials adjustment)}} = \frac{(\$790{,}000 + 120{,}000)}{(\$7{,}500{,}000 + 1{,}500{,}000)} = 10.11\%$$

(*4*) Under the modified simplified production method, P determines the additional section 263A costs allocable to its ending inventory under paragraph (c)(3)(i)(A) of this section by multiplying the pre-production absorption ratio by the pre-production section 471 costs remaining on hand at year end and the production absorption ratio by the production section 471 costs remaining on hand at year end, as follows:

Additional section 263A costs = (8.00% × $1,000,000) + (10.11% × $2,000,000) = $282,200

(*5*) P adds this $282,200 to the $3,000,000 of section 471 costs remaining on hand at year end to calculate its total ending inventory of $3,282,200. The balance of P's additional section 263A costs incurred during 2018, $717,800 ($1,000,000 less $282,200), is taken into account in 2018 as part of P's cost of goods sold.

(C) *Example 3—LIFO inventory method.*

(*1*) The facts are the same as in *Example 1* of paragraph (c)(3)(vi)(A) of this section, except that P uses a dollar-value LIFO inventory method rather than the FIFO method. P's 2018 LIFO increment is $1,500,000.

(*2*) Under paragraph (c)(3)(iv)(B)(*1*) of this section, to determine the additional section 263A costs allocable to its ending inventory, P multiplies the combined absorption ratio by the $1,500,000 of LIFO increment. Under paragraph (c)(3)(iv)(B)(*2*) of this section, the combined absorption ratio is 9.48% ($284,400 additional section 263A costs allocable to ending inventory, determined on a non-LIFO basis, divided by $3,000,000 of section 471 costs on hand at year end, determined on a non-LIFO basis). Thus, P's additional section 263A costs allocable to its ending inventory are $142,200 ($1,500,000 multiplied by 9.48%). This $142,200 is added to the $1,500,000 to determine a total 2018 LIFO increment of $1,642,200. The balance of P's additional section 263A costs incurred during 2018, $857,800 ($1,000,000 less $142,200), is taken into account in 2018 as part of P's cost of goods sold.

(*3*) In 2019, P sells one-half of the inventory in its 2018 increment. P must include in its cost of goods sold for 2019 the amount of additional section 263A costs relating to this inventory, $71,100 (one-half of the $142,200 additional section 263A costs capitalized in 2018 ending inventory).

(D) *Example 4—Direct materials-based allocation of mixed service costs.*

(*1*) Taxpayer R computes its capitalizable mixed service costs using the simplified service cost method described in §1.263A–1(h). During 2018, R incurs $200,000 of capitalizable mixed service costs, computed using the general allocation formula in §1.263A–1(h). During 2018, R also incurs $8,000,000 of total section 471 costs, including $2,000,000 of direct material costs.

(*2*) Under paragraph (c)(3)(iii)(B) of this section, R determines its capitalizable mixed service costs allocable to pre-production additional section 263A costs based on the proportion of direct material costs in total section 471 costs. R's direct material costs are 25% of total section 471 costs ($2,000,000 of direct material costs incurred during the year divided by $8,000,000 of total section 471 costs incurred during the year). Thus, R allocates $50,000 (25% × $200,000) of mixed service costs to pre-production additional section 263A costs. R includes the remaining $150,000 ($200,000 less $50,000) of capitalizable mixed service costs as production additional section 263A costs.

(E) *Example 5—Labor-based allocation of mixed service costs.*

(*1*) Taxpayer S computes its capitalizable mixed service costs using the simplified service cost method described in §1.263A–1(h). During 2018, S incurs $200,000 of capitalizable mixed service costs, computed using the general allocation formula in §1.263A–1(h). During 2018, S also incurs $10,000,000 of total labor costs (excluding any labor costs included in mixed service costs), including $1,000,000 of labor costs that are pre-production costs as described in paragraph (a)(3)(ii) of this section (excluding any labor costs included in mixed service costs).

(*2*) Under paragraph (c)(3)(iii)(B) of this section, S determines its capitalizable mixed service costs allocable to pre-production additional section 263A costs based on the proportion of labor costs that are pre-production costs in labor costs. S's pre-production labor costs are 10% of labor costs ($1,000,000 of labor costs incurred during the year that are pre-production costs (excluding any labor costs included in mixed service costs), divided by $10,000,000 of total labor costs incurred during the year (excluding any labor costs included in mixed service costs). Thus, S allocates $20,000 (10% × $200,000) of mixed service costs to pre-production additional section 263A costs. S includes the remaining $180,000 ($200,000 less $20,000) of capitalizable mixed service costs as production additional section 263A costs.

(F) *Example 6—De minimis rule for allocation of mixed service costs.* The facts are the same as in *Example 5* in paragraph (c)(3)(vi)(E) of this section, except that S uses the de minimis rule for mixed service costs in paragraph (c)(3)(iii)(C) of this section. Because 90% or more of S's capitalizable mixed service costs are allocated to production additional section 263A costs, under the de minimis rule, S allocates all $200,000 of capitalizable mixed service costs to production additional section 263A costs. None of the capitalizable mixed service costs are allocated to pre-production additional section 263A costs.

(4) *Modified simplified production method with historic absorption ratio election*—(i) *In general.* This paragraph (c)(4) generally permits taxpayers using the modified simplified production method to elect a historic absorption ratio in determining additional section 263A costs allocable to eligible property remaining on hand at the close of their taxable years. A taxpayer may only make a historic absorption ratio election under this paragraph (c)(4) if it has used the modified simplified production method for three or more consecutive taxable years immediately prior to the year of election and has capitalized additional section 263A costs using an actual pre-production absorption ratio, as defined in paragraph (c)(3)(ii)(B) of this section, and an actual production absorption ratio, as defined in paragraph (c)(3)(ii)(D) of this section, or an actual combined absorption ratio, as defined in paragraph (c)(3)(iv)(B)(*2*) of this section, for its three most recent consecutive taxable years. This method is not available to a taxpayer that is deemed to have zero additional section 263A costs under paragraph (c)(3)(v) of this section. The historic absorption ratio is used in lieu of the actual absorption ratios computed under paragraph (c)(3)(ii) of this section or the actual combined absorption ratio computed under paragraph (c)(3)(iv) and is based on costs capitalized by a taxpayer during its test period. If elected, the historic absorption ratio must be used for each taxable year within the qualifying period described in paragraph (b)(4)(ii)(C) of this section. Except as otherwise provided in this paragraph (c)(4), paragraph (b)(4) of this section applies to the historic absorption ratio election under the modified simplified production method.

(ii) *Operating rules and definitions*—(A) *Pre-production historic absorption ratio.* The pre-production historic absorption ratio is computed as follows:

$$\frac{\text{Pre-production additional section 263A costs incurred during the test period}}{\text{Pre-production section 471 costs incurred during the test period}}$$

(*1*) Pre-production additional section 263A costs incurred during the test period are defined as the pre-production additional section 263A costs described in paragraph (c)(3)(ii)(B)(*1*) of this section that the taxpayer incurs during the test period described in paragraph (b)(4)(ii)(B) of this section.

(*2*) Pre-production section 471 costs incurred during the test period are defined as the pre-production section 471 costs described in paragraph (c)(3)(ii)(B)(*2*) of this section that the taxpayer incurs during the test period described in paragraph (b)(4)(ii)(B) of this section.

(B) *Production historic absorption ratio.* The production historic absorption ratio is computed as follows:

$$\frac{\left(\text{Production additional section 263A costs incurred during the test period} + \text{Residual pre-production additional section 263A costs incurred during the test period}\right)}{\left(\text{Production section 471 costs incurred during the test period} + \text{Direct materials adjustments made during the test period}\right)}$$

(*1*) Production additional section 263A costs incurred during the test period are defined as the production additional section 263A costs described in paragraph (c)(3)(ii)(D)(*1*) of this section that the taxpayer incurs during the test period described in paragraph (b)(4)(ii)(B) of this section.

(*2*) Residual pre-production additional section 263A costs incurred during the test period are defined as the residual pre-production additional section 263A costs described in paragraph (c)(3)(ii)(D)(*2*) of this section that the taxpayer incurs during the test period described in paragraph (b)(4)(ii)(B) of this section.

(*3*) Production section 471 costs incurred during the test period are defined as the production section 471 costs described in paragraph (c)(3)(ii)(D)(*3*) of this section that the taxpayer incurs during the test period described in paragraph (b)(4)(ii)(B) of this section.

(*4*) Direct materials adjustments made during the test period are defined as the direct materials adjustments described in paragraph (c)(3)(ii)(D)(*4*) of this section that the taxpayer incurs during the test period described in paragraph (b)(4)(ii)(B) of this section.

(iii) *LIFO taxpayers making the historic absorption ratio election*—(A) *In general.* Instead of the pre-production and production historic absorption ratios defined in paragraph (c)(4)(ii) of this section, a LIFO taxpayer making the historic absorption ratio election under the modified simplified production method calculates a combined historic absorption ratio based on costs the taxpayer capitalizes during its test period.

(B) *Combined historic absorption ratio.* The combined historic absorption ratio is computed as follows:

$$\frac{\text{Total allocable additional section 263A costs incurred during the test period}}{\text{Total section 471 costs remaining on hand at each year end of the test period}}$$

(*1*) *Total allocable additional section 263A costs incurred during the test period.* Total allocable additional section 263A costs incurred during the test period are the sum of the total additional section 263A costs allocable to eligible property on hand at year end as described in paragraph (c)(3)(i)(A) of this section, determined on a non-LIFO basis, for all taxable years in the test period.

(*2*) *Total section 471 costs remaining on hand at each year end of the test period.* Total section 471 costs remaining on hand at each year end of the test period are the sum of the total pre-production section 471 costs remaining on hand at year end as described in paragraph (c)(3)(ii)(C) of this section and the total production section 471 costs remaining on hand at year end as described in paragraph (c)(3)(ii)(E) of this section, determined on a non-LIFO basis, for all taxable years in the test period.

(iv) *Extension of qualifying period.* In the first taxable year following the close of each qualifying period (for example, the sixth taxable year following the test period), a taxpayer must compute the actual absorption ratios under paragraph (c)(3) of this section (pre-production and production absorption ratios or, for LIFO taxpayers, the combined absorption ratio). If the actual combined absorption ratio or both the actual pre-production and production absorption ratios, as applicable, computed for this taxable year (the recomputation year) is within one-half of one percentage point, plus or minus, of the corresponding historic absorption ratio or ratios used in determining capitalizable costs for the qualifying period (the previous five taxable years), the qualifying period is extended to include the recomputation year and the following five taxable years, and the taxpayer must continue to use the historic absorption ratio or ratios throughout the extended qualifying period. If, however, the actual combined historic absorption ratio or either the actual pre-production absorption ratio or production absorption ratio, as applicable, is not within one-half of one percentage point, plus or minus, of the corresponding historic absorption ratio, the taxpayer must use the actual combined absorption ratio or ratios beginning with the recomputation year and throughout the updated test period. The taxpayer must resume using the historic absorption ratio or ratios based on the updated test period in the third taxable year following the recomputation year.

(v) *Examples.* The provisions of this paragraph (c)(4) are illustrated by the following examples:

(A) *Example 1—HAR and FIFO inventory method.*

(*1*) Taxpayer S uses the FIFO method of accounting for inventories valued at cost and for 2021 elects to use the historic absorption ratio with the modified simplified production method. S identifies the following costs incurred during the test period:

	2018	2019	2020
Pre-production additional section 263A costs	$100	$200	$300
Production additional section 263A costs	200	350	450
Pre-production section 471 costs	2,000	2,500	3,000
Production section 471 costs	2,500	3,500	4,000
Residual pre-production additional section 263A costs	60	136	220
Direct materials adjustments	2,700	3,200	3,700

(*2*) Under paragraph (c)(4)(ii)(A) of this section, S computes the pre-production historic absorption ratio as follows:

$$\frac{\text{Pre-production additional section 263A costs incurred during the test period}}{\text{Pre-production section 471 costs incurred during the test period}} = \frac{\$100 + 200 + 300}{\$2{,}000 + 2{,}500 + 3{,}000} = \frac{\$600}{\$7{,}500} = 8.00\%$$

(*3*) Under paragraph (c)(4)(ii)(B) of this section, S computes the production historic absorption ratio as follows:

$$\frac{\left(\text{Production additional section 263A costs incurred during the test period} + \text{Residual pre-production additional section 263A costs incurred during the test period}\right)}{\left(\text{Production section 471 costs incurred during the test period} + \text{Direct materials adjustments made during the test period}\right)}$$

$$= \frac{((\$200+350+450)+(60+136+220))}{((\$2{,}500+3{,}500+4{,}000)+(2{,}700+3{,}200+3{,}700))} = \frac{\$1{,}416}{\$19{,}600} = 7.22\%$$

(*4*) In 2021, S incurs $10,000 of section 471 costs of which $1,000 pre-production section 471 costs and $2,000 production 471 costs remain in ending inventory. Under the modified simplified production method using a historic absorption ratio, S determines the pre-production additional section 263A costs allocable to its ending inventory by multiplying its pre-production historic absorption ratio (8.00%) by the pre-production section 471 costs remaining on hand at year end ($1,000). Thus, S allocates $80 of pre-production additional section 263A costs to its ending inventory (8.00% × $1,000). S determines the production additional section 263A costs allocable to its ending inventory by multiplying its production historic absorption ratio (7.22%) by the production section 471 costs remaining on hand at year end ($2,000). Thus, S allocates $144 of production additional section 263A costs to its ending inventory (7.22% × $2,000).

(*5*) Under paragraph (c)(4)(i) of this section, S's total additional section 263A costs allocable to ending inventory in 2021 are $224, which is the sum of the allocable pre-production additional section 263A costs ($80) and the allocable production additional section

263A costs ($144). S's ending inventory in 2021 is $3,224, which is the sum of S's additional section 263A costs allocable to ending inventory and S's section 471 costs remaining in ending inventory ($224 + $3,000). The balance of S's additional section 263A costs incurred during 2021 is taken into account in 2021 as part of S's cost of goods sold.

(B) *Example 2—HAR and LIFO inventory method.* (*1*)(*i*) The facts are the same as in *Example 1* in paragraph (c)(4)(v)(A) of this section, except that S uses a dollar-value LIFO inventory method rather than the FIFO method. S calculates additional section 263A costs incurred during the taxable year and allocable to ending inventory under paragraph (c)(4)(iii) of this section and identifies the following costs incurred during the test period:

	2018	2019	2020
Additional section 263A costs incurred during the taxable year allocable to ending inventory	$90	$137	$167
Section 471 costs incurred during the taxable year that remain in ending inventory	1,000	1,400	2,100

(*ii*) In 2021, the LIFO value of S's increment is $1,500.

(*2*) Under paragraph (c)(4)(iii) of this section, S computes a combined historic absorption ratio as follows:

$$\frac{\text{Total allocable additional section 263A costs incurred during the test period}}{\text{Total section 471 costs remaining on hand at each year end of the test period}} = \frac{\$90 + 137 + 167}{\$1{,}000 + 1{,}400 + 2{,}100} = \frac{\$394}{\$4{,}500} = 8.76\%$$

(*3*) S's additional section 263A costs allocable to its 2021 LIFO increment are $131 ($1,500 beginning LIFO increment × 8.76% combined historic absorption ratio). S adds the $131 to the $1,500 LIFO increment to determine a total 2021 LIFO increment of $1,631.

(d) *Additional simplified methods for producers.* The Commissioner may prescribe additional elective simplified methods by revenue ruling or revenue procedure.

(e) *Cross reference.* See § 1.6001–1(a) regarding the duty of taxpayers to keep such records as are sufficient to establish the amount of gross income, deductions, etc.

(f) *Change in method of accounting*—(1) *In general.* A change in a taxpayer's treatment of additional section 263A costs to comply with paragraph (b)(2)(i)(D) of this section is a change in method of accounting to which the provisions of sections 446 and 481 and the regulations under those sections apply. See § 1.263A–7. For a taxpayer's first taxable year ending on or after August 2, 2005, the taxpayer is granted the consent of the Commissioner to change its method of accounting to comply with paragraph (b)(2)(i)(D) of this section, provided the taxpayer follows the administrative procedures, as modified by paragraphs (e)(2) through (4) of this section, issued under § 1.446–1(e)(3)(ii) for obtaining the Commissioner's automatic consent to a change in accounting method (for further guidance, for example, see Rev. Proc. 2002–9 (2002–1 CB 327), as modified and clarified by Announcement 2002–17 (2002–1 CB 561), modified and amplified by Rev. Proc. 2002–19 (2002–1 CB 696), and amplified, clarified, and modified by Rev. Proc. 2002–54 (2002–2 CB 432), and § 601.601(d)(2)(ii)(*b*) of this chapter). For purposes of Form 3115, ''Application for Change in Accounting Method,'' the designated number for the automatic accounting method change authorized by this paragraph (e) is ''95.'' If Form

3115 is revised or renumbered, any reference in this section to that form is treated as a reference to the revised or renumbered form. Alternatively, notwithstanding the provisions of any administrative procedures that preclude a taxpayer from requesting the advance consent of the Commissioner to change a method of accounting that is required to be made pursuant to a published automatic change procedure, for its first taxable year ending on or after August 2, 2005, a taxpayer may request the advance consent of the Commissioner to change its method of accounting to comply with paragraph (b)(2)(i)(D) of this section, provided the taxpayer follows the administrative procedures, as modified by paragraphs (e)(2) through (5) of this section, for obtaining the advance consent of the Commissioner (for further guidance, for example, see Rev. Proc. 97–27 (1997–1 CB 680), as modified and amplified by Rev. Proc. 2002–19 (2002–1 CB 696), as amplified and clarified by Rev. Proc. 2002–54 (2002–2 CB 432), and §601.601(d)(2)(ii)(*b*) of this chapter). For the taxpayer's second and subsequent taxable years ending on or after August 2, 2005, requests to secure the consent of the Commissioner must be made under the administrative procedures, as modified by paragraphs (e)(3) and (4) of this section, for obtaining the Commissioner's advance consent to a change in accounting method.

(2) *Scope limitations.* Any limitations on obtaining the automatic consent or advance consent of the Commissioner do not apply to a taxpayer seeking to change its method of accounting to comply with paragraph (b)(2)(i)(D) of this section for its first taxable year ending on or after August 2, 2005.

(3) *Audit protection.* A taxpayer that changes its method of accounting in accordance with this paragraph (e) to comply with paragraph (b)(2)(i)(D) of this section does not receive audit protection if its method of accounting for additional section 263A costs is an issue under consideration at the time the application is filed with the national office.

(4) *Section 481(a) adjustment.* A change in method of accounting to conform to paragraph (b)(2)(i)(D) of this section requires a section 481(a) adjustment. The section 481(a) adjustment period is two taxable years for a net positive adjustment for an accounting method change that is made to conform to paragraph (b)(2)(i)(D) of this section.

(5) *Time for requesting change.* Notwithstanding the provisions of §1.446–1(e)(3)(i) and any contrary administrative procedure, a taxpayer may submit a request for advance consent to change its method of accounting to comply with paragraph (b)(2)(i)D) of this section for its first taxable year ending on or after August 2, 2005, on or before the date that is 30 days after the end of the taxable year for which the change is requested.

(g) *Applicability dates.* (1) Paragraphs (b)(2)(i)(D), (e), and (f) of this section apply for taxable years ending on or after August 2, 2005.

(2) Paragraphs (b)(3)(ii)(C) and (b)(4)(ii)(A)(*4*) of this section apply for taxable years ending on or after January 13, 2014.

(3) Paragraph (c) of this section applies for taxable years beginning on or after November 20, 2018. For any taxable year that both begins before November 20, 2018 and ends after November 20, 2018, the IRS will not challenge return positions consistent with all of paragraphs (c) of this section.

(4) The rules set forth in the last sentence of the introductory text of paragraph (a) of this section and in paragraph (a)(1)(ii)(C) of this section apply for taxable years beginning on or after January 5, 2021. However, for a taxable year beginning after December 31, 2017, and before January 5, 2021, a taxpayer may apply the paragraphs described in the first sentence of this paragraph (g)(4), provided that the taxpayer follows all the applicable rules contained in the regulations under section 263A for such taxable year and all subsequent taxable years.

[T.D. 8482, 58 FR 42219, Aug. 9, 1993, as amended by 59 FR 3318, 3319, Jan. 21, 1994; T.D. 8584, 59 FR 67197, Dec. 29, 1994; T.D. 9217, 70 FR 44469, Aug. 3, 2005; T.D. 9318, 72 FR 14677, Mar. 29, 2007; T.D. 9652, 79 FR 2097, Jan. 13, 2014; T.D. 9843, 83 FR 58491, Nov. 20, 2018; T.D. 9942, 86 FR 266, Jan. 5, 2021]

§ 1.263A–3 Rules relating to property acquired for resale.

(a) *Capitalization rules for property acquired for resale*—(1) *In general.* Section 263A applies to real property and personal property described in section 1221(1) acquired for resale by a retailer, wholesaler, or other taxpayer (reseller). However, for taxable years beginning after December 31, 2017, a small business taxpayer, as defined in § 1.263A–1(j), is not required to apply section 263A in that taxable year.For this purpose, personal property includes both tangible and intangible property. Property acquired for resale includes stock in trade of the taxpayer or other property which is includible in the taxpayer's inventory if on hand at the close of the taxable year, and property held by the taxpayer primarily for sale to customers in the ordinary course of the taxpayer's trade or business. See, however, § 1.263A–1(b)(11) for an exception for certain de minimis property provided to customers incident to the provision of services.

(2) *Resellers with production activities*—(i) *In general.* Generally, a taxpayer must capitalize all direct costs and certain indirect costs associated with real property and tangible personal property it produces. See § 1.263A–2(a). Thus, except as provided in paragraphs (a)(2)(ii) and (3) of this section, a reseller, including a small reseller, that also produces property must capitalize the additional section 263A costs associated with any property it produces.

(ii) *Exemption for certain small business taxpayers.* For taxable years beginning after December 31, 2017, see § 1.263A–1(j) for an exception in the case of a small business taxpayer that meets the gross receipts test of section 448(c) and § 1.448–2(c).

(iii) *De minimis production activities.* See paragraph (a)(5) of this section for rules relating to an exception for resellers with *de minimis* production activities.

(3) *Resellers with property produced under contract.* Generally, property produced for a taxpayer under a contract (within the meaning of § 1.263A–2(a)(1)(ii)(B)(*2*)) is treated as property produced by the taxpayer. See § 1.263A–2(a)(1)(ii)(B). However, a small business taxpayer is not required to capitalize additional section 263A costs to personal property produced for it under contract with an unrelated person if the contract is entered into incident to the resale activities of the small business taxpayer and the property is sold to its customers. For purposes of this paragraph, persons are related if they are described in section 267(b) or 707(b).

(4) *Use of the simplified resale method*—(i) *In general.* Except as provided in paragraphs (a)(4)(ii) and (iii) of this section, a taxpayer may elect the simplified production method, as described in § 1.263A–2(b), or the modified simplified production method, as described in § 1.263A–2(c), but may not elect the simplified resale method, as described in paragraph (d) of this section, if the taxpayer is engaged in both production and resale activities with respect to the items of eligible property listed in § 1.263A–2(b)(2).

(ii) *Resellers with de minimis production activities.* A reseller otherwise permitted to use the simplified resale method in paragraph (d) of this section may use the simplified resale method if its production activities with respect to the items of eligible property listed in § 1.263A–2(b)(2) are de minimis (within the meaning of paragraph (a)(5) of this section) and incident to its resale of personal property described in section 1221(1).

(iii) *Resellers with property produced under a contract.* A reseller otherwise permitted to use the simplified resale method in paragraph (d) of this section may use the simplified resale method even though it has personal property produced for it (e.g., private label goods) under a contract with an unrelated person if the contract is entered into incident to its resale activities and the property is sold to its customers. For purposes of this paragraph (a)(4)(iii), persons are related if they are described in section 267(b) or 707(b).

(iv) *Application of simplified resale method.* A taxpayer that uses the simplified resale method and has de minimis production activities incident to its resale activities or property produced under contract must capitalize all costs allocable to eligible property produced using the simplified resale method.

(5) *De minimis production activities*—(i) *In general.* In determining whether a taxpayer's production activities are *de minimis,* all facts and circumstances must be considered. For example, the taxpayer must consider the volume of the production activities in its trade or business. Production activities are presumed *de minimis* if—

(A) The gross receipts from the sale of the property produced by the reseller are less than 10 percent of the total gross receipts of the trade or business; and

(B) The labor costs allocable to the trade or business's production activities are less than 10 percent of the reseller's total labor costs allocable to its trade or business.

(ii) *Definition of gross receipts to determine de minimis production activities.* Gross receipts has the same definition as for purposes of the gross receipts test under §1.448–2(c), except that gross receipts are measured at the trade-or-business level rather than at the single-employer level.

(iii) *Example: Reseller with de minimis production activities.* Taxpayer N is in the retail grocery business. In 2019, N's average annual gross receipts for the three previous taxable years are greater than the gross receipts test of section 448(c). Thus, N is not exempt from the requirement to capitalize costs under section 263A. N's grocery stores typically contain bakeries where customers may purchase baked goods produced by N. N produces no other goods in its retail grocery business. N's gross receipts from its bakeries are 5 percent of the entire grocery business. N's labor costs from its bakeries are 3 percent of its total labor costs allocable to the entire grocery business. Because both ratios are less than 10 percent, N's production activities are *de minimis.* Further, because N's production activities are incident to its resale activities, N may use the simplified resale method, as provided in paragraph (a)(4)(ii) of this section.

(b) [Reserved]

(c) *Purchasing, handling, and storage costs*—(1) *In general.* Generally, §1.263A–1(e) describes the types of costs that must be capitalized by taxpayers. Resellers must capitalize the acquisition cost of property acquired for resale, as well as indirect costs described in §1.263A–1(e)(3), which are properly allocable to property acquired for resale. The indirect costs most often incurred by resellers are purchasing, handling, and storage costs. This paragraph (c) provides additional guidance regarding each of these categories of costs. As provided in §1.263A–1(e), this paragraph (c) also applies to producers incurring purchasing, handling, and storage costs.

(2) *Costs attributable to purchasing, handling, and storage.* The costs attributable to purchasing, handling, and storage activities generally consist of direct and indirect labor costs (including the costs of pension plans and other fringe benefits); occupancy expenses including rent, depreciation, insurance, security, taxes, utilities and maintenance; materials and supplies; rent, maintenance, depreciation, and insurance of vehicles and equipment; tools; telephone; travel; and the general and administrative costs that directly benefit or are incurred by reason of the taxpayer's activities.

(3) *Purchasing costs*—(i) *In general.* Purchasing costs are costs associated with operating a purchasing department or office within a trade or business, including personnel costs (e.g., of buyers, assistant buyers, and clerical workers), relating to—

(A) The selection of merchandise;

(B) The maintenance of stock assortment and volume;

(C) The placement of purchase orders;

(D) The establishment and maintenance of vendor contacts; and

(E) The comparison and testing of merchandise.

(ii) *Determination of whether personnel are engaged in purchasing activities.* The determination of whether a person is engaged in purchasing activities is based upon the activities performed by that person and not upon the person's title or job classification. Thus, for example, although an employee's job function may be described in such a way as to indicate activities outside the area of purchasing (e.g., a marketing representative), such activities must be analyzed on the basis of the activities performed by that employee. If a person performs both purchasing and non-purchasing activities, the taxpayer must reasonably allocate the person's labor costs between these activities. For example, a reasonable allocation is one based on the amount of time the person spends on each activity.

(A) *⅓–⅔ rule for allocating labor costs.* A taxpayer may elect the ⅓–⅔ rule for allocating labor costs of persons performing both purchasing and non-purchasing activities. If elected, the taxpayer must allocate the labor costs of all such persons using the ⅓–⅔ rule. Under this rule—

(*1*) If less than one-third of a person's activities are related to purchasing, none of that person's labor costs are allocated to purchasing;

(*2*) If more than two-thirds of a person's activities are related to purchasing, all of that person's labor costs are allocated to purchasing; and

(*3*) In all other cases, the taxpayer must reasonably allocate labor costs between purchasing and non-purchasing activities.

(B) *Example.* The application of paragraph (c)(3)(ii)(A) of this section may be illustrated by the following example:

Example. Taxpayer O is a reseller that employs three persons, A, B, and C, who perform both purchasing and non- purchasing activities. These persons spend the following time performing purchasing activities: A–25 %; B–70 %; and C–50 %. Under the ⅓–⅔ rule, Taxpayer O treats none of A's labor costs as purchasing costs, all of B's labor costs as purchasing costs, and Taxpayer O allocates 50 % of C's labor costs as purchasing costs.

(4) *Handling costs*—(i) *In general.* Handling costs include costs attributable to processing, assembling, repackaging, transporting, and other similar activities with respect to property acquired for resale, provided the activities do not come within the meaning of the term produce as defined in §1.263A–2(a)(1). Handling costs are generally required to be capitalized under section 263A. Under this paragraph (c)(4)(i), however, handling costs incurred at a retail sales facility (as defined in paragraph (c)(5)(ii)(B) of this section) with respect to property sold to retail customers at the facility are not required to be capitalized. Thus, for example, handling costs incurred at a retail sales facility to unload, unpack, mark, and tag goods sold to retail customers at the facility are not required to be capitalized. In addition, handling costs incurred at a dual-function storage facility (as defined in paragraph (c)(5)(ii)(G) of this section) with respect to property sold to customers from the facility are not required to be capitalized to the extent that the costs are incurred with respect to property sold in on-site sales. Handling costs attributable to property sold to customers from a dual-function storage facility in on-site sales are determined by applying the ratio in paragraph (c)(5)(iii)(B) of this section.

(ii) *Processing costs.* Processing costs are the costs a reseller incurs in making minor changes or alterations to the nature or form of a product acquired for resale. Minor changes to a product include, for example, monogramming a sweater, altering a pair of pants, and other similar activities.

(iii) *Assembling costs.* Generally, assembling costs are costs associated with incidental activities that are necessary in readying property for resale (e.g., attaching wheels and handlebars to a bicycle acquired for resale).

(iv) *Repackaging costs.* Repackaging costs are the costs a taxpayer incurs to package property for sale to its customers.

(v) *Transportation costs.* Generally, transportation costs are the costs a taxpayer incurs moving or shipping property acquired for resale. These costs include the cost of dispatching trucks; loading and unloading shipments; and sorting, tagging, and marking property. Transportation costs may consist of depreciation on trucks and equipment and the costs of fuel, insurance, labor, and similar costs. Generally, transportation costs required to be capitalized include costs incurred in transporting property—

(A) From the vendor to the taxpayer;

(B) From one of the taxpayer's storage facilities to another of its storage facilities;

(C) From the taxpayer's storage facility to its retail sales facility;

(D) From the taxpayer's retail sales facility to its storage facility; and

(E) From one of the taxpayer's retail sales facilities to another of its retail sales facilities.

(vi) *Costs not required to be capitalized as handling costs*—(A) *Distribution costs*—(*1*) *In general*. Distribution costs are not required to be capitalized. Distribution costs are any transportation costs incurred outside a storage facility in delivering goods to a customer. For this purpose, any costs incurred on a loading dock are treated as incurred outside a storage facility.

(*2*) *Costs incurred in transporting goods to a related person*. Distribution costs do not include costs incurred by a taxpayer in delivering goods to a related person. Thus, for example, when a taxpayer sells goods to a related person, the costs of transporting the goods are included in determining the basis of the goods that are sold, and hence in determining the resulting gain or loss from the sale, for all purposes of the Internal Revenue Code and the regulations thereunder. See, e.g., sections 267, 707, and 1502. For purposes of this provision, persons are related if they are described in section 267(b) or section 707(b).

(B) *Delivery of custom-ordered items*. Generally, costs incurred in transporting goods from a taxpayer's storage facility to its retail sales facility must be capitalized. However, costs incurred outside a storage facility in delivering custom-ordered items to a retail sales facility are not required to be capitalized. For this purpose, any costs incurred on a loading dock are treated as incurred outside a storage facility. Delivery of custom-ordered items occurs when a taxpayer can demonstrate that a delivery to the taxpayer's retail sales facility is made to fill an identifiable order of a particular customer (placed by the customer before the delivery of the goods occurs) for the particular goods in question. Factors that may demonstrate the existence of a specific, identifiable delivery include the following—

(*1*) The customer has paid for the item in advance of the delivery;

(*2*) The customer has submitted a written order for the item;

(*3*) The item is not normally available at the retail sales facility for onsite customer purchases; and

(*4*) The item will be returned to the storage facility (and not held for sale at the retail sales facility) if the customer cancels an order.

(C) *Pick and pack costs*—(*1*) *In general*. Generally, handling costs incurred inside a storage or warehousing facility must be capitalized. However, costs attributable to pick and pack activities inside a storage or warehousing facility are not required to be capitalized. Pick and pack activities are activities undertaken in preparation for imminent shipment to a particular customer after the customer has ordered the specific goods in question. Examples of pick and pack activities include:

(*i*) Moving specific goods from a storage location in preparation for shipment to the customer;

(*ii*) Packing or repacking those goods for shipment to the customer; and

(*iii*) Staging those goods for shipment to the customer.

(*2*) *Activities that are not pick and pack activities*. Pick and pack activities do not include:

(*i*) Unloading goods that are received for storage;

(*ii*) Checking the quantity and quality of goods received;

(*iii*) Comparing the quantity of goods received to the amounts ordered and preparing the receiving documents;

(*iv*) Moving the goods to their storage location, e.g., bins, racks, containers, etc.; and

(*v*) Storing the goods.

(*3*) *Costs not attributable to pick and pack activities*. Occupancy costs, such as rent, depreciation, insurance, security, taxes, utilities, and maintenance costs properly allocable to the storage or warehousing facility, are not costs attributable to pick and pack activities.

(5) *Storage costs*—(i) *In general*. Generally, storage costs are capitalized under section 263A to the extent they are attributable to the operation of an off-site storage or warehousing facility (an off-site storage facility). However, storage costs attributable to the operation of an on-site storage facility (as defined in paragraph (c)(5)(ii)(A) of this section) are not required to be capitalized under section 263A. Storage costs attributable to a dual-function storage facility (as defined in paragraph (c)(5)(ii)(G) of this section) must be

capitalized to the extent that the facility's costs are allocable to off-site storage.

(ii) *Definitions*—(A) *On-site storage facility*. An on-site storage facility is defined as a storage or warehousing facility that is physically attached to, and an integral part of, a retail sales facility.

(B) *Retail sales facility*. (*1*) A retail sales facility is defined as a facility where a taxpayer sells merchandise exclusively to retail customers in on-site sales. For this purpose, a retail sales facility includes those portions of any specific retail site—

(*i*) Which are customarily associated with and are an integral part of the operations of that retail site;

(*ii*) Which are generally open each business day exclusively to retail customers;

(*iii*) On or in which retail customers normally and routinely shop to select specific items of merchandise; and

(*iv*) Which are adjacent to or in immediate proximity to other portions of the specific retail site.

(*2*) Thus, for example, two lots of an automobile dealership physically separated by an alley or an access road would generally be considered one retail sales facility, provided customers routinely shop on both of the lots to select the specific automobiles that they wish to acquire.

(C) *An integral part of a retail sales facility*. A storage facility is considered an integral part of a retail sales facility when the storage facility is an essential and indispensable part of the retail sales facility. For example, if the storage facility is used exclusively for filling orders or completing sales at the retail sales facility, the storage facility is an integral part of the retail sales facility.

(D) *On-site sales*. On-site sales are defined as sales made to retail customers physically present at a facility. For example, mail order and catalog sales are made to customers not physically present at the facility, and thus, are not on-site sales.

(E) *Retail customer*—(*1*) *In general*. A retail customer is defined as the final purchaser of the merchandise. A retail customer does not include a person who resells the merchandise to others, such as a contractor or manufacturer that incorporates the merchandise into another product for sale to customers.

(*2*) *Certain non-retail customers treated as retail customers*. For purposes of this section, a non-retail customer is treated as a retail customer with respect to a particular facility if the following requirements are satisfied—

(*i*) The non-retail customer purchases goods under the same terms and conditions as are available to retail customers (e.g., no special discounts);

(*ii*) The non-retail customer purchases goods in the same manner as a retail customer (e.g., the non-retail customer may not place orders in advance and must come to the facility to examine and select goods);

(*iii*) Retail customers shop at the facility on a routine basis (i.e., on most business days), and no special days or hours are reserved for non-retail customers; and

(*iv*) More than 50 percent of the gross sales of the facility are made to retail customers.

(F) *Off-site storage facility*. An off-site storage facility is defined as a storage facility that is not an on-site storage facility.

(G) *Dual-function storage facility*. A dual-function storage facility is defined as a storage facility that serves as both an off-site storage facility and an on-site storage facility. For example, a dual-function storage facility would include a regional warehouse that serves the taxpayer's separate retail sales outlets and also contains a sales outlet therein. A dual-function storage facility also includes any facility where sales are made to retail customers in on-site sales and to—

(*1*) Retail customers in sales that are not on-site sales; or

(*2*) Other customers.

(iii) *Treatment of storage costs incurred at a dual-function storage facility*—(A) *In general*. Storage costs associated with a dual-function storage facility must be allocated between the off-site storage function and the on-site storage function. To the extent that the dual-function storage facility's storage costs are allocable to the off-site storage function, they must be capitalized. To the extent that the dual-function storage facility's storage costs are allocable to the on-site storage function, they are not required to be capitalized.

(B) *Dual-function storage facility allocation ratio*—(*1*) *In general.* Storage costs associated with a dual-function storage facility must be allocated between the off-site storage function and the on-site storage function using the ratio of—

(*i*) Gross on-site sales of the facility (i.e., gross sales of the facility made to retail customers visiting the premises in person and purchasing merchandise stored therein); to

(*ii*) Total gross sales of the facility. For this purpose, the total gross sales of the facility include the value of items shipped to other facilities of the taxpayer.

(*2*) *Illustration of ratio allocation.* For example, if a dual-function storage facility's on-site sales are 40 percent of the total gross sales of the facility, then 40 percent of the facility's storage costs are allocable to the on-site storage function and are not required to be capitalized under section 263A.

(*3*) *Appropriate adjustments for other uses of a dual-function storage facility.* Prior to computing the allocation ratio in paragraph (c)(5)(iii)(B) of this section, a taxpayer must apply the principles of paragraph (c)(5)(iv) of this section in determining the portion of the facility that is a dual-function storage facility (and the costs attributable to such portion).

(C) *De minimis 90–10 rule for dual-function storage facilities.* If 90 percent or more of the costs of a facility are attributable to the on-site storage function, the entire storage facility is deemed to be an on-site storage facility. In contrast, if 10 percent or less of the costs of a storage facility are attributable to the on-site storage function, the entire storage facility is deemed to be an off-site storage facility.

(iv) *Costs not attributable to an off-site storage facility.* To the extent that costs incurred at an off-site storage facility are not properly allocable to the taxpayer's storage function, the costs are not accounted for as off-site storage costs. For example, if a taxpayer has an office attached to its off-site storage facility where work unrelated to the storage function is performed, such as a sales office, costs associated with this office are not off-site storage costs. However, if a taxpayer uses a portion of an off-site storage facility in a manner related to the storage function, for example, to store equipment or supplies that are not offered for sale to customers, costs associated with this portion of the facility are off-site storage costs.

(v) *Examples.* The provisions of this paragraph (c)(5) are illustrated by the following examples:

Example 1. Catalog or mail order center. Taxpayer P operates a mail order catalog business. As part of its business, P stores merchandise for shipment to customers who purchase the merchandise through orders placed by telephone or mail. P's storage facility is not an on-site storage facility because no onsite sales are made at the facility.

Example 2. Pooled-stock facility. Taxpayer Q maintains a pooled-stock facility, which functions as a back-up regional storage facility for Q's retail sales outlets in the nearby area. Q's pooled stock facility is an off-site storage facility because it is neither physically attached to nor an integral part of a retail sales facility.

Example 3. Wholesale warehouse. Taxpayer R operates a wholesale warehouse where wholesale sales are made to customers physically present at the facility. R's customers resell the goods they purchase from R to final retail customers. Because no retail sales are conducted at the facility, all storage costs attributable to R's wholesale warehouse must be capitalized.

(d) *Simplified resale method*—(1) *Introduction.* This paragraph (d) provides a simplified method for determining the additional section 263A costs properly allocable to property acquired for resale and other eligible property on hand at the end of the taxable year.

(2) *Eligible property.* Generally, the simplified resale method is only available to a trade or business exclusively engaged in resale activities. However, certain resellers with property produced as a result of de minimis production activities or property produced under contract may elect the simplified resale method, as described in paragraph (a)(4) of this section. Eligible property for purposes of the simplified resale method, therefore, includes any real or personal property described in section 1221(1) that is acquired for resale and any eligible property (within the meaning of §1.263A–

2(b)(2)) that is described in paragraph (a)(4) of this section.

(3) *Simplified resale method without historic absorption ratio election*—(i) *General allocation formula*—(A) *In general.* Under the simplified resale method, the additional section 263A costs allocable to eligible property remaining on hand at the close of the taxable year are computed as follows:

$$\text{Combined absorption ratio} \times \text{section 471 costs remaining on hand at year end}$$

(B) *Effect of allocation.* The resulting product under the general allocation formula is the additional section 263A costs that are added to the taxpayer's ending section 471 costs to determine the section 263A costs that are capitalized.

(C) *Definitions*—(*1*) *Combined absorption ratio.* The combined absorption ratio is defined as the sum of the storage and handling costs absorption ratio as defined in paragraph (d)(3)(i)(D) of this section and the purchasing costs absorption ratio as defined in paragraph (d)(3)(i)(E) of this section.

(*2*) *Section 471 costs remaining on hand at year end.* Section 471 costs remaining on hand at year end mean the section 471 costs, as defined in §1.263A–1(d)(2), that the taxpayer incurs during its current taxable year, which remain in its ending inventory or are otherwise on hand at year end. For LIFO inventories of a taxpayer, the section 471 costs remaining on hand at year end means the increment, if any, for the current year stated in terms of section 471 costs. See paragraph (d)(3)(ii) of this section for special rules applicable to LIFO taxpayers. Except as otherwise provided in this section or in §1.263A–1 or 1.263A–2, additional section 263A costs that are allocated to inventories on hand at the close of the taxable year under the simplified resale method of this paragraph (d) are treated as inventory costs for all purposes of the Internal Revenue Code.

(*3*) *Costs allocable to property sold.* Section 471 costs remaining on hand at year end, as defined in paragraph (d)(3)(i)(C)(*2*) of this section, do not include costs that are specifically described in §1.263A–1(e)(3)(ii) or cost reductions described in §1.471–3(e) that a taxpayer properly allocates entirely to property that has been sold.

(D) *Storage and handling costs absorption ratio.* (*1*) Under the simplified resale method, the storage and handling costs absorption ratio is determined as follows:

$$\frac{\text{Current year's storage and handling costs}}{\text{Beginning inventory plus current year's purchases}}$$

(*2*) Current year's storage and handling costs are defined as the total storage costs plus the total handling costs incurred during the taxable year that relate to the taxpayer's property acquired for resale and other eligible property. See paragraph (c) of this section, which discusses storage and handling costs. Storage and handling costs must include the amount of allocable mixed service costs as described in paragraph (d)(3)(i)(F) of this section. Beginning inventory in the denominator of the storage and handling costs absorption ratio refers to the section 471 costs of any property acquired for resale or other eligible property held by the taxpayer as of the beginning of the taxable year. Current year's purchases generally mean the taxpayer's section 471 costs incurred with respect to purchases of property acquired for resale during the current taxable year. In computing the denominator of the storage and handling costs absorption ratio, a taxpayer using a dollar-value LIFO method of accounting, must state beginning inventory amounts using the

LIFO carrying value of the inventory and not current-year dollars.

(*3*) Current year's storage and handling costs, beginning inventory, and current year's purchases, as defined in paragraph (d)(3)(i)(D)(*2*) of this section, do not include costs that are specifically described in §1.263A–1(e)(3)(ii) or cost reductions described in §1.471–3(e) that a taxpayer properly allocates entirely to property that has been sold.

(E) *Purchasing costs absorption ratio.* (*1*) Under the simplified resale method, the purchasing costs absorption ratio is determined as follows:

$$\frac{\text{Current year's purchasing costs}}{\text{Current year's purchases}}$$

(*2*) Current year's purchasing costs are defined as the total purchasing costs incurred during the taxable year that relate to the taxpayer's property acquired for resale and eligible property. See paragraph (c)(3) of this section, which discusses purchasing costs. Purchasing costs must include the amount of allocable mixed service costs determined in paragraph (d)(3)(i)(F) of this section. Current year's purchases generally mean the taxpayer's section 471 costs incurred with respect to purchases of property acquired for resale during the current taxable year.

(*3*) Current year's purchasing costs and current year's purchases, as defined in paragraph (d)(3)(i)(E)(*2*) of this section, do not include costs that are specifically described in §1.263A–1(e)(3)(ii) or cost reductions described in §1.471–3(e) that a taxpayer properly allocates entirely to property that has been sold.

(F) *Allocable mixed service costs.* (*1*) If a taxpayer allocates its mixed service costs to purchasing costs, storage costs, and handling costs using a method described in §1.263A–1(g)(4), the taxpayer is not required to determine its allocable mixed service costs under this paragraph (d)(3)(i)(F). However, if the taxpayer uses the simplified service cost method, the amount of mixed service costs allocated to and included in purchasing costs, storage costs, and handling costs in the absorption ratios in paragraphs (d)(3)(i) (D) and (E) of this section is determined as follows:

$$\frac{\text{Labor costs allocable to activity}}{\text{Total labor costs}} \times \text{Total mixed service costs}$$

(*2*) Labor costs allocable to activity are defined as the total labor costs allocable to each particular activity (i.e., purchasing, handling, and storage), excluding labor costs included in mixed service costs. Total labor costs are defined as the total labor costs (excluding labor costs included in mixed service costs) that are incurred in the taxpayer's trade or business during the taxable year. See §1.263A–1(h)(6) for the definition of total mixed service costs.

(ii) *LIFO taxpayers electing simplified resale method*—(A) *In general.* Under the simplified resale method, a taxpayer using a LIFO method must calculate a particular year's index (e.g., under §1.472–8(e)) without regard its additional section 263A costs. Similarly, a taxpayer that adjusts current-year costs by applicable indexes to determine whether there has been an inventory increment or decrement in the current year for a particular LIFO pool must disregard the additional section 263A costs in making that determination.

(B) *LIFO increment.* If the taxpayer determines there has been an inventory increment, the taxpayer must state the amount of the increment in current-year dollars (stated in terms of section

471 costs). The taxpayer then multiplies this amount by the combined absorption ratio. The resulting product is the additional section 263A costs that must be added to the taxpayer's increment for the year stated in terms of section 471 costs.

(C) *LIFO decrement*. If the taxpayer determines there has been an inventory decrement, the taxpayer must state the amount of the decrement in dollars applicable to the particular year for which the LIFO layer has been invaded. The additional section 263A costs incurred in prior years that are applicable to the decrement are charged to cost of goods sold. The additional section 263A costs that are applicable to the decrement are determined by multiplying the additional section 263A costs allocated to the layer of the pool in which the decrement occurred by the ratio of the decrement (excluding additional section 263A costs) to the section 471 costs in the layer of that pool.

(iii) *Permissible variations of the simplified resale method*. The following variations of the simplified resale method are permitted:

(A) The exclusion of beginning inventories from the denominator in the storage and handling costs absorption ratio formula in paragraph (d)(3)(i)(D) of this section; or

(B) Multiplication of the storage and handling costs absorption ratio in paragraph (d)(3)(i)(D) of this section by the total of section 471 costs included in a LIFO taxpayer's ending inventory (rather than just the increment, if any, experienced by the LIFO taxpayer during the taxable year) for purposes of determining capitalizable storage and handling costs.

(iv) *Examples*. The provisions of this paragraph (d)(3) are illustrated by the following examples:

Example 1. FIFO inventory method. (i) Taxpayer S uses the FIFO method of accounting for inventories. S's beginning inventory for 1994 (all of which was sold during 1994) was $2,100,000 (consisting of $2,000,000 of section 471 costs and $100,000 of additional section 263A costs). During 1994, S makes purchases of $10,000,000. In addition, S incurs purchasing costs of $460,000, storage costs of $110,000, and handling costs of $90,000. S's purchases (section 471 costs) remaining in ending inventory at the end of 1994 are $3,000,000.

(ii) In 1994, S incurs $400,000 of total mixed service costs and $1,000,000 of total labor costs (excluding labor costs included in mixed service costs). In addition, S incurs the following labor costs (excluding labor costs included in mixed service costs): purchasing—$100,000, storage—$200,000, and handling—$200,000. Accordingly, the following mixed service costs must be included in purchasing costs, storage costs, and handling costs as capitalizable mixed service costs: purchasing—$40,000 ([$100,000 divided by $1,000,000] multiplied by $400,000); storage—$80,000 ([$200,000 divided by $1,000,000] multiplied by $400,000); and handling—$80,000 ([$200,000 divided by $1,000,000] multiplied by $400,000).

(iii) S computes its purchasing costs absorption ratio for 1994 as follows:

$$\frac{\text{1994 purchasing costs}}{\text{1994 purchases}} = \frac{\$460{,}000 + \$40{,}000}{\$10{,}000{,}000}$$

$$= \frac{\$500{,}000}{\$10{,}000{,}000}$$

$$= 5.0\%$$

(iv) S computes its storage and handling costs absorption ratio for 1994 as follows:

$$\frac{\text{Storage and handling costs}}{\begin{array}{c}\text{Beginning inventory}\\ \text{plus 1994 purchases}\end{array}} = \frac{(\$110{,}000+\$80{,}000)+(\$90{,}000+\$80{,}000)}{\$2{,}000{,}000+\$10{,}000{,}000}$$

$$= \frac{\$190{,}000+\$170{,}000}{\$12{,}000{,}000}$$

$$= \frac{\$360{,}000}{\$12{,}000{,}000}$$

$$= 3.0\%$$

(v) S's combined absorption ratio is 8.0 %, or the sum of the purchasing costs absorption ratio (5.0 %) and the storage and handling costs absorption ratio (3.0 %). Under the simplified resale method, S determines the additional section 263A costs allocable to its ending inventory by multiplying the combined absorption ratio by its section 471 costs with respect to current year's purchases remaining in ending inventory:

$$\text{Additional section 263A costs} = 8.0\% \times \$3{,}000{,}000 = \$240{,}000$$

(vi) S adds this $240,000 to the $3,000,000 of purchases remaining in its ending inventory to determine its total ending FIFO inventory of $3,240,000.

Example 2. LIFO inventory method. (i) Taxpayer T uses a dollar-value LIFO inventory method. T's beginning inventory for 1994 is $2,100,000 (consisting of $2,000,000 of section 471 costs and $100,000 of additional section 263A costs). During 1994, T makes purchases of $10,000,000. In addition, T incurs purchasing costs of $460,000, storage costs of $110,000, and handling costs of $90,000. T's 1994 LIFO increment is $1,000,000 ($3,000,000 of section 471 costs in ending inventory less $2,000,000 of section 471 costs in beginning inventory).

(ii) In 1994, T incurs $400,000 of total mixed service costs and $1,000,000 of total labor costs (excluding labor costs included in mixed service costs). In addition, T incurs the following labor costs (excluding labor costs included in mixed service costs): purchasing—$100,000, storage—$200,000, and handling—$200,000. Accordingly, the following mixed service costs must be included in purchasing costs, storage costs, and handling costs as capitalizable mixed service costs: purchasing—$40,000 ([$100,000 divided by $1,000,000] multiplied by $400,000); storage—$80,000 ([$200,000 divided by $1,000,000] multiplied by $400,000); and handling—$80,000 ([$200,000 divided by $1,000,000] multiplied by $400,000).

(iii) Based on these facts, T determines that it has a combined absorption ratio of 8.0 %. To determine the additional section 263A costs allocable to its ending inventory, T multiplies its combined absorption ratio (8.0 %) by the $1,000,000 LIFO increment. Thus, T's additional section 263A costs allocable to its ending inventory are $80,000 ($1,000,000 multiplied by 8.0 %). This $80,000 is added to the $1,000,000 to determine a total 1994 LIFO increment of $1,080,000. T's ending inventory is $3,180,000 (its beginning inventory of $2,100,000 plus the $1,080,000 increment).

(iv) In 1995, T sells one-half of the inventory in its 1994 LIFO increment. T must include in its cost of goods sold for 1995 the amount of additional section 263A costs relating to this inventory, i.e., one-half of the $80,000 additional section 263A costs capitalized in 1994 ending inventory, or $40,000.

Example 3. LIFO Pools. (i) Taxpayer U begins its business in 1994, and adopts the LIFO inventory method. During 1994, U makes purchases of $10,000, and incurs $400 of purchasing costs, $350 of storage costs and $250 of handling costs. U's purchasing costs, storage costs, and handling costs include their proper allocable share of mixed service costs.

(ii) U computes its purchasing costs absorption ratio for 1994, as follows:

$$\frac{\text{1994 purchasing costs}}{\text{1994 purchases}} = \frac{\$400}{\$10{,}000}$$

$$= 4.0\%$$

(iii) U computes its storage and handling costs absorption ratio for 1994, as follows:

$$\frac{\text{1994 storage and handling costs}}{\text{Beginning inventory plus 1994 purchases}} = \frac{\$350 + \$250}{\$0 + \$10{,}000}$$

$$= \frac{\$600}{\$10{,}000}$$

$$= 6.0\%$$

(iv) U's combined absorption ratio is 10%, or the sum of the purchasing costs absorption ratio (4.0%) and the storage and handling costs absorption ratio (6.0%). At the end of 1994, U's ending inventory included $3,000 of current year purchases, contained in three LIFO pools (X, Y, and Z) as shown below. Under the simplified resale method, U computes its ending inventory for 1994 as follows:

1994	Total	X	Y	Z
Ending section 471 costs	$3,000	$1,600	$600	$800
Additional section 263A costs (10%)	300	160	60	80
1994 ending inventory	3,300	1,760	660	880

(v) During 1995, U makes purchases of $2,000 as shown below, and incurs $200 of purchasing costs, $325 of storage costs and $175 of handling costs. U's purchasing costs, storage costs, and handling costs include their proper share of mixed service costs. Moreover, U sold goods from pools X, Y, and Z having a total cost of $1,000. U computes its ending inventory for 1995 as follows.

(vi) U computes its purchasing costs absorption ratio for 1995:

$$\frac{\text{1995 purchasing costs}}{\text{1995 purchases}} = \frac{\$200}{\$2{,}000}$$

$$= 10.0\%$$

(vii) U computes its storage and handling costs absorption ratio for 1995:

$$\frac{\text{1995 storage and handling costs}}{\text{Beginning inventory plus 1995 purchases}} = \frac{\$325 + \$175}{\$3{,}000 + \$2{,}000}$$

$$= \frac{\$500}{\$5{,}000}$$

$$= 10.0\%$$

(viii) U's combined absorption ratio is 20.0%, or the sum of the purchasing costs absorption ratio (10.0%) and the storage and handling costs absorption ratio (10.0%).

1995	Total	X	Y	Z
Beginning section 471 costs	$3,000	$1,600	$600	$800
1995 section 471 costs	2,000	1,500	300	200
Section 471 cost of goods sold	(1,000)	(300)	(300)	(400)
1995 ending section 471 costs	4,000	2,800	600	600
Consisting of:				
1994 layer	2,800	1,600	600	600
1995 layer	1,200	1,200		
	4,000	2,800	600	600

1995	Total	X	Y	Z
Additional section 263A costs:				
1994 (10%)	280	160	60	60
1995 (20%)	240	240		
	520	400	60	60
1995 ending inventory	4,520	3,200	660	660

(ix) In 1995, U experiences a $200 decrement in Pool Z. Thus, U must charge the additional section 263A costs incurred in prior years applicable to the decrement to 1995's cost of goods sold. To do so, U determines a ratio by dividing the decrement by the section 471 costs in the 1994 layer ($200 divided by $800, or 25%). U then multiplies this ratio (25%) by the additional section 263A costs in the 1994 layer ($80) to determine the additional section 263A costs applicable to the decrement ($20). Therefore, $20 is taken into account by U in 1995 as part of its cost of goods sold ($80 multiplied by 25%).

(4) *Simplified resale method with historic absorption ratio election*—(i) *In general.* This paragraph (d)(4) permits resellers using the simplified resale method to elect a historic absorption ratio in determining additional section 263A costs allocable to eligible property remaining on hand at the close of their taxable years. Except as provided in paragraph (d)(4)(v) of this section, a taxpayer may only make a historic absorption ratio election if it has used the simplified resale method for three or more consecutive taxable years immediately prior to the year of election. The historic absorption ratio is used in lieu of an actual combined absorption ratio computed under paragraph (d)(3)(i)(C)(*1*) of this section and is based on costs capitalized by a taxpayer during its test period. If elected, the historic absorption ratio must be used for the qualifying period described in paragraph (d)(4)(ii)(C) of this section.

(ii) *Operating rules and definitions*—(A) *Historic absorption ratio.* (*1*) The historic absorption ratio is equal to the following ratio:

$$\frac{\text{Additional section 263A costs incurred during the test period}}{\text{Section 471 costs incurred during the test period}}$$

(*2*) Additional section 263A costs incurred during the test period are defined as the sum of the products of the combined absorption ratios (defined in paragraph (d)(3)(i)(C)(*1*) of this section) multiplied by a taxpayer's section 471 costs incurred with respect to purchases, for each taxable year of the test period.

(*3*) Section 471 costs incurred during the test period mean the section 471 costs described in §1.263A–1(d)(2) that a taxpayer incurs generally with respect to its purchases during the test period described in paragraph (d)(4)(ii)(B) of this section.

(B) *Test period*—(*1*) *In general.* The test period is generally the three taxable-year period immediately prior to the taxable year that the historic absorption ratio is elected.

(*2*) *Updated test period.* The test period begins again with the beginning of the first taxable year after the close of a qualifying period (as defined in paragraph (d)(4)(ii)(C) of this section). This new test period, the updated test period, is the three taxable-year period beginning with the first taxable year after the close of the qualifying period.

(C) *Qualifying period*—(*1*) *In general.* A qualifying period includes each of the first five taxable years beginning with the first taxable year after a test period (or updated test period).

(*2*) *Extension of qualifying period.* In the first taxable year following the close of each qualifying period (e.g., the sixth taxable year following the test period), the taxpayer must compute the actual combined absorption ratio under the simplified resale method. If the actual combined absorption ratio computed for this taxable year (the recomputation year) is within one-half of one percentage point (plus or minus) of the historic absorption ratio used in determining capitalizable costs for the qualifying period (i.e., the previous five taxable years), the qualifying period must be extended to include the recomputation year and the following five taxable years, and the taxpayer must continue to use the historic absorption ratio throughout the extended qualifying period. If, however, the actual combined absorption ratio computed for the recomputation year is not within one-half of one percentage point (plus or minus) of the historic absorption ratio, the taxpayer must use actual combined absorption ratios beginning with the recomputation year under the simplified resale method and throughout the updated test period. The taxpayer must resume using the historic absorption ratio (determined with reference to the updated test period) in the third taxable year following the recomputation year.

(iii) *Method of accounting*—(A) *Adoption and use.* The election to use the historic absorption ratio is a method of accounting. A taxpayer using the simplified resale method may elect the historic absorption ratio in any taxable year if permitted under this paragraph (d)(4), provided the taxpayer has not obtained the Commissioner's consent to revoke the historic absorption ratio election within its prior six taxable years. The election is to be effected on a cut-off basis, and thus, no adjustment under section 481(a) is required or permitted. The use of a historic absorption ratio has no effect on other methods of accounting adopted by the taxpayer and used in conjunction with the simplified resale method in determining its section 263A costs. Accordingly, in computing its actual combined absorption ratios, the taxpayer must use the same methods of accounting used in computing its historic absorption ratio during its most recent test period unless the taxpayer obtains the consent of the Commissioner. Finally, for purposes of this paragraph (d)(4)(iii)(A), the recomputation of the historic absorption ratio during an updated test period and the change from a historic absorption ratio to an actual combined absorption ratio during an updated test period by reason of the requirements of this paragraph (d)(4) are not considered changes in methods of accounting under section 446(e) and, thus, do not require the consent of the Commissioner or any adjustments under section 481(a).

(B) *Revocation of election.* A taxpayer may only revoke its election to use the historic absorption ratio with the consent of the Commissioner in a manner prescribed under section 446(e) and the regulations thereunder. Consent to the change for any taxable year that is included in the qualifying period (or an extended qualifying period) will be granted only upon a showing of unusual circumstances.

(iv) *Reporting and recordkeeping requirements*—(A) *Reporting.* A taxpayer making an election under this paragraph (d)(4) must attach a statement to its federal income tax return for the taxable year in which the election is made showing the actual combined absorption ratios determined under the simplified resale method during its first test period. This statement must disclose the historic absorption ratio to be used by the taxpayer during its qualifying period. A similar statement must be attached to the federal income tax return for the first taxable year within any subsequent qualifying period (i.e., after an updated test period).

(B) *Recordkeeping.* A taxpayer must maintain all appropriate records and details supporting the historic absorption ratio until the expiration of the statute of limitations for the last year for which the taxpayer applied the particular historic absorption ratio in determining additional section 263A costs capitalized to eligible property.

(v) (A) *Transition to elect historic absorption ratio.* Taxpayers will be permitted to elect a historic absorption ratio in their first, second, or third taxable year beginning after December 31, 1993, under such terms and conditions as may be prescribed by the Commissioner. Taxpayers are eligible to make an election under these transition rules whether or not they previously used the simplified resale method. A taxpayer making such an election must recompute (or compute) its additional section 263A costs, and thus, its historic absorption ratio for its first test period as if the rules prescribed in this section and §§1.263A–1 and 1.263A–2 had applied throughout the test period.

(B) *Transition to revoke historic absorption ratio*. Notwithstanding the requirements provided in paragraph (d)(4)(iii)(B) of this section regarding revocations of the historic absorption ratio during a qualifying period, a taxpayer will be permitted to revoke the historic absorption ratio in their first, second, or third taxable year ending on or after *November 20, 2018*, under such administrative procedures and with terms and conditions prescribed by the Commissioner.

(vi) *Example*. The provisions of this paragraph (d)(4) are illustrated by the following example:

Example. (i) Taxpayer V uses the FIFO method of accounting for inventories and in 1994 elects to use the historic absorption ratio with the simplified resale method. After recomputing its additional section 263A costs in accordance with the transition rules of paragraph (d)(4)(v) of this section, V identifies the following costs incurred during the test period:

1991:
Add'l section 263A costs—$100
Section 471 costs—$3,000
1992:
Add'l section 263A costs—$200
Section 471 costs—$4,000
1993:
Add'l section 263A costs—$300
Section 471 costs—$5,000

(ii) Therefore, V computes a 5% historic absorption ratio determined as follows:

$$\text{Historic absorption ratio} = \frac{\$100 + 200 + 300}{\$3000 + 4{,}000 + 5{,}000} = \frac{\$600}{\$12{,}000} = 5\%$$

(iii) In 1994, V incurs $10,000 of section 471 costs of which $3,000 remain in inventory at the end of the year. Under the simplified resale method using a historic absorption ratio, V determines the additional section 263A costs allocable to its ending inventory by multiplying its historic ratio (5%) by the section 471 costs remaining in its ending inventory:

$$\text{Additional section 263A costs} = 5\% \times \$3{,}000 = \$150$$

(iv) To determine its ending inventory under section 263A, V adds the additional section 263A costs allocable to ending inventory to its section 471 costs remaining in ending inventory ($3,150 = $150 + $3,000). The balance of V's additional section 263A costs incurred during 1994 is taken into account in 1994 as part of V's cost of goods sold.

(v) V's qualifying period ends as of the close of its 1998 taxable year. Therefore, 1999 is a recomputation year in which V must compute its actual combined absorption ratio. V determines its actual absorption ratio for 1999 to be 5.25% and compares that ratio to its historic absorption ratio (5.0%). Therefore, V must continue to use its historic absorption ratio of 5.0% throughout an extended qualifying period, 1999 through 2004 (the recomputation year and the following five taxable years).

(vi) If, instead, V's actual combined absorption ratio for 1999 were not between 4.5% and 5.5%, V's qualifying period would end and V would be required to compute a new historic absorption ratio with reference to an updated test period of 1999, 2000, and 2001. Once V's historic absorption ratio is determined for the updated test period, it would be used for a new qualifying period beginning in 2002.

(5) *Additional simplified methods for resellers*. The Commissioner may prescribe additional elective simplified methods by revenue ruling or revenue procedure.

(e) *Cross reference*. See §1.6001–1(a) regarding the duty of taxpayers to keep such records as are sufficient to establish the amount of gross income, deductions, etc.

(f) *Applicability dates.* (1) Paragraphs (d)(3)(i)(C)(*3*), (d)(3)(i)(D)(*3*), and (d)(3)(i)(E)(*3*) of this section apply for taxable years ending on or after January 13, 2014.

(2) The rules set forth in the second sentence of paragraph (a)(1) of this section, paragraphs (a)(2)(ii) and (iii) of this section, the third sentence of paragraph (a)(3) of this section, and paragraphs (a)(4)(ii) and (a)(5) of this section apply for taxable years beginning on or after January 5, 2021 . However, for a taxable year beginning after December 31, 2017, and before January 5, 2021, a taxpayer may apply the paragraphs described in the first sentence of this paragraph (f)(2), provided the taxpayer follows all the applicable rules contained in the regulations under section 263A for such taxable year and all subsequent taxable years.

[T.D. 8482, 58 FR 42224, Aug. 9, 1993; 58 FR 47784, Sept. 10, 1993; 59 FR 3319, Jan. 21, 1994, as amended by T.D. 8559, 59 FR 39962, Aug. 5, 1994, T.D. 9652, 79 FR 2097, Jan. 13, 2014; T.D. 9843, 83 FR 58498, Nov. 20, 2018; T.D. 9942, 86 FR 266, Jan. 5, 2021]

§ 1.263A–4 Rules for property produced in a farming business.

(a) *Introduction*—(1) *In general.* This section provides guidance with respect to the application of section 263A to property produced in a farming business as defined in paragraph (a)(5) of this section. Except as otherwise provided by the rules of this section, the general rules of §§ 1.263A–1 through 1.263A–3 and §§ 1.263A–7 through 1.263A–15 apply to property produced in a farming business. A taxpayer that engages in the raising or growing of any agricultural or horticultural commodity, including both plants and animals, is engaged in the production of property. Section 263A generally requires the capitalization of the direct costs and an allocable portion of the indirect costs that directly benefit or are incurred by reason of the production of this property. The direct and indirect costs of producing plants or animals generally include preparatory costs allocable to the plant or animal and preproductive period costs of the plant or animal. Except as provided in paragraphs (a)(2), (a)(3), and (e) of this section, taxpayers must capitalize the costs of producing all plants and animals unless the election described in paragraph (d) of this section is made.

(2) *Exception*—(i) *In general.* Section 263A does not apply to the costs of producing plants with a preproductive period of 2 years or less or the costs of producing animals in a farming business, if the taxpayer is not—

(A) A corporation or partnership required to use an accrual method of accounting (accrual method) under section 447 in computing its taxable income from farming; or

(B) A tax shelter prohibited from using the cash receipts and disbursements method of accounting (cash method) under section 448(a)(3).

(ii) *Tax shelter*—(A) *In general.* A farming business is considered a tax shelter, and thus a taxpayer prohibited from using the cash method under section 448(a)(3), if the farming business is—

(*1*) A farming syndicate as defined in section 461(k); or

(*2*) A tax shelter, within the meaning of section 6662(d)(2)(C)(iii).

(B) *Presumption.* Marketed arrangements in which persons carry on farming activities using the services of a common managerial or administrative service will be presumed to have the principal purpose of tax avoidance, within the meaning of section 6662(d)(2)(C)(iii), if such persons prepay a substantial portion of their farming expenses with borrowed funds.

(iii) *Examples.* The following examples illustrate the provisions of this paragraph (a)(2):

Example 1. Farmer A grows trees that have a preproductive period in excess of 2 years, and that produce an annual crop. Farmer A is not required by section 447 to use an accrual method or prohibited by section 448(a)(3) from using the cash method. Accordingly, Farmer A qualifies for the exception described in this paragraph (a)(2). Since the trees have a preproductive period in excess of 2 years, Farmer A must capitalize the direct costs and an allocable portion of the indirect costs that directly benefit or are incurred by reason of the production of the trees. Since the annual crop has a preproductive period of 2 years or less, Farmer A is not required to capitalize the costs of producing the crops.

Example 2. Assume the same facts as *Example 1,* except that Farmer A is required by section 447 to use an accrual method or prohibited by 448(a)(3) from using the cash method. Farmer A does not qualify for the exception described in this paragraph (a)(2). Farmer A is required to capitalize the direct costs and an allocable portion of the indirect costs that directly benefit or are incurred by reason of the production of the trees and crops.

(3) *Exemption for certain small business taxpayers.* For taxable years beginning after December 31, 2017, see § 1.263A–1(j) for an exception in the case of a small business taxpayer that meets the gross receipts test of section 448(c) and § 1.448–2(c).

(4) *Costs required to be capitalized or inventoried under another provision.* The exceptions from capitalization provided in paragraphs (a)(2), (a)(3), (d) and (e) of this section do not apply to any cost that is required to be capitalized or inventoried under another Internal Revenue Code or regulatory provision, such as section 263 or 471.

(5) *Farming business*—(i) *In general.* A farming business means a trade or business involving the cultivation of land or the raising or harvesting of any agricultural or horticultural commodity. Examples include the trade or business of operating a nursery or sod farm; the raising or harvesting of trees bearing fruit, nuts, or other crops; the raising of ornamental trees (other than evergreen trees that are more than 6 years old at the time they are severed from their roots); and the raising, shearing, feeding, caring for, training, and management of animals. For purposes of this section, the term harvesting does not include contract harvesting of an agricultural or horticultural commodity grown or raised by another. Similarly, merely buying and reselling plants or animals grown or raised entirely by another is not raising an agricultural or horticultural commodity. A taxpayer is engaged in raising a plant or animal, rather than the mere resale of a plant or animal, if the plant or animal is held for further cultivation and development prior to sale. In determining whether a plant or animal is held for further cultivation and development prior to sale, consideration will be given to all of the facts and circumstances, including: the value added by the taxpayer to the plant or animal through agricultural or horticultural processes; the length of time between the taxpayer's acquisition of the plant or animal and the time that the taxpayer makes the plant or animal available for sale; and in the case of a plant, whether the plant is kept in the container in which purchased, replanted in the ground, or replanted in a series of larger containers as it is grown to a larger size.

(A) *Plant.* A plant produced in a farming business includes, but is not limited to, a fruit, nut, or other crop bearing tree, an ornamental tree, a vine, a bush, sod, and the crop or yield of a plant that will have more than one crop or yield raised by the taxpayer. Sea plants are produced in a farming business if they are tended and cultivated as opposed to merely harvested.

(B) *Animal.* An animal produced in a farming business includes, but is not limited to, any stock, poultry or other bird, and fish or other sea life raised by the taxpayer. Thus, for example, the term animal may include a cow, chicken, emu, or salmon raised by the taxpayer. Fish and other sea life are produced in a farming business if they are raised on a fish farm. A fish farm is an area where fish or other sea life are grown or raised as opposed to merely caught or harvested.

(ii) *Incidental activities*—(A) *In general.* A farming business includes processing activities that are normally incident to the growing, raising, or harvesting of agricultural or horticultural products. For example, a taxpayer in the trade or business of growing fruits and vegetables may harvest, wash, inspect, and package the fruits and vegetables for sale. Such activities are normally incident to the raising of these crops by farmers. The taxpayer will be considered to be in the trade or business of farming with respect to the growing of fruits and vegetables and the processing activities incident to their harvest.

(B) *Activities that are not incidental.* Farming business does not include the processing of commodities or products beyond those activities that are normally incident to the growing, raising, or harvesting of such products.

(iii) *Examples*. The following examples illustrate the provisions of this paragraph (a)(5):

Example 1. Individual A operates a retail nursery. Individual A has three categories of plants. The first category is comprised of plants that Individual A grows from seeds or cuttings. The second category is comprised of plants that Individual A purchases in containers and grows for a period of from several months to several years. Individual A replants some of these plants in the ground. The others are replanted in a series of larger containers as they grow. The third category is comprised of plants that are purchased by Individual A in containers. Individual A does not grow these plants to a larger size before making them available for resale. Instead, Individual A makes these plants available for resale, in the container in which purchased, shortly after receiving them. Thus, no value is added to these plants by Individual A through horticultural processes. Individual A also sells soil, mulch, chemicals, and yard tools. Individual A is producing property in the farming business with respect to the first two categories of plants because these plants are held for further cultivation and development prior to sale. The plants in the third category are not held for further cultivation and development prior to sale and, therefore, are not regarded as property produced in a farming business for purposes of section 263A. Accordingly, Individual A must account for the third category of plants, along with the soil, mulch, chemicals, and yard tools, as property acquired for resale. If Individual A's average annual gross receipts are less than $10 million,

Example 2. Individual B is in the business of growing and harvesting wheat and other grains. Individual B also processes grain that Individual B has harvested in order to produce breads, cereals, and other similar food products, which Individual B then sells to customers in the course of its business. Although Individual B is in the farming business with respect to the growing and harvesting of grain, Individual B is not in the farming business with respect to the processing of such grain to produce the food products.

Example 3. Individual C is in the business of raising poultry and other livestock. Individual C also operates a meat processing operation in which the poultry and other livestock are slaughtered, processed, and packaged or canned. The packaged or canned meat is sold to Individual C's customers. Although Individual C is in the farming business with respect to the raising of poultry and other livestock, Individual C is not in the farming business with respect to the slaughtering, processing, packaging, and canning of such animals to produce the food products.

(b) *Application of section 263A to property produced in a farming business*—(1) *In general*. Unless otherwise provided in this section, section 263A requires the capitalization of the direct costs and an allocable portion of the indirect costs that directly benefit or are incurred by reason of the production of any property in a farming business (including animals and plants without regard to the length of their preproductive period). Section 1.263A–1(e) describes the types of direct and indirect costs that generally must be capitalized by taxpayers under section 263A and paragraphs (b)(1)(i) and (ii) of this section provide specific examples of the types of costs typically incurred in the trade or business of farming. For purposes of this section, soil and water conservation expenditures that a taxpayer has elected to deduct under section 175 and fertilizer that a taxpayer has elected to deduct under section 180 are not subject to capitalization under section 263A, except to the extent these costs are required to be capitalized as a preproductive period cost of a plant or animal.

(i) *Plants*. The costs of producing a plant typically required to be capitalized under section 263A include the costs incurred so that the plant's growing process may begin (preparatory costs), such as the acquisition costs of the seed, seedling, or plant, and the costs of planting, cultivating, maintaining, or developing the plant during the preproductive period (preproductive period costs). Preproductive period costs include, but are not limited to, management, irrigation, pruning, soil and water conservation (including costs that the taxpayer has elected to deduct under section 175), fertilizing (including costs that the taxpayer has elected to deduct under section 180), frost protection, spraying, harvesting, storage and handling, upkeep, electricity, tax depreciation and repairs on buildings and equipment used in raising the plants, farm overhead, taxes (except state and Federal income taxes), and interest required to be capitalized under section 263A(f).

(ii) *Animals*. The costs of producing an animal typically required to be capitalized under section 263A include the costs incurred so that the animal's raising process may begin (preparatory costs), such as the acquisition costs of the animal, and the costs of raising or caring for such animal during the preproductive period (preproductive period costs). Preproductive period costs include, but are not limited to, management, feed (such as grain, silage, concentrates, supplements, haylage, hay, pasture and other forages), maintaining pasture or pen areas (including costs that the taxpayer has elected to deduct under sections 175 or 180), breeding, artificial insemination, veterinary services and medicine, livestock hauling, bedding, fuel, electricity, hired labor, tax depreciation and repairs on buildings and equipment used in raising the animals (for example, barns, trucks, and trailers), farm overhead, taxes (except state and Federal income taxes), and interest required to be capitalized under section 263A(f).

(2) *Preproductive period*—(i) *Plant*—(A) *In general.* The preproductive period of property produced in a farming business means—

(*1*) In the case of a plant that will have more than one crop or yield (for example, an orange tree), the period before the first marketable crop or yield from such plant;

(*2*) In the case of the crop or yield of a plant that will have more than one crop or yield (for example, the orange), the period before such crop or yield is disposed of; or

(*3*) In the case of any other plant, the period before such plant is disposed of.

(B) *Applicability of section 263A.* For purposes of determining whether a plant has a preproductive period in excess of 2 years, the preproductive period of plants grown in commercial quantities in the United States is based on the nationwide weighted average preproductive period for such plant. The Commissioner will publish a noninclusive list of plants with a nationwide weighted average preproductive period in excess of 2 years. In the case of other plants grown in commercial quantities in the United States, the nationwide weighted average preproductive period must be determined based on available statistical data. For all other plants, the taxpayer is required, at or before the time the seed or plant is acquired or planted, to reasonably estimate the preproductive period of the plant. If the taxpayer estimates a preproductive period in excess of 2 years, the taxpayer must capitalize the costs of producing the plant. If the estimate is reasonable, based on the facts in existence at the time it is made, the determination of whether section 263A applies is not modified at a later time even if the actual length of the preproductive period differs from the estimate. The actual length of the preproductive period will, however, be considered in evaluating the reasonableness of the taxpayer's future estimates. The nationwide weighted average preproductive period or the estimated preproductive period is only used for purposes of determining whether the preproductive period of a plant is greater than 2 years.

(C) *Actual preproductive period.* The plant's actual preproductive period is used for purposes of determining the period during which a taxpayer must capitalize preproductive period costs with respect to a particular plant.

(*1*) *Beginning of the preproductive period.* The actual preproductive period of a plant begins when the taxpayer first incurs costs that directly benefit or are incurred by reason of the plant. Generally, this occurs when the taxpayer plants the seed or plant. In the case of a taxpayer that acquires plants that have already been permanently planted, or plants that are tended by the taxpayer or another prior to permanent planting, the actual preproductive period of the plant begins upon acquisition of the plant by the taxpayer. In the case of the crop or yield of a plant that will have more than one crop or yield, the actual preproductive period begins when the plant has become productive in marketable quantities and the crop or yield first appears, for example, in the form of a sprout, bloom, blossom, or bud.

(*2*) *End of the preproductive period*—(i) *In general.* In the case of a plant that will have more than one crop or yield, the actual preproductive period ends when the plant first becomes productive in marketable quantities. In the case of any other plant (including the crop or yield of a plant that will have more than one crop or yield), the actual preproductive period ends when the plant, crop, or yield is sold or otherwise disposed of. Field costs, such as irrigating, fertilizing, spraying and pruning, that are incurred after the harvest of a crop or yield but before the crop or yield is sold or otherwise disposed of are not required to be included in the preproductive period costs of the harvested crop or yield because they do not benefit and are unrelated to the harvested crop or yield.

(ii) *Marketable quantities.* A plant that will have more than one crop or yield becomes productive in marketable quantities once a crop or yield is produced in sufficient quantities to be harvested and marketed in the ordinary course of the taxpayer's business. Factors that are relevant to determining whether a crop or yield is produced in sufficient quantities to be harvested and marketed in the ordinary course include: whether the crop or yield is harvested that is more than *de minimis,* although it may be less than expected at the maximum bearing stage, based on a comparison of the quantities per acre harvested in the year in question to the quantities per acre expected to be harvested when the plant reaches full maturity; and whether the sales proceeds exceed the costs of harvest and make a reasonable contribution to an allocable share of farm expenses.

(D) *Examples.* The following examples illustrate the provisions of this paragraph (b)(2):

Example 1. (i) Farmer A, a taxpayer that qualifies for the exception in paragraph (a)(2) of this section, grows plants that will have more than one crop or yield. The plants are grown in commercial quantities in the United States. Farmer A acquires 1 year-old plants by purchasing them from an unrelated party, Corporation B, and plants them immediately. The nationwide weighted average preproductive period of the plant is 4 years. The particular plants grown by Farmer A do not begin to produce in marketable quantities until 3 years and 6 months after they are planted by Farmer A.

(ii) Since the plants are deemed to have a preproductive period in excess of 2 years, Farmer A is required to capitalize the costs of producing the plants. See paragraphs (a)(2) and (b)(2)(i)(B) of this section. In accordance with paragraph (b)(2)(i)(C)(*1*) of this section, Farmer A must begin to capitalize the preproductive period costs when the plants are planted. In accordance with paragraph (b)(2)(i)(C)(*2*) of this section, Farmer A must continue to capitalize preproductive period costs to the plants until the plants begin to produce in marketable quantities. Thus, Farmer A must capitalize the preproductive period costs for a period of 3 years and 6 months (that is, until the plants are 4 years and 6 months old), notwithstanding the fact that the plants, in general, have a nationwide weighted average preproductive period of 4 years.

Example 2. (i) Farmer B, a taxpayer that qualifies for the exception in paragraph (a)(2) of this section, grows plants that will have more than one crop or yield. The plants are grown in commercial quantities in the United States. The nationwide weighted average preproductive period of the plant is 2 years and 5 months. Farmer B acquires 1 month-old plants by purchasing them from an unrelated party, Corporation B. Farmer B enters into a contract with Corporation B under which Corporation B will retain and tend the plants for 7 months following the sale. At the end of 7 months, Farmer B takes possession of the plants and plants them in the permanent orchard. The plants become productive in marketable quantities 1 year and 11 months after they are planted by Farmer B.

(ii) Since the plants are deemed to have a preproductive period in excess of 2 years, Farmer B is required to capitalize the costs of producing the plants. See paragraphs (a)(2) and (b)(2)(i)(B) of this section. In accordance with paragraph (b)(2)(i)(C)(*1*) of this section, Farmer B must begin to capitalize the preproductive period costs when the purchase occurs. In accordance with paragraph (b)(2)(i)(C)(*2*) of this section, Farmer B must continue to capitalize the preproductive period costs to the plants until the plants begin to produce in marketable quantities. Thus, Farmer B must capitalize the preproductive period costs of the plants for a period of 2 years and 6 months (the 7 months the plants are tended by Corporation B and the 1 year and 11 months after the plants are planted by Farmer B), that is, until the plants are 2 years and 7 months old, notwithstanding the fact that the plants, in general, have a nationwide weighted average preproductive period of 2 years and 5 months.

Example 3. (i) Assume the same facts as in *Example 2,* except that Farmer B acquires the plants by purchasing them from Corporation B when the plants are 8 months old and that the plants are planted by Farmer B upon acquisition.

(ii) Since the plants are deemed to have a preproductive period in excess of 2 years, Farmer B is required to capitalize the costs of producing the plants. See paragraphs (a)(2) and (b)(2)(i)(B) of this section. In accordance with paragraph (b)(2)(i)(C)(*1*) of this section, Farmer B must begin to capitalize the preproductive period costs when the plants are planted. In accordance with paragraph (b)(2)(i)(C)(*2*) of this section, Farmer B must continue to capitalize the preproductive period costs to the plants until the plants begin to produce in marketable quantities. Thus, Farmer B must capitalize the preproductive period costs of the plants for a period of 1 year and 11 months.

Example 4. (i) Farmer C, a taxpayer that qualifies for the exception in paragraph (a)(2) of this section, grows plants that will have more than one crop or yield. The plants are grown in commercial quantities in the United States. Farmer C acquires 1 month-old plants from an unrelated party and plants them immediately. The nationwide weighted average preproductive period of the plant is 2 years and 3 months. The particular plants grown by Farmer C begin to produce in marketable quantities 1 year and 10 months after they are planted by Farmer C.

(ii) Since the plants are deemed to have a nationwide weighted average preproductive period in excess of 2 years, Farmer C is required to capitalize the costs of producing the plants, notwithstanding the fact that the particular plants grown by Farmer C become productive in less than 2 years. See paragraph (b)(2)(i)(B) of this section. In accordance with paragraph (b)(2)(i)(C)(*1*) of this section, Farmer C must begin to capitalize the preproductive period costs when it plants the plants. In accordance with paragraph (b)(2)(i)(C)(*2*) of this section, Farmer C properly ceases capitalization of preproductive period costs when the plants become productive in marketable quantities (that is, 1 year and 10 months after they are planted, which is when they are 1 year and 11 months old).

Example 5. (i) Farmer D, a taxpayer that qualifies for the exception in paragraph (a)(2) of this section, grows plants that will have more than one crop or yield. The plants are not grown in commercial quantities in the United States. Farmer D acquires and plants the plants when they are 1 year old and estimates that they will become productive in marketable quantities 3 years after planting. Thus, at the time the plants are acquired and planted Farmer D reasonably estimates that the plants will have a preproductive period of 4 years. The actual plants grown by Farmer D do not begin to produce in marketable quantities until 3 years and 6 months after they are planted by Farmer D.

(ii) Since the plants have an estimated preproductive period in excess of 2 years, Farmer D is required to capitalize the costs of producing the plants. See paragraph (b)(2)(i)(B) of this section. In accordance with paragraph (b)(2)(i)(C)(*1*) of this section, Farmer D must begin to capitalize the preproductive period costs when it acquires and plants the plants. In accordance with paragraph (b)(2)(i)(C)(*2*) of this section, Farmer D must continue to capitalize the preproductive period costs until the plants begin to produce in marketable quantities. Thus, Farmer D must capitalize the preproductive period costs of the plants for a period of 3 years and 6 months (that is, until the plants are 4 years and 6 months old), notwithstanding the fact that Farmer D estimated that the plants would become productive after 4 years.

Example 6. (i) Farmer E, a taxpayer that qualifies for the exception in paragraph (a)(2) of this section grows plants from seed. The plants are not grown in commercial quantities in the United States. The plants do not have more than 1 crop or yield. At the time the seeds are planted Farmer E reasonably estimates that the plants will have a preproductive period of 1 year and 10 months. The actual plants grown by Farmer E are not ready for harvesting and disposal until 2 years and 2 months after the seeds are planted by Farmer E.

(ii) Because Farmer E's estimate of the preproductive period (which was 2 years or less) was reasonable at the time made based on the facts, Farmer E will not be required to capitalize the costs of producing the plants under section 263A, notwithstanding the fact that the actual preproductive period of the plants exceeded 2 years. See paragraph (b)(2)(i)(B) of this section. However, Farmer E must take the actual preproductive period of the plants into consideration when making future estimates of the preproductive period of such plants.

Example 7. (i) Farmer F, a calendar year taxpayer that does not qualify for the exception in paragraph (a)(2) of this section, grows trees that will have more than one crop. Farmer F acquires and plants the trees in April, Year 1. On October 1, Year 6, the trees become productive in marketable quantities.

(ii) The costs of producing the plant, including the preproductive period costs incurred by Farmer F on or before October 1, Year 6, are capitalized to the trees. Preproductive period costs incurred after October 1, Year 6, are capitalized to a crop when incurred during the preproductive period of the crop and deducted as a cost of maintaining the tree when incurred between the disposal of one crop and the appearance of the next crop. See paragraphs (b)(2)(i)(A), (b)(2)(i)(C)(*1*) and (b)(2)(i)(C)(*2*) of this section.

Example 8. (i) Farmer G, a taxpayer that qualifies for the exception in paragraph (a)(2) of this section, produces fig trees on 10 acres of land. The fig trees are grown in commercial quantities in the United States and have a nationwide weighted average preproductive period in excess of 2 years. Farmer G acquires and plants the fig trees in their permanent grove during Year 1. When the fig trees are mature, Farmer G expects to harvest 10x tons of figs per acre. At the end of Year 4, Farmer G harvests .5x tons of figs per acre that it sells for $100x. During Year 4, Farmer G incurs expenses related to the fig operation of: $50x to harvest the figs and transport them to market and other direct and indirect costs related to the fig operation in the amount of $1000x.

(ii) Since the fig trees have a preproductive period in excess of 2 years, Farmer G is required to capitalize the costs of producing the fig trees. See paragraphs (a)(2) and (b)(2)(i)(B) of this section. In accordance with paragraph (b)(2)(i)(C)(*2*) of this section, Farmer G must continue to capitalize preproductive period costs to the trees until they become productive in marketable quantities. The following factors weigh in favor of a determination that the fig trees did not become productive in Year 4: the quantity of harvested figs is *de minimis* based on the fact that the yield is only 5 percent of the expected yield at maturity and the proceeds from the sale of the figs are sufficient, after covering the costs of harvesting and transporting the figs, to cover only a negligible portion of the allocable farm expenses. Based on these facts and circumstances, the fig trees did not become productive in marketable quantities in Year 4.

(ii) *Animal.* An animal's actual preproductive period is used to determine the period that the taxpayer must capitalize preproductive period costs with respect to a particular animal.

(A) *Beginning of the preproductive period.* The preproductive period of an animal begins at the time of acquisition, breeding, or embryo implantation.

(B) *End of the preproductive period.* In the case of an animal that will be used in the trade or business of farming (for example, a dairy cow), the preproductive period generally ends when the animal is (or would be considered) placed in service for purposes of section 168 (without regard to the applicable convention). However, in the case of an animal that will have more than one yield (for example, a breeding cow), the preproductive period ends when the animal produces (for example, gives birth to) its first yield. In the case of any other animal, the preproductive period ends when the animal is sold or otherwise disposed of.

(C) *Allocation of costs between animal and yields.* In the case of an animal that will have more than one yield, the costs incurred after the beginning of the preproductive period of the first yield but before the end of the preproductive period of the animal must be allocated between the animal and the yield using any reasonable method. Any depreciation allowance on the animal may be allocated entirely to the yield. Costs incurred after the beginning of the preproductive period of the second yield, but before the first yield is weaned from the animal must be allocated between the first and second yield using any reasonable method. However, a taxpayer may elect to allocate these costs entirely to the second yield. An allocation method used by a taxpayer is a method of accounting that must be used consistently and is subject to the rules of section 446 and the regulations thereunder.

(c) *Inventory methods*—(1) *In general.* Except as otherwise provided, the costs required to be allocated to any plant or animal under this section may be determined using reasonable inventory valuation methods such as the farm-price method or the unit-livestock-price method. See § 1.471–6. Under the unit-livestock-price method, unit prices must include all costs required to be capitalized under section 263A. A taxpayer using the unit-livestock-price method may elect to use the cost allocation methods in § 1.263A–1(f) or 1.263A–2(b) to allocate its direct and indirect costs to the property produced in the business of farming. In such a situation, section 471 costs are the costs taken into account by the taxpayer under the unit-livestock-price method using the taxpayer's standard unit price as modified by this paragraph (c)(1). Tax shelters, as defined in paragraph (a)(2)(ii) of this section, that use the unit-livestock-price method for inventories must include in inventory the annual standard unit price for all animals that are acquired during the taxable year, regardless of whether the purchases are made during the last 6 months of the taxable year. Taxpayers required by section 447 to use an accrual method or prohibited by section 448(a)(3) from using the cash method that use the unit-livestock-price method must modify the annual standard price in order to reasonably reflect the particular period in the taxable year in which purchases of livestock are made, if such modification is necessary in order to avoid significant distortions in income that would otherwise occur through operation of the unit-livestock-price method.

(2) *Available for property used in a trade or business.* The farm-price method or the unit-livestock-price method may be used by any taxpayer to allocate costs to any plant or animal under this section, regardless of whether the plant or animal is held or treated as inventory property by the taxpayer. Thus, for example, a taxpayer may use the unit-livestock-price method to account for the costs of raising livestock that will be used in the trade or business of farming (for example, a breeding animal or a dairy cow) even though the property in question is not inventory property.

(3) *Exclusion of property to which section 263A does not apply.* Notwithstanding a taxpayer's use of the farm-price method with respect to farm property to which the provisions of section 263A apply, that taxpayer is not required, solely by such use, to use the farm-price method with respect to farm property to which the provisions of section 263A do not apply. Thus, for example, assume Farmer A raises fruit trees that have a preproductive period in excess of 2 years and to which the provisions of section 263A, therefore, apply. Assume also that Farmer A raises cattle and is not required to use an accrual method by section 447 or prohibited from using the cash method by section 448(a)(3). Because Farmer A qualifies for the exception in paragraph (a)(2) of this section, Farmer A is not required to capitalize the costs of raising the cattle. Although Farmer A may use the farm-price method with respect to the fruit trees, Farmer A is not required to use the farm-price method with respect to the cattle. Instead, Farmer A's accounting for the cattle is determined under other provisions of the Code and regulations.

(d) *Election not to have section 263A apply under section 263A(d)(3)*—(1) *Introduction.* This paragraph (d) permits certain taxpayers to make an election not to have the rules of this section apply to any plant produced in a farming business conducted by the electing taxpayer. Except as provided in paragraph (d)(5) and (6) of this section, the election is a method of accounting under section 446. An election made under section 263A(d)(3) and this paragraph (d) is revocable only with the consent of the Commissioner.

(2) *Availability of the election.* The election described in this paragraph (d) is available to any taxpayer that produces plants in a farming business, except that no election may be made by a corporation, partnership, or tax shelter required to use an accrual method under section 447 or prohibited from using the cash method by section 448(a)(3). Moreover, the election does not apply to the costs of planting, cultivation, maintenance, or development of a citrus or almond grove (or any part thereof) incurred prior to the close of the fourth taxable year beginning with the taxable year in which the trees were planted in the permanent grove (including costs incurred prior to the permanent planting). If a citrus or almond grove is planted in more than one taxable year, the portion of the grove planted in any one taxable year is treated as a separate grove for purposes of determining the year of planting.

(3) *Time and manner of making the election*—(i) *Automatic election.* A taxpayer makes the election under this paragraph (d) by not applying the rules of section 263A to determine the capitalized costs of plants produced in a farming business and by applying the special rules in paragraph (d)(4) of this section on its original return for the first taxable year in which the taxpayer is otherwise required to capitalize section 263A costs. Thus, in order to be treated as having made the election under this paragraph (d), it is necessary to report both income and expenses in accordance with the rules of this paragraph (d) (for example, it is necessary to use the alternative depreciation system as provided in paragraph (d)(4)(ii) of this section). For example, a farmer who deducts costs that are otherwise required to be capitalized under section 263A but fails to use the alternative depreciation system under section 168(g)(2) for applicable property placed in service has not made an election under this paragraph (d) and is not in compliance with the provisions of section 263A.

(ii) *Nonautomatic election*. Except as provided in paragraphs (d)(5) and (6) of this section, a taxpayer that does not make the election under this paragraph (d) as provided in paragraph (d)(3)(i) of this section must obtain the consent of the Commissioner to make the election by filing a Form 3115, *Application for Change in Method of Accounting*, in accordance with §1.446–1(e)(3).

(4) *Special rules*. If the election under this paragraph (d) is made, the taxpayer is subject to the special rules in this paragraph (d)(4).

(i) *Section 1245 treatment*. The plant produced by the taxpayer is treated as section 1245 property and any gain resulting from any disposition of the plant is recaptured (that is, treated as ordinary income) to the extent of the total amount of the deductions that, but for the election, would have been required to be capitalized with respect to the plant. In calculating the amount of gain that is recaptured under this paragraph (d)(4)(i), a taxpayer may use the farm-price method or another simplified method permitted under these regulations in determining the deductions that otherwise would have been capitalized with respect to the plant.

(ii) *Required use of alternative depreciation system*. If the taxpayer or a related person makes an election under this paragraph (d), the alternative depreciation system (as defined in section 168(g)(2)) must be applied to all property used predominantly in any farming business of the taxpayer or related person and placed in service in any taxable year during which the election is in effect. The requirement to use the alternative depreciation system by reason of an election under this paragraph (d) will not prevent a taxpayer from making an election under section 179 to deduct certain depreciable business assets.

(iii) *Related person*—(A) *In general*. For purposes of this paragraph (d)(4), related person means—

(*1*) The taxpayer and members of the taxpayer's family;

(*2*) Any corporation (including an S corporation) if 50 percent or more of the stock (in value) is owned directly or indirectly (through the application of section 318) by the taxpayer or members of the taxpayer's family;

(*3*) A corporation and any other corporation that is a member of the same controlled group (within the meaning of section 1563(a)(1)); and

(*4*) Any partnership if 50 percent or more (in value) of the interests in such partnership is owned directly or indirectly by the taxpayer or members of the taxpayer's family.

(B) *Members of family*. For purposes of this paragraph (d)(4)(iii), the terms "members of the taxpayer's family", and "members of family" (for purposes of applying section 318(a)(1)), means the spouse of the taxpayer (other than a spouse who is legally separated from the individual under a decree of divorce or separate maintenance) and any of the taxpayer's children (including legally adopted children) who have not reached the age of 18 as of the last day of the taxable year in question.

(5) *Revocation of section 263A(d)(3) election to permit exemption under section 263A(i)*. A taxpayer that elected under section 263A(d)(3) and paragraph (d)(3) of this section not to have section 263A apply to any plant produced in a farming business that wants to revoke its section 263A(d)(3) election, and in the same taxable year, apply the small business taxpayer exemption under section 263A(i) and §1.263A–1(j) may revoke the election in accordance with the applicable administrative guidance as published in the Internal Revenue Bulletin (*see* §601.601(d)(2)(ii)(b) of this chapter). A revocation of the taxpayer's section 263A(d)(3) election under this paragraph (d)(5) is not a change in method of accounting under sections 446 and 481 and §§1.446–1 and 1.481–1 through 1.481–5.

(6) *Change from applying exemption under section 263A(i) to making a section 263A(d)(3) election*. A taxpayer whose method of accounting is to not capitalize costs under section 263A based on the exemption under section 263A(i), that becomes ineligible to use the exemption under section 263A(i), and is eligible and wants to elect under section 263A(d)(3) for this same taxable year to not capitalize costs under section 263A for any plant produced in the taxpayer's farming business, must make the election in accordance with the applicable administrative guidance as published in the Internal Revenue

Bulletin (*see* § 601.601(d)(2)(ii)(b) of this chapter). An election under section 263A(d)(3) made in accordance with this paragraph (d)(6) is not a change in method of accounting under sections 446 and 481 and §§ 1.446–1 and 1.481–1 through 1.481–5.

(7) *Examples*. The following examples illustrate the provisions of this paragraph (d):

Example 1. (i) Farmer A, an individual, is engaged in the trade or business of farming. Farmer A grows apple trees that have a preproductive period greater than 2 years. In addition, Farmer A grows and harvests wheat and other grains. Farmer A elects under this paragraph (d) not to have the rules of section 263A apply to the costs of growing the apple trees.

(ii) In accordance with paragraph (d)(4) of this section, Farmer A is required to use the alternative depreciation system described in section 168(g)(2) with respect to all property used predominantly in any farming business in which Farmer A engages (including the growing and harvesting of wheat) if such property is placed in service during a year for which the election is in effect. Thus, for example, all assets and equipment (including trees and any equipment used to grow and harvest wheat) placed in service during a year for which the election is in effect must be depreciated as provided in section 168(g)(2).

Example 2. Assume the same facts as in *Example 1*, except that Farmer A and members of Farmer A's family (as defined in paragraph (d)(4)(iii)(B) of this section) also own 51 percent (in value) of the interests in Partnership P, which is engaged in the trade or business of growing and harvesting corn. Partnership P is a related person to Farmer A under the provisions of paragraph (d)(4)(iii) of this section. Thus, the requirements to use the alternative depreciation system under section 168(g)(2) also apply to any property used predominantly in a trade or business of farming which Partnership P places in service during a year for which an election made by Farmer A is in effect.

(e) *Exception for certain costs resulting from casualty losses*—(1) *In general*. Section 263A does not require the capitalization of costs that are attributable to the replanting, cultivating, maintaining, and developing of any plants bearing an edible crop for human consumption (including, but not limited to, plants that constitute a grove, orchard, or vineyard) that were lost or damaged while owned by the taxpayer by reason of freezing temperatures, disease, drought, pests, or other casualty (replanting costs). Such replanting costs may be incurred with respect to property other than the property on which the damage or loss occurred to the extent the acreage of the property with respect to which the replanting costs are incurred is not in excess of the acreage of the property on which the damage or loss occurred. This paragraph (e) applies only to the replanting of plants of the same type as those lost or damaged. This paragraph (e) applies to plants replanted on the property on which the damage or loss occurred or property of the same or lesser acreage in the United States irrespective of differences in density between the lost or damaged and replanted plants. Plants bearing crops for human consumption are those crops normally eaten or drunk by humans. Thus, for example, costs incurred with respect to replanting plants bearing jojoba beans do not qualify for the exception provided in this paragraph (e) because that crop is not normally eaten or drunk by humans.

(2) *Ownership*. Replanting costs described in paragraph (e)(1) of this section generally must be incurred by the taxpayer that owned the property at the time the plants were lost or damaged. Paragraph (e)(1) of this section will apply, however, to costs incurred by a person other than the taxpayer that owned the plants at the time of damage or loss if—

(i) The taxpayer that owned the plants at the time the damage or loss occurred owns an equity interest of more than 50 percent in such plants at all times during the taxable year in which the replanting costs are paid or incurred; and

(ii) Such other person owns any portion of the remaining equity interest and materially participates in the replanting, cultivating, maintaining, or developing of such plants during the taxable year in which the replanting costs are paid or incurred. A person will be treated as materially participating for purposes of this provision if such person would otherwise meet the requirements with respect to material participation within the meaning of section 2032A(e)(6).

(3) *Examples.* The following examples illustrate the provisions of this paragraph (e):

Example 1. (i) Farmer A grows cherry trees that have a preproductive period in excess of 2 years and produce an annual crop. These cherries are normally eaten by humans. Farmer A grows the trees on a 100 acre parcel of land (parcel 1) and the groves of trees cover the entire acreage of parcel 1. Farmer A also owns a 150 acre parcel of land (parcel 2) that Farmer A holds for future use. Both parcels are in the United States. In 2000, the trees and the irrigation and drainage systems that service the trees are destroyed in a casualty (within the meaning of paragraph (e)(1) of this section). Farmer A installs new irrigation and drainage systems on parcel 1, purchases young trees (seedlings), and plants the seedlings on parcel 1.

(ii) The costs of the irrigation and drainage systems and the seedlings must be capitalized. In accordance with paragraph (e)(1) of this section, the costs of planting, cultivating, developing, and maintaining the seedlings during their preproductive period are not required to be capitalized by section 263A.

Example 2. (i) Assume the same facts as in *Example 1* except that Farmer A decides to replant the seedlings on parcel 2 rather than on parcel 1. Accordingly, Farmer A installs the new irrigation and drainage systems on 100 acres of parcel 2 and plants seedlings on those 100 acres.

(ii) The costs of the irrigation and drainage systems and the seedlings must be capitalized. Because the acreage of the related portion of parcel 2 does not exceed the acreage of the destroyed orchard on parcel 1, the costs of planting, cultivating, developing, and maintaining the seedlings during their preproductive period are not required to be capitalized by section 263A. See paragraph (e)(1) of this section.

Example 3. (i) Assume the same facts as in *Example 1* except that Farmer A replants the seedlings on parcel 2 rather than on parcel 1, and Farmer A additionally decides to expand its operations by growing 125 rather than 100 acres of trees. Accordingly, Farmer A installs new irrigation and drainage systems on 125 acres of parcel 2 and plants seedlings on those 125 acres.

(ii) The costs of the irrigation and drainage systems and the seedlings must be capitalized. The costs of planting, cultivating, developing, and maintaining 100 acres of the trees during their preproductive period are not required to be capitalized by section 263A. The costs of planting, cultivating, maintaining, and developing the additional 25 acres are, however, subject to capitalization under section 263A. See paragraph (e)(1) of this section.

(4) *Special rule for citrus and almond groves*—(i) *In general.* The exception in this paragraph (e) is available with respect to replanting costs of a citrus or almond grove incurred prior to the close of the fourth taxable year after replanting, notwithstanding the taxpayer's election to have section 263A not apply (described in paragraph (d) of this section).

(ii) *Example.* The following example illustrates the provisions of this paragraph (e)(4):

Example. (i) Farmer A, an individual, is engaged in the trade or business of farming. Farmer A grows citrus trees that have a preproductive period of 5 years. Farmer A elects, under paragraph (d) of this section, not to have section 263A apply. This election, however, is unavailable with respect to the costs of producing a citrus grove incurred within the first 4 years beginning with the year the trees were planted. See paragraph (d)(2) of this section. In year 10, after the citrus grove has become productive in marketable quantities, the citrus grove is destroyed by a casualty within the meaning of paragraph (e)(1) of this section. In year 10, Farmer A acquires and plants young citrus trees in the same grove to replace those destroyed by the casualty.

(ii) Farmer A must capitalize the costs of producing the citrus grove incurred before the close of the fourth taxable year beginning with the year in which the trees were permanently planted. As a result of the election not to have section 263A apply, Farmer A may deduct the preproductive period costs incurred in the fifth year. In year 10, Farmer A must capitalize the acquisition cost of the young trees. However, the costs of planting, cultivating, developing, and maintaining the young trees that replace those destroyed by the casualty are exempted from capitalization under this paragraph (e).

(5) *Special temporary rule for citrus plants lost by reason of casualty.* Section 263A(d)(2)(A) provides that if plants bearing an edible crop for human consumption were lost or damaged while in the hands of the taxpayer by reason of freezing temperatures, disease, drought, pests, or casualty, section 263A does not apply to any costs of the taxpayer of replanting plants bearing the same type of crop (whether on the same parcel of land on which such lost or damaged plants were located or any other parcel of land of the same acreage in the United States). The rules of this paragraph (e)(5) apply to certain costs that are paid or incurred after

December 22, 2017, and on or before December 22, 2027, to replant citrus plants after the loss or damage of citrus plants. Notwithstanding paragraph (e)(2) of this section, in the case of replanting citrus plants after the loss or damage of citrus plants by reason of freezing temperatures, disease, drought, pests, or casualty, section 263A does not apply to replanting costs paid or incurred by a taxpayer other than the owner described in section 263A(d)(2)(A) if—

(i) The owner described in section 263A(d)(2)(A) has an equity interest of not less than 50 percent in the replanted citrus plants at all times during the taxable year in which such amounts were paid or incurred and the taxpayer holds any part of the remaining equity interest; or

(ii) The taxpayer acquired the entirety of the equity interest in the land of that owner described in section 263A(d)(2)(A) and on which land the lost or damaged citrus plants were located at the time of such loss or damage, and the replanting is on such land.

(f) *Change in method of accounting.* Except as provided in paragraphs (d)(5) and (6) of this section, any change in a taxpayer's method of accounting necessary to comply with this section is a change in method of accounting to which the provisions of sections 446 and 481 and §1.446–1 through 1.446–7 and §1.481–1 through §1.481–3 apply.

(g) *Applicability dates*—(1) *In general.* In the case of property that is not inventory in the hands of the taxpayer, this section is applicable to costs incurred after August 21, 2000 in taxable years ending after August 21, 2000. In the case of inventory property, this section is applicable to taxable years beginning after August 21, 2000.

(2) *Changes made by Tax Cuts and Jobs Act (Pub. L. 115–97).* Paragraphs (a)(3), (d)(5), (d)(6), and (e)(5) of this section apply for taxable years beginning on or after January 5, 2021. However, for a taxable year beginning after December 31, 2017, and before January 5, 2021, a taxpayer may apply the paragraphs described in the first sentence of this paragraph (g)(2), provided that the taxpayer follows all the applicable rules contained in the regulations under section 263A for such taxable year and all subsequent taxable years.

[T.D. 8897, 65 FR 50644, Aug. 21, 2000; 65 FR 61092, Oct. 16, 2000; T.D. 9942, 86 FR 267, Jan. 5, 2021; 86 FR 32186, June 17, 2021]

§ 1.263A–5 Exception for qualified creative expenses incurred by certain free-lance authors, photographers, and artists. [Reserved]

§ 1.263A–6 Rules for foreign persons. [Reserved]

§ 1.263A–7 Changing a method of accounting under section 263A.

(a) *Introduction*—(1) *Purpose.* These regulations provide guidance to taxpayers changing their methods of accounting for costs subject to section 263A. The principal purpose of these regulations is to provide guidance regarding how taxpayers are to revalue property on hand at the beginning of the taxable year in which they change their method of accounting for costs subject to section 263A. Paragraph (c) of this section provides guidance regarding how items or costs included in beginning inventory in the year of change must be revalued. Paragraph (d) of this section provides guidance regarding how non-inventory property should be revalued in the year of change.

(2) *Taxpayers that adopt a method of accounting under section 263A.* Taxpayers may adopt a method of accounting for costs subject to section 263A in the first taxable year in which they engage in resale or production activities. For purposes of this section, the adoption of a method of accounting has the same meaning as provided in §1.446–1(e)(1). Taxpayers are not subject to the provisions of these regulations to the extent they adopt, as opposed to change, a method of accounting.

(3) *Taxpayers that change a method of accounting under section 263A.* Taxpayers changing their method of accounting for costs subject to section 263A are subject to the revaluation and other provisions of this section. Taxpayers subject to these regulations include, but are not limited to—

(i) For taxable years beginning after December 31, 2017, resellers of real or personal property or producers of real or tangible personal property whose average annual gross receipts for the immediately preceding 3-taxable-year period, or lesser period if the taxpayer was not in existence for the three preceding taxable years, annualized as required, exceed the gross receipts test of section 448(c) and the accompanying regulations where the taxpayer was not subject to section 263A in the prior taxable year;

(ii) Resellers of real or personal property that are using a method that fails to comply with section 263A and desire to change to a method of accounting that complies with section 263A;

(iii) Producers of real or tangible personal property that are using a method that fails to comply with section 263A and desire to change to a method of accounting that complies with section 263A; and

(iv) Resellers and producers that desire to change from one permissible method of accounting for costs subject to section 263A to another permissible method.

(4) *Applicability dates*—(i) *In general.*The provisions of this section are effective for taxable years beginning on or after August 5, 1997. For taxable years beginning before August 5, 1997, the rules of §1.263A–7T contained in the 26 CFR part 1 edition revised as of April 1, 1997, as modified by other administrative guidance, will apply.

(ii) *Changes made by Tax Cuts and Jobs Act (Pub. L. 115–97).* Paragraph (a)(3)(i) of this section applies to taxable years beginning on or after January 5, 2021. However, for a taxable year beginning after December 31, 2017, and before January 5, 2021, a taxpayer may apply the paragraph described in the first sentence of this paragraph (a)(4)(ii), provided that the taxpayer follows all the applicable rules contained in the regulations under section 263A for such taxable year and all subsequent taxable years.

(5) *Definition of change in method of accounting.* For purposes of this section, a change in method of accounting has the same meaning as provided in §1.446–1(e)(2)(ii). Changes in method of accounting for costs subject to section 263A include changes to methods required or permitted by section 263A and the regulations thereunder. Changes in method of accounting may be described in the preceding sentence irrespective of whether the taxpayer's previous method of accounting resulted in the capitalization of more (or fewer) costs than the costs required to be capitalized under section 263A and the regulations thereunder, and irrespective of whether the taxpayer's previous method of accounting was a permissible method under the law in effect when the method was being used. However, changes in method of accounting for costs subject to section 263A do not include changes relating to factors other than those described therein. For example, a change in method of accounting for costs subject to section 263A does not include a change from one inventory identification method to another inventory identification method, such as a change from the last-in, first-out (LIFO) method to the first-in, first-out (FIFO) method, or vice versa, or a change from one inventory valuation method to another inventory valuation method under section 471, such as a change from valuing inventory at cost to valuing the inventory at cost or market, whichever is lower, or vice versa. In addition, a change in method of accounting for costs subject to section 263A does not include a change within the LIFO inventory method, such as a change from the double extension method to the link-chain method, or a change in the method used for determining the number of pools. Further, a change from the modified resale method set forth in Notice 89–67 (1989–1 C.B. 723), see §601.601(d)(2) of this chapter, to the simplified resale method set forth in §1.263A–3(d) is not a change in method of accounting within the meaning of §1.446–1(e)(2)(ii) and is therefore not subject to the provisions of this section. However, a change from the simplified resale method set forth in former §1.263A–1T(d)(4) to the simplified resale method set forth in §1.263A–3(d) is a change in method of accounting within the meaning of §1.446–1(e)(2)(ii) and is subject to the provisions of this section.

(b) *Rules applicable to a change in method of accounting*—(1) *General rules.* All changes in method of accounting for costs subject to section 263A are subject to the rules and procedures provided by the Code, regulations, and administrative procedures applicable to such changes. The Internal Revenue Service has issued specific revenue procedures that govern certain accounting method changes for costs subject to section 263A. Where a specific revenue procedure is not applicable, changes in method of accounting for costs subject to section 263A are subject to the same rules and procedures that govern other accounting method changes. See Revenue Procedure 2015–13 (2015–5 IRB 419) and §601.601(d)(2) of this chapter.

(2) *Special rules*—(i) *Ordering rules when multiple changes in method of accounting occur in the year of change*—(A) *In general.* A change in method of accounting for costs subject to section 263A is generally deemed to occur (including the computation of the adjustment under section 481(a)) before any other change in method of accounting is deemed to occur for that same taxable year.

(B) *Exceptions to the general ordering rule*—(*1*) *Change from the LIFO inventory method.* In the case of a taxpayer that is discontinuing its use of the LIFO inventory method in the same taxable year it is changing its method of accounting for costs subject to section 263A, the change from the LIFO method may be made before the change in method of accounting (and the computation of the corresponding adjustment under section 481 (a)) under section 263A is made.

(*2*) *Change from the specific goods LIFO inventory method.* In the case of a taxpayer that is changing from the specific goods LIFO inventory method to the dollar-value LIFO inventory method in the same taxable year it is changing its method of accounting for costs subject to section 263A, the change from the specific goods LIFO inventory method may be made before the change in method of accounting under section 263A is made.

(*3*) *Change in overall method of accounting.* In the case of a taxpayer that is changing its overall method of accounting from the cash receipts and disbursements method to an accrual method in the same taxable year it is changing its method of accounting for costs subject to section 263A, the taxpayer must change to an accrual method for capitalizable costs (see §1.263A–1(c)(2)(ii)) before the change in method of accounting (and the computation of the corresponding adjustment under section 481(a)) under section 263A is made.

(*4*) *Change in method of accounting for depreciation.* In the case of a taxpayer that is changing its method of accounting for depreciation in the same taxable year it is changing its method of accounting for costs subject to section 263A and any portion of the depreciation is subject to section 263A, the change in method of accounting for depreciation must be made before the change in method of accounting (and the computation of the corresponding adjustment under section 481(a)) under section 263A is made.

(ii) *Adjustment required by section 481(a).* In the case of any taxpayer required or permitted to change its method of accounting for any taxable year under section 263A and the regulations thereunder, the change will be treated as initiated by the taxpayer for purposes of the adjustment required by section 481(a). The taxpayer must take the net section 481(a) adjustment into account over the section 481(a) adjustment period as determined under the applicable administrative procedures issued under §1.446–1(e)(3)(ii) for obtaining the Commissioner's consent to a change in accounting method (for example, see Revenue Procedure 2015–13, 2015–5 IRB 419 (or successor) (also see §601.601(d)(2) of this chapter)). This paragraph applies to taxable years ending on or after June 16, 2004.

(iii) *Base year*—(A) *Need for a new base year.* Certain dollar-value LIFO taxpayers (whether using double extension or link-chain) must establish a new base year when they revalue their inventories under section 263A.

(*1*) *Facts and circumstances revaluation method used.* A dollar-value LIFO taxpayer that uses the facts and circumstances revaluation method is permitted, but not required, to establish a new base year.

(*2*) *3-year average method used*—(*i*) *Simplified method not used.* A dollar-value LIFO taxpayer using the 3-year average method but not the simplified production method or the simplified resale method to revalue its inventory is required to establish a new base year.

(*ii*) *Simplified method used*. A dollar-value LIFO taxpayer using the 3-year average method and the simplified production method, the modified simplified production method, or the simplified resale method to revalue its inventory is permitted, but not required, to establish a new base year.

(B) *Computing a new base year*. For purposes of determining future indexes, the year of change becomes the new base year (that is, the index at the beginning of the year of change generally must be 1.00) and all costs are restated in new base year costs for purposes of extending such costs in future years. However, when a new base year is established, costs associated with old layers retain their separate identity within the base year, with such layers being restated in terms of the new base year index. For example, for purposes of determining whether a particular layer has been invaded, each layer must retain its separate identity. Thus, if a decrement in an inventory pool occurs, layers accumulated in more recent years must be viewed as invaded first, in order of priority.

(c) *Inventory*—(1) *Need for adjustments*. When a taxpayer changes its method of accounting for costs subject to section 263A, the taxpayer generally must, in computing its taxable income for the year of change, take into account the adjustments required by section 481(a). The adjustments required by section 481(a) relate to revaluations of inventory property, whether the taxpayer produces the inventory or acquires it for resale. See paragraph (d) of this section in regard to the adjustments required by section 481(a) that relate to non-inventory property.

(2) *Revaluing beginning inventory*—(i) *In general*. If a taxpayer changes its method of accounting for costs subject to section 263A, the taxpayer must revalue the items or costs included in its beginning inventory in the year of change as if the new method (that is, the method to which the taxpayer is changing) had been in effect during all prior years. In revaluing inventory costs under this procedure, all of the capitalization provisions of section 263A and the regulations thereunder apply to all inventory costs accumulated in prior years. The necessity to revalue beginning inventory as if these capitalization rules had been in effect for all prior years includes, for example, the revaluation of costs or layers incurred in taxable years preceding the transition period to the full absorption method of inventory costing as described in §1.471–11(e), regardless of whether a taxpayer employed a cut-off method under those regulations. The difference between the inventory as originally valued using the former method (that is, the method from which the taxpayer is changing) and the inventory as revalued using the new method is equal to the amount of the adjustment required under section 481(a).

(ii) *Methods to revalue inventory*. There are three methods available to revalue inventory. The first method, the facts and circumstances revaluation method, may be used by all taxpayers. Under this method, a taxpayer determines the direct and indirect costs that must be assigned to each item of inventory based on all the facts and circumstances. This method is described in paragraph (c)(2)(iii) of this section. The second method, the weighted average method, is available only in certain situations to taxpayers using the FIFO inventory method or the specific goods LIFO inventory method. This method is described in paragraph (c)(2)(iv) of this section. The third method, the 3-year average method, is available to all taxpayers using the dollar-value LIFO inventory method of accounting. This method is described in paragraph (c)(2)(v) of this section. The weighted average method and the 3-year average method revalue inventory through processes of estimation and extrapolation, rather than based on the facts and circumstances of a particular year's data. All three methods are available regardless of whether the taxpayer elects to use a simplified method to capitalize costs under section 263A.

(iii) *Facts and circumstances revaluation method*—(A) *In general*. Under the facts and circumstances revaluation method, a taxpayer generally is required to revalue inventories by applying the capitalization rules of section

263A and the regulations thereunder to the production and resale activities of the taxpayer, with the same degree of specificity as required of inventory manufacturers under the law immediately prior to the effective date of the Tax Reform Act of 1986 (Pub. L. 99–514, 100 Stat. 2085, 1986–3 C.B. (Vol. 1)). Thus, for example, with respect to any prior year that is relevant in determining the total amount of the revalued balance as of the beginning of the year of change, the taxpayer must analyze the production and resale data for that particular year and apply the rules and principles of section 263A and the regulations thereunder to determine the appropriate revalued inventory costs. However, under the facts and circumstances revaluation method, a taxpayer may utilize reasonable estimates and procedures in valuing inventory costs if—

(*1*) The taxpayer lacks, and is not able to reconstruct from its books and records, actual financial and accounting data which is required to apply the capitalization rules of section 263A and the regulations thereunder to the relevant facts and circumstances surrounding a particular item of inventory or cost; and

(*2*) The total amounts of costs for which reasonable estimates and procedures are employed are not significant in comparison to the total restated value (including costs previously capitalized under the taxpayer's former method) of the items or costs for the period in question.

(B) *Exception.* A taxpayer that is not able to comply with the requirement of paragraph (c)(2)(iii)(A)(2) of this section because of the existence of a significant amount of costs that would require the use of estimates and procedures must revalue its inventories under the procedures provided in paragraph (c)(2) (iv) or (v) of this section.

(C) *Estimates and procedures allowed.* The estimates and procedures of this paragraph (c)(2)(iii) include—

(*1*) The use of available information from more recent years to estimate the amount and nature of inventory costs applicable to earlier years; and

(*2*) The use of available information with respect to comparable items of inventory produced or acquired during the same year in order to estimate the costs associated with other items of inventory.

(D) *Use by dollar-value LIFO taxpayers.* Generally, a dollar-value LIFO taxpayer must recompute its LIFO inventory for each taxable year that the LIFO inventory method was used.

(E) *Examples.* The provisions of this paragraph (c)(2)(iii) are illustrated by the following three examples. The principles set forth in these examples are applicable both to production and resale activities and the year of change in all three examples is 1997. The examples read as follows:

Example 1. Taxpayer X lacks information for the years 1993 and earlier, regarding the amount of costs incurred in transporting finished goods from X's factory to X's warehouse and in storing those goods at the warehouse until their sale to customers. X determines that, for 1994 and subsequent years, these transportation and storage costs constitute 4 percent of the total costs of comparable goods under X's method of accounting for such years. Under this paragraph (c)(2)(iii), X may assume that transportation and storage costs for the years 1993 and earlier constitute 4 percent of the total costs of such goods.

Example 2. Assume the same facts as in *Example 1*, except that for the year 1993 and earlier, X used a different method of accounting for inventory costs whereunder significantly fewer costs were capitalized than amounts capitalized in later years. Thus, the application of transportation and storage based on a percentage of costs for 1994 and later years would not constitute a reasonable estimate for use in earlier years. X may use the information from 1994 and later years, if appropriate adjustments are made to reflect the differences in inventory costs for the applicable years, including, for example—

(i) Increasing the percentage of costs that are intended to represent transportation and storage costs to reflect the aggregate differences in capitalized amounts under the two methods of accounting; or

(ii) Taking the absolute dollar amount of transportation and storage costs for comparable goods in inventory and applying that amount (adjusted for changes in general price levels, where appropriate) to goods associated with 1993 and prior periods.

Example 3. Taxpayer Z lacks information for certain years with respect to factory administrative costs, subject to capitalization under section 263A and the regulations thereunder, incurred in the production of inventory in factory A. Z does have sufficient information to determine factory administrative costs with respect to production of inventory in factory B, wherein inventory items were produced during the same years as factory A. Z may use the information from factory B to determine the appropriate amount of factory administrative costs to capitalize as inventory costs for comparable items produced in factory A during the same years.

(iv) *Weighted average method*—(A) *In general*. A taxpayer using the FIFO method or the specific goods LIFO method of accounting for inventories may use the weighted average method as provided in this paragraph (c)(2)(iv) to estimate the change in the amount of costs that must be allocated to inventories for prior years. The weighted average method under this paragraph (c)(2)(iv) is only available to a taxpayer that lacks sufficient data to revalue its inventory costs under the facts and circumstances revaluation method provided for in paragraph (c)(2)(iii) of this section. Moreover, a taxpayer that qualifies for the use of the weighted average method under this paragraph (c)(2)(iv) must utilize such method only with respect to items or costs for which it lacks sufficient information to revalue under the facts and circumstances revaluation method. Particular items or costs must be revalued under the facts and circumstances revaluation method if sufficient information exists to make such a revaluation. If a taxpayer lacks sufficient information to otherwise apply the weighted average method under this paragraph (c)(2)(iv) (for example, the taxpayer is unable to revalue the costs of any of its items in inventory due to a lack of information), then the taxpayer must use reasonable estimates and procedures, as described in the facts and circumstances revaluation method, to whatever extent is necessary to allow the taxpayer to apply the weighted average method.

(B) *Weighted average method for FIFO taxpayers*—(*1*) *In general*. This paragraph (c)(2)(iv)(B) sets forth the mechanics of the weighted average method as applicable to FIFO taxpayers. Under the weighted average method, an item in ending inventory for which sufficient data is not available for revaluation under section 263A and the regulations thereunder must be revalued by using the weighted average percentage increase or decrease with respect to such item for the earliest subsequent taxable year for which sufficient data is available. With respect to an item for which no subsequent data exists, such item must be revalued by using the weighted average percentage increase or decrease with respect to all reasonably comparable items in the taxpayer's inventory for the same year or the earliest subsequent taxable year for which sufficient data is available.

(*2*) *Example*. The provisions of this paragraph (c)(2)(iv)(B) are illustrated by the following example. The principles set forth in this example are applicable both to production and resale activities and the year of change in the example is 1997. The example reads as follows:

Example. Taxpayer A manufactures bolts and uses the FIFO method to identify inventories. Under A's former method, A did not capitalize all of the costs required to be capitalized under section 263A. A maintains inventories of bolts, two types of which it no longer produces. Bolt A was last produced in 1994. The revaluation of the costs of Bolt A under this section for bolts produced in 1994 results in a 20 percent increase of the costs of Bolt A. A portion of the inventory of Bolt A, however, is attributable to 1993. A does not have sufficient data for revaluation of the 1993 cost for Bolt A. With respect to Bolt A, A may apply the 20 percent increase determined for 1994 to the 1993 production as an acceptable estimate. Bolt B was last produced in 1992 and no data exists that would allow revaluation of the inventory cost of Bolt B. The inventories of all other bolts for which information is available are attributable to 1994 and 1995. Revaluation of the costs of these other bolts using available data results in an average increase in inventory costs of 15 percent for 1994 production. With respect to Bolt B, the overall 15 percent increase for A's inventory for 1994 may be used in revaluing the cost of Bolt B.

(C) *Weighted average method for specific goods LIFO taxpayers*—(*1*) *In general*. This paragraph (c)(2)(iv)(C) sets forth the mechanics of the weighted average method as applicable to LIFO taxpayers using the specific goods method of valuing inventories. Under the weighted average method, the inventory layers with respect to an item for which data is available are revalued under this section and the increase or decrease in amount for each layer is expressed as a percentage of change from the cost in the layer as originally valued. A weighted average of the percentage of change for all layers for each type of good is computed and applied to all earlier layers for each type of good that lack sufficient data to allow for revaluation. In the case of earlier layers for which sufficient data exists, such layers are to be revalued using actual data. In cases where sufficient data is not available to make a weighted average estimate with respect to a particular item of inventory, a weighted average increase or decrease is to be determined using all other inventory items revalued by the taxpayer in the same specific goods grouping. This percentage increase or decrease is then used to revalue the cost of the item for which data is lacking. If the taxpayer lacks sufficient data to revalue any of the inventory items contained in a specific goods grouping, then the weighted average increase or decrease of substantially similar items (as determined by principles similar to the rules applicable to dollar-value LIFO taxpayers in §1.472–8(b)(3)) must be applied in the revaluation of the items in such grouping. If insufficient data exists with respect to all the items in a specific goods grouping and to all items that are substantially similar (or such items do not exist), then the weighted average for all revalued items in the taxpayer's inventory must be applied in revaluing items for which data is lacking.

(*2*) *Example*. The provisions of this paragraph (c)(2)(iv)(C) are illustrated by the following example. The principles set forth in this example are applicable both to production and resale activities and the year of change in the example is 1997. The example reads as follows:

Example. (i) Taxpayer M is a manufacturer that produces two different parts. Under M's former method, M did not capitalize all of the costs required to be capitalized under section 263A. Work-in-process inventory is recorded in terms of equivalent units of finished goods. M's records show the following at the end of 1996 under the specific goods LIFO inventory method:

LIFO Product and layer	Number	Cost	Carrying values
Product #1:			
1993	150	$5.00	$750
1994	100	6.00	600
1995	100	6.50	650
1996	50	7.00	350
			$2,350
Product #2:			
1993	200	$4.00	$800
1994	200	4.50	900
1995	100	5.00	500
1996	100	6.00	600
			2,800
Total carrying value of Products #1 and #2 under M's former method			5,150

(ii) M has sufficient data to revalue the unit costs of Product #1 using its new method for 1994, 1995 and 1996. These costs are: $7.00 in 1994, $7.75 in 1995, and $9.00 in 1996. This data for Product #1 results in a weighted average percentage change of 20.31 percent ((100 × ($7.00 − $6.00)) + (100 × ($7.75 − $6.50)) + (50 × ($9.00 − $7.00)) divided by (100 × $6.00) + (100 × $6.50) + (50 × $7.00)]. M has sufficient data to revalue the unit costs of Product #2 only in 1995 and 1996. These costs are: $6.00 in 1995 and $7.00 in 1996. This data for Product #2 results in a weighted average percentage change of 18.18 percent [(100 × ($6.00 − $5.00)) + (100 × ($7.00 − $6.00)) divided by (100 × $5.00) + (100 × $6.00)].

(iii) M can estimate its revalued costs for Product #1 for 1993 by applying the weighted average increase computed for Product #1 (20.31 percent) to the unit costs originally carried on M's records for 1993 under M's former method. The estimated revalued unit cost of Product #1 would be $6.02 ($5.00 × 1.2031). M estimates its revalued costs for

Product #2 for 1993 and 1994 in a similar fashion. M applies the weighted average increase determined for Product #2 (18.18 percent) to the unit costs of $4.00 and $4.50 for 1993 and 1994 respectively. The revalued unit costs of Product #2 are $4.73 for 1993 ($4.00 × 1.1818) and $5.32 for 1994 ($4.50 × 1.1818).

(iv) M's inventory would be revalued as follows:

LIFO product and layer	Number	Cost	Carrying values
Product #1:			
1993	150	$6.02	$903
1994	100	7.00	700
1995	100	7.75	775
1996	50	9.00	450
			$2,828
Product #2:			
1993	200	4.73	946
1994	200	5.32	1,064
1995	100	6.00	600
1996	100	7.00	700
			3,310
Total value of Products #1 and #2 as revalued under M's new method			6,138
Total amount of adjustment required under section 481(a) [$6,138 − $5,150]			988

(D) *Adjustments to inventory costs from prior years.* For special rules applicable when a revaluation using the weighted average method includes costs not incurred in prior years, see paragraph (c)(2)(v)(E) of this section.

(v) *3-year average method*—(A) *In general.* A taxpayer using the dollar-value LIFO method of accounting for inventories may revalue all existing LIFO layers of a trade or business based on the 3-year average method as provided in this paragraph (c)(2)(v). The 3-year average method is based on the average percentage change (the 3-year revaluation factor) in the current costs of inventory for each LIFO pool based on the three most recent taxable years for which the taxpayer has sufficient information (typically, the three most recent taxable years of such trade or business). The 3-year revaluation factor is applied to all layers for each pool in beginning inventory in the year of change. The 3-year average method is available to any dollar-value taxpayer that complies with the requirements of this paragraph (c)(2)(v) regardless of whether such taxpayer lacks sufficient data to revalue its inventory costs under the facts and circumstances revaluation method prescribed in paragraph (c)(2)(iii) of this section. The 3-year average method must be applied with respect to all inventory in a taxpayer's trade or business. A taxpayer is not permitted to apply the method for the revaluation of some, but not all, inventory costs on the basis of pools, business units, or other measures of inventory amounts that do not constitute a separate trade or business. Generally, a taxpayer revaluing its inventory using the 3-year average method must establish a new base year. See, paragraph (b)(2)(iii)(A)(*2*)(*i*) of this section. However, a dollar-value LIFO taxpayer using the 3-year average method and either the simplified production method or the simplified resale method to revalue its inventory is permitted, but not required, to establish a new base year. See, paragraph (b)(2)(iii)(A)(*2*)(*ii*) of this section. If a taxpayer lacks sufficient information to otherwise apply the 3-year average method under this paragraph (c)(2)(v) (for example, the taxpayer is unable to revalue the costs of any of its LIFO pools for three years due to a lack of information), then the taxpayer must use reasonable estimates and procedures, as described in the facts and circumstances revaluation method under paragraph (c)(2)(iii) of this section, to whatever extent is necessary to allow the taxpayer to apply the 3-year average method.

(B) *Consecutive year requirement.* Under the 3-year average method, if sufficient data is available to calculate the revaluation factor for more than three years, the taxpayer may use data from such additional years in determining the average percentage increase or decrease only if the additional years are consecutive to and prior to the year of change. The requirement under the preceding sentence to use consecutive years is applicable under this method regardless of whether any inventory costs in beginning inventory as of the year of change are viewed as incurred in, or attributable to, those consecutive years under the LIFO inventory method. Thus, the requirement to use data from consecutive years may result in using information from a year in which no LIFO increment occurred. For example, if a taxpayer is changing its method of accounting in 1997 and has sufficient data to revalue its inventory for the years 1991 through 1996, the taxpayer may calculate the revaluation factor using all six years. If, however, the taxpayer has sufficient data to revalue its inventory for the years 1990 through 1992, and 1994 through 1996, only the three years consecutive to the year of change, that is, 1994 through 1996, may be used in determining the revaluation factor. Similarly, for example, a taxpayer with LIFO increments in 1995, 1993, and 1992 may not calculate the revaluation factor based on the data from those years alone, but instead must use the data from consecutive years for which the taxpayer has information.

(C) *Example.* The provisions of this paragraph (c)(2)(v) are illustrated by the following example. The principles set forth in this example are applicable both to production and resale activities and the year of change in the example is 1997. The example reads as follows:

Example. (i) Taxpayer G, a calendar year taxpayer, is a reseller that is required to change its method of accounting under section 263A. G will not use either the simplified production method or the simplified resale method. G adopted the dollar-value LIFO inventory method in 1991, using a single pool and the double extension method. G's beginning LIFO inventory as of January 1, 1997, computed using its former method, for the year of change is as follows:

	Base year costs	Index	LIFO carrying value
Base layer	$14,000	1.00	$14,000
1991 layer	4,000	1.20	4,800
1992 layer	5,000	1.30	6,500
1993 layer	2,000	1.35	2,700
1994 layer	0	1.40	0
1995 layer	4,000	1.50	6,000
1996 layer	5,000	1.60	8,000
Total	34,000		42,000

(ii) G is able to recompute total inventoriable costs incurred under its new method for the three preceding taxable years as follows:

	Current cost as recorded (former method)	Current cost as adjusted (new method)	Percentage change
1994	$35,000	$45,150	.29
1995	43,500	54,375	.25
1996	54,400	70,720	.30
Total	132,900	170,245	.28

(iii) Applying the average revaluation factor of .28 to each layer, G's inventory is restated as follows:

	Restated base year costs	Index	Restated LIFO carrying value
Base layer	$17,920	1.00	$17,920
1991 layer	5,120	1.20	6,144
1992 layer	6,400	1.30	8,320
1993 layer	2,560	1.35	3,456
1994 layer	0	1.40	0
1995 layer	5,120	1.50	7,680
1996 layer	6,400	1.60	10,240
Total	43,520		53,760

(iv) The adjustment required by section 481(a) is $11,760. This amount may be computed by multiplying the average percentage of .28 by the LIFO carrying value of G's inventory valued using its former method ($42,000). Alternatively, the adjustment required by section 481(a) may be computed by the difference between—

(A) The revalued costs of the taxpayer's inventory under its new method ($53,760), and

(B) The costs of the taxpayer's inventory using its former method ($42,000).

(v) In addition, the inventory as of the first day of the year of change (January 1, 1997) becomes the new base year cost for purposes of determining the LIFO index in future years. See, paragraphs (b)(2)(iii)(A)(*2*)(*i*) and (b)(2)(iii)(B) of this section. This requires that layers in years prior to the base year be restated in terms of the new base year index. The current year cost of G's inventory, as adjusted, is $70,720. Such cost must be apportioned to each layer in proportion to the restated base year cost of that layer to total restated base year costs ($43,520), as follows:

	Restated base year costs	Restated index	Restated LIFO carrying value
Old base layer	$29,120	.615	$17,920
1991 layer	8,320	.738	6,144
1992 layer	10,400	.80	8,320
1993 layer	4,160	.831	3,456
1994 layer	0		0
1995 layer	8,320	.923	7,680
1996 layer	10,400	.985	10,240
Total	70,720		53,760

(D) *Short taxable years.* A short taxable year is treated as a full 12 months.

(E) *Adjustments to inventory costs from prior years*—(*1*) *General rule.* (*i*) The use of the revaluation factor, based on current costs, to estimate the revaluation of prior inventory layers under the 3-year average method, as described in paragraph (c)(2)(v) of this section, may result in an allocation of costs that include amounts attributable to costs not incurred during the year in which the layer arose. To the extent a taxpayer can demonstrate that costs that contributed to the determination of the revaluation factor could not have affected a prior year, the revaluation factor as applied to that year may be adjusted under the restatement adjustment procedure, as described in paragraph (c)(2)(v)(F) of this section. The determination that a cost could not have affected a prior year must be made by a taxpayer only upon showing that the type of cost incurred during the years used to calculate the revaluation factor (revaluation years) was not present during such prior year. An item of cost will not be eligible for the restatement adjustment procedure simply because the cost varies in amount from year to year or the same type of cost is described or referred to by a different name from year to year. Thus, the restatement adjustment procedure allowed under paragraph (c)(2)(v)(F) of this section is not available in a prior year with respect to a particular cost if the same type of cost was incurred both in the revaluation years and in such prior year, although the amount of such cost and the name or description thereof may vary.

(*ii*) The provisions of this paragraph (c)(2)(v)(E) are also applicable to taxpayers using the weighted average method in revaluing inventories under paragraph (c)(2)(iv) of this section. Thus, to the extent a taxpayer can demonstrate that costs that contributed to the determination of the restatement of a particular year or item could not have affected a prior year or item, the taxpayer may adjust the revaluation of that prior year or item accordingly under the weighted average method. All the requirements and definitions, however, applicable to the restatement adjustment procedure under this paragraph (c)(2)(v)(E) fully apply to a taxpayer using the weighted average method to revalue inventories.

(*2*) *Examples of costs eligible for restatement adjustment procedure.* The provisions of this paragraph (c)(2)(v)(E) are illustrated by the following four examples. The principles set forth in these examples are applicable both to production and resale activities and the year of change in the four examples is 1997. The examples read as follows:

Example 1. Taxpayer A is a reseller that introduced a defined benefit pension plan in 1994, and made the plan available to personnel whose labor costs were (directly or indirectly) properly allocable to resale activities. A determines the revaluation factor based on data available for the years 1994 through 1996, for which the pension plan was in existence. Based on these facts, the costs of the pension plan in the revaluation years are eligible for the restatement adjustment procedure for years prior to 1994.

Example 2. Assume the same facts as in *Example 1,* except that a defined contribution plan was available, during prior years, to personnel whose labor costs were properly allocable to resale activities. The defined contribution plan was terminated before the introduction of the defined benefit plan in 1994. Based on these facts, the costs of the defined benefit pension plan in the revaluation years are not eligible for the restatement adjustment procedure with respect to years for which the defined contribution plan existed.

Example 3. Taxpayer C is a manufacturer that established a security department in 1995 to patrol and safeguard its production and warehouse areas used in C's trade or business. Prior to 1995, C had not been required to utilize security personnel in its trade or business; C established the security department in 1995 in response to increasing vandalism and theft at its plant locations. Based on these facts, the costs of the security department are eligible for the restatement adjustment procedure for years prior to 1995.

Example 4. Taxpayer D is a reseller that established a payroll department in 1995 to process the company's weekly payroll. In the years 1991 through 1994, D engaged the services of an outside vendor to process the company's payroll. Prior to 1991, D's payroll processing was done by D's accounting department, which was responsible for payroll processing as well as for other accounting functions. Based on these facts, the costs of the payroll department are not eligible for the restatement adjustment procedure. D was incurring the same type of costs in earlier years as D was incurring in the payroll department in 1995 and subsequent years, although these costs were designated by a different name or description.

(F) *Restatement adjustment procedure*—(*1*) *In general.* (*i*) This paragraph (c)(2)(v)(F) provides a restatement adjustment procedure whereunder a taxpayer may adjust the restatement of inventory costs in prior taxable years in order to produce a different restated value than the value that would otherwise occur through application of the revaluation factor to such prior taxable years.

(*ii*) Under the restatement adjustment procedure as applied to a particular prior year, a taxpayer must determine the particular items of cost that are eligible for the restatement adjustment with respect to such prior year. The taxpayer must then recompute, using reasonable estimates and procedures, the total inventoriable costs that would have been incurred for each revaluation year under the taxpayer's former method and the taxpayer's new method by making appropriate adjustments in the data for such revaluation year to reflect the particular costs eligible for adjustment.

(*iii*) The taxpayer must then compute the total percentage change with respect to each revaluation year, using the revised estimates of total inventoriable costs for such year as described in paragraph (c)(2)(v)(F)(*1*)(*ii*) of this section. The percentage change must be determined by calculating the ratio of the revised total of the inventoriable costs for such revaluation year under the taxpayer's new method to the revised total of the inventoriable costs for such revaluation year under the taxpayer's former method.

(*iv*) An average of the resulting percentage change for all revaluation years is then calculated, and the resulting average is applied to the prior year in issue.

(*2*) *Examples of restatement adjustment procedure*. The provisions of this paragraph (c)(2)(v)(F) are illustrated by the following two examples. The principles set forth in these examples are applicable both to production and resale activities and the year of change in the two examples is 1997. The examples read as follows:

Example 1. Taxpayer A is a reseller that is eligible to make a restatement adjustment by reason of the costs of a defined benefit pension plan that was introduced in 1994, during the revaluation period. The revaluation factor, before adjustment of data to reflect the pension costs, is as provided in the example in paragraph (c)(2)(v)(C) of this section. Thus, for example, with respect to the year 1994, the total inventoriable costs under A's former method is $35,000, the total inventoriable costs under A's new method is $45,150, and the percentage change is .29. Under the method of accounting used by A during 1994 (the former method), none of the pension costs were included as inventoriable costs. Thus, under the restatement adjustment procedure, the total inventoriable cost under A's former method would remain at $35,000 if the pension plan had not been in existence. Similarly, A determines that the total inventoriable costs for 1994 under A's new method, if the pension plan had not been in existence, would have been $42,000. The restatement adjustment for 1994 determined under this paragraph (c)(2)(v)(F) would then be equal to .20 ([$42,000–$35,000]/$35,000). A would make similar calculations with respect to 1995 and 1996. The average of such amounts for each of the three years in the revaluation period would then be determined as in the example in paragraph (c)(2)(v)(C) of this section. Such average would be used to revalue cost layers for years for which the pension plan was not in existence. Such revalued layers would then be viewed as restated in compliance with the requirements of this paragraph. With respect to cost layers incurred during years for which the pension plan was in existence, no adjustment of the revaluation factor would occur.

Example 2. Assume the same facts as in *Example 1*, except that a portion of the pension costs were included as inventoriable costs under the method used by A during 1994 (the former method). Under the restatement adjustment procedure, A determines that the total inventoriable costs for 1994 under the former method, if the pension plan had not been in existence, would have been $34,000. Similarly, A determines that the total inventoriable costs for 1994 under A's new method, if the pension plan had not been in existence, would have been $42,000. The restatement adjustment for 1994 determined under this paragraph (c)(2)(v)(F) would then be equal to .24 ([$42,000–$34,000]/$34,000). A would make similar calculations with respect to 1995 and 1996. The average of such amounts for each of the three years in the revaluation period would then be determined as in the example in paragraph (c)(2)(v)(C) of this section. Such average would be used to revalue cost layers for years for which the pension plan was not in existence.

(3) *Intercompany items*—(i) *Revaluing intercompany transactions*. Pursuant to any change in method of accounting for costs subject to section 263A, taxpayers are required to revalue the amount of any intercompany item resulting from the sale or exchange of inventory property in an intercompany transaction to an amount equal to the intercompany item that would have resulted, had the cost of goods sold for that inventory property been determined under the taxpayer's new method. The requirement of the preceding sentence applies with respect to both inventory produced by a taxpayer and inventory acquired by the taxpayer for resale. In addition, the requirements of this paragraph (c)(3) apply only to any intercompany item of the taxpayer as of the beginning of the year of change in method of accounting. See § 1.1502–13(b)(2)(ii). A taxpayer must revalue the amount of any intercompany item only if the inventory property sold in the intercompany transaction is held as inventory by a buying member as of the date the taxpayer changes its method of accounting under section 263A. Corresponding changes to the adjustment required under section 481(a) must be made with respect to any adjustment of the intercompany item required under this paragraph (c)(3). Moreover, the requirements of this paragraph (c)(3) apply regardless of whether the taxpayer has any items in beginning inventory as of the year of change in method of accounting. See § 1.1502–13 for the definition of intercompany transaction.

(ii) *Example*. The provisions of this paragraph (c)(3) are illustrated by the following example. The principles set forth in this example are applicable both to production and resale activities and the year of change in the example is 1997. The example reads as follows:

Example. (i) Assume that S, a member of a consolidated group filing its federal income tax return on a calendar year, manufactures and sells inventory property to B, a member of the same consolidated group, in 1996. The sale between S and B is an intercompany transaction as defined under §1.1502–13(b)(1). The gain from the intercompany transaction is an intercompany item to S under §1.1502–13(b)(2). As of the beginning of the year of change in method of accounting (January 1, 1997), the inventory property is still held by B based on the particular inventory method of accounting used by B for federal income tax purposes (for example, the LIFO or FIFO inventory method). The property was sold by S to B in 1996 for $150; the cost of goods sold with respect to the property under the method in effect at the time the inventory was produced was $100, resulting in an intercompany item of $50 to S under §1.1502–13. As of January 1, 1997, S still has an intercompany item of $50.

(ii) S is required to revalue the amount of its intercompany item to an amount equal to what the intercompany item would have been had the cost of goods sold for that inventory property been determined under S's new method. Assume that the cost of the inventory under this method would have been $110, had the method applied to S's manufacture of the property in 1996. Thus, S is required to revalue the amount of its intercompany item to $40 (that is, $150 less $110), necessitating a negative adjustment to the intercompany item of $10. Moreover, S is required to increase its adjustment under section 481(a) by $10 in order to prevent the omission of such amount by virtue of the decrease in the intercompany item.

(iii) *Availability of revaluation methods.* In revaluing the amount of any intercompany item resulting from the sale or exchange of inventory property in an intercompany transaction to an amount equal to the intercompany item that would have resulted had the cost of goods sold for that inventory property been determined under the taxpayer's new method, a taxpayer may use the other methods and procedures otherwise properly available to that particular taxpayer in revaluing inventory under section 263A and the regulations thereunder, including, if appropriate, the various simplified methods provided in section 263A and the regulations thereunder and the various procedures described in this paragraph (c).

(4) *Anti-abuse rule*—(i) *In general.* Section 263A(i)(1) provides that the Secretary shall prescribe such regulations as may be necessary or appropriate to carry out the purposes of section 263A, including regulations to prevent the use of related parties, pass-thru entities, or intermediaries to avoid the application of section 263A and the regulations thereunder. One way in which the application of section 263A and the regulations thereunder would be otherwise avoided is through the use of entities described in the preceding sentence in such a manner as to effectively avoid the necessity to restate beginning inventory balances under the change in method of accounting required or permitted under section 263A and the regulations thereunder.

(ii) *Deemed avoidance of this section*—(A) *Scope.* For purposes of this paragraph (c), the avoidance of the application of section 263A and the regulations thereunder will be deemed to occur if a taxpayer using the LIFO method of accounting for inventories, transfers inventory property to a related corporation in a transaction described in section 351, and such transfer occurs:

(*1*) On or before the beginning of the transferor's taxable year beginning in 1987; and

(*2*) After September 18, 1986.

(B) *General rule.* Any transaction described in paragraph (c)(4)(ii)(A) of this section will be treated in the following manner:

(*1*) Notwithstanding any provision to the contrary (for example, section 381), the transferee corporation is required to revalue the inventories acquired from the transferor under the provisions of this paragraph (c) relating to the change in method of accounting and the adjustment required by section 481(a), as if the inventories had never been transferred and were still in the hands of the transferor; and

(*2*) Absent an election as described in paragraph (c)(4)(iii) of this section, the transferee must account for the inventories acquired from the transferor by treating such inventories as if they were contained in the transferee's LIFO layer(s).

(iii) *Election to use transferor's LIFO layers.* If a transferee described in paragraph (c)(4)(ii) of this section so elects, the transferee may account for the inventories acquired from the transferor by allocating such inventories to LIFO layers corresponding to the layers to which such properties were properly allocated by the transferor, prior to their transfer. The transferee must account for such inventories for all subsequent periods with reference to such layers to which the LIFO costs were allocated. Any such election is to be made on a statement attached to the timely filed federal income tax return of the transferee for the first taxable year for which section 263A and the regulations thereunder applies to the transferee.

(iv) *Tax avoidance intent not required.* The provisions of paragraph (c)(4)(ii) of this section will apply to any transaction described therein, without regard to whether such transaction was consummated with an intention to avoid federal income taxes.

(v) *Related corporation.* For purposes of this paragraph (c)(4), a taxpayer is related to a corporation if—

(A) the relationship between such persons is described in section 267(b)(1), or

(B) such persons are engaged in trades or businesses under common control (within the meaning of paragraphs (a) and (b) of section 52).

(d) *Non-inventory property*—(1) *Need for adjustments.* A taxpayer that changes its method of accounting for costs subject to section 263A with respect to non-inventory property must revalue the non-inventory property on hand at the beginning of the year of change as set forth in paragraph (d)(2) of this section, and compute an adjustment under section 481(a). The adjustment under section 481(a) will equal the difference between the adjusted basis of the property as revalued using the taxpayer's new method and the adjusted basis of the property as originally valued using the taxpayer's former method.

(2) *Revaluing property.* A taxpayer must revalue its non-inventory property as of the beginning of the year of change in method of accounting. The facts and circumstances revaluation method of paragraph (c)(2)(iii) of this section must be used to revalue this property. In revaluing non-inventory property, however, the only additional section 263A costs that must be taken into account are those additional section 263A costs incurred after the later of December 31, 1986, or the date the taxpayer first becomes subject to section 263A, in taxable years ending after that date. See §1.263A–1(d)(3) for the definition of additional section 263A costs.

[T.D. 8728, 62 FR 42054, Aug. 5, 1997, as amended by T.D. 9131, 69 FR 33572, June 16, 2004; T.D. 9843, 83 FR 58498, Nov. 20, 2018; T.D. 9942, 86 FR 268, Jan. 5, 2021]

§ 1.263A–8 Requirement to capitalize interest.

(a) *In general*—(1) *General rule.* Capitalization of interest under the avoided cost method described in §1.263A–9 is required with respect to the production of designated property described in paragraph (b) of this section. However, a taxpayer, other than a tax shelter prohibited from using the cash receipts and disbursements method of accounting under section 448(a)(3), that meets the gross receipts test of section 448(c) for the taxable year is not required to capitalize costs, including interest, under section 263A. See §1.263A–1(j).

(2) *Treatment of interest required to be capitalized.* In general, interest that is capitalized under this section is treated as a cost of the designated property and is recovered in accordance with §1.263A–1(c)(4). Interest capitalized by reason of assets used to produce designated property (within the meaning of §1.263A–11(d)) is added to the basis of the designated property rather than the bases of the assets used to produce the designated property. Interest capitalized with respect to designated property that includes both components subject to an allowance for depreciation or depletion and components not subject to an allowance for depreciation or depletion is ratably allocated among, and is treated as a cost of, components that are subject to an allowance for depreciation or depletion.

(3) *Methods of accounting under section 263A(f).* Except as otherwise provided, methods of accounting and other computations under §§1.263A–8 through 1.263A–15 are applied on a taxpayer, as opposed to a separate and distinct trade or business, basis.

(4) *Special definitions*—(i) *Related person.* Except as otherwise provided, for purposes of §§1.263A–8 through 1.263A–

15, a person is related to a taxpayer if their relationship is described in section 267(b) or 707(b).

(ii) *Placed in service.* For purposes of §§ 1.263A–8 through 1.263A–15, *placed in service* has the same meaning as set forth in § 1.46–3(d).

(b) *Designated property*—(1) *In general.* Except as provided in paragraphs (b)(3) and (b)(4) of this section, *designated property* means any property that is produced and that is either:

(i) Real property; or

(ii) Tangible personal property (as defined in § 1.263A–2(a)(2)) which meets any of the following criteria:

(A) Property with a class life of 20 years or more under section 168 (long-lived property), but only if the property is not property described in section 1221(l) in the hands of the taxpayer or a related person,

(B) Property with an estimated production period (as defined in § 1.263A–12) exceeding 2 years (2-year property), or

(C) Property with an estimated production period exceeding 1 year and an estimated cost of production exceeding $1,000,000 (1-year property).

(2) *Special rules*—(i) *Application of thresholds.* The thresholds described in paragraphs (b)(l)(ii)(A), (B), and (C) of this section are applied separately for each unit of property (as defined in § 1.263A–10).

(ii) *Relevant activities and costs.* For purposes of determining whether property is designated property, all activities and costs are taken into account if they are performed or incurred by, or for, the taxpayer or any related persons and they directly benefit or are incurred by reason of the production of the property.

(iii) *Production period and cost of production.* For purposes of applying the classification thresholds under paragraphs (b)(l)(ii) (B) and (C) of this section to a unit of property, the taxpayer is required, at the beginning of the production period, to reasonably estimate the production period and the total cost of production for the unit of property. The taxpayer must maintain contemporaneous written records supporting the estimates and classification. If the estimates are reasonable based on the facts in existence at the beginning of the production period, the taxpayer's classification of the property is not modified in subsequent periods, even if the actual length of the production period or the actual cost of production differs from the estimates. To be considered reasonable, estimates of the production period and the total cost of production must include anticipated expense and time for delay, rework, change orders, and technological, design or other problems. To the extent that several distinct activities related to the production of the property are expected to occur simultaneously, the period during which these distinct activities occur is not counted more than once. The bases of assets used to produce a unit of property (within the meaning of § 1.263A–11(d)) and any interest that would be required to be capitalized if a unit of property were designated property are disregarded in making estimates of the total cost of production for purposes of this paragraph (b)(2)(iii).

(3) *Excluded property.* Designated property does not include:

(i) Timber and evergreen trees that are more than 6 years old when severed from the roots, or

(ii) Property produced by the taxpayer for use by the taxpayer other than in a trade or business or an activity conducted for profit.

(4) *De minimis rule*—(i) *In general.* Designated property does not include property for which—

(A) The production period does not exceed 90 days; and

(B) The total production expenditures do not exceed $1,000,000 divided by the number of days in the production period.

(ii) *Determination of total production expenditures.* For purposes of determining whether the condition of paragraph (b)(4)(i)(B) of this section is met with respect to property, the cost of land, the adjusted basis of property used to produce property, and interest that would be capitalized with respect to property if it were designated property are excluded from total production expenditures.

(c) *Definition of real property*—(1) *In general.* Real property includes land, unsevered natural products of land, buildings, and inherently permanent structures. Any interest in real property of a type described in this paragraph (c), including fee ownership, co-ownership, a leasehold, an option, or a similar interest is real property under this section. Real property includes the structural components of both buildings and inherently permanent structures, such as walls, partitions, doors, wiring, plumbing, central air conditioning and heating systems, pipes and ducts, elevators and escalators, and other similar property. Tenant improvements to a building that are inherently permanent or otherwise classified as real property within the meaning of this paragraph (c)(1) are real property under this section. However, property produced for sale that is not real property in the hands of the taxpayer or a related person, but that may be incorporated into real property by an unrelated buyer, is not treated as real property by the producing taxpayer (e.g., bricks, nails, paint, and windowpanes).

(2) *Unsevered natural products of land.* Unsevered natural products of land include growing crops and plants, mines, wells, and other natural deposits. Growing crops and plants, however, are real property only if the preproductive period of the crop or plant exceeds 2 years.

(3) *Inherently permanent structures.* Inherently permanent structures include property that is affixed to real property and that will ordinarily remain affixed for an indefinite period of time, such as swimming pools, roads, bridges, tunnels, paved parking areas and other pavements, special foundations, wharves and docks, fences, inherently permanent advertising displays, inherently permanent outdoor lighting facilities, railroad tracks and signals, telephone poles, power generation and transmission facilities, permanently installed telecommunications cables, broadcasting towers, oil and gas pipelines, derricks and storage equipment, grain storage bins and silos. For purposes of this section, affixation to real property may be accomplished by weight alone. Property may constitute an inherently permanent structure even though it is not classified as a building for purposes of former section 48(a)(1)(B) and §1.48–1. Any property not othewise described in this paragraph (c)(3) that constitutes other tangible property under the principles of former section 48(a)(1)(B) and §1.48–1(d) is treated for the purposes of this section as an inherently permanent structure.

(4) *Machinery*—(i) *Treatment.* A structure that is property in the nature of machinery or is essentially an item of machinery or equipment is not an inherently permanent structure and is not real property. In the case, however, of a building or inherently permanent structure that includes property in the nature of machinery as a structural component, the property in the nature of machinery is real property.

(ii) *Certain factors not determinative.* A structure may be an inherently permanent structure, and not property in the nature of machinery or essentially an item of machinery, even if the structure is necessary to operate or use, supports, or is otherwise associated with, machinery.

(d) *Production*—(1) *Definition of produce. Produce* is defined as provided in section 263A(g) and §1.263A–2(a)(1)(i).

(2) *Property produced under a contract*—(i) *Customer.* A taxpayer is treated as producing any property that is produced for the taxpayer (the customer) by another party (the contractor) under a contract with the taxpayer or an intermediary. Property produced under a contract is designated property to the customer if it is real property or tangible personal property that satisfies the classification thresholds described in paragraph (b)(1)(ii) of this section. If property produced under a contract will become part of a unit of designated property produced by the customer in the customer's hands, the property produced under the contract is designated property to the customer.

(ii) *Contractor.* Property produced under a contract is designated property to the contractor if it is real property, 2-year property, or 1-year property and the property produced under the contract is not excluded by reason of paragraph (d)(2)(v) of this section.

(iii) *Definition of a contract.* For purposes of this paragraph (d)(2), *contract* has the same meaning as under §1.263A–2(a)(1)(ii)(B)(*2*).

(iv) *Determination of whether thresholds are satisfied.* In the case of tangible personal property produced under a contract, the customer and the contractor each determine under this paragraph (d)(2), whether the property satisfies the classification thresholds described in paragraph (b)(1)(ii) of this section. Thus, tangible personal property may be designated property with respect to either, or both, the customer and the contractor. The provisions of paragraph (b)(2)(iii) of this section are modified as set forth in this paragraph (d)(2)(iv) for purposes of determining whether tangible personal property produced under a contract is 2-year property or 1-year property.

(A) *Customer.* In determining a customer's estimated cost of production, the customer takes into account costs and payments that are reasonably expected to be incurred by the customer, but does not take into account costs incurred (or to be incurred) by an unrelated contractor. In determining the customer's estimated length of the production period, the production period is treated as beginning on the earlier of the date the contract is executed or the date that the customer's accumulated production expenditures for the unit are at least 5 percent of the customer's total estimated production expenditures for the unit. The customer, however, may elect to treat the production period as beginning on the date the sum of the accumulated production expenditures of the contractor (or contractors if more than one contractor is producing components for the unit of property) and of the customer are at least 5 percent of the customer's estimated production expenditures for the unit.

(B) *Contractor.* In determining a contractor's estimated cost of production, the contractor takes into account only the costs that are reasonably expected to be incurred by the contractor, without any reduction for payments from the customer. In determining the contractor's estimated length of the production period, the production period is treated as beginning on the date the contractor's accumulated production expenditures (without any reduction for payments from the customer) are at least 5 percent of the contractor's total estimated accumulated production expenditures.

(v) *Exclusion for property subject to long-term contract rules.* Property described in paragraph (b) of this section is designated property with respect to a contractor only if—

(A) The contract is not a long-term contract (within the meaning of section 460(f)); or

(B) The contract is a home construction contract (within the meaning of section 460(e)(6)(A)) with respect to which the requirements of section 460(e)(1)(B) (i) and (ii) are not met.

(3) *Improvements to existing property*—(i) *In general.* Any improvement to property described in §1.263(a)–1(b) constitutes the production of property. Generally, any improvement to designated property constitutes the production of designated property. An improvement is not treated as the production of designated property, however, if the de minimis exception described in paragraph (b)(4) of this section applies to the improvement. In addition, paragraph (d)(3)(iii) of this section provides an exception for certain improvements to tangible personal property. Incidental maintenance and repairs are not treated as improvements under this paragraph (d)(3). See §1.162–4.

(ii) *Real property.* The rehabilitation or preservation of a standing building, the clearing of raw land prior to sale, and the drilling of an oil well are activities constituting improvements to real property and, therefore, the production of designated property. Similarly, the demolition of a standing building generally constitutes an activity that is an improvement to real property and, therefore, the production of designated property. See the exceptions, however, in paragraphs (b)(3) and (b)(4) of this section.

(iii) *Tangible personal property.* If the taxpayer has treated a unit of tangible personal property as designated property under this section, an improvement to such property constitutes the production of designated property regardless of the remaining useful life of the improved property (or the improvement) and, except as provided in paragraph (b)(4) of this section, regardless of the estimated length of the production period or the estimated cost of the improvement. If the taxpayer has not treated a unit of tangible personal property as designated property under this section, an improvement to such property constitutes the production of designated property only if the improvement independently meets the classification thresholds described in paragraph (b)(1)(ii) of this section.

[T.D. 8584, 59 FR 67198, Dec. 29, 1994; 60 FR 16574, Mar. 31, 1995; T.D. 9942, 86 FR 268, Jan. 5, 2021]

§ 1.263A–9 The avoided cost method.

(a) *In general*—(1) *Description.* The avoided cost method described in this section must be used to calculate the amount of interest required to be capitalized under section 263A(f). Generally, any interest that the taxpayer theoretically would have avoided if accumulated production expenditures (as defined in § 1.263A–11) had been used to repay or reduce the taxpayer's outstanding debt must be capitalized under the avoided cost method. The application of the avoided cost method does not depend on whether the taxpayer actually would have used the amounts expended for production to repay or reduce debt. Instead, the avoided cost method is based on the assumption that debt of the taxpayer would have been repaid or reduced without regard to the taxpayer's subjective intentions or to restrictions (including legal, regulatory, contractual, or other restrictions) against repayment or use of the debt proceeds.

(2) *Overview*—(i) *In general.* For each unit of designated property (within the meaning of § 1.263A–8(b)), the avoided cost method requires the capitalization of—

(A) The traced debt amount under paragraph (b) of this section, and

(B) The excess expenditure amount under paragraph (c) of this section.

(ii) *Rules that apply in determining amounts.* The traced debt and excess expenditure amounts are determined for each taxable year or shorter computation period that includes the production period (as defined in § 1.263A–12) of a unit of designated property. Paragraph (d) of this section provides an election not to trace debt to specific units of designated property. Paragraph (f) of this section provides rules for selecting the computation period, for calculating averages, and for determining measurement dates within the computation period. Special rules are in paragraph (g) of this section.

(3) *Definitions of interest and incurred.* Except as provided in the case of certain expenses that are treated as a substitute for interest under paragraphs (c)(2)(iii) and (g)(2)(iv) of this section, *interest* refers to all amounts that are characterized as interest expense under any provision of the Code, including, for example, sections 482, 483, 1272, 1274, and 7872. *Incurred* refers to the amount of interest that is properly accruable during the period of time in question determined by taking into account the loan agreement and any applicable provisions of the Internal Revenue laws and regulations such as section 163, § 1.446–2, and sections 1271 through 1275.

(4) *Definition of eligible debt.* Except as provided in this paragraph (a)(4), *eligible debt* includes all outstanding debt (as evidenced by a contract, bond, debenture, note, certificate, or other evidence of indebtedness). Eligible debt does not include—

(i) Debt (or the portion thereof) bearing interest that is disallowed under a provision described in § 1.163–8T(m)(7)(ii);

(ii) Debt, such as accounts payable and other accrued items, that bears no interest, except to the extent that such debt is traced debt (as defined in paragraph (b)(2) of this section);

(iii) Debt that is borrowed directly or indirectly from a person related to the taxpayer and that bears a rate of interest that is less than the applicable Federal rate in effect under section 1274(d) on the date of issuance;

(iv) Debt (or the portion thereof) bearing personal interest within the meaning of section 163(h)(2);

(v) Debt (or the portion thereof) bearing qualified residence interest within the meaning of section 163(h)(3);

(vi) Debt incurred by an organization that is exempt from Federal income tax under section 501(a), except to the extent interest on such debt is directly attributable to an unrelated trade or business of the organization within the meaning of section 512;

(vii) Reserves, deferred tax liabilities, and similar items that are not treated as debt for Federal income tax purposes, regardless of the extent to which the taxpayer's applicable financial accounting or other regulatory reporting principles require or support treating these items as debt;

(viii) Federal, State, and local income tax liabilities, deferred tax liabilities under section 453A, and hypothetical tax liabilities under the look-back method of section 460(b) or similar provisions; and

(ix) A purchase money obligation given by the lessor to the lessee (or a party that is related to the lessee) in a sale and leaseback transaction involving an agreement qualifying as a lease under §5c.168(f)(8)-1 through §5c.168(f)(8)–11 of this chapter. *See* §5c.168(f)(8)–1(e) *Example (2)* of this chapter.

(b) *Traced debt amount*—(1) *General rule.* Interest must be capitalized with respect to a unit of designated property in an amount (the traced debt amount) equal to the total interest incurred on the traced debt during each measurement period (as defined in paragraph (f)(2)(ii) of this section) that ends on a measurement date described in paragraph (f)(2)(iii) of this section. See the example in paragraph (b)(3) of this section. If any interest incurred on the traced debt is not taken into account for the taxable year that includes the measurement period because of a deferral provision, see paragraph (g)(2) of this section for the time and manner for capitalizing and recovering that amount. This paragraph (b)(1) does not apply if the taxpayer elects under paragraph (d) of this section not to trace debt.

(2) *Identification and definition of traced debt.* On each measurement date described in paragraph (f)(2)(iii) of this section, the taxpayer must identify debt that is traced debt with respect to a unit of designated property. On each such date, traced debt with respect to a unit of designated property is the outstanding eligible debt (as defined in paragraph (a)(4) of this section) that is allocated, on that date, to accumulated production expenditures with respect to the unit of designated property under the rules of §1.163–8T. Traced debt also includes unpaid interest that has been capitalized with respect to such unit under paragraph (b)(1) of this section and that is included in accumulated production expenditures on the measurement date.

(3) *Example.* The provisions of paragraphs (b)(1) and (b)(2) of this section are illustrated by the following example.

Example. Corporation X, a calendar year taxpayer, is engaged in the production of a single unit of designated property during 1995 (unit A). Corporation X adopts a taxable year computation period and quarterly measurement dates. Production of unit A starts on January 14, 1995, and ends on June 16, 1995. On March 31, 1995 and on June 30, 1995, Corporation X has outstanding a $1,000,000 loan that is allocated under the rules of §1.163–8T to production expenditures with respect to unit A. During the period January 1, 1995, through June 30, 1995, Corporation X incurs $50,000 of interest related to the loan. Under paragraph (b)(1) of this section, the $50,000 of interest Corporation X incurs on the loan during the period January 1, 1995, through June 30, 1995, must be capitalized with respect to unit A.

(c) *Excess expenditure amount*—(1) *General rule.* If there are accumulated production expenditures in excess of traced debt with respect to a unit of designated property on any measurement date described in paragraph (f)(2)(iii) of this section, the taxpayer must, for the computation period that includes the measurement date, capitalize with respect to this unit the excess expenditure amount calculated under this paragraph (c)(1). However, if the sum of the excess expenditure amounts for all units of designated property of a taxpayer exceeds the total interest described in paragraph (c)(2) of this section, only a prorata amount (as determined under paragraph (c)(7) of this section) of such interest must be capitalized with respect to each unit. For each unit of designated property, the excess expenditure amount for a computation period equals the product of—

(i) The average excess expenditures (as determined under paragraph (c)(5)(ii) of this section) for the unit of designated property for that period, and

(ii) The weighted average interest rate (as determined under paragraph (c)(5)(iii) of this section) for that period.

(2) *Interest required to be capitalized.* With respect to an excess expenditure amount, interest incurred during the computation period is capitalized from the following sources and in the following sequence but not in excess of the excess expenditure amount for all units of designated property:

(i) Interest incurred on nontraced debt (as defined in paragraph (c)(5)(i) of this section);

(ii) Interest incurred on borrowings described in paragraph (a)(4)(iii) of this section (relating to certain borrowings from related persons); and

(iii) In the case of a partnership, guaranteed payments for the use of capital (within the meaning of section 707(c)) that would be deductible by the partnership if section 263A(f) did not apply.

(3) *Example.* The provisions of paragraph (c)(1) and (2) of this section are illustrated by the following example.

Example. (i) P, a partnership owned equally by Corporation A and Individual B, is engaged in the construction of an office building during 1995. Average excess expenditures for the office building for 1995 are $2,000,000. When P was formed, A and B agreed that A would be entitled to an annual guaranteed payment of $70,000 in exchange for A's capital contribution. The only borrowing of P, A, and B for 1995 is a loan to P from an unrelated lender of $1,000,000 (loan #1). The loan is nontraced debt and bears interest at an annual rate of 10 percent. Thus, P's weighted average interest rate (determined under paragraph (c)(5)(iii) of this section) is 10 percent and interest incurred during 1995 is $100,000.

(ii) In accordance with paragraph (c)(1) of this section, the excess expenditure amount is $200,000 ($2,000,000 × 10%). The interest capitalized under paragraph (c)(2) of this section is $170,000 ($100,000 of interest plus $70,000 of guaranteed payments).

(4) *Treatment of interest subject to a deferral provision.* If any interest described in paragraph (c)(2) of this section is not taken into account for the taxable year that includes the computation period because of a deferral provision described in paragraph (g)(1)(ii) of this section, paragraph (c)(2) of this section is first applied without regard to the amount of the deferred interest. After applying paragraph (c)(2) without regard to the deferred interest, if the amount of interest capitalized with respect to all units of designated property for the computation period is less than the amount that would have been capitalized if a deferral provision did not apply, see paragraph (g)(2) of this section for the time and manner for capitalizing and recovering the difference (the shortfall amount).

(5) *Definitions*—(i) *Nontraced debt*—(A) *Defined. Nontraced debt* means all eligible debt on a measurement date other than any debt that is treated as traced debt with respect to any unit of designated property on that measurement date. For example, nontraced debt includes eligible debt that is allocated to expenditures that are not capitalized under section 263A(a) (*e.g.*, expenditures deductible under section 174(a) or 263(c)). Similarly, even if eligible debt is allocated to a production expenditure for a unit of designated property, the debt is included in nontraced debt on measurement dates before the first or after the last measurement date for that unit of designated property. Thus, nontraced debt may include debt that was previously treated as traced debt or that will be treated as traced debt on a future measurement date.

(B) *Example.* The provisions of paragraph (c)(5)(i)(A) of this section are illustrated by the following example.

Example. In 1995, Corporation X begins, but does not complete, the construction of two office buildings that are separate units of designated property as defined in §1.263A–10 (Property D and Property E). At the beginning of 1995, X borrows $2,500,000 (the $2,500,000 loan), which will be used exclusively to finance production expenditures for Property D. Although interest is paid currently, the entire principal amount of the loan remains outstanding at the end of 1995. Corporation X also has outstanding during all of 1995 a long-term loan with a principal amount of $2,000,000 (the $2,000,000 loan). The proceeds of the $2,000,000 loan were used exclusively to finance the production of Property C, a unit of designated property that was completed in 1994. Under the rules of paragraph (b)(2) of this section, the portion of the $2,500,000 loan allocated to accumulated production expenditures for property D at each measurement date during 1995 is treated as traced debt for that measurement date. The excess, if any, of $2,500,000 over the amount treated as traced debt at each measurement date during 1995 is treated as nontraced debt for that measurement date, even though it is expected that the entire $2,500,000 will be treated as traced debt with respect to Property D on subsequent measurement dates as more of the proceeds of the loan are used to finance additional production expenditures. In addition, the entire principal amount of the $2,000,000 loan is treated as nontraced debt for 1995, even though it was treated as traced debt with respect to Property C in a previous period.

(ii) *Average excess expenditures*—(A) *General rule.* The average excess expenditures for a unit of designated property for a computation period are computed by—

(*1*) Determining the amount (if any) by which accumulated production expenditures exceed traced debt at each measurement date during the computation period; and

(*2*) Dividing the sum of these amounts by the number of measurement dates during the computation period.

(B) *Example.* The provisions of paragraph (c)(5)(ii)(A) of this section are illustrated by the following example.

Example. Corporation X, a calendar year taxpayer, is engaged in the production of a single unit of designated property during 1995 (unit A). Corporation X adopts the taxable year as the computation period and quarterly measurement dates. The production period for unit A begins on January 14, 1995, and ends on June 16, 1995. On March 31, 1995, and on June 30, 1995, Corporation X has outstanding $1,000,000 of traced debt with respect to unit A. Accumulated production expenditures for unit A on March 31, 1995, are $1,400,000 and on June 30, 1995, are $1,600,000. Accumulated production expenditures in excess of traced debt for unit A on March 31, 1995, are $400,000 and on June 30, 1995, are $600,000. Average excess expenditures for unit A during 1995 are therefore $250,000 ([$400,000 + $600,000 + $0 + $0] ÷ 4).

(iii) *Weighted average interest rate*—(A) *Determination of rate.* The weighted average interest rate for a computation period is determined by dividing interest incurred on nontraced debt during the period by average nontraced debt for the period.

(B) *Interest incurred on nontraced debt.* Interest incurred on nontraced debt during the computation period is equal to the total amount of interest incurred during the computation period on all eligible debt minus the amount of interest incurred during the computation period on traced debt. Thus, all interest incurred on nontraced debt during the computation period is included in the numerator of the weighted average interest rate, even if the underlying nontraced debt is repaid before the end of a measurement period and excluded from nontraced debt outstanding for measurement dates after repayment, in determining the denominator of the weighted average interest rate. However, see paragraph (g)(7) of this section for an election to treat eligible debt that is repaid within the 15-day period immediately preceding a quarterly measurement date as outstanding on that measurement date. See paragraph (a)(3) of this section for the definitions of interest and incurred.

(C) *Average nontraced debt.* The average nontraced debt for a computation period is computed by—

(*1*) Determining the amount of nontraced debt outstanding on each measurement date during the computation period; and

(*2*) Dividing the sum of these amounts by the number of measurement dates during the computation period.

(D) *Special rules if taxpayer has no nontraced debt or rate is contingent.* If the taxpayer does not have nontraced debt outstanding during the computation period, the weighted average interest rate for purposes of applying paragraphs (c)(1) and (c)(2) of this section is the highest applicable Federal rate in effect under section 1274(d) during the computation period. If interest is incurred at a rate that is contingent at the time the return for the year that includes the computation period is filed, the amount of interest is determined using the higher of the fixed rate of interest (if any) on the underlying debt or the applicable Federal rate in effect under section 1274(d) on the date of issuance.

(6) *Examples.* The following examples illustrate the principles of this paragraph (c):

Example 1. (i) W, a calendar year taxpayer, is engaged in the production of a unit of designated property during 1995. For purposes of applying the avoided cost method of this section, W uses the taxable year as the computation period. During 1995, W's only debt is a $1,000,000 loan bearing interest at a rate of 7 percent from Y, a person that is related to W. Assuming the applicable Federal rate in effect under section 1274(d) on the date of issuance of the loan is 10 percent, the loan is not eligible debt under paragraph (a)(4) of this section. However, even though W has no eligible debt, W incurs $70,000 ($1,000,000 × 7%) of interest during the computation period. This interest is described in paragraph (c)(2) of this section and must be capitalized under paragraph (c)(1) of this section to the extent it does not exceed W's excess expenditure amount for the unit of property.

(ii) W determines, under paragraph (c)(5)(ii) of this section, that average excess expenditures for the unit of property are $600,000. Assuming the highest applicable Federal rate in effect under section 1274(d) during the computation period is 10 percent, W uses 10 percent as the weighted average interest rate for purposes of determining the excess expenditure amount. See paragraph (c)(5)(iii)(D) of this section. In accordance with paragraph (c)(1) of this section, the excess expenditure amount is therefore $60,000. Because this amount does not exceed the total amount of interest described in paragraph (c)(2) of this section ($70,000), W is required to capitalize $60,000 of interest with respect to the unit of designated property for the 1995 computation period.

Example 2. (i) Corporation X, a calendar year taxpayer, is engaged in the production of a single unit of designated property during 1955 (unit A). Corporation X adopts the taxable year as the computation period and quarterly measurement dates. Production of unit A begins in 1994 and ends on June 30, 1995. On March 31, 1995, and on June 30, 1995, Corporation X has outstanding $1,000,000 of eligible debt (loan #1) that is allocated under the rules of § 1.163–8T to production expenditures for unit A. During each of the first two quarters of 1995, $30,000 of interest is incurred on loan #1. The loan is repaid on July 1, 1995. Throughout 1995, Corporation X also has outstanding $2,000,000 of eligible debt (loan #2) which is not allocated under the rules of § 1.163–8T to the production of unit A. During 1995, $200,000 of interest is incurred on this nontraced debt. Accumulated production expenditures on March 31, 1995, are $1,400,000 and on June 30, 1995, are $1,600,000. Accumulated production expenditures in excess of traced debt on March 31, 1995, are $400,000 and on June 30, 1995, are $600,000.

(ii) Under paragraph (b)(1) of this section, the amount of interest capitalized with respect to traced debt is $60,000 ($30,000 for the measurement period ending March 31, 1995, and $30,000 for the measurement period ending June 30, 1995). Under paragraph (c)(5)(ii) of this section, average excess expenditures for unit A are $250,000 ([($1,400,000 − $1,000,000) + ($1,600,000 − $1,000,000) + $0 + $0] ÷ 4). Under paragraph (c)(5)(iii)(C) of this section, average nontraced debt is $2,000,000 ([$2,000,000 + $2,000,000 + $2,000,000 + $2,000,000] ÷ 4). Under paragraph (c)(5)(iii)(B) of this section, interest incurred on nontraced debt is $200,000 ($260,000 of interest incurred on all eligible debt less $60,000 of interest incurred on traced debt). Under paragraph (c)(5)(iii)(A) of this section, the weighted average interest rate is 10 percent ($200,000 ÷ $2,000,000). Under paragraph (c)(1) of this section, Corporation X capitalizes the excess expenditure amount of $25,000 ($250,000 × 10%), because it does not exceed the total amount of interest subject to capitalization under paragraph (c)(2) of this section ($200,000). Thus, the total interest capitalized with respect to unit A during 1995 is $85,000 ($60,000 + $25,000).

(7) *Special rules where the excess expenditure amount exceeds incurred interest*—(i) *Allocation of total incurred interest to units.* For a computation period in which the sum of the excess expenditure amounts under paragraph (c)(1) of this section for all units of designated property exceeds the total amount of interest (including deferred interest) available for capitalization, as determined under paragraph (c)(2) of this section, the amount of interest that is allocated to a unit of designated property is equal to the product of—

(A) The total amount of interest (including deferred interest) available for capitalization, as determined under paragraph (c)(2) of this section; and

(B) A fraction, the numerator of which is the average excess expenditures for the unit of designated property and the denominator of which is the sum of the average excess expenditures for all units of designated property.

(ii) *Application of related person rules to average excess expenditure.* Certain excess expenditures must be taken into account by the persons (if any) required to capitalize interest with respect to production expenditures of the taxpayer under applicable related person rules. For each computation period, the amount of average excess expenditures that must be taken into account by such persons for each unit of the taxpayer's property is computed by—

(A) Determining, for the computation period, the amount (if any) by which the excess expenditure amount for the unit exceeds the amount of interest allocated to the unit under paragraph (c)(7)(i) of this section; and

(B) Dividing the excess by the weighted average interest rate for the period.

(iii) *Special rule for corporations.* If a corporation is related to another person for the purposes of the applicable related party rules, the District Director upon examination may require that the corporation apply this paragraph (c)(7) and other provisions of the regulations by excluding deferred interest from the total interest available for capitalization.

(d) *Election not to trace debt*—(1) *General rule.* Taxpayers may elect not to trace debt. If the election is made, the average excess expenditures and weighted average interest rate under paragraph (c)(5) of this section are determined by treating all eligible debt as nontraced debt. For this purpose, debt specified in paragraph (a)(4)(ii) of this section (e.g., accounts payable) may be included in eligible debt, provided it would be treated as traced debt but for an election under this paragraph (d). The election not to trace debt is a method of accounting that applies to the determination of capitalized interest for all designated property of the taxpayer. The making or revocation of the election is a change in method of accounting requiring the consent of the Commissioner under section 446(e) and §1.446–1(e).

(2) *Example.* The provisions of paragraph (d)(1) of this section are illustrated by the following example.

Example. (i) Corporation X, a calendar year taxpayer, is engaged in the production of a single unit of designated property during 1995 (unit A). Corporation X adopts the taxable year as the computation period and quarterly measurement dates. At each measurement date (March 31, June 30, September 30, and December 31) Corporation X has the following outstanding indebtedness:

Noninterest-bearing accounts payable traced to unit A	$100,000
Noninterest-bearing accounts payable that are not traced to unit A	$300,000
Interest-bearing loans that are eligible debt within the meaning of paragraph (a)(4) of this section	$900,000

(ii) Corporation X elects under this paragraph (d) not to trace debt. Eligible debt at each measurement date for purposes of calculating the weighted average interest rate under paragraph (c)(5)(iii) of this section is $1,000,000 ($100,000 + $900,000).

(e) *Election to use external rate*—(1) *In general.* An eligible taxpayer may elect to use the highest applicable Federal rate (AFR) under section 1274(d) in effect during the computation period plus 3 percentage points (AFR plus 3) as a substitute for the weighted average interest rate determined under paragraph (c)(5)(iii) of this section. A taxpayer that makes this election may not trace debt. The use of the AFR plus 3 as provided under this paragraph (e)(1) constitutes a method of accounting. A taxpayer makes the election to use the AFR plus 3 method by using the AFR plus 3 as the taxpayer's weighted average interest rate, and any change to the AFR plus 3 method by a taxpayer that has never previously used the method does not require the consent of the Commissioner. Any other change to or from the use of the AFR plus 3 method under this paragraph (e)(1) (other than by reason of a taxpayer ceasing to be an eligible taxpayer) is a change in method of accounting requiring the consent of the Commissioner under section 446(e) and §1.446–1(e). All changes to or from the AFR plus 3 method are effected on a cut-off basis.

(2) *Eligible taxpayer.* A taxpayer is an eligible taxpayer for a taxable year for purposes of this paragraph (e) if the average annual gross receipts of the taxpayer for the three previous taxable years do not exceed $10,000,000 (the $10,000,000 gross receipts test) and the taxpayer has met the $10,000 gross receipts for all prior taxable years beginning after December 31, 1994. For purposes of this paragraph (e)(2), the principles of section 263A(b)(2)(B) and (C) and §1.263A–3(b) apply in determining whether a taxpayer is an eligible taxpayer for a taxable year. A taxpayer is an eligible taxpayer for a taxable year for purposes of this paragraph (e) if the taxpayer is a small business taxpayer, as defined in §1.263A–1(j).

(f) *Selection of computation period and measurement dates and application of averaging conventions*—(1) *Computation period*—(i) *In general.* A taxpayer may (but is not required to) make the avoided cost calculation on the basis of a full taxable year. If the taxpayer uses the taxable year as the computation period, a single avoided cost calculation is made for each unit of designated property for the entire taxable year. If the taxpayer uses a computation period that is shorter than the full taxable year, an avoided cost calculation is made for each unit of designated property for each shorter computation period within the taxable year. If the taxpayer uses a shorter computation period, the computation period may not include portions of more than one taxable year and, except as provided in the case of short taxable years, each computation period within a taxable year must be the same length. In the case of a short taxable year, a taxpayer may treat a period shorter than the taxpayer's regular computation period as the first or last computation period, or as the only computation period for the year if the year is shorter than the taxpayer's regular computation period. A taxpayer must use the same computation periods for all designated property produced during a single taxable year.

(ii) *Method of accounting.* The choice of a computation period is a method of accounting. Any change in the computation period is a change in method of accounting requiring the consent of the Commissioner under section 446(e) and §1.446–1(e).

(iii) *Production period beginning or ending during the computation period.* The avoided cost method applies to the production of a unit of designated property on the basis of a full computation period, regardless of whether the production period for the unit of designated property begins or ends during the computation period.

(2) *Measurement dates*—(i) *In general.* If a taxpayer uses the taxable year as the computation period, measurement dates must occur at quarterly or more frequent regular intervals. If the taxpayer uses computation periods that are shorter than the taxable year, measurement dates must occur at least twice during each computation period and at least four times during the taxable year (or consecutive 12-month period in the case of a short taxable year). The taxpayer must use the same measurement dates for all designated property produced during a computation period. Except in the case of a computation period that differs from the taxpayer's regular computation period by reason of a short taxable year (see paragraph (f)(1)(i) of this section), measurement dates must occur at equal intervals during each computation period that falls within a single taxable year. For any computation period that differs from the taxpayer's regular computation period by reason of a short taxable year, the measurement dates used by the taxpayer during that period must be consistent with the principles and purposes of section 263A(f). A taxpayer is permitted to modify the frequency of measurement dates from year to year.

(ii) *Measurement period.* For purposes of this section, *measurement period* means the period that begins on the first day following the preceding measurement date and that ends on the measurement date.

(iii) *Measurement dates on which accumulated production expenditures must be taken into account.* The first measurement date on which accumulated production expenditures must be taken into account with respect to a unit of designated property is the first measurement date following the beginning of the production period for the unit of designated property. The final measurement date on which accumulated production expenditures with respect to a unit of designated property must be taken into account is the first measurement date following the end of the production period for the unit of designated property. Accumulated production expenditures with respect to a unit of designated property must also be taken into account on all intervening measurement dates. See §1.263A–12 to determine when the production period begins and ends.

(iv) *More frequent measurement dates.* When in the opinion of the District Director more frequent measurement dates are necessary to determine capitalized interest consistent with the principles and purposes of section 263A(f) for a particular computation period, the District Director may require the use of more frequent measurement dates. If a significant segment of the taxpayer's production activities (the first segment) requires more frequent measurement dates than another significant segment of the taxpayer's production activities, the taxpayer may request a ruling from the Internal Revenue Service permitting, for a taxable year and all subsequent taxable years, a segregation of the two segments and, notwithstanding paragraph (f)(2)(i) of this section, the use of the more frequent measurement dates for only the first segment. The request for a ruling must be made in accordance with any applicable rules relating to submissions of ruling requests. The request must be filed on or before the due date (including extensions) of the original Federal income tax return for the first taxable year to which it will apply.

(3) *Examples*. The following examples illustrate the principles of this paragraph (f):

Example 1. Corporation X, a calendar year taxpayer, is engaged in the production of designated property during 1995. Corporation X adopts the taxable year as the computation period and quarterly measurement dates. Corporation X must identify traced debt, accumulated production expenditures, and nontraced debt at each quarterly measurement date (March 31, June 30, September 30, and December 31). Under paragraph (c)(5)(ii) of this section, Corporation X must calculate average excess expenditures for each unit of designated property by determining the amount by which accumulated production expenditures exceed traced debt for each unit at the end of each quarter and dividing the sum of these amounts by four. Under paragraph (c)(5)(iii) (C) of this section, Corporation X must calculate average nontraced debt by determining the amount of nontraced debt outstanding at the end of each quarter and dividing the sum of these amounts by four.

Example 2. Corporation X, a calendar year taxpayer, is engaged in the production of designated property during 1995. Corporation X adopts a 6-month computation period with two measurement dates within each computation period. Corporation X must identify traced debt, accumulated production expenditures, and nontraced debt at each measurement date (March 31 and June 30 for the first computation period and September 30 and December 31 for the second computation period). Under paragraph (c)(5)(ii) of this section, Corporation X must, for each computation period, calculate average excess expenditures for each unit of designated property by determining the amount by which accumulated production expenditures exceed traced debt for each unit at each measurement date during the period and dividing the sum of these amounts by two. Under paragraph (c)(5)(iii)(C) of this section, Corporation X must calculate average nontraced debt for each computation period by determining the amount of nontraced debt outstanding at each measurement date during the period and dividing the sum of these amounts by two.

Example 3. (i) Corporation X, a calendar year taxpayer, is engaged in the production of two units of designated property during 1995. Production of Unit A starts in 1994 and ends on June 20, 1995. Production of Unit B starts on April 15, 1995, but does not end until 1996. Corporation X adopts the taxable year as its computation period and does not elect under paragraph (d) of this section not to trace debt. Corporation X uses quarterly measurement dates and pays all interest on eligible debt in the quarter in which the interest is incurred. During 1995, Corporation X has two items of eligible debt. The debt and the manner in which it is used are as follows:

No.	Principal	Annual rate (percent)	Period outstanding	Use of proceeds
1	$1,000,000	9	1/01–9/01	Unit A.
2	2,000,000	11	6/01–12/31	Nontraced.

(ii) Based on the annual 9 percent rate of interest, Corporation X incurs $7,500 of interest during each month that Loan #1 is outstanding.

(iii) Accumulated production expenditures at the end of each quarter during 1995 are as follows:

Measurement date	Unit A	Unit B
March 31	$1,200,000	$0
June 30	1,800,000	500,000
Sept. 30	0	1,000,000
Dec. 31	0	1,600,000

(iv) Corporation X must first determine the amount of interest incurred on traced debt and capitalize the interest incurred on this debt (the traced debt amount). Loan #1 is allocated to Unit A on the March 31 and June 30 measurement dates. Accordingly, Loan #1 is treated as traced debt with respect to unit A for the measurement periods beginning January 1 and ending June 30. The interest incurred on Loan #1 during the period that Loan #1 is treated as traced debt must be capitalized with respect to Unit A. Thus, $45,000 ($7,500 per month for 6 months) is capitalized with respect to Unit A.

(v) Second, Corporation X must determine average excess expenditures for Unit A and Unit B. For Unit A, this amount is $250,000 ([$200,000 + $800,000 + $0 + $0] ÷ 4). For Unit B, this amount is $775,000 ([$0 + $500,000 + $1,000,000 + $1,600,000] ÷ 4).

(vi) Third, Corporation X must determine the weighted average interest rate and apply that rate to the average excess expenditures for Units A and B. The rate is equal to the total amount of interest incurred on nontraced debt (i.e., interest incurred on all eligible debt reduced by interest incurred on traced debt) divided by the average nontraced debt. The interest incurred on nontraced debt equals $143,333 ([$1,000,000 × 9% × 8⁄12] + [$2,000,000 × 11% × 7⁄12] − $45,000). The average nontraced debt equals $1,500,000 ([$0 + $2,000,000 + $2,000,000 + $2,000,000] ÷ 4). The weighted average interest rate of 9.56 percent ($143,333 ′ $1,500,000), is then applied to average excess expenditures for Units A and B. Accordingly, Corporation X capitalizes an additional $23,900 ($250,000 × 9.56%) with respect to Unit A and $74,090 ($775,000 × 9.56%) with respect to Unit B (the excess expenditure amounts).

(g) *Special rules*—(1) *Ordering rules*—(i) *Provisions preempted by section 263A(f).* Interest must be capitalized under section 263A(f) before the application of section 163(d) (regarding the investment interest limitation), section 163(j) (regarding the limitation on business interest expense), section 266 (regarding the election to capitalize carrying charges), section 469 (regarding the limitation on passive losses), and section 861 (regarding the allocation of interest to United States sources). Any interest that is capitalized under section 263A(f) is not taken into account as interest under those sections. However, in applying section 263A(f) with respect to the excess expenditure amount, the taxpayer must capitalize all interest that is neither investment interest under section 163(d), business interest expense under section 163(j), nor passive interest under section 469 before capitalizing any interest that is either investment interest, business interest expense, or passive interest. Any interest that is not required to be capitalized after the application of section 263A(f) is then taken into account as interest subject to sections 163(d), 163(j), 266, 469, and 861. If, after the application of section 263A(f), interest is deferred under sections 163(d), 163(j), 266, or 469, that interest is not subject to capitalization under section 263A(f) in any subsequent taxable year.

(ii) *Deferral provisions applied before this section.* Interest (including contingent interest) that is subject to a deferral provision described in this paragraph (g)(1)(ii) is subject to capitalization under section 263A(f) only in the taxable year in which it would be deducted if section 263A(f) did not apply. Deferral provisions include sections 163(e)(3), 267, 446, and 461, and all other deferral or limitation provisions that are not described in paragraph (g)(1)(i) of this section. In contrast to the provisions of paragraph (g)(1)(i) of this section, deferral provisions are applied before the application of section 263A(f).

(2) *Application of section 263A(f) to deferred interest*—(i) *In general.* This paragraph (g)(2) describes the time and manner of capitalizing and recovering the deferral amount. The deferral amount for any computation period equals the sum of—

(A) The amount of interest that is incurred on traced debt that is deferred during the computation period and is not deductible for the taxable year that includes the computation period because of a deferral provision described in paragraph (g)(1)(ii) of this section, and

(B) The shortfall amount described in paragraph (c)(4) of this section.

(ii) *Capitalization of deferral amount.* The rules described in paragraph (g)(2)(iii) of this section apply to the deferral amount unless the taxpayer elects under paragraph (g)(2)(iv) of this section to capitalize substitute costs.

(iii) *Deferred capitalization.* If the taxpayer does not elect under paragraph (g)(2)(iv) of this section to capitalize substitute costs, deferred interest to which the deferral amount is attributable (determined under any reasonable method) is capitalized in the year or years in which the deferred interest would have been deductible but for the application of section 263A(f) (the capitalization year). For this purpose, any interest that is deferred from a prior computation period is taken into account in subsequent capitalization years in the same order in which the interest was deferred. If a unit of designated property to which previously deferred interest relates is sold before the capitalization year, the deferred interest applicable to that unit of property is taken into account in the capitalization year and treated as if recovered from the sale of the property. If the taxpayer continues to hold, throughout the capitalization year, a unit of depreciable property to which previously deferred interest relates, the adjusted basis and applicable recovery percentages for the unit of property are redetermined for the capitalization year and subsequent years so that the increase in basis is accounted for over the remaining recovery periods beginning with the capitalization year. See *Example 2* of paragraph (g)(2)(v) of this section.

(iv) *Substitute capitalization*—(A) *General rule*. In lieu of deferred capitalization under paragraph (g)(2)(iii) of this section, the taxpayer may elect the substitute capitalization method described in this paragraph (g)(2)(iv). Under this method, the taxpayer capitalizes for the computation period in which interest is incurred and deferred (the deferral period) costs that would be deducted but for this paragraph (g)(2)(iv) (substitute costs). The taxpayer must capitalize an amount of substitute costs equal to the deferral amount for each unit of designated property, or if less, a prorata amount (determined in accordance with the principles of paragraph (c)(7)(i) of this section) of the total substitute costs that would be deducted but for this paragraph (g)(2)(iv) during the deferral period. If the entire deferral amount is capitalized pursuant to this paragraph (g)(2)(iv) in the deferral period, any interest incurred and deferred in the deferral period is neither capitalized nor deducted during the deferral period and, unless subsequently capitalized as a substitute cost under this paragraph (g)(2)(iv), is deductible in the appropriate subsequent period without regard to section 263A(f).

(B) *Capitalization of amount carried forward*. If the taxpayer has an insufficient amount of substitute costs in the deferral period, the amount by which substitute costs are insufficient with respect to each unit of designated property is a deferral amount carryforward to succeeding computation periods beginning with the next computation period. In any carryforward year, the taxpayer must capitalize an amount of substitute costs equal to the deferral amount carryforward or, if less, a prorata amount (determined in accordance with the principles of paragraph (c)(7)(i) of this section) of the total substitute costs that would be deducted during the carryforward year or years (the carryforward capitalization year) but for this paragraph (g)(2)(iv) (after applying the substitute cost method of this paragraph (g)(2)(iv) to the production of designated property in the carryforward period). If a unit of designated property to which the deferral amount carryforward relates is sold prior to the carryforward capitalization year, substitute costs applicable to that unit of property are taken into account in the carryforward capitalization year and treated as if recovered from the sale of the property. If the taxpayer continues to hold, throughout the capitalization year, a unit of depreciable property to which a deferral amount carryforward relates, the adjusted basis and applicable recovery percentages for the unit of property are redetermined for the carryforward capitalization year and subsequent years so that the increase in basis is accounted for over the remaining recovery periods beginning with the carryforward capitalization year. See *Example 2* of paragraph (g)(2)(v) of this section.

(C) *Method of accounting*. The substitute capitalization method under this paragraph (g)(2)(iv) is a method of accounting that applies to all designated property of the taxpayer. A change to or from the substitute capitalization method is a change in method of accounting requiring the consent of the Commissioner under section 446(e) and § 1.446–1(e).

(v) *Examples*. The following examples illustrate the application of the avoided cost method when interest is subject to a deferral provision:

Example 1. (i) Corporation X is a calendar year taxpayer and uses the taxable year as it computation period. During 1995, X is engaged in the construction of a warehouse which X will use in its storage business. The warehouse is completed and placed in service in December 1995. X's average excess expenditures for 1995 equal $1,000,000. Throughout 1995, X's only outstanding debt is nontraced debt of $900,000 and $1,200,000, bearing interest at 15 percent and 9 percent, respectively, per year. Of the $243,000 interest incurred during the year ([$900,000 × 15%] + [$1,200,000

× 9%] = [$135,000 + $108,000]), $75,000 is deferred under section 267(a)(2).

(ii) X must first determine the amount of interest required to be capitalized under paragraph (c)(1) of this section for 1995 (the deferral period) without applying section 267(a)(2). The weighted average interest rate is 11.6 percent ([$135,000 + $108,000] ÷ $2,100,000), and the excess expenditure amount under paragraph (c)(1) of this section is $116,000 ($1,000,000 × 11.6%). Under paragraph (c)(4) of this section, X must then determine the amount of interest that would be capitalized by applying paragraph (c)(2) of this section without regard to the amount of deferred interest. Disregarding deferred interest, the amount of interest available for capitalization is $168,000 ([$900,000 × 15%] + [$1,200,000 × 9%] − $75,000). Thus, the full excess expenditure amount ($116,000) is capitalized from interest that is not deferred under section 267(a)(2) and there is no shortfall amount.

Example 2. (i) The facts are the same as in *Example 1,* except that $140,000 of interest is deferred under section 267 (a)(2) in 1995. The taxpayer does not elect to use the substitute capitalization method. This interest is also deferred in 1996 but would be deducted in 1997 if section 263A(f) did not apply. As in *Example 1,* the excess expenditure amount is $116,000. However, the amount of interest available for capitalization after excluding the amount of deferred interest is $103,000 ([$900,000 × 15%] + [$1,200,000 × 9%] − $140,000). Thus, only $103,000 of interest is capitalized with respect to the warehouse in 1995. Since $116,000 of interest would be capitalized if section 267(a)(2) did not apply, the deferral amount determined under paragraphs (c)(2) and (g)(2)(i) of this section is $13,000 ($116,000 − $103,000), and $13,000 of deferred interest must be capitalized in the year in which it would be deducted if section 263A(f) did not apply.

(ii) The $140,000 of interest deferred under section 267(a)(2) in 1995 would be deducted in 1997 if section 263A(f) did not apply. X is therefore required to capitalize an additional $13,000 of interest with respect to the warehouse in 1997 and must redetermine its basis and recovery percentage.

(3) *Simplified inventory method*—(i) *In general.* This paragraph (g)(3) provides a simplified method of capitalizing interest expense with respect to designated property that is inventory. Under this method, the taxpayer determines beginning and ending inventory and cost of goods sold applying all other capitalization provisions, including, for example, the simplified production method of §1.263A–2(b), but without regard to the capitalization of interest with respect to inventory. The taxpayer must establish a separate capital asset, however, in an amount equal to the aggregate interest capitalization amount (as defined in paragraph (g)(3)(iii)(C) of this section). Under the simplified inventory method, increases in the aggregate interest capitalization amount from one year to the next generally are treated as reductions in interest expense, and decreases in the aggregate interest capitalization amount from one year to the next are treated as increases to cost of goods sold.

(ii) *Segmentation of inventory*—(A) *General rule.* Under the simplified inventory method, the taxpayer first separates its total ending inventory value into segments that are equal to the total ending inventory value divided by the inverse inventory turnover rate. Each inventory segment is then assigned an age starting with one year and increasing by one year for each additional segment. The inverse inventory turnover rate is determined by finding the average of beginning and ending inventory, dividing the average by the cost of goods sold for the year, and rounding the result to the nearest whole number. Beginning and ending inventory amounts are determined using total current cost of inventory for the year (rather than carrying value). Cost of goods sold, however, may be determined using either total current cost or the taxpayer's inventory method. In addition, for purposes of this paragraph (g)(3)(ii), current costs for a year (and, if applicable, the cost of goods sold for the year under the taxpayer's inventory method) are determined without regard to the capitalization of interest with respect to inventory.

(B) *Example.* The provisions of paragraph (g)(3)(ii)(A) of this section are illustrated by the following example.

Example. X, a taxpayer using the FIFO inventory method, determines that total cost of goods sold for 1995 equals $900, and the cost of both beginning and ending inventory equals $3,000. Thus, X's inverse inventory turnover rate equals 3 (3.33 rounded to the nearest whole number). Total ending inventory of $3,000 is divided into three segments of $1,000 each. One segment is treated as 3-year-old inventory, one segment is treated as 2-year-old inventory, and one segment is treated as 1-year-old inventory.

(iii) *Aggregate interest capitalization amount*—(A) *Computation period and weighted average interest rate.* If a taxpayer elects the simplified inventory method, the taxpayer must use the taxable year as its computation period and use the weighted average interest rate determined under this paragraph (g)(3)(iii)(A) in determining the aggregate interest capitalization amount defined in paragraph (g)(3)(iii)(C) of this section and in determining the amount of interest capitalized with respect to any designated property that is not inventory. Under the simplified inventory method, the taxpayer determines the weighted average interest rate in accordance with paragraph (c)(5)(iii) of this section, treating all eligible debt (other than debt traced to noninventory property in the case of a taxpayer tracing debt) as nontraced debt (i.e., without tracing debt to inventory). A taxpayer that has elected under paragraph (e) of this section to use an external rate as a substitute for the weighted average interest rate determined under paragraph (c)(5)(iii) of this section uses the rate described in paragraph (e)(1) as the weighted average interest rate.

(B) *Computation of the tentative aggregate interest capitalization amount.* The weighted average interest rate is compounded annually by the number of years assigned to a particular inventory segment to produce an interest factor (applicable interest factor) for that segment. The amounts determined by multiplying the value of each inventory segment by its applicable interest factor are then combined to produce a tentative aggregate interest capitalization amount.

(C) *Coordination with other interest capitalization computations*—(*1*) *In general.* If the tentative aggregate interest capitalization amount for a year exceeds the aggregate interest capitalization amount (defined in paragraph (g)(3)(iii)(D) of this section) as of the close of the preceding year, then, for purposes of applying the rules of paragraph (c)(7) of this section, the excess is treated as an excess expenditure amount and the inventory to which the simplified inventory method of this paragraph (g)(3) applies is treated as a single unit of designated property. If, after these modifications, no paragraph (c)(7) interest allocation is necessary (i.e., the excess expenditure amounts for all units of designated property do not exceed the total amount of interest (including deferred interest) available for capitalization), the aggregate interest capitalization amount generally equals the tentative aggregate interest capitalization amount. If, on the other hand, a paragraph (c)(7) allocation is necessary, the tentative aggregate interest capitalization amount is generally adjusted to reflect the results of that allocation (i.e., the increase in the aggregate interest capitalization amount is limited to the amount of interest allocated to inventory, reduced, however, by any substitute costs that are capitalized with respect to inventory under applicable related party rules).

(*2*) *Deferred interest.* In determining the aggregate interest capitalization amount, the tentative aggregate interest capitalization amount is adjusted (after the application of paragraph (c)(7) of this section) as appropriate to reflect the deferred interest rules of paragraph (g)(2) of this section. The tentative aggregate interest capitalization amount would be reduced, for example, by the amount of a taxpayer's deferred interest for a taxable year unless the taxpayer has elected the substitute capitalization method under paragraph (g)(2)(iv).

(*3*) *Other coordinating provisions.* The Commissioner may prescribe, by revenue ruling or revenue procedure, additional provisions to coordinate the election and use of the simplified inventory method with other interest capitalization requirements and methods. See § 601.601(d)(2)(ii)(*b*) of this chapter.

(D) *Treatment of increases or decreases in the aggregate interest capitalization amount.* Except as otherwise provided in this paragraph (g)(3)(iii)(D), increases in the aggregate interest capitalization amount from one year to the next are treated as reductions in interest expense, and decreases in the aggregate interest capitalization amount from one year to the next are treated as increases to cost of goods sold. To the extent a taxpayer capitalizes substitute costs under either applicable related party rules or the deferred interest rules in paragraph (g)(2) of this section, increases in the aggregate interest capitalization amount are treated as reductions in applicable substitute costs, rather than interest expense.

(E) *Example*. The provisions of this paragraph (g)(3)(iii) are illustrated by the following example.

Example. The facts are the same as in the example in paragraph (g)(3)(ii)(B) of this section, and, in addition, X determines that its weighted average interest rate for 1995 is 10 percent. Additionally, assume that X has no deferred interest in 1995 or 1996 and no deferral amount carryforward to either 1995 or 1996. (See paragraph (g)(2) of this section.) Also assume that no allocation is necessary under paragraph (c)(7) of this section in either 1995 or 1996. Under the rules of paragraph (g)(3)(ii) of this section, X divides ending inventory into segments of $1,000 each. One segment is 1-year old inventory, one segment is 2-year old inventory, and one segment is 3-year old inventory. Under paragraph (g)(3)(iii)(B) of this section, X must compute the applicable interest factor for each segment. The applicable interest factor for the 1-year old inventory is not compounded. The applicable interest factor for the 2-year old inventory is compounded for 1 year. The applicable interest factor for the 3-year old inventory is compounded for 2 years. The interest factor applied to the 1-year old inventory segment is .1. The interest factor applied to the 2-year old inventory segment is .21 [$(1.1 \times 1.1)-1$]. The interest factor applied to the 3-year old inventory is .331 [$(1.1 \times 1.1 \times 1.1)-1$]. Thus, the tentative aggregate interest capitalization amount for 1995 is $641 (1,000 × [.1 + .21 + .331]). Because X has no deferred interest in 1995, no deferral amount carryforward to 1995, and no required allocation under paragraph (c)(7) of this section in 1995, X's aggregate interest capitalization amount equals its $641 tentative aggregate interest capitalization amount. If, in 1996, X computes an aggregate interest capitalization amount of $750, the $109 increase in the amount from 1995 to 1996 would be treated as a reduction in interest expense for 1996.

(iv) *Method of accounting*. The simplified inventory method is a method of accounting that must be elected for and applied to all inventory within a single trade or business of the taxpayer (within the meaning of section 446(d) and §1.446–1(d)). This method may be elected only if the inventory in that trade or business consists only of designated property and only if the taxpayer's inverse inventory turnover rate for that trade or business (as defined in paragraph (g)(3)(ii)(A) of this section) is greater than or equal to one. A change from or to the simplified inventory method is a change in method of accounting requiring the consent of the Commissioner under section 446(e) and §1.446–(1)(e).

(4) *Financial accounting method disregarded*. The avoided cost method is applied under this section without regard to any financial or regulatory accounting principles for the capitalization of interest. For example, this section determines the amount of interest that must be capitalized without regard to Financial Accounting Standards Board (FASB) Statement Nos. 34, 71, and 90, issued by the Financial Accounting Standards Board, Norwalk, CT 06856–5116. Similarly, taxpayers are not permitted to net interest income and interest expense in determining the amount of interest that must be capitalized under this section with respect to certain restricted tax-exempt borrowings even though netting is permitted under FASB Statement No. 62.

(5) *Treatment of intercompany transactions*—(i) *General rule*. If interest capitalized under section 263A(f) by a member of a consolidated group (within the meaning of §1.1502–1(h)) with respect to a unit of designated property is attributable to a loan from another member of the group (the lending member), the intercompany transaction provisions of the consolidated return regulations do not apply to the lending member's interest income with respect to that loan, except as provided in paragraph (g)(5)(ii) of this section. For this purpose, the capitalized interest expense that is attributable to a loan from another member is determined under any method that reasonably reflects the principles of the avoided cost method, including the traced and nontraced concepts. For purposes of this paragraph (g)(5)(i) and paragraph (g)(5)(ii) of this section, in order for a method to be considered reasonable it must be consistently applied.

(ii) *Special rule for consolidated group with limited outside borrowing*. If, for any year, the aggregate amount of interest income described in paragraph (g)(5)(i) of this section for all members of the group with respect to all units of designated property exceeds the total amount of interest that is deductible for that year by all members of the group with respect to debt of a member owed to nonmembers (group deductible interest) after applying section 263A(f), the intercompany transaction provisions of the consolidated return regulations are applied to the excess, and the amount of interest income that must be taken into account by the group under paragraph (g)(5)(i) of this section is limited to the amount of the group deductible interest. The amount to which the intercompany transaction provisions of the consolidated return regulations apply by reason of this paragraph (g)(5)(ii) is allocated among the lending members under any method that reasonably reflects each member's share of interest income described in paragraph (g)(5)(i) of this section. If a lending member has interest income that is attributable to more than one unit of designated property, the amount to which the intercompany transaction provisions of the consolidated return regulations apply by reason of this paragraph (g)(5)(ii) with respect to the member is allocated among the units in accordance with the principles of paragraph (c)(7)(i) of this section.

(iii) *Example.* The provisions of paragraph (g)(5)(ii) of this section are illustrated by the following example.

Example. (i) P and S1 are the members of a consolidated group. In 1995, S1 begins and completes the construction of a shopping center and is required to capitalize interest with respect to the construction. S1's average excess expenditures for 1995 are $5,000,000. Throughout 1995, S1's only borrowings include a $6,000,000 loan from P bearing interest at an annual rate of 10 percent ($600,000 per year). Under the avoided cost method, S1 is required to capitalize interest in the amount of $500,000 ([$600,000 ÷ $6,000,000 × 5,000,000).

(ii) P's only borrowing from unrelated lenders is a $2,000,000 loan bearing interest at an annual rate of 10 percent ($200,000 per year). Under the principles of paragraph (g)(5)(ii) of this section, because the aggregate amount of interest described in paragraph (g)(5)(i) of this section ($500,000) exceeds the aggregate amount of currently deductible interest of the group ($200,000), the intercompany transaction provisions of the consolidated return regulations apply to the excess of $300,000 and the amount of P's interest income that is subject to current inclusion by reason of paragraph (g)(5)(i) of this section is limited to $200,000.

(6) *Notional principal contracts and other derivatives.* [Reserved]

(7) *15-day repayment rule.* A taxpayer may elect to treat any eligible debt that is repaid within the 15-day period immediately preceding a quarterly measurement date as outstanding as of that measurement date for purposes of determining traced debt, average nontraced debt, and the weighted average interest rate. This election may be made or discontinued for any computation period and is not a method of accounting.

[T.D. 8584, 59 FR 67200, Dec. 29, 1994; 60 FR 16574, Mar. 31, 1995, as amended by T.D. 8584, 60 FR 47053, Sept. 11, 1995; T.D. 9129, 69 FR 29067, May 20, 2004; T.D. 9179, 70 FR 8730, Feb. 23, 2005; T.D. 9905, 85 FR 56832, Sept. 14, 2020; T.D. 9942, 86 FR 268, Jan. 5, 2021]

§ 1.263A–10 Unit of property.

(a) *In general.* The unit of property as defined in this section is used as the basis to determine accumulated production expenditures under § 1.263A–11 and the beginning and end of the production period under § 1.263A–12. Whether property is 1-year or 2-year property under § 1.263A–8(b)(1)(ii) is also determined separately with respect to each unit of property as defined in this section.

(b) *Units of real property*—(1) *In general.* A unit of real property includes any components of real property owned by the taxpayer or a related person that are functionally interdependent and an allocable share of any common feature owned by the taxpayer or a related person that is real property even though the common feature does not meet the functional interdependence test. When the production period begins with respect to any functionally interdependent component or any common feature of the unit of real property, the production period has begun for the entire unit of real property. See, however, paragraph (b)(5) of this section for rules under which the costs of a common feature or benefitted property are excluded from accumulated production expenditures for one or more measurement dates. The portion of land included in a unit of real property includes land on which real property (including a common feature) included in the unit is situated, land subject to setback restrictions with respect to such property, and any other contiguous portion of the tract of land other than land that the taxpayer holds for a purpose unrelated to the unit being produced (e.g., investment purposes, personal use purposes, or specified future development as a separate unit of real property).

(2) *Functional interdependence.* Components of real property produced by, or for, the taxpayer, for use by the taxpayer or a related person are functionally interdependent if the placing in service of one component is dependent on the placing in service of the other component by the taxpayer or a related person. In the case of property produced for sale, components of real property are functionally interdependent if they are customarily sold as a single unit. For example, the real property components of a single-family house (e.g., the land, foundation, and walls) are functionally interdependent. In contrast, components of real property that are expected to be separately placed in service or held for resale are not functionally interdependent. Thus, dwelling units within a multi-unit building that are separately placed in service or sold (within the meaning of §1.263A–12(d)(1)) are treated as functionally independent of any other units, even though the units are located in the same building.

(3) *Common features.* For purposes of this section, a common feature generally includes any real property (as defined in §1.263A–8(c)) that benefits real property produced by, or for, the taxpayer or a related person, and that is not separately held for the production of income. A common feature need not be physically contiguous to the real property that it benefits. Examples of common features include streets, sidewalks, playgrounds, clubhouses, tennis courts, sewer lines, and cables that are not held for the production of income separately from the units of real property that they benefit.

(4) *Allocation of costs to unit.* Except as provided in paragraph (b)(5) of this section, the accumulated production expenditures for a unit of real property include, in all cases, the costs that directly benefit, or are incurred by reason of the production of, the unit of real property. Accumulated production expenditures also include the adjusted basis of property used to produce the unit of real property. The accumulated costs of a common feature or land that benefits more than one unit of real property, or that benefits designated property and property other than designated property, is apportioned among the units of designated property, or among the designated property and property other than designated property, in determining accumulated production expenditures. The apportionment of the accumulated costs of the common feature (allocable share) or land (attributable land costs) generally may be made using any method that is applied on a consistent basis and that reasonably reflects the benefits provided. For example, an apportionment based on relative costs to be incurred, relative space to be occupied, or relative fair market values may be reasonable.

(5) *Treatment of costs when a common feature is included in a unit of real property*—(i) *General rule.* Except as provided in this paragraph (b)(5), the accumulated production expenditures of a unit of real property include the costs of functionally interdependent components (benefitted property) and an allocable share of the cost of common features throughout the entire production period of the unit. See §1.263A–12, relating to the production period of a unit of property.

(ii) *Production activity not undertaken on benefitted property*—(A) *Direct production activity not undertaken—(1) In general.* The costs of land attributable to a benefitted property may be treated as not included in accumulated production expenditures for a unit of real property for measurement dates prior to the first date a production activity (direct production activity), including the clearing and grading of land, has been undertaken with respect to the land attributable to the benefitted property. Thus, the costs of land attributable to a benefitted property (as opposed to land attributable to the common features) with respect to which no direct production activities have been undertaken may be treated as not included in the accumulated production expenditures of a unit of real property even though a production activity has begun on a common feature allocable to the unit.

(*2*) *Land attributable to a benefitted property.* For purposes of this paragraph (b)(5)(ii), land attributable to a benefitted property includes all land in the unit of real property that includes the benefitted property other than land for a common feature. (Thus, land attributable to a benefitted property does not include land attributable to a common feature.)

(B) *Suspension of direct production activity after clearing and grading undertaken—(1) General rule.* This paragraph (b)(5)(ii)(B) may be used to determine the accumulated production expenditures for a unit of real property, if the only production activity with respect to a benefitted property has been clearing and grading and no further direct production activity is undertaken with respect to the benefitted property for at least 120 consecutive days (i.e., direct production activity has ceased). Under this paragraph (b)(5)(ii)(B), the accumulated production expenditures attributable to a benefitted property qualifying under this paragraph (b)(5)(ii)(B) may be excluded from the accumulated production expenditures of the unit of real property even though production continues on a common feature allocable to the unit. For purposes of this paragraph (b)(5)(ii)(B), production activity is considered to occur during any time which would not qualify as a cessation of production activities under the suspension period rules of §1.263A–12(g).

(*2*) *Accumulated production expenditures.* If this paragraph (b)(5)(ii)(B) applies, accumulated production expenditures attributable to the benefitted property of the unit of real property may be treated as not included in the accumulated production expenditures for the unit starting with the first measurement period beginning after the first day of the 120 consecutive day period, but must be included in the accumulated production expenditures for the unit beginning in the measurement period in which direct production activity has resumed on the benefitted property. Accumulated production expenditures with respect to common features allocable to the unit of real property may not be excluded under this paragraph (b)(5)(ii)(B).

(iii) *Common feature placed in service before the end of production of a benefitted property.* To the extent that a common feature with respect to which all production activities to be undertaken by, or for, a taxpayer or a related person are completed is placed in service before the end of the production period of a unit that includes an allocable share of the costs of the common feature, the costs of the common feature are not treated as included in accumulated production expenditures of the unit for measurement periods beginning after the date the common feature is placed in service.

(iv) *Benefitted property sold before production completed on common feature.* If a unit of real property is sold before common features included in the unit are completed, the production period of the unit ends on the date of sale. Thus, common feature costs actually incurred and properly allocable to the unit as of the date of sale are excluded from accumulated production expenditures for measurement periods beginning after the date of sale. Common feature costs properly allocable to the unit and actually incurred after the sale are not taken into account in determining accumulated production expenditures.

(v) *Benefitted property placed in service before production completed on common feature.* Where production activities remain to be undertaken on a common feature allocable to a unit of real property that includes benefitted property, the costs of the benefitted property are not treated as included in the accumulated production expenditures for the unit for measurement periods beginning after the date the benefitted property is placed in service and all production activities reasonably expected to be undertaken by, or for, the taxpayer or a related person with respect to the benefitted property are completed.

(6) *Examples*. The principles of paragraph (b) of this section are illustrated by the following examples:

Example 1. B, an individual, is in the trade or business of constructing custom-built houses for sale. B owns a 10-acre tract upon which B intends to build four houses on 2-acre lots. In addition, on the remaining 2 acres B plans to construct a perimeter road that benefits the four houses and is not held for the production of income separately from the sale of the houses. In 1995, B begins constructing the perimeter road and clears the land for one house. Under the principles of paragraph (b)(1) of this section, each planned house (including attributable land) is part of a separate unit of real property (house unit). Under the principles of paragraph (b)(3) of this section, the perimeter road (including attributable land) constitutes a common feature with respect to each planned house (i.e., benefitted property). In accordance with paragraph (b)(1), the production period for all four house units begins when production commences on the perimeter road in 1995. In addition, under the principles of paragraph (b)(4) of this section, the accumulated production expenditures for the four house units include the allocable costs of the road. In addition, for the house with respect to which B has cleared the land, the accumulated production expenditures for the house unit include the land costs attributable to the house. See paragraph (b)(5)(i) of this section. However, the accumulated production expenditures for each of the three house units that include a house for which B has not yet undertaken a direct production activity do not include the land costs attributable to the house. See paragraph (b)(5)(ii) of this section.

Example 2. Assume the same facts as *Example 1*, except that B undertakes no further direct production activity with respect to the house for which the land was cleared for a period of at least 120 days but continues constructing the perimeter road during this period. In accordance with paragraph (b)(5)(ii)(B) of this section, B may exclude the accumulated production expenditures attributable to the benefitted property from the accumulated production expenditures of the house unit starting with the first measurement period that begins after the first day of the 120 consecutive day period. B must include the accumulated production expenditures attributable to the benefitted property in the accumulated production expenditures for the house unit beginning with the measurement period in which direct production resumes on the benefitted property. The house unit will continue to include the accumulated production expenditures attributable to the perimeter road during the period in which direct production activity was suspended on the benefitted property.

Example 3. (i) D, a corporation, is in the trade or business of developing commercial real property. D owns a 20-acre tract upon which D intends to build a shopping center with 150 stores. D intends to lease the stores. D will also provide on the 20 acres a 1500-car parking lot, which is not held by D for the production of income separately from the stores in the shopping center. Additionally, D will not produce any other common features as part of the project. D intends to complete the shopping center in phases and expects that each store will be placed in service independently of any other store.

(ii) Under paragraphs (b)(1) and (b)(2) of this section, each store (including attributable land) is part of a separate unit of real property (store unit). The 1500-car parking lot is a common feature benefitting each store, and D must include an allocable share of the parking lots in each store unit. See paragraphs (b)(1) and (b)(3). In accordance with paragraph (b)(5)(i), D includes in the accumulated production expenditures for each store unit during each store unit's production period: the costs capitalized with respect to the store (including attributable land costs in accordance with paragraph (b)(5) of this section) and an allocable share of the parking lot costs (including attributable land costs in accordance with paragraph (b)(5) of this section). Under paragraph (b)(4), the portion of the parking lot costs that is included in the accumulated production expenditures of a store unit is determined using a reasonable method of allocation.

Example 4. X, a real estate developer, begins a project to construct a condominium building and a convenience store for the benefit of the condominium. X intends to separately lease the convenience store. Because the convenience store is held for the production of income separately from the condominium units that it benefits, the convenience store is not a common feature with respect to the condominium building. Instead, the convenience store is a separate unit of property with a separate production period and for which a separate determination of accumulated production expenditures must be made.

Example 5. (i) In 1995, X, a real estate developer, begins a project consisting of a condominium building and a common swimming pool that is not held for the production of income separately from the condominium sales. The condominium building consists of 10 stories, and each story is occupied by a single condominium. Production of the swimming pool begins in January. No direct production activity is undertaken on any condominium until September, when direct production activity commences on each condominium. On December 31, 1995, 1 condominium that was completed in December has been sold, 3 condominiums that were completed in December have not been sold, and 6 condominiums are only partially complete; additionally, the swimming pool is completed. X is a calendar year taxpayer that uses a full taxable year as the computation period, and quarterly measurement dates.

(ii) Under paragraphs (b)(1) and (b)(2) of this section, each condominium (including attributable land) is part of a separate unit of real property. Under the principles of paragraph (b)(3) of this section, the swimming pool is a common feature with respect to each condominium and under paragraph (b)(4) of this section the cost of the swimming pool is allocated equally among the condominiums.

(iii) Under paragraph (b)(1) of this section, the production period of each of the 10 condominium units begins in January when production of the swimming pool begins. On X's March 31, 1995, and June 30, 1995, measurement dates, the accumulated production expenditures for each condominium unit include the allocable costs of the swimming pool, but not the land costs attributable to the condominium because no direct production activity has been undertaken on the condominium. See paragraph (b)(5)(ii)(A) of this section. On X's September 30, 1995, and December 31, 1995, measurement dates, the accumulated production expenditures for each unit include the allocable costs of the swimming pool, and the costs of the condominium (including attributable land costs) because a direct production activity has commenced on the condominium. See paragraph (b)(5)(i) of this section.

(iv) The production period for the condominium unit that includes the condominium that is sold as of the end of 1995 ends on the date the condominium is sold. See paragraph (b)(5)(iv) of this section. The production period of each unit that is ready to be held for sale ends when all production activities have been completed on the unit, in this case on December 31, 1995, the date that the swimming pool included in the unit is completed. See §1.263A–12(d). Accordingly, interest capitalization ceases for each such unit that is sold or ready to be held for sale as of the end of 1995 (including each unit's allocable share of the completed swimming pool).

(v) The production periods for the condominium units that include the condominiums that are only partially complete at the end of 1995 continue after 1995. The accumulated production expenditures for each partially completed condominium unit continue to include the costs of the condominium (including attributable land costs) in addition to the costs of an allocable share of the completed swimming pool (including attributable land costs).

Example 6. Assume the same facts as in *Example 5*, except that the swimming pool is only partially complete as of the end of 1995. Under these facts, X capitalizes no interest during 1996 for the 1 unit that includes the condominium sold during 1995 (including the costs of the allocable share of the swimming pool). See paragraph (b)(5)(iv) of this section. However, with respect to the 6 condominiums that are partially complete and the 3 condominiums that are completed but unsold, interest capitalization continues after the end of 1995. The accumulated production expenditures for each of these 9 units include the costs of an allocable share of the swimming pool. See paragraph (b)(5)(i) of this section. In determining the costs of an allocable share of the swimming pool included in the accumulated production expenditures for each of the 9 units, X includes all costs of the swimming pool properly allocable to each unit, including those cost incurred as of the date of the sale of unit 1 that may have been used under applicable administrative procedures (e.g., Rev. Proc. 92–29, 1992–1 C.B. 748) in determining the basis of unit 1 solely for purposes of computing gain or loss on the sale of unit 1. See §601.601(d)(2)(ii)(*b*) of this chapter.

Example 7. (i) Assume the same facts as in *Example 5*, except that X intends to lease rather than sell the condominiums and the completed swimming pool is placed in service for depreciation purposes on December 31, 1995. Additionally, assume that all 10 condominiums are partially completed at the end of 1995.

(ii) Under these facts, because the swimming pool is a common feature that is placed in service separately from the condominiums that it benefits, under paragraph (b)(5)(iii) of this section, the accumulated production expenditures of each of the condominium units do not include the costs of the allocable share of the swimming pool after 1995.

(c) *Units of tangible personal property.* Components of tangible personal property are a single unit of property if the components are functionally interdependent. Components of tangible personal property that are produced by, or for, the taxpayer, for use by the taxpayer or a related person, are functionally interdependent if the placing in service of one component is dependent on the placing in service of the other component by the taxpayer or a related person. In the case of tangible personal property produced for sale, components of tangible personal property are functionally interdependent if they are customarily sold as a single unit. For example, if an aircraft manufacturer customarily sells completely assembled aircraft, the unit of property includes all components of a completely assembled aircraft. If the manufacturer also customarily sells aircraft engines separately, any engines that are reasonably expected to be sold separately are treated as single units of property.

(d) *Treatment of installations.* If the taxpayer produces or is treated as producing any property that is installed on or in other property, the production activity and installation activity relating to each unit of property generally are not aggregated for purposes of this section. However, if the taxpayer is treated as producing and installing any property for use by the taxpayer or a related person or if the taxpayer enters into a contract requiring the taxpayer to install property for use by a customer, the production activity and installation activity are aggregated for purposes of this section.

[T.D. 8584, 59 FR 67207, Dec. 29, 1994; 60 FR 16574, 16575, Mar. 31, 1995]

§ 1.263A–11 Accumulated production expenditures.

(a) *General rule. Accumulated production expenditures* generally means the cumulative amount of direct and indirect costs described in section 263A(a) that are required to be capitalized with respect to the unit of property (as defined in § 1.263A–10), including interest capitalized in prior computation periods, plus the adjusted bases of any assets described in paragraph (d) of this section that are used to produce the unit of property during the period of their use. Accumulated production expenditures may also include the basis of any property received by the taxpayer in a nontaxable transaction.

(b) *When costs are first taken into account*—(1) *In general.* Except as provided in paragraph (c)(1) of this section, costs are taken into account in the computation of accumulated production expenditures at the time and to the extent they would otherwise be taken into account under the taxpayer's method of accounting (e.g., after applying the requirements of section 461, including the economic performance requirement of section 461(h)). Costs that have been incurred and capitalized with respect to a unit of property prior to the beginning of the production period are taken into account as accumulated production expenditures beginning on the date on which the production period of the property begins (as defined in § 1.263A–12(c)). Thus, for example, the cost of raw land acquired for development, the cost of a leasehold in mineral properties acquired for development, and the capitalized cost of planning and design activities are taken into account as accumulated production expenditures beginning on the first day of the production period. For purposes of determining accumulated production expenditures on any measurement date during a computation period, the interest required to be capitalized for the computation period is deemed to be capitalized on the day immediately following the end of the computation period. For any subsequent measurement dates and computation periods, that interest is included in accumulated production expenditures. If the cost of land or common features is allocated among planned units of property that are completed in phases, any portion of the cost properly allocated to completed units is not reallocated to any incomplete units of property.

(2) *Dedication rule for materials and supplies.* The costs of raw materials, supplies, or similar items are taken into account as accumulated production expenditures when they are incurred and dedicated to production of a unit of property. *Dedicated* means the first date on which the raw materials, supplies, or similar items are specifically associated with the production of any unit of property, including by record, assignment to the specific job site, or physical incorporation. In contrast, in the case of a component or subassembly that is reasonably expected to be become a part of (e.g., be incorporated into) any unit of property, costs incurred (including dedicated raw materials) for the component or subassembly are taken into account as accumulated production expenditures during the production of any portion of the component or subassembly and prior to its connection with (e.g., incorporation into) any specific unit of property. For purposes of the preceding

sentence, components and subassemblies must be aggregated at each measurement date in a reasonable manner that is consistent with the purposes of section 263A(f).

(c) *Property produced under a contract*—(1) *Customer.* If a unit of property produced under a contract is designated property under §1.263A–8(d)(2)(i) with respect to the customer, the customer's accumulated production expenditures include any payments under the contract that represent part of the purchase price of the unit of designated property or, to the extent costs are incurred earlier than payments are made (determined on a cumulative basis for each unit of designated property), any part of such price for which the requirements of section 461 have been satisfied. The customer has made a payment under this section if the transaction would be considered a payment by a taxpayer using the cash receipts and disbursements method of accounting. The customer's accumulated production expenditures also include any other costs incurred by the customer, such as interest, or any other direct or indirect costs that are required to be capitalized under section 263A(a) and the regulations thereunder with respect to the production of the unit of designated property.

(2) *Contractor.* If a unit of property produced under a contract is designated property under §1.263A–8(d)(2)(ii) with respect to the contractor, the contractor must treat the cumulative amount of payments made by the customer under the contract attributable to the unit of property as a reduction in the contractor's accumulated production expenditures. The customer has made a payment under this section if the transaction would be considered a payment by a taxpayer using the cash receipts and disbursements method of accounting.

(d) *Property used to produce designated property*—(1) *In general.* Accumulated production expenditures include the adjusted bases (or portion thereof) of any equipment, facilities, or other similar assets, used in a reasonably proximate manner for the production of a unit of designated property during any measurement period in which the asset is so used. Examples of assets used in a reasonably proximate manner include machinery and equipment used directly or indirectly in the production process, such as assembly-line structures, cranes, bulldozers, and buildings. A taxpayer apportions the adjusted basis of an asset used in the production of more than one unit of designated property in a measurement period among such units of designated property using reasonable criteria corresponding to the use of the asset, such as machine hours, mileage, or units of production. If an asset used in a reasonably proximate manner for the production of a unit of designated property is temporarily idle (within the meaning of §1.263A–1(e)(3)(iii)(E)) for an entire measurement period, the adjusted basis of the asset is excluded from the accumulated production expenditures for the unit during that measurement period. Notwithstanding this paragraph (d)(1), the portion of the depreciation allowance for equipment, facilities, or any other asset that is capitalized with respect to a unit of designated property in accordance with §1.263A–1(e)(3)(ii)(I) is included in accumulated production expenditures without regard to the extent of use under this paragraph (d)(1) (i.e., without regard to whether the asset is used in a reasonably proximate manner for the production of the unit of designated property).

(2) *Example.* The following example illustrates how the basis of an asset is allocated on the basis of time:

Example. In 1995, X uses a bulldozer exclusively to clear the land on several adjacent real estate development projects, A, B, and C. A, B, and C are treated as separate units of property under the principles of §1.263A–10. X decides to allocate the basis of the bulldozer among the three projects on the basis of time. At the end of the first quarter of 1995, the production period has commenced for all three projects. The bulldozer was operated for 30 hours on project A, 80 hours on project B, and 10 hours on project C, for a total of 120 hours for the entire period. For purposes of determining accumulated production expenditures as of the end of the first quarter, ¼ of the adjusted basis of the bulldozer is allocated to project A, ⅔ to project B, and $1/12$ to project C. Nonworking hours, regularly scheduled nonworking days, or other periods in which the bulldozer is temporarily idle (within the meaning of

§ 1.263A–1(e)(3)(iii)(E)) during the measurement period are not taken into account in allocating the basis of the bulldozer.

(3) *Excluded equipment and facilities.* The adjusted bases of equipment, facilities, or other assets that are not used in a reasonably proximate manner to produce a unit of property are not included in the computation of accumulated production expenditures. For example, the adjusted bases of equipment and facilities, including buildings and other structures, used in service departments performing administrative, purchasing, personnel, legal, accounting, or similar functions, are excluded from the computation of accumulated production expenditures under this paragraph (d)(3).

(e) *Improvements*—(1) *General rule.* If an improvement constitutes the production of designated property under $1.263A–8(d)(3), accumulated production expenditures with respect to the improvement consist of—

(i) All direct and indirect costs required to be capitalized with respect to the improvement,

(ii) In the case of an improvement to a unit of real property—

(A) An allocable portion of the cost of land, and

(B) For any measurement period, the adjusted basis of any existing structure, common feature, or other property that is not placed in service or must be temporarily withdrawn from service to complete the improvement (associated property) during any part of the measurement period if the associated property directly benefits the property being improved, the associated property directly benefits from the improvement, or the improvement was incurred by reason of the associated property. See, however, the de minimis rule under paragraph (e)(2) of this section that applies in the case of associated property.

(iii) In the case of an improvement to a unit of tangible personal property, the adjusted basis of the asset being improved if that asset either is not placed in service or must be temporarily withdrawn from service to complete the improvement.

(2) *De minimis rule.* For purposes of paragraph (e)(1)(ii) of this section, the total costs of all associated property for an improvement unit (associated property costs) are excluded from the accumulated production expenditures for the improvement unit during its production period if, on the date the production period of the unit begins, the taxpayer reasonably expects that at no time during the production period of the unit will the accumulated production expenditures for the unit, determined without regard to the associated property costs, exceed 5 percent of the associated property costs.

(f) *Mid-production purchases.* If a taxpayer purchases a unit of property for further production, the taxpayer's accumulated production expenditures include the full purchase price of the property plus, in accordance with the principles of paragraph (e) of this section, additional direct and indirect costs incurred by the taxpayer.

(g) *Related person costs.* The activities of a related person are taken into account in applying the classification thresholds under § 1.263A–8(b)(1)(ii)(B) and (C), and in determining the production period of a unit of designated property under § 1.263A–12. However, only those costs incurred by the taxpayer are taken into account in the taxpayer's accumulated production expenditures under this section because the related person includes its own capitalized costs in the related person's accumulated production expenditures with respect to any unit of designated property upon which the parties engage in mutual production activities. For purposes of the preceding sentence, the accumulated production expenditures of any property transferred to a taxpayer in a nontaxable transaction are treated as accumulated production expenditures incurred by the taxpayer.

(h) *Installation.* If the taxpayer installs property that is purchased by the taxpayer, accumulated production expenditures include the cost of the property that is installed in addition to the direct and indirect costs of installation.

[T.D. 8584, 59 FR 67210, Dec. 29, 1994; 60 FR 16575, Mar. 31, 1995]

§ 1.263A–12 Production period.

(a) *In general.* Capitalization of interest is required under § 1.263A–9 for computation periods (within the meaning of § 1.263A–9(f)(1)) that include the production period of a unit of designated property. In contrast, section 263A(a) requires the capitalization of all other direct or indirect costs, such as insurance, taxes, and storage, that directly benefit or are incurred by reason of the production of property without regard to whether they are incurred during a period in which production activity occurs.

(b) *Related person activities.* Activities performed and costs incurred by a person related to the taxpayer that directly benefit or are incurred by reason of the taxpayer's production of designated property are taken into account in determining the taxpayer's production period (regardless of whether the related person is performing only a service or is producing a subassembly or component that the related person is required to treat as an item of designated property). These activities and the related person's costs are also taken into account in determining whether tangible personal property produced by the taxpayer is 1-year or 2-year property under § 1.263A–8(b)(1)(ii) (B) and (C).

(c) *Beginning of production period*—(1) *In general.* A separate production period is determined for each unit of property defined in § 1.263A–10. The production period begins on the date that production of the unit of property begins.

(2) *Real property.* The production period of a unit of real property begins on the first date that any physical production activity (as defined in paragraph (e) of this section) is performed with respect to a unit of real property. See § 1.263A–10(b)(1). The production period of a unit of real property produced under a contract begins for the contractor on the date the contractor begins physical production activity on the property. The production period of a unit of real property produced under a contract begins for the customer on the date either the customer or the contractor begins physical production activity on the property.

(3) *Tangible personal property.* The production period of a unit of tangible personal property begins on the first date by which the taxpayer's accumulated production expenditures, including planning and design expenditures, are at least 5 percent of the taxpayer's total estimated accumulated production expenditures for the property unit. Thus, the beginning of the production period is determined without regard to whether physical production activity has commenced. The production period of a unit of tangible personal property produced under a contract begins for the contractor when the contractor's accumulated production expenditures, without any reduction for payments from the customer, are at least 5 percent of the contractor's total estimated accumulated production expenditures. The production period for a unit of tangible personal property produced under a contract begins for the customer when the customer's accumulated production expenditures are at least 5 percent of the customer's total estimated accumulated production expenditures.

(d) *End of production period*—(1) *In general.* The production period for a unit of property produced for self use ends on the date that the unit is placed in service and all production activities reasonably expected to be undertaken by, or for, the taxpayer or a related person are completed. The production period for a unit of property produced for sale ends on the date that the unit is ready to be held for sale and all production activities reasonably expected to be undertaken by, or for, the taxpayer or a related person are completed. See, however, § 1.263A–10(b)(5)(iv) providing an exception for common features in the case of a benefitted property that is sold. In the case of a unit of property produced under a contract, the production period for the customer ends when the property is placed in service by the customer and all production activities reasonably expected to be undertaken are complete (i.e., generally, no earlier than when the customer takes delivery). In the case of property that is customarily aged (such as tobacco, wine, or whiskey) before it is sold, the production period includes the aging period.

(2) *Special rules.* The production period does not end for a unit of property prior to the completion of physical production activities by the taxpayer even though the property is held for sale or

lease, since all production activities reasonably expected to be undertaken by the taxpayer with respect to such property have not in fact been completed. See, however, §1.263A–10(b)(5) regarding separation of certain common features.

(3) *Sequential production or delivery.* The production period ends with respect to each unit of property (as defined in §1.263A–10) and its associated accumulated production expenditures as the unit of property is completed within the meaning of paragraph (d)(1) of this section, without regard to the production activities or costs of any other units of property. Thus, for example, in the case of separate apartments in a multi-unit building, each of which is a separate unit of property within the meaning of §1.263A–10, the production period ends for each separate apartment when it is ready to be held for sale or placed in service within the meaning of paragraph (d)(1) of this section. In the case of a single unit of property that merely undergoes separate and distinct stages of production, the production period ends at the same time (i.e., when all separate stages of production are completed with respect to the entire amount of accumulated production expenditures for the property).

(4) *Examples.* The provisions of paragraph (d) of this section are illustrated by the following examples:

Example 1. E is engaged in the original construction of a high-rise office building with two wings. At the end of 1995, Wing #1, but not Wing #2, is placed in service. Moreover, at the end of 1995, all production activities reasonably expected to be undertaken on Wing #1 are completed. In accordance with §1.263A–10(b)(1), Wing #1 and Wing #2 are separate units of designated property. E may stop capitalizing interest on Wing #1 but not on Wing #2.

Example 2. F is in the business of constructing finished houses. F generally paints and finishes the interior of the house, although this does not occur until a potential buyer is located. Because F reasonably expects to undertake production activity (painting and finishing), the production period of each house does not end until these activities are completed.

(e) *Physical production activities*—(1) *In general.* The term *physical production activities* includes any physical activity that constitutes production within the meaning of §1.263A–8(d)(1). The production period begins and interest must be capitalized with respect to real property if any physical production activities are undertaken, whether alone or in preparation for the construction of buildings or other structures, or with respect to the improvement of existing structures. For example, the clearing of raw land constitutes the production of designated property, even if only cleared prior to resale.

(2) *Illustrations.* The following is a partial list of activities any one of which constitutes a physical production activity with respect to the production of real property:

(i) Clearing, grading, or excavating of raw land;

(ii) Demolishing a building or gutting a standing building;

(iii) Engaging in the construction of infrastructure, such as roads, sewers, sidewalks, cables, and wiring;

(iv) Undertaking structural, mechanical, or electrical activities with respect to a building or other structure; or

(v) Engaging in landscaping activities.

(f) *Activities not considered physical production.* The activities described in paragraphs (f)(1) and (f)(2) of this section are not considered physical production activities:

(1) *Planning and design.* Soil testing, preparing architectural blueprints or models, or obtaining building permits.

(2) *Incidental repairs.* Physical activities of an incidental nature that may be treated as repairs under §1.162–4.

(g) *Suspension of production period*—(1) *In general.* If production activities related to the production of a unit of designated property cease for at least 120 consecutive days (cessation period), a taxpayer may suspend the capitalization of interest with respect to the unit of designated property starting with the first measurement period that begins after the first day in which production ceases. The taxpayer must resume the capitalization of interest with respect to a unit beginning with the measurement period during which production activities resume. In addition, production activities are not considered to have ceased if they cease because of circumstances inherent in the production process, such as normal adverse weather conditions, scheduled plant shutdowns, or delays due to design or construction flaws, the obtaining of a permit or license, or the settlement of groundfill to construct property. Interest incurred on debt that is traced debt with respect to a unit of designated property during the suspension period is subject to capitalization with respect to the production of other units of designated property as interest on nontraced debt. See § 1.263A–9(c)(5)(i) of this section. For applications of the avoided cost method after the end of the suspension period, the accumulated production expenditures for the unit include the balance of accumulated production expenditures as of the beginning of the suspension period, plus any additional capitalized costs incurred during the suspension period. No further suspension of interest capitalization may occur unless the requirements for a new suspension period are satisfied.

(2) *Special rule.* If a cessation period spans more than one taxable year, the taxpayer may suspend the capitalization of interest with respect to a unit beginning with the first measurement period of the taxable year in which the 120-day period is satisfied.

(3) *Method of accounting.* An election to suspend interest capitalization under paragraph (g)(1) of this section is a method of accounting that must be consistently applied to all units that satisfy the requirements of paragraph (g)(1) of this section. However, the special rule in paragraph (g)(2) of this section is applied on an annual basis to all units of an electing taxpayer that satisfy the requirements of paragraph (g)(2) of this section.

(4) *Example.* The provisions of paragraph (g)(1) of this section are illustrated by the following example.

Example. (i) D, a calendar-year taxpayer, began production of a residential housing development on January 1, 1995. D, in applying the avoided cost method, chose a taxable year computation period and quarterly measurement dates. On April 10, 1995, all production activities ceased with respect to the units in the development until December 1, 1996. The cessation, which occurred for a period of at least 120 consecutive days, was not attributable to circumstances inherent in the production process. With respect to the units in the development, D incurred production expenditures of $2,000,000 from January 1, 1995 through April 10, 1995. D incurred interest of $100,000 on traced debt with respect to the units for the period beginning January 1, 1995, and ending June 30, 1995. D did not incur any production expenditures for the more than 20-month cessation beginning April 10, 1995, and ending December 1, 1996, but incurred $200,000 of production expenditures from December 1, 1996, through December 31, 1996.

(ii) D is required to capitalize the $100,000 interest on traced debt incurred during the two measurement periods beginning January 1, 1995, and ending June 30, 1995. Because D satisfied the 120-day rule under this paragraph (g), D is not required to capitalize interest with respect to the accumulated production expenditures for the units for the measurement period beginning July 1, 1995, and ending September 30, 1995, which is the first measurement period that begins after the date production activities cease. D is rquired to resume interest capitalization with respect to the $2,300,000 (2,000,000 + 100,000 + 200,000) of accumulated production expenditures for the units for the measurement period beginning October 1, 1996, and ending December 31, 1996 (the measurement period during which production activities resume). Accordingly, D may suspend the capitalization of interest with respect to the units from July 1, 1995, through September 30, 1996.

[T.D. 8584, 59 FR 67212, Dec. 29, 1994; 60 FR 16575, Mar. 31, 1995]

§ 1.263A–13 Oil and gas activities.

(a) *In general.* This section provides rules that are to be applied in tandem with §§ 1.263A–8 through 1.263A–12, 1.263A–14, and 1.263A–15 in capitalizing interest with respect to the development (within the meaning of section 263A(g)) of oil or gas property. For this purpose, oil or gas property consists of each separate operating mineral interest in oil or gas as defined in section 614(a), or, if a taxpayer makes an election under section 614(b), the aggregate of two or more separate operating mineral interests in oil or gas as described in section 614(b) (section 614 property). Thus, an oil or gas property is designated property unless the de minimis rule applies. A taxpayer must apply the rules in paragraph (c) of this section if the taxpayer cannot establish, at the beginning of the production period of the first well drilled on the property, a definite plan that identifies the number and location of other wells planned with respect to the property. If a taxpayer can establish such a plan at the beginning of the production period of the first well drilled on the property, the taxpayer may either apply the rules of paragraph (c) of this section or treat each of the planned wells as a separate unit and partition the leasehold acquisition costs and costs of common features based on the number of planned well units.

(b) *Generally applicable rules*—(1) *Beginning of production period*—(i) *Onshore activities.* In the case of onshore oil or gas development activities, the production period for a unit begins on the first date physical site preparation activities (such as building an access road, leveling a site for a drilling rig, or excavating a mud pit) are undertaken with respect to the unit.

(ii) *Offshore activities.* In the case of offshore development activities, the production period for a unit begins on the first date physical site preparation activities, other than activities undertaken with respect to expendable wells, are undertaken with respect to the unit. For purposes of the preceding sentence, the first physical site preparation activity undertaken with respect to a section 614 property is generally the first activity undertaken with respect to the anchoring of a platform (e.g., drilling to drive the piles). For purposes of this section, an expendable well is a well drilled solely to determine the location and delineation of offshore hydrocarbon deposits.

(2) *End of production period.* The production period ends for a productive well unit on the date the well is placed in service and all production activities reasonably expected to be undertaken by, or for, the taxpayer or a related person are completed. See § 1.263A–12(d).

(3) *Accumulated production expenditures*—(i) *Costs included.* Accumulated production expenditures for a well unit include the following costs (to the extent they are not intangible drilling and development costs allowable as a deduction under section 263(c), 263(i), or 291(b)(2)): the costs of acquiring the section 614 leasehold and the costs of taxes and similar items that are required to be capitalized under section 263A(a) with respect to the section 614 leasehold; the cost of real property associated with developing the section 614 property (e.g., casing); the basis of real property that constitutes a common feature within the meaning of § 1.263A–10(b)(3); and the adjusted basis of property used to produce property (such as a mobile rig, drilling ship, or an offshore drilling platform).

(ii) *Improvement unit.* To the extent section 614 costs are allocated to a well unit, the undepleted portion of those section 614 costs must also be included in the accumulated production expenditures for any improvement unit (within the meaning of § 1.263A–8(d)(3)) with respect to that well unit.

(c) *Special rules when definite plan not established*—(1) *In general.* The special rules of this paragraph (c) must be applied by a taxpayer that cannot establish, at the beginning of the production period of the first well drilled on the property, a definite plan that identifies the number and location of the wells planned with respect to the property. A taxpayer than can establish such a plan is permitted, but not required, to apply the rules of this paragraph (c), provided the rules of this paragraph (c) are consistently applied for all the taxpayer's oil or gas properties for which a definite plan can be established.

(2) *Oil and gas units*—(i) *First productive well unit.* Until the first productive well is placed in service and all production activities reasonably expected to be undertaken by, or for, the taxpayer or a related person are completed, a first productive well unit includes the section 614 property and all real property associated with the development of the section 614 property. Thus, for example, a first productive well unit includes the section 614 property and real property associated with any nonproductive well drilled on the section 614 property on or before the date the first productive well is placed in service and all production activities reasonably expected to be undertaken by, or for, the taxpayer or a related person are completed. For purposes of this section, a productive well is a well that produces in commercial quantities. See

paragraph (c)(5) of this section, which provides a special rule whereby the costs of a section 614 property and common feature costs for a section 614 property generally are included only in the accumulated production expenditures for the first productive well unit.

(ii) *Subsequent units.* Generally, real property associated with each productive or nonproductive well with respect to which production activities begin after the date the first productive well is placed in service and all production activities reasonably expected to be undertaken by, or for, the taxpayer or a related person are completed, constitutes a unit of real property. Additionally, a productive or nonproductive well that is included in a first productive well unit and for which development continues after the date the first productive well is placed in service and all production activities reasonably expected to be undertaken by, or for, the taxpayer or a related person are completed, generally is treated as a separate unit of property after that date. See, however, paragraph (c)(5) of this section, which provides rules for the treatment of costs included in the accumulated production expenditures of a first productive well unit.

(3) *Beginning of production period*—(i) *First productive well unit.* The beginning of the production period of the first productive well unit is determined as provided in paragraph (b) of this section.

(ii) *Subsequent wells.* In applying paragraph (b) of this section to subsequent well units (as described in paragraph (c)(2)(ii) of this section), any activities occurring prior to the date the production period ends for the first productive well unit are not taken into account in determining the beginning of the production period for the subsequent well units.

(4) *End of production period.* The end of the production period for both the first productive well unit and subsequent productive well units is determined as provided in paragraph (b)(2) of this section. See §1.263A–12(d). Nonproductive wells included in the first productive well unit need not be plugged and abandoned for the production period to end for a first productive well unit.

(5) *Accumulated production expenditures*—(i) *First productive well unit.* The accumulated production expenditures for a first productive well unit include all costs incurred with respect to the section 614 property and associated real property at any time through the end of the production period for the first productive well unit. Thus, the costs of acquiring the section 614 property, the costs of taxes and similar items that are required to be capitalized under section 263A(a) with respect to the section 614 property, and the costs of common features, that are incurred at any time through the end of the production period of the first productive well unit (section 614 costs) are included in the accumulated production expenditures for the first productive well unit.

(ii) *Subsequent well unit.* The accumulated production expenditures for a subsequent well do not include any costs included in the accumulated production expenditures for a first productive well unit. In the event that section 614 costs or common feature costs with respect to a section 614 property are incurred subsequent to the end of the production period of the first productive well unit, those common feature costs and undepleted section 614 costs are allocated among the accumulated production expenditures of wells being drilled as of the date such costs are incurred.

(6) *Allocation of interest capitalized with respect to first productive well unit.* Interest attributable to any productive or nonproductive well included in the first productive well unit (within the meaning of paragraph (c)(2)(ii) of this section) is allocated among and capitalized to the basis of the property associated with the first productive well unit. See §1.263A–8(a)(2).

(7) *Example.* The provisions of this paragraph (c) are illustrated by the following example.

Example. (i) Corporation Z, an oil company, acquired a section 614 property in an onshore tract, Tract B, for development. In 1995, Corporation Z began site preparation activities on Tract B and also commenced drilling Well 1 on Tract B. Corporation Z was unable to establish, as provided in paragraph (a) of this section, a definite plan identifying the number and location of other wells planned on Tract B. In 1996, Corporation Z began drilling Well 2. On May 1, 1997, Well 2, a productive well, was placed in service and all production activities reasonably expected to be undertaken with respect to Well 2 were completed. By that date, also, Well 1 was abandoned.

(ii) Well 2 is a first productive well (within the meaning of paragraph (c)(2)(i) of this section). Well 1 is a nonproductive well drilled prior to a first productive well. Under paragraph (c) of this section, Corporation Z must treat both Well 1 and Well 2 as part of the first productive well unit on the section 614 property. In accordance with paragraphs (c)(3) and (c)(4) of this section, the production period of the first productive well unit begins on the date physical site preparation activities are undertaken with respect to Well 1 in 1995 and ends on May 1, 1997, the date that Well 2 is placed in service and all production activities reasonably expected to be undertaken are completed. In accordance with paragraph (c)(5) of this section, the accumulated production expenditures for the first productive well unit include, among other capitalized costs, the entire section 614 property costs capitalized with respect to Tract B and all common feature costs incurred with respect to the section 614 property through May 1, 1997.

(iii) Any well that Corporation Z begins after May 1, 1997, is a separate unit of property. See paragraph (c)(2)(ii) of this section. Under paragraph (c)(3)(ii) of this section, the production period for any such well unit begins on the first day after May 1, 1997, on which Corporation Z undertakes physical site preparation activities with respect to the well unit. Moreover, Corporation Z does not include any of the section 614 property costs in the accumulated production expenditures for any well unit begun after May 1, 1997.

[T.D. 8584, 59 FR 67213, Dec. 29, 1994; 60 FR 16575, Mar. 31, 1995]

§ 1.263A–14 Rules for related persons.

Taxpayers must account for average excess expenditures allocated to related persons under applicable administrative pronouncements interpreting section 263A(f). See § 601.601(d)(2)(ii)(*b*) of this chapter.

[T.D. 8584, 59 FR 67215, Dec. 29, 1994]

§ 1.263A–15 Effective dates, transitional rules, and anti-abuse rule.

(a) *Effective dates*—(1) Sections 1.263A–8 through 1.263A–15 generally apply to interest incurred in taxable years beginning on or after January 1, 1995. In the case of property that is inventory in the hands of the taxpayer, however, these sections are effective for taxable years beginning on or after January 1, 1995. Changes in methods of accounting necessary as a result of the rules in §§ 1.263A–8 through 1.263A–15 must be made under the terms and conditions prescribed by the Commissioner. Under these terms and conditions, the principles of § 1.263A–7 must be applied in revaluing inventory property.

(2) For taxable years beginning before January 1, 1995, taxpayers must take reasonable positions on their federal income tax returns when applying section 263A(f). For purposes of this paragraph (a)(2), a reasonable position is a position consistent with the temporary regulations, revenue rulings, revenue procedures, notices, and announcements concerning section 263A applicable in taxable years beginning before January 1, 1995. See § 601.601(d)(2)(ii)(*b*) of this chapter. For this purpose, Notice 88–99, 1988–2 C.B. 422, applies to taxable years beginning after August 17, 1988, in the case of inventory, and to interest incurred in taxable years beginning after August 17, 1988, in all other cases. Finally, under administrative procedures issued by the Commissioner, taxpayers may elect early application of §§ 1.263A–8 through 1.263A–15 to taxable years beginning on or after January 1, 1994, in the case of inventory property, and to interest incurred in taxable years beginning on or after January 1, 1994, in the case of property that is not inventory in the hands of the taxpayer.

(3) Section 1.263A–9(a)(4)(ix) generally applies to interest incurred in taxable years beginning on or after May 20, 2004. In the case of property that is inventory in the hands of the taxpayer, § 1.263A–9(a)(4)(ix) applies to taxable years beginning on or after May 20, 2004. Taxpayers may elect to apply § 1.263A–9(a)(4)(ix) to interest incurred in taxable years beginning on or after January 1, 1995, or, in the case of property that is inventory in the hands of the taxpayer, to taxable years beginning on or after January 1, 1995. A change in a taxpayer's treatment of interest to a method consistent with § 1.263A–9(a)(4)(ix) is a change in method of accounting to which sections 446 and 481 apply.

(4) Section 1.263A–9(g)(1)(i) applies to taxable years beginning on or after November 13, 2020. However, taxpayers and their related parties, within the meaning of sections 267(b) and 707(b)(1), may choose to apply the rules of that section to a taxable year beginning after December 31, 2017, so long as the taxpayers and their related parties consistently apply the rules of the section 163(j) regulations (as defined in §1.163(j)–1(b)(37)), and, if applicable, §§1.381(c)(20)–1, 1.382–1, 1.382–2, 1.382–5, 1.382–6, 1.382–7, 1.383–0, 1.383–1, 1.469–9, 1.469–11, 1.704–1, 1.882–5, 1.1362–3, 1.1368–1, 1.1377–1, 1.1502–13, 1.1502–21, 1.1502–36, 1.1502–79, 1.1502–91 through 1.1502–99 (to the extent they effectuate the rules of §§1.382–2, 1.382–5, 1.382–6, and 1.383–1), and 1.1504–4, to that taxable year.

(5) The last sentence of each of §1.263A–8(a)(1) and §1.263A–9(e)(2) apply to taxable years beginning on or after January 5, 2021. However, for a taxable year beginning after December 31, 2017, and before January 5, 2021, a taxpayer may apply the last sentence of each of §1.263A–8(a)(1) and §1.263A–9(e)(2), provided that the taxpayer follows all the applicable rules contained in the regulations under section 263A for such taxable year and all subsequent taxable years.

(b) *Transitional rule for accumulated production expenditures*—(1) *In general.* Except as provided in paragraph (b)(2) of this section, costs incurred before the effective date of section 263A are included in accumulated production expenditures (within the meaning of §1.263A–11) with respect to noninventory property only to the extent those costs were required to be capitalized under section 263 when incurred and would have been taken into account in determining the amount of interest required to be capitalized under former section 189 (relating to the capitalization of real property interest and taxes) or pursuant to an election that was in effect under section 266 (relating to the election to capitalize certain carrying charges).

(2) *Property used to produce designated property.* The basis of property acquired prior to 1987 and used to produce designated noninventory property after December 31, 1986, is included in accumulated production expenditures in accordance with §1.263A–11(d) without regard to whether the basis would have been taken into account under former section 189 or section 266.

(c) *Anti-abuse rule.* The interest capitalization rules contained in §§1.263A–8 through 1.263A–15 must be applied by the taxpayer in a manner that is consistent with and reasonably carries out the purposes of section 263A(f). For example, in applying §1.263A–10, regarding the definition of a unit of property, taxpayers may not divide a single unit of property to avoid property classifying the property as designated property. Similarly, taxpayers may not use loans in lieu of advance payments, tax-exempt parties, loan restructurings at measurement dates, or obligations bearing an unreasonably low rate of interest (even if such rate equals or exceeds the applicable Federal rate under section 1274(d)) to avoid the purposes of section 263A(f). For purposes of this paragraph (c), the presence of back-to-back loans with different rates of interest, and other uses of related parties to facilitate an avoidance of interest capitalization, evidences abuse. In such cases, the District Director may, based upon all the facts and circumstances, determine the amount of interest that must be capitalized in a manner that is consistent with and reasonably carries out the purposes of section 263A(f).

[T.D. 8584, 59 FR 67215, Dec. 29, 1994, as amended by T.D. 8728, 62 FR 42062, Aug. 5, 1997; T.D. 9179, 70 FR 8730, Feb. 23, 2005; T.D. 9905, 85 FR 56832, Sept. 14, 2020; 86 FR 32186, June 17, 2021]

§ 1.264–1 Premiums on life insurance taken out in a trade or business.

(a) *When premiums are not deductible.* Premiums paid by a taxpayer on a life insurance policy are not deductible from the taxpayer's gross income, even though they would otherwise be deductible as trade or business expenses, if they are paid on a life insurance policy covering the life of any officer or employee of the taxpayer, or any person (including the taxpayer) who is financially interested in any trade or business carried on by the taxpayer, when the taxpayer is directly or indirectly a beneficiary of the policy. For additional provisions relating to the nondeductibility of premiums paid on life insurance policies (whether under section 162 or any other section of the Code), see section 262, relating to personal, living, and family expenses, and section 265, relating to expenses allocable to tax-exempt income.

(b) *When taxpayer is a beneficiary.* If a taxpayer takes out a policy for the purpose of protecting himself from loss in the event of the death of the insured, the taxpayer is considered a beneficiary directly or indirectly under the policy. However, if the taxpayer is not a beneficiary under the policy, the premiums so paid will not be disallowed as deductions merely because the taxpayer may derive a benefit from the increased efficiency of the officer or employee insured. See section 162 and the regulations thereunder. A taxpayer is considered a beneficiary under a policy where, for example, he, as a principal member of a partnership, takes out an insurance policy on his own life irrevocably designating his partner as the sole beneficiary in order to induce his partner to retain his investment in the partnership. Whether or not the taxpayer is a beneficiary under a policy, the proceeds of the policy paid by reason of the death of the insured may be excluded from gross income whether the beneficiary is an individual or a corporation, except in the case of (1) certain transferees, as provided in section 101(a)(2); (2) portions of amounts of life insurance proceeds received at a date later than death under the provisions of section 101(d); and (3) life insurance policy proceeds which are includible in the gross income of a husband or wife under section 71 (relating to alimony) or section 682 (relating to income of an estate or trust in case of divorce, etc.). (See section 101(e).) For further reference, see, generally, section 101 and the regulations thereunder.

§ 1.264–2 Single premium life insurance, endowment, or annuity contracts.

Amounts paid or accrued on indebtedness incurred or continued, directly or indirectly, to purchase or to continue in effect a single premium life insurance or endowment contract, or to purchase or to continue in effect a single premium annuity contract purchased (whether from the insurer, annuitant, or any other person) after March 1, 1954, are not deductible under section 163 or any other provision of chapter 1 of the Code. This prohibition applies even though the insurance is not on the life of the taxpayer and regardless of whether or not the taxpayer is the annuitant or payee of such annuity contract. A contract is considered a single premium life insurance, endowment, or annuity contract, for the purposes of this section, if substantially all the premiums on the contract are paid within four years from the date on which the contract was purchased, or if an amount is deposited after March 1, 1954, with the insurer for payment of a substantial number of future premiums on the contract.

§ 1.264–3 Effective date; taxable years ending after March 1, 1954, subject to the Internal Revenue Code of 1939.

Pursuant to section 7851(a)(1)(C), the regulations prescribed in § 1.264–2, to the extent that they relate to amounts paid or accrued on indebtedness incurred or continued to purchase or carry a single premium annuity contract purchased after March 1, 1954, and to the extent they consider a contract a single premium life insurance, endowment, or annuity contract if an amount is deposited after March 1, 1954, with the insurer for payment of a substantial number of future premiums on the contract, shall also apply to taxable years beginning before January 1, 1954, and ending after March 1, 1954, and to taxable years beginning after December 31, 1953, and ending after March 1, 1954, but before August 17, 1954, although such years are subject to the Internal Revenue Code of 1939.

§ 1.264–4 Other life insurance, endowment, or annuity contracts.

(a) *General rule.* Except as otherwise provided in paragraphs (d) and (e) of this section, no deduction shall be allowed under section 163 or any other provision of chapter 1 of the Code for any amount (determined under paragraph (b) of this section) paid or accrued during the taxable year on indebtedness incurred or continued to purchase or continue in effect a life insurance, endowment, or annuity contract (other than a single premium contract or a contract treated as a single premium contract) if such indebtedness is incurred pursuant to a plan of purchase which contemplates the systematic direct or indirect borrowing of part or all of the increases in the cash value of such contract (either from the insurer or otherwise). For the purposes of the preceding sentence, the term *of purchase* includes the payment of part or all of the premiums on a contract, and not merely payment of the premium due upon inital issuance of the contract. The rule of this paragraph applies whether or not the taxpayer is the insured, payee, or annuitant under the contract. the rule of this paragraph does not apply to contracts purchased by the taxpayer on or before August 6, 1963, even though there is a substantial increase in premiums after such date. The rule of this paragraph does not apply to any amount paid or accrued on indebtedness incurred or continued to purchase or carry a single premium life insurance, endowment, or annuity contract (including a contract treated as a single premium contract); the treatment of such amounts is governed by §1.264–2.

(b) *Determination of amount not allowed.* The amount not allowed as a deduction under paragraph (a) of this section is determined with reference to the entire amount of borrowing to purchase or carry the contract, and is not limited with reference to the amount of borrowing of increases in the cash value. The rule of this paragraph may be illustrated by the following example:

Example. A, a calendar year taxpayer using the cash receipts and disbursements method of accounting, on January 1, 1964, purchases from a life insurance company a policy in the amount of $100,000 with an annual gross premium of $2,200. For the first policy year, A pays the annual premium by means other than by borrowing. For the second, third, fourth, and fifth policy years, A continues the policy in effect by incurring indebtedness pursuant to a plan referred to in paragraph (a) of this section. The years and amounts applicable to the policy are as follows:

Years	Cumulative cash value of contract	Total loan outstanding	Interest paid at 4.8 percent
1964	$370	0	0
1965	2,175	$2,200	$105.60
1966	4,000	4,400	211.20
1967	5,865	6,600	316.80
1968	7,745	8,800	422.40

On these facts (assuming that none of the exceptions contained in paragraph (d) of this section are applicable), no deduction is allowed for the interest paid during the year 1968. Moreover, the interest deduction will be disallowed for the taxable years 1965 through 1967 if such taxable years are not closed by reason of the statute of limitations or other rule of law.

(c) *Special rules.* For purposes of this section:

(1) *Determination of existence of a plan which contemplates systematic borrowing*—(i) *In general.* The determination of whether indebtedness is incurred or continued pursuant to a plan referred to in paragraph (a) of this section shall be made on the basis of all the facts and circumstances in each case. Unless the taxpayer shows otherwise, in the case of borrowing in connection with premiums for more than three years, the existence of a plan referred to in paragraph (a) of this section will be presumed. The mere fact that a taxpayer does not borrow to pay a premium in a particular year does not in and of itself preclude the existence of a plan referred to in paragraph (a) of this section. A plan referred to in paragraph (a) of this section need not exist at the time the contract is entered into, but may come into existence at any time during the 7-year period following the taxpayer's purchase of the contract or following a substantial increase (referred to in paragraph (d)(1) of this section) in premiums on the contract.

(ii) *Premium attributable to more than one year.* For purposes of subdivision (i) of this subparagraph, if the stated annual premiums due on a contract vary in amount, borrowing in connection with any premium, the amount of which exceeds the amount of any other premium, on such contract may be considered borrowing to pay premiums for more than one year. The preceding sentence shall not apply where the borrowing is in connection with a substantially increased premium within the meaning of paragraph (d)(1) of this section.

(2) *Direct or indirect.* A plan referred to in paragraph (a) of this section may contemplate direct or indirect borrowing of increases in cash value of the contract directly or indirectly to pay premiums and many contemplate borrowing either from an insurance carrier, from a bank, or from any other person. Thus, for example, if a taxpayer borrows $100,000 from a bank and uses the funds to purchase securities, later borrows $100,000 from a second bank and uses the funds to repay the first bank, later sells the securities and uses the funds as a part of a plan referred to in paragraph (a) of this section to pay premiums on a contract of cash value life insurance, the deduction for interest paid in continuing the loan from the second bank shall not be allowed (assuming that none of the exceptions contained in paragraph (d) of this section are applicable). Moreover, a plan referred to in paragraph (a) of this section need not involve a pledge of the contract, but may contemplate unsecured borrowing or the use of other property.

(d) *Exceptions.* No deduction shall be denied under paragraph (a) of this section with respect to any amount paid or accrued during a taxable year on indebtedness incurred or continued as part of a plan referred to in paragraph (a) of this section if any of the following exceptions apply.

(1) *The 7-year exception*—(i) *In general.* No part of 4 of the annual premiums due during the 7-year period (beginning with the date the first premium on the contract to which such plan relates was paid) is paid under such plan by means of indebtedness. For purposes of this exception, in the event of a substantial increase in any annual premium on a contract, a new 7-year period begins on the date such increased premium is paid. If premiums on a contract are payable other than on an annual basis (for example, monthly), the annual premium is the aggregate of premiums due for the year. See paragraph (c)(1)(ii) of this section for cases where one premium on a contract paid by means of indebtedness may be considered as more than one annual premium.

(ii) *Application of borrowings.* For purposes of subdivision (i) of this subparagraph, if during a 7-year period referred to in such subdivision the taxpayer, directly or indirectly, borrows with respect to more than one annual premium on a contract, such borrowing shall be considered first attributable to the premium for the current policy year (within the meaning of subdivision (iii) of this subparagraph) and then attributable to premiums for prior policy years beginning with the most recent prior policy year (but not including any prior policy year to the extent that such taxpayer has indebtedness outstanding with respect to the premium for such prior policy year). If such borrowing exceeds the premiums paid for the current policy year and for prior policy years and the taxpayer has, with respect to the current policy year, deposited premiums in advance of the due date of such premiums, such excess borrowing shall be considered indebtedness incurred to carry the contract which is attributable to the premiums deposited for succeeding policy years beginning with the premium for the next succeeding policy year. The preceding sentence shall not apply to a single premium contract referred to in §1.264–2.

(iii) *Current policy year.* For purposes of subdivision (ii) of this subparagraph, the term *current policy year* refers to the policy year which begins with or within the taxable year of the taxpayer.

(iv) *Illustrations.* The provisions of subdivision (ii) of this subparagraph may be illustrated by the following examples:

Example 1. A, a calendar year taxpayer using the cash receipts and disbursements method of accounting, on January 1, 1964, purchases from a life insurance company a policy in the amount of $100,000 with an annual gross premium of $2,200. For the first four policy years, A initially pays the annual premium by means other than borrowing. On January 1, 1968, pursuant to a plan referred to in paragraph (a) of this section, A borrows $10,000 with respect to the policy. Such borrowing is considered first attributable to paying the premium for the year 1968 and then attributable to paying the premiums for the years 1967, 1966, 1965, and 1964 (in part). No deduction is allowed for the interest paid by A on the $10,000 indebtedness during the year 1968.

Example 2. The facts are the same as in *Example 1,* except that on January 1, 1964, A pays the first annual premium and deposits an amount equal to the second and third annual premiums, all such amounts initially being paid or deposited by means other than borrowing. On January 1, 1965, A deposits an amount equal to the fourth, fifth, and sixth annual premiums, and borrows $4,400 pursuant to a plan referred to in paragraph (a) of this section. Such borrowing is considered attributable to the premiums paid for the policy years 1965 and 1964. On January 1, 1966, A deposits an amount equal to the seventh, eighth, and ninth annual premiums, and borrows $6,600 pursuant to such plan. Such borrowing is considered attributable to the premium paid for the policy year 1966 and deposited for the policy years 1967 and 1968. No deduction is allowed for interest paid by A on the $11,000 indebtedness during 1966. Moreover, the interest deduction will be disallowed for the taxable year 1965. However, if this contract is treated as a single premium contract under §1.264–2 (by reason of deposit with the insurer of an amount for payment of a substantial number of future premiums), the deduction for interest on indebtedness incurred or continued to purchase or carry the contract would be denied without reference to this section.

(2) *The $100 exception.* The total amount paid or accrued during the taxable year by the taxpayer who has entered one or more plans referred to in paragraph (a) of this section for which (without regard to this subparagraph) no deduction would be allowable under paragraph (a) of this section does not exceed $100. Where the amount so paid or accrued during the taxable year exceeds $100, the entire amount shall be subject to the general rule of paragraph (a) of this section.

(3) *The unforeseen events exception.* The amount is paid or accrued by the taxpayer on indebtedness incurred because of an unforeseen substantial loss of such taxpayer's income or an unforeseen substantial increase in such taxpayer's financial obligations. A loss of income or increase in financial obligations is not unforeseen, within the meaning of this subparagraph, if at the time of the purchase of the contract such event was or could have been foreseen. College education expenses are foreseeable; however, if college expenses substantially increase, then to the extent that such increases are unforeseen, this exception will apply. This exception applies only if the plan referred to in paragraph (a) of this section arises because of the unforeseen event. Thus, for example, if a taxpayer or his family incur substantial unexpected medical expenses or the taxpayer is laid off from his job, and for that reason systematically borrows against the cash value of a previously purchased contract, the deduction for the interest paid on the loan will not be denied, whether or not the loan is used to pay a premium on the contract.

(4) *The trade or business exception.* The indebtedness is incurred by the taxpayer in connection with his trade or business. To be within this exception, the indebtedness must be incurred to finance business obligations rather than to finance cash value life insurance. Thus, if a taxpayer pledges a life insurance, endowment, or annuity contract as part of the collateral for a loan to finance the expansion of inventory or capital improvements for his business, no part of the deduction for interest on such loan will be denied under paragraph (a) of this section. Borrowing by a business taxpayer to finance business life insurance such as under so-called keyman, split dollar, or stock retirement plans is not considered to be incurred in connection with the taxpayer's trade or business within the meaning of this subparagraph. The determination of whether the indebtedness is incurred in connection with the taxpayer's trade or business, within the meaning of this exception, rather than to finance cash value life insurance shall be made on the basis of all the facts and circumstances. The provisions of this subparagraph may be illustrated by the following examples:

Example 1. Corporation M each year borrows substantial sums to carry on its business. Corporation M agrees to provide a retirement plan for its employees and purchases level premium life insurance to fund its obligation under the plan. The mere fact that M Corporation purchases a cash value life insurance policy will not cause its deduction for interest paid on its normal indebtedness to be denied even though the policy is later used as part of the collateral for its normal indebtedness.

Example 2. Corporation R has $200,000 of bonds outstanding and purchases cash value life insurance policies on several of its key employees. Such purchase by R Corporation will not, of itself, cause its deduction for interest on its bonded indebtedness to be denied. If, however, the premiums on the life insurance policies are $10,000 each year, the cash value increases by $8,000 each year, and R Corporation increases its indebtedness by $10,000 each year, its deduction for interest on such indebtedness will not be allowed under the rule of paragraph (a) of this section. On the other hand, the absence of such a directly parallel increase will not of itself establish that the deduction for interest is allowable.

(e) *Applicability of section.* The rules of this section apply with respect to taxable years beginning after December 31, 1963, but only with respect to contracts purchased after August 6, 1963. With respect to contracts entered into on or before August 6, 1963, but purchased or acquired whether from the insurer, insured, or any other person (other than by gift, bequest, or inheritance, or in a transaction to which section 381(a) of the Code applies) after such date, the rules of this section apply after such purchase or acquisition.

[T.D. 6773, 29 FR 15751, Nov. 24, 1964]

§ 1.265–1 Expenses relating to tax-exempt income.

(a) *Nondeductibility of expenses allocable to exempt income.* (1) No amount shall be allowed as a deduction under any provision of the Code for any expense or amount which is otherwise allowable as a deduction and which is allocable to a class or classes of exempt income other than a class or classes of exempt interest income.

(2) No amount shall be allowed as a deduction under section 212 (relating to expenses for production of income) for any expense or amount which is otherwise allowable as a deduction and which is allocable to a class or classes of exempt interest income.

(b) *Exempt income and nonexempt income.* (1) As used in this section, the term *class of exempt income* means any class of income (whether or not any amount of income of such class is received or accrued) wholly exempt from the taxes imposed by Subtitle A of the Code. For purposes of this section, a class of income which is considered as wholly exempt from the taxes imposed by subtitle A includes any class of income which is:

(i) Wholly excluded from gross income under any provision of Subtitle A, or

(ii) Wholly exempt from the taxes imposed by Subtitle A under the provisions of any other law.

(2) As used in this section the term *nonexempt income* means any income which is required to be included in gross income.

(c) *Allocation of expenses to a class or classes of exempt income.* Expenses and amounts otherwise allowable which are directly allocable to any class or classes of exempt income shall be allocated thereto; and expenses and amounts directly allocable to any class or classes of nonexempt income shall be allocated thereto. If an expense or amount otherwise allowable is indirectly allocable to both a class of nonexempt income and a class of exempt income, a reasonable proportion thereof determined in the light of all the facts and circumstances in each case shall be allocated to each.

(d) *Statement of classes of exempt income; records.* (1) A taxpayer receiving any class of exempt income or holding any property or engaging in any activity the income from which is exempt shall submit with his return as a part thereof an itemized statement, in detail, showing (i) the amount of each class of exempt income, and (ii) the amount of expenses and amounts otherwise allowable allocated to each such class (the amount allocated by apportionment being shown separately) as required by paragraph (c) of this section. If an item is apportioned between a class of exempt income and a class of nonexempt income, the statement shall show the basis of the apportionment. Such statement shall also recite that each deduction claimed in the return is not in any way attributable to a class of exempt income.

(2) The taxpayer shall keep such records as will enable him to make the allocations required by this section. See section 6001 and the regulations thereunder.

§ 1.265–2 Interest relating to tax exempt income.

(a) *In general.* No amount shall be allowed as a deduction for interest on any indebtedness incurred or continued to purchase or carry obligations, the interest on which is wholly exempt from tax under subtitle A of the Code, such as municipal bonds, Panama Canal loan 3-percent bonds, or obligations of the United States, the interest on which is wholly exempt from tax under Subtitle A, and which were issued after September 24, 1917, and not originally subscribed for by the taxpayer. Interest paid or accrued within the taxable year on indebtedness incurred or continued to purchase or carry (1) obligations of the United States issued after September 24, 1917, the interest on which is not wholly exempt from the taxes imposed under Subtitle A of the Code, or (2) obligations of the United States issued after September 24, 1917, and originally subscribed for by the taxpayer, the interest on which is wholly exempt from the taxes imposed by Subtitle A of the Code, is deductible. For rules as to the inclusion in gross income of interest on certain governmental obligations, see section 103 and the regulations thereunder.

(b) *Special rule for certain financial institutions.* (1) No deduction shall be disallowed, for taxable years ending after February 26, 1964, under section 265(2) for interest paid or accrued by a financial institution which is a face-amount certificate company registered under the Investment Company Act of 1940 (15 U.S.C. 80a–1 and following) and which is subject to the banking laws of the State in which it is incorporated, on face-amount certificates (as defined in section 2(a)(15) of the Investment Company Act of 1940) issued by such institution and on amounts received for the purchase of such certificates to be issued by the institution, if the average amount of obligations, the interest on which is wholly exempt from the taxes imposed by Subtitle A of the Code, held by such institution during the taxable year, does not exceed 15 percent of the average amount of the total assets of such institution during such year. See subparagraph (3) of this paragraph for treatment of interest paid or accrued on face-amount certificates where the figure is in excess of 15 percent. Interest expense other than that paid or accrued on face-amount certificates or on amounts received for the purchase of such certificates does not come within the rules of this paragraph.

(2) This subparagraph is prescribed under the authority granted the Secretary or his delegate under section 265(2) to prescribe regulations governing the determination of the average amount of tax-exempt obligations and of the total assets held during an institution's taxable year. The average amount of tax-exempt obligations held during an institution's taxable year shall be the average of the amounts of tax-exempt obligations held at the end of each month ending within such taxable year. The average amount of total assets for a taxable year shall be the average of the total assets determined at the beginning and end of the institution's taxable year. If the Commissioner, however, determines that any such amount is not fairly representative of the average amount of tax-exempt obligations or total assets, as the case may be, held by such institution during such taxable year, then the Commissioner shall determine the amount which is fairly representative of the average amount of tax-exempt obligations or total assets, as the case may be. The percentage which the average amount of tax-exempt obligations is of the average amount of total assets is determined by dividing the average amount of tax-exempt obligations by the average amount of total assets, and multiplying by 100. The amount of tax-exempt obligations means that portion of the total assets of the institution which consists of obligations the interest on which is wholly exempt from tax under Subtitle A of the Code, and valued at their adjusted basis, appropriately adjusted for amortization of premium or discount. Total assets means the sum of the money, plus the aggregate of the adjusted basis of the property other than money held by the taxpayer in good faith for the purpose of the business. Such adjusted basis for any asset is its adjusted basis for determining gain upon sale or exchange for Federal income tax purposes.

(3) If the percentage computation required by subparagraph (2) of this paragraph results in a figure in excess of 15 percent for the taxable year, there is interest that does not come within the special rule for certain financial institutions contained in section 265(2). The amount of such interest is obtained by multiplying the total interest paid or accrued for the taxable year on face-amount certificates and on amounts received for the purchase of such certificates by the percentage figure equal to the excess of the percentage figure computed under subparagraph (2) of this paragraph over 15 percent. See paragraph (a) for the disallowance of interest on indebtedness incurred or continued to purchase or carry obligations the interest on which is wholly exempt from tax under Subtitle A of the Code.

(4) Every financial institution claiming the benefits of the special rule for certain financial institutions contained in section 265(2) shall file with its return for the taxable year:

(i) A statement showing that it is a face-amount certificate company registered under the Investment Company Act of 1940 (15 U.S.C. 80a–1 and following) and that it is subject to the banking laws of the State in which it is incorporated.

(ii) A detailed schedule showing the computation of the average amount of tax-exempt obligations, the average amount of total assets of such institutions, and the total amount of interest paid or accrued on face-amount certificates and on amounts received for the purchase of such certificates for the taxable year.

[T.D. 6927, 32 FR 13221, Sept. 19, 1967]

§ 1.265–3 Nondeductibility of interest relating to exempt-interest dividends.

(a) *In general.* No deduction is allowed to a shareholder of a regulated investment company for interest on indebtedness that relates to exempt-interest dividends distributed by the company to the shareholder during the shareholder's taxable year.

(b) *Interest relating to exempt-interest dividends.* (1) All or a portion of the interest on an indebtedness relates to exempt-interest dividends if the indebtedness is either incurred or continued to purchase or carry shares of stock of a regulated investment company that distributes exempt-interest dividends (as defined in section 852(b)(5) of the Code) to the holder of the shares during the shareholder's taxable year.

(2) To determine the amount of interest that relates to the exempt-interest dividends the total amount of interest paid or accrued on the indebtedness is multiplied by a fraction. The numerator of the fraction is the amount of exempt-interest dividends received by the shareholder. The denominator of the fraction is the sum of the exempt-interest dividends and taxable dividends received by the shareholder (excluding capital gain dividends received by the shareholder and capital gains required to be included in the shareholder's computation of long-term capital gains under section 852(b)(3)(D)).

[T.D. 7601, 44 FR 16013, Mar. 16, 1979]

§ 1.266–1 Taxes and carrying charges chargeable to capital account and treated as capital items.

(a)(1) *In general.* In accordance with section 266, items enumerated in paragraph (b)(1) of this section may be capitalized at the election of the taxpayer. Thus, taxes and carrying charges with respect to property of the type described in this section are chargeable to capital account at the election of the taxpayer, notwithstanding that they are otherwise expressly deductible under provisions of Subtitle A of the Code. No deduction is allowable for any items so treated.

(2) See §§ 1.263A–8 through 1.263A–15 for rules regarding the requirement to capitalize interest, that apply prior to the application of this section. After applying §§ 1.263A–8 through 1.263A–15, a taxpayer may elect to capitalize interest under section 266 with respect to designated property within the meaning of § 1.263A–8(b), provided a computation under any provision of the Internal Revenue Code is not thereby materially distorted, including computations relating to the source of deductions.

(b) *Taxes and carrying charges.* (1) The taxpayer may elect, as provided in paragraph (c) of this section, to treat the items enumerated in this subparagraph which are otherwise expressly deductible under the provisions of Subtitle A of the Code as chargeable to capital account either as a component of original cost or other basis, for the purposes of section 1012, or as an adjustment to basis, for the purposes of section 1016(a)(1). The items thus chargeable to capital account are:

(i) In the case of unimproved and unproductive real property: Annual taxes, interest on a mortgage, and other carrying charges.

(ii) In the case of real property, whether improved or unimproved and whether productive or unproductive:

(*a*) Interest on a loan (but not theoretical interest of a taxpayer using his own funds),

(*b*) Taxes of the owner of such real property measured by compensation paid to his employees,

(*c*) Taxes of such owner imposed on the purchase of materials, or on the storage, use, or other consumption of materials, and

(*d*) Other necessary expenditures,

paid or incurred for the development of the real property or for the construction of an improvement or additional improvement to such real property, up to the time the development or construction work has been completed. The development or construction work with respect to which such items are incurred may relate to unimproved and unproductive real estate whether the construction work will make the property productive of income subject to tax (as in the case of a factory) or not (as in the case of a personal residence), or may relate to property already improved or productive (as in the case of a plant addition or improvement, such as the construction of another floor on a factory or the installation of insulation therein).

(iii) In the case of personal property:

(*a*) Taxes of an employer measured by compensation for services rendered in transporting machinery or other fixed assets to the plant or installing them therein,

(*b*) Interest on a loan to purchase such property or to pay for transporting or installing the same, and

(*c*) Taxes of the owner thereof imposed on the purchase of such property or on the storage, use, or other consumption of such property,

paid or incurred up to the date of installation or the date when such property is first put into use by the taxpayer, whichever date is later.

(iv) Any other taxes and carrying charges with respect to property, otherwise deductible, which in the opinion of the Commissioner are, under sound accounting principles, chargeable to capital account.

(2) The sole effect of section 266 is to permit the items enumerated in subparagraph (1) of this paragraph to be chargeable to capital account notwithstanding that such items are otherwise expressly deductible under the provisions of Subtitle A of the Code. An item not otherwise deductible may not be capitalized under section 266.

(3) In the absence of a provision in this section for treating a given item as a capital item, this section has no effect on the treatment otherwise accorded such item. Thus, items which are otherwise deductible are deductible notwithstanding the provisions of this section, and items which are otherwise treated as capital items are to be so treated. Similarly, an item not otherwise deductible is not made deductible by this section. Nor is the absence of a provision in this section for treating a given item as a capital item to be construed as withdrawing or modifying the right now given to the taxpayer under any other provisions of subtitle A of the Code, or of the regulations thereunder, to elect to capitalize or to deduct a given item.

(c) *Election to charge taxes and carrying charges to capital account.* (1) If for any taxable year there are two or more items of the type described in paragraph (b)(1) of this section, which relate to the same project to which the election is applicable, the taxpayer may elect to capitalize any one or more of such items even though he does not elect to capitalize the remaining items or to capitalize items of the same type relating to other projects. However, if expenditures for several items of the same type are incurred with respect to a single project, the election to capitalize must, if exercised, be exercised as to all items of that type. For purposes of this section, a *project* means, in the case of items described in paragraph (b)(1)(ii) of this section, a particular development of, or construction of an improvement to, real property, and in the case of items described in paragraph (b)(1)(iii) of this section, the transportation and installation of machinery or other fixed assets.

(2)(i) An election with respect to an item described in paragraph (b)(1)(i) of this section is effective only for the year for which it is made.

(ii) An election with respect to an item described in:

(*a*) Paragraph (b)(1)(ii) of this section is effective until the development or construction work described in that subdivision has been completed;

(*b*) Paragraph (b)(1)(iii) of this section is effective until the later of either the date of installation of the property described in that subdivision, or the date when such property is first put into use by the taxpayer;

(*c*) Paragraph (b)(1)(iv) of this section is effective as determined by the Commissioner.

Thus, an item chargeable to capital account under this section must continue to be capitalized for the entire period described in this subdivision applicable to such election although such period may consist of more than one taxable year.

(3) If the taxpayer elects to capitalize an item or items under this section, such election shall be exercised by filing with the original return for the year for which the election is made a statement indicating the item or items (whether with respect to the same project or to different projects) which the taxpayer elects to treat as chargeable to capital account. Elections filed for taxable years beginning before January 1, 1954, and for taxable years ending before August 17, 1954, under section 24(a)(7) of the Internal Revenue Code of 1939, and the regulations thereunder, shall have the same effect as if they were filed under this section. See section 7807(b)(2).

(d) The following examples are illustrative of the application of the provisions of this section:

Example 1. In 1956 and 1957 A pays annual taxes and interest on a mortgage on a piece of real property. During 1956, the property is vacant and unproductive, but throughout 1957 A operates the property as a parking lot. A may capitalize the taxes and mortgage interest paid in 1956, but not the taxes and mortgage interest paid in 1957.

Example 2. In February 1957, B began the erection of an office building for himself. B in 1957, in connection with the erection of the building, paid $6,000 social security taxes, which in his 1957 return he elected to capitalize. B must continue to capitalize the social security taxes paid in connection with the erection of the building until its completion.

Example 3. Assume the same facts as in *Example 2* except that in November 1957, B also begins to build a hotel. In 1957 B pays $3,000 social security taxes in connection with the erection of the hotel. B's election to capitalize the social security taxes paid in erecting the office building started in February 1957 does not bind him to capitalize the social security taxes paid in erecting the hotel; he may deduct the $3,000 social security taxes paid in erecting the hotel.

Example 4. In 1957, M Corporation began the erection of a building for itself, which will take three years to complete. M Corporation in 1957 paid $4,000 social security taxes and $8,000 interest on a building loan in connection with this building. M Corporation may elect to capitalize the social security taxes although it deducts the interest charges.

Example 5. C purchases machinery in 1957 for use in his factory. He pays social security taxes on the labor for transportation and installation of the machinery, as well as interest on a loan to obtain funds to pay for the machinery and for transportation and installation costs. C may capitalize either the social security taxes or the interest, or both, up to the date of installation or until the machinery is first put into use by him, whichever date is later.

(e) *Allocation.* If any tax or carrying charge with respect to property is in part a type of item described in paragraph (b) of this section and in part a type of item or items with respect to which no election to treat as a capital item is given, a reasonable proportion of such tax or carrying charge, determined in the light of all the facts and circumstances in each case, shall be allocated to each item. The rule of this paragraph may be illustrated by the following example:

Example. N Corporation, the owner of a factory in New York on which a new addition is under construction, in 1957 pays its general manager, B, a salary of $10,000 and also pays a New York State unemployment insurance tax of $81 on B's salary. B spends nine-tenths of his time in the general business of the firm and the remaining one-tenth in supervising the construction work. N Corporation treats as expenses $9,000 of B's salary, and charges the remaining $1,000 to capital account. N Corporation may elect to capitalize $8.10 of the $81 New York State unemployment insurance tax paid in 1957 since such tax is deductible under section 164.

[T.D. 6500, 25 FR 11402, Nov. 26, 1960; 25 FR 14021, Dec. 31, 1960, as amended by T.D. 8584, 59 FR 67215, Dec. 29, 1994]

§ 1.267A–1 Disallowance of certain interest and royalty deductions.

(a) *Scope.* This section and §§ 1.267A–2 through 1.267A–5 provide rules regarding when a deduction for any interest or royalty paid or accrued is disallowed under section 267A. Section 1.267A–2 describes hybrid and branch arrangements. Section 1.267A–3 provides rules for determining income inclusions and provides that certain amounts are not amounts for which a deduction is disallowed. Section 1.267A–4 provides an imported mismatch rule. Section 1.267A–5 sets forth definitions and special rules that apply for purposes of section 267A. Section 1.267A–6 illustrates the application of section 267A through examples. Section 1.267A–7 provides applicability dates.

(b) *Disallowance of deduction.* This paragraph (b) sets forth the exclusive circumstances in which a deduction is disallowed under section 267A. Except as provided in paragraph (c) of this section, a specified party's deduction for any interest or royalty paid or accrued (the amount paid or accrued with respect to the specified party, a *specified payment*) is disallowed under section 267A to the extent that the specified payment is described in this paragraph (b). *See also* § 1.267A–5(b)(5) (treating structured payments as interest paid or accrued for purposes of section 267A and the regulations in this part under section 267A). A specified payment is described in this paragraph (b) to the extent that it is—

(1) A disqualified hybrid amount, as described in § 1.267A–2 (hybrid and branch arrangements);

(2) A disqualified imported mismatch amount, as described in § 1.267A–4 (payments offset by a hybrid deduction); or

(3) A specified payment for which the requirements of the anti-avoidance rule of § 1.267A–5(b)(6) are satisfied.

(c) *De minimis exception.* Paragraph (b) of this section does not apply to a specified party for a taxable year in which the sum of the specified party's specified payments that but for this paragraph (c) would be described in paragraph (b) of this section is less than $50,000. For purposes of this paragraph (c), specified parties that are related (within the meaning of § 1.267A–5(a)(14)) are treated as a single specified party.

[T.D. 9896, 85 FR 19836, Apr. 8, 2020]

§ 1.267A–2 Hybrid and branch arrangements.

(a) *Payments pursuant to hybrid transactions*—(1) *In general.* If a specified payment is made pursuant to a hybrid transaction, then, subject to § 1.267A–3(b) (amounts included or includible in income), the payment is a disqualified hybrid amount to the extent that—

(i) A specified recipient of the payment does not include the payment in income, as determined under § 1.267A–3(a) (to such extent, a *no-inclusion*); and

(ii) The specified recipient's no-inclusion is a result of the payment being made pursuant to the hybrid transaction. For purposes of this paragraph (a)(1)(ii), the specified recipient's no-inclusion is a result of the specified payment being made pursuant to the hybrid transaction to the extent that the no-inclusion would not occur were the specified recipient's tax law to treat the payment as interest or a royalty, as applicable. See § 1.267A–6(c)(1) and (2) for examples illustrating the application of paragraph (a) of this section.

(2) *Definition of hybrid transaction*—(i) *In general.* The term *hybrid transaction* means any transaction, series of transactions, agreement, or instrument one or more payments with respect to which are treated as interest or royalties for U.S. tax purposes but are not so treated for purposes of the tax law of a specified recipient of the payment. Examples of a hybrid transaction include an instrument a payment with respect to which is treated as interest for U.S. tax purposes but, for purposes of a specified recipient's tax law, is treated as a distribution with respect to equity or a recovery of principal with respect to indebtedness.

(ii) *Special rules*—(A) *Long-term deferral.* A specified payment is deemed to be made pursuant to a hybrid transaction if the taxable year in which a specified recipient of the payment takes the payment into account in income under its tax law (or, based on all the facts and circumstances, is reasonably expected to take the payment into account in income under its tax law) ends more than 36 months after the end of the taxable year in which the specified party would be allowed a deduction for the payment under U.S. tax law. In addition, if the tax law of a specified recipient of the specified payment does not impose an income tax, then such tax law does not cause the payment to be deemed to be made pursuant to a hybrid transaction under this paragraph (a)(2)(ii)(A). See §1.267A–6(c)(8) for an example illustrating the application of this paragraph (a)(2)(ii)(A) in the context of the imported mismatch rule.

(B) *Royalties treated as payments in exchange for property under foreign law.* In the case of a specified payment that is a royalty for U.S. tax purposes and for purposes of the tax law of a specified recipient of the payment is consideration received in exchange for property, the tax law of the specified recipient is not treated as causing the payment to be made pursuant to a hybrid transaction.

(C) *Coordination with disregarded payment rule.* A specified payment is not considered made pursuant to a hybrid transaction if the payment is a disregarded payment, as described in paragraph (b)(2) of this section.

(3) *Payments pursuant to securities lending transactions, sale-repurchase transactions, or similar transactions.* This paragraph (a)(3) applies if a specified payment is made pursuant to a repo transaction and is not regarded under a foreign tax law, but another amount connected to the payment (the *connected amount*) is regarded under such foreign tax law. For purposes of this paragraph (a)(3), a *repo transaction* means a transaction one or more payments with respect to which are treated as interest (as defined in §1.267A–5(a)(12)) or a structured payment (as defined in §1.267A–5(b)(5)(ii)) for U.S. tax purposes and that is a securities lending transaction or sale-repurchase transaction (including as described in §1.861–2(a)(7)), or other similar transaction or series of related transactions in which legal title to property is transferred and the property (or similar property, such as securities of the same class and issue) is reacquired or expected to be reacquired. For example, this paragraph (a)(3) applies if a specified payment arising from characterizing a repo transaction of stock in accordance with its substance (that is, characterizing the specified payment as interest) is not regarded as such under a foreign tax law but an amount consistent with the form of the transaction (such as a dividend) is regarded under such foreign tax law. When this paragraph (a)(3) applies, the determination of the identity of a specified recipient of the specified payment under the foreign tax law is made with respect to the connected amount. In addition, if the specified recipient includes the connected amount in income (as determined under §1.267A–3(a), by treating the connected amount as the specified payment), then the amount of the specified recipient's no-inclusion with respect to the specified payment is correspondingly reduced. Further, the principles of this paragraph (a)(3) apply to cases similar to repo transactions in which a foreign tax law does not characterize the transaction in accordance with its substance. See §1.267A–6(c)(2) for an example illustrating the application of this paragraph (a)(3).

(4) *Payments pursuant to interest-free loans and similar arrangements.* In the case of a specified payment that is interest for U.S. tax purposes, the following special rules apply:

(i) The payment is deemed to be made pursuant to a hybrid transaction to the extent that—

(A) Under U.S. tax law, the payment is imputed (for example, under section 482 or 7872, including because the instrument pursuant to which it is made is indebtedness but the terms of the instrument provide for an interest rate equal to or less than the risk-free rate or the rate on sovereign debt with similar terms in the relevant foreign currency); and

(B) A tax resident or taxable branch to which the payment is made does not take the payment into account in income under its tax law because such tax law does not impute any interest. The rules of paragraph (b)(4) of this section apply for purposes of determining whether the specified payment is made indirectly to a tax resident or taxable branch.

(ii) A tax resident or taxable branch the tax law of which causes the payment to be deemed to be made pursuant to a hybrid transaction under paragraph (a)(4)(i) of this section is deemed to be a specified recipient of the payment for purposes of paragraph (a)(1) of this section.
